The message indicates chance of debris in the refuge again. Sounds like this is a regular reoccurring risk of their activity which we never was aware of during NEPA. Bryan

**Subject:** [EXTERNAL] Upcoming Ops

Team,  
SpaceX has acquired the necessary closures to conduct overnight operations from Saturday 4/25 through Monday 4/27 for proofing tests on the SN4 vehicle. These tests will not lead to ignition to the risk of fire is LOW. As with any test op there is the risk of a low energy event that could potentially introduce debris into the refuge.
