FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. 1). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The Federal Register provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The Federal Register will be furnished by mail to subscribers for $340.00 per year, or $170.00 for 6 months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

There are no restrictions on the republication of material appearing in the Federal Register.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are key to and cited in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510. The Code of Federal Regulations is sold by the Superintendent of Documents.

Prices of new books are listed in the Code of Federal Regulations, which is available to the public at the Office of General Counsel, at above address, or telephone: (202) 357-1030.

ADDRESS: National Credit Union Administration, 1776 G Street, NW., Washington, DC 20456.

FOR FURTHER INFORMATION CONTACT: Hattie Ulan, Staff Attorney, NCUA, Office of General Counsel, at above address, or telephone: (202) 357–1030.

This regulation establishes a revised program under which loans from the Community Development Credit Union Revolving Loan Fund will be made to participating credit unions. A proposed regulation was issued by the NCUA Board on April 9, 1987 (52 FR 12427, April 16, 1987). The final regulation sets forth, among other things, the scope and purpose of the program, application procedures, types of activities participating credit unions will perform, and how loans will be made and collected under the program. Section 700.1(b)(l) updates the definition of “low income members.”

The issue that drew the most comment was the need for technical assistance. Comment was requested as to what types of technical assistance credit unions receiving loans from the Fund (participating credit unions) might desire and whether interest payments that the NCUA receives on loans made from the Fund should be used to provide technical assistance. Twenty of the commenters expressed a need for technical assistance. Several noted that money for such assistance should come from the interest received on loans to participating credit unions. A few commenters believed that technical assistance should be paid for from the corpus of the Fund. The commenters suggested that technical assistance was needed in the following areas: staff and board training; business planning; marketing to increase membership; community needs assessment; feasibility and implementation of new services and products; management by objective; liaison with government agencies; linkage with public assistance agencies, obtaining capital from the private sector; computerization; and business lending.

The NCUA Board has determined that technical assistance should not be provided by NCUA because NCUA examiners were already overburdened and that they lacked expertise in issues concerning participating credit unions. Many of the commenters believed that technical assistance should be provided by a sole provider that has expertise in the types of credit unions receiving loans from the Fund. One commenter noted that technical assistance should be provided before loan funds are distributed to participating credit unions.

The issue receiving the most comment, after technical assistance, was the interest rate to be charged to participating credit unions. Fifteen commenters addressed this issue. Almost all of these commenters were in favor of a fixed interest rate, rather than the adjustable rate set forth in the proposed regulation (proposed § 705.7(d)). Commenters stated that participating credit unions do not have the sophistication to charge adjustable rates on loans they will make from the loan proceeds from the Fund. As a result, participating credit unions would be subject to an interest rate squeeze if the rate on the money they owe to the Fund rises while the loans they make from these proceeds are at a lower fixed rate. Commenters suggested that if a fixed rate of interest was not a possibility, then caps should be placed on both the amount of adjustments per year and the maximum interest rate over the life of the loan. Upon evaluation of the comments, the NCUA Board has determined that a fixed rate of interest would better suit the purposes of the Program and the participating credit unions than an adjustable rate. Loans from the Fund will be made to participating credit unions at a fixed
Participating Credit Unions: 
Associational and Start-up Credit Unions

Five commenters noted that credit unions participating in the Program should not be limited to community-based credit unions that are already in existence as required by the proposed rule. They reasoned that certain associational-based credit unions should be able to qualify for loans from the Fund when their fields of membership are comprised of civic, housing or anti-poverty organizations. Such credit unions were able to participate in the Program under the two prior regulations. The NCUA Board agrees that such associational-based credit unions should be able to participate in the Program and has deleted the word “community” from the definition of participating credit union found in § 705.3 of the final regulation. Although participating credit unions need not be chartered as community credit unions, in most cases they will be serving the residents and businesses of a clearly defined community or geographic area.

In addition, eight commenters noted that “start-up” credit unions (credit unions that have not yet been chartered) should not be prevented from participation in the Program. Groups sponsoring start-up credit unions could apply for and obtain loans from the Fund under the two prior regulations. The proposed rule limited participants to credit unions already in existence. Commenters suggested that a limited percentage of Fund monies be used to make loans to start-up credit unions. One commenter suggested that provision of technical assistance should alleviate risks associated with start-ups. The Board notes that start-up credit unions have caused most of the losses to the Fund under the prior regulations. Based upon such experience and consistent with the overall purposes of the Fund, it is the NCUA’s present position that Program funds be limited to established credit unions. As stated in the preamble to the proposed rule, the program is neither a start-up nor a remedial program. The final regulation reflects this position.

Note Payable v. Nonmember Deposit

Comment was specifically requested on whether Program loans from the Fund to participating credit unions should be recorded on the credit unions books as a note payable, nonmember deposit, or either of the two at NCUA’s option. Nine commenters addressed this issue. All but three preferred that the loans be recorded as a nonmember deposit rather than as a note payable. The remaining commenters suggested for recording the loan as a nonmember deposit rather than a loan was that Federal credit unions are subject to a borrowing limitation of 50% of paid-in and unimpaired capital and surplus. The commenters do not believe that Program loans should be subject to the 50% limitation. The NCUA Board wishes to maintain control over how such loans are recorded in that some state-chartered participating credit unions may not be permitted to record the loans as nonmember deposits. In most instances, the Board anticipates that loans will be recorded as nonmember deposits on the credit union’s books. Therefore, no change has been made regarding NCUA’s discretion to determine how loans are to be recorded. However, the provision has been added to § 705.7(a), and because this latter section already addressed the amount of loans, § 705.7(b) has been deleted as unnecessary. Reference to how loans are recorded has also been added to § 705.7(c)(1).

Matching Requirement

Several commenters reflected on the dollar-for-dollar matching requirement of the proposed regulation (§ 705.7(b)). Participating credit unions must match the loan amount received from the Program with increased shares, dollar for dollar, within one year of approval of their loan application. Commenters suggested a two-to-one match as was required under the prior two regulations (e.g., if a credit union receives a $100,000 loan, it would only have to increase shares by $50,000, rather than $100,000 as the Board has proposed). It is the opinion of the NCUA Board that a dollar-for-dollar matching requirement is appropriate. Federally-chartered participating credit unions will have “low income” status that enables them to accept shares from members as well as nonmembers. It is reasonable to require participating credit unions to build up their share base in the same amount as the amount of funds that they receive from the Program. Section 705.7(b) remains unchanged in the final rule.

State-Chartered Participants

As noted in the final regulation, participation in the Program is open to both state- and federally-chartered credit unions. State credit unions need not be federally insured. In order for NCUA to ascertain that the state-chartered participants are complying with the Program requirements, such participants shall make their examination reports available to NCUA. State-chartered participants shall agree to permit limited examination by NCUA to assure compliance with this Part. NCUA does not anticipate doing routine examinations of these participants. Examination will take place if necessary to protect the assets of the Fund. An appropriate addition has been made to § 705.8 of the final rule.

Additional Comments

Two commenters mentioned the community needs plan (§ 705.6(a)(2)) required by the regulation. They stated that more than the 60 days set forth in the proposed regulation are necessary in order to submit a community needs plan. The NCUA Board believes that 60 days are sufficient to prepare a community needs plan comprised of coordination contacts and a list of community needs that the credit union may provide.

Two commenters asked how long the application period for loans from the Fund will remain open. The Board has determined that a 60-day application period is appropriate. The initial application period will open upon publication of this final rule in the Federal Register and will close on November 30, 1987. The November 30 closing date has been added to § 705.9 of the final regulation.

One commenter suggested that NCUA establish an interagency coordinating committee in order to carry out the purposes of the Program. The NCUA Board will make an effort to consult, from time to time, with other agencies to help coordinate efforts of various low income assistance programs.

Lastly, one of the commenters submitted a plan for a central community development credit union without commenting on the proposed regulation. NCUA does not have the authority to establish and charter the central credit union as it was structured by the commenter.

Previous Regulations

Loans made under the Program when it was administered by the CSA were subject to Part 705 of NCUA’s Regulations (See 45 FR 15171, March 10, 1980). These loans have all been repaid or otherwise accounted for. The prior Part 705 will be deleted and replaced by this new Part 705. Several loans made pursuant to the second regulation promulgated by HHS (45 CFR 1076.60, see 48 FR 53560, Nov. 11, 1983) are still outstanding. Those outstanding loans are subject to the HHHS regulation.
Section 700.1(h)—Definition of Low Income Members

As provided in §705.3(a), a participating credit union must meet one of three definitions of “low income members” as set forth in §700.1(h)(1)–(3) of NCUA’s Rules and Regulations (12 CFR 700.1(h)(1)–(3)) in order to qualify for the Program. Two commenters suggested that the NCUA Board redefine “low income members” as found in §700.1(h)(1) of the NCUA Rules and Regulations (12 CFR 700.1(h)(1)). This subsection defines “low income members” as “those members whose annual income falls at or below the lower level standard of living classification as established by the Bureau of Labor Statistics, U.S. Department of Labor.” The Bureau of Labor Statistics no longer updates the classification. The classification is now annually updated by the Employment and Training Administration of the U.S. Department of Labor. The NCUA Board has issued a replacement definition of “low income members” for §700.1(h)(1), concurrent with the issuance of this final rule. The new definition refers to the original lower level standard of living classification set forth by the Bureau of Labor Statistics and annually updated by the Employment and Training Administration of the Department of Labor. The most recent update of the lower level standard of living classification was published in the Federal Register by the Employment and Training Administration on July 14, 1987 (see 52 FR 29579). NCUA is updating this definition as a final rather than a proposed rule since there is no substantive change to the definition. NCUA is merely specifying the office of the Department of Labor that now annually updates the lower level standard of living classification. The standard set forth in the definition is unchanged.

Paperwork Reduction Act

The final regulation contains the two collection of information requirements as noted in the proposed regulation. Section 705.5 contains the application procedures for a credit union wishing to participate in the Program and §705.6(a)(2) contains the requirement that participating credit unions develop a community needs plan. These collection requirements were submitted to the Office of Management and Budget (OMB) for review under the Paperwork Reduction Act. The collection requirements were approved by OMB and have been assigned collection number 3133-0109 for use through 6/30/88. OMB noted one additional collection. Section 705.6 requires that state-chartered participants obtain written concurrence from their respective state regulatory authority. OMB requested that the entire collection (three requirements) be resubmitted to them with this final regulation. NCUA will resubmit the collection request to OMB and publish a notification in the Federal Register upon their final approval. Any further comments on the collection of information requirements should be submitted to OMB Reports Management Branch, New Executive Office Building, Room 3208, Washington, DC 20503. Attn: Robert Fishman.

List of Subjects in 12 CFR Parts 705 and 700

Credit unions, Community development revolving loan program, Low income.

By the National Credit Union Administration Board this 9th Day of September, 1987.

Becky Baker,
Secretary of the Board.

PART 705—AMENDED

Accordingly, NCUA amends its regulations as follows:
1. Part 705 is revised to read as follows:

PART 705—COMMUNITY DEVELOPMENT REVERSING LOAN PROGRAM FOR CREDIT UNIONS

Sec.
705.0 Applicability.
705.1 Scope.
705.2 Purpose of the program.
705.3 Definition.
705.4 Program activities.
705.5 Application for participation.
705.6 Community Development Committee.
705.7 Loans to participating credit unions.
705.8 State-chartered credit unions.
705.9 Application period.
705.10 Technical assistance.

§ 705.0 Applicability.

Monies from the Community Development Revolving Loan Fund for Credit Unions obligated after October 1, 1987, are governed by this regulation.

§ 705.1 Scope.

(a) This part implements the Community Development Revolving Loan Program for Credit Unions (Program) under the sole administration of the National Credit Union Administration.

(b) This Part establishes the following:
(1) Definitions;
(2) The application process for participation in the Program;
(3) Requirements for program participation:
(4) How loan funds are to be made available and their repayment; and
(5) Technical assistance to be provided to participating credit unions.

§ 705.2 Purpose of the program.

The Community Development Revolving Loan Program for Credit Unions is intended to support the efforts of participating credit unions through loans to those credit unions in:
(a) Providing basic financial and related services to residents in their communities; and
(b) Stimulating economic activities in the communities they service which will result in increased income, ownership and employment opportunities for low income residents, and other community growth efforts.

§ 705.3 Definition.

For purposes of this Part, a “participating credit union” means a state- or federally-chartered credit union that is specifically involved in stimulation of economic development activities and community revitalization efforts aimed at benefiting the community it serves; whose membership meets the definitions of “predominantly” and “low income members” as found §700.1(h) and (i) of the NCUA Regulations (§700.1(h)(4)), or applicable state standards; and has submitted an application and has been selected for participation in the Program in accordance with this Part.

§ 705.4 Program activities.

In order to meet the objectives of the Program, a credit union applicant must provide a variety of financial and related services designed to meet the particular needs of the low income community served. These activities shall include basic member share account and member loan services.
these activities may include, but are not limited to, the following:
(a) Mountains or other natural settings;
(b) Consumer counseling;
(c) Direct servicing of loans;
(d) Credit counseling;
(e) Financial counseling;
(f) Financial management; and
(g) Consumer education programs.

§ 705.5 Application for participation.
(a) Application to participate in the Program shall be submitted to:
National Credit Union Administration,
Community Development Revolving Loan
Program for Credit Unions, 1776 G Street,
NW., Washington, DC 20456.

(b) The application shall contain the following information:
(1) Information demonstrating a sound financial position and the credit union’s ability to manage its day-to-day business affairs. Credit unions shall submit the following for the most recent month-end and each of the twelve months preceding that month-end:
(i) Balance sheet;
(ii) Income and expense statement;
(iii) Delinquent loan list.
(2) Evidence that the credit union has a need for increased funds in order to improve financial services to its members.
(3) The following information concerning the credit union’s field of membership:
(i) Current field of membership as set forth in the credit union’s charter;
(ii) Changes, if any, to be made to the field of membership for participation in the Program, including:
(A) Evidence of approval of change by credit union board of directors;
(B) Evidence of submission and approval of change by either NCUA Regional Director or State Supervisor;
(iii) Current designation as a low-income credit union.
(4) Specifics of how the credit union proposes to serve the needs of its members and the community with Program funds. The applicant credit union will also construct and submit a plan for its growth and development. The plan will set forth objectives for financial growth, credit union development and capitalization, and the means for achieving these objectives.
(5) How the credit union proposes to cooperate with existing community development programs of state and Federal agencies, including the Department of Housing and Urban Development and the Department of Health and Human Services as well as others.

(c) NCUA will notify applicant credit unions as to whether or not they have qualified for a loan under this Part. Reasons for nonqualification will be stated.
§ 705.6 Community development committee.
(a) Each participating credit union, in addition to its other committees, shall have a Community Development Committee. The responsibilities of the Community Development Committee fall into two interrelated categories: coordination (liaison) and identification of community needs.
(1) Coordination. The Community Development Committee must establish and maintain liaison with government agencies and others having developmental projects in the community. This liaison will help ensure a united effort at developing the community with a minimum of duplication. The Community Development Committee shall see to it that the community is kept informed of the participating credit union’s activities.
(2) Community Needs Plan. Within 60 days after a credit union has been selected for participation in the Program, the Community Development Committee will prepare and present to the participating credit union’s board of directors, a Community Needs Plan. This Plan will set forth the coordination contacts established. The Plan will also contain, in priority sequence, a list of community needs that the credit union can be able to provide. The participating credit union’s board of directors will make the decision as to what services the credit union can provide. The Committee’s responsibility is to advise the board on needs and to provide sufficient cost estimates and “how to” recommendations to enable the board to reach the best decisions.
(b) The Community Development Committee shall be appointed by the board from among the members of the credit union, one of whom must be a board member of the participating credit union. The board shall determine the number of members on the committee which shall not be fewer than three nor more than five. Regular terms of the committee shall be for one or two years as the board shall determine; Provided, however, that all terms shall be for the same number of years and until the appointment and qualification of successors. No members of the Community Development Committee shall be compensated as such.
(c) In addition to the Community Development Committee working with the credit union board of directors, they will report to the credit union members once a year either at the annual meeting or in a written report sent to all members.
§ 705.7 Loans to participating credit unions.
(a) Amount and Recording of Loans. A credit union selected for participation in the Program will be eligible to receive up to $200,000 in the form of a loan from the Community Development Revolving Loan Fund for Credit Unions. The amount of the loan will be based on the creditworthiness of the participating credit union, financial need, and demonstrated capability of a participating credit union to provide financial and related services to its members. At the discretion of NCUA, a loan will be recorded by a participating credit union as either a note payable or a nonmember deposit.
(b) Matching requirements. Participating credit unions will be encouraged to develop, as rapidly as possible, a permanent source of member shares.
(1) Loan monies made available must be matched by the participating credit union by increasing its member and nonmember share deposits in an amount at least equal to the loan amount. Participating credit unions must meet this matching requirement within one year of the approval of the loan application and must maintain the increase in the total amount of member share deposits for the duration of the loan.
(2) Drawdown of the loan to a participating credit union may be made in a maximum of two payments only. Upon approval of its loan application and before it meets its matching requirement, a participating credit union may receive 50% of the loan committed. The remainder of the funds committed will be available to the participating credit union only after it has documented that it has met the match requirement for the total amount of the loan committed as such.
(3) Failure of a participating credit union to generate the required match within one year of the approval of the loan will result in the reduction of the loan proportionate to the amount of match actually generated. Payment of any additional funds initially approved will be limited as appropriate to reflect the revised amount of loan approved.
and any funds already advanced to the participating credit union in excess of the revised amount of loan approved must be repaid immediately to NCUA. Failure to repay such funds to NCUA upon demand shall result in the default of the entire loan.

(4) Failure by a participating credit union to achieve at least 25% of its proposed match may result in the requirement by NCUA that immediate and full repayment of the loan be made.

(c) Terms and repayment. (1) Assistance made available in this Program, whether recorded by the credit union as a note payable or nonmember deposit at NCUA's direction, is, in the form of a loan and must be repaid to NCUA. All loans will be scheduled for repayment within the shortest time compatible with sound business practices and with the objectives of the Program, but in no case will the term exceed five years. The policy of NCUA is to revolve these funds to qualifying credit unions as often as practical, in order to gain maximum economic impact on as many credit unions that are qualified to participate in the Program as possible.

(2) Semiannual interest payments (beginning six months after the initial distribution of a loan) and semiannual principal payments (beginning one year after the initial distribution of a loan) will be required.

(d) Interest rates. Loans made under this rule shall bear interest at a fixed annual percentage rate of 3 percent.

(e) Default, Collections and Adjustments. The terms of each loan agreement shall provide for the immediate acceleration of the unpaid balance for breach or default in the performance by the participating credit union of the terms or conditions of the loan. This will include misrepresentations, default in making interest/principal payments, failure to report, insolvency, failure to maintain adequate match for the duration of the loan period, etc. The unpaid balance will also be accelerated and immediately due if any part of the loan funds are improperly used, or if uninvested loan proceeds remain unused for an unreasonable or unjustified period of time.

§ 705.9 Application period.
Applications for participation in the program will be accepted through November 30, 1967. As additional funds become available, new applications will be accepted. Notices of future availability of funds will be published in the Federal Register.

§ 705.10 Technical assistance.
NCUA will contract with an outside provider to render technical assistance to participating credit unions. Technical assistance provided will aid participating credit unions in providing services to their members and in the efficient operation of such credit unions. Up to one-half of the interest monies received on loans repaid into the Fund will be spent on technical assistance, but such amount will not exceed $120,000 per year.

PART 700—[AMENDED]

2. The authority citation for Part 700 is revised to read as follows:
Authority: 12 U.S.C. 1732(b), 1757(e), 1763.
3. Section 700.1(h)(1) is revised to read as follows:
§ 700.1 Definitions.

(h) * * *
(1) Those members whose annual income falls at or below the lower level standard of living classification as established by the Bureau of Labor Statistics and as updated by the Employment and Training Administration of the U.S. Department of Labor; * * * * *

[FR Doc. 87-21324 Filed 9-15-67; 8:45 am]
BILLING CODE 7535-01-M

SMALL BUSINESS ADMINISTRATION
13 CFR Part 105

Standards of Conduct

AGENCY: Small Business Administration.

ACTION: Final rule.

SUMMARY: This final regulation amends existent 13 CFR §§ 105.511(g) to provide that Financial Disclosure Statements required to be filed by Executive Order 11222 (May 8, 1965) may be disclosed to individuals who must have access to them in order to carry out responsibilities established by law.

ADDRESS: Written comments should be addressed to Martin D. Teckler, Deputy General Counsel, Room 700, 1441 L Street, NW., Washington, D.C. 20416.

FOR FURTHER INFORMATION CONTACT: Martin D. Teckler, Telephone (202) 653-6642.

SUPPLEMENTARY INFORMATION: Heretofore SBA's regulation implementing Executive Order 11222 has not specifically provided for access to Financial Disclosure Statements (SBA Form 703) other than upon request and by demonstration of good cause to SBA's Administrator and the approval of the request. This regulation amendment is intended to provide for administrative ease in handling requirements for inspection of the Statements where legitimately authorized inquiries are concerned. Thus, for example, when the SBA's Office of Inspector General is carrying out a function authorized by the Inspector General Act, Pub. L. 95-452 (October 12, 1978), 5 U.S.C. App., a Statement will be made available upon written request to the Standards of Conduct Counselor in whose custody the Statement resides. The request must reference that it is being made in order to carry out a function authorized by law, and the requester must establish his or her identity as a person operating under authority of law to the satisfaction of the Standards of Conduct Counselor (SBA Inspector General credentials will satisfy this requirement). The Standards of Conduct Counselor will in turn respond in writing to the request, referencing this regulation and the establishment of the identity of the requester and immediately provide the Statement.

With respect to requests from other sources, the Standards of Conduct Counselor will follow the same procedure: determining the identity of the requester, the legal authorization, and determining that he or she finds that the request is or is not granted, and the reasons therefore before providing or not providing the Statement. SBA's Regional Standards of Conduct Counselors on the implementation of this amendment, both substantively and procedurally.

This regulation is one which is a matter relating to Agency management or personnel. Therefore, the provisions of 5 U.S.C. 553 do not apply to its promulgation. In addition, for purposes of the Regulatory Flexibility Act, 5 U.S.C. 601, et seq., it will not have a significant impact on a substantial number of small entities, and will have no Paperwork Reduction Act (44 U.S.C. ch. 35) implications.
List of Subjects in 13 CFR Part 105
Conflict of interests.

PART 105—[AMENDED]

1. The authority citation for Part 105 continues to read as follows:

2. In §105.511, paragraph (g) is revised to read as follows:
§105.511 Financial disclosure statements under Executive Order 11222.
(g) Each Statement of Employment and Financial Interests shall be held in confidence by the recipient and no information contained therein shall be disclosed except as the Administrator may determine for good cause shown, or to those individuals who must have access in order to carry out responsibilities under law upon request to the appropriate Standards of Conduct Counselor.
Date: August 27, 1987.

James Adnior,
Administrator.

FOR FURTHER INFORMATION CONTACT:
Efrain Esparza, Airplane Certification Branch, ASW–150, Aircraft Certification Division, Southwest Region, FAA, Fort Worth, Texas 76190–0158; Telephone (617) 624–5156.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 38 of the Federal Aviation Regulations to include an AD requiring an inspection of the front and rear wing spars on all Champion Model 7 and 8 series airplanes was published in the Federal Register on November 13, 1986 (51 FR 41113). The original comment period, ending December 10, 1986, was extended to April 5, 1987, by the Federal Register publication of December 31, 1986 (51 FR 47249) to allow interested persons additional time for response to the NPRM.

The proposal resulted from two accidents that were caused by in-flight airframes structural failure of the wing on Bellanca (Champion) Model 8GCBC wherein compression failures in the wing's main spar were contributing factors. Compression failures are failures of wood fibers on a plane perpendicular to the wood fiber longitudinal axis. If undetected, such compression failure can result in in-flight structural failure of the wing with loss of the airplane.

The National Transportation Safety Board (NTSB) recommended to the FAA that an Advisory Notice be mailed to all Bellanca (Champion) Model 6GBCB owners regarding in-flight airframe failure accidents involving this airplane. In addition, the NTSB recommended to the FAA that an AD be issued to require compliance with (1) Bellanca Service Letter No. C–139A, “Inspection Wing Rib/Spar Attachment and Leading Edge Support Block Nails,” applicable to Models 7GC, 7GCA, 7GCB, 7GCBR, 71C, 7KC, 7KCA, 7ECA, 7GCA, 7GCB, 8KCB, and 8GCB, (2) Bellanca Service Letter No. 116, “Wing Leading Edge Inspection,” applicable to the Model 6KCB, and (3) Bellanca Service Letter No. 95, “Inspection, Repair, and Modification of Alleron Bay Ribs,” applicable to Models 7ECA, 7GCA, and 7GCCB.

The FAA, after reviewing information from the accident reports, determined that in the two accidents a compression crack in the wing spars contributed to the spar and wing failures. In addition, the FAA could not find evidence that any of the problems associated with Bellanca Service Letter No. C–139A, 116, and 95 were contributed to any of the accidents. Therefore, on October 17, 1985, the FAA issued a General Aviation Airworthiness Alert, AC 43–16, “Bellanca Aircraft Possible Wing Failure, Model 7 and 8 Series, to recommend an inspection of the wing spars for compression failures for the Model 7 and 8 series airplanes. The General Aviation Airworthiness Alert was sent to all the Model 7 and 8 series airplane owners in response to the NTSB's first recommendation. However, the level of response from the owners to this AC was very low considering the nature of the problem and the number of airplanes involved.

Since this condition was considered likely to exist or develop on other airplanes of the same/similar type design, the FAA determined that mandatory inspection of the wing spars of Champion (Bellanca) Model 7 and 8 series airplane was necessary to detect and correct compression failures to preclude in-flight structural failure of the wing. Therefore, the proposed AD would have made compliance with specific parts of the instructions in AC 43–16 dated October 17, 1985, mandatory for all Bellanca (Champion) 7 and 8 series airplanes.

Interested persons have been afforded an opportunity to participate in the making of this amendment, and due consideration has been given to all matters presented. Substantive changes and changes of an editorial and clarifying nature have been made to the proposed rule upon relevant comments received and further review within the FAA. In general, the comments received address 35 major issues. Ten commentators agreed with the proposal. Four hundred thirty-one commentators disagreed with the economic impact not being significant. These commentators expressed concern that the required inspection would make it prohibitive to continue flying the airplanes; in addition, they stated that the inspection could amount to as much as 25 percent of the total value of the airplane. They contended that for those airplanes in the aerobatic category, the consequences would be even worse since the inspection would have to be performed at every 100 flight hours. Cutting and patching fabric every 100 flight hours would result in covering of the wings more often and required additional cost not identified in the economic impact analysis. Therefore, they believed that this would be a significant economic impact contrary to what the NPRM stated. The FAA has revised the AD in light of this comment and as a result of some of the other comments discussed herein. The changes to the AD have resulted in a less severe economic impact than the one given in the original proposal.
One hundred seventy-seven commenters objected to the proposal because they believed that only those airplanes that had wing damage should be inspected. They stated that all in-flight wing failures occurred on airplanes that had previously been overturned, flipped on their back, or had some other kind of damage to their wings. They believed that there was not enough justification to make those airplanes with no damage history comply with the proposed AD. The FAA disagrees and believes that airplane records in some instances are not reliable sources of information especially regarding accident history and latent or undetected damage. The FAA believes that at least a one-time inspection should be performed on those model airplanes regardless of service history.

One hundred fifty-one commenters disagreed with the proposal on including all 7 and 8 series airplanes. The commenters' objections were based on the good service history of these airplanes. They stated that in their association with these airplanes they never had a problem with compression cracks of the type mentioned in the proposal, and thus they felt the proposal should not apply to all Model 7 and 8 airplanes. The FAA agrees. Therefore, only those airplanes which service history justifies AD action will be covered in the AD.

One hundred forty commenters objected to the proposal on the basis that it implied that all Model 7 and 8 series airplanes, especially the aerobatic and normal category airplanes, were the same. The FAA agrees with the comments and the AD will be clarified. Originally, all Model 7 and 8 series airplanes were included in the proposal; however, only Model 8GCBC airplanes will be covered in the AD.

Ninety-nine commenters disagreed with the proposal because of the lack of sufficient accident and incident information to support it. They stated that two airplane accidents out of a fleet of 8,200 airplanes could not justify the drastic and expensive inspection proposed. The FAA agrees that two airplanes out of 8,200 is a very small figure; however, these two airplanes had in-flight structural failure of the wing which resulted in loss of the airplanes. The FAA believes that there is not sufficient justification to support an AD applicable to all 8,200 airplanes but believes the AD should be applicable to those models that have service history of damaged spars or wing structural failures.

Thirty-seven commenters responded against the proposal because they believe that the Airworthiness Alert issued on October 17, 1985, was sufficient action. They stated that the Alert was given sufficient publicity and distributed to all affected parties. The FAA does not agree that the 1985 Alert has been sufficient to resolve and correct the unsafe conditions that currently exists in the Model 8GCBC airplanes. The FAA does agree that the Alert is an informative tool and, as stated in the Alert, the FAA does encourage all Model 7 and 8 series owners to accomplish the inspections specified in the Alert. However, the FAA believes the aforementioned service history on Model 8GCBC airplanes justifies an AD to insure compliance on those airplanes. Further, the FAA is currently revising the original 1985 Airworthiness Alert to include a discussion of the latest information and findings relative to this AD and plans to reissue the Alert to all owners of Model 7 and 8 series airplanes. The revised Alert will continue to recommend inspections of the wooden spars on both series airplanes, especially if subjected to any accident or other occurrence which may have resulted in structural damage to the wings.

Nineteen commenters disagreed with the inspection procedures outlined in the proposal. They stated that the fabric cutouts jeopardized the structural integrity of the wing and the airplane, especially if performed every 100 flight hours as required for airplanes in the aerobatic category. They believe that the cutting and patching of the fabric would weaken the wing making flying unsafe. The FAA disagrees. If FAA approved methods for cutting and repairing fabric are used, the structural integrity of the fabric and wing should not deteriorate.

Seventeen commenters recommended that inspection rings with plates be used in lieu of fabric cutouts. They argued that this would be more economical especially for repetitive inspections. The FAA agrees, and the AD will allow the use of inspection rings.

Nineteen commenters opposed the proposal because they believe it was drafted as a result of four separate in-flight wing structural failures involving airplanes performing aerobatic maneuvers. They stated that the airplanes, Model 8GCBC Scouts, were not certified in the aerobatic category and yet their wings failed while performing aerobatic maneuvers. The FAA does agree that unauthorized aerobatic maneuvers may have contributed to some accidents and the AD has been revised to contain instructions to install an "AEROBATICS PROHIBITED" placard on the instrument panel that will supplement the existing operational placard and impose no additional limitation on the operation of Model 8GCBC airplanes.

Fourteen commenters objected to the proposal by stating that annual inspections provided enough inspections to determine the airworthiness of the airplanes. The FAA disagrees. There are no inspections performed on these airplanes to detect compression failures in the spars. The FAA believes that by making the inspection mandatory, the level of safety will be enhanced to assure a minimum acceptable level of safety.

Fourteen commenters disagreed with the proposal by stating that it had originated as a result of improper inspections performed by inspectors and by improper repairs. The FAA agrees that some of the airplanes may not have been properly inspected for compression failures. Therefore, the FAA will require an inspection for compression failures through this AD action.

Eleven commenters recommended that airplanes in the aerobatic category which will be required to have an inspection every 100 hours flight be placarded for nonaerobatics until the wings have to be re-covered. They stated that they could fly their airplane like a normal category airplane, and thus only the initial inspection would have to be performed. The FAA believes that based on the other comments received and the revisions made in the AD, the above recommendation is not appropriate.

Eight commenters recommended that the proposal should only apply to Champion Model 8GCBC airplanes. They stated that since this is the only Model with a service history of wing failures there was not justification to apply it to the other models. The FAA agrees and the AD will be revised to include only the Model 8GCBC airplanes.

Eight commenters recommended that the proposed AD require an inspection of the wing strut-spar attach area rather than the entire spar. They contended that the highest stress concentration during an incident/accident where the wings suffer damage will be this area. They further stated this area will show cracks before any other area does. The FAA agrees, and the AD will cover an inspection of the wing strut attach area in lieu of the entire spar.

Four commenters stated the proposal was not clearly written to specify to which airplanes it applied. They stated that the proposal talks about wing fuel tanks and calls for an inspection of the
The FAA disagrees. Bellanca Service Letter No. C-139A requires an inspection of the leading edge support near the wing rib/spar attachment area. The FAA disagrees that inspection requires the lens and flashlight to be as close to the side surface of the spar as possible, and the existing inspection holes may not provide sufficient access.

One commenter requested that the proposal be clarified and that it be revised to address the fact that some airplanes might have metal spars, and thus the proposal would not apply to them. The FAA agrees. The AD will require the inspection only on airplanes with wooden spars. Two commenters stated that the proposal did not give consideration to those airplanes which have been recently re-covered or had their wing spars replaced. They recommended that the FAA revise the proposal to provide some relief to these airplanes. The FAA agrees, and the AD reflects this comment.

One commenter questioned the effectiveness of the inspection procedures to detect compression failures. The commenter did not believe that compression cracks could be detected if only one side of the spar is inspected.

The FAA disagrees. Compression cracks, especially those in the wing strut attach area, are visible from either side. They extend across the thickness of the spar and run across the grain from top to bottom of the spar or vice versa.

Several commenters objected to the proposal being more stringent on aerobatic category airplanes than normal category airplanes. They stated that aerobatic category airplanes are designed to higher load factors than normal category airplanes. The FAA agrees, and the AD reflects this comment.

One commenter recommended that the proposal specify on which surface the fabric cutouts are to be made on top or bottom of the wing. The FAA agrees and the AD incorporates this comment.

One commenter disagreed with the proposal because he believes Bellanca Service Letter No. C-139A is already doing what the proposal requires. The FAA disagrees. Bellanca Service Letter No. C-139A requires an inspection of the leading edge support near the wing rib/spar attachment area. The FAA disagrees that inspection requires the lens and flashlight to be as close to the side surface of the spar as possible, and the existing inspection holes may not provide sufficient access.

One commenter requested that the proposal be clarified and that it be revised to address the fact that some airplanes might have metal spars, and thus the proposal would not apply to them. They recommended that the FAA revise the proposal to provide some relief to these airplanes. The FAA agrees, and the AD reflects this comment.
During the examination of the spar with a hand lens and light, care must be taken not to mistake minute breaks in the surface fibers that are sometimes caused by chafing, for compression failures. These surface breaks can be removed with a sharp knife, whereas a compression failure is usually still visible after a thin shaving has been taken off. The knife must be sharp so that a very thin shaving can be removed without crushing the remaining fibers and thereby obscuring a compression failure if present.

(3) If any compression failures are found, prior to further flight, repair or replace the spar.

Note 2—Other conditions such as loose/missing rib nails should be looked for, and unsatisfactory conditions should be repaired.

(d) After the inspection specified in paragraph (c) of this AD has been accomplished, prior to further flight repair the wing fabric cutout using appropriate maintenance instructions and/or reinstall inspection hole covers, as applicable.

(e) The inspection specified in paragraph (c) of this AD is not applicable to the following airplanes:

(1) Airplanes modified with a metal spar per STC No. SA3098NM and

(2) Airplanes equipped with wood wing spars providing that:

(a) Within 500 hours TIS prior to the effective date of this AD either the spars were replaced and the wings recovered, or the spars have been inspected for compression failures as described in this AD and, if applicable, prior to the above replacement or inspection, the airplane has not been involved in an accident which may have resulted in structural damage to the wings.

(b) If, at any time, subsequent to the effective date of this AD, the airplane is involved in an accident that may have resulted in structural damage to the wings, prior to further flight inspect the wing spars in accordance with paragraph (c) of this AD.

(g) Airplanes may be flown in accordance with FAR 21.197 to a location where this AD becomes effective, or the spars are replaced and the wings recovered, or the inspection specified in paragraph (c) of this AD has been accomplished, if the airplane is involved in an accident that may have resulted in structural damage to the wings, prior to further flight.

(h) An equivalent method of compliance specified in paragraph (c) of this AD may be used if approved by the manufacturer.

(i) An equivalent method of compliance with this AD may be used if approved by the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington 98150; or FAA, Central Region, Atlantic Aircraft Certification Office, Suite 210, 1669 Phoenix Parkway, Atlanta, Georgia.

FOR FURTHER INFORMATION CONTACT:
Mr. William H. Trammell, Systems Branch, AEC-130A, FAA, Central Region, Atlanta Aircraft Certification Office, Suite 210, 1669 Phoenix Parkway, Atlanta, Georgia 30349; telephone (404) 991-3020.

SUPPLEMENTARY INFORMATION: The FAA has recently received a report of an in-flight fire which occurred on a Lockheed-Georgia Model 382 series airplane (military Model C-130 series airplane), operated by the United States Air Force. During an overwater operation, at Flight Level 210, smoke and flames were observed in the climb deck. Flames were emanating from the circuit breaker panel, and were extinguished by the flight crew with a halon fire extinguisher. The airplane landed without further incident; there were no injuries. Investigation revealed that the fire originated in the area of the essential DC bus, where the clamp was short circuiting wires coming from the bus. An initial inspection conducted by the Air Force of the Model C-130 series airplanes located at the base nearest where the incident occurred identified more than 20 airplanes having circuit breaker panel wiring bundles which did not meet the required minimum clearance between the affected wire bundles, wire bundle clamps, and circuit breaker terminals. Chafed and abraded wiring was also detected. This condition, if not corrected, can lead to fire on board the airplane.

The FAA has reviewed and approved Lockheed Alert Service Bulletin A382-24-19, dated August 7, 1987, which describes an inspection of the pilot’s and copilot’s circuit breaker panel areas for chafing or short circuiting, and for proper clearance between wire bundles, wire bundle clamps, and circuit breaker terminals; repair or replacement of any damaged wire; and relocation of wire bundle clamps, if necessary, to maintain minimum clearance.

Since this situation is likely to exist or develop on other airplanes of the same type design, this AD requires inspection of the circuit breaker panels, wire bundles, wire bundle clamps, and circuit breaker terminals, repair of damaged wire, and relocation of wire bundle clamps, if necessary, in accordance with the Lockheed alert service bulletin previously mentioned.

Since a situation exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable, and good cause exists for making this amendment effective in less than 30 days.

The FAA has determined that this regulation is an emergency regulation that is not considered to be major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this document involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant/major regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation is not required).

List of Subjects in 14 CFR Part 39
Aviation safety, Aircraft.
Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

§ 39.13 [Amended]

2. By adding the following new airworthiness directive:

Lockheed-Georgia: Applies to Model 382, 382B, 382E, 382F, and 382G series airplanes; Serial Numbers 3946 through 5024, except 4412, 5022, 5025, 5027, 5029, and 5032; certificated in any category. Compliance required as indicated, unless previously accomplished.

To prevent the potential for smoke or fire occurring in the flight deck, accomplish the following:

A. Within the next 25 hours time-in-service, inspect the pilot’s and copilot’s circuit breaker panel areas, as follows:

1. Gain access to the following 6 circuit breaker panels in the flight station: pilot’s side panel, upper and lower pilot’s distribution panel, copilot’s side panel, upper and lower copilot’s distribution panel.

2. Open each circuit breaker panel and visually inspect for scorching, chafing, or short circuiting between circuit breaker wire terminals, wire bundles, and wire bundle clamps.

3. Inspect for minimum clearance of 0.250 inch between circuit breaker wire terminals, wire bundles, and wire bundle clamps.

4. With circuit breaker door closed, visually inspecting from adjacent door opening, inspect circuit breaker and attached wiring for chafing and minimum clearance. Direct particular attention to wire bundles routed at bottom of panels.

5. If 0.250 inch minimum clearance is present and no wire chafing or damage exists, return airplane to service.

6. If damaged wire is found, prior to further flight repair or replace wire in accordance with the applicable technical manual, SMP 582, Hercules Wiring Diagram Manual.

7. If 0.250 inch clearance does not exist, prior to further flight relocate wire bundle clamps and/or spaces, if necessary, to maintain minimum clearance. Reroute wiring in accordance with the applicable technical manual, SMP 582, Hercules Wiring Diagram Manual.

B. Accomplishment of the inspection, repair, and relocation procedures described in Lockheed Alert Service Bulletin ANM-8, 1390 Pacific Highway South, C-68966, Seattle, Washington 98168, Telephone: (206) 431-2535.

C. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

D. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Horizon Airlines at Hailey, Idaho.

This amendment becomes effective September 17, 1987.

Wayne J. Barlow,
Director, Northwest Mountain Region.

BILLING CODE 4910–13–M

14 CFR Part 71

Revision to Hailey, ID, Transition Area

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Correction to final rule.

SUMMARY: This action corrects Federal Register Document 87–19107 which revised the Hailey, Idaho, transition area. An inadvertent error was made in the effective date of this action.

SUPPLEMENTARY INFORMATION:

History

Federal Register Document 87–19107 was published on August 21, 1987 (52 FR 31614) revising the Hailey, Idaho, transition area. This action was necessary to provide 700-foot controlled airspace to accommodate a Microwave Landing System (MLS) Special Instrument Approach Procedure (SIAP) to Horizon Airlines at Hailey, Idaho.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore — (1) is not a “major rule” under Executive Order 12291; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Aviation safety, Transition areas.

Adoption of the Correction

Accordingly, pursuant to the authority delegated to me, Federal Register Document 87–19107, as published in the Federal Register on August 21, 1987 (52 FR 31614) is corrected as follows:

Change the effective date from 0901 UTC, September 30, 1987, to 0901 UTC, September 24, 1987 (Secs. 307(a) and 313(a), Federal Aviation Act of 1958 [49 U.S.C. 1348(a) and 1354(a)]; [49 U.S.C. 106(g) [Revised Pub. L. 97–449, January 12, 1983]; and 14 CFR 11.69].

Temple H. Johnson, Jr., Manager, Air Traffic Division, Northwest Mountain Region.

[FR Doc. 87–21227 Filed 9–15–87; 8:45 am]
BILLING CODE 4910–13–M

14 CFR PART 71

[Airspace Docket No. 87–AGL–13]

Alteration of Transition Area; Huntington, IN

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The nature of this action is to alter the Huntington, IN, transition area to accommodate a new NDB Runway 9 Standard Instrument Approach Procedure (SIAP) to Huntington Municipal Airport. The intended effect of this action is to ensure segregation of the aircraft using approach procedures in instrument conditions from other aircraft operating under visual weather conditions in controlled airspace.

Aviation Regulations (14 CFR Part 71) is amended as follows:

---

**PART 71—[AMENDED]**

1. The authority citation for Part 71 continues to read as follows:

   Authority: 49 U.S.C. 1348(a); 1354(a); 15010; Executive Order 10854; 49 U.S.C. 106(g).

   §71.181 [Amended]

   2. Section 71.181 is amended as follows:

   Huntington, IN [Revised]:

   That airspace extending upward from 700 feet above the surface within a 5-mile radius of Huntington Municipal Airport (lat. 40°51'12"N, long. 85°27'37"W); and within 3.5 miles each side of the 260° bearing from the Huntington NDB, extending from the 5-mile radius to 8.5 miles west of the airport, excluding those portions that overlie the Fort Wayne, IN and Wabash, IN transition areas.

   Teddy W. Burcham,
   Manager, Air Traffic Division.

   [FR Doc. 87–21228 Filed 9–15–87; 8:45 am]

   BILLING CODE 4910–13–M

**14 CFR Part 71**

**[Airspace Docket No. 87–ASW–7]**

**Designation of Transition Area; Brady, TX**

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Final rule.

**SUMMARY:** This action will designate a transition area at Brady, TX. This action is necessary due to the proposed nondirectional radio beacon (NDB) standard instrument approach procedure (SIAP) to the Curtis Field Airport using the Brady NDB (BBD). The intended effect of this action is to provide adequate controlled airspace for aircraft operating under instrument flight rules (IFR) executing the new SIAP to the Curtis Field Airport, and other aircraft operating under visual flight rules (VFR). Coincident with this action, the airport status will be changed from VFR to IFR.

**EFFECTIVE DATE:** 0901 UTC, November 19, 1987.

---

**FOR FURTHER INFORMATION CONTACT:**

Bruce C. Beard, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Department of Transportation, Federal Aviation Administration, Fort Worth, TX 76193–0530, telephone (817) 624–5561.

---

**SUPPLEMENTARY INFORMATION:**

**History**

On March 11, 1987, the FAA proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to designate a transition area at Brady, TX (52 FR 9182).

Interested persons were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. The only comments received objecting to this proposal came from the United States Air Force. Their objections centered on the following issues:

- The establishment of the transition area would create complications for military aircraft flying Military Training Routes (MTR) in the Brady, TX area.
- When the transition area is in effect, the western third of the Brady Low Military Operating Area (MOA) would be unusable for Low Altitude Training (LOWAT).

The FAA does not agree with these objections. The anticipated number of IFR arrivals to or departures from Curtis Field Airport is not expected to have an adverse effect on aircraft flying MTR's in the area. Standard IFR separation will be provided between aircraft on an IFR clearance to/from Curtis Field Airport and aircraft operating along IFR MTR's in the area.

The FAA is committed to providing protected access to airports having a SIAP. At the same time, the agency is committed to the use of airspace on a real-time basis. Based on the current level of IFR traffic at Curtis Field Airport, the FAA believes that there should be little impact on missions being flown by aircraft using the Brady Low MOA.

Except for editorial changes, this amendment is that proposed in the notice. Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6C dated January 2, 1987.

