MEMORANDUM

TO: Pacific Flyway Council and Study Committee

FROM: Todd A. Sanders, Pacific Flyway Representative

DATE: November 15, 2022

SUBJECT: Pacific Flyway Data Book 2022

The following briefing material has been assembled for use by State and U. S. Fish and Wildlife Service personnel in formulating recommendations for migratory bird hunting seasons in the Pacific Flyway. This collection of abundance, harvest, and hunter activity data can also serve as a desk-top reference for providing responses to inquiries from agency personnel, the media, and the public. These data represent an extraordinary collaborative effort by many individuals from State, Federal, and other organizations. Thank you to all cooperators who have contributed toward this significant effort.

Harvest and hunter activity estimates from the Migratory Bird Harvest Information Program are final only for the 1999 through 2002 hunting seasons. Harvest estimates after the 2002 hunting season are preliminary.

Some migratory bird surveys were not conducted in 2020 and 2021 because of the coronavirus pandemic. Consequently, some tables are missing data from these years as a result of no survey being conducted.

Please note that abundance estimates are indices to abundance and not absolute population size. Abundance indices are either counts or estimates of a proportion of a population. The indices provide a measure of the relative abundance of a population over time or relative to an objective.

The Pacific Flyway Data Book contains annual estimates of migratory bird abundance, harvest, and hunter activity. Due to the large volume of data and the number of years, species, and geographic areas involved, data tables may be large and complex. Readers that may need help reading and interpreting the data, or that may need data presented in an alternative format to facilitate reading and interpretation, should contact the U.S. Fish and Wildlife Service's Pacific Flyway Representatives office (todd_sanders@fws.gov, or steven_olson@fws.gov).

Revised: February 2021

Past chairs of Pacific Flyway Council, Study Committee (SC), Nongame Technical Committee (NTC), and Consultants to the U.S. Fish and Wildlife Service Regulations Committee (SRC). Council is represented at the SRC by one Coastal and one Inland council member serving staggered 4-year terms. Terms of office varied in the past and some substitutions were made. Prior to January 1, 2016, most terms began October 1 of the year elected through September 30 of the following year. After January 1, 2016, terms are calendar year. The Pacific Flyway Representative is provided for historical reference.

*Flyway totals for Central, Mississippi, and Atlantic Flyways include Early and Special Teal and Wood Duck harvest totals.

^aPacific Flyway total includes the entire state total of split state (MT) 1999 through 2015, and no split states 2016 through current.

^bCentral Flyway total includes the entire state total of split states (CO, NM, and WY) 1999 through 2015, and all split states (CO, MT, NM, and WY) 2016 through current.

For breakdown of all split states, see Split State Duck Total Table.

Total duck harvest for states in two flyways by State and Flyway* from the Harvest Information Program, 1999–current.

^aPacific Flyway total includes the entire state total of split state (MT) 1999 through 2015, and no split states 2016 through current.

^bCentral Flyway total includes the entire state total of split states (CO, NM, and WY) 1999 through 2015, and all split states (CO, MT, NM, and WY) 2016 through current.

For breakdown of all split states, see Split State Duck Total Table.

Total goose harvest by State and Flyway from the Harvest Information Program, 1999–current.

^bRatio not shown if based on a sample of less than 20 parts.

Waterfowl Breeding Population and Habitat Survey map

Strata and transects of the Waterfowl Breeding Population and Habitat Survey (yellow = traditional survey area, green = eastern survey area, grey = discontinued strata).

Total^a breeding population indices corrected for visibility bias by survey area (strata 1–18, 20–50 and 75–77) from the Waterfowl Breeding Population and

Habitat Survey, 1955–current.

Year	AK, YT (1–12)	N. AB, BC, NT (13–18, 20, 75–77)	S. AB (26–29)	N. SK (21–23)	S. SK (30–35)	N. MB (24–25)	S. MB (36–40)	MT (41–42)	ND (43, 45–47)	SD (44, 48–49)	W. ON (50)	Total

^aSurveys in NV and UT redesigned in 2009 (estimates not comparable before and after survey redesign), and redesigned in WA and OR in 2014 (data includes updates).

^bPacific Flyway total Cinnamon Teal estimates could be derived from all states except WA, but the majority of the old BW/Cin column is assumed to be Cin based on recent history.

Western mallard breeding population index, 1977–current.

aThe fall estimate was derived by total birds multiplied by a correction factor of 3.422843. The correction factor was derived from the comparison of all mark-resight data vs. total birds.

