

Clean Vessel Act (CVA) Application Summaries, Fiscal Year 2023
U.S. Fish and Wildlife Service
Wildlife and Sport Fish Restoration Program
Total Funding: \$16,066,041.37
32 Applications from 23 States and the District of Columbia*

Alabama – Coastal \$235,622.00, Inland \$101,906.00 – The Alabama Department of Environmental Management plans to construct five coastal and three inland pumpout stations. They will continue their ongoing CVA information and education program through distribution of written and electronic materials as well as in person communications. They will continue their coordination and administration of their CVA grant program.

Alaska – Coastal \$22,500.00 – The Alaska Department of Fish and Game plans to purchase and install a marine vessel sewage pumpout for the City of Wrangell, Alaska.

Arizona – Inland \$347,403.00 - The Arizona Game and Fish Department plans to purchase and install a wave attenuator to protect CVA infrastructure (costs will be prorated), purchase one new pumpout boat, replace the motor on a pumpout barge, and purchase one new floating restroom. They will maintain five pumpout stations/vessels. They also plan to use these funds for administration of their CVA program.

Arkansas – Inland \$1,499,689.00 – The Arkansas Department of Health plans to purchase one marine sewage pump-out boat, and one marine sewage pump. They also plan to conduct operation and maintenance activities for the nine remote restrooms and supporting pump-out vessels and continue their outreach and education efforts. They also plan to use these funds for administration of their CVA program.

California – Coastal \$782,812.00, Inland \$916,150.00 – The California Department Parks and Recreation, Division of Boating and Waterways plans to reduce vessel sewage pollution from overboard discharges into the waters of the State of California through the installation of eight new or replacement pumpouts and provide operation and maintenance funding for CVA-funded equipment in coastal waters. They also plan to install, in inland waters, four new or replacement ADA-compliant floating restrooms, replace one pumpout, install one new dump station and operate and maintain existing floating restrooms, dump stations and pumpout stations. They plan to continue their outreach and education efforts in coastal and inland waters.

Connecticut – Coastal \$1,500,000.00, Inland \$58,040.00 – The Connecticut Department of Energy and Environmental Protection plans to install one new stationary pumpout, replace one stationary pumpout and provide operations and maintenance assistance to 23 pumpout boats and for a minimum of 35 existing stationary pumpout stations in coastal waters. They plan to continue to work cooperatively with the states of Rhode Island and New York. They plan to provide operation and maintenance for one pumpout boat and one existing land based pumpout offloading station and holding tank in inland waters. They also plan to continue their information and education program with a focus on helping boaters to understand their boat's sewage system and to encourage them to use pumpout services.

District of Columbia – Inland \$26,860.00 – The Department of Energy and Environment plans to operate and maintain one pumpout boat.

Florida – Coastal \$1,466,155.16, Inland \$914,267.65 – The Florida Department of Environmental Protection plans to construct 20 pumpout facilities, operate and maintain eight pumpout facilities, and host or participate in eight boater Outreach and Education events in coastal waters. They also plan to construct eight pumpout facilities, operate and maintain five pumpout facilities, and host or participate in eight boater Outreach and Education events in inland waters. They will also administer Florida’s CVA program.

Georgia – Coastal \$185,952.00, Inland \$138,172.50 – The Georgia Department of Natural Resources plans to install three new pumpout systems and support maintenance at two marinas in coastal waters. They also plan to install one floating restroom on Lake Allatoona in inland waters. They will also provide outreach and education programs and fund administrative costs.

Kansas – Inland \$152,814.00 – The Kansas Department of Wildlife, Parks and Tourism plans to partner with Clinton Lake Marina to install a floating restroom to serve the recreational boating public on Clinton Lake.

Maryland – Coastal \$930,930.00 – The Maryland Department of Natural Resources plans to replace or upgrade 15 pumpouts, add two new pumpouts, fund operation and maintenance activities for approximately 100 marinas, fund three pumpout vessels, continue education and outreach activities, and fund administration of their CVA program.

Massachusetts – Coastal \$852,857.00 – The Commonwealth of Massachusetts’ Division of Marine Fisheries plans to provide five new pumpout stations, two replacement pumpout stations, and one replacement pumpout vessel. They also plan to provide operation and maintenance funding for 100 subgrantees (89 pumpout stations, 62 pumpout vessels, 12 dump stations and 11 pumpout carts). They will also use the funds to administer their CVA program.

New Hampshire – Coastal \$90,240.00, Inland \$32,590.00 - The New Hampshire Department of Environmental Services plans to provide grant funds for operation and maintenance of three stationary pumpouts as well as one pumpout vessel in coastal waters. They also plan to fund operation and maintenance on one stationary pumpout in inland waters. In addition, they propose to continue their CVA education and outreach program and fund administration of the CVA program.

New York – Coastal \$504,361.25, Inland \$86,876.25 – The New York State Environmental Facilities Corporation plans to construct, replace, or upgrade 11 pumpouts, purchase one new pumpout boat and provide operation and maintenance funding for 40 land-based pumpouts, two boat support facilities and 30 pumpout boats in coastal waters. They also plan to construct, replace, or upgrade eight pumpouts and provide operation and maintenance funding for five pumpouts in inland waters. They will continue their education and outreach efforts and administer the CVA grant program.

North Carolina – Coastal \$120,000.00 – The North Carolina Department of Environmental Quality, Division of Coastal Management plans to install 5 new pumpouts, provide funds for repair and renovation of existing pumpouts, provide education and outreach to boaters and to administer the CVA grant program in 20 coastal counties. They will also administer their CVA grant program.

Ohio – Coastal \$190,134.56 – The Ohio Department of Natural Resources plans to install one new pumpout system, replace an old and degraded pumpout system and continue their outreach and education activities.

Oklahoma – Inland \$802,034.00 – The Oklahoma Department of Environmental Quality plans to initiate five marina pump-out stations, three lift stations, one pumpout vessel and two floating restroom projects.

Oregon – Coastal \$546,000.00 – The Oregon State Marine Board plans to provide maintenance funding for 16 pumpouts, 16 dump stations, and six floating restrooms. They also plan to one pumpout and dump station and retrofit three floating restrooms. They will also use these funds for education, coordination, and administration.

South Carolina – Coastal \$143,098.00, Inland \$22,302.00 – The South Carolina Department of Natural Resources plans continue their education and outreach efforts in coastal and inland waters. They will also fund coordination and administration of their CVA program.

Tennessee – Inland \$900,000.00 – The Tennessee Wildlife Resources Agency plans to construct 25 stationary, portable, and multiple station pumpout facilities, renovate 5 existing systems, and continue their outreach and education activities. They will also fund coordination and administration of their CVA program.

Texas – Inland \$847,500.00 – The Texas Parks and Wildlife Department plans to construct five inland pumpout facilities. They will also conduct outreach and education activities.

Virginia – Coastal \$135,050.00 – The Virginia Department of Health plans to conduct education and outreach activities and administer their CVA program.

Washington – Coastal \$1,500,000.00 – The Washington State Parks and Recreation Commission will utilize these funds to construct three new pumpout stations, one dump station, purchase one new pumpout vessel and provide operation and maintenance funding for 100 pumpout stations, 10 dump stations, five floating restrooms and 10 pumpout boats in coastal waters. They will continue administer their CVA program and support outreach and education efforts.

Wisconsin – Coastal \$13,725.00 – The Wisconsin Department of Natural Resources plans to replace one existing pumpout station that is at the end of its useful life.

*Projects arranged alphabetically by state. Some applicants submitted applications for both Inland and Coastal waters.