---

**The Rule**

This amendment to Part 71 of the Federal Aviation Regulations alters the Huntington, IN, transition area to accommodate a new NDB Runway 9 SIAP. This modification consists of decreasing the radius from 7 miles to 5 miles and adds an extension from the 5-mile radius to 8.5 miles west of the airport.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety. Transition areas.

**Adoption of the Amendment**

Accordingly, pursuant to the authority delegated to me, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended as follows:
Transition areas are designed to contain IFR operations in controlled airspace during portions of the terminal operation and while transiting between the terminal and en route environment. The intended effect of this action is to ensure segregation of aircraft using the approach procedures under IFR and other aircraft operating under VFR. Coincident with the amendment, the airport status will change from VER to IFR.

The FAA had determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subject in 14 CFR Part 71
Aviation safety, Transition areas.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended as follows:

PART 71—[AMENDED]

1. The authority citation for Part 71 continues to read as follows:

§ 71.181 [Amended]
2. Section 71.181 is amended as follows:
Brady, TX [New]

The airspace extending upward from 700 feet above the surface within a 6.8-mile radius of the Curtis Field Airport, (Latitude 31°11'00" N., Longitude 99°19'27" W.) and within 3 miles each side of the 355 bearing from the Brady nondirectional radio beacon (NDB) (Latitude 31°10'42.6" N., Longitude 99°19'22.4" W.), extending from the 6.5-mile radius area to 8 miles north of the Curtis Field Airport.

Issued in Fort Worth, TX, on September 2, 1987.
Larry L. Craig,
Manager, Air Traffic Division, Southwest Region.

Docket No. 25359; Amrd. No. 1356

Standard Instrument Approach Procedures; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs) for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, addition of new obstacles, or changes in air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES:
Effective: An effective date for each SIAP is specified in the amendatory provisions.

FOR FURTHER INFORMATION CONTACT:
Donald K. Funai, Flight Procedures Manager, Air Traffic Division, Office of Flight Standards, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone (202) 205-2277.

SUPPLEMENTARY INFORMATION: This amendment to Part 97 of the Federal Aviation Regulations (14 CFR Part 97) prescribes new, amended, suspended, or revoked Standard Instrument Approach Procedures (SIAPs). The complete regulatory description of each SIAP is contained in official FAA form documents which are incorporated by reference in this amendment under 5 U.S.C. 552(a), 1 CFR Part 51, and § 97.20 of the Federal Aviation Regulations (FARs). The applicable FAA Forms are identified as FAA Forms 8260-3, 8260-4, and 8260-5. Materials incorporated by reference are available for examination or purchase as stated above.

The large number of SIAPs, their complex nature, and the need for a special format make their verbatim publication in the Federal Register expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs, but refer to their graphic depiction on charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and the need for a special format mandating the verbatim publication in the Federal Register is unnecessary. The provisions of this amendment state the affected CFR (and FAR) sections, with the types and effective dates of the SIAPs. This amendment also identifies the airport, its location, the procedure identification and the amendment number.

This amendment to Part 97 is effective on the date of publication and contains separate SIAPs which have compliance dates stated as effective dates based on related changes in the National Airspace System or the application of new or revised criteria. Some SIAP amendments may have been previously issued by the FAA in a National Flight Data Center (DFC) Notice to Airmen (NOTAM) as an emergency action of immediate flight safety relating directly to published aeronautical charts. The circumstances which created the need for some SIAP amendments may require making them effective in less than 30 days. For the remaining SIAPs, an
effective date at least 30 days after publication is provided.

Further, the SIAPs contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Approach Procedure (TERPs). In developing these SIAPs, the TERPs criteria were applied to the conditions existing or anticipated at the affected airports. Because of the close and immediate relationship between these SIAPs and safety in air commerce, I find that notice and public procedure before adopting these SIAPs is unnecessary, impracticable, and contrary to the public interest and, where applicable, that good cause exists for making some SIAPs effective in less than 30 days.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. If, therefore—(1) it is not a "major rule" under Executive Order 12291; (2) it is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 97

Approaches, Standard Instrument, Incorporation by reference.

Issued in Washington, DC, on September 4, 1987.

Robert L. Goodrich, Director of Flight Standards.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Part 97 of the Federal Aviation Regulations (14 CFR Part 97) is amended by establishing, amending, suspending, or revoking Standard Instrument Approach Procedures, effective at 0001 G.M.T. on the dates specified, as follows:

PART 97—[AMENDED]

1. The authority citation for Part 97 continues to read as follows:

BILING CODE 6560-50-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Housing—Federal Housing Commissioner

24 CFR Parts 201, 203, and 234

[Docket No. N-87-1728; FR-2398]

Mortgage Insurance; Changes to the Maximum Mortgage Limits for Single Family Residences, Condominiums and Manufactured Homes and Lots

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Notice of revisions to FHA maximum mortgage limits for high-cost areas.

SUMMARY: This Notice amends the listing of areas eligible for "high-cost" mortgage limits under certain of HUD’s insuring authorities under the National Housing Act by increasing the limits for Rutland County, Vermont, Johnston County, North Carolina and Horry County, South Carolina. Mortgage limits are adjusted in an area when the Secretary determines that middle- and moderate-income persons have limited housing opportunities because of high prevailing housing sales prices.

FOR FURTHER INFORMATION CONTACT: For single family: Morris Carter,
Director, Single Family Development Division, Room 9270; telephone (202) 755-6720. For manufactured homes: Christopher Peterson, Director, Office of Manufactured Housing and Regulatory Functions, Room 9158; telephone (202) 755-5210; 451 Seventh Street, SW., Washington, DC 20410. (These are not toll-free numbers.)

SUPPLEMENTARY INFORMATION:

Background

The National Housing Act (NHA), 12 U.S.C. 1710-1749, authorizes HUD to insure mortgages for single family residences (from one- to four-family structures), condominiums, manufactured homes, manufactured home lots, and combination manufactured home lots. The NHA, as amended by the Housing and Community Development Amendments of 1980 and 1981, permits HUD to increase the maximum mortgage limits under most of these programs to reflect regional differences in the cost of housing. In addition, sections 2(b) and 214 of the NHA provide for special high-cost limits for insured mortgages in Alaska, Guam and Hawaii.

On May 22, 1984, the Department published a revised list of areas eligible for "high-cost" mortgage limits, which contained several new features (see 49 FR 21520). First, there was no separate listing for condominium units, since these limits are now the same as those for other one-family residences. Second, the listing included instructions on how to compute the high-cost limits for combination manufactured homes and lots and individual lots, and specified the special high-cost amounts for manufactured homes, combination manufactured homes and lots and individual lots insured in Alaska, Guam and Hawaii. Third, it made changes to the list based on a new definition of "metropolitan area".

On October 1, 1986 [51 FR 34961], the Department published its annual complete listing of areas eligible for "high-cost" mortgage limits under certain of HUD's insuring authorities under the National Housing Act and the applicable limits for each area.

This Document

Today's document revises the high-cost mortgage amounts for Rutland County, Vermont, Johnston County, North Carolina and Horry County, South Carolina.

These amendments to the high-cost areas appear in two parts. Part I explains high-cost limits for mortgages insured under Title I of the National Housing Act. Part II lists changes for single family residences insured under section 203(b) or 234(c) of the National Housing Act.

National Housing Act High Cost Mortgage Limits

I. Title I: Method of Computing Limits

A. Section 2(b)(1)(D). Combination manufactured home and lot (excluding Alaska, Guam and Hawaii): To determine the high-cost limit for a combination manufactured home and lot loan, multiply the dollar amount in the "one family" column of Part II of this list by .80. For example, Horry County, South Carolina has a one-family limit of $73,600. The combination home and lot loan limit for Horry County is $73,600 X .80, or $58,880.00.

B. Section 2(b)(1)(E): Lot only (excluding Alaska, Guam and Hawaii): To determine the high-cost limit for a lot loan, multiply the dollar amount in the "one-family" column of Part II of this list by .20. For example, Horry County, South Carolina has a one-family limit of $73,000. The lot loan limit for Horry County is $73,000 X .20, or $14,720.

C. Section 2(b)(2). Alaska, Guam and Hawaii limits: The maximum dollar limits for Alaska, Guam and Hawaii may be 140% of the statutory loan limits set out in section 2(b)(1).

Accordingly, the dollar limits for Alaska, Guam and Hawaii are as follows:

1. For manufactured homes: $56,700. (40,500 X 140%).
2. For combination manufactured homes and lots: $75,600. ($54,000 X 140%).
3. For lots only: $18,900. (13,500 X 140%).

II. Title II: Updating of FHA Sections 203(b), 234(c) and 214 Area Wide Mortgage Limits

James E. Schoenberger,
Acting General Deputy Assistant Secretary for Housing—Federal Housing Commissioner.

[FR Doc. 87-21387 Filed 9-15-87; 8:45 am]
BILLING CODE 4210-27-M

24 CFR Part 688

[Docket No. N-87-1694; FR-2318]

Section 8 Housing Assistance Payments Program; Fair Market Rents for New Construction and Substantial Rehabilitation; Orange County, NY

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Final notice.

SUMMARY: Section 8(c)(1) of the United States Housing Act of 1937 requires the Secretary to establish Fair Market Rents (FMRs) periodically, but not less frequently than annually. This final Notice announces new Fair Market Rents for the Orange County market area of New York State. These rents are necessary to provide fair market rents comparable to market rents for new construction in this market area.

FOR FURTHER INFORMATION CONTACT: Edward M. Winiarski, Chief Appraiser, Valuation Branch, Technical Support Division, Office of Insured Multifamily Housing Development, 451 Seventh Street SW., Washington, DC 20410-6500. Telephone (202) 426-7624. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: The predecessor to this final notice (see the proposed notice of June 29, 1987, 52 FR 24172) offered some background information on the Housing Assistance Payments (HAP) Program. That notice explained that under the programs authorized by Section 8 of the United States Housing Act of 1937.

HAP or public housing agencies (PHAs) make rental assistance payments on behalf of eligible families to owners... FMRs are established by HUD and are based primarily...
necessary to service the debt on that particular project or the rentals a given market or jurisdiction, not the rentals since the FMRs principally reflect the principles and techniques, the best data for establishing seven safety zones in the safety hazard arising from the transit of vessels over 1600 gross tons. Entry into these zones is generally prohibited unless authorized by the Coast Guard Captain of the Port, Cleveland, OH. However, vessels may transit, but not moor, stand or anchor in, these zones as necessary to comply with the Inland Navigation Rules or otherwise facilitate safe navigation.

**EFFECTIVE DATES:*** This regulation becomes effective on September 3, 1987. It terminates on December 31, 1987 unless sooner terminated by the Captain of the Port, Cleveland.

**ADDRESS:** Comments should be mailed to Commanding Officer, Marine Safety Office, 1055 East Ninth Street, Cleveland, OH 44114. The comments will be available for inspection and copying at the same location. Normal office hours are between 8:00 a.m. and 4:30 p.m., Monday through Friday, except holidays.

**FOR FURTHER INFORMATION CONTACT:** Cdr. John H. Distin, Captain of the Port, (216) 522-4406.

**SUPPLEMENTARY INFORMATION:** In accordance with 5 U.S.C. 553, a notice of proposed rule making was not published for this regulation and good cause exists for making it effective in less than 30 days after Federal Register publication. Publishing an NPRM and delaying its effective date would be contrary to the public interest since immediate action is needed to prevent further damage to the vessels involved or further injury to the people involved.

Although this regulation is published as an emergency final rule without prior notice, an opportunity for public comment is nevertheless desirable to ensure that the regulation is both reasonable and workable. Accordingly, persons wishing to comment may do so by submitting written comments to the office listed under "ADDRESS" in this preamble. Commenters should include their names and addresses, identify the docket number for the regulations, and give reasons for their comments. Based upon comments received, the regulation may be changed.

**Drafting Information:** The drafters of this regulation are Cdr. John H. Distin, the Captain of the Port, Cleveland, and Lcdr. Carl V. Mosebach, project attorney, Ninth Coast Guard District Legal Office.

**Other Information**

HUD regulations in 24 CFR Part 50, implementing section 102(2)(C) of the National Environmental Policy Act of 1969, contain categorical exclusions from their requirements for the actions, activities, and programs specified in § 50.20. Since the FMRs adopted in this Notice are within the exclusion set forth in § 50.20(1), no environmental assessment is required, and no environmental finding has been prepared.

The Catalog of Federal Domestic Assistance Program number and title for the activities covered by this Notice are 14.150, Lower Income Housing Assistance Program (Section 8).

Accordingly, the following new Fair Market Rent schedule is adopted for the Orange County, New York market area:

### Schedule A—Fair Market Rents for New Construction and Substantial Rehabilitation (Including Housing Finance and Development Agencies’ Programs)

**DEPARTMENT OF TRANSPORTATION**

**Coast Guard**

**33 CFR Part 165**

[CoTP Cleveland Regulation 87-01]

**Safety Zone Regulations; Cuyahoga River, Cleveland, OH**

**AGENCY:** Coast Guard, DOT.

**ACTION:** Emergency rule.

**SUMMARY:** The Coast Guard is establishing seven safety zones in the Cuyahoga River and the adjoining shore area. The zones are needed to protect life and property associated with moored, standing or anchored vessels from a safety hazard arising from the transit of vessels over 1600 gross tons. Entry into these zones is generally prohibited unless authorized by the Coast Guard Captain of the Port, Cleveland, OH. However, vessels may transit, but not moor, stand or anchor in, these zones as necessary to comply with the Inland Navigation Rules or otherwise facilitate safe navigation.
Discussion of Regulation

The circumstance requiring this regulation results from large vessels (lakers) transiting the Cuyahoga River an average of twice a day through areas used increasingly by a large number of small, mainly recreational vessels. A pattern of collisions between large, underway vessels and small vessels located on the insides of bends in the river has been identified. On August 31, 1987, one such collision resulted in severe damage to two recreational boats, one of which had persons on board.

Seven areas are considered to present the greatest danger to life and property based on collisions that have occurred or are likely to occur. Those areas are in the vicinity of the river bends by Shooter's, Nautica Stage, Columbus Road bridge, Upriver Marina and Riverfront Yacht Services. Preventing mooring, standing or anchoring of vessels in these areas will decrease danger to lives and property.

This regulation is issued pursuant of 33 U.S.C. 1225 and 1231 as set out in the authority citation for all of Part 165.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Security measures, Vessels, Waterways.

Regulation

In consideration of the foregoing, Subpart C of Part 165 of Title 33, Code of Federal Regulations, is amended as follows:

PART 165—[AMENDED]

1. The authority citation for Part 165 continues to read as follows:

2. A new § 165.10901 is added to read as follows:

§ 165.10901 Cuyahoga River, Cleveland, Ohio—Safety zones.

(a) Location. The waters of the Cuyahoga River extending ten (10) feet into the river at the following seven (7) locations, including the adjacent shorelines, are safety zones:

(1) From the western end of Shooter's dock to fifty (50) feet east of 41 degrees 29'55.1" N., 81 degrees 29'24.5" W. which is the north point of the pier at Shooter's Restaurant.

(2) Twenty-five (25) feet downriver to twenty-five (25) feet upriver of 41 degrees 29'46.9" N., 81 degrees 42'10.7" W. which is the knuckle toward the downriver corner of the Nautica stage.

(3) Ten (10) feet downriver to ten (10) feet upriver of 41 degrees 29'45.5" N., 81 degrees 42'9.7" W. which is the knuckle toward the upriver corner of the Nautica stage.

(4) The fender on the west bank of the river at 41 degrees 29'45.2" N., 81 degrees 42'10" W. which is the knuckle at Bascule Bridge (railroad).

(5) The two hundred seventy (270) foot area on the east bank of the river between the Columbus Road bridge (41 degrees 29'18.8" N., 81 degrees 42'23.3" W.) to the chain link fence at the upriver end of Commodore's Club Marina.

(6) Fifty (50) feet downriver to twenty-five (25) feet upriver from 41 degrees 29'24.5" N., 81 degrees 41'57.2" W. which is the knuckle at the Upriver Marina fuel pump.

(7) Twenty-five (25) feet downriver to twenty-five (25) feet upriver from 41 degrees 29'41" N., 81 degrees 41'38.6" W. which is the end of the chain link fence between Jim's Steak House and Riverfront Yacht Services.

(b) Effective Date: This regulation becomes effective on September 3, 1987. It terminates on December 31, 1987 unless sooner terminated by the Captain of the Port.

(c) Regulations—(1) General rule. Except as provided below, entry of any kind or for any purpose into the foregoing zones is strictly prohibited in accordance with the general regulations in § 165.23 of this part.

(2) Exception. Vessels may transit, but not moor, stand or anchor in, the foregoing zones as necessary to comply with the Inland Navigation Rules or to otherwise facilitate safe navigation.

(3) Waivers. Owners or operators of docks wishing a partial waiver of these regulations may apply to the Captain of the Port, Cleveland. Partial waivers will only be considered to allow for the mooring of vessels in a safety zone when vessels of 1600 gross tons (GT) or greater are not navigating in the proximate area. Any requests for a waiver must include a plan to ensure immediate removal of any vessels moored in a safety zone upon the approach of a vessel(s) 1600 GT or greater.

John H. Distin,
Commander, U.S. Coast Guard, Captain of the Port, Cleveland, OH.

BILLING CODE 4110-14-M

VETERANS ADMINISTRATION

38 CFR Part 3

Removal of Monetary Rates

AGENCY: Veterans Administration.

ACTION: Final regulatory amendments.

SUMMARY: The Veterans Administration (VA) has amended the adjudication regulations to remove references to monetary benefits rates and income limitations and to replace them with the statutory citations or methods of computation that are the basis for those monetary rates and income limitations. The amendments are necessary to eliminate the cost of annual regulatory amendments based solely on legislative rate changes or changes made by standardized computation methods. The effect of these amendments will be to reduce unnecessary regulatory burdens and publication costs while maintaining an adequate method of advising the public of periodic changes in benefit rates and income limitations through publication in the “Notices” section of the Federal Register.

DATES: These amendments are effective October 16, 1987.

FOR FURTHER INFORMATION CONTACT: Robert M. White, Chief, Regulations Staff, Compensation and Pension Service, Department of Veterans Benefits, Veterans Administration, 810 Vermont Avenue, NW, Washington, DC 20420, (202) 233-3005.

SUPPLEMENTARY INFORMATION: On pages 17773-77 of the Federal Register of May 12, 1987, the VA published proposed amendments removing monetary rates from 38 CFR Part 3. Interested persons were given until June 9, 1987, to submit comments on the proposed amendments. Two comments were received.

Both commenters expressed the view that some method should be retained whereby the public would have access to current monetary rate schedules. One commenter suggested that an appendix to 38 CFR Part 3 be created so that monetary rates would be available to the public from a single source. The other commenter suggested leaving the monetary rates in the regulations or abolishing the regulations altogether as unnecessary.

Title 38 of the Code of Federal Regulations is revised each year as of July 1 and is printed and distributed for public use late in the year. Most of the monetary rates in 38 CFR Part 3 are adjusted each year effective December 1. Therefore, the monetary rates in each revision of title 38 are almost always out of date.

Creation of an appendix to 38 CFR Part 3 would not improve the situation because an appendix would have to be updated by publishing a regulatory amendment in the Federal Register.
PART 3—[AMENDED]

1. In §3.23, the heading and paragraphs (a) and (c) and revised to read as follows:

§ 3.23 Improved pension rates—Veterans and surviving spouses.

(a) Maximum annual rates of improved pension. The maximum annual rates of improved pension for the following categories of beneficiaries shall be the amounts specified in 38 U.S.C. 541 and 541, as increased from time to time under 38 U.S.C. 3112. Each time there is an increase under 38 U.S.C. 3112, the actual rates will be published in the "Notices" section of the Federal Register.

(1) Veterans who are permanently and totally disabled.

(2) Veterans in need of aid and attendance.

(3) Veterans who are housebound.

(4) Two veterans married to one another—combined rates.

(5) Surviving spouse alone or with a child or children of the deceased veteran in the custody of the surviving spouse.

(6) Surviving spouses in need of aid and attendance.

(7) Surviving spouses who are housebound.

(b) Child whose parent is a veteran in the custody of the surviving parent.

(c) Mexican border period and World War I veterans. The applicable maximum annual rate payable to a Mexican border period or World War I veteran under this section shall be increased by the amount specified in 38 U.S.C. 521. as increased from time to time under 38 U.S.C. 3112. Each time there is an increase under 38 U.S.C. 3112, the actual rate will be published in the "Notices" section of the Federal Register.

(1) Surviving spouse.

(2) Surviving children.

(3) Surviving grandchildren.

(4) Surviving parents.

2. In §3.24, the heading and paragraphs (b) and (c) are revised to read as follows:

§ 3.24 Improved pension rates—Surviving children.

(b) Child with no personal custodian or in the custody of an institution. In cases in which there is no personal custodian, i.e., there is no person who has the legal right to exercise parental control and responsibility for the child's welfare (see §3.57(d)), or the child is in the custody of an institution, pension shall be paid to the child at the annual rate specified in 38 U.S.C. 542, as increased from time to time under 38 U.S.C. 3112, reduced by the amount of the child's countable annual income. Each time there is an increase under 38 U.S.C. 3112, the actual rate will be published in the "Notices" section of the Federal Register.

(c) Child in the custody of person legally responsible for support.

(1) Single child. Pension shall be paid to a child in the custody of a person legally responsible for the child's support at an annual rate equal to the difference between the rate for a surviving spouse and one child under §3.23(a)(5), and the sum of the annual income of such child and the annual income of such person or, the maximum annual pension rate under paragraph (b) of this section, whichever is less.

(2) More than one child. Pension shall be paid to children in custody of a person legally responsible for the children's support at an annual rate equal to the difference between the rate for a surviving spouse and an equivalent number of children (but not including any child who has countable annual income equal to or greater than the maximum annual pension rate under paragraph (b) of this section) and the sum of the countable annual income of the person legally responsible for support and the combined countable annual income of the children (but not including the income of any child whose countable annual income is equal to or greater than the maximum annual pension rate under paragraph (b) of this section, or the maximum annual pension rate under paragraph (b) of this section times the number of eligible children, whichever is less).

(3) Section 3.25 is revised to read as follows:

§ 3.25 Parents' dependency and indemnity compensation (DIC)—method of payment computation.

Monthly payments of parents' DIC shall be computed in accordance with the following formulas:

(a) One parent. Except as provided in paragraph (b) of this section, if there is only one parent, the monthly rate specified in 38 U.S.C. 415(b)(1), as increased from time to time under 38 U.S.C. 3112, reduced by $.08 for each
dollar of such parent's countable annual income in excess of $800. No payments of DIC may be made under this paragraph, however, if such parent's countable annual income exceeds the amount specified in 38 U.S.C. 415(b)(3), as increased from time to time under 38 U.S.C. 3112, and no payment of DIC to a parent under this paragraph may be less than $5 a month.

(b) One parent who has remarried. If there is only one parent and the parent has remarried and is living with the parent's spouse, DIC shall be paid under paragraph (a) or paragraph (d) of this section, whichever shall result in the greater benefit being paid to the veteran's parent. In the case of remarriage, the total combined countable annual income of the parent and the parent's spouse shall be counted in determining the monthly rate of DIC.

(c) Two parents not living together.

The rate computation method in this paragraph applies to:

1. Two parents who are not living together, or
2. An unmarried parent when both parents are living and the other parent has remarried.

The monthly rate of DIC paid to such parents shall be the rate specified in 38 U.S.C. 415(c)(1), as increased from time to time under 38 U.S.C. 3112, reduced by an amount no greater than $.08 for each dollar of such parent's countable annual income in excess of $900, except that no payments of DIC may be made under this paragraph if such parent's countable annual income exceeds the amount specified in 38 U.S.C. 415(c)(3), as increased from time to time under 38 U.S.C. 3112, and no payment of DIC to a parent under this paragraph may be less than $5 monthly. Each time there is a rate increase under 38 U.S.C. 3112, the amount of the reduction under this paragraph shall be recomputed to provide, as nearly as possible, for an equitable distribution of the rate increase. The results of this computation method shall be published in a schedular format in the "Notices" section of the Federal Register as provided in paragraph (f) of this section.

(e) Aid and attendance. The monthly rate of DIC payable to a parent under this section shall be increased by the amount specified in 38 U.S.C. 415(g), as increased from time to time under 38 U.S.C. 3112, if such parent is:

1. A patient in a nursing home, or
2. Helpless or blind, or so nearly helpless or blind as to need or require the regular aid and attendance of another person.

(f) Rate publication. Each time there is an increase under 38 U.S.C. 3112, the actual rates will be published in the "Notices" section of the Federal Register.

(Authority: 38 U.S.C. 210(c))

4. Section 3.26 is revised to read as follows:

§ 3.26 Section 306 and old law pension annual income limitations.

(a) The annual income limitations for section 306 pension shall be the amounts specified in section 306(a)(2)(A) of Pub. L. 95–588, as increased from time to time under section 306(a)(3) of Pub. L. 95–588.

(b) Each time there is an increase under section 306(a)(3) or (b)(4) of Pub. L. 95–588, the actual income limitations will be published in the "Notices" section of the Federal Register.

(Authority: 38 U.S.C. 210(c))

5. In § 3.27 paragraphs (a) and (b) are revised to read as follows:

§ 3.27 Automatic adjustment of benefit rates.

(a) Improved pension. Whenever there is a cost-of-living increase in benefit amounts payable under section 215(i) of title II of the Social Security Act, the VA shall, effective on the dates such increases become effective, increase by the same percentage each maximum annual rate of improved pension.

(Authority: 38 U.S.C. 3112(a))

(b) Parent's dependency and indemnity compensation—maximum annual income limitation and maximum monthly rates. Whenever there is a cost-of-living increase in benefit amounts payable under section 215(i) of title II of the Social Security Act, the VA shall, effective on the dates such increases become effective, increase by the same percentage the annual income limitations and the maximum monthly rates of dependency and indemnity compensation for parents.

(Authority: 38 U.S.C. 3112(b)(1))

6. Section 3.28 is revised to read as follows:

§ 3.28 Automatic adjustment of section 306 and old-law pension income limitations.

Whenever the maximum annual rates of improved pension are increased by reason of the provisions of 38 U.S.C. 3112, the following will be increased by the same percentage effective the same date:

(a) The maximum annual income limitations applicable to continued receipt of section 306 and old-law pension; and

(b) The dollar amount of a veteran's spouse's income that is excludable in determining the income of a veteran for section 306 pension purposes. (See § 3.202(b)(2))

These increases shall be published in the Federal Register at the same time that increases under § 3.27 are published.

(Authority: Sec. 306, Pub. L. 95–588)

Cross References: Section 306 and old-law pension annual income limitations. See § 3.26.

7. In § 3.262 paragraph (b)(2) is revised to read as follows:

§ 3.262 Evaluation of income.

(a) * * * *

(b) * * *

(1) * * *

(2) Veterans. The separate income of the spouse of a disabled veteran who is entitled to pension under laws in effect on June 30, 1960, will not be considered. Where pension is payable under section 306(a) of Pub. L. 95–588, to a veteran.
who is living with a spouse there will be included as income of the veteran all income of the spouse in excess of whichever is the greater, the amount of the spouse income exclusion specified in section 306(a)(2)(B) of Pub. L. 95–588 as increased from time to time under section 306(a)(3) of Pub. L. 95–588 or the total earned income of the spouse, which is reasonably available to or for the veteran, unless hardship to the veteran would result. Each time there is an increase in the spouse income exclusion pursuant to section 306(a)(3) of Pub. L. 95–588, the actual amount of the exclusion will be published in the “Notices” section of the Federal Register. The presumption that inclusion of such income is available to the veteran and would not work a hardship on him or her may be rebutted by evidence of unavailability or of expenses beyond the usual family requirements.

8. In §3.802 the first sentence of paragraph (b) is revised to read as follows:

§ 3.802 Medal of Honor.

(b) An award of special pension at the monthly rate specified in 36 U.S.C. 352 will be made as of the date of filing of the application with the Secretary concerned.

9. In §3.1000 the first sentence of paragraphs (a) and (g); the first sentence of the introductory text of paragraphs (b) and (f) and paragraph (c) are revised to read as follows:

§3.1600 Payment of burial expenses of deceased veterans.

(a) Service-connected death and burial allowance. If a veteran dies as a result of a service-connected disability or disabilities, an amount not to exceed the amount specified in 38 U.S.C. 907 (or if entitlement is under §3.8(c) or (d), an amount in Philippine pesos computed in accordance with the provisions of §3.8(c)) may be paid toward the veteran’s funeral and burial expenses including the cost of transporting the body to the place of burial.

(b) Nonservice-connected death and burial allowance. If a veteran’s death is not service-connected, an amount not to exceed the amount specified in 38 U.S.C. 902 (or if entitlement is under §3.8(c) or (d), an amount in Philippine pesos computed in accordance with the provisions of §3.8(c)) may be paid toward the veteran’s funeral and burial expenses including the cost of transporting the body to the place of burial.

(c) Death while properly hospitalized. If a person dies from nonservice-connected causes while properly hospitalized by the VA, there is payable an allowance not to exceed the amount specified in 38 U.S.C. 903(a) for the actual cost of the person’s funeral and burial, and an additional amount for transportation of the body to the place of burial. For burial allowance purposes, the term “hospitalized by the VA” means admission to a VA facility (as defined in 38 U.S.C. 601(4)) for hospital, nursing home, or domiciliary care under the authority of 38 U.S.C. 610 or 611(a), or admission (transfer) to a nursing home under the authority of 38 U.S.C. 620 for nursing home care at the expense of the United States. (If the hospitalized person’s death is service-connected, entitlement to the burial allowance and transportation expenses falls under paragraphs (a) and (g) of this section instead of this paragraph.)

Authority: 38 U.S.C. 903(a)

(f) Plot or interment allowance. When a veteran dies from nonservice-connected causes, an amount not to exceed the amount specified in 38 U.S.C. 903(b) (or if the entitlement is under §3.8(c) or (d), an amount in Philippine pesos computed in accordance with the provisions of §3.8(c)) may be paid as a plot or interment allowance.

(g) Transportation expenses for burial in national cemetery. Where a veteran dies as a result of a service-connected disability, or at the time of death was in receipt of disability compensation (or but for the receipt of military retired pay or nonservice-connected disability pension would have been entitled to disability compensation at time of death), there is payable, in addition to the burial allowance (either the amount specified in 38 U.S.C. 902 or the amount specified in 38 U.S.C. 907 if the cause of death was service-connected), an additional amount for payment of the cost of transporting the body to the national cemetery for burial.

10. In §3.1601 paragraphs (a)(1)(i) and (a)(2)(i) and the last sentence of paragraph (a)(2)(iii) are revised to read as follows:

§3.1601 Claims and evidence.

(a) * * *

(1) * * *

(i) The funeral director, if the entire

bill or any balance is unpaid (if the unpaid bill or the unpaid balance is less than the applicable statutory burial allowance, only the unpaid amount may be claimed by the funeral director); or

(2) * * *

(i) The funeral director, if he or she provided the plot or interment services, or advanced funds to pay for them, and if the entire bill for such or any balance thereof is unpaid (if the unpaid bill or the unpaid balance is less than the statutory plot or interment allowance, only the unpaid amount may be claimed by the funeral director); or

(ii) * * *

(iii) Any remaining balance of the plot or interment allowance may then be applied to interment expenses; or

11. In §3.1604 the introductory text of paragraph (a), the last sentence of paragraph (b)(2), and paragraphs (c) and (d)(3) are revised to read as follows:

§3.1604 Payments from non-VA sources.

(a) Contributions or payments by public or private organizations. When contributions or payments on the burial expenses have been made by a State, any agency or political subdivision of the United States or of a State, or the employer of the deceased veteran only the difference between the entire burial expenses and the amount paid thereon by any of these agencies or organizations, not to exceed the applicable statutory burial allowance, will be authorized. Contributions or payments by any other public or private organization such as a lodge, union, fraternal or beneficial organization, society, burial association or insurance company, will bar payment of the burial allowance if such allowance would revert to the funds of such organization or would discharge such organization’s obligation without payment.

Authority: 38 U.S.C. 902: 907

(b) * * *

(1) * * *

(2) * * *

(i) The difference between the total burial expense and the amount paid thereon under such provision, not to exceed the amount specified in 38 U.S.C. 902, will be authorized.

Authority: 38 U.S.C. 902(b)

(c) Payment of plot or interment allowance by public or private organization except as provided by
§ 3.1604(d). Where any part of the plot or interment expenses has been paid or assumed by a State, any agency or political subdivision of a State, or the employer of the deceased veteran, only the difference between the total amount of such expenses and the amount paid or assumed by any of these agencies or organizations, not to exceed the statutory plot or interment allowance, will be authorized.

(Authority: 38 U.S.C. 903(b))

(d) * * *

(3) Amount of the allowance. A State or an agency or political subdivision of a State entitled to payment under this paragraph shall be paid the maximum statutory amount as a plot or interment allowance without regard to the actual cost of the plot or interment.

(Authority: 38 U.S.C. 903(b))

* * *

12. In § 3.1612 paragraph (e)(2)(ii) is revised and paragraph (e)(2)(iii) is added to read as follows:

§ 3.1612 Monetary allowance in lieu of a Government-furnished headstone or marker.

* * *

(e) * * *

(ii) The average actual cost, as determined by the VA, or headstones and markers furnished at Government expense for the fiscal year preceding the fiscal year in which the non-Government marker was purchased or the services for adding the veteran’s identifying information on an existing headstone or marker were purchased.

(iii) The average actual cost of Government-furnished headstones and markers during any fiscal year is determined by dividing the sum of the VA’s costs during that fiscal year for procurement, transportation, Monument Service and miscellaneous administration, inspection and support staff by the total number of headstones and markers procured by the VA during that fiscal year and rounding to the nearest whole dollar amount. The resulting average actual cost is published at the end of each fiscal year in the “Notices” section of the Federal Register.

(Authority: 38 U.S.C. 903(d))

* * *

[FR Doc. 87-21337 Filed 9-15-87; 8:45 am]
dosages of 0, 150, 750, and 4,500 milligrams/kilogram/day (mg/kg/day); a chronic feeding/oncogenicity study in rats fed dosages of 0, 3, 10, and 31 mg/kg/day with no oncogenic effects observed under the conditions of the study at dose levels up to and including 31 mg/kg/day [highest dose tested (HDT)] and a systemic NOEL greater than 31 mg/kg/day; a 1-year chronic feeding study in dogs fed dosage levels of 0, 20, 100, and 500 mg/kg/day with a NOEL of 500 mg/kg/day; a teratology study in rats fed dosage levels of 0, 300, 1,000, and 3,500 mg/kg/day with no teratogenic effects occurring up to and including 3,500 mg/kg/day (HDT); a maternal NOEL of 175 mg/kg/day, and a fetotoxic NOEL of 350 mg/kg/day (HDT); a three-generation reproduction study in rats fed dosage levels of 0, 3, 10, and 30 mg/kg/day with a NOEL of 10 mg/kg/day; a mutagenicity test—chromosomal aberration in vitro (no aberrations in Chinese hamster ovary cells were caused with and without S-9 activation); a mutagenicity test—DNA repair in rat hepatocytes (negative); a mutagenic test—in vivo bone marrow cytogenic in rats (negative); a mutagenicity test—reverse assay with B. subtilis (negative); a mutagenicity test—reverse mutation with S. typhimurium (negative); a mutagenicity (Ames) test with S. typhimurium (negative); and a dominant lethal mutagenicity test in mice (negative).

The acceptable daily intake (ADI) based on the three-generation rat reproduction study (NOEL of 10 mg/kg/day) and using a hundredfold safety factor is calculated to be 0.1 mg/kg/day. The theoretical maximum residue contribution (TMRC) for published tolerances and unpublished but approved tolerances is 0.0047 mg/kg/day. The current action will contribute 0.000001 mg/kg/day to the TMRC and will not increase the percentage of the ADI utilized. Published tolerances utilize 4.65 percent of the ADI.

Desirable data lacking are a repeat of the mouse and rat oncogenicity studies. There are currently no actions pending against the continued registration of this pesticide. No detectable residues of N-nitrosoglyphosate, a contaminant of glyphosate, are expected to be present in the commodities for which the tolerance is sought. The oncogenic potential of glyphosate is not fully understood. Because of the equivocal (uncertain) nature of the oncogenic response in mice, the Agency referred the issue to the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Science Advisory Panel (SAP) for a “Weight-of-Evidence” classification. After reviewing all available evidence, the SAP proposed that glyphosate be classified as a “Class D Oncogen” or having “inadequate animal evidence of oncogenicity,” and that there be a Data Call-In for further studies in rats and/or mice to clarify unresolved questions. After rereview of all available information, the Agency decided to classify glyphosate as a “Class D Oncogen” and also to request a repeat of the mouse oncogenicity study. Also, because of the large difference between the high dose tested in the rat and mouse oncogenicity studies, the rat oncogenicity study was rereviewed. The rereview indicated that a maximum tolerated dose (MTD) may not have been reached in that study. Therefore, the Agency decided to also request a repeat of the rat oncogenicity study at doses high enough to read an MTD. The Agency’s policy has been to issue new use registrations in which the resulting change in TMRC is less than 1 percent; however, any significant new use registrations will be handled on a case-by-case basis and will not be issued until issues in the Glyphosate Registration Standard have been resolved. Monsanto Co. has been notified of these conclusions and deficiencies by the Glyphosate Registration Standard dated June 30, 1986.

The nature of the residue is adequately understood, and an adequate analytical method (gas chromatography with a phosphorus-specific flame photometric detector) is available for enforcement purposes. Existing tolerances will accommodate residues occurring in meat, fat, and meat byproducts of cattle, horses, hogs, sheep, and goats and milk, poultry, or eggs resulting from this use.

Based on the information considered by the Agency, it is concluded that the tolerance established by amending 40 CFR Part 180 will protect the public health. Therefore, the tolerance is established as set forth below.

Any person adversely affected by this regulation may, within 30 days after the date of publication in the Federal Register, file written objections with the Hearing Clerk, Environmental Protection Agency, Room M-3708 (A-110), 401 M Street, E.W., Washington, DC 20460. Such objections should be submitted in quintuplicate and specify the provisions of the regulations deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are legally sufficient to justify the relief sought.

The Office of Management and Budget (OMB) has exempted this regulation from OMB requirements of Executive Order 12291 pursuant to section 8(b) of that Order.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-354, 94 Stat. 1164, § 5 U.S.C. 610 through 612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the Federal Register of May 4, 1981 (46 FR 24950).

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agricultural commodities, Pesticides and pests.

Douglas D. Campt,
Director, Office of Pesticide Programs.

Therefore, 40 CFR Part 180 is amended as follows:

PART 180—[AMENDED]

1. The authority citation for Part 180 continues to read as follows:

2. In § 180.364, paragraph [a] is amended by adding and alphabetically inserting the listing for coconut, to read as follows:

§ 180.364 Glyphosate; tolerance for residues.

(a) * * *
Pesticide Tolerance for Glyphosate

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule revises the tolerance expression for combined residues of glyphosate [N-(phosphonomethyl)glycine] and its metabolite aminomethylphosphonic acid (AMPA) to include plant growth regulator uses as well as herbicidal uses for the raw agricultural commodity sugarcane at 2.0 parts per million (ppm) and liver and kidney of cattle, goats, hogs, horses, poultry, and sheep at 0.5 ppm. This rule to revise the tolerance expression was requested by Monsanto Co.

ADDRESS: Written objections may be submitted to the: Hearing Clerk (A-110), Environmental Protection Agency, Room 412, CM #2,1921 Jefferson Davis Highway, Arlington, VA 22202, (703)-557-1800.

FOR FURTHER INFORMATION CONTACT: Robert J. Taylor, Product Manager (PM) 25, Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460.

SUPPLEMENTARY INFORMATION: EPA issued a notice, published in the Federal Register of April 17, 1985 (50 FR 15219), which announced that Monsanto Co., 1101 17th Street, NW., Washington, DC 20036, had submitted a pesticide petition, PP 5F3170, to EPA proposing to amend 40 CFR 180.384(b) by revising the tolerance expression to read as follows: "Tolerances are established for the combined residues of glyphosate [N-(phosphonomethyl)glycine] and its metabolite aminomethylphosphonic acid resulting from application of glyphosate isopropylamine salt for herbicidal and plant growth regulator purposes and/or the sodium sesqui salt for growth regulator purposes in or on the following raw agricultural commodities: The tolerance levels for the commodities listed in the table therein remain the same.

There were no comments received in response to the notice of filing.

The data submitted in the petition and other relevant material have been evaluated. The data evaluated include a 2-year oncogenicity study in mice fed dosages of 0, 150, 750, and 4,500 milligrams/kilogram/day (mg/kg/day) with an equivocal (uncertain) oncogenic effect at 4,500 mg/kg/day; a chronic feeding/oncogenicity study in rats fed dosages of 0, 3, 10, and 31 mg/kg/day with no oncogenic effects observed under the conditions of the study at dose levels up to and including 31 mg/kg/day (highest dose tested [HDT]) and a systemic no-observed-effect level (NOEL) greater than 31 mg/kg/day; a 1-year chronic feeding study in dogs fed dosage levels of 0, 20, 100, and 500 mg/kg/day with a NOEL of 500 mg/kg/day; a teratology study in rats fed dosage levels of 0, 300, 1,000, and 3,500 mg/kg/day with no teratogenic effects occurring up to and including 3,500 mg/kg/day (HDT); a teratology study in rabbits fed dosage levels of 0, 3, 10, and 31 mg/kg/day with no teratogenic effects occurring up to and including 350 mg/kg/day (HDT), maternal and fetotoxic NOELs of 1,000 mg/kg/day; a teratology study in rabbits fed dosage levels of 0, 20, 100, and 500 mg/kg/day (HDT), a maternal NOEL of 175 mg/kg/day, and a fetotoxic NOEL of 350 mg/kg/day (HDT); a three generation reproduction study in rats fed dosage levels of 0, 3, 10, and 30 mg/kg/day with a NOEL of 10 mg/kg/day; a mutagenic test—chromosomal aberration in vitro (no aberrations in Chinese hamster ovary cells were caused with and without S-9 activation); a mutagenic test—DNA repair in rat hepatocytes (negative); a mutagenicity test—ino vivo bone marrow cytogenic in rats (negative); a mutagenicity test—rec-assay with B. subtilis (negative); a mutagenicity test—reverse mutation with S. typhimurium (negative); a mutagenicity (Ames) test with S. typhimurium (negative); and a lethality test in mice (negative).

The acceptable daily intake (ADI) based on the three-generation rat reproduction study (NOEL of 10 mg/kg/day) and using a hundred-fold safety factor is calculated to be 0.1 mg/kg/day.

Based on the information considered, the Agency decided to classify glyphosate as a "Class D Oncogen" and also to request a repeat of the mouse oncogenicity study. Because of the large difference between the high dose tested in the rat and mouse oncogenicity studies, the rat oncogenicity study was rereviewed. The rereview indicated that a maximum tolerated dose (MTD) may not have been reached in that study. Therefore, the Agency decided also request a repeat of the rat oncogenicity study at doses high enough to read an MTD. The Agency’s policy has been to issue new use registrations in which the resulting change in TMRC is less than 1 percent; however, any significant new use registrations will be handled on a case-by-case basis and will not be issued until issues in the Glyphosate Registration Standard have been resolved. Monsanto Co. has been notified of these conclusions and deficiencies by the Glyphosate Registration Standard dated June 30, 1986.

The nature of the residue is adequately understood, and an adequate analytical method (gas liquid chromatography with a flame photometric detector) is available for enforcement purposes in Volume 2 of the Food and Drug Administration Pesticide Analytical Manual. Additional residues of glyphosate and AMPA are expected to occur in the liver and kidney of cattle, goats, hogs, horses, poultry, or sheep from the proposed use; therefore, the established tolerances on these commodities are considered adequate to cover residues of glyphosate and AMPA resulting from the proposed use of glyphosate isopropylamine salt on sugarcane.

Because of the equivocal (uncertain) nature of the oncogenic response in mice, the Agency referred the issue to the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Science Advisory Panel (SAP) for a “Weight-of-Evidence” classification. After reviewing all available evidence, the SAP proposed that glyphosate be classified as a "Class D Oncogen" or having "inadequate animal evidence of oncogenicity," and that there be a Data Call-In for further studies in rats and/or mice to clarify unresolved questions.

Any person adversely affected by this regulation may, within 30 days after the
date of publication in the Federal Register, file written objections with the Hearing Clerk, Environmental Protection Agency, Rm. M-3708 (A-110), 401 M Street, SW., Washington, DC 20460. Such objections should be submitted in quintuplicate and specify the provisions of the regulations deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are legally sufficient to justify the relief sought.

The Office of Management and Budget (OMB) has exempted this regulation from OMB requirements of Executive Order 12291 pursuant to section 8(b) of that Order.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96–554, 94 Stat. 1164, 5 U.S.C. 610 through 612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the Federal Register of May 4, 1981 (46 FR 24950).

List of Subjects in 40 CFR Part 180

40 CFR Part 180

[PP 7E3474/R008 (FRL–3260–5)]

Pesticide Tolerance for Iprodione

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes a tolerance for residues of the fungicide iprodione, its isomer, and its metabolite in or on the raw agricultural commodity carrots.

The Interregional Research Project No. 4 (IR–4) petitioned for this tolerance.

ADDRESS: Written objections, identified by the document control number, [PP 7E3474/R008], may be submitted to: Hearing Clerk (A–110), Environmental Protection Agency, Room 3708, 401 M Street SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: By mail:

SUPPLEMENTARY INFORMATION:

EPA issued a proposed rule, published in the Federal Register of July 15, 1987 (52 FR 26536), in which it was announced that the Interregional Research Project No. 4 (IR–4), New Jersey Agricultural Experiment Station, P.O. Box 231, Rutgers University, New Brunswick, NJ 08903, had submitted pesticide petition 7E3474 to EPA on behalf of Dr. Robert H. Kupelian, National Director, IR–4 Project, and the Agricultural Experiment Station of Florida.

