We are working on solutions for our dump containers now – likely an enclosure with a gate. Blue conduit has been removed. Pictures attached. Nice work Sam M and team!

Thank you for your help with improving the refuge scenery surrounding your two sites by helping with litter/trash pickup! Please also insure your personal dump containers have a lid to contain trash during windy conditions which is most of the time. Also remind the company servicing your dumpsters cover their load before departing, if you would please! Sincerely appreciated. Bryan

Thank you for addressing the garbage along HW 4 and surrounding the Launch Control Center. I am still supportive of removal of exposed sections of PVC pipe on the north side of HW 4 west of your construction area. Bryan

Subject: [EXTERNAL] Blue Conduit Removal - Hwy 4 - SpaceX

Bryan, thanks for chatting with me last week about the blue conduit near Hwy 4 in the refuge. We have conducted a survey from the road and have pictures attached. In addition, layout below. We would like to proceed, as discussed, with removing this debris from the refuge by foot. We will not use any form of vehicles. We will not use ATVs. Any pieces that are still underground will be cut using hand tools to be flush with the surface. Please confirm that you are still good with SpaceX proceeding with cleaning this trash from the refuge.

I have filled out forms to adopt hwy 4 from our site to the beach, awaiting confirmation. However, we have had cleaning crews on daily site walks and fence line debris removal. We have already begun cleaning hwy 4 as well.
