Go ahead and ask for the 2015 data. I want to have it available. JB

Hey Jeff - I forwarded your info and questions to Mary Grim. We are doing no further updates to the species report at this time and I'm not involved in the finding.

Hey Pat - We noticed in the draft species report that the referenced MT lek data is only current as of 2012. I was talking with Catherine Wightman at MFWP today and she said they could get us the data through 2014 right away if we wanted that (apparently they did send it to Sean Fields), or if we could wait a couple of weeks (end of June), they could send us data through 2015 (significant uptick in 2015 - potentially upwards of 70%). They're getting the 2015 data together to submit for the WAFWA trend analysis (which I assume we'll also receive at some point). So - I'm checking to see if you would like us to:

- 1) request the data through 2014;
- 2) request the data through 2015, understanding it will be the end of June before we receive it; or
- 3) hold off for now and not request anything.

If we do request it, then also please let me know to whom it should be sent.
Thanks!

J