The petition requested that the Administrator, pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act, propose the establishment of a tolerance for the combined residues of the fungicide iprodione [3–(3,5-dichlorophenyl)–N(1–methyl–ethyl)–2,4-dioxo–1–imidazolidinecarboxamide], its isomer [3–(3,5-dichlorophenyl)–N(3,5–dichlorophenyl)–2,4-dioxo–1–imidazolidinecarboxamide], and its metabolite [3–(3,5-dichlorophenyl)–2,4-dioxo–1–imidazolidinecarboxamide] in or on the raw agricultural commodity carrots at 5 parts per million (ppm).

There were no comments or requests for referral to an advisory committee received in response to the proposed rule.

The data submitted in the petition and all other relevant material have been evaluated and discussed in the proposed rule. Based on the data and information considered, the Agency concludes that the tolerance will protect the public health. Therefore, the tolerance is established as set forth below.

Any person adversely affected by this regulation may, within 30 days after publication of this document in the Federal Register, file written objections with the Hearing Clerk, at the address given above. Such objections should specify the provisions of the regulation deemed objectionable and the grounds for the objections. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96–554, 94 Stat. 1164, 5 U.S.C. 610 through 612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the Federal Register of May 4, 1981 (46 FR 24950).

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

Endangered and Threatened Wildlife and Plants; Determination of Endangered Status for Pediocactus despainii (San Rafael Cactus)

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: The Service determines endangered status for Pediocactus despainii (San Rafael cactus). The two known populations of this plant consist of 2,000–3,000 individuals each. Both occur in Emery County in central Utah, mainly in areas administered by the Bureau of Land Management. This rare species is sought by cactus collectors, and is heavily impacted by recreational use. This rule implements the protection provided by the Endangered Species Act of 1973, as amended, for P. despainii.

DATE: The effective date of this rule is October 16, 1987.

SUPPLEMENTAL INFORMATION:

Background

Pediocactus despainii (San Rafael cactus) was discovered in 1978 by Kim Despain on the San Rafael Swell, a large anticline (geologic up warp) in Emery County, Utah. Additional material was collected in 1979 by Despain, E. Neese, and K. Thorne of Brigham Young University, and also by K. Heil of San Juan College, Farmington, New Mexico (Heil 1984). The description of Pediocactus despainii was published by Welsh and Goodrich (1980). A second population on the San Rafael Swell, approximately 25 miles from the first, was located in 1982 by S. Brack, a cactus nurseryman from Belen, New Mexico. In 1984, Heil conducted a status survey and did not locate any new populations. The San Rafael cactus is thus known from just two populations, one in an area 3 miles (5 kilometers) across, and the other in an area 1 mile (1.6 kilometers) across. Each population contains 2,000 to 3,000 individual plants (Heil 1984).

Pediocactus despainii is a small barrel-type cactus, 1.5 to 2.3 inches (3.8 to 6.0 centimeters) tall and 1.2 to 3.8 inches (3.0 to 9.5 centimeters) wide. Each areole or spine cluster contains 9 to 13 white, flattened, pectinate (comblike) radial spines that partially obscure the stem, but no central spines are present. The small flowers are about 1 inch (2.5 centimeters) across and are peach to yellow in color with a bronze tint. This cactus is distinguished from other closely related members of its genus by its larger stem size, and naked (hairless) areoles, and by the bronze tint to its flowers. With its diminutive size and peculiar habit of shrinking underground for several months a year during dry or cold seasons, it is not surprising that P. despainii was only recently discovered. It is only noticeable for a short time in the spring when in bloom. Otherwise, even if the exact location of its populations are known, it cannot be seen and is easily overlooked. It grows on hills, benches, and flats of the Colorado plateau's semiarid grasslands. This habitat is savannahlike and contains scattered junipers, piñon pines, low shrubs, and annual and perennial herbs. The occupied area is mostly administered by the Bureau of
Land Management (BLM), but the State of Utah owns one section.

The genus Pediocactus contains eight species, one with two varieties and another with three (Heil et al. 1981). Except for one wide-ranging species, all are rare endemics of the Four Corners region (Utah, Colorado, Arizona, and New Mexico). Pediocactus bradyi, P. knowltonii, P. peeblesianus var. peeblesianus, and P. seleri are currently listed as endangered. Pediocactus paradoxus, P. peeblesianus var. ficideiseniae, and P. winkerleri are candidates for addition to the List of Endangered and Threatened Plants. These disjunct species are probably relics of a once-more-widespread genus with a distribution that was fractured by the current climatic regime (Benson 1982).

Since P. despainii is a newly described rare cactus and a member of a group of cacti eagerly sought by collectors both in this country and abroad, it is endangered by collection pressure. The type locality is near a popular, though undeveloped, camping area and receives heavy use from off-road and all-terrain vehicles. Approximately half of the range of the species is covered by oil and gas leases and mining claims for gypsum or other minerals. Surface disturbance associated with exploration for gypsum has occurred near the type locality. The effect of livestock grazing on the species is unknown.

In the Federal Register of December 15, 1980 (45 FR 82480), the Service published a notice of review for plants, which included P. despainii in Category 1. Category 1 comprises taxa for which substantial biological data are available to support listing. No comments on this taxon were received in response to the 1980 notice. In the Federal Register of November 28, 1983 (48 FR 53640), the Service published a supplement to the 1980 notice of review, in which P. despainii was changed to Category 2. Category 2 comprises taxa for which the Service has information indicating the possible appropriateness of a proposal to list the taxon, but for which more substantial data are needed. The status survey of Heil (1984), compiled through contract to the Service, provided the needed data. In the Federal Register of September 29, 1985 (50 FR 35529), the Service published a revised notice of review, in which Pediocactus despainii was redesignated as Category 1.

Taxa included in the 1980 and 1985 plant notices of review, and the 1983 supplement, are treated as if under petition pursuant to the Act. The 1982 Amendments to the Act required that petitions that were pending as of October 12, 1982, be treated as having been received on that date. Section 4(b)(3) of the Act requires that within 12 months of the receipt of such a petition a finding be made as to whether the requested action is warranted, not warranted, or warranted but precluded by other activity involving additions to or removals from the Federal Lists of Endangered and Threatened Wildlife and Plants. Therefore, on October 13, 1983, the Service made the finding that determination of endangered status for P. despainii was warranted but precluded by other listing activity. With such a finding, the petition is rejected, and another finding becomes due within 12 months. On October 12, 1984, and again on October 11, 1985, additional findings of warranted but precluded were made with respect to the listing of P. despainii. In the Federal Register of March 27, 1986 (51 FR 10560-10563), the Service proposed to determine endangered status for P. despainii, and that proposal incorporated a finding that the petitioned action was warranted.

**Summary of Comments and Recommendations**

In the March 27, 1986, proposed rule (51 FR 10560) and associated notifications, all interested parties were requested to submit factual reports or information that might contribute to the development of a final rule. Appropriate State agencies, county governments, Federal agencies, scientific organizations, and other interested parties were contacted and requested to comment. Newspaper notices, inviting public comment, were published in the Emery County Progress on April 16, 23, and 30, 1986, and in the Deseret News and Salt Lake Tribune on April 15, 16, and 17, 1986. Four comments were received and discussed below. No public hearing was requested.

The State of Utah supported the listing. The International Union for Conservation of Nature and Natural Resources made an informational comment. The Emery County Commission requested an informal meeting to discuss concerns arising from information included in a newspaper article. A meeting, including a field trip to one of the cactus population sites, was held on June 6, 1986. The Service’s oral and written response to the Commission is summarized here. The Commission questioned whether there were sufficient threats to the species to warrant a designation of endangered, and if such threats could be removed by other means. The Service maintains that significant threats, such as collecting and off-road vehicle damage, exist to the San Rafael cactus and will be difficult to remove. Therefore, the endangered determination is accurate. The Commission questioned whether the effects of grazing on the San Rafael cactus were actually known, since present grazing levels are lower than historic levels. The Service is interested in the effects of grazing on the fragile semidesert grassland habitat with which the San Rafael cactus is associated, but at present has no data documenting the impact of grazing on the species. The Commission was concerned that the designation of the San Rafael cactus as an endangered species would affect land use in the San Rafael Swell outside of its occupied habitat. Management of the entire San Rafael Swell is beyond the control of the Service in protecting the cactus and its habitat. Land-use decisions made by Federal agencies that could affect this species will be handled through the section 7 consultation process (see "Available Conservation Measures," below). Appropriate conservation measures would be directly related to the species’ occupied habitat, which is only a small part of the San Rafael Swell.

The Bureau of Reclamation (1) commented on the taxonomy of P. despainii; (2) questioned whether listing would popularize the species and increase collecting while not reducing other threats such as off-road vehicle impacts, mineral exploration, and mining activities; and (3) questioned the change in candidate status among the three notices of review. The Service’s response to the Bureau of Reclamation’s comment is summarized here. The Cacti of the United States and Canada (Benson 1982) does not contain a discussion of P. despainii (beyond a reference in the appendix) because the book was in press for several years and does not contain references later than 1979. It was for this reason that no discussion was made of P. despainii, and not because the taxonomy of the species was in question. The threat of collecting will be addressed through the Service’s Law Enforcement Division and through the Convention on International Trade in Endangered Species of Wild Fauna and Flora. Regarding other threats, Federal agencies are legally required to insure that their actions in managing Federal land, such as authorizing off-road vehicle use and administering mineral leasing programs, are not likely to jeopardize listed species. Inasmuch as a significant portion of the habitat of this species is located on land administered by the Bureau of Land Management, listing could provide important protection from
such activities. A change in candidate category indicates not necessarily a change in the degree of urgency of listing, but a recognition of the need for more information to document the need for listing. After P. despainii was changed from Category 1 to 2, the Service contracted for a status survey to obtain additional information (Heil 1984).

Summary of Factors Affecting the Species

After a thorough review and consideration of all information available, the Service has determined that P. despainii should be classified as an endangered species. Procedures found at section 4(a)(1) of the Endangered Species Act (16 U.S.C. 1531 et seq.) and regulations (50 CFR Part 424) promulgated to implement the listing provisions of the Act were followed. A species may be determined to be an endangered or threatened species due to one or more of the five factors described in section 4(a)(1). These factors and their application to Pediocactus despainii Welsh and Coodrich (San Rafael cactus) are as follows:

A. The present or threatened destruction, modification, or curtailment of its habitat or range. The type locality of P. despainii is being heavily impacted by off-road vehicles, as it is near a popular recreation area. The level of impact is such that, in one area, individual plants were literally growing among the crisscrossed off-road vehicle tracks. About half of the area occupied by both populations contains oil and gas leases and mining claims for gypsum or other minerals. While no commercial development has taken place, surface disturbances from associated exploration and annual assessment work will continue to be a threat. The San Rafael cactus has some natural protection afforded by its habit of shrinking into the ground for part of the year. However, it forms buds in the fall that overwinter to become the next year's spring's flowers (Heil et al. 1981). These flowering buds at ground level may be vulnerable to surface disturbance, increasing the portion of the year that the species' reproductive capacity is vulnerable. Semi-arid grassland parks and understory vegetation of pinyon-juniper woodlands are fragile habitats. They are easily invaded by aggressive native shrub and tree species or exotic weedy species when they are mechanically disrupted or when native grass species are removed. Another grassland cactus, Opuntia imbricata (tree cholla), was found to be significantly positively associated with some of the same native perennial grass species as is P. despainii, and negatively associated with weedy species indicative of range deterioration in the shortgrass steppe of Kiowa County, Colorado (Kinraide 1978). Maintenance of the desert grassland parks and understory vegetation of pinyon-juniper woodland may be an essential habitat requirement for P. despainii.

B. Overutilization for commercial, recreational, scientific, or educational purposes. As indicated earlier, this rare plant is highly desired by cactus collectors. It is known that collectors "make the rounds" through the Four Corners area, from the habitat of one species of Pediocactus to the next, to collect a complete set (Heil, pers. comm.). The small size of these species makes them easy to hide and therefore hard to detect in interstate or international commerce.

C. Disease or predation. The effect of livestock grazing on P. despainii is unknown. Because of the small size of this cactus and its habit of shrinking underground for part of the year, grazing is not thought to be directly significant to its survival. However, there are cattle-watering reservoirs within the range of the first discovered population, which may cause localized concentrations of livestock and the possibility of trampling of a portion of that population. The effect of livestock grazing on the trend and condition of surrounding desert grassland and pinyon-juniper understory vegetation needs to be evaluated to determine its impact on P. despainii. Service botanists have observed that the species is susceptible to infestations of insect larvae.

D. The inadequacy of existing regulatory mechanisms. No treaties, except the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES), and no Federal or State laws, directly protect P. despainii. CITES regulates international import and export but not interstate commerce, collecting for possession, or impacts to habitat.

E. Other natural or manmade factors affecting its continued existence. The fragile nature and vulnerability of the desert grassland and pinyon-juniper ecosystem in which P. despainii occurs have been mentioned previously. Also, because there are only two populations and a low number of plants, the possibility exists that a catastrophic disturbance, either natural or manmade, could destroy a significant portion of the species. The Service has carefully assessed the best scientific and commercial information available regarding past, present, and future threats faced by this species in determining to make this rule final. Based on this evaluation, the preferred action is to list P. despainii as endangered. With only 4,000 to 6,000 individuals, and just two populations, collecting could lower its numbers significantly, and surface disturbances are impacting the ecosystem in which it occurs. For the reasons given below, it would not be prudent to designate critical habitat.

Critical Habitat

Section 4(a)(3) of the Act, as amended, requires that to the maximum extent prudent and determinable, the Secretary designate critical habitat at the time a species is determined to be endangered or threatened. The Service finds that designation of critical habitat is not prudent for this species at this time. As discussed under Factor "B" in the "Summary of Factors Affecting the Species," P. despainii is threatened by taking, an activity difficult to prevent and not regulated by the Act with respect to plants, except for a prohibition against removal of endangered plants from areas under Federal jurisdiction and reduction to possession. Publication of critical habitat descriptions would make this species even more vulnerable and increase enforcement problems. All involved parties and landowners have been notified of the location of populations and importance of protecting this species' habitat. Such protection will be addressed through the recovery and section 7 consultation process.

Available Conservation Measures

Conservation measures provided to species listed as endangered or threatened under the Act include recognition, recovery actions, requirements for Federal protection, and prohibitions against certain practices. Recognition through listing encourages and results in conservation actions by Federal, State, and private agencies, groups, and individuals. The Act provides for possible land acquisition and cooperation with the States and requires that recovery actions be carried out for all listed species. Such actions are initiated by the Service following listing. The protection required of Federal agencies and the prohibitions against taking are discussed, in part, below.

Section 7(a) of the Act, as amended, requires Federal agencies to evaluate their actions with respect to any species that is proposed or listed as endangered...
or threatened and with respect to its critical habitat, if any is being designated. Regulations implementing this interagency cooperation provision of the Act are codified at 50 CFR Part 402. Section 7(a)(2) requires Federal agencies to ensure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of such a species or to destroy or adversely modify its critical habitat. If a Federal action may adversely affect a listed species or its critical habitat, the responsible Federal agency must enter into formal consultation with the Service. Known Federal activities that may affect P. despainii are sanctioned use of off-road vehicles within its habitat, permitting actions in response to oil and gas development, and approval of mining plans. BLM is already consulting with the Service regarding such matters, and effects on that agency's activities due to this listing are expected to be minimal.

Section 9 of the Act and implementing regulations found at 50 CFR 17.61, 17.62, and 17.63 set forth a series of general trade prohibitions and exceptions that apply to all endangered plants. These prohibitions, in part, make it illegal for any person subject to the jurisdiction of the United States to import or export any endangered plant, transport it in interstate or foreign commerce in the course of a commercial activity, sell or offer it for sale in interstate or foreign commerce, or remove it from areas under Federal jurisdiction and reduce it to possession. Certain exceptions can apply to agents of the Service and State conservation agencies. The Act and 50 CFR 17.62 and 17.63 also provide for the issuance of permits to carry out otherwise prohibited activities involving endangered species under certain circumstances. Because of horticultural interest in P. despainii, trade permits may be sought, but few permits for plants of wild origin would ever be issued since the species is not common in the wild. Plants of cultivated origin are available and permits may, under certain circumstances, be issued for trade in those. Requests for copies of regulations on plants and inquiries regarding them may be addressed to the Federal Wildlife Permit Office, U.S. Fish and Wildlife Service, Washington, DC 20240 (703/235-1903).

On July 29, 1983, P. despainii was included on Appendix I of the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES). The effect of this listing is that both export and import permits are required before international shipment may occur. Such shipment is strictly regulated by CITES member nations to prevent it from being detrimental to the survival of the species, and cannot be allowed if it is for primarily commercial purposes. If plants are certified as artificially propagated, however, international shipment requires only export documents under CITES, and commercial shipments may be allowed.

National Environmental Policy Act

The Fish and Wildlife Service has determined that an Environmental Assessment, as defined under authority of the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to section 4(a) of the Endangered Species Act of 1973, as amended. As notice outlining the Service's reasons for this determination was published in the Federal Register on October 25, 1983 (48 FR 49244).

DEPARTMENT OF COMMERCE
National Oceanic and Atmospheric Administration
50 CFR Part 653
[Docket No. 70616-7183]
Red Drum Fishery of the Gulf of Mexico
AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.
ACTION: Final rule.

SUMMARY: NOAA issues this final rule to implement Amendment 1 to the Fishery Management Plan for the Red Drum Fishery of the Gulf of Mexico (FMP). This final rule (1) establishes primary and secondary fishing areas and prohibits harvest of red drum from secondary areas, (2) revises quota provisions to include allocations for shrimp vessels and recreational fishing vessels, (3) revises the closure requirement to apply to shrimp and recreational vessels, (4) prohibits the sale of fish taken under the bag limit, (5) establishes that fish harvested in the exclusive economic zone (EEZ) will be landed in conformance with State laws, and (6) revises the procedure for specifying total allowable catch (TAC) and modifying quotas for the primary area. The intended effect is to protect and rebuild the red drum resource throughout its range through cooperative State/Federal management and to prevent overfishing while achieving optimum yield (OY) from the red drum fishery on a continuing basis.

ADDRESS: Copies of the environmental assessment and the supplemental regulatory impact review/initial regulatory flexibility analysis may be obtained from William R. Turner, Southeast Region, National Marine Fisheries Service, 9450 Koger Boulevard, St. Petersburg, FL 33702.

SUPPLEMENTARY INFORMATION: The Secretary of Commerce (Secretary) prepared the FMP under the authority of section 304(c) of the Magnuson Fishery Conservation and Management Act (Magnuson Act). Implementing regulations for the FMP were effective December 19, 1986 (51 FR 46676, December 22, 1986). Earlier, the Secretary promulgated an emergency rule (51 FR 23553, June 30, 1986) that limited directed net harvest of red drum from the EEZ to one million pounds during its 90-day effective period (June 25 to September 23, 1986); it also limited incidental catch in other commercial fisheries to five percent of red drum by weight of the total catch aboard a vessel. The directed fishery was closed on July 20, 1986 (51 FR 26554, July 24, 1986; corrected at 51 FR 27413, July 31, 1986). The Secretary extended the emergency rule (51 FR 34220, September 26, 1986) for a second 90-day period, until December 22, 1986.

In Amendment 1 to the FMP, the Gulf of Mexico Fishery Management Council (Council) revised and restated the management unit, problems in the fishery, management objectives, OY, the procedure for specifying harvest levels from the EEZ, allowable harvest levels, and other provisions. The preamble to the proposed rule to implement Amendment 1 (52 FR 22822, June 16, 1987) described these changes and their rationale and is not repeated here.

Comments and Responses

Comments criticizing the proposed rule and amendment were received from Organized Fishermen of Florida, Alaska Factory Trawler Association, Southeastern Fisheries Association, National Fisheries Institute, Pacific Seafood Processors Association, Fish Consumers Association, one commercial purse seine captain, and a minority report signed by two members of the Council. Mixed comments indicating support for some measures and problems or potential problems with others were received from the Florida Department of Natural Resources, Florida Marine Fisheries Commission, U.S. Coast Guard, and U.S. Fish and Wildlife Service. Letters in support of Amendment 1 and the proposed rule were received from approximately 3,000 members of the Coastal Conservation Association and from several recreational fishing organizations. In general, critical comments challenged the composition and structure of the management unit, procedures for specifying harvest levels, and the deletion of provisions describing supervision of State law when landing red drum taken from the EEZ during a directed commercial fishery. Other miscellaneous comments were received, but most were related to these topics and all are addressed below.

Management Unit

One organization indicated that blue runner, black drum, ladyfish, and crevalle jack should be included in the management unit because they occur in close association with red drum. Although not genetically related, these species were originally proposed for inclusion in the FMP. It was generally believed that the market could expand for one or more of these species in search of a substitute for red drum, and that their inclusion in the FMP would provide a basis for accumulating data in the event the management became warranted. Based on comments received on the proposed rule to implement the FMP, these species were eliminated from the management unit. The reason was discussed in the preamble to the final rule for the FMP.

Other comments indicated that there is no justification for dividing the Gulf of Mexico EEZ into primary and secondary management areas. Although there is no direct genetic evidence on red drum to support stock differences in these areas, indirect evidence from mark-recapture studies, harvest data, and socio-economic considerations support the division. Historically, more than 98 percent of the total recreational and commercial catch of red drum from the EEZ has been harvested from the primary area. Data from Florida and Texas, the States bordering the secondary areas, indicate high fishing mortality rates in those areas. Further, owing to the nine-mile jurisdictional authority of these two States in the Gulf of Mexico, red drum in these secondary areas appear concentrated in waters under State control. Available data on red drum migration indicate little intermixing between areas. Although limited, considered together this information suggests that escapement from State waters bordering the secondary areas has been insufficient to maintain the offshore brood stock of red drum. Total closure of the secondary areas coupled with intensified conservation efforts evident on the part of the States is expected to protect and enhance rebuilding of the offshore red drum population in those areas. Such constraints should result in relatively slight socioeconomic impacts, as less than two percent of the total of the red drum harvest has been from the secondary areas.

Specification of Harvest Levels

Comments in this category generally were concerned with who specifies the allowable catch levels and by what process. Additionally, there was concern with the 20-percent level of juvenile escapement targeted for inshore waters and its relationship to allowable catch, its measurement, and its scientific basis.

The achievement of a 20-percent level of juvenile escapement to offshore waters does not trigger the opening of a directed commercial fishery. It is simply a prerequisite which will foster rebuilding of the offshore spawning stock biomass to levels that could support renewed fishing effort.
general rule of thumb used by fishery biologists is that spawning stock biomass should not be reduced below 20 to 40 percent of the level existing before exploitation. Current fisheries exploited beyond this level have collapsed. Therefore, the Council has recommended that the States take measures to allow the escapement of 20 to 40 percent of the juveniles that would have escaped from nearshore waters in the absence of an inshore fishery. An initial goal of 20 percent escapement is recommended. NMFS, through its Southeast Fisheries Center, will annually review the stock assessment data to determine if the 20-percent (or any future) escapement level is appropriate to achieve the objectives of the amendment. NMFS will also monitor the States' efforts to increase juvenile escapement to the determined levels and to provide estimates of escapement. On the basis of the best scientific information currently available, escapement is the determining factor in increasing the offshore spawning stock biomass. Based on annual stock assessments, NMFS will determine current levels of escapement and what levels are required over time to reach a spawning stock biomass that ensures optimum recruitment and enhancement of inshore and offshore populations. NMFS is presently funding and will evaluate the success of State projects conducted under the Marine Fisheries Initiative (MARFIN) program to measure levels of escapement.

The opening of a directed commercial fishery in the primary area will not occur until stock assessment data identifies a level of surplus spawning stock that can be safely removed while incurring little risk of overfishing. Accordingly, NMFS will provide an annual assessment of the red drum stock that will be used to specify a range of acceptable biological catch (ABC) for the primary area. The Council in turn will use that information to make necessary adjustments to the amount of allowable catch from within or below the range of ABC and to establish appropriate quotas for forthcoming fishing seasons. These decisions are within the authority of the Council, subject to conformance with the national standards of 50 CFR Part 602. Under the FMP prepared by the Secretary, the Regional Director was responsible for these decisions. The use of FMP amendment procedures to specify allowable catch and quotas ensures a greater cross-section of review, promotes conservation, minimizes risk to the resource, and takes advantage of statutory deadlines in making timely adjustments to TAC and quotas.

State/Federal Cooperative Management

Several respondents commented that deletion of supersession provisions in Amendment 1 is in direct conflict with responsibilities recognized in the Secretarial FMP, and sets an improper precedent for managing other fisheries under the Magnuson Act. According to the comments, use of State landing laws to control harvest in the EEZ appears contrary to the intent of the Magnuson Act and an abdication of management authority by the Secretary. NOAA does not agree that the Secretary has relinquished management responsibility to the States or that the actions embodied in Amendment 1 are contrary to the Magnuson Act. Rather, the changes represent a shift to a more pragmatic approach, where the States and the Federal government share more equitably the burdens and responsibilities of red drum management. It recognizes that the States play an integral role in preserving and rebuilding offshore stocks. State inshore fisheries, where the majority of the harvest has historically taken place, are totally dependent on offshore spawners. State implementation of conservation fishing regulations not only protects inshore red drum fisheries, but should also ensure adequate escapement to restore offshore stocks and subsequent resumption of the offshore fishery. The 20 percent escapement provision emphasizes the necessity for a shared research and development program. Amendment 1 focuses on both inshore and offshore stock problems as equally important to restoration of this resource. It provides that State landing and possession laws apply to all presently allowable EEZ bag limits and commercial incidental catch. Further, Amendment 1 continues to provide for the landing and sale of lawfully captured red drum from the EEZ whenever a directed fishery is resumed. Such fish will be properly documented and landed as "imports." This will allow marketing of these fish in a way that is compatible with State laws when sale of domestically landed red drum is prohibited, but where certified imports are exempt and can be legally marketed. This approach supports and strengthens State conservation programs without diluting or disrupting enforcement capabilities.

Other Comments

One agency supported the short-term goal of protecting offshore spawners while encouraging and supporting the States' efforts to protect juveniles in estuarine waters, but expressed concern with the long-term management strategy because it could result in the resumption of offshore harvest. The direction of future management of red drum resources depends upon how the stocks respond to current management practices as reflected by the annual stock assessments. Permanent closure of the EEZ to a directed commercial harvest of red drum would constitute an inflexible management approach oblivious to factual biological information emerging from ongoing studies, be insensitive to user-group concerns and allocation responsibilities under the Magnuson Act, and obstruct the Council's deliberative processes.

Another agency indicated that the identification of problems in Amendment 1 should be expanded to include, "competition between recreational and commercial uses," and that the document should contain greater elaboration of this issue. User-group competition is included in problem (4) as identified in the proposed rule and Amendment 1. NOAA believes that the management approach described in Amendment 1 reasonably addresses problems associated with the competition for access to this resource in an atmosphere of State-Federal cooperation and is consistent with conservation decisions.

One agency commented that defining allowable incidental catch in terms of landed catch precludes enforcement at sea of incidental catch limitations. Where possible, the final rule prohibits possession of red drum in or from the EEZ or a primary or secondary area. Compliance with restrictions which apply on a trip basis, however, must be determined on landed catch. A vessel which catches red drum in excess of five percent by weight early in a fishing trip should not be considered to be in violation when it could end the trip within the legal limit. NOAA expects that relevant observations at sea will be communicated to and coordinated with authorized officers ashore to maximize enforcement efforts. Enforcement at sea is required to detect illegal transfers of red drum and to document any fishing operations that do not minimize wastage.

One agency recommended that the final rule define the eastern boundary of the secondary area off Florida to clarify its limits off the southern tip of Florida. A clear definition of that boundary, based on the delineation between the Gulf of Mexico and the Atlantic Ocean as contained in 50 CFR 601.12(c), is included in the definition of secondary areas.
One agency expressed concern that the language of the existing § 653.3(c), making the regulations applicable within the boundaries of a national park, monument, or marine sanctuary in the Gulf of Mexico, is inconsistent with an avowed purpose of Amendment 1, i.e., deletion of the exemption from State landing laws. NOAA does not view § 653.3(c) as operating to displace laws which are otherwise made applicable to these types of areas. This general language ensures protection of the resource throughout its range in the EEZ compatible with other applicable restrictions.

One agency recommended a minimum size of 16 inches for all red drum taken from the EEZ to aid State enforcement when a directed net harvest is resumed. Consideration of such a recommendation would be appropriate when resumption of a directed commercial fishery is contemplated.

A commenter, concerned about the “dumping” of excess red drum because nets were set around too many fish, proposed a prohibition on a severe penalty for dumping. The final rule contains prohibitions on fishing operations which cause wastage of red drum.

Changes From the Proposed Rule

Section 653.1 is reorganized for simplicity and clarity, language is added to clarify that the regulations apply only to fishing vessels of the United States, and reference to § 653.22(g) as an exception to applicability of the regulations only in the EEZ of the Gulf of Mexico is removed. The provision allowing continued application of State landing and possession laws to certain red drum harvested in the EEZ is contained in § 653.2(d) of this rule and does not constitute an exception to the applicability of the rules of this part.

In § 653.2, the terms and definitions for Commercial quota and Non-directed commercial red drum fishing (fishery) are no longer used and are removed. The latter term implied that there could be a commercial fishery in which catch of red drum is a secondary or tertiary target species. Such is not the case. Red drum taken in any commercial fishery other than the directed commercial red drum fishery is incidental catch in other commercial fisheries. Removal of the term Non-directed commercial red drum fishing (fishery) is reflected in rewording throughout the final rule. In the definition of Directed commercial red drum fishing (fishery), the exemption for shrimp trawling is removed. All commercial fishing activity in which the weight of red drum landed exceeds five percent of the total weight of all other fish on board is a directed red drum fishery. The terms Commercial fishing and Recreational fishing are replaced by Commercial fishing (fishery) and Recreational fishing (fishery) and their definitions are revised for clarity and consistency. The definition of Authorized officer is revised to be more specific as to the participants in any agreement whereby a Federal or State officer becomes an authorized officer. In the definition of Center Director, the telephone number is corrected. Reference to Figure 2 is removed from the definitions of Primary area and Secondary areas and the figure is removed as it is not necessary for a clear understanding of the areas. In the definition of Primary area, the western boundary is clarified. Specification of the eastern boundary of the EEZ seaward of the fishery jurisdiction of Florida is added to the definition of Secondary areas.

In § 653.3, paragraph (b) is revised to clarify that the U.S. Coast Guard is not a party to the State/Federal agreement for data collection.

In § 653.5(d), the requirement that certain persons landing red drum must comply with “other fishery” laws of the State where landed is removed. Specifying compliance with only the “landing and possession” laws of the State where landed is in accord with Amendment 1 and avoids the ambiguity of the phrase “other fishery” laws. In § 653.3, a change to paragraph (b) is added because of the removal of the term “non-directed red drum fishery.” In § 653.7, excess verbiage in paragraph (a)(1) is removed, paragraphs (a)(7) and (8) are revised consistent with the creation of primary and secondary areas, and paragraphs (a)(17) through (22) are added to provide specific prohibitions for failure to meet the requirements of § 653.22.

In § 653.21, paragraph (a) is revised to substitute “primary area” for “EEZ” and to clarify that the quota is for each fishing season.

Section 653.22 is reorganized for clarity and to apply the prohibition on wastage of red drum to all fisheries. Paragraph (c) of the proposed rule (paragraph (b)(2) in this final rule) is revised to clarify that a commercial vessel with an allowable bycatch of red drum must have a permit and that a commercial vessel over the allowable limit is considered as conducting a directed commercial red drum fishery. Paragraph (g) is removed as the applicability of State landing and possession laws is covered in § 653.3(d). Paragraph (h) [Reserved] is removed. Landing restrictions will be included in paragraph (b)(1) when directed commercial red drum fishery is authorized.

In § 653.23 paragraph (a) is no longer applicable and is removed and paragraphs (b)(1), (c), and (d) of the proposed rule are designated as (a) and (b) and revised for clarity.

In § 653.24, paragraph (d) is revised to clarify that a change in TAC will be by amendment to the FMP and paragraph (e) is revised to clarify that the percentage of any excess red drum which may be included in the TAC will be set by the Council no more frequently than annually.

Classification

The Regional Director determined that Amendment 1 is necessary for the conservation and management of the red drum fishery of the Gulf of Mexico and that it is consistent with the Magnuson Act and other applicable law. The Council prepared an environmental assessment (EA) for Amendment 1. The Assistant Administrator for Fisheries concluded that there will be no significant impact on the environment as a result of this rule. A copy of the EA may be obtained from the Southeast Region of NMFS (see ADDRESS).

The Administrator of NOAA determined that this is not a “major rule” requiring the preparation of a regulatory impact analysis under Executive Order 12291. The amendment’s management measures are designed to maintain the productivity of each user group to the maximum extent possible while preventing overfishing of red drum and restoring the red drum stock. The major benefit of this rule is restoration and maintenance of the red drum stock.

The Council prepared a supplemental regulatory impact review (SRIR) which concluded that this rule will have the following economic effects. Greater long-term benefits, in terms of overall poundage produced, will result than from the other alternatives. The impact of the prohibition of red drum harvest from the secondary areas is expected to be negligible since, historically, 98 percent of recreational and commercial catch from the EEZ has been from the primary area. The impact of a bag limit of one fish and the impact of prohibiting directed commercial fishing for red drum, continued in Amendment 1, were described in the SRIR and initial regulatory flexibility analysis (IRFA). No additional costs to participants for permits are anticipated as a result of the amendment.

Federal enforcement costs of the regulatory action are not changed by the

Bill Powell,
Executive Director, National Marine Fisheries Service.

For reasons set forth in the preamble, 50 CFR Part 653 is amended as follows:

PART 653—RED DRUM FISHERY OF THE GULF OF MEXICO

1. The authority citation for Part 653 continues to read as follows:
   Authority: 16 U.S.C. 1801 et seq.

2. Section 653.1 is revised to read as follows:

§ 653.1 Purpose and scope.

The purpose of this part is to implement the Fishery Management Plan for the Red Drum Fishery of the Gulf of Mexico (FMP) prepared by the Secretary of Commerce and approved by the Gulf of Mexico Fishery Management Council. The regulations in this part, except for § 653.5, apply to fishing for red drum by fishing vessels of the United States in the EEZ in the Gulf of Mexico. The reporting requirements in § 653.5 apply to vessels of the United States and persons participating in the fishery in both the EEZ and State jurisdictions.

3. In § 653.2, the definitions for Commercial quota and Non-directed commercial red drum fishing (fishery) are removed; definitions for Commercial fishing, Recreational fishing, paragraph (c) under the definition for Authorized officer; Directed Commercial red drum fishing (fishery), and the telephone number under Center Director are revised; a phrase is added to the definition for Exclusive economic zone (EEZ) between the words "means the" and the word "area"; and new definitions for Primary area, Secondary area, and Total allowable catch (TAC) are added in alphabetical order to read as follows:

§ 653.2 Definitions.

Authorized officer means

(c) Any officer designated by the head of any Federal or State agency which has entered into an agreement with the Secretary and the Commandant of the U.S. Coast Guard to enforce the provisions of the Magnuson Act; or

Center Director * * telephone 305-361-4200 * *

Commercial fishing (fishery) means fishing or fishing activities which result in the harvest of fish one or more of which (or part thereof) is sold, traded or bartered.

Directed commercial red drum fishing (fishery) means any commercial fishing activity in which the weight of red drum landed exceeds five percent of the total weight of all other fish on board.

Exclusive economic zone (EEZ) means the zone established by Presidential Proclamation 5030, dated March 10, 1983, and is the area

Primary area means the EEZ seaward of the fishery jurisdictions of Alabama, Mississippi, and Louisiana, bounded on the east by a line directly south from the boundary between Alabama and Florida (87°31.1' W. longitude) to its intersection with the outer limit of the EEZ, and bounded on the west by a line beginning at the boundary between Texas and Louisiana (midpoint between the gulfward extension of the Sabine Pass jetties) to 29°32.1' N. latitude, 93°47.7' W. longitude, thence directly south to its intersection with the outer limit of the EEZ.

Recreational fishing (fishery) means fishing or fishing activities which result in the harvest of fish none of which (or part thereof) is sold, traded, or bartered.

Secondary areas means (a) the EEZ seaward of the fishery jurisdiction of Florida in the Gulf of Mexico and (b) the EEZ seaward of the fishery jurisdiction of Texas, with boundaries consistent with the immediately adjacent boundaries described for the primary area. For the purposes of this definition, the eastern boundary of the EEZ in the Gulf of Mexico is a line from the outer limit of the EEZ north along 83°00' W. longitude to the outer limit of the waters of Florida off the Dry Tortugas Islands, thence in a clockwise direction around that outer limit to 24°35' N. latitude, thence east along 24°35' N. latitude to the outer limit of the waters of Florida off the Marquesas Keys.

Total allowable catch (TAC) means the maximum permissible annual harvest from the primary area set from within or below the ABC range after consideration of biological, economic, and social factors and the risk of inducing recruitment overfishing associated with that harvest level.

List of Subjects in 50 CFR Part 653

Fisheries, Fishing, Reporting and recordkeeping requirements.
§ 653.3 Relation to other laws.

(b) Certain responsibilities relating to data collection and enforcement may be performed by authorized State personnel under a State/Federal agreement for data collection and a tripartite agreement among the State, the U.S. Coast Guard, and the Secretary for enforcement.

(d) A person landing red drum from the recreational fishery or from a commercial fishery, other than a directed red drum fishery, must comply with the landing and possession laws of the State where landed.

5. In § 653.4, paragraph (a) is revised to read as follows:

§ 653.4 Permits and fees.

(a) Applicability. A permit is required for a commercial vessel fishing in the EEZ, other than a shrimp fishing vessel, to possess or land red drum.

6. In § 653.5, paragraph (b), introductory text, is revised to read as follows:

§ 653.5 Reporting requirements.

(b) Other commercial fisheries. An owner or operator of a commercial fishing vessel, other than a shrimp fishing vessel, which possesses or lands red drum as incidental catch, if selected by the Center Director, must

7. In § 653.7, the word “or” at the end of paragraph (a)(15) is removed; the period at the end of paragraph (a)(16) is removed and a semi-colon is added in its place; paragraphs (a)(17), (7), and (8) are revised; and new paragraphs (a)(17) through (22) are added to read as follows:

§ 653.7 Prohibitions.

(a) Retain or land red drum in a commercial fishery, other than the shrimp fishery, without a permit as required by § 653.4(a).

(7) Retain on board a vessel or possess red drum in or from the secondary areas as specified in § 653.22(a);

(8) Retain on board a vessel or possess red drum in or from the primary area under a quota specified in § 653.21(b) or (c);

(17) Conduct a directed commercial red drum fishery in the primary area as specified in § 653.22(b)(1) and (2);

(18) Retain on board a vessel or possess red drum in or from the primary area in a recreational fishery in excess of the bag limit specified in § 653.22(b)(3) or as modified in accordance with § 653.23(b);

(19) Sell, barter, or trade red drum taken under the bag limit specified in § 653.22(b);

(20) Conduct fishing operations in a way that causes wastage of red drum as specified in § 653.22(c);

(21) Transfer at sea red drum harvested from or possessed in the EEZ from fishing vessel to any other vessel as specified in § 653.22(d); or

(22) Possess in the EEZ or land red drum from the primary area without the head and fins intact as required by § 653.22(e).

8. Section § 653.21 is revised to read as follows:

§ 653.21 Quotas.

(a) The total allowable harvest of red drum for the directed commercial red drum fishery in the primary area is zero for each fishing season.

(b) The total allowable harvest of red drum taken as incidental catch in other commercial fisheries, excluding the shrimp fishery, in the primary area is 100,000 pounds for each fishing season.

(c) The total allowable harvest of red drum taken as incidental catch in the commercial shrimp fishery in the primary area is 200,000 pounds for each fishing season.

(d) The total allowable harvest of red drum for recreational fishing in the primary area is 325,000 pounds for each fishing season.

(e) The TAC in the primary area is 625,000 pounds for each fishing season.

9. Section § 653.22 is revised to read as follows:

§ 653.22 Harvest and landing limitations.

(a) Harvest from secondary areas. No red drum may be harvested or possessed in or from the secondary areas. Red drum caught in the secondary areas must be released immediately with a minimum of harm.

(1) Directed commercial red drum fishery. No red drum may be harvested from the primary area in the directed commercial red drum fishery.

(2) Incidental catch in other commercial fisheries. A commercial vessel which fishes in the primary area and which takes red drum as incidental catch may not land red drum in excess of five percent of the total weight of all other fish and/or shrimp on board. A commercial fishing vessel which lands red drum in excess of this limitation will be considered as conducting a directed commercial red drum fishery. Any commercial vessel which takes red drum, other than a shrimp fishing vessel, must have a permit as required by § 653.4(a).

(3) Recreational bag limit. A person in a recreational fishery may not possess red drum in or from the primary area in excess of one red drum per person per trip. Red drum in excess of this bag limit must be released immediately with a minimum of harm. Red drum harvested under the bag limit may not be sold.

(c) Wastage prohibited. A person or vessel must conduct fishing operations in a way that minimizes wastage of red drum.

(d) Transfer at sea. Red drum harvested from or possessed in the EEZ may not be transferred from a fishing vessel to any other vessel.

(e) Head and fins intact. Red drum possessed in the EEZ, or harvested from the primary area and landed, must have head and fins intact.

10. Section § 653.23 is revised to read as follows:

§ 653.23 Closures.

(a) The Secretary, by publication of a notice in the Federal Register, will prohibit the retention on board or landing of red drum taken as incidental catch in a commercial fishery in or from the primary area under a quota specified in § 653.2 (b) or (c) for the remainder of a fishing season.

(b) The Secretary, by publication of a notice in the Federal Register, will set the recreational bag limit specified in § 653.22(b)(3) at zero and prohibit further retention on board or landing of red drum in the recreational fishery in or from the primary area for the remainder of a fishing season when the quota specified in § 653.21(d) is reached or is projected to be reached.

11. Section 653.24 is revised to read as follows:

§ 653.24 Allowable catch and allocation procedures.

(a) Prior to October 1, each year, the Center Director will

(1) Update the stock assessment for red drum;

(2) Reassess the MSY level;

(3) Specify the best estimate of the standing stock and its age composition;

(4) Reexamine and specify the level of offshore standing stock necessary to
optimize larval recruitment to the inshore fishery;
(5) Specify the geographical variations in stock abundance, mortality, juvenile escapement, and recruitment;
(6) Summarize current and historical information on migratory movements of the stock; and
(7) Analyze social and economic data available in the fishery.
(b) The Council will appoint a scientific assessment group that will review the Center Director's reports, current harvest statistics, and economic, social, and other relevant data and will prepare a written assessment report to the Council specifying a range of ABC for the primary area. The report will
(1) Set forth a risk analysis showing the probabilities of adversely impacting the spawning stock biomass (SSB) through fishing at each level of ABC and the economic and social impacts of those levels;
(2) Include consideration of the fishing mortality rates relative to $F_{MSY}$ and $F_{MSY}$, abundance relative to optimum SSB, trends in recruitment, and whether overfishing is occurring for the stock as a whole or upon a portion of the stock in any geographical area;
(3) In specifying ABC, separately identify the quantity of the offshore population, in excess of the SSB necessary to optimize recruitment, that may be harvested; and
(4) When requested by the Council, include information on bag limits, size limits, specific gear harvest limits, and other restrictions required to prevent a user group from exceeding its allocation or quota under a TAC specified by the Council, along with the economic and social consequences of such restrictions.
(c) The Council will consider the report and recommendations of the scientific assessment group and relevant public comments. A public hearing will be held at the time and place the Council takes action on the report. Other public hearings may be held. The Council may convene its Red Drum Advisory Panel and Scientific and Statistical Committee to provide advice before taking action.
(d) In specifying TAC, the Council will consider the recommendations, comments, and advice provided for in paragraphs (b) and (c) of this section and will set TAC from within or below the ABC range by FMP amendment.
(e) If an offshore population (above annual surplus production) exceeds a SSB necessary to optimize recruitment, the percentage of the excess which may be included in the TAC will be set by the Council periodically but no more frequently than annually.
(f) The Council will make changes in use group allocations for the primary area, if any, by FMP amendment.
[FR Doc. 87-21388 Filed 9-14-87; 8:45 am]
BILLING CODE 3510-22-M
This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF THE TREASURY

Bureau of Alcohol, Tobacco and Firearms

27 CFR Part 9

[Notice No. 639]

Wild Horse Valley Viticultural Area; California

AGENCY: Bureau of Alcohol, Tobacco and Firearms, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Bureau of Alcohol, Tobacco and Firearms (ATF), is considering the establishment of a viticultural area in the mountains between Napa and Solano Counties, California, to be known as Wild Horse Valley. The proposed viticultural area is located just five miles east of the City of Napa. It contains vineyards in both Napa and Solano Counties. The petition was submitted by John Newmeyer of Napa and four other interested persons. ATF believes that the establishment of viticultural areas and the subsequent use of viticultural area names as appellations of origin in wine labeling and advertising will help consumers identify the wines they may purchase.

The establishment of viticultural areas also allows wineries to further specify the origin of wines they offer for sale to the public.

DATE: Written comments must be received by November 2, 1987.

