Reporting Requirements

North American Wetlands Conservation Act (103 Stat. 1968; 16 U.S.C. 4401-4412)

Sec. 10. REPORT TO CONGRESS.

The Secretary shall report to the appropriate Committees on the implementation of this Act. The report shall include—

(1) a biennial assessment of—

(A) the estimated number of acres of wetlands and habitat for waterfowl and other migratory birds that were restored, protected, or enhanced during such two-year period by Federal, State, and local agencies and other entities in the United States, Canada, and Mexico;

(B) trends in the populations size and distribution of North American migratory

birds;

(C) the status of efforts to establish agreements with nations in the western hemisphere pursuant to section 16; and

(D) wetlands conservation projects funded under this Act, listed and identified by type, conservation mechanism (such as acquisition, easement, or lease), location, and duration.

(2) an annual assessment of the status of wetlands conservation projects, including an accounting of expenditures by Federal, State, and other United States entities, and expenditures by Canadian and Mexican sources to carry out these projects.

Sec. 16. OTHER AGREEMENTS.

The Secretary shall undertake with the appropriate officials of nations in the western hemisphere to establish agreements, modeled after the [North American Waterfowl Management] Plan or the [Tripartite] Agreement, for the protection of migratory birds identified in section 13(a)(5) of the Fish and Wildlife Conservation Act of 1980 (16 U.S.C. 2912(a)). When any such agreements are reached, the Secretary shall make recommendations to the appropriate Committees on legislation necessary to implement the agreements.

Executive Summary

This report presents the projects funded through the North American Wetlands Conservation Act (NAWCA) in fiscal years 2018 and 2019. During this time, over 200 NAWCA grants were awarded to acquire, restore and enhance wetland habitat in 36 U.S. states, 11 Canadian provinces and territories, and 11 Mexican states. More than 760 partners provided over \$337 million in match to leverage over \$165 million in grants to affect 924,767 acres.

The year 2019 marked the 30th anniversary of NAWCA's passage. The program provides matching grants to partnerships who want to conserve lands and waters that are vital to waterfowl and other wetland-associated migratory birds. Since 1991, NAWCA has funded more than 2,900 projects to benefit more than 30 million acres of habitat in North America. Partners have contributed nearly \$3.5 billion to match \$1.7 billion awarded in NAWCA grants--double the \$1-to-\$1 match requirement.

As impressive as the numbers are, they only tell part of the story. They translate into more ducks and other wildlife in our waters and lands, private landowners who are able to continue traditions of ranching and farming, families out on the land and waters hunting and fishing, stronger local economies, more resilient coastlines, and cleaner water. NAWCA dollars provide critical investments, but the results are priceless.

And we don't do it alone--partners are the foundation of this effort. Recognizing local wetland conservation needs, agencies, landowners, hunting groups, conservation organizations, businesses, and other interests come together to develop solutions and gather matching funds. They stretch conservation dollars and implement projects that benefit wildlife and communities. Since 1991, more than 6,100 partners have leveraged NAWCA funds to achieve their conservation goals.

NAWCA-supported projects may involve just a few partners, or a dozen or more organizations and individuals. They may be working together for the first time, or continuing collaborations that span decades. While the projects are developed and implemented locally, they help meet regional and national migratory bird management objectives, maximizing their effectiveness and contributing to intercontinental conservation goals.

This report is divided into seven sections:

- A detailed list of grant projects in fiscal years 2018 and 2019, broken down by state/province and country.
- An update on efforts to establish agreements with other nations in the Western Hemisphere to protect migratory birds.
- An overview of NAWCA priority species population levels based on surveys conducted by the U.S. Fish and Wildlife Service's Migratory Bird Program and our partners.
- Details of receipts and debits for each fiscal year of the report.
- Members of the North American Wetlands Conservation Council and the Migratory Bird Conservation Commission, which recommend and approve grant projects, respectively.

Migratory Bird Trends

Federal, provincial, and state agencies conduct surveys each spring to estimate the size of breeding waterfowl populations and to evaluate habitat conditions. These surveys are conducted by ground (Atlantic Flyway Breeding Waterfowl Survey; AFBWS) or by airplanes and helicopters (Waterfowl Breeding Population and Habitat Survey; WBPHS), and cover over 2.0 million square miles that encompass principal breeding areas of North America of breeding waterfowl populations and to evaluate habitat conditions.