Total breeding population indices for Taverner's Cackling Goose from the Yukon-Kuskokwim Delta Coastal Zone Survey (YKD CZ), portions of the Waterfowl Breeding Population and Habitat Survey - YKD Inland (Strata 9), Seward Peninsula (Strata 10), and Kotzebue Sound (Strata 11), and Arctic Coastal Plain (ACP) Survey, 1985–current.

Year	YKD CZ	SE	Strata 9	SE	Strata 10	SE	Strata 11	SE	ACP	SE	Total Estimate	SE

^aFall surveys were initiated in 1979 and guided management actions until 1998.

Management actions after 1998 were based on total indicated birds (AK Total) from the breeding ground survey and a factor derived from the historic relationship between the fall survey and breeding ground survey (1985–1998). Timing of the Fall survey is as follows: 1979–1988 (November) and 1989–2015 (October).

^bProjected fall population = (Alaska total * 3.1648392395).

Total breeding population indices for Midcontinent Population of Greater White-fronted Geese from portions of the Waterfowl Breeding Population and Habitat Survey - Tanana-Kuskokwim (Strata 3), Yukon Flats (Strata 4), Innoko (Strata 5), Koyukuk (Strata 6), Seward Peninsula (Strata 10), and Kotzebue Sound (Strata 11), and Arctic Coastal Plain (ACP) Survey, 1964-current.
Also presented are counts from the Fall Inventory of Midcontinent White-front Survey in Alberta and Saskatchewan, 1992-Current.

^aIn British Columbia, totals for 1984–1991 are Christmas Bird Counts, and from 1992–on are from Canadian Wildlife Service counts.

^bAerial surveys were not flown (2009, 2011–2012, 2014–2015) in Mexico due to pilot safety concerns. Instead, ground-counts conducted by Palacios and Avila (including 2013).

^cIncludes Western High Arctic brant. 3-year average considers most recent 3 years of annual counts.

^dIzembek index from fall before Mid-winter Waterfowl Survey, includes Western High Arctic brant, and was updated Fall 2016 after extensive review. Percent Juveniles represent model-based estimates from NWR ground surveys and will change annually (Ward et al. 2018; Ward and Amundson, USGS, unpublished data).

^eNo survey conducted due to pilot survey concerns.

^fThe historical Alaska MWS index was recalculated in 2015, following the recommendation by Wilson and Dau 2015.

Abundance indices for Pacific Population of Brant, continued.

^aIn British Columbia, totals for 1984–1991 are Christmas Bird Counts, and from 1992–on are from Canadian Wildlife Service counts.

^bAerial surveys were not flown (2009, 2011–2012, 2014–2015) in Mexico due to pilot safety concerns. Instead, ground-counts conducted by Palacios and Avila (including 2013).

^cIncludes Western High Arctic brant. 3-year average considers most recent 3 years of annual counts.

^dIzembek index from fall before Mid-winter Waterfowl Survey, includes Western High Arctic brant, and was updated Fall 2016 after extensive review. Percent Juveniles represent model-based estimates from NWR ground surveys and will change annually (Ward et al. 2018; Ward and Amundson, USGS, unpublished data).

^eNo survey conducted due to pilot survey concerns.

^fThe historical Alaska MWS index was recalculated in 2015, following the recommendation by Wilson and Dau 2015.

**Total breeding population indices for Western Population of Tundra Swans from the Yukon-Kuskokwim Delta
Coastal Zone Survey (YKD CZ), and portions of the Waterfowl Breeding Population and Habitat Survey - Bristol Bay
(Strata 8), YKD Inland (Strata 9), Seward Peninsula (Strata 10), and Kotzebue Sound (Strata 11), 1985–current.**

^aFrom Mid-winter Waterfowl Survey (January) results in all states except California, where December surveys have been conducted since 2013, and Nevada and Utah, where December surveys have been conducted and included since 2015.^bMost unidentified swans are counted in Oregon and Washington and are not included in the total Tundra Swan index.^cCalifornia did not survey the Delta in 1995, and no survey was conducted in 2016.^dNo surveys were conducted in Idaho and Wyoming (Pacific Flyway portion) and the survey was incomplete in Montana during 2004.^eSurveys ceased in Idaho after 2010, and the survey was incomplete in Montana and Oregon during 2011–2013.

Rocky Mountain Population of Sandhill Crane abundance indices and harvest allocation.

^aState allocation of allowable harvest describes the following year's allocation.

^bHistorical total allocation may differ from model-calculated allowable harvest.

^cSurvey not flown due to mechanical problems.

**Total Breeding population indices for Midcontinent Population of Sandhill Cranes
from the Yukon-Kuskokwim Delta Coastal Zone Survey in Alaska, and a photo-corrected
annual spring survey along the Platte River of Nebraska and other areas, 1974–current.**