ADDRESS: Send written comments to: Chief, FAA, Wine and Beer Branch, Bureau of Alcohol, Tobacco and Firearms, P.O. Box 385, Washington, DC, 20044-0385 (Notice No. 639) Copies of the petition, the proposed regulations, the appropriate maps, and written comments will be available for public inspection during normal business hours at: ATF Reading Room, Office of Public Affairs and Disclosure, Room 4412, Ariel Rios Federal Building, 1200 Pennsylvania Avenue NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT:

SPECIAL INFORMATION:

Background

On October 2, 1979, ATF published Treasury Decision ATF-60 (44 FR 56692) which added a new Part 9 to 27 CFR, providing for the listing of approved American viticultural areas, the names of which may be used as appellations of origin.

Section 4.25a(e)(1), Title 27, CFR, defines an American viticultural area as a delimited grape-growing region distinguished by geographical features, the boundaries of which have been delineated in Subpart C of Part 9.

Section 4.25a(e)(2), outlines the procedure for proposing an American viticultural area. Any interested person may petition ATF to establish a grape-growing region as a viticultural area.

The petition should include:

(a) Evidence that the name of the proposed viticultural area is locally and/or nationally known as referring to the area specified in the petition;

(b) Historical or current evidence that the boundaries of the viticultural area are as specified in the petition;

(c) Evidence relating to the geographical characteristics (climate, soil, elevation, physical features, etc.) which distinguish the viticultural features of the proposed area from surrounding areas;

(d) A description of the specific boundaries of the viticultural area; based on features which can be found on United States Geological Survey (U.S.G.S.) maps of the largest applicable scale; and

(e) A copy of the appropriate U.S.G.S. maps with the boundaries prominently marked.

Petition

ATF has received a petition proposing a viticultural area encompassing a valley near Napa, California, approximately five and one-third miles long and one and two-thirds miles across at its widest point. The total area of the proposed viticultural area is 3,300 acres or 5.16 square miles. Currently there are seventy-three acres of winegrapes in the proposed Wild Horse Valley viticultural area. According to the petitioner, recent studies of other sites in the area indicate the feasibility of more than tripling the number of acres planted to winegrapes, and additional plantings are being considered. There are currently no bonded wineries in the proposed viticultural area, but two small wineries are planned. According to the petitioner, the first winery will begin operation for the crush of 1987 or 1988.

The petitioner claims that because of its proximity to San Francisco Bay and its elevation, the viticultural conditions in Wild Horse Valley are different from grape-growing conditions in other valleys in the eastern coast ranges of Napa County, such as Wooden, Gordon, Pope, Foss and Chiles Valleys, which tend to be more continental in climate, as well as more fertile. The petitioner claims that Wild Horse Valley's soils, climate, and elevations are also different from the nearby Green Valley in Solano County (known as Solano County Green Valley) and the adjacent Coombsville area of Napa Valley. According to the petitioner, the long growing season of the proposed Wild Horse Valley, its rocky soil, and windy conditions produce grapes that are well-suited to winemaking.

Location Compared To American Viticultural Areas

The proposed viticultural area is within the North Coast viticultural area. The proposed area partially overlaps the Napa Valley and Solano County Green Valley viticultural areas. The Suisin Valley viticultural area is approximately 2.5 miles east of the proposed Wild Horse Valley. It is separated from the proposed viticultural area only by the Solano County Green Valley viticultural area.

Evidence of Name

According to the petitioner, the name Wild Horse Valley is well documented. The petitioner provided references to books identifying the area as Wild Horse Valley as early as 1866. According to early accounts, wild horses
roamed the area during that period, thus the intriguing name Wild Horse Valley was coined.

Today, the name Wild Horse Valley is found on U.S.G.S. maps and on Napa County road maps. One of the two roads leading to the valley is named "Wild Horse Valley Road," and a creek flowing from the southeast portion of the valley into Solano County Green Valley, is named "Wild Horse Creek." According to the petitioner, the large, locally known horse ranch and equestrian center, Wild Horse Valley Ranch, located at the north end of the valley, has given the name ample publicity in recent years.

The petitioner claims that the first vineyard used for wine production in Wild Horse Valley was that of Joseph Verve who in 1861 had 50 acres. The wine historian, William F. Heintz, published a report entitled, "Wild Horse Valley's Viticultural History." Part of the report includes a transcript of an interview with a long time Napa Valley's Viticultural History." Part of the interview was included with the petition. The interview describes the historical use of the name Wild Horse Valley, as well as its viticultural significance.

Evidence of Boundaries

According to the petitioner, the boundaries of the Wild Horse Valley are defined by the natural terrain of the area. This hilly upland valley is rimmed by higher peaks on all sides. In its center are two large man-made lakes which supply water to the City of Vallejo. To the west, south, and southeast, mountainous terrain soon gives way to alluvial plains. To the north and northeast the terrain is ruggedly mountainous.

For ease of definition, the petitioner drew the boundary of the proposed viticultural area with straight lines for the most part, connecting prominent peaks surrounding the valley. According to the petitioner, this approximation is quite accurate, enclosing the area which has been historically known as Wild Horse Valley.

Geographical Evidence

Climate and Elevation

The petitioner claims that the valleys in the coast ranges east of Napa Valley generally tend to have a drier, more continental climate than the Napa Valley floor and vineyard sites in the mountains to the west. Many factors, including distance from sources of marine air, sunny exposure, and heat-absorbing rocky outcroppings, contribute to warmer summertime temperatures. The petitioner believes that because of its location, Wild Horse Valley is an exception to this generalization.

The petitioner states that the area of southern Napa Valley and Wild Horse Valley have lower annual temperatures and smaller annual temperature ranges as compared with the northern Napa Valley and most of the eastern Coast Ranges of Napa County, which have higher annual temperatures and larger annual temperature ranges.

According to the petitioner, Wild Horse Valley's southerly location near San Pablo and Suisun Bays expose it to cool westerly winds blowing in from the ocean and the bay, especially in spring and summer. The petitioner claims that its proximity to the Carquinez Straits and its unprotected position rising out of bayshore flatlands on two sides make Wild Horse Valley an unusually windy location. The California Energy Commission Wind Resource Map (submitted by the petitioner) depicts Wild Horse Valley to be on the edge of a zone where wind speeds average eleven to fourteen miles per hour. According to the petitioner, the effect of its windy location is enhanced by its elevation. Diurnal local winds created by the sun's warming of the ground tend to flow upslope or upcanyon during the day. This air movement combines with the marine breezes blowing in the same direction to make Wild Horse Valley windier than the lower elevation of the Coombsville district of Napa Valley to the west, and the more inland coast range mountains and valleys to the north, and the more sheltered Solano County Green Valley viticultural area.

Generally speaking, those surrounding areas have wind speeds averaging less than eleven miles per hour.

The petitioner contends that the proposed viticultural area also enjoys longer hours of sunlight than Coombsville and Green Valley. The petitioner says that summer fogs that blanket the lower elevations in the evening and early morning often stop below the altitude of Wild Horse Valley. Early mornings in the Wild Horse Valley are clear and bright. Around nine in the morning the fog will sometimes rise briefly into the valley as it warms and dissipates. In spite of the longer period of daylight, Wild Horse Valley's customary cool winds keep afternoon temperatures lower than Wild Horse Valley. A thermograph study done in 1965 at the ranch of James Birkmyer in the north end of the valley indicated that this site has a Region I climate (less than 2,500 degree days) as classified by the University of California at Davis system of heat summation.

According to the petitioner, the experience of growers in Wild Horse Valley confirms that the growing season climate is cool. James Birkmyer's twenty-two-year old plot of Johannisberg Riesling on his Horse Valley Ranch in the proposed viticultural area consistently ripens late with high acid levels at the end of September or beginning of October. The petitioner claims the climate of the proposed Wild Horse Valley viticultural area and the overlapping Solano County Green Valley are different. Available thermograph studies (1973–74) of Solano County Green Valley, places the climate in mid-Region III. In contrast, available thermograph data (1965), places Wild Horse Valley's climate in Region I.

Solano County Green Valley is more sheltered and on the average, warmer than Wild Horse Valley. This is in part due to the simple difference in elevation. When air rises, it expands and cools at the rate of about five and one-half degrees Fahrenheit per thousand feet.

The elevation of the proposed viticultural area is generally higher than the surrounding valleys. Wild Horse Valley's elevation ranges from 1,000 to 2,000 feet above sea level.

Many areas of Solano County Green Valley have much lower elevations than the proposed area ranging from 400 to 800 feet above sea level. The difference in elevation, fog is more prevalent in Solano County Green Valley than in Wild Horse Valley. The average annual rainfall in Solano County Green Valley is twenty to twenty-five inches per year. Over the last twenty years the rainfall in Wild Horse Valley has averaged thirty-two inches per year.

Soils

The soils in Wild Horse Valley also set it apart from neighboring vineyard districts. The soils in Wild Horse Valley are primarily shallow, well-drained, sloping stony loams of the Hambright–Toomes association found only in mountainous uplands. Specific soil types include Hambright, Toomes, Gilroy, Coombs, Sobrante and Trimmer loams. Vineyards in Wild Horse Valley have been established on Hambright and Trimmer soils. The petitioner's research has established that Wild Horse Valley has the only vineyard planted on mountainous uplands. Specific soil types include Hambright, Toomes, Gilroy, Coombs, Sobrante and Trimmer loams. Vineyards in Wild Horse Valley have been established on Hambright and Trimmer soils. The petitioner's research has established that Wild Horse Valley has the only vineyard planted on mountainous uplands. Specific soil types include Hambright, Toomes, Gilroy, Coombs, Sobrante and Trimmer loams. Vineyards in Wild Horse Valley have been established on Hambright and Trimmer soils. The petitioner's research has established that Wild Horse Valley has the only vineyard planted on mountainous uplands. Specific soil types include Hambright, Toomes, Gilroy, Coombs, Sobrante and Trimmer loams.
immediately west of Wild Horse Valley consists of Coombs loam with areas of Kild, Haire, Forward, and Sobrante soils. The soils found in other Napa County grape-growing areas to the north and east are primarily Yolo loam, Pleasanton loam, Diablo clay and Milleholm loam in the Cappel Valley. In Foss Valley they consist of Maxwell clay, Bale clay loam and Aiken loam. In Gordon Valley they are mostly Bale clay loam. Cole silt loam, Yolo loam and Bressa-Dibble complex. In the Wooden Valley they mostly are Bale clay loam, Sobrante loam, Cole silt loam, Hair clay loam. Diablo clay, Clear Lake clay, Bressa-Dibble complex. In Chiles Valley they are primarily Pleasanton loam, Perkins gravelly loam, Henneke gravelly loam, Tehema silt loam, Maxwell clay, and Bressa-Dibble complex. In Pope Valley the soils consist primarily of Pleasanton loam, Perkins gravelly loam. Henneke gravelly loam, Tehema silt loam, Maxwell clay, and Bressa-Dibble complex. In Horse Valley they are primarily Pleasanton loam, Perkins gravelly loam, Henneke gravelly loam, Tehema silt loam, Maxwell clay, and Bressa-Dibble complex. In Horse Valley the soils consist primarily of Pleasanton loam, Perkins gravelly loam. Henneke gravelly loam, Tehema silt loam, Maxwell clay, and Bressa-Dibble complex. In Horse Valley they are primarily Pleasanton loam, Perkins gravelly loam, Henneke gravelly loam, Tehema silt loam, Maxwell clay, and Bressa-Dibble complex. In Horse Valley they are primarily Pleasanton loam, Perkins gravelly loam, Henneke gravelly loam, Tehema silt loam, Maxwell clay, and Bressa-Dibble complex. In Horse Valley they are primarily Pleasanton loam, Perkins gravelly loam, Henneke gravelly loam, Tehema silt loam, Maxwell clay, and Bressa-Dibble complex. In Horse Valley they are primarily Pleasanton loam, Perkins gravelly loam, Henneke gravelly loam, Tehema silt loam, Maxwell clay, and Bressa-Dibble complex.

Conclusion

The petitioner believes that the Wild Horse Valley as a unique and distinctive grape-growing area. Historically considered a "tributary" of the Napa Valley, it has again earned a reputation in modern times for producing quality winegrapes. However, this single geographical area has lost its historic identity, because it is split by the political boundary between two counties (Napa and Solano) into two separate viticultural areas. The petitioner believes Wild Horse Valley's establishment as an American viticultural area and subsequent use as an appellation on wine labels will enable this small area to preserve its heritage as an established grape-growing and wine producing region. Based on the petitioner's evidence provided in this notice, it is the petitioner's opinion that the proposed Wild Horse Valley viticultural area defines a region with unique climate and growing conditions different from the surrounding areas. The provisions of the Regulatory Flexibility Act relating to an initial and final regulatory flexibility analysis (5 U.S.C. 603, 604) are not applicable to this notice of proposed rulemaking because the proposal is not expected: (1) To have significant secondary or incidental effect on a substantial number of small entities; or (2) To impose, or otherwise cause a significant increase in the reporting, recordkeeping, or other compliance burdens on a substantial number of small entities.

Accordingly, it is hereby certified under the provisions of section 3 of the Regulatory Flexibility Act (5 U.S.C. 605(b)) that the notice of proposed rulemaking, if promulgated as a final rule, will not have a significant economic impact nor compliance burdens on a substantial number of small entities.

Executive Order 12291

It has been determined that this proposed rulemaking is not classified as a "major rule" within the meaning of Executive Order 12291, 46 FR 13193 (1981), because it will not have an annual effect on the economy of $100 million or more; it will not result in a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies or geographical regions; and it will not have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of the United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Paperwork Reduction Act

The provisions of the Paperwork Reduction Act of 1980, Pub. L. 96-511, 44 U.S.C. Chapter 34, and its implementing regulations, 5 CFR Part 1320, do not apply to this notice because no requirements to collect information are proposed.

Public Participation—Written Comments

ATF requests comments from all interested persons concerning this proposed viticultural area. The document proposes possible boundaries for the viticultural area named "Wild Horse Valley." However, comments concerning other possible boundaries or names for this viticultural area will be given full consideration. Comments received on or before the closing date will be carefully considered. Comments received after that date will be given the same consideration if it is practical to do so, but assurance of consideration cannot be given except as to comments received on or before the closing date. ATF will not recognize any material in comments as confidential. Comments may be disclosed to the public. Any material which the commenter considers to be confidential or inappropriate for disclosure to the public should not be included in the comments. The name of the person submitting a comment is not exempt from disclosure.

Any interested person who desires an opportunity to comment orally at a public hearing on these proposed regulations should submit his or her request in writing, to the Director within the 45-day comment period. The Director, however, reserves the right to determine, in light of all circumstances, whether a public hearing will be held.

Drafting Information

The principal author of this document is Edward A. Reisman, FAA, Wine and Beer Branch, Bureau of Alcohol, Tobacco and Firearms.

List of Subjects in 27 CFR Part 9

Administrative practices and procedures, Viticultural areas, Consumer protection, Wine.

Authority and Issuance

27 CFR Part 9—American viticultural areas, is amended as follows:

PART 9—[AMENDED]

Paragraph 1. The authority citation for Part 9 continues to read as follows:

Par. 2. The table of contents in 27 CFR Part 9, Subpart C, is amended to add the title of § 9.124 to read as follows:

Subpart C—Approved American Viticultural Areas

§ 9.124 Wild Horse Valley.

Par. 3. Subpart C is amended by adding § 9.124 to read as follows:

Subpart C—Approved American Viticultural Areas

§ 9.124 Wild Horse Valley.

(a) Name. The name of the viticultural area described in this section is "Wild Horse Valley."

(b) Approved map. The appropriate map for determining the boundaries of the "Wild Horse Valley" viticultural area is one U.S.G.S. Quadrangle (7.5 Minute Series) map. It is titled Mt. George, California (1961), photorevised 1968.

(c) Boundaries. The boundaries of the proposed Wild Horse Valley viticultural area (in Napa and Solano Counties) are as follows:

(1) The beginning point is on the section line boundary between section 33, Range 3 West, Township 6 North and section 4, Range 3 West, Township 5 North, Mount Diablo Range and Meridian, marked with an elevation of 1,731 feet, which is a northwest corner in the boundary between Napa and Solano Counties.

(2) From the beginning point, the boundary runs in a north-northeasterly direction approximately .9 mile to the...
summit of an unnamed hill having a marked elevation of 1,804 feet.

(3) Then northeasterly approximately .7 mile to the summit of an unnamed hill having a marked elevation of 1,824 feet;

(4) Then south-southeasterly approximately .8 mile to the summit of an unnamed hill having a marked elevation of 1,866 feet;

(5) Then south-southeasterly approximately .5 mile to the summit of an unnamed hill having a marked elevation of 2,062 feet;

(6) Then southerly approximately .7 mile to the summit of an unnamed hill having a marked elevation of 2,137 feet;

(7) Then south-southeasterly approximately .4 mile to the summit of an unnamed hill having a marked elevation of 1,894 feet;

(8) Then southerly approximately 2.3 miles to the midpoint of the section line boundary between sections 15 and 22, Township 5 North, Range 3 West, Mount Diablo Range and Meridian;

(9) Then southwesterly approximately 1.3 miles to the summit of an unnamed hill having a marked elevation of 1,563 feet;

(10) Then west-northwesterly approximately 1.2 miles to the summit of an unnamed hill, on the Napa/Solano County boundary, having a marked elevation of 1,666 feet;

(11) Then north-northeasterly approximately 1.5 miles to the summit of an unnamed hill having a marked elevation of 1,351 feet;

(12) Then north-northeasterly approximately 1.2 miles to the summit of an unnamed hill having a marked elevation of 1,480 feet; and

(13) Then north-northwesterly approximately 1.0 mile to the point of beginning.

Stephen E. Higgins,
Director.

BILILNG CODE: 4810-31-M

27 CFR Part 9
[Notice No. 641]

Cayuga Lake Viticultural Area

AGENCY: Bureau of Alcohol, Tobacco and Firearms (ATF), Department of the Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Bureau of Alcohol, Tobacco and Firearms (ATF) is considering the establishment of a viticultural area in New York State, within the counties of Seneca, Tompkins, and Cayuga, to be known as "Cayuga Lake." This proposal is the result of a petition submitted by Douglas and Susanna Knapp (Knapp Farms, Inc.) and Robert Plaice (Planet's Cayuga Vineyard, Inc.), whose wineries are located within the proposed area. ATF believes that the establishment of viticultural areas and the subsequent use of viticultural area names as apppellations of origin in wine labeling and advertising will help consumers identify the wines they purchase.

DATE: Written comments must be received on or before October 16, 1987.

ADDRESS: Send written comments to: Chief, FAA, Wine and Beer Branch, Bureau of Alcohol, Tobacco and Firearms, P.O. Box 385, Washington, DC 20044-0385, Attn: Notice No. 641.

SUPPLEMENTARY INFORMATION:

Background

On August 23, 1978, ATF published Treasury Decision ATF-53 (43 FR 37672, 54632) revising regulations in 27 CFR Part 4. These regulations allow the establishment of definite viticultural areas. The regulations also allow the name of an approved viticultural area to be used as an appellation of origin on wine labels and in wine advertisements.

On October 2, 1978, ATF published Treasury Decision ATF-60 (44 FR 50682) which added a new Part 9 to 27 CFR, providing for the listing of approved American viticultural areas, the names of which may be used as an appellation of origin.

Section 4.25a(e)(1), Title 27, CFR, defines an American viticultural area as a delimited grape-growing region distinguishable by geographical features, the boundaries of which have been delineated in Subpart C of Part 9.

Section 4.25a(e)(2) outlines the procedure for proposing an American viticultural area. Any interested person may petition ATF to establish a grape-growing region as a viticultural area. The petition should include—

(a) Evidence that the name of the proposed viticultural area is locally and/or nationally known as referring to the area specified in the petition;

(b) Historical or current evidence that the boundaries of the viticultural area are as specified in the petition;

(c) Evidence relating to the geographical characteristics (climate, soil, elevation, physical features, etc.) which distinguish the viticultural features of the proposed area from surrounding areas;

(d) A description of the specific boundaries of the viticultural area, based on features which can be found on United States Geological Survey (U.S.G.S.) maps of the largest applicable scale; and

(e) A copy of the appropriate U.S.G.S. map with the boundaries prominently marked.

Petition

ATF has received a petition proposing a viticultural area in New York State, surrounding and adjacent to Cayuga Lake, within the counties of Seneca, Tompkins, and Cayuga, to be known as "Cayuga Lake." The proposed area, located north of the city of Ithaca, between Seneca Lake and Owasco Lake, includes eight bonded wineries and 18 vineyards, with approximately 660 acres of grapes. Further, the proposed area is situated within the approved Finger Lakes viticultural area.

According to the petitioners, historical and current evidence regarding the name as well as the boundaries of the proposed area include the following:

(a) The body of water called Cayuga Lake received its name from the Cayuga Indians, who originally inhabited the region bordering the lake.

(b) The name figures prominently in identifying the area in the diaries of General Sullivan during his campaign to open land in upstate New York to settlers in the 1700's.

(c) Cayuga Lake is the name used by the first permanent settlers in Seneca County in 1780, and has remained the same to the present time.

(d) The large state park located in the northern section of the proposed viticultural area is named Cayuga Lake State Park.

(e) State Route 89, which runs the length of the proposed viticultural area, is also known as Cayuga Lake Boulevard.

Geographical features of the proposed Cayuga Lake viticultural area include the following:

(a) Bedrock of different kinds is the main source of soil material in New York State. Within the proposed Cayuga Lake viticultural area, the bedrock is predominantly shale. To the north of the proposed area, it is alternating limestone and slate formations, and to the south, it is interbedded sandstone and shale.

(b) The maximum elevation within the proposed area is no more than 800 feet above the surface of Cayuga Lake. The elevation of the areas to the east, west,
and south of the proposed area, however, is 1,000–2,000 feet.

(c) The Cayuga Lake basin is one of two major land formations in the Finger Lakes region and resulted from glacial activity in the Pleistocene epoch. As consistently stated in O.D. von Engeln's *The Finger Lakes Region: Its Origin and Nature*, the Cayuga Lake basin is separated from the second major basin, Seneca Lake (west of Cayuga Lake), by both topography and soil type.

(d) The micro-climate of the proposed viticultural area is created by both Cayuga Lake and its adjacent hills. This is discussed in an article that appeared in the July 1986 issue of *Geographical Review*, entitled "Vines, Wines, and Regional Identity in the Finger Lakes Region." As mentioned in the article, due to the cold air drainage down the valley slopes in summer, and the release of heat stored in Cayuga Lake, the risk of an early frost is reduced. This results in an extended growing season on the slopes, from an average of 145 days for much of the Finger Lakes region, to between 165 and 170 days for the proposed viticultural area.

(e) The moderating effects of Cayuga Lake and its adjacent hills have resulted in the proposed viticultural area having an extended heat summation period, from 2,200–2,300 degree days for much of the Finger Lakes area, to 2,400–2,500 degree days for the proposed viticultural area.

Boundaries of the Area

The boundaries of the proposed Cayuga Lake viticultural area may be found on one United States Geological Survey (U.S.G.S.) map (Elmira, New York; Pennsylvania). The boundaries, as referred to in the petition, are described in § 9.123.

Regulatory Flexibility Act

The provisions of the Regulatory Flexibility Act relating to initial and final regulatory flexibility analysis (5 U.S.C. 603, 604) are not applicable to this notice of proposed rulemaking because the proposal is not expected (1) to have significant secondary or incidental effects on a substantial number of small entities; nor (2) to impose, nor otherwise cause, a significant increase in the reporting, recordkeeping, or other compliance burdens on a substantial number of small entities.

Accordingly, it is hereby certified under the provisions of section 3 of the Regulatory Flexibility Act (5 U.S.C. 605(b)), that this notice of proposed rulemaking, if promulgated as a final rule, will not have a significant economic impact nor compliance burden on a substantial number of small entities.

Executive Order 12291

It has been determined that this proposed rulemaking is not classified as a "major rule" within the meaning of Executive Order 12291, 49 FR 13193 (1981), because it will not have an annual effect on the economy of $100 million or more; it will not result in a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; and it will not have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of the United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Paperwork Reduction Act

Public Participation

ATF requests comments from all interested persons concerning this proposed viticultural area. This document proposes possible boundaries for the Cayuga Lake viticultural area. However, comments concerning other possible boundaries for this viticultural area will be given consideration.

Comments received on or before the closing date will be carefully considered. Comments received after that date will be given the same consideration if it is practical to do so, but assurance of consideration cannot be given except as to comments received on or before the closing date. ATF will not recognize any material in comments as confidential. Comments may be disclosed to the public. Any material which the commenter considers to be confidential or inappropriate for disclosure to the public should not be included in the comment. The name of the person submitting a comment is not exempt from disclosure. Any interested person who desires an opportunity to comment orally at a public hearing on these proposed regulations should submit his or her request, in writing, to the Director within the 30-day comment period. The Director, however, reserves the right to determine, in light of all circumstances, whether a public hearing will be held.

Drafting Information

The principal author of this document is James P. Ficaretta, FAA, Wine and Beer Branch, Bureau of Alcohol, Tobacco and Firearms.

List of Subjects in 27 CFR Part 9

Administrative practice and procedure, Viticultural areas, Consumer protection, and Wine.

Authority and Issuance

Accordingly, the Director proposes the amendment of 27 CFR Part 9 as follows:

PART 9—AMERICAN VITICULTURAL AREAS

Paragraph 1. The authority citation for Part 9 continues to read as follows:

Par. 2. The table of sections in 27 CFR Part 9, Subpart C, is amended to add the title of § 9.123 to read as follows:

Subpart C—Approved American Viticultural Areas

Sec. * * * * *

§ 9.123 Cayuga Lake.

Par. 3. Subpart C of 27 CFR Part 9 is amended by adding § 9.123 to read as follows:

§ 9.123 Cayuga Lake.

(a) Name. The name of the viticultural area described in this section is "Cayuga Lake."

(b) Approved map. The appropriate map for determining the boundaries of the Cayuga Lake viticultural area is one U.S.G.S. map scaled 1:250,000, titled "Elmira, New York; Pennsylvania," 1962 (revised 1978).

(c) Boundaries. The proposed Cayuga Lake viticultural area is located within the counties of Seneca, Tompkins, and Cayuga, in the State of New York, within the Finger Lakes viticultural area. The exact boundaries of the proposed area, based on landmarks and points of reference on the approved map, are as follows:

(1) Commencing at the intersection of State Route 90 with State Route 5 in Cayuga County, north of Cayuga Lake.

(2) Then south along State Route 90 to a point approximately one mile past the intersection of State Route 90 with State Route 326.

(3) Then south along the primary, all-weather, hard surface road, approximately ¾ mile, until it becomes State Route 90 again at Union Springs.

(4) Then south/southeast along State Route 90 until it intersects the light-duty, all-weather, hard or improved surface road,
DEPARTMENT OF THE INTERIOR

30 CFR Part 901

Abandoned Mine Land Reclamation Program Amendment; Alabama

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSMRE), Interior.

ACTION: Proposed rule.

SUMMARY: On June 15, 1987, the State of Alabama to OSMRE a proposed amendment to its Abandoned Mine Land Reclamation (AMLR) Plan (hereinafter referred to as the Alabama Plan) under the Surface Mining Control and Reclamation Act of 1977 (SMCRA).

The amendment pertains to minor adjustments in the Alabama policies and procedures regarding land acquisition, management, and disposal; reclamation on private land (liens and appraisals); and right-of-entry.

This notice sets forth the times and locations that the Alabama Plan and proposed changes will be available for public inspection, the comment period during which interested persons may submit written comments, and the procedure that will be followed regarding a public hearing.

DATES: OSMRE will accept written comments on the proposed rule until 4:00 p.m. on October 16, 1987. If requested, a public hearing on the proposed amendment is scheduled for 7:00 p.m. on October 13, 1987. Requests to present oral or written testimony at the hearing must be received before the close of business on October 1, 1987.

ADDRESSES: Written comments and requests to testify at the hearing should be mailed to: Robert A. Penn, Director, Birmingham Field Office, Office of Surface Mining Reclamation and Enforcement, 229 West Valley Avenue, Birmingham, Alabama 35209.

Copies of the Alabama Plan, the proposed changes to the plan, and the administrative record of the Alabama Plan are available for public review and copying at the OSMRE Offices and the State Abandoned Mine Lands Office located below, during normal business hours Monday through Friday excluding holidays. Each requestor may receive, free of charge, one copy of the proposed amendment by contacting the OSMRE Birmingham Field Office.

Alabama Department of Industrial Relations, Abandoned Mine Lands Program, 649 Monroe Street, Montgomery, Alabama 36130; Telephone: (205) 731-0953

OSMRE’s field office processing the amendment, Office of Surface Mining Reclamation and Enforcement, Birmingham Field Office, 228 West Valley Avenue, Room 302, Birmingham, Alabama 35209; Telephone: (205) 731-0953 Office of Surface Mining Reclamation and Enforcement, Administrative Records Office, 1100 L Street NW, Room 9131, Washington, DC 20240.

If a public hearing is held, its location will be at the Birmingham Field Office listed above, on the date listed under “DATES.”

FOR FURTHER INFORMATION CONTACT: Jean W. O’Dell, Acting AML Supervisor, Birmingham Field Office, (205) 731-0953.

SUPPLEMENTARY INFORMATION:

I. Background on the Alabama Program

Title IV of the SMCRA of 1977, Pub. L. 95-87, 30 U.S.C. 1302 et seq., establishes an AMLR program for the purposes of reclaiming and restoring lands and water resources adversely affected by past mining. This program is funded by a reclamation fee imposed upon the production of coal. Lands and waters eligible for reclamation are those that were mined or affected by mining and abandoned or left in an inadequate reclamation status prior to August 3, 1987, and for which there is no continuing reclamation responsibility under State or Federal law. Title IV provides that a State with an approved AMLR program has the responsibility and primary authority to implement the program.

The Secretary of the Interior approved the Alabama Plan on May 20, 1982. Information pertinent to the general background, revisions, and amendments to the initial plan submission, as well as the Secretary’s findings and the disposition of comments can be found in the May 20, 1982 Federal Register (47 FR 22062).

The Secretary has adopted regulations that specify the content requirements of a State reclamation plan and the criteria for plan approval (30 CFR Part 884). The regulations provide that a State may submit to the Director proposed amendments or revisions to the approved reclamation plan. If the amendments or revisions change the scope or major policies followed by the State in the conduct of its reclamation program, the Director must follow the procedures set out in 30 CFR 884.13 in approving or disapproving an amendment or revision.

II. Discussion of the Proposed Amendment

By letter dated June 15, 1987, Alabama submitted a reclamation plan amendment to OSMRE (Administrative Record No. AL-423). The proposed amendment consists of revised narratives to replace three sections of the approved Alabama Plan as provided for by 30 CFR 884.13. Minor editorial changes were made in the three sections to bring the Alabama Plan into line with OSMRE organizational changes. Specifically, the following areas of the plan are being revised.

1. Land Acquisition, Management, and Disposal (30 CFR Part 876): Alabama has submitted revised procedures and forms for conducting appraisals on lands to be acquired by the State under the AMLR Program. Other revised areas include tax encumbrances and final processing during release of mortgages, deeds, and judgments.

2. Reclamation on private lands (30 CFR Part 862): Alabama has submitted revised procedures and forms for
conducting appraisals on eligible abandoned mine lands (AML) and for considering lien potential, satisfaction, and release for properties being reclaimed under the AMLR program.

3. Rights of entry (30 CFR Part 677). Alabama is proposing to make minor changes to the procedures and forms utilized to obtain voluntary and nonconsensual rights of entry on AML lands.

OSMRE is seeking comments on the adequacy of the proposed Alabama amendment as set forth in 30 CFR 884.15. If approved, the amendment would become part of the Alabama Plan.

III. Public Comment Procedures

In accordance with the provisions of 30 CFR 732.17, OSMRE is now seeking comment on whether the amendment proposed by the State of Alabama satisfies the requirements of 30 CFR 732.15 for the approval of State program amendments. If the amendment is deemed adequate, it will become part of the Alabama Plan.

Written Comments

Written comments should be specific, pertain only to the issues proposed in this rulemaking, and include explanations in support of the commenter's recommendations. Comments received after the time indicated under "DATES" or at locations other than the Birmingham Field Office will not necessarily be considered in the final rulemaking or included in the Administrative Record.

Public Hearing

Persons wishing to comment at the public hearing should contact Robert A. Penn at the Birmingham Field Office by contacting Robert A. Penn at the address listed under "ADDRESSES." All such meetings will be open to the public and, if possible, notices of meetings will be posted in advance in the Administrative Record. A written summary of each public meeting will be made a part of the Administrative Record.

IV. Procedural Matters

2. Executive Order No. 12291 and the Regulatory Flexibility Act: On October 4, 1988, the Office of Management and Budget (OMB) granted OSMRE an exemption from section 3, 4, 7, and 8 of Executive Order 12291 for actions directly related to approval or disapproval of State reclamation plans or amendments. Therefore, this action is exempt from preparation of a Regulatory Impact Analysis and regulatory review by OMB.

The Department of the Interior had determined that this rule would not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.). No burden would be imposed upon entities operating in compliance with the Act.

3. Federal Paperwork Reduction Act: This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3507 et seq.

30 CFR Part 916

Public Comment Period and Opportunity for Public Hearing on an Amendment to the Kansas Permanent Regulatory Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSMRE), Interior.

ACTION: Proposed rule.

SUMMARY: OSMRE is announcing procedures for a public comment period and for a public hearing on the substantive adequacy of amendments submitted by the State of Kansas to amend its permanent regulatory program (hereinafter referred to as the Kansas Program) under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The proposed amendment consists of revisions to the Kansas regulatory program concerning the applicability of SMCRA to the extraction of coal incidental to the extraction of other minerals and the establishment of a schedule for contemporaneous reclamation.

This notice sets forth the times and locations that the proposed amendment is available for public inspection, the comment period during which interested persons may submit written comments on the proposed program amendment, and information pertinent to the public hearing.

DATES: Comments not received on or before 4:00 p.m. October 16, 1987, will not necessarily be considered. If requested, a public hearing on the proposed modifications will be held on October 13, 1987, beginning at 10:00 a.m. at the location shown below under "ADDRESSES".

ADDRESSES: Written comments should be mailed or hand delivered to: Office of Surface Mining Reclamation and Enforcement, Kansas City Field Office, 1103 Grand Avenue, Room 502, Kansas City, Missouri 64106.

If a public hearing is held, its location will be at: The Holiday Inn, 422 Monroe, Pittsburgh, Kansas 65701.

See "SUPPLEMENTARY INFORMATION" for addresses where copies of the Kansas program amendment and administrative record on the Kansas program are available. Each requestor may receive, free of charge, one single copy of the proposed program amendment by contacting the OSMRE Kansas City Field Office listed above.

FOR FURTHER INFORMATION CONTACT: Mr. William J. Kovacic, Director, Kansas City Field Office, Office of Surface Mining Reclamation and Enforcement, 1103 Grand Avenue, Room 502, Kansas City, Missouri 64106.
City, Missouri 64106; Telephone: (816) 374-5527.

SUPPLEMENTARY INFORMATION:

Availability of Copies

Copies of the Kansas program amendment, the Kansas program, and the administrative record on the Kansas program are available for public review and copying at the OSMRE offices and the office of the State regulatory authority listed below, Monday through Friday, 9:00 a.m. to 4:00 p.m., excluding holidays:

Kansas City Field Office, Office of Surface Mining Reclamation and Enforcement, 1103 Grand Avenue, Room 502, Kansas City, Missouri 64106; Telephone: (816) 374-5527.

Office of Surface Mining Reclamation and Enforcement, 1100 L Street NW., Room 5131, Washington, DC 20240; Telephone (202) 343-5447.

Kansa:s Mines Land Conservation and Reclamation Board, 107 W. 11th Street, P.O. Box 1416, Pittsburgh, Kansas 66762; Telephone: (316) 231-8540.

Written Comments

Written comments should be specific, pertain only to those issues proposed in this rulemaking, and include explanations in support of the comment recommendations. Comments received after the time indicated under "DATES" or at locations other than Kansas City, Missouri, will not necessarily be considered and included in the Administrative Record for this final rulemaking.

Public Hearing

Persons wishing to comment at a public hearing should contact the person listed under "FOR FURTHER INFORMATION CONTACT" by the close of business October 1, 1987. If no one requests to comment at a public hearing, the hearing will not be held.

If only one person requests to comment, a public meeting rather than a public hearing, may be held and the time of a hearing is requested and will be made a part of the Administrative Record.

Background

On February 26, 1980, the Secretary of the Interior received a proposed regulatory program from the State of Kansas. On January 21, 1981, following a review of the proposed program as outlined in 30 CFR Part 732, the Secretary conditionally approved the Kansas program (46 FR 5962).

Proposed Amendment

On August 5, 1987, the State of Kansas submitted to OSMRE an amendment to its approved permanent regulatory program. The amendment consists of proposed modifications to Kansas' regulations concerning the applicability of SMCPRA to the extraction of coal incidental to the extraction of other minerals and the establishment of a schedule for contemporaneous reclamation.

The proposed changes are summarized briefly below.

Incidental Extraction of Coal

1. Kansas proposes to revise its statute at Kansas Statutes Annotated [K.S.A.] 49-431 to include the activity of incidental extraction of coal as not being applicable to the Kansas Mined-Land Conservation and Reclamation Act. Specifically it defines this activity as "the extraction of coal incidental to the extraction of other minerals where coal does not exceed 16% percent of the tonnage of minerals removed for purpose of commercial use or sale".

2. Kansas proposes to amend its regulations at Kansas Administrative Regulations [K.A.R.] 47-9-1, incorporating by reference 30 CFR 816.102 to include a definition of backfilling and grading. This action places into the regulations the definitions that had been the formal policy of the Kansas Mined-Land Conservation and Reclamation Board (MLCRB). The definition reads "Absent any regulatory authority approved schedule, backfilling and grading will be completed within 180 days following coal removal and shall not be more than four (4) spoil ridges behind the pit being worked, the spoil from the active pit being considered the first ridge".

3. Kansas proposes to amend its regulations at K.A.R. 47-9-1, incorporating by reference 30 CFR 816.102 to include a definition of topsoil redistribution. This action places into the regulations the definition that had been the formal policy of the MLCRB. The definition reads "Absent any regulatory authority approved schedule for soil material distribution, topsoil material removed under paragraph (1) of this section shall be redistributed within 120 days following rough backfilling and grading in a manner that—".

Additional Determinations

1. Compliance with the National Environmental Policy Act. The Secretary has determined that, pursuant to section 702(d) of SMCPRA, 30 U.S.C. 1292(d), no environmental impact statement need be prepared on this rulemaking.

2. Executive Order No. 12291 and the Regulatory Flexibility Act. On August 28, 1981, the Office of Management and Budget (OMB) granted OSMRE an exemption from sections 6, 7, and 8 of Executive Order 12291 for action directly related to approval or conditional approval of State regulatory programs. Therefore, for this action OSMRE is exempt from the requirement to prepare a Regulatory Impact Analysis, and this action does not require regulatory review by OMB.
The Department of the Interior has determined that this rule would not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.). This rule would not impose any new requirements; rather, it would ensure that existing requirements established by SMCRA and the Federal rules would be met by the State.

3. Paperwork Reduction Act. This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3507.

List of Subjects in 30 CFR Part 916

If a public hearing is held, its location will be: The Harley Hotel, 2143 North Broadway, Lexington, Kentucky 40505.

FOR FURTHER INFORMATION CONTACT:
Mr. W. Hord Tipton, Director, Lexington Field Office, Office of Surface Mining Reclamation and Enforcement, 340 Legion Drive, Suite 28, Lexington, Kentucky 40504; Telephone: (606) 233-7327.

SUPPLEMENTARY INFORMATION:
I. Background
On December 30, 1981, Kentucky resubmitted its proposed regulatory program to OSMRE. On April 13, 1982, following a review of the proposed program as outlined in 30 CFR Part 732, the Secretary approved the program subject to the correction of 12 minor deficiencies. The approval was effective upon publication of the notice of conditional approval in the May 18, 1982, Federal Register.

II. Submission of Amendment
On August 4, 1987, [Administrative Record No. KY-751], Kentucky resubmitted to OSMRE, pursuant to 30 CFR 732.17, certain revisions to the Kentucky regulatory program. The revisions are intended to implement Kentucky Senate Bill No. 374 that was approved by the Director, OSMRE, on July 13, 1986 (51 FR 26002). The proposed rules are intended to address the requirement at 30 CFR 917.16 (c)(2) which states that Kentucky is required, prior to implementation of Senate Bill No. 374, to submit to the Director proposed regulations to implement the bill and to receive the Director's approval of the regulations. On July 29, 1986, Kentucky submitted regulations to implement Senate Bill No. 374 [Administrative Record No. 717] and on November 26, 1986, OSMRE announced that the regulations to implement Senate Bill No. 374 were withdrawn by Kentucky (51 FR 42267).

The revisions modify sections of the Kentucky Administrative Regulations (KAR) at 405 KAR 8:060, 405 KAR 20:090, 405 KAR 8:010, 405 KAR 12:020, and 405 KAR 16:020, and are summarized briefly below.

1. Kentucky proposes to add a new regulation 405 KAR 8:060, to set forth permitting requirements for special reclamation of abandoned mine lands. The rule would include sections for applicability (all applications for permits to conduct special reclamation of abandoned mine lands); definitions;
general provisions; legal financial and compliance information; environmental resources information; maps, drawings and cross-sections; mining and reclamation plan; and performance bond. A special reclamation of abandoned mine lands permit is for remining of previously mined lands and secondary coal recovery operations.

2. Kentucky proposes to add a new regulation, 405 KAR 20:000, to establish performance standards to apply to a special reclamation of abandoned mine lands permit. The applicability section of the rule proposes that requirements of 405 KAR Chapters 16, 18 and 20 (the approved program performance standards for surface mines, underground mines and special categories) would not apply to such lands except as specifically stated in the rule. The rule would establish separate hydrologic protection requirements, requirements for backfilling and grading, and revegetation standards for a special reclamation of abandoned mine lands permit.

3. Kentucky proposes to modify 405 KAR 8:010, section 4, to: (1) require an inspector from the Division of Abandoned Lands and an inspector from the Division of Field Services to make a written determination that the proposed site meets special reclamation conditions, and, (2) assure that preliminary applications will contain sufficient information to qualify the lands. Kentucky modified 405 KAR 8:019, section 5(1)(c) to include reference to 405 KAR 6:090 special reclamation of abandoned mine lands permit.

4. Kentucky proposes to add 405 KAR 12:020, section 3(4)(d), to require enforcement of order for cessation and immediate compliance on a special reclamation of abandoned mine lands permit to effect only that permit.

5. Kentucky proposes to modify 405 KAR 16:020, section 2(7) to permit the Cabinet to waive the time criteria for backfilling and grading of secondary coal recovery operations.

The Director is seeking public comment on the adequacy of the proposed program amendment. Comments should specifically address the issues of whether the proposed amendment is in accordance with SMCRA and no less effective than its implementing regulations.

III. Public Comment Procedures

In accordance with the provisions of 30 CFR 732.17, OSMRE is now seeking comment on whether the amendment proposed by Kentucky satisfies the requirements of 30 CFR 732.15 for the approval of State program amendments. If the amendment is deemed adequate, it will become part of the Kentucky program.

Written Comments

Written comments should be specific, pertain only to the issues proposed in this rulemaking, and include explanations in support of the commenters' recommendations. Comments received after the time indicated under "DATES" or at locations other than the Lexington Field Office, Lexington, Kentucky, will not necessarily be considered in the final rulemaking or included in the Administrative Record.

Public Hearing

Persons wishing to comment at the public hearing contact the person listed under "FOR FURTHER INFORMATION CONTACT" by the close of business on October 1, 1987. If no one requests an opportunity to comment at a public hearing, the hearing will not be held.

Filing of a written statement at the time of the hearing is requested as it will greatly assist the transcriber. Submission of written statements in advance of the hearing will allow OSMRE officials to prepare adequate responses and appropriate questions.

The public hearing will continue on the specified date until all persons scheduled to comment have been heard. Persons in the audience who have not been scheduled to comment and who wish to do so will be heard following those scheduled. The hearing will end after all persons scheduled to comment and persons present in the audience who wish to comment have been heard.

If only one person requests an opportunity to comment at a hearing, a public meeting, rather than a public hearing, may be held. A summary of the meeting will be included in the Administrative Record.

Public Meeting

Persons wishing to meet with OSMRE representatives to discuss the proposed amendment may request a meeting at the OSMRE, Lexington Field Office listed under "ADDRESS" by contacting the person listed under "FOR FURTHER INFORMATION CONTACT." All such meetings will be open to the public, and, if possible, notices of meetings will be posted in advance in the Administrative Record. A written summary of each public meeting will be made a part of the Administrative Record.

IV. Procedural Determinations

1. Compliance with the National Environmental Policy Act: The Secretary had determined that, pursuant to section 702(d) of SMCRA, 30 U.S.C. 1292(d), no environmental impact statement need be prepared on this rulemaking.

2. Executive Order No. 12291 and the Regulatory Flexibility Act: On August 28, 1981, the Office of Management and Budget (OMB) granted OSMRE in exemption from sections 3, 4, 7, and 8 of Executive Order 12291 for actions directly related to approval or conditional approval of State regulatory programs. Therefore, this action is exempt from preparation of a Regulatory Impact Analysis and regulatory review by OMB. The Department of the Interior has determined that this rule would not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.). This rule would not impose any new requirements; rather, it would ensure that existing requirements established by SMCRA and the Federal rules will be met by the State.

3. Paperwork Reduction Act: The rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3507.

Coast Guard

33 CFR Part 162

[CGD8-87-09]

Inland Waterways Navigation Regulations—Lower Mississippi River Between Miles 310.0 AHP and Mile 340.0 AHP

AGENCY: Coast Guard, DOT.

