Roanoke River

*National Wildlife Refuge
Bird List*

Larry Wade, USFWS
prothonotary warbler

Roanoke River National Wildlife Refuge

Roanoke River National Wildlife Refuge, established in 1989, consists of 21,000 acres of forested wetlands. A primary refuge objective is to provide sanctuary for migratory birds.

Larry Wade, USFWS

common yellowthroat

Exceptional birding is possible in the Roanoke River wetlands from March through June, the spring migration and nesting season, but is best from mid-April - mid-May. Fifty-one species of neotropical migrants, songbirds that nest in temperate North America and fly south to winter in the West Indies and Central and South America, have been observed.

Larry Wade, USFWS

belted kingfisher

Over 200 species of birds have been identified on or near the refuge. Other species, especially spring and fall migratory transients, will certainly be added to the list. Your help is needed to develop a more complete list. Please notify refuge staff when you observe additional species or obvious differences in indicated seasonal occurrences.

Larry Wade, USFWS

ruby-throated hummingbird

Most birds are migratory, therefore, their seasonal occurrence is coded as follows:

Larry Wade, USFWS

yellow-crowned night heron

Seasonal Appearance

Sp - Spring	March - May
S - Summer	June - August
F - Fall	September - November
W - Winter	December - February
* -	Birds known or suspected to nest on or near the refuge.

Italics indicate - threatened/endangered species.

USFWS

Swainson's warbler

Relative Abundance:

a - abundant, a species which is very numerous

c - common, likely to be seen or heard in suitable habitat

u - uncommon, present, but not certain to be seen

o - occasional seen only a few times during a season

r - rare, may be present but not every year

great blue heron

U.S. Fish and Wildlife Service

The U.S. Fish and Wildlife Service is the principal federal agency responsible for conserving, protecting and enhancing fish, wildlife and plants and their habitats for the

continuing benefit of the American people. The Roanoke River National Wildlife Refuge is one of over 535 refuges in the National Wildlife Refuge System administered by the U.S. Fish and Wildlife Service. The National Wildlife Refuge System is a network of lands and waters managed specifically for the protection of wildlife and wildlife habitat and represents the most comprehensive wildlife management program in the world. Units of the system stretch across the United States from northern Alaska to the Florida Keys and include small islands in the Caribbean and South Pacific. The character of the refuges is as diverse as the nation itself.

The Service also manages National Fish Hatcheries, and provides Federal leadership in habitat protection, fish and wildlife research, technical assistance and the conservation and protection of migratory birds, certain marine mammals and threatened and endangered species.
