Detailed dKey instructions

1a. To get to the dKeys you will need to **Log In**, you can do that right away or when you get further along.

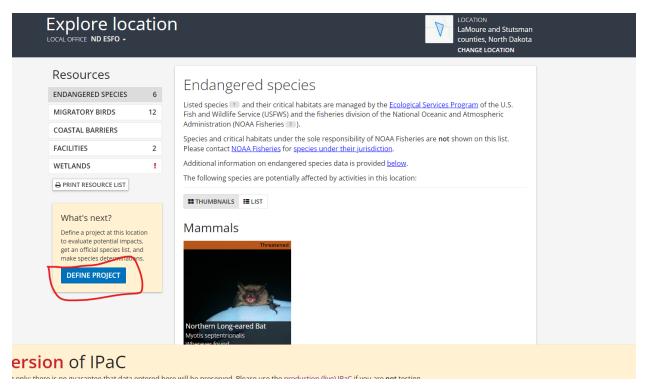

2. You will need to enter the location of your project. Select the **continue** button when you are done.

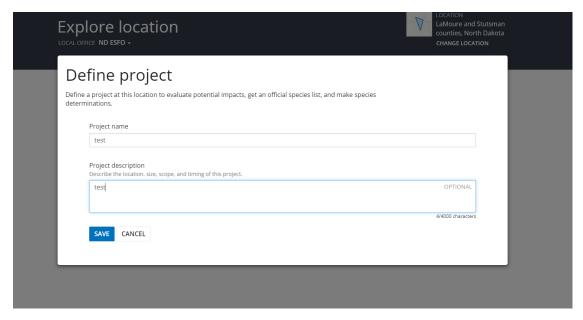

a sample log in page. Auth magoney compater cyclome may be membered for all lawful purposes, including\r\nbut not limited to, ensuring that use is authorized, for management of the\r\nsystem, to facilitate protection against unauthorized access, and to verify\r\nsecurity procedures, survivability and operational security. Any information\r\non this computer system may be examined, recorded, copied and used for authorized\r\npurposes at any time. All information, including personal information,\r\nplaced or sent over this system may be monitored, and users of this system\r\nare reminded that such monitoring does occur. Therefore, there should be no\r\nexpectation of privacy with respect to use of this system. This\r\nis a Privacy Act System of Records. Please review the\r\nECOS Privacy Act Statement. **Email address** Show password Password Sign in Create an account

1b. If you haven't already logged in, you will need to log in at this point. Below is

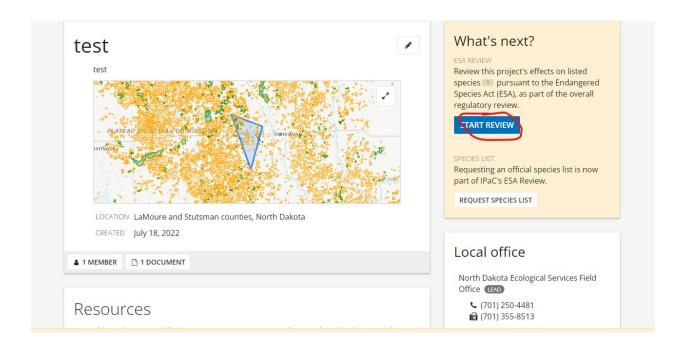

3. Next you will need to hit the **define project** button.

4. You can add your project name and a project description. Entering a detailed project description will help the biologists reviewing the use of the dkeys. Be sure to include specific details on the various components of your project, including timing, duration, and intensity. Please be sure your description addresses the "effects of the Action" (i.e., includes any applicable secondary actions).

5. To get to the dKeys press the **start review** button

6. Hit the continue button.

Note: If you don't need an official species list you can **skip** this step to get to the dkeys

Endangered Species Act Review

EXIT REVIEW

Step-by-step consultation process

The Endangered Species Act (ESA) Review in IPaC is a streamlined, step-by-step consultation process. The steps below prepare you for consultation with the U.S. Fish and Wildlife Service or provide official documentation if consultation is not necessary.

1 Request an official species list

An official species list must be requested for projects conducted, permitted, funded, or licensed by a Federal agency. Projects unaffiliated with a Federal agency may skip this step.

2 Evaluate determination keys

Determination Keys are up-front analyses from the U.S. Fish and Wildlife Service that streamline the consultation process for common project types. Each determination key starts with a qualification interview to see if the key is appropriate for your project.

3 Evaluate effects to remaining species through the Consultation Package Builder

When you have listed species 1 in your project area that have not been addressed by a determination key, IPaC's project analysis tool is used to further analyze your project. The process assists you in making effect determinations and results in a document (i.e., Biological Assessment or other environmental review document) that can be submitted to the U.S. Fish and Wildlife Service for consultation.

4 Finalize your consultation package Print your project documents to PDF.

For more information about the consultation process, see an <u>overview of Section 7</u>.

Request an official species list

2 Evaluate Determination

3 Analyze project (optional)

4 Download documentation

Step 1: Request an official species list

An official species list is a letter from the local U.S. Fish and Wildlife Service field office that assists in the evaluation of potential impacts of your project. It includes a list of species that should be considered under <u>Section 7</u> of the Endangered Species Act, a project tracking number, and other pertinent information from the field office.