SUMMARY: The Coast Guard is considering amending its regulations. Title 33 Part 162.80(a) by extending the lower limit of the regulated area from mile 314.5, AHP to mile 310.0, AHP. The Old River Control Structure and the New Auxiliary Old River Control Structure control the distribution of water between the Mississippi River, Red River, and the Atchafalaya River.
Recent completion of the New Auxiliary Control Structure necessitates extending the area where vessel mooring is prohibited. The extension of the lower limit will assist in protecting the navigation and municipal/industrial water supplies.

DATE: Comments must be received on or before November 2, 1987.

ADDRESSES: Comments should be mailed to U.S. Coast Guard Captain of the Port, 4640 Urquhart Street, New Orleans, LA 70117-4698. The comments and other materials referenced in this notice will be available for inspection and copying at Captain of the Port Office, Room A-305. Normal office hours are between 7:00 a.m. and 3:30 p.m. Monday through Friday, except holidays. Comments may also be hand-delivered to this address.

FOR FURTHER INFORMATION CONTACT: LTJG Patrick J. Calvin, Waterway Safety Officer, C/O U.S. Coast Guard Captain of the Port, 4640 Urquhart Street, New Orleans, LA 70117-4698, Telephone: (504) 589-7127.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in this rulemaking by submitting written views, data or arguments. Persons submitting comments should include their names and addresses. Identify this notice CGD8-87-09, the specific section of the proposal to which their comments apply, and give reasons for each comment.

The regulations may be changed in light of comments received. All comments received before the expiration of the comment period will be considered before the final action is taken on this proposal. No public hearing is planned, but one may be held if written requests for a hearing are received and it is determined that the opportunity to make oral presentations will aid the rulemaking process.

Drafting Information

The drafters of this regulation are LTJG Patrick J. Calvin, Project Officer for the Captain of the Port, and LCDR James J. Vallone, Project Attorney, Eighth Coast Guard District Legal Office.

Discussion of Regulation

The Old River Control Structure located at Mile 314.5 RDB, AHP, LMR, completed in October 1983 was built to control the distribution of water between the Mississippi River and the Atchafalaya River. The New Auxiliary Old River Control Structure located at Mile 311.2 RDB, AHP, LMR, completed March 1987, was built to reduce the flow through the Old River Structure thereby reducing the undermining of the Old River Control Structure. Completion of the New Auxiliary Control Structure necessitates extending the area where vessel mooring is prohibited. The regulation will assist in protecting the structures, thus preventing interruption of flow control with serious downstream ramifications for flood control, navigation and municipal/industrial water supplies.

Economic Assessment and Certification:

These proposed regulations are considered to be non major under Executive Order 12291 on Federal Regulation and nonsignificant under Department of Transportation regulatory policies and procedures (44 FR 11034; February 26, 1979). The economic impact of this proposal is expected to be so minimal that a full regulatory evaluation is unnecessary. The only affect of the proposed regulation is to restrict vessels from mooring in an area upriver from the Old River Control Structure and the New Old River Auxiliary Control Structure. This will not impede normal navigation.

Since the impact of this proposal is expected to be minimal, the Coast Guard certifies that, if adopted, it will not have a significant economic impact on a substantial number of small entities.

List of Subjects in 33 CFR Part 162

Harbors, Marine safety, Navigation (water), Security measures, Vessels, Waterways.

Proposed Regulation

In consideration of the foregoing, the Coast Guard proposes to amend Part 162 of Title 33, Code of Federal Regulations as follows:

1. The authority citation for Part 162 continues to read as follows:

Authority: 33 USC 1225 and 1231; 50 USC 191; 49 CFR 1.46 and 33 CFR 1.05-1(g); 6.04-1, 6.04-6, and 160.5.

2. Section 162.20(a) is revised to read as follows:

§ 162.20 Mississipi River below mouth of Ohio River, Including South and Southwest Passes.

(a) Mooring on Mississippi River between miles 310.0 AHP and 340.0 AHP. (1) No vessel or craft shall moor along either bank of the Mississippi River between mile 310.0 AHP and Mile 340.0 AHP except in case of an emergency, pursuant to an approved navigation permit, or as authorized by the District Commander. Vessels may be moored any place outside the navigation channel in this reach in case of an emergency and then for only the minimum time required to terminate the emergency. When so moored, all vessels shall be securely tied with bow and stern lines of sufficient strength and fastenings to withstand currents, winds, wave action, suction from passing vessels or any other forces which might cause the vessels to break their moorings. When vessels are so moored, a guard shall be on board at all times to insure that proper signals are displayed and that the vessels are securely and adequately moored.

(2) Vessels may be moored any time at facilities constructed in accordance with an approved navigation permit or as authorized by the District Commander. When so moored, each vessel shall have sufficient fastenings to prevent the vessels from breaking loose by wind, current, wave action, suction from passing vessels or any other forces which might cause the vessels to break their mooring. Number of vessels in one fleet and the width of the fleet of vessels tied abreast shall not extend into the fairway or be greater than allowed under the permit.

(3) Mariners should report immediately by radio or fastest available means to the lockmaster at Old River Lock or to any Government patrol or survey boat in the vicinity any emergency mooring or vessels drifting uncontrolled within the area described in paragraph (a)(1) of this section. It is the responsibility and duty of the master of a towing vessel releasing or mooring a vessel in this reach of the Mississippi River to report such action immediately.

BILLING CODE 4910-14-M

DEPARTMENT OF DEFENSE

Corps of Engineers, Department of the Army

33 CFR Part 241

Flood Control Cost-Sharing Requirements Under the Ability To Pay Provision

AGENCY: U.S. Army Corps of Engineers, DoD

ACTION: Proposed rule.
SUMMARY: This document presents a proposed rule partially implementing section 103(m) of Pub. L. 99–662, which directs the Secretary of the Army to reduce the non-Federal cost-share of flood control and agricultural water supply projects under an “ability to pay” determination. This proposed rule applies only to flood control projects. Agricultural water supply projects will be covered by other guidelines which will be published in the future.

The ability to pay calculation is a two step procedure. In step one, an alternative level of cost-sharing is determined by comparing project flood control benefits to project flood control costs. It is assumed that even the poorest communities and states should have the ability to afford a cost-share equal to one fourth of the benefit/cost ratio, when expressed as a percentage. If this calculation yields an alternative non-Federal cost-share that exceeds the normal share (as defined in section 103), the Non-Federal interest will be required to provide the normal share.

If the benefits-based share alternative is less than the normal share, the project sponsor may be eligible to contribute the amount required by the lower share, or to provide a share that is between the two values. Eligibility will be determined by a formula that uses per capita personal income of the state(s) and county(ies) in which the project is located. If the state and county per capita income values are low enough, the project will be eligible for the full reduction. Intermediate values of state and county per capita income values must yield a partial reduction from the normal cost-share to the benefits-based alternative. High values of state and county income result in no reduction from the normal share.

The proposed rule also covers other subjects which are relevant to the ability to pay test. These details are discussed in the supplementary information that follows.

DATE: Before adopting the proposed rule as a final rule, the Corps of Engineers will give consideration to any written comments timely submitted. Written comments must be received by December 15, 1987.

FOR FURTHER INFORMATION CONTACT: Dr. Robert N. Stearns, (202) 272–0120.

SUPPLEMENTARY INFORMATION: Background

The language of section 103(m) is broad: “Any cost-sharing agreement under this section for flood control or agricultural water supply shall be subject to the ability of a non-Federal interest to pay. The ability of any non-Federal interest to pay shall be determined by the Secretary in accordance with procedures established by the Secretary.” There is no definite Congressional direction on how the Secretary is to proceed.

The Report of the Senate Committee on Environment and Public Works (Senate Report 99–128, Aug. 1, 1986) briefly discusses section 103(m). The first reference (p. 6) gives examples of the kinds of factors which should be included in the ability to pay criteria: income in relation to need, unemployment, and the sponsor’s ability to borrow funds. The second reference (p. 69) stresses that beneficial projects should not be rejected simply because non-Federal interests lack the necessary resources, but points out that since the normal cost-sharing provisions under section 103 should not prove burdensome, ability to pay determinations reducing the non-Federal share are quite unlikely.

The debate over section 103(m) provides some insight as to Congressional intent. Senator Moynihan, on March 4, 1986, stated that floods could hit and devastate communities “which are small and could not possibly themselves take care of the cost sharing that is provided under the basic schedule.” (pp. S2858–S2859) Senator Pryor on March 26, 1986, expressed his concern that “in the rural areas, there are fewer benefited parties to make up the local sponsor group, and the amount they would have to tax themselves to pay 25 to 35 percent of construction costs are onerous.” (p. S3401) The debate also shows that there is no clear consensus on precisely how the section is to operate. Congressman Roe, in describing the conference agreement on Oct. 17, 1986, expressed his view that the Secretary should be encouraged “to use this discretionary authority to continue to provide new flood control protection at reduced or no non-Federal cost-sharing in areas where need exists but ability to pay does not.” (p. H11546) On the other hand Senator Stafford, Chairman of the Senate Committee on Environment and Public Works argued that, “It is anticipated that the Secretary will only rarely invoke this authority. And this provision can never be used to eliminate the non-Federal share.” (p. S16963) Senator Stafford also argued, “This bill now says local communities, must, in general pay 25 cents to get at least $1 in benefits, sometimes much more than $1 in benefits. Even the poorest communities should be able to find a quarter to invest in order to get $1 or more in return.” (p. S19983)

The Role of the Local Sponsor

In developing the ability to pay guidelines, we have had to address the issue that different states have different policies with respect to the degree of state involvement in sponsoring flood control projects and providing financial support. We believe that the guidelines should be “policy neutral” in relation to the selection of the local sponsor. Thus, states where sponsors are agencies of state governments will not be treated differently than states where sponsors may be much smaller governmental units such as cities or towns.

While our goal is to be policy neutral with respect to the selection of the local sponsor, we will not be neutral with respect to the possibility of state assistance when local sponsors have limited financial capability. We believe that states have a responsibility in cases where a local sponsor seems incapable of providing the non-Federal share. This has led to two conclusions which have been incorporated into our proposed guidelines.

Our first conclusion is that state resources as well as project area resources should be a factor in determining any adjustments to the normal cost-share. This will be evident in the formulas described below.

Our second conclusion is that project size should not be a separate consideration. Larger projects must generate larger benefits, and therefore, affect a larger segment of the population, if they have met the economic feasibility test for Federal funding. More importantly, when compared to state budgets, every project becomes a small percentage of total capital expenditures.

The Use of Project Benefits in Developing a Cost-Share Alternative

Local sponsors and their states have two sources of economic resources that can be used to pay for the non-Federal share of the project. First, existing resources as reflected in traditional measures of income and/or wealth, may be sufficient. Second, the project itself will generate benefits. Many of the benefits to flood control projects are either due to flood damage reduction or to income enhancement to households and businesses located in the project area. These benefits represent an important source of income and wealth that will be available for project funding no matter how poor the project area is before implementation.
We believe that project benefits should determine the alternative level of cost-sharing under the ability to pay test. This alternative level establishes a benefit to cost ratio (BBF) from which the minimum level of non-Federal cost-sharing should be derived. Therefore, when a project's benefit/cost ratio is below the BBF, cost-sharing under the ability to pay test should determine the alternative level of cost-sharing. This ratio should be calculated as one fourth of the project's benefit/cost ratio, when this ratio is expressed as a percentage. For example, if a project has a benefit/cost ratio of 1.2, share reductions cannot bring the share below one fourth of this, or 30 percent of project first costs. In this example, if the "normal" level of cost-sharing, i.e., the amount required by section 103(a) or 103(b), is less than 30 percent, there will be no reduction under the ability to pay provision.

The selection of the factor of one fourth, or 25 percent, is based on the minimum level of non-Federal cost-sharing for flood control projects specified in sections 103(a) and 103(b). The position is the equivalent to that expressed by Senator Stafford "[e]ven the poorest communities should be able to find a quarter to invest in order to get $1 or more in return." (see Background section above). It is expected that the reductions in cost-sharing will occur most often when normal non-Federal costs are closer to the 50 percent maximum than to the 25 percent minimum. Congress may occasionally authorize projects which have a benefit cost ratio below one. The determination of alternative levels of cost-sharing under the ability to pay test should apply in these cases, despite the low ratio. These projects will not generate the same level of economic resources (compared to project costs) as economically justifiable projects, and project beneficiaries will not have the same ability to pay from this source. Under no circumstances, however, do we believe that the non-Federal share should be less than the five percent minimum payment of section 103(a)(1)(A), Pub. L. 99-662.

Operations and maintenance (O&M) expenses of flood control projects have traditionally been the responsibility of a non-Federal interest. We do not propose to change this; any reductions in non-Federal shares under the ability to pay provision will apply to first costs only. For administrative simplicity, we have proposed to use one fourth of the benefit cost ratio as an alternative share, even though the cost of living adjustment in this calculation may not be necessary. When current housing value is given a smaller weight in the calculation, project benefits are more accurately determined. This is the case in projects for the very poor who must pay. Cost of living adjustments will be provided by the private sector in other locations. In some cases, a community may be unable to raise additional capital because its citizens are simply unwilling to vote for the tax increases that might be required. We conclude therefore, that the borrowing capability of the local sponsor should not be a factor in the ability to pay determination.

We should note two exceptions: Alaska and Hawaii. Even when current housing value is given less weight in calculations for these two states, their relative costs of living are far higher than the rest of the country. This finding is consistent with that of the Office of Personal Management, which conducts surveys to determine the salary levels of Federal employees in Alaska and Hawaii which would compensate the employees for the higher prices they must pay. Cost of living adjustments will therefore be made for Alaska and Hawaii, based on the Federal Government's salary differentials in those two states for Federal employees living in non-Federal housing without Federal Commissary provisions. Pay differentials may be different for various regions in Alaska and Hawaii. For administrative simplicity, the differentials for the two most populated regions will be used: Anchorage AK (a 25 percent pay differential in 1986), and Oahu HI (a 22.5 percent differential in 1986). Information on the salary differentials for the period 1982-86 is available in PPM Bulletins 591-30, 591-31, and 591-32.

Unemployment, the second factor mentioned in the Committee report, tends to be lower in areas where per capita personal income is higher. For example, using state information for 1985, the correlation coefficient between these variables was .47, a value which is significantly different from zero statistically. Moreover, since ability to pay is more a function of the level of income than the distribution of income, PCI is preferred over a measure of unemployment.

The third factor set out in the Committee Report is the sponsor's borrowing capability. We have carefully considered how best to incorporate this factor in our calculations. We conclude that such an incorporation is inappropriate. Borrowing capability as measured for example by an entity's credit rating, will reflect a number of factors including but not limited to the underlying economic resource base. Local governments may have committed themselves to providing public services which are either discretionary or are provided by the private sector in other locations. In some cases, a community may be unable to raise additional capital because its citizens are simply unwilling to vote for the tax increases that might be required. We conclude therefore, that the borrowing capability of the local sponsor should not be a factor in the ability to pay determination.
The interim final rule will use a three year average of PCI. Although this will create lags in recognizing when an area has had a deterioration or improvement in its economic circumstances, it also reduces the likelihood that findings will be based on temporary circumstances. Other Federal programs are based on a three year average.

All U.S. Territories will be eligible for the full amount of cost-share reduction. Unpublished data from the Bureau of Economic Analysis indicates that in 1985, per capital personal income in the territories ranged from 66 percent of the U.S. average (GUAM) to 25 percent of the U.S. average (American Samoa).

The Eligibility Formula

The eligibility factor (EF) will be determined by:

\[ EF = a - b_1 \times (\text{State PCI Index}) - b_2 \times (\text{County PCI index}) \]

where \( a, b_1, \) and \( b_2 \) are positive constants. The county and state PCI indices are a measure of the local PCI relative to the national average. If per capita income in a state equals the national average, the state's index number would be 100. If a project includes beneficiaries in more than one county, the county PCI index will be a combined PCI index, where each county PCI index is weighted by the share of project benefits which can be located geographically. If \( EF \) is less than zero, the project is not eligible for cost-share reductions under the ability to pay test. If \( EF \) is greater than or equal to one, the project is eligible for full application of the benefits based cost-share alternative described above. For \( EF \) less than one but greater than zero, the value represents the degree of application for which the project is eligible. For example if the normal cost-share is 50 percent and the minimum cost-share under the ability to pay formula is 30 percent and \( EF = .6 \), the project will receive 60 percent of the difference between 50 percent and 30 percent. The cost-share in this example would be 38 percent (50% - 40% = 10%)

The formula reflects our view that Federal interests are free to identify the local sponsor without regard to the effect this might have on the ability to pay benefits.

In selecting the parameters \( a, b_1, \) and \( b_2 \) we have had two objectives. First, in order to encourage state participation where necessary, we have given equal weights to state and county PCI, that is \( b_1 \) and \( b_2 \) have been set equal to each other (they are kept separate in the formula, so that the weights may be changed, if appropriate, after comments are considered). Second, we have been guided by our sense of the intent of Congress that the ability to pay provision should only apply in exceptional circumstances. The formula has therefore been constructed so that two-thirds of the counties would not be eligible: 20 percent of the counties would be eligible for the full application and the remaining 13½ percent would be eligible for a partial application.

Available county PCI data lag behind available state PCI data. Currently, county information is available through 1984, state information through 1986. The interim guidelines require the use of the three latest years even if these years are different for counties and states. We believe that this represents the most up to date economic profile of a project area which can be applied uniformly to all projects.

Other Factors

We have retained the five percent minimum cost-share level of section 103(a)(1)(A) even for programs where the ability to pay test leads to a reduction in the non-Federal cost-share. This requirement is intended to demonstrate that the non-Federal interest has a serious commitment to the project. Congress did not want to cash requirement changed when the normal cost-share level was at the maximum of 50 percent (see section 103(a)(3)) nor did it want the requirement waived when the non-Federal interest chooses to make a deferred payment (see section 103(a)(4)). By keeping the 5 percent cash requirement under the ability to pay provision, it may be necessary to negotiate cash repayments to the local sponsor at the end of the project, or to make Federal payments for Lands, Easements, Rights of Way, Relocations, and Dredge Material Disposal Areas (LERRD) that are normally the responsibility of the non-Federal interest.

The interim final rule also contains a provision allowing the non-Federal interest to waive application of the ability to pay test. This might be most advantageous when project benefits have not been fully enumerated before authorization or when additional research is necessary to separate flood control benefits and costs from total costs of a multi-purpose project. In these cases, local sponsors may want to accept the normal cost-share so that implementation of the project will not be delayed.

E.O. 12291 and Regulatory Flexibility Act

This rule is not a major rule within the meaning of Executive Order 12291, because it is not likely to result in: (1) An annual effect on the economy of $100 million or more; (2) a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of the United States based enterprises to compete with foreign based enterprises in domestic or export markets.

Pursuant to 5 U.S.C. 605(b) I hereby certify that this rule will not have a significant economic impact on a substantial number of small entities because it imposes few, if any, administrative burdens of any sort on small entities.

Furthermore, the number of entities affected by this rule is small and the relief granted in individual cases, though significant to the parties involved, is not significant within the meaning of the Regulatory Flexibility Act.

List of Subjects in 33 CFR Part 241

Community facilities, Flood control, Intergovernmental relations, Water resources.

Peter J. Cahill,
Colonel, GS, Executive, OASA (CW).

The Corps of Engineers proposes to establish a new Part 241 in Title 33, Chapter II as follows:

PART 241—FLOOD CONTROL COST-SHARING REQUIREMENTS UNDER THE ABILITY TO PAY PROVISION—SECTION 103(m) OF PUB. L. 99-662

Sec. 241.1 Purpose
241.2 Applicability
241.3 References
241.4 General Policy
241.5 Procedures for Estimating the Alternative Cost-share
241.6 Application of Test
Appendix B—County Per Capita Personal Income Index Numbers

§241.1 Purpose.
This regulation gives general instructions on the implementation of section 103(m) of Pub. L. 99–662 as it applies to flood control projects.

§241.2 Applicability.
This regulation applies to all HQUSACE elements and field operating agencies of the Corps of Engineers having Civil Works responsibilities.

§241.3 References.
(b) U.S. Water Resources Council, Economic and Environmental Principles and Guidelines for Water and Related Land Resources Implementation Studies, March 10, 1983.

§241.4 General policy.
(a) Procedures described herein will be used to establish an “ability to pay” test which will be applied to all flood control projects. As a result of the application of the test, some projects will be cost-shared by the Non-Federal interest at a lower level than the non-Federal share would be normally under the provisions of section 103 of Pub. L. 99–662.
(b) The ability to pay test shall be conducted independently of any analysis of a project sponsor’s ability to finance its ultimate share of proposed project costs. The test shall not be used to affect project scope, or to change budgetary priorities among projects competing for scarce Federal funds.
(c) Since the normal non-Federal cost-share is substantially less than full costs in every case, the ability to pay test should be structured so that reductions in the level of cost-sharing will be granted in only a limited number of cases of severe economic hardship.
(d) Any reductions in the level of non-Federal cost-sharing as a result of the application of this test will be applied to construction costs only. The non-Federal interests will continue to be responsible for the cost of operations, maintenance and rehabilitation.

§241.5 Procedures for estimating the alternative cost-share.
(a) Step one. Determine the maximum reduction in the level of non-Federal cost-sharing for qualifying projects.
(1) Calculate the ratio of flood control benefits (developed using the Water Resources Council’s Principles and Guidelines—ref. b) to flood control costs for the authorized project based on the discount rate which the Corps is currently using to evaluate projects. Costs include operations and maintenance as well as first costs.
(2) If the ratio determined in §241.5(a)(1), when expressed as a percentage, is less than the level of cost-sharing that would normally be required by section 103(a) or 103(b), Pub. L. 99–662, the normal level of cost-sharing will apply.
(b) Step two. Determine project eligibility. Projects may qualify for the full amount of the reduction in cost-sharing calculated in Step one, or for some fraction of the reduction in cost-sharing, depending on a measure of the economic resources of the project area and of the state or states in which the project is located.
(1) For each of the three latest calendar years for which information is available, determine the level of per capita personal income in the state or states in which the project sponsors are located, and compare this to the national average of per capita personal income. Source: Dept of Commerce, Bureau of Economic Analysis as presented in the Survey of Current Business. For Alaska and Hawaii only, divide the per capita personal income figure by one plus the percentage used in the Federal Government’s cost of living pay differential for Federal workers who purchase local retail and who use private housing, employed in Anchorage AK and Oahu HI (see References §§ 241.5(c) and 241.3(d)).
(2) For each of the three latest calendar years for which information is available, determine the level of per capita personal income in the county or counties where project benefits accrue (the "project area"), and compare this to the national average of per capita personal income. Source: Reference § 241.3(c). For Alaska and Hawaii only, divide the per capita personal income figure by one plus the percentage used in the Federal Government’s cost of living pay differential for Federal workers who purchase local retail and who use private housing, employed in Anchorage AK and Oahu HI (see References §§ 241.5(c) and 241.3(d)).
(3) To assure consistency, the calculations in (1) and (2) will be performed by HQUSACE and distributed to all field elements. This information is included in Appendices A and B.
and B to this document. In subsequent years the information will be included in the Corps’ Reference Handbook. Ref. § 241.3(g) which is updated annually.

(4) When the project area includes more than one county, calculate a composite project area index by taking a weighted average of the county index numbers, the weights being equal to the relative levels of benefits received in each county.

(5) Calculate an “eligibility factor” for the project according to the following formula:

$$EF = a - b_X \times (\text{state factor}) - b_Y \times (\text{area factor})$$

If EF is one or more, the project is eligible for the full reduction in cost-share to the benefits based floor. If EF is zero or less, the project is not eligible for a reduction. If EF is between zero and one, the non-Federal cost-share will be reduced proportionately to an amount which is greater than the BBF but less than the normal non-Federal cost-share. See § 241.5(c) below. The values of a, b, and c will be determined by HQUSACE. The parameter values will be based on the latest available data and set so that 20 percent of counties have an EF of 1.0 or more, while 60.7 percent have an EF of O or less. These values will be adjusted periodically as new information becomes available. Changes will be published in the Corps’ Reference Handbook. The values as of July 1, 1987 are:

\[
\begin{align*}
a &= 34.45646 \\
b &= 0.08858 \\
c &= 0.08858 \\
\end{align*}
\]

Note that currently, b, and c are equal, giving the same weight to state and local income levels.

(6) For Puerto Rico, Guam and other U.S. territories the eligibility factor is administratively established to be equal to 1.

(c) Application of the Ability to Pay Formula to the Basic Cost-sharing Provisions of Section 103. If a flood control project has a BBF which is less than the normal cost-share and an EF which is greater than zero, the non-Federal cost-share will be reduced. The actual reduction is determined by applying the ability to pay formula to the basic flood control cost-sharing provisions of section 103 Pub. L. 93-662 as follows:

\[
\begin{align*}
\text{cost-share} &= (\text{LERRD} + 5) - EF \times (\text{BBF} + 5) \\
\end{align*}
\]

(1) when EF = 1:

\[
\begin{align*}
\text{cost-share} &= \text{BBF} \\
\end{align*}
\]

(2) when EF < 1, for structural projects covered by section 103(a):

(a) if LERRD equals or exceeds 45 percent:

\[
\begin{align*}
\text{cost-share} &= 50 - EF \times (50 - \text{BBF}) \\
\end{align*}
\]

(b) if LERRD exceeds 20 percent but is less than 45 percent:

\[
\begin{align*}
\text{cost-share} &= (\text{LERRD} + 5) - EF \times (\text{LERRD} + 5) - \text{BBF} \\
\end{align*}
\]

(3) If LERRD is less than 20 percent:

\[
\begin{align*}
\text{cost-share} &= 25 - EF \times (25 - \text{BBF}) \\
\end{align*}
\]

(4) If no case can the non-Federal share be less than five percent.

Note. LERRD equals the costs of lands, easements, right-of-way, relocation, and dredged material disposal areas.

(§ 241.6 Application of test.

(a) A preliminary ability to pay test will be applied during the study phase of any proposed project. If the ability to pay cost-share is lower than the share that would normally apply, the revised estimated cost-share will be used for budgetary and other planning purposes.

(b) The official application of the ability to pay test will be made at the time the Local Cooperation Agreement (LCA) between the Corps of Engineers and the Non-Federal interest is signed. For structural flood control projects, the normal level of cost-sharing will not be known until the end of the project (since the normal level as specified in section 103(a) includes LERRD). In this case, if the Eligibility Factor is greater than zero but less than one, the ability to pay non-Federal share will be determined using estimated costs. For all projects, the LCA will include a clause indicating the results of the ability to pay test. If a project is eligible for a lower non-Federal share, the revised share will be specified (there will be no recalculation of this share once the LCA is signed). If at the time of project completion, the normal non-Federal share based on actual costs, is less than the ability to pay share specified in the LCA, the normal share will apply. For all projects, an exhibit attached to the LCA will include: The benefits based floor (BBF) determined in Step one above; the eligibility factor (EF) determined in Step two above; if the Eligibility Factor is greater than zero and less than one, the estimated normal non-Federal share and the formula used in determining the ability to pay share as described in §§ 241.5(c)(1) and 241.5(c)(4).

(c) For structural projects, the project sponsor will be required to provide a cash payment equal to a minimum of five percent of estimated total project costs during the period of cost section, regardless of the outcome of the ability to pay test. If formula § 241.5(c)(2) is used to estimate the non-Federal share, the resultant non-Federal cash requirement could continue to exceed five percent. For example, if LERRD is 10 percent of costs, the normal costshare requirement is 25 percent, including a 15 percent cash payment; if the revised Non-Federal share under ability to pay is 20 percent, there remains a 10 percent cash requirement. In these cases, the Non-Federal interest shall pay its share of cash during construction at a rate proportionate to its projected final cash share. If the Non-Federal share, adjusted for ability to pay considerations, exceeds 30 percent, section 103(a)(4), permitting deferred payment of the amount exceeding 30 percent, will still apply.

(d) If the normal LERRD plus five percent cash requirement exceeds the ability to pay cost share requirement, the Federal Government will make any necessary adjustments to the Non-Federal interest through Federal payments for LERC or reimbursement. The adjustment mechanism will be negotiated and the Local Cooperation Agreement will include a description of the mechanism.

ARCHITECTURAL AND TRANSPORTATION BARRIERS COMPLIANCE BOARD

36 CFR Part 1190

Minimum Guidelines and Requirements for Accessible Design

SUMMARY: Public comment is invited on a proposal that would amend the Minimum Guidelines and Requirements for Accessible Design (MGRAD) by deleting §1190.40 through 1192.230 of Subpart D—Technical Provisions and in their stead incorporating by reference (with some exceptions) sections 4.2 through 4.32 and the Appendix of the 1986 edition of the American National Standards Institute Standard ANSI A117.1, “American National Standard for Buildings and Facilities—Providing Accessibility and Usability for Physically Handicapped People.” In 1981, MGRAD was issued by the ATBCB pursuant to section 502(b)(7) of the Rehabilitation Act of 1973, to establish minimum guidelines and requirements for standards issued by the four standard-setting agencies under the Architectural Barriers Act of 1968. A revised final rule was issued in 1982. In 1984, the four standard-setting agencies issued the Uniform Federal Accessibility Standards (UFAS), which was based on the ANSI format. MGRAD establishes the minimum requirements with which UFAS must comply. The proposal would minimize the differences between MGRAD and UFAS. Further, by replacing the MGRAD technical provisions with the ANSI A117.1 (1986), both MGRAD and UFAS would follow the same format that is most widely used in non-federally funded and constructed facilities. This proposal also would make conforming technical amendments and would add provisions to Subpart E, which was revised when MGRAD was published.

DATES: Written comments must be submitted on or before November 16, 1987.

ADDRESS: Written comments should be addressed to the General Counsel, Docket 87–04, Architectural and Transportation Barriers Compliance Board, 330 C Street SW., Room 1010, Washington, DC 20202. Comments received will be available for public inspection at the above address from 9 a.m. to 5 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Mark Smith, ATBCB, 330 C Street SW., Room 1010, Washington, DC 20202, (202) 245–1801 (v/TDD). This is not a toll-free number. This proposed rule is available on cassette at the above address for persons with visual impairments.

SUPPLEMENTARY INFORMATION: Background of Proposed Rule

In reviewing the ANSI technical requirements during MGRAD development, however, the ATBCB found that in some cases, with regard to some subjects, there was no sufficient research and/or field experience to support a Federal requirement at the time. Those provisions were reserved in MGRAD. The reserved provisions include external door opening force limits; requirements for accessible windows; the use of detectable warnings at locations other than doors leading to hazardous areas; all provisions dealing with signage; and opening time requirements for elevator doors.

Certain provisions in MGRAD differed from the 1980 ANSI, and some provisions of MGRAD provided clarification or additional information. Following the publication of MGRAD as a final rule, the four standard-setting agencies under the Act initiated the development of uniform accessibility standards to be used by all Federal agencies. The objective of the effort was to publish uniform standards which would, wherever possible, be consistent with the ANSI A117.1-1980 standard while complying with MGRAD.

In keeping with the agencies' objective to secure uniformity between Federal requirements and those commonly used in the private sector or by state and local governments, the USPHS followed ANSI A117.1-1980 in format. Departures from the ANSI technical provisions were made only where necessary in order to comply with MGRAD, or where the agencies found differing or additional requirements to be appropriate due to the nature of certain buildings and facilities subject to the Act or which were in the interests of improved safety or access for handicapped people. The resulting document, the Uniform Federal Accessibility Standards (UFAS), was published in final form in the Federal Register on August 4, 1984 (47 FR 33862), and was implemented individually by the standard-setting agencies. GSA adopted the UFAS in 41 CFR 101.19.6, effective August 7, 1984. HUD adopted the UFAS in 24 CFR Part 40. effective October 4, 1984. USPS adopted the UFAS in Handbook RE-4, "Standards for Facility Accessibility by the Physically Handicapped," effective November 15, 1984. DOD adopted the UFAS by revising Chapter 10 of DOD 4270.1-M, "Construction Criteria," by memorandum dated May 8, 1985.

The 1980 ANSI standard recommended that scoping provisions, i.e., specifications as to the number of accessible features and elements, be developed by administering agencies, but included in the technical specifications a requirement for a "reasonable number" of accessible features or elements. In accordance with this recommendation, the ATBCB developed for MGRAD definite numeric values in order to provide explicit guidance to the Federal standard-setting agencies. When the agencies developed UFAS, these MGRAD scoping guidelines were followed in section 4.1 Minimum Requirements, and, in addition, the "reasonable number" references in the ANSI technical provisions were deleted.

An integral part of the ANSI process is the requirement for each ANSI standard to be reviewed at five-year intervals and then either reaffirmed or revised. When the ANSI A117.1 review began in 1984, differences between UFAS and the 1980 ANSI standard were among the principal recommendations made for changes to be made in the new edition. The provisions that has been reserved in MGRAD were also reviewed to determine whether they should be retained, revised, or deleted in the new ANSI standard. The ANSI Committee found no justification for deleting these requirements, and thus retained all of the provisions that were reserved in MGRAD. However, revisions were made in some of the sections that reflected findings of ATBCB research on MGRAD reserved areas.

Many of the features of UFAS not previously in the ANSI standard were adopted in the 1986 ANSI, which was approved by ANSI on February 5, 1986. In particular, the 1986 ANSI eliminates all references to "minimum number" requirements in its technical provisions; includes some revisions to signage requirements that reflect the results of ATBCB-sponsored research; and incorporates other requirements such as certain reach range dimensions, vertical clearances, and provisions relating to alarms.

Proposed Action on Reserved Sections

In the period since completion of MGRAD, the ATBCB has sponsored research in the areas of detectable warnings, signage and other environmental information systems, alarms, and hand anthropometrics, among other topics, and has participated with the standard-setting agencies in their development of UFAS. ATBCB has also assisted the ANSI A117.1 Committee in the development of the 1986 edition of that standard. The ATBCB had the opportunity to review, with those primarily responsible for the UFAS and ANSI standards, comments on the 1980 standard that reflected
proposed to be added to MGRAD are based primarily on the standards now promulgated by ANSI and the four standard-setting agencies, with findings from ATBCB research providing additional information and support.

There are two basic factors supporting this decision. The first consideration is the fact that the UFAS was developed subsequent to the publication of MGRAD and was subject to public comment following its publication in proposed form in the Federal Register. Thus, these public comments constitute a more current record in support of the UFAS provisions than existed on these issues when MGRAD was issued. The comments that will be received in response to this Notice of Proposed Rulemaking (NPRM) will provide an even more current record with regard to the proposed action. Since the UFAS has now been applied successfully for more than two and one-half years, and since the ATBCB participated in its development, it is appropriate to propose that requirements found in the UFAS but reserved in MGRAD be accepted now as the ATBCB minimum requirements.

Second, the ANSI A117.1 committee carefully reviewed all of the changes made when the 1980 standard was adopted for UFAS and the ATBCB rationale for reserving the MGRAD sections. Comments, opinions, and recommendations on these and other issues were solicited from the committee's membership of 52 organizations and carefully considered. The 1988 ANSI standard is the result of these extensive deliberations. Many of the UFAS changes have been adopted; in other cases, alternative approaches were developed that the ATBCB considers acceptable.

Another question considered by the ATBCB was the format of the MGRAD technical provisions. At the time MGRAD was developed, the Board drafted the standard in the Federal Register format used for regulations issued by the executive agencies. When the standard-setting agencies began development of the UFAS, they chose to use the format of the ANSI standard, thus retaining intact the numbering system and the figures. This decision was made in the interest of promoting uniformity in the accessibility standards used in Federal and non-Federal design and construction. The ATBCB believes that this is a worthwhile goal and therefore proposes that the ANSI technical provisions be adapted as the MGRAD technical provisions. It has chosen to use ANSI rather than UFAS because the 1980 ANSI has made a number of editorial improvements which are not currently in the UFAS. It is anticipated that future revisions of UFAS will incorporate updated versions of ANSI.

This proposed rulemaking would achieve several goals. It would complete MGRAD after five years of study and lessons learned in the development of other standards. It would make comparisons and future revisions of UFAS and MGRAD simpler. Finally, it would move significantly closer to the long-standing goal of uniformity in accessibility requirements for both the public and private sectors. This would have the benefit of simplifying accessibility compliance by removing duplicative layers of technical specifications that are confusing and complicating factors for designers and builders as well as lay persons concerned with promoting accessibility. The result should be improved efficiency for all concerned parties.

In proposing this action, the ATBCB stresses its commitment to continuing review and revision of MGRAD as knowledge, experience, and new technology develop. While proposing to adopt the ANSI technical provisions as the technical specifications core of MGRAD, the ATBCB intends to maintain MGRAD as an independent document and is not restricting future action on technical issues. As proposed here, wherever the ATBCB finds a different or more stringent requirement appropriate, such a requirement will be adopted. As future ANSI editions are developed, each would be reviewed, as this one was, before making a decision on adopting the new version. Moreover, any determination to modify MGRAD will be subject to a public rulemaking proceeding. While maintaining the independence of MGRAD, however, the ATBCB remains committed to continued close cooperation with the ANSI A117.1 committee, and will continue to work to bring potential improvements in that standard that are identified by the ATBCB to the attention of the committee members.

Further, incorporating the technical provisions of the nationally-accepted voluntary standard developed by ANSI is clearly in keeping with the Federal policy articulated in Executive Order 11093 promoting the use of private-developed standards wherever possible in Federal activities.

**Provisions of the Proposed Rule**

The proposed rule includes a number of amendments to complete reserved sections of MGRAD, to conform MGRAD language and terms to those used in ANSI A117.1, and to substitute...
references to ANSI section numbers for the corresponding section numbers in the current MGRAD. A section-by-section description of the proposed amendments follows:

Section 1190.2, Applicability.

This section would be amended by deleting paragraph (e), which describes the reserved status of Subpart E, Special Building and Facility Types, and places certain requirements on the Department of Housing and Urban Development until such time as the subpart is completed. Because this proposed rulemaking would complete the housing requirements and remove the “reserved” status of the subpart, paragraph (e) no longer is necessary or appropriate.

Section 1190.3, Definitions.

This rulemaking would substitute the ANSI definitions of “adaptability,” “common use,” and “physically handicapped person” for those now appearing in MGRAD. In the case of the first two terms, the ANSI definitions are more clear and are consistent with the intent of MGRAD definitions. The ANSI definition of “physically handicapped person” is the same definition used in UFAS. It was accepted by the ATBCB when UFAS was developed as being appropriate for purposes of standards issued under the Architectural Barriers Act, which relate strictly to accessibility and usability of buildings and facilities. By incorporating this definition, uniformity in defining the term among all three documents will be achieved.

In addition, definitions would be added for several terms that are used in the ANSI A117.1 standard but were not used in MGRAD. These terms are “detectable,” “detectable warning,” “dwelling unit,” “housing,” “marked crossing,” “multifamily dwelling,” “service entrance,” and “sleeping accommodations.” The definition for “tactile warning,” a term that would no longer be used, would be deleted.

Sections 1190.7, 1190.8, and 1190.9 and Subpart C.

A technical correction is proposed to delete section numbers unused in the current MGRAD and redesignate the remaining sections accordingly. Thus §1190.9, Severability, would be redesignated as §1190.7, and Subpart C, Scope, would be redesignated as Subpart B. The original sections 1190.7 and 1190.8 covered subject matter later deemed inappropriate for inclusion in MGRAD. Subpart B was originally intended to cover Waivers and Modifications, but proposed provisions were deleted after a 1980 opinion by the Office of Legal Counsel, Department of Justice, found that the ATBCB was not authorized to issue regulations governing waivers and modifications.

Subpart C—Scope.

This subpart would be redesignated as Subpart B and would be amended wherever reference is made to sections of the current Subpart D—Technical Provisions. Those references would be replaced by incorporating the appropriate references to corresponding provisions of the ANSI A117.1–1986 standard.

In addition, some new provisions would be added to incorporate requirements currently found in Subpart D—Technical Provisions that are not included in the ANSI standard. These provisions have been added to this section when the requirements were considered to be a scoping rather than a technical provision. (The ANSI standard contains no scoping provisions, but rather relies on the adopting authority to establish those requirements.)

Amendments to Subpart C would be made in each of its three sections, §1190.31, Accessible buildings and facilities: New construction; §1190.32, Accessible buildings and facilities: Additions; and §1190.33, Accessible buildings and facilities: Alterations.

Amendments to §1190.31 include:

1. Section 1190.31(a)(2), which would incorporate a provision now found in §1190.50(f), Egress (and in UFAS 4.3.10) which requires more than one accessible means of egress when ever fire code provisions require more than one means of egress from any space or room.

2. An addition to §1190.31(g) which would note that platform lifts should facilitate unassisted entry and exit from the lift. This provision is under §1190.110 in the current MGRAD.

Further, new provisions would be added to cover provisions now reserved in MGRAD. Where UFAS contains scoping requirements in the reserved areas, these amendments would adopt consistent requirements. These additions to §1190.31 would include:

1. Paragraph (j), Windows, which was reserved in MGRAD pending further study or experience with application of the 1980 ANSI standard. When the ANSI A117.1 committee reviewed the issue for the 1986 revision of the standard, the fact that MGRAD had reserved the provision was considered. The reviewers decided that practical experience with the 1980 requirements on windows had not identified any problems with the specifications and that it was desirable to retain the provisions (found at section 4.12 in the ANSI standard) in order to assure that the need for accessible windows not be overlooked. The ATBCB funded a research project on Hand Anthropometrics which studied capabilities of selected disabled subjects to operate mechanisms and building components. Copies of the report of this project and other ATBCB research described in this proposal are available for inspection at the office referenced above. The findings from this study suggested detailed design criteria for window-opening hardware and indicated appropriate operable forces based on the specific type of hardware (e.g., small bar or plate) that would be usable by 90 percent of the 104 disabled subjects in laboratory studies. The recommended forces ranged from 2 pound feet (lbf) to rotate a crank) to 11 pound feet (lbf) when a hook grip could be used.

The ANSI requirement permits hardware “operable by one hand” and which “does not require tight grasping, pinching or twisting of the wrist.” The maximum operable force permitted is 5 lbf.

Although the detailed recommendations from the Hand Anthropometrics studies provide valuable information, for designers of building products in particular, and will be offered by the ATBCB as technical assistance information, the ATBCB does not believe that a mandatory Federal requirement more detailed and stringent than anything now in effect is warranted on the basis of current information.

The research report points out that “the research undertaken in this project was the first comprehensive examination of human performance of hand/arm disabled people. As such, the results can not be considered complete or definitive... Moreover, there are some findings that suggest the need to develop different research methods or, at least, modify those described” in the report. It was noted, for example, that performance on actual devices can exceed performance on abstracted tasks. Bearing such considerations in mind, the ATBCB does not believe there is justification for establishing new and detailed requirements at this time. On the other hand, the research, together with experience with the 1980 ANSI standard, has confirmed the ATBCB’s opinion that specifications for windows should be included in MGRAD requirements.

The current ANSI provisions are within the acceptable range of grip types (and forces for certain types) identified by the research project. To incorporate these ANSI requirements by reference would ensure greater accessibility than is now the case with no requirements in force. Since the research team did find standard window-opening devices on the market that met the requirements, there should be no practical impediment
to implementing the provision. The detailed recommendations offered by the research findings could, along with additional information that may become available, serve as the basis for future revisions to MGRAD at a later date. Therefore, this reserved section would be completed by requiring that operable windows, where provided, comply with 4.12.

(2) Paragraph (o) Tactile warnings, was also reserved when MGRAD was published. Subsequently, the ATBCB funded research on detectable tactile surface treatments. As noted in an earlier proposed rulemaking (52 FR 4352, February 11, 1987), the findings from this study did not support mandatory Federal requirements in this area. Therefore the ATBCB proposed not to require detectable warnings, other than knurled surfaces on hardware of doors leading to hazardous areas. However, the ATBCB recognizes that designers and builders may choose to provide detectable warnings and has proposed amendments to MGRAD that would refer users to ANSI 4.27.

While ANSI 4.27 provides useful guidance on the issue of detectable warnings, the ATBCB also wished to provide the following guidance. First, the ANSI standard requires detectable warning surfaces on curb ramps. Concerns have been raised about the difficulties which people with certain mobility impairments (particularly amputees or persons using braces) have in walking on the surface treatments typically used for detectable warnings. These problems are particularly acute when the treatments are applied to sloping surfaces such as curb cuts. An additional point is that the ANSI standard requires only a textural contrast for detectable warnings, while the ATBCB research indicated that other cues such as sound and resiliency are equally or more useful. This issue is discussed in a summary of the ATBCB research report that is available from the office identified in this proposed rule.

In addition, under the proposal, the ATBCB will provide other information on detectable surfaces upon request. This proposed amendment incorporates the language proposed in the earlier NPRM cited above. The comments on detectable surfaces received in response to the earlier proposal will be incorporated into this rulemaking docket and considered along with any additional comments received on detectable warnings as a result of the present NPRM.

(3) Paragraph (p) Signage, was reserved in response to comments on early MGRAD rulemaking that included provisions on signage. The ATBCB has funded two research projects in this area since that time, one specifically on signage and the second on signage and other information systems for low-vision persons. UFAS included the signage requirements of the 1980 ANSI standard because it was considered essential to provide standards for signage in Federal buildings while the ATBCB continued its consideration of the issue. The 1986 ANSI standard incorporated the principal undisputed findings from the ATBCB signage research. Specifically, these provisions are (1) establishing the upper-case letter "x" as the standard of measurement for determining character proportions and (2) prohibiting incised letters. This proposed rulemaking adopts the technical provisions of the 1986 ANSI and provides scoping requirements consistent with the intent of UFAS requirements.

