Probably the ones. So by being on 'the list', that means somebody is notifying them then?

CBD and EPIC are the 2 primary ones. I think there are several others that are also part of it.

I would assume but if you let me know who the petitioners are, I can confirm in outreach plan

I sent it off to the carnivore working group. A bit of double posting, but reaches the bio staff level of state, fed, tribes, private.

Not really any NGOs on that group though. I assume California is notifying the petitioners?

Subject: Fisher listing decision news release

Hi everyone, the fisher listing decision is in the public reading room ([link](#)) today and will be published in the Federal Register tomorrow, I've attached the news release.

The Southern Sierra Nevada DPS will be listed as endangered (effective in 30 days) and the Northern California-Southern Oregon DPS will not be listed. Of note, please see Paul's appreciation in the news release regarding your conservation efforts through the CCAA enrollment.

Please let me know if you have questions.

Thanks,
Kim
