5. Follow the prompts to authenticate the login. You will need authenticate twice. Make your choice from the list of options and follow the prompts.

#### STEP 3 OF 4

#### First authentication method setup (1 of 2)

Add a second layer of security so only you can sign in to your account.

You'll only use one authentication method to sign in, but we ask you to set up two. This makes sure you can still sign in if you lose access to one.

Select an option to secure your account:

#### O Authentication application

Get codes from an app on your phone, computer, or tablet. Recommended because it is harder to intercept than texts or phone calls.

MORE SECURE

#### Security key

Use a security key that you have. It's a physical device that you plug in or that is built in to your computer or phone (it often looks like a USB flash drive). Recommended because it is more phishing resistant.

MORE SECURE

#### O Phone

Get security codes by text message (SMS) or phone call

#### O Government employee ID

Insert your government or military PIV or CAC card and enter your PIN

#### ○ I don't have any of the above

We'll give you 10 codes to use and keep in a safe place. You can use backup codes as your only authentication method. Not recommended because notes could get lost.