Some additional recommendations from the research reports were not adopted by ANSI and would not be incorporated into MGRAD by this proposal. It was judged that there was not sufficient justification for those recommendations to merit making an MGRAD change that would be inconsistent with both ANSI and UFAS. This is the case with research recommendations for certain ratios governing character proportion on signs. Similarly, research findings suggested the need for detailed requirements for lighting, gloss factors, and color contrast, which would represent significant new requirements. Appropriate information from the research will be made available when technical assistance is requested. These findings and practical experience will be evaluated for consideration in future rulemakings.

(4) A new paragraph (u) would be added to provide scoping requirements for housing. No housing provisions were included in MGRAD when it was published in 1982; the rulemaking noted that housing was among the special building and facility types that would be the subject of later rulemakings to complete the reserved Subpart E. UFAS adopted the ANSI requirements for dwelling units, with some amendments, along with scoping provisions for housing. This scoping would add, in subsection (u), scoping provisions for housing consistent with those in UFAS and would reference the technical specifications in the 1986 ANSI, which incorporate the UFAS amendments to the 1980 standard.

(5) A new paragraph (v) would be added to provide scoping requirements for health care facilities. This is one of the special building and facility types for which Subpart E was reserved. Consistent with the UFAS requirements, which were approved by the ATBCB at the time of their development, this rulemaking would adopt both scoping and technical provisions for health care facilities. The ATBCB notes that these requirements may be subject to review during future amendments of MGRAD.

As noted above, amendments would also be made to Section 1190.32, Accessible buildings and facilities: Additions, and Section 1190.33, Accessible buildings and facilities: Alterations. Conforming amendments would be made to § 1190.32 to reference corresponding ANSI provisions where MGRAD section numbers are now cited. Also, the reserved "Signage" paragraph would be deleted. Signage in additions to existing buildings would comply with the same requirements as in new construction. Similar amendments also would be made in § 1190.33, Accessible buildings and facilities: Alterations.

Additional amendments would be made to § 1190.33 to provide special technical provisions for certain situations in alteration projects. These amendments are consistent with provisions now in effect in UFAS. Specifically, the rule would permit:

(a) Omitting the requirement for an automatic elevator door reopening device where an existing elevator has a safety door edge. This exception is found at § 1190.100(e)(3)(i) in the current MGRAD.

(b) Reducing the minimum car dimensions to 4' x 4' where it is structurally impracticable to comply with the elevator car size required for new construction projects. This exception currently is found at § 1190.100(d)(1)(i) in MGRAD.

(c) Adding one accessible "unisex" toilet per floor, adjacent to existing toilet facilities, where it is structurally impracticable to make existing toilet facilities for each sex accessible. This exception is found at § 1190.150(a)(3) in MGRAD.

(d) Providing special technical provisions for stair handrails and door features in alterations projects.

(e) Providing certain exceptions for assembly areas.

Subpart D—Technical Provisions. This subpart would be renumbered as Subpart C and would be amended to incorporate §§ 4.2 through 4.32 and the Appendix of ANSI A117.1—1986 in lieu of the corresponding technical provisions now found in MGRAD §§ 4.1 through 4.240. Incorporation of the ANSI provisions would complete the reserved MGRAD sections. These are: (1) all provisions...
related to signage requirements, now found at MGRAD §§ 1190.60(f), 1190.100(e)(2), 1190.100(h)(2)(ii), 1190.100(h)(1), 1190.150(d), and 1190.200; [2] all provisions related to tactile warnings, now found at MGRAD §§ 1190.70(e)(1), 1190.80(f), and 1190.190; [3] MGRAD § 1190.140. Windows: [4] MGRAD § 1190.100(e)(2), elevator door open-time requirement, and [5] MGRAD § 1190.130(h)(2)(ii), exterior door opening force requirement.

Most ANSI provisions are identical in effect and intent with the corresponding MGRAD provisions. Some provisions that MGRAD (and UFAS) included in the technical sections were not incorporated in the 1986 ANSI because they were deemed to be more appropriately treated as scoping requirements. Those requirements are proposed to be included in the amended § 1190.31, as noted above. Some were not incorporated in the 1986 ANSI standard because the ANSI committee did not consider those particular requirements to be substantiated by research findings or experience indicating superior benefits in accessibility or usability over the then current ANSI requirements, or because the committee felt that the requirements were not appropriate for a voluntary standard used for private sector construction. Where the ATBCB believes that the more stringent requirement is of sufficient importance that it should be mandated for facilities subject to the Architectural Barriers Act—all of which involve Federal funding for design, construction, alteration or leasing—it is proposing exceptions to the ANSI provisions. These exceptions, which are consistent with UFAS, are:

(1) MGRAD § 1190.100(d)(3)(iv) and (f)(1)(iv) and UFAS 4.10.3 and 4.10.12, require elevator car control and hall call buttons to be either raised or flush. ANSI permits recessed, raised, or flush buttons. The 1986 ANSI Committee considered revising this provision to prohibit recessed buttons but did not do so because, whether recessed, raised or flush, mechanically activated buttons must be depressed in order to be activated. Therefore such a prohibition would not necessarily be helpful. It was also noted that recessed buttons are easier to use for persons with certain disabilities and prevents problems of accidental activation by persons with visual disabilities who are “reading” the panel by touch.

However, further study has led the ATBCB to conclude that problems with recessed buttons are sufficient to outweigh these possible benefits. Persons with upper limb amputations or any disability that would require use of a fist or elbow to activate the button cannot use a recessed button. Further, the Hand Anthropometrics project found that persons with reaching limitations frequently use a slapping motion to operate higher buttons, a motion that would not activate a recessed button. Since raised or flush buttons are readily available, as are new control panels with inclined buttons that would obviate the problem of depressing flush buttons, the ATBCB believes it is appropriate to maintain MGRAD requirement as currently in effect.

(2) Paragraph 4.7.7 Warning Textures and 4.7.12 Uncurbed Intersections of ANSI 4.7 Curb Ramps require detectable warning surfaces at curb ramps and uncurbed intersections. As discussed earlier, the ATBCB does not propose to require detectable warnings at any location and therefore is making an exception to these provisions.

(3) MGRAD § 1190.150(f)(5)(i) and UFAS 4.21.6 permit the installation of a fixed shower head in lieu of a hand held shower head in unmonitored facilities where vandalism is a consideration. ANSI provides advisory language to this effect in its Appendix. Although the ATBCB proposed to adopt the ANSI Appendix as well as the technical provisions, in order to avoid any potential questions about the validity of the fixed-shower-head exception in UFAS, this provision is specifically listed in this rulemaking as a proposed exception to the ANSI technical provisions.

(4) MGRAD § 1190.150(f)(7) and UFAS 4.21.7 permit a maximum height of 1/2 inch (13 mm) for curbs in shower stalls that are 36 inches by 36 inches (915 mm by 915 mm). ANSI permits a 4-inch curb height, the standard height for curbs in prefabricated shower stalls. Although the ATBCB recognizes the advantages of permitting use of standard building products, and although it is believed that a large proportion of disabled individuals who independently transfer to shower seats are able to maneuver over the 4-inch curb, the requirement for the lower curb would be continued because it increases accessibility for people with paralysis of the legs who cannot lift their legs over a 4-inch curb when transferring.

(5) UFAS 4.30.6 specifies mounting heights and locations for interior signage. (There is no corresponding provision in MGRAD because all signage requirements are reserved.) This requirement is not included in ANSI provisions on signage that are being incorporated by this rulemaking. The ATBCB believes the UFAS requirement to be appropriate and useful in assuring that tactile signage can be located by people with impaired vision. In addition to the ANSI technical provisions, this proposal would specify that such signage be mounted between 54 inches and 66 inches above the floor on the latch side of the door.

(6) UFAS 4.33.3 contains an exception to the ANSI requirements on placement of wheelchair locations in assembly areas. This proposal would provide an exception to the ANSI provisions to incorporate the UFAS provision.

MGRAD, UFAS, and ANSI all require dispersal of wheelchair locations throughout the seating area. The exception permits clustered wheelchair seating in bleachers and other areas with sight lines requiring slopes greater than 5 percent, or to permit equivalent positions on levels with accessible egress.

The remaining differences between the ANSI and MGRAD specifications, and the ATBCB determination on each, are as follows:

(1) MGRAD § 1190.50(h)(3)(iv) permits carpet tile to have a maximum combined thickness of pile, cushion and backing of 1/2 inch. The section recommends that carpet meet this requirement but permits carpet to have a pile height up to 1/2 inch, exclusive of the thickness of pad or backing. The restriction on carpet tile thickness was incorporated in UFAS due to the MGRAD requirement. The 1980 ANSI, in paragraph 4.5.3, permits a maximum pile height of 1/4 inch and does not distinguish between carpet and carpet tile. In developing the 1986 standard, the ANSI committee considered the disparity between the standards but did not revise the existing ANSI provision because committee members did not consider it appropriate to place a different requirement on carpet tile than on carpet. The ATBCB has reviewed this issue and concluded that the difference in the MGRAD requirement and the ANSI requirement is not significant, and further agrees that there is no evidence to support continuing the different requirement for carpet tile than for carpet. Therefore the ATBCB proposes to incorporate 4.5.3 as it appears in ANSI.

(2) MGRAD § 1190.60, Parking and passenger loading zones, differs from the corresponding ANSI provisions, 4.6 Parking Spaces and Passenger Loading Zones, in the areas noted below. This proposal would incorporate all of the ANSI provisions without change. (a) MGRAD § 1190.60(c)(2)(i) provides advisory specifications for accessible van parking spaces, although such
spaces are not required. UFA 4.6.3 incorporates the same specifications as advisory standards. ANSI refers the user of the A117.1 standard to the appendix for dimensions for accessible van spaces. Since this proposal incorporates the ANSI appendix by reference, the ATBCB does not consider it necessary to restate the advisory specifications elsewhere in MGRAD.

(b) MGRAD § 1190.60(c)(5) requires that accessible parking spaces and access aisles have surface slopes not exceeding 1:48 in all directions. The same requirement is applied to passenger loading zones under § 1190.60(d)(1). UFA 4.6.3 and 4.6.5 incorporate a similar requirement. The 1986 ANSI standard reviewers considered this specification, but did not incorporate it in section 4.5. ANSI 4.5.7 Slope (under 4.3 Accessible Route) requires that the cross slope of an accessible route can never exceed 1:50, which is essentially the same as the 1:48 MGRAD requirement. Since ANSI 4.6.3 states that the access aisle of a parking space or passenger loading zone is part of the accessible route from the space or zone, the cross slope requirement clearly applies. It is therefore not necessary to repeat the requirement in this section.

(c) MGRAD § 1190.60(d)(1) and UFA 4.6.5 require that the access aisle at accessible passenger loading zones be 5 feet wide, the same width as the access aisle at accessible parking spaces. ANSI 4.6.3 requires a 4-foot-wide access aisle. Like other MGRAD and UFAS differences with the 1980 ANSI standard, this was considered by the ANSI committee.

Discussions with the research contractor who developed the original ANSI requirement indicate that the difference in access aisle width was based on a study of the use of the space. The access aisle at a parking space is likely to be adjacent to another parking space in which a car could be parked close to the boundary. At a passenger loading zone, on the other hand, a car can be positioned to assure full use of the access aisle and there will be no adjacent vehicle to maneuver around. Another consideration arising for the wider access aisle for parking spaces is the possibility of a door from the adjacent parked car swinging into the access aisle. After weighing these considerations, the ATBCB has determined that a five foot wide access aisle is adequate for loading zones and there is no overriding need for maintaining a Federal requirement that is different from the ANSI provision.

(d) MGRAD § 1190.60(e) and UFA 4.6.6 require vertical clearances of 114 inches at accessible passenger loading zones and along vehicle access routes to such areas from site entrances. ANSI 4.6.3 requires a vertical clearance of 108 inches. In considering this requirement, the ANSI Committee concurred that a vertical clearance specification was appropriate but ascertained that 108 inches (9 feet) was sufficient to provide clearance for standard accessible vans and would be consistent with standard building practices on height of entrance canopies. The ATBCB does not find the 6-inch difference between UFA and MGRAD, on the one hand, and ANSI on the other, to be significant in view of the finding that standard personal vans can be accommodated with such a specification and therefore does not propose to include an exception on this provision. However, the Board notes that in order for facilities to be accessible to certain paratransit vehicles currently available from major manufacturers, vertical clearances must allow for vehicles as high as 125 inches (10 ft. 5 inches) in height. Facilities where access by paratransit “minibus” vehicles is a concern should consider the need to provide the higher clearance.

(3) MGRAD § 1190.70, Ramps and curbs, provides at paragraph (e), Curb ramps, that flared sides are required if any part of a path crosses any part of a curb ramp not protected by guardrails. UFA includes this requirement at 4.7.5. ANSI 4.7.5 requires that curb ramps located where pedestrians must walk across them shall have flared sides. Since handrails or guardrails are not, in fact, generally used nor desirable for curb ramps (where they could impede pedestrian movement), the ANSI approach of requiring flared sides is believed to be a more satisfactory solution and is therefore proposed to be incorporated into MGRAD through this amendment.

(d) MGRAD § 1190.90, Handrails, differs from the corresponding ANSI provisions 4.8.5, 4.9.4 and 4.26 in the areas noted below. This proposal would incorporate all of the ANSI provisions without change.

(a) MGRAD § 1190.90, Handrails, requires, as did the 1980 ANSI standard, that handrails be no more than 1/4 inch in outside diameter. Subsequently, ANSI received comments from industry spokesmen noting that pipes used for handrails are generally designated by inside diameter sizes, and that the typical pipe size specified is the 1/4 inch pipe which has an outside diameter of 1.9 inches. Based upon laboratory research conducted with 604 disabled subjects, the ATBCB’s Hand Anthropometric project has indicated that an outside diameter of 1.7 inches is optimum for handrails and recommends for handrails a range from 1.3 to 1.7 inches in outside diameter. After consideration of these comments and preliminary information on the ATBCB research findings which indicated 1/4" was too restrictive, the ANSI committee approved a revision to ANSI 4.8.5 and ANSI 4.9.4 specifying that standard pipe sizes designated by the industry as 1/4 inch to 1/2 inch are acceptable as handrails.

The ATBCB research report has suggested 1.7 inches as the optimum diameter for permitting a power grip. In a power grip, the hand closes completely around an object, with thumb and fingers touching. However, the study was not conducted using handrails and, therefore, could not report on whether the power grip is actually used. Field testing performed with other devices found that subjects sometimes performed quite differently than they did in abstract laboratory tests. Therefore, this proposal would incorporate the ANSI provision into MGRAD. A larger diameter is clearly called for and the research underlying the 1.7 inch recommendation is not sufficiently definitive to form the basis for a new requirement which would differ from any now in effect. The Board intends to review new information on this issue as it becomes available for consideration in future revisions of MGRAD.

(b) MGRAD § 1190.90, Handrails, includes in paragraph (e) requirements on load-bearing capacity of handrails and specifies that handrails shall not rotate within their fittings. UFA incorporated in 4.8.5 (for ramps) and 4.9.4 (for stairs), the requirement that the fixture not rotate within its fittings; it did not include load-bearing capacity. The 1986 ANSI did not incorporate these requirements because these were deemed to be safety issues that are covered appropriately by sections of building codes dealing with handrail safety requirements, rather than in the context of accessibility. The ATBCB concurs in this determination.

(c) MGRAD § 1190.90, Handrails, also requires in paragraph (b) that ends of handrails be returned smoothly to wall, floor or post. UFA incorporated this requirement at 4.8.5 (for rails at ramps) and 4.9.4 (for rails at stairs). ANSI 4.9.4 includes a requirement that stairway handrail extensions must comply with 4.4, Protruding Objects, which would provide the same protection afforded by the MGRAD requirement. In view of this, and since UFA includes the requirement in both sections, the ATBCB proposes to incorporate ANSI 4.8.5 unchanged. It is anticipated that UFA will continue to provide the more
explicit requirement in both sections and that ANSI will consider adopting consistent language at its next revision. [MGRAD § 1190.100. Elevators. MGRAD also reserves the provision on elevator door timing for which ANSI provides a requirement at 4.10.8. The ATBCB proposal regarding one of these provisions for elevator car controls and hall call buttons, was noted above. In addition, this proposed rulemaking would adopt the ANSI 4.10.8 requirement for a three-second open time for elevator doors. Although the ATBCB had originally adopted a five-second open time requirement, it was withdrawn because of serious concerns about its effect on elevator operators in high-rise buildings (46 FR 29764). UFAS later adopted, with ATBCB concurrence, the three-second time frame. The ATBCB proposes to incorporate into MGRAD the three-second time as proven by experience to be sufficient, given the requirements for door and signal timing that are part of the comprehensive elevator specifications. The other differences are as follows:

(a) MGRAD provisions explicitly require that objects mounted beneath lobby call buttons shall not project into the elevator lobby more than 4 inches. The ANSI Committee considered adding this requirement to 4.10 but determined that the provisions of 4.25, Operating Controls and Mechanisms, and 4.4, Protruding Objects, preclude such placement and therefore an explicit statement in 4.10 was redundant. The ATBCB accepts this reasoning, and proposes to adopt the ANSI provision.

(b) MGRAD § 1190.100(d)(3)(ii) requires that car control buttons be mounted no higher than 48 inches above the floor, unless this height causes a substantial increase in cost, in which case the highest button may be 54 inches above the floor. The ANSI Committee considered this approach but found the cost consideration inappropriate for a technical specification and further determined that where the number of floors or other factors mandated higher buttons (up to the 54-inch maximum), then the elevator car should be required to permit side approach. The ATBCB agrees that this is an appropriate way to assure accessibility of elevator controls and therefore proposes to incorporate this provision into MGRAD. The same consideration applies to mounting height of emergency communication equipment [ANSI 4.10.14. MGRAD 1190.100(j)(1)].

(c) MGRAD 1190.100(f)(1)(j) requires that hall call buttons be mounted with centerlines 48 inches above the floor. ANSI 4.10.3 specifies a mounting height of 42 inches. This difference is not considered significant. In addition, the lower height specified by ANSI should increase ease of access. Therefore, the ATBCB proposes to accept the ANSI specifications.

(6) MGRAD § 1190.130(a)(3) states that revolving doors and turnstiles are not accessible and therefore shall not be the only means of access at any accessible entrance or on any accessible route, and further requires that an accessible door be provided adjacent to the revolving door or turnstile and be designed to facilitate the same use pattern. The ANSI Committee reviewed the turnstile/revolving door issue and found that accessible turnstiles and revolving doors are now available on the market. For that reason, ANSI 4.13.2 was revised in 1986 to permit revolving doors or turnstiles that meet all the requirements for accessible doors, but to prohibit inaccessible turnstiles or revolving doors as the only means of passage at an accessible entrance or along an accessible route. The ATBCB believes this to be appropriate and proposes to incorporate this approach into MGRAD. Further, the additional language in MGRAD 1190.130(a)(3) regarding adjacent location and equivalent use patterns is not considered necessary to be included here since the ANSI provision clearly requires an accessible door at any accessible entrance. The further requirement that the adjacent door be subject to the same use patterns as the inaccessible revolving door or turnstile is required by MGRAD in the definition of "accessible" at 1190.3, which states that, "accessible elements and spaces of a building or facility including doors provided adjacent to a turnstile or a revolving door, shall be subject to the same use patterns as other elements and spaces of the building or facility."

(7) MGRAD § 1190.130(f) requires that no door hardware be mounted higher than 48 inches above the floor. ANSI 4.13.9 provides that all door operating hardware be mounted within the reach ranges specified in 4.2. The ANSI provision recognizes that there may be door operating hardware other than door opening devices (e.g., special safety locks) that may be mounted at other than standard doorknob heights, and would assure that no such devices are mounted outside acceptable ranges for lower as well as higher reaches. The ATBCB concurs that there are valid consideration and that the ANSI requirement is consistent with the intent of the MGRAD provision. MGRAD is proposed to be amended accordingly.

(8) MGRAD § 1190.150(e)(2)(ii) and UFAS 4.17 require that toilet stalls in new construction be 60" wide. Both provisions include an exception which permits alternate stall sizes with widths of 48", 36", or 24". Therefore, the ATBCB proposes to accept the ANSI specifications.
a better solution? The ATBCB will review these and other approaches suggested by comments in making the final determination on this issue.

(9) MGRAD § 1190.180(c) permits visual alarms with a flash frequency "less than 5 [Hertz] Hz." The ANSI standard, at 4.26.3, requires a flashing frequency of approximately 1 Hertz. This revision was recommended to and adopted by ANSI in order to avoid the possibility of triggering seizures for individuals sensitive to rapidly flashing lights. The recommendation was based on experience with visual alarms in facilities serving hearing-impaired persons, which found that flashing frequencies of approximately 1 Hertz were adequate to awaken or alert these persons. The ATBCB's Alarms Documentation study also found evidence confirming this conclusion. The ATBCB believes that this is an appropriate requirement, and proposes to incorporate the ANSI requirement into MGRAD.

(10) MGRAD § 1190.210 specifies requirements for telephones. Equivalent requirements are provided in ANSI section 4.29. The ANSI provisions include a requirement not found in MGRAD for signage indicating the location of telecommunications devices for deaf persons where such equipment is provided. The ATBCB considers this to be an appropriate requirement that will benefit hearing-impaired people without imposing a significant burden on the provider, and therefore proposes to incorporate it into MGRAD.

Subpart E—Special Building or Facility Types or Elements.

The final provision of this proposed rulemaking would complete the reserved MGRAD subpart on special building or facility types—Subpart E in the current MGRAD, proposed to be redesignated Subpart D. In MGRAD as currently in effect, § 1190.2(e) explains that Subpart E is reserved for future development of minimum guidelines and requirements for special building and facility types, specifically including housing. However, in proposing to incorporate ANSI by reference, MGRAD like UFAS will be incorporating dwelling unit specifically in the basic technical provisions.

Therefore the ATBCB proposes to complete the reserved subpart by incorporating sections 5 through 9 of the UFAS. These sections provide specifications for restaurants, cafeterias, health care facilities, mercantile facilities, libraries, and postal facilities. The ATBCB participated with the standard-setting agencies in developing these specifications and approved them before their publication as final standards.

As need arises for specifications on other special building or facility types, the ATBCB may issue additional guidelines under this subpart. For example, the ATBCB organized a working group in access to recreational facilities and funded the development of a paper, recently completed, which proposes recommended MGRAD provisions for scoping and technical specifications for a variety of recreational facility types. These recommendations will be considered for future rulemaking.

Other Information

This proposed rule has been submitted to the Office of Management and Budget and reviewed under procedures established in Executive Order 12291. This rule does not constitute a "major rule" as that term is defined in Section 1(b) of the Executive Order 12291 on Federal Regulations. This rulemaking would not establish significant new Federal requirements, but rather is adopting language used in existing standards which has the same effect and intent as the provisions being replaced. Where new provisions are adopted to complete reserved sections, Federal requirements in those areas already exist in the Uniform Federal Accessibility Standards, with only minor exceptions which would have minimal cost impact.

The ATBCB has determined, as required by the National Environmental Policy Act of 1969, 42 U.S.C. 4332, that the proposal will not have any significant impact on the environment.

Pursuant to the provisions of 5 U.S.C. 605(b) (the Regulatory Flexibility Act), the ATBCB certifies that this rule will not have a significant economic impact on a substantial number of small entities.

List of Subjects in 36 CFR Part 1190

Buildings, Handicapped, Leasing, Transportation.

Accordingly, 36 CFR Part 1190 is proposed to be amended as set forth below.

By vote of the Board on May 13, 1987.

Thomas E. Harvey,
Chairperson, Architectural and Transportation Barriers Compliance Board.

It is proposed that 36 CFR Part 1190 be amended as follows:

PART 1190—MINIMUM GUIDELINES AND REQUIREMENTS FOR ACCESSIBLE DESIGN

1. The authority citation for 36 CFR Part 1190 is revised to read as follows:

§ 1190.2 [Amended]

2. Section 1190.2 is amended by removing paragraph (e).

§ 1190.3 [Amended]

3. Section 1190.3 is amended by:

(a) Revising the definition of "Adaptability" to read:

"Adaptability" means the capability of certain building spaces and elements, such as kitchen counters, sinks and grab bars, to be altered to added so as to accommodate the needs of persons with and without disabilities, or to accommodate the needs of persons with different types of degrees of disability.

(b) revising the definition of "Common use areas" to read:

"Common use" means those interior and exterior rooms, spaces or elements that are made available for the use of a restricted group of people (for example, residents of an apartment building, the occupants of an office building, or the guests of such residents or occupants).

(c) Revising the definition of "Physically handicapped person" to read:

"Physically handicapped person" means an individual who has a physical impairment, including impaired sensory, manual, or speaking abilities, which results in a functional limitation in access to and use of a building or facility.

(d) Adding the following definitions:

(1) After the definition of "Curb ramp" and before the definition of "Egress," insert—

"Detectable" means perceptible by one or more of the senses.

"Detectable warning" means a standardized surface texture applied to or built into walking surfaces or other...
elements to warn visually impaired people of hazards in the path of travel.

"Dwelling unit" means a single unit of residence that provides a kitchen or food preparation area, in addition to rooms and spaces for living, bathing, sleeping, and the like. A single-family home is a dwelling unit, and dwelling units are to be found in such housing types as townhouses and apartment buildings.

(2) After the definition of "Guidelines and requirements" and before the definition of "Operable part", insert—

"Housing" means a building, facility, or portion thereof, excluding inpatient health care facilities, that contains one or more dwelling units or sleeping accommodations. Housing may include, but is not limited to, one-family and two-family dwellings, multifamily dwellings, group homes, hotels, motels, dormitories, and mobile homes.

"Marked crossing" means a crosswalk or other identified path intended for pedestrian use in crossing a vehicular way.

"Multifamily dwelling" means any building containing more than two dwelling units.

(3) After the definition of "Section 502 of the Rehabilitation Act" and before the definition of "Shall," insert—

"Service entrance" means an entrance intended primarily for delivery or service.

(4) After the definition of "Site improvements" and before the definition of "Space," insert—

"Sleeping accommodations" means rooms in which people sleep (for example, dormitory and hotel or motel guest rooms).

(e) removing the definition "Tactile warning."

§§ 1190.7 and 1190.8 [Removed];

§ 1190.9 [Redesignated as § 1190.7]

4. Remove §§ 1190.7 and 1190.8 and redesignate § 1190.9 as § 1190.7.

Subpart C [Redesignated as Subpart B]

5. Redesignate Subpart C as Subpart B.

§ 1190.31 [Amended]

6. Amend § 1190.31 Accessible buildings and facilities: New construction, as follows:

[a] The introductory text is revised to read:

Except as otherwise provided in this part, all new construction of buildings and facilities shall comply with the minimum requirements set forth below, and the technical provisions (designated as Sections 4.2 through 4.35) of the American National Standards Institute (ANSI) A117.1 (1986) standard incorporated by reference in Subpart C, Technical Provisions. The citations in the provisions which follow refer to the sections of the referenced standard.

(b) Section 1190.31(a) is revised to read:

(1) Required accessible route(s) shall connect an accessible building entrance with:

(i) Transportation facilities located within the property line of a given site, including passenger loading zones, public transportation facilities, taxi stands, and parking;

(ii) Public streets and sidewalks;

(iii) Other accessible buildings, facilities, elements, and spaces that are on the same site; and

(iv) All accessible spaces, rooms, and elements within the building or facility.

(2) Where fire code provisions require more than one means of egress from any space or room, then more than one accessible means of egress complying with ANSI 4.3.10 shall be provided for handicapped people and shall be arranged so as to be readily accessible from all accessible rooms and spaces.

(c) Section 1190.31(b) is amended by:

(1) removing "§ 1190.60, Parking and passenger loading zones," wherever it appears and inserting in lieu thereof, "ANSI 4.6 Parking Spaces and Passenger Loading Zones"; and (2) removing the reference to § 1190.60(c)(2)(a) in the last sentence of § 1190.31(b)(1)(ii).

(d) Section 1190.31(c) is amended by:

(1) removing "§ 1190.70, Ramps and curb ramps"; and (2) removing "§ 1190.50(h)" in paragraph (f)(3) and inserting in lieu thereof "ANSI 4.3.10." (k) Section 1190.31(j) is amended by removing "[Reserved]" and adding "If operable windows are provided, they shall comply with ANSI 4.12 Windows."

(i) Section 1190.31(k) is revised to read as follows:

(1) Toilet and bathing facilities. If toilet and bathing facilities are provided, then each public and and common use toilet room shall comply with ANSI 4.22, Toilet Rooms, Bathrooms, Bathing Facilities and Shower Rooms. Other toilet rooms shall be adaptable. If bathing facilities are provided, then each public and common use bathing facility shall comply with ANSI 4.22. In each such facility where any of the fixtures and accessories specified in ANSI 4.16, Water Closets; 4.17, Toilet Stalls; 4.18, Urinals; 4.19, Lavatories, Sinks and Mirrors; 4.20, Bathtubs; and 4.21, Shower Stalls, are provided, at least one accessible fixture and accessory of each type provided shall comply with the provisions in the subsection applicable to that fixture or accessory.

Bathrooms in dwelling units shall comply with ANSI 4.32.4. Bathrooms. For special use situations, refer to Subpart E of this Part 1190, Special Building or Facility Types or Elements.

(m) Section 1190.31(j) is amended by removing "§ 1190.160, Drinking fountains and water coolers," and "§ 1190.160" the other two times it appears, and inserting in lieu thereof "ANSI 4.15, Drinking Fountains and Water Coolers," and "ANSI 4.15," respectively.

(n) Section 1190.31(m) is amended by removing "§ 1190.170, Controls and operating mechanisms," and inserting in lieu thereof, "ANSI 4.25, Controls and Operating Mechanisms."

(o) Section 1190.31(n) is amended by:

(1) removing "§ 1190.180" and inserting in lieu thereof, "ANSI 4.26," and (2)
adding at the end of the paragraph the following:

* * * * *

In facilities with sleeping accommodations, the sleeping accommodations shall have an alarm system complying with ANSI 4.26.4. Auxiliary Alarms. Emergency warning systems in health care facilities may be modified to suit standard health care alarm design practice.

(p) Section 1190.31(o) is revised to read:

(o) Detectable warnings. Detectable warnings complying with ANSI 4.27.3, Tactile Warnings on Doors to Hazardous Areas, shall be provided on the hardware of all doors leading to hazardous areas. Such warnings shall not be used at emergency exit doors. Detectable warnings are not required at locations other than doors to hazardous areas by this part. If detectable warnings are provided, the specifications at ANSI 4.27 may be used as guidance.

Note. — The ATBCB has funded research in the area of detectable tactile surface treatments. The research findings were inconclusive and, therefore, recommended no mandatory requirements at this time. Technical assistance materials are available from ATBCB, 330 C Street, SW, Washington, DC 20002 (202) 472-2700 (voice or TDD).

(q) Section 1190.31(p) is revised to read as follows:

(p) Signage. Signage shall comply with ANSI 4.28.4. Signage, Permanent signage that identifies rooms and spaces shall also comply with ANSI 4.26.4.

Exception: The provisions of ANSI 4.26.4 are not mandatory for temporary information on room and space signage, such as current occupant’s name, provided the permanent room or space identification complies with ANSI 4.30.4.

(r) Section 1190.31(q) is amended by removing “§ 1190.210” wherever it appears and inserting in lieu thereof “ANSI 4.29.”

(s) Section 1190.31(r) is amended by removing “§ 1190.220, Seating, tables and work surfaces,” and inserting in lieu thereof “ANSI 4.30, Seating, Tables and Work Surfaces.”

(t) Section 1190.31(s) is amended by:

(1) removing “§ 1190.220, Assembly areas” and “§ 1190.230,” and inserting in lieu thereof “ANSI 4.31, Auditorium and Assembly Areas” and “ANSI 4.31,” respectively; and

(2) removing “§ 1190.50, Walks, floors and accessible routes” and inserting in lieu thereof “ANSI 4.3, Accessible Routes.”

(u) Section 1190.31(t) is amended by removing “§ 1190.240,” wherever it appears and inserting in lieu thereof “ANSI 4.23.”

(v) new § 1190.31(u) is added to read as follows:

(v) Housing. Accessible housing shall:

(1) Comply with the requirements of this § 1190.31 as it applies to public use and common use areas and areas where handicapped persons may be employed, except as follows:

(A) No accessible dwelling units are located above or below the accessible grade level; and

(B) At least one of each type of common area and amenity provided for use of residents and visitors is available at the accessible grade level.

(ii) Entrances: Entrances complying with ANSI 4.14 shall be provided as necessary to achieve access to and egress from buildings and facilities.

Exception: In projects consisting of one-to-four family dwellings where accessible entrances would be extraordinarily costly due to site conditions or local code restrictions, accessible entrances are required only to those buildings containing accessible dwelling units.

(iii) Common Areas: At least one of each type of common area and amenity in each project shall be accessible and shall be located on an accessible route to any accessible dwelling unit.

(2) Provide dwelling units complying with ANSI 4.32, Dwelling Units, in accordance with the following table:

<table>
<thead>
<tr>
<th>Facilities</th>
<th>Application</th>
</tr>
</thead>
<tbody>
<tr>
<td>Hotels, Motels, Boarding houses, Multifamily housing (Apartment houses)</td>
<td>5 percent of the total units, or at least one, whichever is greater.</td>
</tr>
<tr>
<td>Federally assisted.</td>
<td>5 percent of the total, or at least one unit, whichever is greater.</td>
</tr>
<tr>
<td>Federally owned.</td>
<td>5 percent of the total, or at least one unit, whichever is greater.</td>

</tr>
<tr>
<td>One and two family dwelling. Federally assisted, rental.</td>
<td>5 percent of the total, or at least one unit, whichever is greater.</td>
</tr>
</tbody>
</table>

(w) A new § 1190.31(v) is added to read as follows:

(v) Health care facilities. Accessible health care facilities shall:

(1) Comply with the requirements of this § 1190.31 as it applies to public use and common use areas and areas where handicapped persons may be employed; and

(2) Provide patient rooms and patient toilet rooms complying with Part 6 of the Uniform Federal Accessibility Standards (UFAS) in accordance with the following table:

<table>

§ 1190.32 [Amended]

7. Section 1190.32, Accessible buildings and facilities: Additions, is amended as follows:

(a) In paragraph [a], by removing “§ 1190.120” and inserting in lieu thereof “ANSI 4.14.”

(b) In paragraph [b], by removing “§ 1190.50, Walks, floors and accessible routes,” and inserting in lieu thereof “ANSI 4.14, Accessible Route.”

(c) In paragraph [c], by removing “§ 1190.150, Toilet and bathing facilities,” and inserting in lieu thereof “ANSI 4.22, Toilet Rooms, Bathrooms, Bathing Facilities and Shower Rooms.”

(d) By removing paragraph [f].

§ 1190.33 [Amended]

8. Section 1190.33, Accessible buildings and facilities: Alterations, is amended as follows:

(a) In paragraph [a](1), by changing the period at the end thereof to a comma, and adding, “except as noted in paragraph [a](2) of this section.”

(b) By removing paragraph [a](4) and redesignating [a] (2) and [3] as [a] (3) and (4) and adding a new paragraph [a](2) as follows: Exceptions to the
requirements of paragraph (a)(1) of this section for existing buildings or facilities are:

(i) Stairs. Full extension of stair handrails shall not be required in alterations where such extensions would be hazardous or impossible due to plan configuration.

(ii) Elevators. (A) If a safety door edge is provided in existing automatic elevators, then the automatic door reopening devices may be omitted (see ANSI 4.10.6).

(B) Where existing shaft or structural elements prohibit strict compliance with ANSI 4.10.9, then the minimum floor area dimensions may be reduced by the minimum amount necessary, but in no case shall they be less than 48 in. by 48 in. (1220 mm by 1220 mm).

(iii) Doors. (A) Where existing elements prohibit strict compliance with the clearance requirements of ANSI 4.13.3, a projection of 5/8 in. (16 mm) maximum will be permitted for the latch side door stop.

(B) If existing thresholds measure 3/4 in. (19 mm) high or less, and are beveled or modified to provide a beveled edge on each side, then they may be retained.

(iv) Toilet rooms. Where alterations to existing facilities make strict compliance with ANSI 4.22 and 4.23 structurally impracticable, the addition of one "unisex" toilet per floor containing one water closet complying with ANSI 4.16 and one lavatory complying with ANSI 4.19, located adjacent to existing toilet facilities, will be acceptable in lieu of making existing toilet facilities for each sex accessible.

(v) Assembly areas. (A) In alterations where it is structurally impracticable to disperse seating throughout the assembly area, seating may be located in collected areas as structurally feasible. Seating shall adjoin an accessible route that also serves as a means of emergency egress.

(B) In alterations where it is structurally impracticable to alter all performing areas to be on an accessible route, then at least one of each type shall be made accessible.

(c) In newly redesignated paragraph (a)(1) by removing § 1190.70, Ramps and curb ramps; § 1190.100, Elevators; or § 1190.110, Platform lifts, and inserting in lieu thereof, “ANSI 4.6, Ramps; 4.10, Elevators; or 4.11, Platform Lifts.”

(d) In paragraph (c)(1), by removing “§ 1190.50, Walks, floors and accessible routes” and inserting in lieu thereof, “ANSI 4.3, Accessible Routes.”

(e) In paragraph (c)(2), by removing “§ 1190.120” and inserting in lieu thereof, “ANSI 4.14.”

(f) In paragraph (c)(3), by removing “§ 1190.150, Toilet and bathing facilities” wherever it appears and inserting in lieu thereof, “ANSI 4.22, Toilet Rooms, Bathrooms, Bathing Facilities, and Shower Rooms.”

(g) By revising paragraphs (c)(6)(i) and (vii) as follows:

(i) ANSI 4.6, Parking Spaces and Passenger Loading Zones;

(ii) ANSI 4.15, Drinking Fountains and Water Coolers;

(iii) ANSI 4.23, Storage;

(iv) ANSI 4.26, Alarms;

(v) ANSI 4.29, Telephones;

(vi) ANSI 4.30, Seating, Tables and Work Surfaces;

(vii) ANSI 4.31, Auditorium and Assembly Areas.

Subpart D—Redesignated as Subpart C]

9. Subpart D—Technical Provisions is amended by redesigning it as Subpart C and by revising it to read:

Subpart C—Technical Provisions

Sec.

1190.40 Technical specifications.

1190.50 Exceptions.

Subpart C—Technical Provisions

§ 1190.40 Technical specifications. Features, elements and spaces required to be accessible by §§ 1190.31, 1190.32, or 1190.33 shall meet the technical requirements specified in the provisions of sections 4.2 through 4.32 of ANSI A117.1-1986, “American National Standard for Buildings and Facilities—Providing Accessibility and Usability for Physically Handicapped People,” which is incorporated herein by reference, except as amended in the section which follows. This standard is published by the American National Standards Institute, Inc., 1430 Broadway, New York, New York 10018. Copies may be ordered from the Institute at that address.

§ 1190.50 Exceptions.

(a) Under ANSI 4.10, Elevators, the following:

(1) Hall call buttons provided under ANSI 4.10.3 shall be raised or flush.

(2) Buttons on elevator control panels provided under ANSI 4.10.12(1) Buttons, shall be raised or flush.

(b) Under ANSI 4.7, Curb Ramps, paragraph 4.7.7, Warning Textures, and 4.7.12, Uncurbed Intersections, shall not apply.

(c) Under ANSI 4.21, Shower Stalls, the following:

(1) Under ANSI 4.1.6, Shower Unit, installation of a fixed shower head may be permitted in lieu of an adjustable-

height or hand-held shower head in unmonitored facilities where vandalism is a concern; and

(2) Curbs provided under ANSI 4.21.7, Curbs, in shower stalls that are 36 in by 36 in (915 mm by 915 mm) shall have a maximum height of 1/8 in (13 mm).

(d) ANSI 4.28, Signage, is amended to require that interior tactile signage identifying rooms and spaces be located alongside the door on the latch side and be mounted at a height between 54 in. and 66 in (1370 mm and 1675 mm) above the finished floor.

(e) Under ANSI 4.31, Auditorium and Assembly Areas, paragraph 4.31.3, Placement of Wheelchair Locations, is amended to allow accessible viewing positions to be clustered in bleachers, balconies and other areas that have sight lines requiring slopes greater than 5 percent, or to permit equivalent accessible viewing positions to be located on levels having accessible egress.

Subpart E [Redesignated as Subpart D]

10. Subpart E—Special Building or Facility Types or Elements is redesignated as Subpart D and § 1190.60 is added to read as follows:

§ 1190.60 Special building or facility types.

The requirements specified in the Uniform Federal Accessibility Standards (UFAS) in Section 5, Restaurants and Cafeterias; 6, Health Care; 7, Mercantile; 8, Libraries, and 9, Postal Facilities, are deemed to satisfy minimum guidelines and requirements of the ATBCB for accessibility standards for those building and facility types.

BILLING CODE 0620–BP–M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

Endangered and Threatened Wildlife and Plants; Proposed Threatened Status for Quercus hinckleyi (Hinckley Oak)

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: The Service proposes to determine that a plant, Quercus hinckleyi (Hinckley oak), is a threatened species. Hinckley oak is known from three documented localities in Presidio County, western Texas. Each population contains fewer than 60 individuals. These small populations are threatened.
by road improvements, taking, and introduction of exotic game into the habitat. A final determination that *Quercus hinckleyi* is threatened will implement the full protection provided by the Endangered Species Act of 1973 (Act), as amended. The Service seeks data and comments from the public on this proposal.

**DATES:** Comments from all interested parties must be received by November 16, 1987. Public hearing requests must be received by November 2, 1987.

**ADDRESSES:** Comments and materials concerning this proposal should be sent to the Regional Director, U.S. Fish and Wildlife Service, P.O. Box 1306, Albuquerque, New Mexico 87103. Comments and materials received will be available for public inspection, by appointment, during normal business hours at the Service's Regional Endangered Species Office, 500 Gold Avenue SW., Room 4000, Albuquerque, New Mexico.

**FOR FURTHER INFORMATION CONTACT:** Sue Rutman, Endangered Species Botanist, Albuquerque, New Mexico (see ADDRESSES above) (505/766-3972 or FTS 674-3972).

**SUPPLEMENTARY INFORMATION:**

**Background**

*Quercus hinckleyi*, a very localized member of the oak family (Fagaceae), is a unique component of the middle elevation Chihuahuan Desert vegetation. This small oak occurs at three localities in Presidio County, western Texas. Hinckley oak is readily identified at a distance because the grey-green leaves lend a smoky appearance to the intricately branched plants. Hinckley oak reaches a maximum height of 4 feet (1.2 meters). Plants can occur as single stems or as clonal groups that form dense thickets. The small, glabrous, holly-like (spinescent) leaves persist for more than one season. Acorns are produced annually, occur singly or paired on the branches, and mature in the fall.

Hinckley oak is restricted to dry limestone slopes between 3,500 and 4,500 feet (1,000–1,400 meters) in elevation. The surrounding desertscrub community is dominated by *Agave lecheguilla* (lecheguilla), *Acacia constricta* (whitehorn acacia), and *Parrhornium incanum* (mariola). The area received about 8–12 inches (20–30 cm) of rain per year, and has a frost-free season of 260 days.

The type specimen of Hinckley oak was collected by Dr. C.H. Muller and Dr. L.C. Hinckley near Solitario Peak in 1950. Dr. Muller (1951) subsequently named the species in honor of his colleague, Dr. Hinckley. In 1958, Dr. M.C. Johnson collected a specimen at the type locality (number 3480, deposited at University of Texas at Austin) and noted that 150 plants grew there. The same site presently contains about 60 plants (Miller and Powell 1982). The second population was discovered in 1984 by Mr. Jeff Clark, a former graduate student at Sul Ross University. This population is located directly west of Solitario Peak on the last ridge above Fresno Creek. The third locality, discovered on the west side of Shafter by Dr. M. Powell in 1975, contains 30–40 plants (Miller and Powell 1982). Two other sites in the Shafter area, one 0.5 mile (0.8 km) east and the other 3 miles (4.8 km) south of Shafter, have not been relocated, although the area has been searched intensively by Dr. A.M. Powell of Sul Ross University. The three known populations occur on privately owned land. Searches have been conducted but no populations of *Quercus hinckleyi* have been found in the neighboring Mexican State of Coahuila (Muller 1951).

Mr. Mike Fleming of Big Bend National Park has speculated that Hinckley oak may occur within the Park in the Dead Horse Mountains (pers. comm. 1986). Although no occurrences of Hinckley oak in the Dead Horse Mountains have been documented, Fleming's belief is supported by the presence of suitable habitat and evidence that Hinckley oak was more widely distributed in southwestern Texas prior to the area's desertification about 6,000 years ago (Van Devender et al. 1978). The warming and drying trend probably precipitated the decline of Hinckley oak, and may explain the species' present limited distribution. However, the natural decline of Hinckley oak was being artificially accelerated by man-caused threats.

Federal action involving this species began with section 12 of the Endangered Species Act (Act) of 1973 (16 U.S.C. 1531 et seq.), which directed the Secretary of the Smithsonian Institution to prepare a report on those plants considered to be endangered. This report, designated as House Document No. 94–51, was presented to Congress on January 9, 1975. On July 1, 1975, the Service published a notice in the Federal Register (30 FR 27823) of its acceptance of this report as a petition within the context of section 4(c)(2), now section 4(b)(3)(A), of the Act and of its intention thereby to review the status of those plants. On June 16, 1976, the Service published a proposed rule in the Federal Register (41 FR 24523) to determine approximately 1,700 vascular plant species to be endangered species pursuant to section 4 of the Act. This list of 1,700 plant species was assembled on the basis of comments and data received by the Smithsonian Institution and the Service in response to House Document 94–51 and the July 1, 1975, Federal Register (40 FR 27823), *Quercus hinckleyi* was included in the July 1, 1975, notice of review and the June 16, 1976, proposal. General comments received in relation to the 1976 proposal were summarized in the April 26, 1978, Federal Register (43 FR 17099).

