DEPARTMENT OF JUSTICE

Antitrust Division

United States of America v. Ingersoll-Dresser Pump Co., Et Al.; Proposed Final Judgment and Competitive Impact Statement

Notice is hereby given pursuant to the Antitrust Procedures and Penalties Act, 15 U.S.C. section 16(b) through (h), that a proposed Final Judgment, Hold Separate Stipulation and Order, and Competitive Impact Statement have been filed with the United States District Court for the District of Columbia in *United States v. Ingersoll-Dresser Pump Co., Ingersoll-Rand Co., and Flowserve Corp.*, Civil Action No. 00-1818. On July 28, 2000, the United States filed a Complaint alleging that the proposed acquisition by Flowserve of Ingersoll-Dresser Pump Company would violate section 7 of the Clayton Act, 15 U.S.C. 18. The proposed Final Judgment, filed at the same time as the Complaint, requires the defendants to divest certain pump lines and

manufacturing and repair facilities. Copies of the Complaint, proposed Final Judgment, and Competitive Impact Statement are available for inspection at the Department of Justice in Washington, DC in Suite 2000, 325 Seventh Street, NW., and at the Office of the Clerk of the United States District Court for the District of Columbia.

Public comment is invited within 60 days of the date of this notice. Such comments, and responses thereto, will be published in the **Federal Register** and filed with the Court. Comments should be directed to Gail Kursh, Chief, Health Care Task Force, 325 Seventh Street, NW., Room 404, Antitrust Division, Department of Justice, Washington, DC 20530 (telephone: (202) 307-5799).

Constance K. Robinson,

Director of Operation and Merger Enforcement.

Complaint

The United States of America, acting under the direction of the Attorney General of the United States, brings this civil action to enjoin preliminarily and permanently the proposed acquisition by Flowserve Corporation ("Flowserve") of Ingersoll-Dresser Pump Company ("IDP"), pursuant to a Purchase Agreement entered into by the defendants and dated February 9, 2000. The United States alleges as follows:

1. Unless it is enjoined, Flowserve's proposed acquisition of IDP will reduce the already small number of firms that compete on bids to sell certain costly, specialized and highly engineered pumps used in oil refineries and electrical generating facilities in the United States, in violation of Section 7 of the Clayton Act, as amended, 15 U.S.C. 18. Such a reduction in competition is likely to result in higher prices and reduced selection for those pumps.

I. Jurisdiction and Venue

2. This complaint is filed and this action is instituted under Section 15 of the Clayton Act, as amended, 15 U.S.C. 25, to prevent and restrain defendants from violating Section 7 of the Clayton Act, as amended, 15 U.S.C. 18.

3. Each of the defendants is engaged in interstate commerce and in activities substantially affecting interstate commerce. This Court has subject matter jurisdiction over this action, and jurisdiction over the parties, pursuant to Section 12 of the Clayton Act, 15 U.S.C. 22, and 28 U.S.C. 1331, 1337(a) and 1345.

4. Each of the defendants has consented to personal jurisdiction in the

District of Columbia. Venue is proper in this District pursuant to 15 U.S.C. 22, and 28 U.S.C. 1391(c).

II. The Defendants

5. Flowserve is a New York corporation with its principal executive offices in Irving, Texas. Flowserve manufactures and sells a broad array of pumps, valves and seals used in a wide variety of manufacturing and processing industries, and provides parts and service for pumps, in the United States and abroad. Flowserve has total annual sales of over \$1 billion and maintains offices and facilities at approximately 25 locations in the United States.

6. Ingersoll-Rand is a New Jersey corporation with its principal executive offices in Woodcliff Lake, New Jersey. Ingersoll-Rand is a general partner in, and controls, IDP.

7. ID is a Delaware general partnership, headquartered in Liberty Corner, New Jersey. IDP manufactures and sells a broad array of pumps, and provides service and parts for such pumps, in the United States and abroad. IDP is one of the world's largest pump manufacturers, with annual sales of over \$875 million. IDP maintains offices and facilities at approximately 27 locations in the United States.

III. Background

8. Flowserve and IDP each manufacture and sell for use in the United States two categories of specialized, highly engineered pumps known as "API 610 pumps" and "power plant pumps." API 610 pumps are used in the oil and gas industry, including in oil refineries, and power plant pumps are used in electrical generating facilities or "power plants."

9. API 610 pumps are specialized, rugged, highly engineered pumps that generally perform critical functions in an oil refinery, including the movement of erosive, corrosive, hot and flammable petroleum-based liquids under high pressure. API 610 pumps are designed, built, tested and shipped in accordance with comprehensive standards of the American Petroleum Institute.

10. Power plant pumps are specialized, highly engineered pumps that perform critical functions in the steam cycle of a power plant. (The steam cycle consists of a boiler or steam generator that feeds steam to a steam turbine that drives an electricity-producing generator.) The three basic categories of power plant pumps are: (1) "Circulating water pumps," which deliver cooling water to condensers that condense the spent steam that has passed through a steam turbine; (2) "condensate pumps," which extract the
