**Subject:** [EXTERNAL] Starship 48hr Notification

All,  
SpaceX South Texas expects to begin the next round of testing at 2100 on 1May2020 with back up dates of the 2<sup>nd</sup> and 3<sup>rd</sup> at the same times. This will be for the Static Fire of a single Raptor engine. This operation should create a static burn from the raptor engine. While we do not expect the ignition to escape the pad we will be prepared for all contingencies. If you have any questions, please feel free to reach out to me.