The Endangered Species Act Amendments of 1978 required that all proposals over 2 years old be withdrawn. A one-year grace period was given to proposals already over 2 years old. In the December 10, 1979, Federal Register (44 FR 70796), the Service published a notice of withdrawal of the June 16, 1976, proposal, along with 4 other proposals that had expired. On December 15, 1980 (45 FR 28469), and September 27, 1985 (50 FR 39855), the Service published updated notices reviewing the native plants being considered for classification as threatened or endangered. *Quercus hinckleyi* was included in these notices as a category 1 species. Category 1 comprises taxa for which the Service has sufficient biological information to support proposing them as endangered or threatened.

Section 4(b)(3)(B) of the Act, as amended in 1982, requires the Secretary to make findings on certain pending petitions within one year of their receipt. Section 2(b)(1) of the Act's Amendments of 1982 further requires that all petitions pending on October 12, 1982, be treated as having been newly submitted on that date. Because the 1980 notice of review was accepted as a petition, all of the taxa contained in the notice, including *Quercus hinckleyi*, were treated as being newly petitioned on October 12, 1982. On October 13, 1983, and on or about that date every year thereafter (the latest was October 10, 1986), the Service made one-year findings that the petition to list *Quercus hinckleyi* was warranted but precluded by other listing actions of higher priority. Biological data, supplied by Miller and Powell (1982), fully support a listing of *Quercus hinckleyi* as threatened. The present proposal is based primarily on Miller and Powell's biological data, and constitutes the final finding requirement of section 4(b)(3)(B) of the Act for the petition on this species.

**Summary of Factors Affecting the Species**

Section 4[a][1] of the Act and regulations (50 CFR Part 424)

Section 4[a][1] of the Act and regulations (50 CFR Part 424)
promulgated to implement the listing provisions of the Act set forth the procedures for species to the Federal Lists. A species may be determined to be an endangered or threatened species due to one or more of the five factors described in section 4(a)(1). These factors and their application to Quercus hinckleyi Muller (Hinckley oak) are as follows:

A. The petition or threatened destruction, modification, or curtailment of its habitat or range. In 1986, Texas highway 67 was expanded and the road is now close to the Hinckley oak population at Shafter (Poole, Texas Natural Heritage Program Biologist, pers. comm., 1986). Further expansion or a realignment of the highway may eliminate all or part of the population.

A potential threat to the two populations near Solitario Peak is the planned development of the area as an exotic game ranch. Introduced mammals may degrade the habitat by trampling soil and plants, and both introduced birds and mammals may eat the acorns, stems, or leaves of Hinckley oaks.

B. Overutilization for commercial, recreational, scientific, or educational purposes. The attractive Hinckley oak is currently being propagated and developed as a cultivar by the Texas A&M University Agricultural Extension Service (Miller and Powell 1982). Hinckley oak is easily propagated from acorns or from young shoots. The demand for acorns by people wishing to cultivate the plant may reduce the potential number of recruits to the native populations. However, the actual impact of acorn collecting is unknown.

C. Disease or predation. Native deer, small mammals, and birds eat the acorns or the oak. This form of predation has an unknown impact on Hinckley oak populations. As mentioned in Factor A, the introduction of non-native mammal and bird predators remains a potential threat. Hinckley oaks have no apparent disease problems.

D. The inadequacy of existing regulatory mechanisms. Hinckley oak is not currently protected by any Federal or State law.

E. Other natural or manmade factors affecting its continued existence. The scarcity (fewer than 200 plants) of Hinckley oak, its limited distribution, and the widely separated populations make this species vulnerable to both natural and man-caused threats. Any further reduction in plant numbers could reduce the reproductive capabilities and genetic potential of the species.

The Service has carefully assessed the best scientific and commercial information available regarding the past, present, and future threats faced by this species in determining to propose this rule. Based on this evaluation, the preferred action is to list Quercus hinckleyi as threatened. This action seems appropriate because, although this species has a small population size and limited distribution, it has good recovery potential and, at the present rate of decline, the danger of extinction does not appear to be in the foreseeable future. For the reasons given below, no critical habitat has been proposed for this species.

Critical Habitat

Section 4(a)(3) of the Act, as amended, requires that to the maximum extent prudent and determinable, the Secretary designate any habitat of a species that is considered to be critical habitat at the time the species is determined to be endangered or threatened. The Service finds that designation of critical habitat is not prudent for this species at this time. As discussed under Factor B in the "Summary of Factors Affecting the Species," Quercus hinckleyi is threatened by taking, an activity difficult to control and not regulated by the Endangered Species Act with respect to plants, except for a prohibition against removal and reduction to possession of endangered plants from lands under Federal jurisdiction. Publication of critical habitat descriptions would make this species even more vulnerable and increase enforcement problems. All involved parties and landowners will be notified of the location and importance of protecting Hinckley oak habitat. Protection of this species' habitat will be addressed through the recovery process and through the section 7 jeopardy standard. No net benefit for the conservation of this species would accrue from designating critical habitat. Therefore, it would not be prudent to determine critical habitat for Quercus hinckleyi at this time.

Potential Recovery Actions

Potential recovery actions include collection of acorns to produce plants for reintroduction into suitable habitat, property protection, coordination with the Texas Highway Department and coordination with private organizations and both private landowners to develop appropriate conservation and management measures.

Available Conservation Measures

Conservation measures provided to species listed as endangered or threatened under the Endangered Species Act include recognition, recovery actions, requirements for Federal protection, and prohibitions against certain practices. Recognition through listing encourages and results in conservation actions by Federal, State, and private agencies, groups, and individuals. The Endangered Species Act provides for possible land acquisition and cooperation with the States and requires that recovery actions be carried out for all listed species. Such actions are initiated by the Service following listing. Some actions may be undertaken prior to listing. See Potential Recovery Actions above. The protection required for Federal agencies and the prohibitions against taking are discussed, in part below.

Section 7(a) of the Act, as amended, requires Federal agencies to evaluate their actions with respect to any species that is proposed or listed as endangered or threatened and with respect to its critical habitat, if any is being designated. Regulations implementing this interagency cooperation provision of the Act are codified at 50 CFR Part 402. Section 7(a)(4) requires Federal agencies to confer informally with the Service on any action that is likely to jeopardize the continued existence of a proposed species or result in destruction or adverse modification of proposed critical habitat. If a species is listed subsequently, section 7(a)(2) requires Federal agencies to ensure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of such a species or to destroy or adversely modify its critical habitat. If a Federal action may affect a listed species or its critical habitat, the responsible Federal agency must enter into formal consultation with the Service. The only anticipated Federal project involving Quercus hinckleyi is the possible funding by the Federal Highway Administration of any maintenance and widening activities for Texas highway 67 in this part of Presidio County.

The Act and its implementing regulations found at 50 CFR 17.17 and 17.72 set forth a series of general trade prohibitions and exceptions that apply to all threatened plants. All trade prohibitions of section 9(a)(2) of the Act, as implemented by 50 CFR 17.71, apply. These prohibitions, in part, make it illegal for any person subject to the jurisdiction of the United States to import or export any threatened plant, transport it in interstate or foreign commerce in the course of a commercial activity, sell or offer it for sale in interstate or foreign commerce, or remove it from areas under Federal jurisdiction and reduce it to possession.
Seeds from cultivated specimens of threatened plant species are exempt from these prohibitions provided that a statement of "cultivated origin" appears on their containers. Certain exceptions can apply to agents of the Service and State conservation agencies. The Act and 50 CFR 17.72 also provide for the issuance of permits to carry out otherwise prohibited activities involving threatened species under certain circumstances. It is anticipated that few trade permits would ever be sought or issued because Q. hinckleyi is not common in cultivation or in the wild. Requests for copies of the regulations on plants and inquiries regarding them may be addressed to the Federal Wildlife Permit Office, U.S. Fish and Wildlife Service, Washington, DC 20240 (703/235-1903).

Public Comments Solicited

The Service intends that any final action resulting from this proposal will be as accurate and as effective as possible. Therefore, any comments or suggestions from the public, other concerned government agencies, the scientific community, industry, or any other interested party concerning any aspect of this proposal are hereby solicited. Comments are particularly sought concerning:

(1) Biological, commercial trade, or other relevant data concerning any threat (or lack thereof) to Hinckley oak;
(2) The location of any additional populations of Hinckley oak and the reasons why any habitat should or should not be determined to be critical habitat as provided by section 4 of the Act;
(3) Additional information concerning the range and distribution of Hinckley oak; and
(4) Current or planned activities in the subject area and their possible impacts on Hinckley oak.

Final promulgation of the regulation on Hinckley oak will take into consideration the comments and any additional information received by the Service, and such communications may lead to adoption of a final regulation that differs from this proposal.

The Endangered Species Act provides for a public hearing on this proposal, if requested. Requests must be filed within 45 days of the date of the proposal. Such requests must be made in writing and addressed to the Regional Director (see ADDRESSES section).

National Environmental Policy Act

The Fish and Wildlife Service has determined that an Environmental Assessment, as defined under the authority of the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to section 4(a) of the Endangered Species Act of 1973, as amended. A notice outlining the Service's reasons for this determination was published in the Federal Register on October 25, 1983 (48 FR 49244).

Proposed Regulations Promulgation

Accordingly, it is hereby proposed to amend Part 17, Subchapter B of Chapter I, Title 50 of the Code of Federal Regulations, as set forth below:

PART 17—(AMENDED)

1. The authority citation for Part 17 continues to read as follows:

2. It is proposed to amend § 71.12(h) by adding the following, in alphabetical order under the family Fagaceae, to the List of Endangered and Threatened Plants:

§ 71.12 Endangered and threatened plants.

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Forms Under Review by Office of Management and Budget

The Department of Agriculture has submitted to OMB for review the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35) since the last list was published. This list is grouped into new proposals, revisions, extensions, or reinstatements. Each entry contains the following information:

(1) Agency proposing the information collection; (2) Title of the information collection; (3) Form number(s), if applicable; (4) How often the information is requested; (5) Who will be required or asked to report; (6) An estimate of the number of responses; (7) An estimate of the total number of hours needed to provide the information; (8) An indication of whether section 3504(h) of P.L. 96-511 applies; (9) Name and telephone number of the agency contact person.

Questions about the items in the listing should be directed to the agency person named at the end of each entry. Copies of the proposed forms and supporting documents may be obtained from: Department Clearance Officer, USDA, OIRM, Room 404–W Admin. Bldg., Washington, DC 20250, (202) 447–2118.

Comments on any of the items listed should be submitted directly to: Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20593, Attn: Desk Office for USDA.

If you anticipate commenting on a submission but find that preparation time will prevent you from doing so promptly, you should advise the OMB Desk Office of your intent as early as possible.

BILLING CODE 3410–01–M

Office of the Secretary

Illinois Forestry Development Program; Determination of Primary Purpose of Program Payments for Consideration as Excludable From Income Under Section 126 of the Internal Revenue Code of 1954, as Amended

AGENCY: Office of the Secretary, USDA.

ACTION: Notice of determination.

SUMMARY: The Secretary of Agriculture has determined that payments made to landowners under the Illinois Forestry Development Program are made primarily for the purpose of improving forests. This determination, which is made in accordance with section 126 of the Internal Revenue Code of 1954, as amended, and the provisions of 7 CFR Part 14, permits recipients of these payments to exclude some or all of them from gross income for Federal income tax purposes if certain other conditions are met.

FOR FURTHER INFORMATION CONTACT: Frederick A. Dorrell, Director, Cooperative Forestry, Forest Service, USDA, P.O. Box 2417, Washington, DC 20013, (703) 235–2212.

SUPPLEMENTARY INFORMATION: Section 126 of the Internal Revenue Code of 1954, as added by the Revenue Act of 1976 and amended by the Technical Corrections Act of 1979, provides that certain payments made under State programs may be eligible for exclusion from gross income if certain determinations are made. The Secretary of Agriculture must determine whether payments made under State programs are made primarily for the purpose of conserving soil and water resources, protecting or restoring the environment, improving forests, or providing a habitat for wildlife.” In making this determination, the Secretary of Agriculture must evaluate each program according to criteria set forth in 7 CFR Part 14.

One such program carried out by the state of Illinois (i.e., the Illinois Forestry Development Program) is authorized by the Illinois Forestry Development Act (Ill. Ann. Stat. ch. 96 1/2, pars. 9101 through 9107) (Smith–Hurd 1983). This program is designed to provide technical and financial assistance to private landowners to increase the supply of timber from private forest lands. The program is administered by the state of Illinois Department of Conservation through its Division of Forest Resources and Natural Heritage. An eligible entity is any private timber grower who owns or operates at least five contiguous acres of land in the State on which timber is produced.

Cost-share payments are made under the program for the satisfactory installation of forestry practices developed to accomplish one or more of the following:

(a) Reforestation of land suitable for growing timber, including protection from fire and domestic livestock.

(b) Timber stand improvement.

Eligible practices for which cost-share assistance is made available under the program are: site preparation for planting or natural regeneration, tree planting, vegetation control, timber stand improvement (including pruning), fire breaks, and protection from domestic livestock which includes fencing.

Cost-share payments under the program can be made in an amount that does not exceed: (1) 40 percent of the total cost of the forestry management practices for such practices approved to be funded from monies appropriated for this purpose for fiscal year 1986; (2) 60 percent of the total cost of the forestry management practices for such practices approved to be funded from monies appropriated for this purpose for fiscal year 1987; and (3) 80 percent of the total cost of the forestry management practices for such practices approved to be funded from monies appropriated for this purpose for subsequent fiscal years. Cost share funds shall be paid from monies appropriated to the Department by the General Assembly for that purpose from the Illinois Forestry Development Fund or any other fund in

Federal Register
Vol. 52, No. 179
Wednesday, September 16, 1987
the State Treasury. The maximum payment per participant per year is $1,000. A practice cannot be repeated on the same land within a 10 year period and a practice must be effective for a minimum of 10 years. Property upon which cost-share payments are installed must be protected from destructive fires and animal grazing.

The authorizing legislation, regulations, and operating procedures for the Forestry Development Program of the State of Illinois have been carefully examined using the criteria set forth in 7 CFR Part 14. The Department has concluded that payments made under this forestry cost-sharing program are made to provide financial assistance to agricultural landowners in carrying out forest improvement practices. A "Record of Decision, Illinois Forestry Development Program: Primary Purpose Determination for Federal Tax Purposes" has been prepared and is available upon request from Cooperative Forestry, Forest Service, USDA. Requests may be sent to the address listed above.

Determination

It is hereby determined in accordance with section 126(b)(1) of the Internal Revenue Code of 1954, as amended, and 7 CFR Part 14, that all cost-share payments made for forest improvement practices under the Illinois Forestry Development Act of the state of Illinois (Ill. Ann. Stat., ch. 96 1/2, pars. 9101 through 9107) (Smith-Hurd 1983) are made primarily for the purpose of improving forests.

Richard E. Lyng,
Secretary of Agriculture.

Record of Decision—Illinois Forestry Development Program Primary Purpose Determination for Federal Tax Purposes

Introduction: The Secretary of Agriculture is authorized by section 126 of the Internal Revenue Code of 1954, as amended, to determine the primary purpose for which payments are made under certain Federal and State programs. The determination will identify payments that recipients may exclude from their gross income for Federal tax purposes to the extent allowed by the Secretary of the Treasury.

Basis for Determination: U.S. Department of Agriculture (USDA) determinations are made in accordance with 7 CFR Part 14 by reviewing authorizing legislation, regulations, and operating policy to identify the purposes for which cost-share payments are made. Final determinations are made on the basis of program, category of practices, or practice, and are published in the Federal Register.

Statement of Findings: The Forestry Development Program of the State of Illinois is authorized by the Illinois Forestry Development Act (Ill. Ann. Stat., ch. 96 1/2, pars. 9101 through 9107) (Smith-Hurd 1983). The purpose of this program is to promote the development of an active forestry industry in the State of Illinois.

A Forestry Development Fund was established by the Illinois Forestry Development Act (the "Act") to fund the program from amounts derived from an assessment of a four percent harvest fee on timber severed in Illinois.

The Director of the Department of Conservation administers the program through the Division of Forest Resources and Natural Heritage. Program guidelines are in Title 17, Chapter I, Subchapter D, Part 1537 of the Illinois Administrative Code. The program provides technical and cost-share assistance to eligible landowners and timber growers to increase the productivity of their privately owned forests through the application of approved forest management practices.

The Illinois Forestry Development Program encourages private landowners to apply silvicultural practices for the purpose of commercially growing timber through the establishment of forest stands, or by encouraging the proper regeneration of forest stands to commercial production levels. The Illinois Division of Forest Resources and Natural Heritage provides the required technical assistance to install the approved practices.

The approved practices are: (1) Site preparation—the preparation of a site for planting seedlings or for natural regeneration of a commercial forest tree species; (2) tree planting—the planting of a sufficient number of seedlings to establish a forest stand; (3) vegetation control—treatment of competing vegetation to allow seedlings to become established; (4) timber stand improvement—releasing established reproduction of desired tree species for the purpose of ensuring adequate regeneration of a commercial stand, or pruning selected trees to improve quality; (5) protection from fire—construction of fire lanes; and (6) protection from domestic livestock—fencing to protect the woodland area approved for forest management practices from overgrazing. A forest management plan is developed or approved by the forester representing the Division of Forestry Resources and Natural Heritage. These plans are evaluated annually for reapproval.

The maximum cost-share assistance for each practice or separate component is a percentage of the actual cost of performing the treatment(s) considered necessary to obtain the needed practice. Provisions are made so that the participant will make a significant contribution to the cost of performing the practice. Cost share payments under the program can be made in an amount that does not exceed: (1) 40 percent of the total cost of the forestry management practices for such practices approved to be funded from monies appropriated for this purpose for the fiscal year 1986; (2) 60 percent of the total cost of the forestry management practices for such practices approved to be funded from monies appropriated for this purpose for the fiscal year 1987; and (3) 80 percent of the total cost of the forestry management practices for such practices approved to be funded from monies appropriated for this purpose for the subsequent fiscal years. Cost share funds shall be paid from monies appropriated to the Department by the General Assembly for that purpose from the Illinois Forestry Development Fund or any other fund in the State Treasury. The maximum payment per participant per year is $1,000. A practice cannot be repeated on the same land within a 10 year period and a practice must be effective for a minimum of 10 years. Property upon which cost-share practices are installed must be protected from destructive fires and animal grazing.

An eligible entity is a private timber grower who owns or operates at least five contiguous acres of land in the State on which timber is produced, and has an Illinois Department of Conservation approved forest management plan as described in 17 Illinois Administrative Code 1537. A timber grower is defined in section 2(i) of the Act as:

The owner, tenant or operator of land in this State who has an interest in, or is entitled to receive any part of the proceeds from, the sale of timber grown in this State and includes persons exercising authority to sell timber.

Summary: The purpose of the Illinois Forestry Development Act is to increase the productivity of the privately owned forests in Illinois, and to ensure that forest operations performed under the Forestry Development Act are conducted in a manner designed to protect the soil, air, and water resources. Participation is voluntary. The approved practices are site preparation, tree planting, vegetation
control, timber stand improvement, and protection from fire and domestic livestock.

**INTERNATIONAL TRADE ADMINISTRATION**

**Preliminary Results of Antidumping Duty Administrative Review; Precipitated Barium Carbonate From the Federal Republic of Germany**

**AGENCY:** International Trade Administration/Import Administration, Department of Commerce.

**ACTION:** Notice of preliminary results of antidumping duty administrative review.

**SUMMARY:** In response to a request by petitioner, the Department of Commerce has conducted an administrative review of the antidumping duty order on precipitated barium carbonate from the Federal Republic of Germany. The review covers one manufacturer/exporter of this merchandise to the United States and the period July 1, 1985 through June 30, 1986. The review indicates the existence of no dumping margins for the firm during the period. Interested parties are invited to comment on these preliminary results.

**EFFECTIVE DATE:** September 16, 1987.

**FOR FURTHER INFORMATION CONTACT:**

**SUPPLEMENTARY INFORMATION:**

**Background**

On June 1, 1987, the Department of Commerce ("the Department") published in the Federal Register (52 FR 20436) the final results of its last administrative review of the antidumping duty order on precipitated barium carbonate from the Federal Republic of Germany (46 FR 32884, June 25, 1981). After the promulgation of our new regulations, the petitioner requested in accordance with § 353.53(a) of the Commerce Regulations that we conduct an administrative review. We published a notice of initiation on July 17, 1986 (51 FR 25923). The Department has now conducted that administrative review in accordance with section 751 of the Tariff Act of 1930 ("the Tariff Act").

**Scope of the Review**

The United States has developed a system of tariff classification based on the international harmonized system of Customs nomenclature. Congress is considering legislation to convert the United States to this Harmonized System ("HS") by January 1, 1988. In view of this, we will be providing both the appropriate Tariff Schedule of the United States Annotated ("TSUSA") item numbers and the appropriate HS item numbers with our product descriptions on a test basis, pending Congressional approval. As with the TSUSA, the HS item numbers are provided for convenience and Customs purposes. The written description remains dispositive.

We are requesting petitioners to include the appropriate HS item numbers as well as the TSUSA item numbers in all new petitions filed with the Department. A reference copy of the proposed Harmonized System schedule is available for consultations in the Central Records Unit, Room B-008, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230. Additionally, all Customs offices have reference copies, and petitioners may contact the Import Specialist at their local Customs office to consult the schedule.

Imports covered by the review are shipments of precipitated barium carbonate, a chemical compound (BaCO₃), currently classifiable under TSUSA item 472.0600 and under HS item 2836.60.00.

The review covers one manufacturer/exporter of West German precipitated barium carbonate to the United States,
Preliminary Results of the Review

As a result of our comparison of United States price to foreign market value, we preliminarily determine that no dumping margins exist for Kali-Chemie AG for the period July 1, 1985 through June 30, 1986.

Interested parties may submit written comments on these preliminary results within 5 days of the date of publication of this notice, may request disclosure within 5 days of the date of publication and may request a hearing within 8 days of the date of publication. Any hearing, if requested, will be held 30 days after the date of publication or the first workday thereafter. Any request for an administrative review, protective order must be made no later than 5 days after the date of publication. The Department will publish the final results of the administrative review including the results of its analysis of any such comments or hearing.

Further, as provided for by section 751(a)(1) of the Commerce Regulations, since there was no dumping the Department shall not require a cash deposit of estimated antidumping duties for Kali-Chemie AG. For any shipments from the one remaining known manufacturer/exporter not covered by this review, the cash deposit will continue to be the rate published in the final results of the last administrative review for that firm (50 FR 16330, April 25, 1985). For any future entries of this merchandise from a new exporter not covered in this or prior administrative reviews, whose first shipments occurred after June 30, 1986 and who is unrelated to the reviewed firm or any previously reviewed firm, no cash deposit shall be required. These deposit requirements are effective for all shipments of West German precipitated barium carbonate entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of this administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and § 353.53a of the Commerce Regulations (19 CFR 353.53a).

Gilbert B. Kaplan,
Deputy Assistant Secretary for Import Administration.

Date: September 8, 1987.

BILLING CODE 3510-05-M

Preliminary Determination of Sales at Less Than Fair Value; Stainless Steel Butt-Weld Pipe and Tube Fittings From Japan

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice.

SUMMARY: We have preliminarily determined that stainless steel butt-weld pipe and tube fittings (SSBW pipe fittings) from Japan are being, or are likely to be, sold in the United States at less than fair value. We have notified the U.S. International Trade Commission (ITC) of our determination and have directed the U.S. Customs Service to suspend the liquidation of all entries of the subject merchandise as described in the "Suspension of Liquidation" section of this notice. If this investigation proceeds normally, we will make a final determination by November 24, 1987.

SUPPLEMENTARY INFORMATION:

Preliminary Determination

We have preliminarily determined that SSBW pipe fittings from Japan are being, or are likely to be, sold in the United States at less than fair value, as provided in section 753 of the Tariff Act of 1930, as amended (the Act). Fuji Acetylene Industries Co., Ltd. is excluded from this determination because the margin found is de minimis. We made fair value comparisons on sales of the class or kind of merchandise to the United States during the period of investigation, November 1, 1986, through April 30, 1987. The margins of sales at less than fair value are shown in the "Suspension of Liquidation" section of this notice.

Case History

On April 2, 1987, we received a petition in proper form filed by Flowline Corporation on behalf of the U.S. industry producing SSBW pipe fittings. In compliance with the filing requirements of § 353.36 of the Commerce Regulations (19 CFR 353.36), the petition alleged that imports of the subject merchandise from Japan are...
being, or are likely to be, sold in the United States at less than fair value within the meaning of section 731 of the Act and that these imports are causing material injury, or threaten material injury, to a United States industry. After reviewing the petition, we determined that it contained sufficient grounds upon which to initiate an antidumping investigation. We initiated such an investigation on April 21, 1987 (52 FR 13734, April 24, 1987) and notified the ITC of our action.

On May 27, 1987, questionnaires were presented to Nippon Benkan Kogyo, K.K. (Benkan), and Mie Horo. It was determined that these companies accounted for more than 65% of all exports to the United States of SSBW pipe fittings from Japan. We received a response from Benkan on July 27, 1987, and supplemental responses on August 10 and August 25, 1987. Mie Horo has indicated that it would not respond to our questionnaire. We also received voluntary responses from Fuji Acetylene Industries Co., Ltd. (Fuji), and Nippon Bulge Industries, Ltd. (NBI). Since the Department determined that the response submitted by NBI contained major deficiencies, we have not analyzed that response for purposes of this investigation. We have, however, determined that Fuji's response was substantially complete and have analyzed it for purposes of this determination.

Scope of Investigation

The products covered by this investigation are SSBW pipe and tube fittings whether finished or unfinished, including as-formed tubular blanks, under 14 inches in inside diameter, currently classified under the Tariff Schedules of the United States Annotated (TSUSA) under item number 610.8948 and currently classifiable under HS item number 7307.23.00.

The United States has developed a system of tariff classification based on the international harmonized system of Customs nomenclature. Congress is considering legislation to convert the United States to this Harmonized System by January 1, 1988. In view of this, we will be providing both the appropriate TSUSA item numbers and the appropriate HS item numbers with our product descriptions on a test basis, pending Congressional approval. As with the TSUSA, the HS item numbers are provided for convenience and Customs purposes. The written description remains dispositive.

We are requesting petitioners to include the appropriate HS item numbers as well as the TSUSAS item numbers in all new petitions filed with the Department. A reference copy of the proposed HS schedule is available for consultation in the Central Records Unit, Room B-099, U.S. Department of Commerce, 14th Street and Pennsylvania Avenue, NW., Washington, DC, 20230.

Additionally, all Customs offices have reference copies, and petitioners may contact the Import Specialist at their local Customs office to consult the schedule.

Fair Value Comparisons

To determine whether sales in the United States of the subject merchandise were made at less than fair value, we compared the United States price with the foreign market value. We investigated all sales of SSBW pipe fittings for the period November 1, 1986, through April 30, 1987. Mie Horo did not respond to our questionnaire; therefore, we based our fair value comparisons for it on the best information available in accordance with section 776(d) of the Act.

United States Price

We based United States price for all U.S. sales on purchase price in accordance with section 772(b) of the Act. Some of these sales were made directly to unrelated customers in the United States prior to importation. Under these circumstances, section 772(b) clearly requires that purchase price be used for determining the U.S. sales price. All of the other sales to the United States were through a related U.S. selling agent; however, the U.S. customer took shipment directly from the manufacturer. We used purchase price, as opposed to exporter's sales price, for these sales for the following reasons:

1. The merchandise in question was shipped directly from the manufacturer to the unrelated buyer, without being introduced into the inventory of the related U.S. selling agent;
2. This was the customary commercial channel for sales of this merchandise between the parties involved; and
3. The related selling agent located in the United States acted only as a processor of sales-related documentation and a communication link with the unrelated U.S. buyer.

Where all the above elements are met, we regard the routine selling functions of the exporter as having been merely relocated geographically from one country of exportation to the United States, where the sales agent performs them. Whether these functions take place in the United States or abroad does not change the substance of the transactions or the functions themselves.

We regard the diversion of merchandise into the related U.S. selling agent's inventory as an important factor in distinguishing between ESP and purchase price because it is associated with a materially different type of selling activity than that which occurs on a direct shipment to an unrelated U.S. purchaser. In situations where the related party places the merchandise into inventory, it commonly incurs substantial storage and financial carrying costs and has added flexibility in its marketing. With direct shipments, the activity which takes place in the U.S. is the mere facilitation of a transaction.

We also use the inventory test because it can be readily understood and applied by respondents who must reply to Department questionnaires in a short period of time. It is objective in nature, as the final destination of the goods can be established from normal commercial documents associated with the sale and verified with certainty.

We calculated purchase price based on the f.o.b. c.i.f., duty paid, packed prices to unrelated purchasers in the United States. We made deductions for foreign inland freight, ocean freight, Japan brokerage, U.S. brokerage, U.S. duty, marine insurance, and U.S. inland freight, as appropriate. For Mie Horo, we calculated the purchase price of SSBW pipe fittings on the basis of the best information available as contained in the petition, which is the prices that two U.S. distributors paid for imports of the subject merchandise. Petitioner deducted from those prices the 7% duty on SSBW pipe fittings and an additional 10% to account for Japanese inland freight, ocean freight, marine insurance and brokerage.

Foreign Market Value

In accordance with section 773(a) of the Act, we calculated foreign market value based on f.o.b. packed home market prices to related and unrelated purchasers. We reviewed Benkan's pricing practices and preliminarily determined that its prices to related purchasers represent arms-length transactions. We made deductions, where appropriate, for inland freight, rebates and discounts. We made adjustments for differences in circumstances of sale for credit expenses pursuant to 19 CFR 353.15. We denied claims for technical services and advertising because the basis of calculating these expenses was not fully described. We deducted home market packing and added U.S. packing.
We established separate categories of “such or similar” merchandise, pursuant to section 771(16) of the Act, on the basis of type of fitting (elbows, tees, reducers, stub-ends, caps), nominal size (dimensions of the pipe fittings), degree of processing (finished or unfinished), wall thickness, material grade and raw material (seamless or welded). Where we found identical products sold in the home market we used those sales for comparison to U.S. sales. Where there were no identical products sold in the home market for comparison to products sold to the United States, we made adjustments to account for differences in the physical characteristics of the merchandise, in accordance with section 773(a)(4)(C) of the Act. These adjustments were based on differences in the costs of material, direct labor and directly related factory overhead.

For Mie Horo, we calculated the foreign market value on the basis of best information available, which is the constructed value data contained in the petition, applying the statutory minimum of 10% for general expenses and the 8% minimum for profit.

Currency Conversion

In accordance with § 353.50(a)(1) of our regulations, all currency conversions were made at the rates certified by the Federal Reserve Bank.

Critical Circumstances

On April 2, 1987, the petitioners alleged that critical circumstances exist within the meaning of section 733(e) of the Act with respect to SSBW pipe fittings from Japan. In determining whether critical circumstances exist, we must examine whether:

(A)(i) There is a history of dumping in the United States or elsewhere of the class or kind of merchandise which is the subject of the investigation; or

(ii) The person by whom, or for whose account, the merchandise was imported knew or should have known that the exporter was selling the merchandise which is the subject of the investigation at less than fair value; and

(B) There have been massive imports of the class or kind of merchandise which is the subject of the investigation over a relatively short period.

Pursuant to section 735(a)(3)(B), we generally consider the following data in order to determine whether massive imports have taken place over a short period of time: (1) The volume and value of imports; (2) seasonal trends; and (3) the share of domestic consumption accounted for by the imports.

Verification

As provided in section 776(a) of the Act, we will verify all information used in reaching the final determination in this investigation.

Suspension of Liquidation

In accordance with section 735(f) of the Act, we will notify the ITC of our determination. In addition, we are making available to the ITC all nonprivileged and nonproprietary information relating to this investigation. The ITC will determine whether these imports materially injure, or threaten material injury to, a U.S. industry before the later of 120 days after we make our preliminary affirmative determination or 45 days after we make our final determination.

Public Comment

In accordance with § 353.47 of our regulations (19 CFR 353.47), if requested, we will hold a public hearing to afford interested parties an opportunity to comment on this preliminary determination at 2:00 p.m. on October 23, 1987, at the U.S. Department of Commerce, Room 3708, 14th Street and Constitution Avenue, NW., Washington, D.C. 20230. Individuals who wish to
SUPPLEMENTARY INFORMATION:

Background

The Office of Foreign Availability (OFA) has completed an assessment, pursuant to Part 391 of the Export Administration Regulations (15 CFR Part 391), on the foreign availability of controllable pitch propellers and has recommended a finding of foreign availability as defined by law. The purpose of the assessment was to determine whether national security export controls should be continued. Based on such assessment, the Director of OFA has determined that foreign availability exists for such equipment within the meaning of section 5(f) of the Export Administration Act of 1979, as amended.

Based on this determination, Export Administration will publish regulations amending the national security export controls on these controllable pitch propellers. Specifically, individual validated licenses to destinations other than controlled countries will no longer be required for controllable pitch propellers with horsepower ratings of 40,000 and below. Export Administration also has begun the process whereby the United States Government will work with COMOM member governments to reach agreement on an orderly reduction in the multilateral controls placed on such controllable pitch propellers when exported to controlled countries.

If OFA receives substantive new evidence affecting this foreign availability determination, the assessment will be reevaluated. Inquiries concerning the scope of this assessment may be directed to Office of Foreign Availability at the above address.

Irwin M. Pikus,
Director, Office of Foreign Availability.

FOR FURTHER INFORMATION CONTACT:
Donald Brzyczynski, Office of Foreign Availability, Department of Commerce, Washington, DC 20230, Telephone: (202) 377-3564.

SUPPLEMENTARY INFORMATION:

Background

The Office of Foreign Availability (OFA) has completed an assessment, pursuant to Part 391 of the Export Administration Regulations (15 CFR Part 391), on the foreign availability of controlled pitch propellers and has recommended a finding of foreign availability as defined by law. The purpose of the assessment was to determine whether national security export controls should be continued. Based on such assessment, the Director of OFA has determined that foreign availability exists for such equipment within the meaning of section 5(f) of the Export Administration Act of 1979, as amended, to initiate and review claims of foreign availability on items controlled for national security purposes.

OFA has completed an assessment on stored program controlled wire bonders controlled under paragraph (b)(5)(ii) of the "List of Equipment Controlled by ECCN 1355A" in ECCN 1355A on the Commodity Control List (Supplement No. 1 to 15 CFR 390.1). The equipment that is controlled by ECCN 1355A is defined as "stored program controlled" wire bonders. (The term "stored program controlled" is defined in Technical Note 4 in ECCN 1355A.) Based on this assessment, the Department of Commerce has found foreign availability for this commodity.

FOR FURTHER INFORMATION CONTACT:
John Pastore, Office of Foreign Availability, Department of Commerce, Washington, DC 20230, Telephone: (202) 377-5953.

SUPPLEMENTARY INFORMATION:

Background

The President has decided not to override the finding of foreign availability for this commodity.

Therefore, Export Administration will publish regulations amending the national security export controls on "stored program controlled" wire bonders. Specifically, individual validated licenses to destinations other than controlled countries will no longer be required for "stored program controlled" wire bonders with parameters below certain levels specified in the amended regulations. Export Administration also will begin the process whereby the United States Government will work with COMOM member governments to reach agreement on a orderly change in the multilateral controls placed on "stored program controlled" wire bonders when exported to controlled countries.

If OFA receives substantive new evidence affecting this foreign availability determination, the assessment will be reevaluated. Inquiries concerning the scope of this assessment may be directed to Office of Foreign Availability at the above address.

Irwin M. Pikus,
Director, Office of Foreign Availability.

National Oceanic and Atmospheric Administration

Evaluation of State/Territorial Coastal Management Programs, Coastal Energy Impact Programs and National Estuarine Reserves

ACTION: Notice of availability of evaluation findings.

SUMMARY: Notice is hereby given of the availability of the evaluation findings for the Hawaii Coastal Management Program, Section 312 of the Coastal Zone Management Act of 1972, as amended, (CZMA) requires a continuing review of the performance of each coastal state with respect to funds authorized under the CZMA and to the implementation of its federally approved Coastal Management Program. The state evaluated was found to be adhering both to the programmatic terms of its financial assistance award and/or to the approved coastal management program; and to be making progress on award tasks, special award conditions, and significant improvement tasks aimed at program implementation and enforcement, as appropriate. Accomplishments in implementing coastal zone management programs were occurring with respect to the national coastal management objectives identified in section 303(2)(A) through (I) of the CZMA, and adhered to the terms of any grant, loan or cooperative agreement funded under CZMA. The reviews of National Estuarine Research Reserves are conducted pursuant to section 315(f) of the CZMA, as amended by Pub. L. 99-272, which requires the Secretary of Commerce to evaluate periodically the operation and management of each Reserve, including education and interpretive activities, and the research being conducted within the reserve. The reviews involve consideration of written submissions, a site visit to the state, and consultations with interested Federal, state and local agencies and members of the public. Public meetings will be held.

Management-Labor Textile Advisory Committee; Partially Closed Meeting

A meeting of the Management-Labor Textile Advisory Committee will be held on Tuesday, October 6, 1987, at 1:30 p.m., Herbert C. Hoover Building, Room H4830, 14th Street and Constitution Avenue NW., Washington, DC 20230. (The Committee was established by the Secretary of Commerce on October 18, 1961 to advise officials of the Department of problems and conditions in the textile and apparel industry.)

General Session: 1:30 p.m. Review of import trends, report on conditions in the domestic market, and other business.

Executive Session: 2:00 p.m. Discussion of matters properly classified under Executive Order 12356 (3 CFR, 1982 Comp. p. 186) and listed in 5 U.S.C. 552b(c)(1).

The general session will be open to the public with a limited number of seats available. A Notice of Determination to close meetings or
as part of the site visits. The state will issue notice of these meetings. Copies of each state's most recent performance reports, as well as the OCRM's notification letter and supplemental information request letter to the state are available upon request from the OCRM. Written comments from all interested parties on each of these programs to the contact listed below are encouraged at this time. OCRM will place subsequent notice in the Federal Register announcing the availability of the Final Findings based on each evaluation once these are completed.

(Federal Domestic Assistance Catalog 11.419 Coastal Zone Management Program: Administration)

Peter L. Tweedt,
Director, Office of Ocean and Coastal Resource Management.

FOR FURTHER INFORMATION CONTACT: Major Ilona E. Prewitt, Director, DACOWITS and Military Women Matters, OASD (Force Management and Personnel), The Pentagon, Room 3D769, Washington, DC 20301-4000; telephone (202) 697-2122.

SUPPLEMENTARY INFORMATION: The following rules and regulations will govern the participation by members of the public at the meeting:

(1) Members of the public will not be permitted to attend the official Department of Defense luncheon or dinner.

(2) All business sessions, to include the Executive Committee Meetings, will be open to the public.

(3) Interested persons may submit a written statement for consideration by the Committee and/or make an oral presentation of such during the meeting.

(4) Persons desiring to make an oral presentation or submit a written statement to the Committee must notify the point of contact listed above no later than October 5, 1987.

(5) Length and number of oral presentations to be made will depend on...
the number of requests received from the members of the public.

(6) Oral presentations by members of the public will be permitted only from 9:00 a.m. to 9:30 a.m. on Wednesday, October 28, 1987, before the Full Committee.

(7) Each person desiring to make an oral presentation or submit a written statement must provide the DACOWITS office with a copy of the presentation or 60 copies of the statement by October 9, 1987.

(8) Persons submitting a written statement only for inclusion in the minutes of the meeting must submit one (1) copy either before or during the meeting or within five (5) days after the close of the meeting.

(9) Other new items from members of the public may be presented in writing to any DACOWITS member for transmittal to the DACOWITS Chairman or Director, DACOWITS and Military Women Matters, to consider.

(1) Members of the public will not be permitted to enter into oral discussion conducted by the Committee members at any of the sessions; however, they will be permitted to reply to questions directed to them by the members of the Committee.

(II) Members of the public will not be permitted to orally question the scheduled speakers if recognized by the Chairman and if time allows after the official participants have asked questions and/or made comments.

(II) Questions from the public will not be accepted during the Subcommittee Sessions, the Executive Committee Meetings, or the Business Session on Thursday, October 29, 1987.

Patricia H. Means,
OSD Federal Register Liaison Officer, Department of Defense.

DEPARTMENT OF EDUCATION
National Advisory and Coordinating Council on Bilingual Education; Meeting

AGENCY: Department of Education, National Advisory and Coordinating Council on Bilingual Education.

ACTION: Notice of meeting.

The public is being given less than 15 days notice of this meeting inasmuch as the Designated Federal Official was unable to obtain a quorum.

SUMMARY: This notice sets forth the schedule and proposed agenda of a forthcoming meeting of the National Advisory and Coordinating Council on Bilingual Education. Notice of this meeting is required under section 10(a)(2) of the Federal Advisory Committee Act. This document is intended to notify the general public of their opportunity to attend.

DATES: September 21 and 22, 1987, 9:15 a.m. until 5:00 p.m. The meeting will be conducted at the Dupont Plaza Hotel, 1500 New Hampshire Avenue, Washington, DC 20036.

FOR FURTHER INFORMATION CONTACT: Anna Maria Farias, Designated Federal Official, Office of Bilingual Education and Minority Languages Affairs, Reporter's Building, Room 421, 400 Maryland Avenue, SW., Washington, DC 20202 (202) 732-5063.

SUPPLEMENTARY INFORMATION: The National Advisory and Coordinating Council on Bilingual Education is established under section 752(a) of the Federal Advisory Committee Act (20 U.S.C. 3262). NACBE is established to advise the Secretary of the Department of Education concerning matters arising in the administration of the Bilingual Education Act and other laws affecting the education of limited English proficient populations. The meeting of the Council is open to the public. The proposed agenda includes the following:

I. Roll Call
II. Adoption of Minutes of Previous Meeting
III. Introduction of Visitors
IV. Presentation of Information by OBEMLA Director or Designee
V. Presentation of information by Members of general Public or Organizations on Agenda Items (Limited to 5 minutes per person from any one group)
VI. Committee Reports
VII. Old Business
VIII. New Business
IX. Presentation of Information by Members of general Public or Organizations on Items for Possible Future Action by Council (Limited to 5 minutes per person from any one group)
X. Meetings of Individual Committees
XI. Reconvening of Council
XII. Adjournment

Records are kept of all Council proceedings and are available for public inspection at the Office of Bilingual Education and Minority languages Affairs, Reporter's Building, Room 421, 400 Maryland Avenue, SW., Washington, DC 20202, Monday through Friday from 9:00 a.m.–5:30 p.m.

Alicia Coro,
Director, Office of Bilingual Education and Minority Affairs.

BILLING CODE 6450-01-M
Federal Energy Regulatory Commission

[Docket Nos. ER87–610–000 et al.]

Electric Rate and Corporate Regulation Filings: Wisconsin Electric Power Co. et al.

Take notice that the following filings have been made with the Commission:

1. Wisconsin Electric Power Company
[Docket No. ER87–610–000]

Copies of the filing were served upon Wisconsin Public Service Corporation, Green Bay, Wisconsin, Commonwealth Edison Company, Chicago, Illinois, and the Public Service Commission of Wisconsin, Madison, Wisconsin.

Comment date: September 21, 1987, in accordance with Standard Paragraph E at the end of this notice.

2. Montaup Electric Company
[Docket Nos. ER81–749–000, ER82–325–000, ER83–110–000, ER84–55–000, ER87–471–000]

Take notice that on August 28, 1987, Montaup Electric Company (Montaup) tendered for filing a compliance report showing the refunds that were credited to the Customer’s bills dated August 14, 1987 for electric service rendered during the month of July 1987.

Montaup states that the refund include credits to the affiliates in Docket Nos. ER83–110–000 and ER84–55–000 due to stipulations contained in their settlement. Montaup also states that credit was applied to the non-affiliates’ bills from settlement in Docket No. ER84–55–000; but no credit was owed to them from Docket Nos. ER81–749–000, ER82–325–000 or ER83–110–000 due to prior settlement with them.

Comment date: September 21, 1987, in accordance with Standard Paragraph E at the end of this notice.

3. Niagara Mohawk
[Docket No. EL86–22–000]

Take notice that on August 31, 1987, Niagara Mohawk tendered for filing pursuant to the Commission’s letter order dated June 18, 1987, its Compliance Refund Report. The refund of $45,000, without interest, was tendered to the Power Authority of the State of New York pursuant to Article II.A. of the Settlement Agreement in this docket is for ultimate distribution to Airco, Inc., SKW Alloy, Inc., Occidental Chemical Corporation and Olin Corporation and represents a full and complete settlement of this proceeding.

Comment date: September 21, 1987, in accordance with Standard Paragraph E at the end of this notice.

4. Interstate Power Company
[Docket No. ES87–38–000]

Take notice that on August 25, 1987, Interstate Power Company (Applicant) filed an application with the Commission seeking an order pursuant to section 204 of the Federal Power Act for $50 million short-term promissory notes commercial paper to be issued on or before December 31, 1988, and to mature no later than December 31, 1989.

Comment date: September 24, 1987, in accordance with Standard Paragraph E at the end of this notice.

5. Carolina Power & Light Company
[Docket No. ER87–503–000]

Take notice that on September 3, 1987, Carolina Power & Light Company (CP&L) tendered for filing changes to CP&L’s Backstand Power and Transmission rates which are a part of the Service Agreement dated October 27, 1972. The Service Agreement, as amended, is on file with the Commission as Carolina Power & Light Company Rate Schedule FPC No. 102.

