no current cuckoos in our area, at least of the feathered variety! Used to be but think it was tiny pocket somewhere. big bird, such a cool call too. I didn't get that alert, curious what it said.

ok on fisher, figured it was just confusion on the type of product. You did such a great job on the FAQs and everyone who will be handling media inquiries is good with that. sure wish we'd get more timely response on final approvals from HQ on this though, esp. if they have any further changes.

*thank you!*

Huh... I'm not sure what Mike is referring to. I'm likely going to use a combo of the version you sent up to HQ and the earlier drafts (that were more conversational). If/When I get questions from media, I'll work with Jen to develop responses. That's the long way of saying that I'm not creating anything new.

As for cuckoo, yep, I got the article and sent it around to the Field Offices that I worked with on the announcement. You guys didn't have that species, correct?

Just heard back from Jenny - Mike told her you were working on TPTs for fisher for SacFWO and she wanted to make sure

she had the same information.

If you are, would you mind sharing? otherwise, we're perfectly fine with the FAQs.

on another critter - did you get an alert from E&E news on cuckoo?

thanks!

susan

well thats weird, not sure why she's asking you either. am guessing Mike told her to call you, you are his Go To comms pkg person! I guess he doesn't see me as the lead on this one, but no biggie -

I'll reply to he and Jenny. Jenny knows we/YFWO/she/me are leads but defers to her boss, Mike.

I don't have anything new from a month ago either...

I'm at the allergy doctor. Wondering why Jenny's asking me for this? Can you send her the latest version that went to HQ? I'm not sure what went up. Thank you!

Hi Meghan,

Mike Senn and I have been discussing the fisher talking points and, given that the final rule is due to publish very soon, I'd like to revisit them. Could you email me the most recent version?

I hope you are doing well.