The traditional survey area of the Waterfowl Breeding Population and Habitat Survey (WBPHS) includes the prairie and parkland habitats in Alberta, Saskatchewan, Manitoba, North and South Dakota, Montana and the Northwest Territories, while the eastern survey area includes portions of Ontario, Quebec, Labrador, Newfoundland, Nova Scotia, Prince Edward Island, New Brunswick, New York, and Maine. A time series for assessing changes in green-winged teal, ring-necked duck, goldeneye, merganser, and American black duck population status is calculated from data collected in the eastern survey area of the WBPHS. Eastern mallard* population status is derived by integrating data from the WBPHS eastern survey area and the AFBWS conducted in the northeastern U.S. states of Virginia north to New Hampshire.

| Traditional Area | 2019 | Long-term Average | | Eas |
|-------------------|-------------|----------------------|--|-----------|
| Mallard | 9.4 million | +19% | | Am Duo |
| Gadwall | 3.3 million | +61% | | Ma |
| American Wigeon | 2.8 million | +8% | | Gre |
| Green-winged Teal | 3.2 million | +47% | | Rin |
| Blue-winged Teal | 5.4 million | +6% | | Gol |
| Northern Pintail | 2.3 million | -42% | | Me |
| Northern Shoveler | 3.7 million | +39% | | |
| Redhead | 0.7 million | 0% | | |
| Canvasback | 0.7 million | +10% | | |
| Scaup | 3.6 million | -28% | | |

Waterfowl Breeding Population and Habitat Survey

| Eastern Area | 2019 | Long-term Average |
|------------------------|-------------|----------------------|
| American Black Duck | 0.7 million | -16% |
| Mallard* | 1.1 million | -16% |
| Green-winged Teal | 0.3 million | -19% |
| Ring-necked Duck | 0.7 million | 0% |
| Goldeneye | 0.5 million | -13% |
| Mergansers | 0.6 million | +4% |

| Total duck | 38.9 million | +10% |
|------------|--------------|------|
| Total pond | 5.0 million | -5% |

Of the 26 goose and swan populations that the US Fish and Wildlife Service reported on in 2019, six showed a significant positive trend during the previous 10 years, and two populations showed a negative trend, and the remaining populations did not exhibit a significant trend.

In addition, population trends of some additional wetland-associated bird species can be calculated based on information derived from the North American Breeding Bird Survey (BBS). This survey takes place annually in June in the United States (excluding Hawaii) and Canada, and with limited coverage in Mexico. The BBS is conducted by trained volunteers who count all birds seen and heard at 50 stops evenly spaced on each of more than 5,000 ground-based routes, each around 25 miles long.

The BBS provides population trend information for 86 species of game and nongame wetlandbreeding birds (those recorded on more than 14 BBS routes). From 2008-2018, 7% of these species exhibited a significant negative trend, while 13% exhibited a significant positive trend.

NAWCA funds may be used for conservation and restoration of grassland habitats, provided they are adjacent to wetland habitat. The BBS provides population trend information on 28 grasslandbreeding birds (those recorded on more than 14 BBS routes). From 2008-2018, 7% of these species exhibited a significant positive trend, and 32% exhibited a negative trend. Note that the precision of BBS estimates and the ability to detect trends depends in part on the number of routes where birds were observed, so inference about species that are infrequently observed on BBS routes is limited.

The United States Fish and Wildlife Service continues working with national and international partners to manage and conserve migratory bird populations and their breeding and wintering habitats through the North American Waterfowl Management Plan and other programs, such as the North American Bird Conservation Initiative and Partners in Flight.

International Agreements

No progress has been made to establish agreements with officials of other nations in the Western Hemisphere for the protection of Migratory Birds.

Conservation Directories

North American Wetlands Conservation Council

Chair Terry Steinwand, North Dakota Game and Fish Department

Members Steve Guertin, U.S. Fish and Wildlife Service John Carlson, Jr., California Waterfowl Association Daniel Eichinger, Michigan Department of Natural Resources Gordon Myers, North Carolina Wildlife Resources Commission David Nomsen, Pheasants Forever Jeff Trandahl, National Fish and Wildlife Foundation Tony Wasley, Nevada Department of Wildlife Nick Wiley, Ducks Unlimited, Inc.

Alternate Mark Elsbree, The Conservation Fund

Ex-officio members Wendy Jackson, Land Trust Alliance Glenn Olson, National Audubon Society José Luis Pedro Funes Izaguirre, SEMARNAT Daniel Wolfish, Canadian Wildlife Service

Council Coordinator Kari Duncan, Migratory Bird Program

Migratory Bird Conservation Commission

Chair Honorable David Bernhardt, Secretary of the Interior

Members

Honorable John Boozman, Senator from Arkansas Honorable Martin Heinrich, Senator from New Mexico Honorable Mike Thompson, Representative from California Honorable Robert Wittman, Representative from Virginia Honorable Sonny Perdue, Secretary of Agriculture Honorable Andrew Wheeler, Administrator, Environmental Protection Agency

Secretary A. Eric Alvarez, Chief, Division of Realty, U.S. Fish and Wildlife Service

NORTH AMERICAN WETLANDS CONSERVATION ACT

Conserving North American wetlands and associated upland habitats for the long-term benefit of waterfowl and other wetland-associated migratory birds, fish, and wildlife.
