Birds

Birding at Great Meadows, Assabet River, and Oxbow National Wildlife Refuges

Red-tailed hawk

The Eastern Massachusetts National Wildlife Refuge Complex is made up of eight national wildlife refuges throughout Massachusetts. This checklist has been developed for three of the Eastern Massachusetts Complex's inland refuges located on the Sudbury, Concord, Nashua, and Assabet Rivers. Great Meadows National Wildlife Refuge is located in the towns of Sudbury, Wayland, Lincoln, Concord, Framingham, Bedford, Carlisle, and Billerica; Oxbow NWR is located in the towns of Harvard, Shirley, Lancaster, and Ayer; and the Assabet River NWR is located in the towns of Sudbury. Maynard, Hudson, and Stow.

The three refuges are composed of approximately 7,000 acres of diverse habitat, including open water, marshes, and uplands. The wetland portions receive heavy use by waterfowl during the fall migration. All of the over 220 species of birds listed here have been recorded in the past ten years.

Red-bellied woodpecker

Neotropical Migratory Birds

Neotropical migratory birds are those species that nest in the United States or Canada, and spend the winter primarily south of our border in Mexico, Central or South America, or in the Caribbean. Many of them, including conspicuous or colorful hawks, hummingbirds, warblers, and tanagers, and less colorful but no less important flycatchers, thrushes, and vireos, are experiencing population declines due to widespread loss of habitats important for their survival. Preservation of many different habitats for nesting, wintering, and migratory stopover sites, like our refuges, are becoming vital for the survival of many of these birds.

Red-winged blackbird

Dr. Thomas G. Barnes/USFWS

Symbols used in this list are defined as follows:

Occurrence

Sp Spring March - May Summer June - August Fall September - November December - February W Winter

Abundance

- a Abundant
 - A species which is very numerous.
- **c** Common likely to be seen or heard in suitable habitat.
- **u** Uncommon Present, not certain to be seen.
- Occasional Seen only a few times during a season
- Rare may be present but not every year
- x Accidental Species outside normal migration /wintering range.
- Nesting Species
- Exotic (introduced or escaped)
