

Do you want to help pollinators?

Join us! Track flowering and seed timing of one or more of these priority species:

Photos via Wildflower.org: ¹Thomas L. Mulle, ²R.W. Smith, ³Sandy Smith, ⁴Al Braden, ⁵Stephanie Brundage, ⁴HarryCliffe, ¹James L. Reveal, ªHenry Domke

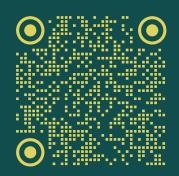

Your data will be used to provide climate-smart guidance for pollinator restoration.

There are two ways to participate:

- Make repeated observations of flowering and seed timing with Nectar Connectors, a campaign of the USA-NPN's Nature's Notebook
- 2. Submit photos of flowering and seeds to iNaturalist

Learn how to get started at www.usanpn.org/TimetoRestore

Sign up for Nectar Connectors Campaign Emails: Text PHENOLOGY to 22828

This project is part of *Time to Restore: Connecting People, Plants, and Pollinators*, a collaborative effort across New Mexico, Texas, Oklahoma, and Louisiana. This work is supported by The Department of the Interior South Central Climate Adaptation Science Center, which is managed by the U.S. Geological Survey National Climate Adaptation Science Center.