Does this project require an official species list?

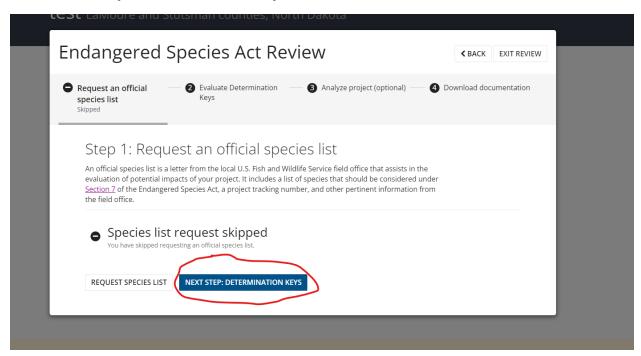

Federal agencies are required to "request of the Secretary of Interior information whether any species which is listed or proposed to be listed may be present in the area of a proposed action" (Section 7 of the Endangered Species Act).

This requirement applies to projects that are **conducted**, **permitted**, **funded**, **or licensed** by any Federal agency.

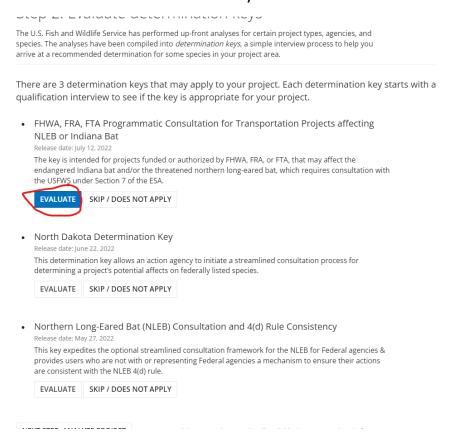

YES, REQUEST A SPECIES LIST

SKIP / DOES NOT APPLY

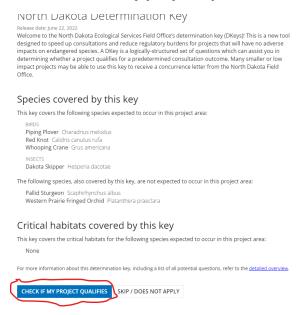

7. Hit **next step: determination keys** to move on.

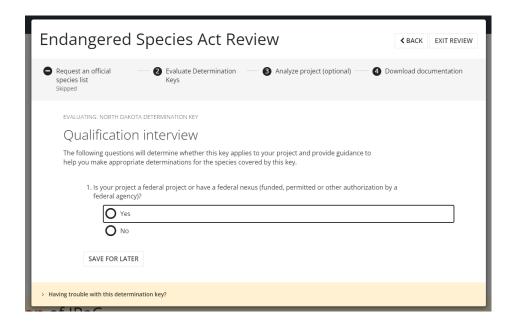

8. To run the North Dakota state-wide dkeys, go to the **evaluate** button under North Dakota Determination Key

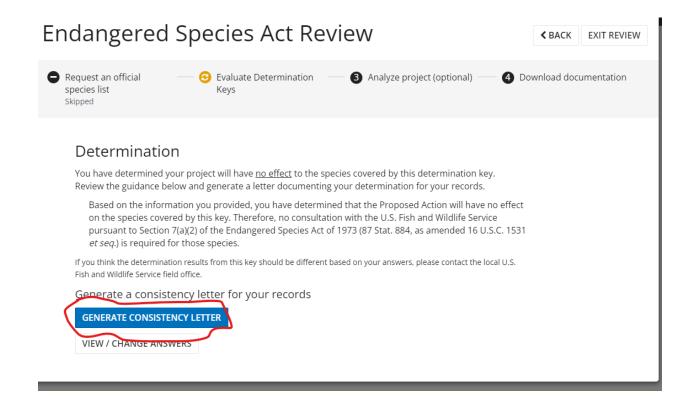

9. Click check if my project qualifies.

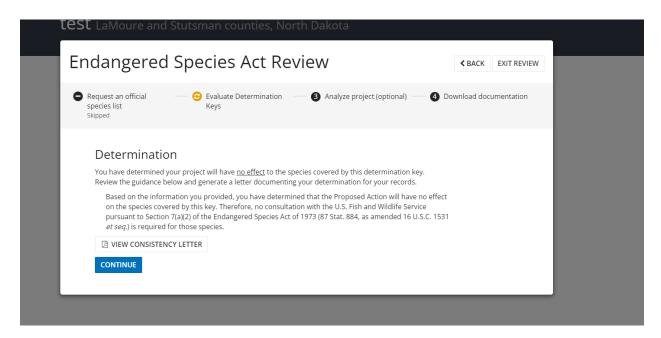

The Dkey will ask you a series of yes/no questions. Select the appropriate radio button to indicate your response. If you make an incorrect selection, you can click on Change Answer to go back and change your response. For some questions, you can click on hyperlinks or hover over underlined text to get additional clarification. Some questions, called "semantic questions", are answered for you automatically based on previous input or spatial data embedded within the Dkey.

10. When you are done answering the questions if you qualify, you can generate a consistency letter. You will need to put in name, number, type of project, agency, etc.

11. Finally, submit project information to USFWS.