This filing amends the original filing dated June 18, 1987, to reflect the 34% statutory federal income tax rate which became effective on July 1, 1987. CP&L’s Backstand Power and Transmission rates filed herewith decreased from the 1985 rates and are for the time period July 1, 1987, through June 30, 1988. It is respectfully requested that the Commission waive its 60-day notice requirement and allow the supplements filed herewith to become effective on July 1, 1987.

Comment date: September 23, 1987, in accordance with Standard Paragraph E at the end of this notice.

6. Commonwealth Electric Company
[Docket No. ER87–616–000]

Take notice that on September 3, 1987, Commonwealth Electric Company (Commonwealth) tendered for filing, pursuant to § 35.12 of the Commission’s regulations, a proposed tariff for the provision of non-firm transmission services at wholesale. Commonwealth states that its proposed tariff is intended to be generally-available to investor-owned utilities, municipalities operating an electric distribution system and “Qualifying Facilities”. The tariff proposes a cost of service formula rate to be implemented on an annual basis. If implemented based upon date applicable to calendar 1986, such rate would be $1.31 per kilowatt per month. Commonwealth proposes that its tariff become effective upon November 9, 1987, an even date slightly in excess of sixty days following the instant filing.

Commonwealth states that copies of the tendered filing have been served upon the Massachusetts Department of Public Utilities.

Comment date: September 23, 1987, in accordance with Standard Paragraph E at the end of this notice.

7. Pacific Gas and Electric Company
[Docket No. ER88–272–002]

Take notice that on September 4, 1987, Pacific Gas and Electric Company (PGandE) tendered for filing a compliance report containing the calculation of revenue at the proposed and present rates for the Western Area Power Administration (WAPA).

Comment date: September 23, 1987, in accordance with Standard Paragraph E at the end of this notice.

8. Southern Company Services, Inc.
[Docket No. ER87–617–000]

Take notice that on September 3, 1987, Southern Company Services, Inc. on behalf of Alabama Power Company, Georgia Power Company, Gulf Power Company and Mississippi Power Company (Southern Companies), tendered for filing a change in rates for Service Schedule B and Service Schedule E of the Interchange Contract dated December 15, 1980 between City of Tallahassee, Florida and Southern Companies. The proposed change would reduce the return on common equity component of the formula rate described in the Allocation Methodology and Periodic Rate Computation Procedure Manual and the Addendum to Service Schedule E, Allocation Methodology and
Periodic Rate Computation Procedure Manual of Southern Companies from 15.0% to 14.0%.

Comment date: September 23, 1987, in accordance with Standard Paragraph E at the end of this document.

9. Southern Company Services, Inc.[Docket No. ER87-616-000]

Take notice that on September 3, 1987, Southern Company Services, Inc. on behalf of Alabama Power Company, Georgia Power Company, Gulf Power Company and Mississippi Power Company (Southern Companies), tendered for filing a change in rates for Service Schedule B of the Interchange Contract dated August 7, 1981 between South Carolina Public Service Authority and Southern Companies. The proposed change would reduce the return on common equity component of the formula rate described in the Allocation Methodology and Periodic Rate Computation Procedure Manual from 16.0% to 14.0%.

Comment date: September 23, 1987, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraph E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission; Hydroelectric Applications have been filed with the Federal Energy Regulatory Commission and are available for public inspection:

1 a. Type of Application: Minor License.
2 a. Type of Application: Preliminary Permit.
3 a. Type of Application: Minor License.

Applications Filed With the Commission; Hydroelectric Applications (Hydro Power Development et al.)

Take notice that the following hydroelectric applications have been filed with the Federal Energy Regulatory

Purpose of Project: The proposed run-of-river project would be sold to Public Service Company of New Hampshire. The applicant estimates that the cost of the work to be performed under the preliminary permit would be $40,000.

This notice also consists of the following standard paragraphs: A5, A7, A9, A10, B, C, and D2.

3 a. Type of Application: Minor License.

2. Type of Application: Constructed Minor License.
3. Project No.: 10102-000.
4. Date Filed: September 29, 1986.
5. Applicant: Franklin Springer.
9. Applicant: City of Klamath Falls, OR.
10. Date Filed: November 28, 1986.
11. Applicant: City of Klamath Falls, OR.
16. FERC Contact: James Hunter (202) 376-9814.
17. Comment Date: October 9, 1987.
18. Description of Project: The project would consist of: (1) A 75-foot-high, 500-foot-long earthen dam with a crest elevation of 3,265.0 feet, diverting flow to a 500-foot-long power canal and spillway approach channel; (2) a 250-foot-long un gated concrete ogee-crest spillway located adjacent to the power canal intake with a crest elevation of 3,250.0 feet, and appurtenant hydraulic jump stilling basin; (3) a 25-foot-high by 20-foot-wide concrete low level outlet conduit with slide gate control facilities, and discharging to the spillway stilling basin; (4) an impoundment with a surface area of 70 acres and a gross storage capacity of 1,500 acre-feet at a normal maximum pool elevation of 3,250.0 feet; (5) power canal intake facilities consisting of a 115-foot-long by 65-foot-long fish screenhouse, a 65-foot-long concrete-lined transition, and a 27-foot-wide radial gate; (6) a 7.3-mile-long power diversion conduit consisting of a 27-foot-wide concrete flume and a 7,000-foot-long concrete-lined channel; (7) a 2,000-foot-long forebay with a normal pool elevation of 3,224.5 feet; (8) a wasteway to the river consisting of an overflow crest discharging into a side channel chute and stilling basin for a total length of 1,850 feet; (9) a concrete penstock intake structure with two 17-foot-high by 12-foot-wide chambers; (10) two 1,320-foot-long, 10-foot-diameter steel penstocks; (11) a 70-foot-long, 65-foot-wide fish screenhouse; and (12) an existing powerhouse containing a new single generating unit with a rated capacity of 60 kW at a head of 19 feet, and (4) a 60-foot-long, 4.8-kV transmission line connecting to the existing New York State Electric & Gas Corporation line.

19. The estimated average annual energy production is 350,000 kWh. The project power would be sold to New York State Electric and Gas Corporation. The applicant estimates that the cost of the work to be performed under the preliminary permit would be $15,000.

20. This notice also consists of the following standard paragraphs: A5, A7, A9, A10, B, C, and D2.
21. Type of Application: Preliminary Permit.
22. Project No: 10421-000.
25. Name of Project: Howard Creek.
26. Location: On Howard Creek in T36N, R6E, near Burlington in Skagit County, WA.
27. Filed Pursuant to: Federal Power Act 16 U.S.C. 791(a) through 825(r).
28. Applicant Contact: Mr. Lawrence J. McMurry, 12122-196th Avenue NE., Redmond, WA 98052, (206) 885-3986.
29. FERC Contact: Julie Bernt, (202) 376-9812.
30. Comment Date: October 17, 1987.
31. Description of Project: The proposed project would consist of: (1) The existing 8-foot-high, 60-foot-long, Oriskany Falls Dam at crest elevation 768 feet m.s.L owned by Robert M. Harding; (2) an existing 30-inch-diameter, 25-foot-long steel penstock; (3) an existing powerhouse containing a new single generating unit with a rated capacity of 60 kW at a head of 19 feet, and (4) a 60-foot-long, 4.8-kV transmission line connecting to the existing New York State Electric & Gas Corporation line.

32. The estimated average annual energy production is 350,000 kWh. The project power would be sold to New York State Electric and Gas Corporation. The applicant estimates that the cost of the work to be performed under the preliminary permit would be $15,000.

33. This notice also consists of the following standard paragraphs: A3, A9, B, C, and D1.
long, 60-inch-diameter penstock; (3) a powerhouse containing one generating unit with a rated capacity of 4,230 kW; and (4) an 11-mile-long transmission line. Applicant estimates the average annual energy production to be 18.53 GWh and the cost of the work performed under the preliminary permit would be $40,000.

l. Purpose of Project: The power produced is to be sold to a local power company.

m. This notice also consists of the following standard paragraphs: A5, A7, A9, A10, B, C, and D2.

Section 31, Township 43 N, Range 9W, and New Mexico Principal Meridian.

g. Filed Pursuant to: Federal Power Act 16 U.S.C. 791(a) through 825(r).

h. Applicant: Energy Alternatives.

j. Comment Date: October 13, 1987.

k. Description of Project: The proposed run-of-river project would consist of: (1) A 9-foot-high weir (2) a small reservoir with a surface area of 2 acres at elevation 8,617 feet masl (3) an intake structure at the left abutment of the weir; (4) a 54-inch-diameter, 6,500-foot-long penstock; (5) a powerhouse with a 4.6-MW generating unit; (6) a 60-foot-long, 12.5-kV underground cable; and (7) other appurtenances. The applicant estimates an average annual generation of 16,700,000 kWh. The project would be located on private lands except for about 2,000 feet of the penstock that would be located within the Uncompaghre National Forest. l. Purpose of Project: Project energy would be sold to the Colorado Ute Electric Association.

m. This notice also consists of the following standard paragraphs: A5, A7, A9, A10, B, C, and D2.

10. a. Type of Application: Preliminary Permit.

b. Project No: 10432-000.

c. Date Filed: June 15, 1987.
d. Applicant: Energy Alternatives.

j. Comment Date: October 13, 1987.
k. Description of Project: The proposed project would consist of: (1) Two diversion weirs each approximately 8 feet high and 30 feet wide with inlet elevations of 3,000 feet masl; (2) an 18-inch-diameter bifurcated penstock totalling 8,800 feet in length leading to: (3) a powerhouse at elevation 1,300 feet masl containing two generating units with a total capacity of 1,500 kW operating at 1,700 feet of hydraulic head; (4) a tailrace; and (5) a 0.25-mile-long, gravel access road; and (7) other appurtenances. The applicant estimates the average annual energy production to be 5.1 GWh. The approximate cost of the studies under the permit would be $50,000.

l. Purpose of Project: Applicant intends to sell the power generated from the proposed facility to Pgei Sound Power and Light of Washington.
m. This Notice also consists of the following standard paragraphs: A5, A7, A9, A10, B, C, and D2.

9. a. Type of Application: Preliminary Permit.
b. Project No: 10433-000.
c. Date Filed: June 15, 1987.
d. Applicant: Town of Telluride.
e. Name of Project: Chappel Dam.
f. Location: On the San Miguel River in San Miguel County, Colorado (Section 32, Township 43 N, Range 9W, and
h. Applicant Contact: Mr. Gary F. Croskey, Chappel Hydro Company, 336 University Dr., East Lansing, MI 48823. (517) 332-7019.

i. FERC Contact: Dean Wight, (202) 376-9820.

k. Description of Project: The proposed project would consist of: (1) An existing earth embankment and concrete spillway dam 1,050 feet long and 33 feet high; (2) an existing impoundment 453 acres in surface area and of 4,300 acre-feet volume at a normal maximum surface elevation of 815 feet mean sea level; (3) an existing powerhouse 26 feet wide and 31 feet long; (4) two existing turbines, one of which would be refurbished to drive a proposed 250 kW generator; and (5) appurtenant facilities.

The hydraulic head is 28 feet. The estimated annual energy production is 0.9 GWh. The existing facilities are owned by the County of Gladwin, MI. Applicant estimates that the cost of the work to be performed under the preliminary permit would be $32,000.

I. Purpose of Project: Project energy will be 2,077 MWh.

line and substation; and (8) appurtenant facilities; the new development consists of: (9) a slide-gated intake structure; (10) a steel penstock 24 inches in diameter and 100 feet long; (11) a propeller turbine-generator unit rated at 50 kW under a 24-foot head; (12) an outlet to the river; (13) a transmission line connection; and (14) appurtenant facilities. The applicant estimates that the average annual energy output would be 6,300,000 kWh and 386,000 kWh, respectively.

I. Purpose of Project: Project energy would be utilized by the Applicant.

m. This notice also consists of the following standard paragraphs: B and C.

14 a. Type of Application: Amendment to License.

b. Project No.: 4285-008.

d. Applicant: The City of Logan, UT.

e. Name of Project: Logan No. 2 Hydro Project.

f. Location: On Logan River in Cache National Forest and of 4,300 acre-feet volume at a normal maximum surface elevation of 815 feet mean sea level; and (3) the area of 2,200 acres at the spillway crest elevation of 195.5 feet m.s.l.; (3) the intake chamber, related conduits through the dam and a 36-inch-diameter penstock; (4) a new powerhouse containing one 400 kW generating unit; (5) a proposed 1,300-foot-long, 4.8-kV transmission line; and (6) appurtenant facilities. The applicant estimates that the average annual energy generation will be 2,156 MWh.

The Croton Falls Diverting Development will consist of: (1) The 2,200-foot-long, 54-foot-high Croton Falls Diverting Dam; (2) the existing Croton Falls Reservoir having a surface area of 1,166 acres at the spillway crest elevation of 309.5 feet m.s.l.; (3) the intake chamber, related conduits through the dam, and a 36-inch-diameter penstock; (4) a new powerhouse containing one 400 kW generating unit; (5) a proposed 1,300-foot-long, 4.8-kV transmission line; and (6) appurtenant facilities. The applicant estimates that the average annual energy generation will be 2,156 MWh.

The Sodom Dam Development will consist of: (1) The 1,100-foot-long, 98-foot-high Sodom dam and a separate 500-foot-long spillway; (2) the existing, 2705 and 2709.

h. Applicant Contact: Mr. Harvey W. Schultz, Commissioner, Dept. of Environmental Protection, Municipal Building, Room 2358. New York, NY 10007 (212) 669-8264.

i. FERC Contact: Thomas O. Murphy, (202) 376-9829.

k. Description of Project: The proposed project will consist of five developments.

The new Croton Development will consist of: (1) The 2,168-foot-long, 297-foot-high New Croton Dam; (2) the new Croton Reservoir having a surface area of 2,200 acres at the spillway crest elevation of 195.5 feet m.s.l.; (3) the intake structure, gatehouse and related conduits through the dam; (4) a new powerhouse containing three generating units having a total rated generating capacity of 3 MW; (5) a release conduit to the Croton River; (6) a proposed 2.8-mile long, 13.2-kV transmission line; and (7) appurtenant facilities. The applicant estimates that the average annual energy generation will be 11.1 GWh.

The Titicus Dam Development will consist of: (1) The 1.563-foot-long, 124-foot-high Titicus Dam; (2) the existing reservoir having a surface area of 65 acres at the spillway crest elevation of 324.5 feet m.s.l.; (3) the intake structure, a 36-inch-diameter buried penstock, and the powerhouse; (4) a new powerhouse containing three generating units having a total rated generating capacity of 200 kW; (5) a release channel to the Titicus River; (6) a 2,400-foot-long, 13.2-kV transmission line; and (7) appurtenant facilities. The applicant estimates that the average annual energy generation will be 1,276 MWh.

The Croton Falls Reservoir having a surface area of 1,166 acres at the spillway crest elevation of 309.5 feet m.s.l.; (3) the intake chamber, related conduits through the dam, and a 36-inch-diameter penstock; (4) a new powerhouse containing one 400 kW generating unit; (5) a proposed 1,300-foot-long, 4.8-kV transmission line; and (6) appurtenant facilities. The applicant estimates that the average annual energy generation will be 2,156 MWh.

The Croton Falls Diverting Development will consist of: (1) The 2,200-foot-long, 54-foot-high Croton Falls Diverting Dam; (2) the existing Croton Falls Diverting Reservoir having a surface area of 147 acres at the spillway crest elevation of 309.5 feet m.s.l.; (3) the new Croton Reservoir having a surface area of 1,166 acres at the spillway crest elevation of 309.5 feet m.s.l.; (4) a proposed 1,300-foot-long, 4.8-kV transmission line; and (6) appurtenant facilities. The applicant estimates that the average annual energy generation will be 2,156 MWh.

The Sodom Dam Development will consist of: (1) The 1,100-foot-long, 98-foot-high Sodom dam and a separate 500-foot-long spillway; (2) the existing, 2705 and 2709.

j. Comment Date: November 6, 1987.
k. Description of Project: The proposed run-of-river project would consist of: (1) 2 sump-type intake structures, one on the West Fork of Clear Creek and the other on Blue Creek, both at elevation 9,900 feet masl; (2) a main 36-inch-diameter, 5,400-foot-long steel penstock from the West Fork of Clear Creek; (3) a 10-inch-diameter, 400-foot-long steel penstock from the Blue Creek joining the main penstock; (4) a powerhouse with a 1,400-kW turbine-generator unit; (5) a 50-foot-long open channel tailrace returning the water to the West Fork of the Clear Creek; (6) a 25-kV, 300-foot-long transmission line; and other appurtenances.

The applicant estimates an average annual generation of 3,573,378 kWh to be sold to the Public Service Company of Colorado. The project would affect lands of the Arapaho National Forest. This application was filed within the applicant’s preliminary permit term for this project.

This notice also consists of the following standard paragraphs: A5, A7, A9, A10, B.C, and D2.

j. Comment Date: November 13, 1987.
k. Description of Project: The proposed project would use the existing Lake Dardanelle, a part of the McCullon-Kerr Arkansas River Navigation System owned and operated by the U.S. Army Corps of Engineers, Little Rock District, P.O. Box 867, Little Rock, AR 72203, as a lower reservoir, and would consist of (1) a proposed rockfill embankment 50 feet high and 20 feet wide forming a circular impoundment approximately 3000 feet in diameter; (2) a proposed reservoir of 210 acres surface area and 8940 acre-feet volume at a normal maximum surface elevation of 1870 feet NGVD; (3) a proposed reinforced concrete intake structure 95 feet high, 75 feet wide, and 130 feet long; (4) four proposed 12-foot-diameter steel penstocks about 4.5 miles long; (5) a proposed reinforced concrete powerhouse 150 feet high, 325 feet long, and 100 feet wide housing four reversible turbine-pump-generators of 250 MW each; (6) a proposed 500 kV transmission line 9000 feet long; (7) appurtenant facilities. The estimated annual energy production (based on an annual energy input of 4745 GWh) is 3650 GWh. Project power would be sold.

Applicant estimates that the cost of the work to be performed under the preliminary permit would be $10,000,000.

k. Competing Application: Project No. 10449-000, Date Filed: August 3, 1987.

l. Description of Project: The proposed pumped-storage project would utilize the existing U.S. Bureau of Reclamation's Taylor Park Reservoir, on the Taylor River, as the lower reservoir, which has a normal water surface elevation of 9,330 feet msl, and would consist of: (1) A new 440-foot-high, 1,800-foot-long zoned-earth or rock-fill dam with a crest elevation of 70,066 feet msl at the entrance of Union Canyon in Union Park; (2) a reservoir with a surface area of 4,200 acres at normal maximum surface elevation of 10,052 feet msl; (3) an 11-foot-diameter, 8,000-foot-long concrete-lined pressure conduit; (4) a powerhouse with a total installed generating capacity of 60 MW; (5) an 11-foot-diameter, 2,000-foot-long tailrace conduit to the south shore of Taylor Park Reservoir; (6) a 25-mile-long transmission line; and (7) other appurtenances. Applicant estimates an average generation of 83,000 MWh to be used partly by the City of Gunnison and sold to utilities in the southwestern part of the United States.

m. This notice also consists of the following standard paragraphs: A5, A7, A9, A10, B, C, and D2.

Standard Paragraphs

A3. Development Application

Any qualified development applicant desiring to file a competing development application must submit to the Commission on or before the specified comment date for the particular application, a competing development application, or a notice of intent to file such an application. Submission of a timely notice of intent to file a development application allows an interested person to file the competing application no later than 120 days after the specified comment date for the particular application.

A4. Preliminary Permit

Public notice of the filing of the initial preliminary permit application, which has already been given, established the due date for filing competing preliminary permit and development applications or notices of intent. Any competing preliminary permit or development application, or notice of intent to file a competing preliminary permit or development application, must be filed in response to and in compliance with the public notice of the initial preliminary permit application. No competing applications or notices of intent to file competing applications may be filed in response to this notice.

A5. Preliminary Permit

Public notice of the filing of the initial development application, which has already been given, established the due date for filing competing applications or notices of intent. In accordance with the Commission's regulations, any competing development applications must be filed in response to and in compliance with public notice of the initial development application. No competing applications or notices of intent may be filed in response to this notice.

A7. Preliminary Permit

Any qualified development applicant desiring to file a competing preliminary permit application must submit to the Commission on or before the specified comment date for the particular application (see 18 CFR 4.36 (1985)). Submission of a timely notice of intent allows an interested person to file the competing preliminary permit application no later than 30 days after the specified comment date for the particular application. A competing preliminary permit application must conform with 18 CFR 4.30(b) (1) and (9) and 4.36.

A8. Preliminary Permit

Public notice of the filing of the initial preliminary permit application, which has already been given, established the due date for filing competing preliminary permit and development applications or notices of intent. Any competing preliminary permit or development application, or notice of intent to file a competing preliminary permit or development application, must be filed in response to and in compliance with the public notice of the initial preliminary permit application. No competing applications or notices of intent to file competing applications may be filed in response to this notice.

A9. Notice of Intent

Any notice of intent must specify the exact name, business address, and telephone number of the prospective applicant, include an unequivocal statement of intent to submit, if such an application may be filed, either (1) a preliminary permit application or (2) a development application (specify which type of application), and be served on the applicant(s) named in this public notice.

A10. Proposed Scope of Studies Under Permit

A preliminary permit, if issued, does not authorize construction. The term of
the proposed preliminary permit would be 36 months. The work proposed under the preliminary permit would include economic analysis of preliminary engineering plans, and a study of environmental impacts. Based on the results of these studies the Applicant would decide whether to proceed with the preparation of a development application to construction and operate the project.

B. Comments, Protests, or Motions To Intervene

Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 385.210, 385.211, 385.214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission’s Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

C. Filing and Service of Responsive Documents

Any filings must bear in all capital letters the title "Comments", "Notice of Intent To File Competing Application", "Competing Application", "Protest" or "Motion To Intervene", as applicable, and the Project Number of the particular application to which the filing is in response. Any of the above named documents must be filed by providing the original and the number of copies required by the Commission’s regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE, Washington, DC 20426. An additional copy must be sent to: Mr. William C. Wakefield II, Acting Director, Division of Project Management, Federal Energy Regulatory Commission, Room 203-RB, at the above address. A copy of any notice of intent, competing application or motion to intervene must also be served upon each representative of the Applicant specified in the particular application.

D1. Agency Comments

States, agencies established pursuant to federal law that have the authority to prepare a comprehensive plan for improving, developing, and conserving a waterway affected by the project, federal and state agencies exercising administration over fish and wildlife, flood control, navigation, irrigation, recreation, cultural and other relevant resources of the State in which the project is located, and affected Indian tribes are requested to provide comments and recommendations for terms and conditions relevant to the Federal Power Act as amended by the Electric Consumers Protection Act of 1966, the Fish and Wildlife Coordination Act, the Endangered Species Act, the National Historic Preservation Act, the Historical and Archeological Preservation Act, the National Environmental Policy Act, Pub. L. 88-29, and other applicable statutes. Recommended terms and conditions must be based on supporting technical data filed with the Commission along with the recommendations, in order to comply with the requirement in section 313(b) of the Federal Power Act, 16 U.S.C. 825j (b), that Commission findings as to facts must be supported by substantial evidence.

All other federal, state, and local agencies that receive this notice through direct mailing from the Commission are requested to provide comments pursuant to the statutes listed above. No other formal requests will be made. Responses should be confined to substantive issues relevant to the issuance of a license. A copy of the application may be obtained directly from the applicant. If an agency does not respond to the Commission within the time set for filing, it will be presumed to have no comments. One copy of an agency’s response must also be sent to the Applicant’s representatives.

D2. Agency Comments

Federal, State, and local agencies are invited to file comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time specified for filing comments, it will be presumed to have no comments. One copy of an agency’s comments must also be sent to the Applicant’s representatives.

D3a. Agency Comments

The U.S. Fish and Wildlife Service, the National Marine Fisheries Service, and the State Fish and Game agency(ies) are requested, for the purposes set forth in section 30 of the Federal Power Act, to file within 45 days from the date of issuance of this notice appropriate terms and conditions to protect any fish and wildlife resources or otherwise carry out the provisions of the Fish and Wildlife Coordination Act. General comments concerning the project and its resources are requested; however, specific terms and conditions to be included as a condition of exemption must be clearly identified in the agency letter. If an agency does not file terms and conditions within this time period, that agency will be presumed to have none. Other Federal, State, and local agencies are requested to provide comments they may have in accordance with their duties and responsibilities. No other formal requests for comments will be made. Comments should be confined to substantive issues relevant to the granting of an exemption. If an agency does not file comments within 45 days from the date of issuance of this notice, it will be presumed to have no comments. One copy of an agency’s comments must also be sent to the Applicant’s representatives.

D3b. Agency Comments

The U.S. Fish and Wildlife Service, the National Marine Fisheries Service, and the State Fish and Game agency(ies) are requested, for the purposes set forth in section 30 of the Federal Power Act, to file within 45 days from the date of issuance of this notice appropriate terms and conditions to protect any fish and wildlife resources or otherwise carry out the provisions of the Fish and Wildlife Coordination Act. General comments concerning the project and its resources are requested; however, specific terms and conditions to be included as a condition of exemption must be clearly identified in the agency letter. If an agency does not file terms and conditions within this time period, that agency will be presumed to have none. Other Federal, State, and local agencies are requested to provide comments they may have in accordance with their duties and responsibilities. No other formal requests for comments will be made. Comments should be confined to substantive issues relevant to the granting of an exemption. If an agency does not file comments within 45 days from the date of issuance of this notice, it will be presumed to have no comments. One copy of an agency’s comments must also be sent to the Applicant’s representatives.

Kenneth F. Plumb,
Secretary.

[FR Doc. 87-21300 Filed 9-15-87; 8:45 am]
BILLING CODE 6717-01-M

[Docket Nos. CP87-503-000 et al.]

Natural Gas Certificate Filings; Pacific Gas Transmission Co., et al.

Take notice that the following filings have been made with the Commission.
1. Pacific Gas Transmission Co.

[Docket No. CP87–503–000]

Take notice that on August 19, 1987, Pacific Gas Transmission Company (PGT), 160 Spear Street, San Francisco, California 94105–1570, filed in Docket No. CP87–503–000, a petition for waiver of the termination date specified in § 284.105 of the Regulations under the Natural Gas Act (18 CFR 284.105), all as more fully set forth in the petition which is on file with the Commission and open to public inspection.

PGT states that on August 18, 1981, PGT Pacific Interstate Transmission Company (PITCO) entered into a contract (Contract) for the transportation of up to 300,000 Mcf of natural gas per day, on a best efforts basis, from south of Stanfield, Oregon, and delivered the PITCO’s account at a point of interconnection with the facilities of Pacific Gas and Electric Company near Malin, Oregon. PGT further states that the transportation of natural gas commenced April 13, 1982, and originated as a self-implementing transaction pursuant to Part 284, Subpart G of the Regulations and was continued as a “grandfathered” transportation service under the transitional provisions of Order No. 438 (18 CFR 284.105).

PGT states that the Contract originally remained in full force and effect for an initial two-year period, until September 30, 1983. PGT further states that the Contract was subsequently amended to extend the term for additional two-year periods, through September 30, 1985 and September 30, 1987.

PGT states that under Order No. 438, existing Section 311 transportation was automatically allowed to continue on a “grandfathered” basis for a certain period to allow a suitable transition period for transportation arrangements under previous section 311 programs. Pursuant to § 284.105 of the Commission’s Regulations (18 CFR 284.105), such transportation service was allowed to continue as “grandfathered” transportation service until the earlier of the expiration of the then existing contract or October 9, 1987. Thus, PGT states that the section 311 transportation on behalf of PITCO was and is automatically allowed to continue as “grandfathered” transportation only until September 30, 1987.

In order to avoid termination of the transportation service for PITCO on September 30, 1987, PGT requests that such termination date be waived until 30 days after PGT accepts a blanket certificate in Docket No. CP87–159–000. PGT further requests that the Commission treat the petition as a request for any other waivers which may be necessary to enable PGT to continue the transportation on a “grandfathered” basis beyond September 30, 1987, and until 30 days after PGT accepts a blanket certificate in Docket No. CP87–159–000.

Comment date: September 18, 1987, in accordance with the first subparagraph of Standard Paragraph F at the end of this notice.

2. Columbia Gulf Transmission Corp.

[Docket No. CP87–505–000]

Take notice that on August 20, 1985, Columbia Gulf Transmission Corporation (Columbia Gulf), P.O. Box 683, Houston, Texas 77001, filed in Docket No. CP87–505–000 a request pursuant to §§ 157.205 and 157.216 of the Commission’s Regulations under the Natural Gas Act (18 CFR 157.205 and 157.216) for authorization to abandon certain of its natural gas pipeline facilities and appurtenances constructed to take gas from Hufco Petroleum Corporation (Hufco) from offshore Louisiana, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Columbia Gulf states that certain natural gas pipeline facilities, approximately 0.72 miles of 10-inch pipeline from the “A” platform in West Cameron Block 531, offshore Louisiana, to a subsea tie-in in West Cameron Block 510, offshore Louisiana, a dual 8-inch measurement station and associated piping on the “A” platform, will be transferred to Hufco Petroleum Corporation at a price to be determined by the date of transfer in an effort to resolve certain disputes with respect to Columbia Gulf’s transportation rates involving the facilities to be transferred. Therefore, Columbia Gulf seeks permission and approval to abandon.

Comment date: October 23, 1987, in accordance with the first subparagraph of Standard Paragraph F at the end of this notice.

3. North Penn Gas Co.

[Docket No. CP87–507–000]

Take notice that on August 21, 1987, North Penn Gas Company (North Penn), 75–80 Mill Street, Port Allegany, Pennsylvania 16743, filed in Docket No. CP87–507–000 a petition for a declaratory order, pursuant to § 385.207 of the Commission’s Rules of Practice and Procedure (18 CFR 385.207), requesting an order declaring that the construction of certain facilities by Consolidated Gas Transmission Company (Consolidated) requires certification by the Federal Energy Regulatory Commission, as set forth in the petition on file with the Commission and open to public inspection.

North Penn indicates that Consolidated has stated its intention to construct, own, and operate interconnection facilities and transport gas to Corning Natural Gas Corporation (Corning) and/or New York State Electric & Gas Company pursuant to section 311 of the Natural Gas Policy Act (NGPA). It is further stated that in Docket No. CP87–195–000 Consolidated seeks certification under section 7(c) of the Natural Gas Act (NGA) for the construction of such facilities and sales service to Corning.

North Penn States that the question at issue in its petition is whether Consolidated is authorized pursuant to NGPA section 311 to construct facilities for which Consolidated already has applied for certification in Docket No. CP87–195–000, and which Consolidated anticipates using for NGPA section 311 transportation service only until the Commission certifies their use in Docket No. CP87–195–000 for jurisdictional sales service.

Comment date: September 22, 1987, in accordance with the first subparagraph of Standard Paragraph F at the end of this notice.

[Docket No. CP87–499–000]

Take notice that on August 18, 1987, El Paso Natural Gas Company (El Paso), P.O. Box 1492, El Paso, Texas 79973, filed in Docket No. CP87–499–000 pursuant to Rules 209 and 212 of the Commission’s Rules of Practice and Procedure and sections 4, 7, and 16 of the Natural Gas Act a petition for declaratory relief and request for issuance of a show cause order.

El Paso’s petition concerns the parties’ rights and obligations with respect to certain sales of natural gas made by Valero Interstate Transmission Company (VITCO) to El Paso pursuant to a tariff and rate schedule on file with the Commission. El Paso states that it is presently subject to an “Order on Temporary Injunction” issued by the state District Court, Hidalgo County, Texas. El Paso contends that this state
court order compels El Paso to (i) take and pay for specific volumes of gas in direct contravention of Commission Order Nos. 380 and 380–C; (ii) accept from VITCO of gas sold and transported in interstate commerce which sale and transportation have not been authorized under section 7 of the Natural Gas Act or Section 311 of the Natural Gas Policy Act of 1978 and (iii) accept, contrary to its will, deliveries of gas at levels and rates dictated by a state court having no authority to order such sales.

In support of its motion, El Paso notes that both VITCO and El Paso are natural gas companies subject to the Commission's Natural Gas Act jurisdiction. El Paso states that pursuant to a contract dated January 28, 1981, as amended, VITCO agreed to sell up to 31,250 Mcf of gas per day to El Paso for resale. The sales contract became part of VITCO's FERC Gas Tariff. Rate Schedule No. S–3.

According to El Paso, Article V, Section 1 of Rate Schedule S–3 contains a minimum commodity bill such that El Paso pays for a stipulated daily contract quantity multiplied by the applicable contract price, whether or not such quantity was actually taken by El Paso.

El Paso claims that Commission Order No. 380, issued on June 1, 1984, and the regulations thereunder (18 CFR157 et seq.) required the elimination from all natural gas pipeline tariffs of provisions that operated to permit recovery of variable gas cost for gas not taken by the buyer. Commission Order No. 380–C ordered inoperative all minimum take provision effective November 1, 1984. Order No. 380 et al. was affirmed in all significant respects by the United States Court of Appeals for the District of Columbia Circuit. Wisconsin Gas Co. v. FERC, 770 F.2d (D.C. Cir. 1985), cert. denied, 106 S.Ct. 1968 (1986).1

El Paso states that on December 18, 1985, El Paso notified VITCO that in accordance with Order No. 380, et al., it would not pay VITCO for any gas not actually taken by El Paso, but would continue to pay all other charges, including demand charges and other fixed costs, as permitted under Order No. 380.

El Paso claims that certain producer/suppliers of VITCO (clanton, et al.) have brought suit in the state District Court, Hidalgo County, Texas charging VITCO

with breach of the gas supply contract,2 and that VITCO filed a petition naming El Paso as a third party defendant in the action. El Paso asserts that VITCO named El Paso as a third party defendant based on VITCO’s assertion that any failure by VITCO to comply with the Clanton, et al. contracts was due to El Paso’s refusal, as sanctioned by Order No. 380, to honor the minimum bill provision of VITCO’s Rate Schedule S–3. On August 12, 1987, the state court granted a temporary injunction against El Paso, which held that the obligations of VITCO vis-a-vis Clanton, et al., had, as a matter of law, been assumed by El Paso and that Order No. 380, et seq. was not a bar to issuance of a court order enjoining El Paso from failing to take and pay for minimum quantities of gas, under the Clanton, et. al. /VITCO contracts, even though said contracts do not themselves require the purchaser to take and pay for any minimum volume of gas. El Paso states that the state court order provides that El Paso ** * is ordered and directed to receive and take from the wells of Clanton et. al. * * * and Clanton et al. * * * are directed to produce and deliver to VITCO for the account of El Paso * * *.* specified daily takes of gas.

As a result of the court’s order, El Paso claims, it will be forced to pay Clanton, et al. approximately $33,000 per day more than the present market value of the subject gas. El Paso alleges that the net effect of the court’s mandatory minimum take requirement will be to force El Paso to cut back purchases of less costly production, including oil related production and hardship wells. El Paso claims that VITCO has attempted to enjoin El Paso in a manner proscribed by Commission regulations; and that VITCO’s suit seeks to amend El Paso’s order to cut back purchases of gas purchased by El Paso under compulsion of the state court’s injunction order, no new service obligation will attach to El Paso or its facilities requiring abandonment authorization under section 7(b) of the Natural Gas Act.

In addition to the relief set forth above, El Paso requests that the Commission direct Vito to demonstrate why any transportation of gas purchased by El Paso under compulsion of court orders does not thereby render Vitco in violation of sections 4 and 7 of the Natural Gas Act.

El Paso also requests that the Commission bring an action in Federal District Court under section 20 of the Natural Gas Act and request that the Court temporarily restrain Clanton, et al., the state court of Texas, Hidalgo County, and Vitco from violations of Order Nos. 380, et al., the regulations thereunder, sections 4.5, and 7 of the Natural Gas Act and section 311 of the Natural Gas Policy Act of 1978.

Comment date: September 29, 1987, in accordance with the first subparagraph of Standard Paragraph F at the end of this notice.

5. Arkla Energy Resources, a division of Arkla, Inc.

[Docket No. CP87-506-000]

Take notice that on August 21, 1987, Arkla Energy Resources, a division of Arkla, Inc. (AER), P.O. Box 21734, 5th Floor, Monument, Louisiana 71172, filed in Docket No. CP87-506-000 an application pursuant to section 7 of the Natural Gas Act.
Act for permission and approval to abandon the transportation of natural gas by AER for direct sale to 26 industrial customers and a certificate of public convenience and necessity authorizing the transportation of natural gas for the 26 industrial customers, as well as more fully set forth in the application, which is on file with the Commission and open to public inspection.

AER states that its application is filed in accordance with a Stipulation and Agreement dated December 11, 1986, and approved by the Arkansas Public Service Commission on February 13, 1987, regarding the nature and scope of the retail sales services to be offered to those customers by AER. AER asserts that the Stipulation and Agreement provides for a range of retail service options, including 100 percent sales service, combination sales and transportation service, and 100 percent transportation service. AER asserts that for those customers electing the 100 percent transportation service option, the Stipulation and Agreement sets out certain circumstances under which they again could become sales customers of AER and provides for the limited term abandonment of any sales transportation obligations AER otherwise have for the period such customers elect 100 percent transportation service as provided in the Stipulation and Agreement. Twenty-six (See Appendix) of AER's industrial customers have exercised the option to become 100 percent transportation customers, it is stated. AER requests permission and approval for limited term abandonment of its sales transportation obligations to such customers, contingent upon the Commission's issuance of complementary authorizations for the transportation of third-party gas to the former sales customers under a certificate of public convenience and necessity which would be in effect until the customer resumes purchasing gas from AER. If the customer does not resume purchases of gas from AER by January 1, 1994, their authorization for such transportation service would expire, it is indicated. Further, it is indicated that in the event a customer electing the 100 percent transportation option does not return to AER's sales serving by January 1, 1994, AER has the right to seek authorization for permanent abandonment of any direct sales transportation by AER to that customer.

Comment date: September 30, 1987, in accordance with Standard Paragraph F at the end of this notice.

### 6. Colorado Interstate Gas Co.

[Docket No. CP87-510-000]

Take notice that on August 25, 1987, Colorado Interstate Gas Company (CIG) P.O. Box 1087, Colorado Springs, Colorado 80944, filed in Docket No. CP87-510-000 a request pursuant to § 157.205 of the Regulations under the Natural Gas Act for authorization to add an additional point of delivery of natural gas to Greeley Gas Company (Greeley) and to revise the maximum daily volume obligation (MDVO) at an existing delivery point to Northern Gas Division of KN Energy, Inc. (Northern) under the certificate issued in Docket No. CP83-21-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the

---

1. Unable to locate specific docket authorization at this time.
2. Each of the agreements shown also has an overrun provision providing for additional overrun services on an interruptible basis with the exception of A. P. Green Fire Brick Co., American Cyanamid Corp. and Berry Petroleum, who elected interruptible transportation service only.

3. Colorado Interstate Gas Co.

5. Take notice that on August 25, 1987, Colorado Interstate Gas Company (CIG) P.O. Box 1087, Colorado Springs, Colorado 80944, filed in Docket No. CP87-510-000 a request pursuant to §157.205 of the Regulations under the Natural Gas Act for authorization to add an additional point of delivery of natural gas to Greeley Gas Company (Greeley) and to revise the maximum daily volume obligation (MDVO) at an existing delivery point to Northern Gas Division of KN Energy, Inc. (Northern) under the certificate issued in Docket No. CP83-21-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the
CIG proposes to construct and operate a new point on its Canoe City Line in Fremont County, Colorado in order to provide a new point of delivery to Greeley. CIG asserts that the new delivery point would be utilized by Greeley to serve several farmers in the immediate vicinity. The MDVO for the new delivery point, to be designated the Penrose South sales delivery point, would be 78 Mcf of natural gas per day. It is alleged.

CIG also proposes in Docket No. CP87-510-001 to increase the MDVO at Northern Gas' existing Husky Travel Shoppe delivery point in Albany County, Wyoming from 20 Mcf to 70 Mcf of natural gas per day. CIG alleges that the increased volumes to be delivered at this location would be utilized by Northern Gas to serve certain field operations of Chevron U.S.A., Inc. CIG asserts that no additional facilities would be required at the Husky Travel Shoppe delivery point to serve the additional volumes.

CIG does not propose any change to either Greeley’s or Northern Gas’ total daily entitlement or annual entitlement. CIG further asserts that the proposed delivery point and the MDVO proposed revisions would not adversely impact on its ability to deliver the peak-day or annual entitlements of its other existing customers.

Comment date: October 28, 1987, in accordance with Standard Paragraph G at the end of this notice.

7. Sunshine Natural Gas System

[Docket No. CP87-513-000]

Take notice that on August 27, 1987, Sunshine Natural Gas System (Sunshine), 500 Renaissance Center, Detroit, Michigan 48243, filed in Docket No. CP87-513-000 an application pursuant to section 7(c) of the Natural Gas Act requesting authorization to construct and operate a natural gas pipeline and related facilities necessary to transport natural gas for others, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Sunshine requests authorization to construct and operate a total of 608 miles of pipeline, 37,500 horsepower of compression and related facilities. It is stated that these facilities have an estimated cost of $470 million and have been designed to transport up to 450 MMcf of natural gas per day (MMcf/d) on a firm basis from Mobile County, Alabama, to central Florida, of which 250 MMcf/d could be delivered to Martin County, Florida. Sunshine states that upon placing these facilities in service November 1, 1991, it would be able to connect, directly and indirectly, with the facilities of other interstate natural gas pipeline facilities in order to provide Florida customers access not only to the substantial reserves in the Mobile Bay Area, but would also provide access to every supply area in the United States and Canada.

Sunshine states that at the present time it has not entered into transportation agreements with any potential shippers. Sunshine further states that should it enter into contracts prior to Commission certification, it would file executed copies of such agreements with the Commission.

It is explained that this application is filed on the basis that Sunshine is and would be owned solely by a partnership between ANR Southern Pipeline Company, a subsidiary of ANR Pipeline Company (ANR), and ANR Gulf Pipeline Company, a subsidiary of American Natural Resources Company (American Natural) and would on that basis, construct and operate the proposed facilities. However, it is stated, ANR and American Natural are willing to open the ownership of Sunshine to others pursuant to acceptable contractual arrangements.

Comment date: September 30, 1987, in accordance with Standard Paragraph F at the end of this notice.

8. United Gas Pipe Line Co.

[Docket No. CP87-514-000]

Take notice that on August 28, 1987, United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77251-1478, filed in Docket No. CP87-514-000 an application pursuant to section 7(b) of the Natural Gas Act for Permission and approval to abandon a direct industrial sale service to Chevron U.S.A., Inc. (Chevron) of up to 4,000 Mcf of natural gas per day, all as more fully set forth in the request on file with the Commission and open to public inspection.

United states that Chevron has notified United by letter dated March 13, 1987, that its present firm sales contract with ANR Pipeline Company, a subsidiary of ANR Pipeline Company (ANR), and ANR Gulf Pipeline Company, a subsidiary of American Natural Resources Company (American Natural) and would on that basis, construct and operate the proposed facilities. However, it is stated, ANR and American Natural are willing to open the ownership of Sunshine to others pursuant to acceptable contractual arrangements.

Comment date: September 30, 1987, in accordance with Standard Paragraph F at the end of this notice.

Standard Paragraphs

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

G. Any person or the Commission's staff may, within 45 days after the issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to §157.203 of the Regulations under the Natural Gas Act (18 CFR 157.206) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to
be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

Kenneth F. Plumb, Secretary.

BILLING CODE 6717-01-M

[Docket Nos. QF85-735-001 et al.]
Small Power Production and Cogeneration Facilities; Qualifying Status; Certificate Applications, etc.; BAF Energy a California Limited Partnership, et al.

Comment date: October 16, 1987. In accordance with Standard Paragraph E at the end of this notice.

Take notice that the following filings have been made with the Commission.

1. BAF Energy a California Limited Partnership

[Docket No. QF85-735-001]

On August 25, 1987, BAF Energy a California Limited Partnership (Applicant), c/o BAF Energy, Inc., General Partner, of 550 Kearny Street, Suite 1000, San Francisco, California 94108 submitted for filing an application for certification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission’s regulations. No determination has been made that the submittal constitutes a complete filing.

The topping-cycle cogeneration facility will be located near Sweetwater, Texas. The facility will consist of three combustion turbine generating units, three heat recovery steam generators and an extraction/condensing steam turbine generating unit. Heat recovered from the facility will be sold to the United States Gypsum Company for use in an industrial process for drying gypsum slurry in gypsum board drying kilns and for space heating. The net electric power production capacity of the facility will be 237 MW. The primary energy source will be natural gas.

2. Encogen One Partners Ltd.

[Docket No. QF87-615-000]

On August 21, 1987, Encogen One Partners Ltd. (Applicant), of 10375 Richmond Avenue, Houston, Texas 77042 submitted for filing an application for certification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission’s regulations.

The recertification is requested due to change of ownership of the facility from Basic American Foods, Inc. to its affiliate BAF Energy. BAF Energy is a California Limited Partnership whose sole general partner is BAF Energy, Inc., a California corporation which is a wholly-owned subsidiary of Basic American Foods, Inc. All other facility’s characteristics remain unchanged.

3. Inter-Power of Pennsylvania, Inc.

[Docket No. QF87-632-000]

On August 27, 1987, Inter-Power of Pennsylvania, Inc. (Applicant), of 3 West Penn Center, Pittsburgh, Pennsylvania 15230 submitted for filing an application for certification of a facility as a qualifying small power production facility pursuant to § 292.207 of the Commission’s regulations.

The small power production facility will be located near the Village of Colver in Cambria County, Pennsylvania. The facility will consist of a fluidized bed combustion boiler and a condensing steam turbine generator. Applicant states that the primary energy electrical power production capacity of the facility will be 121 MW.

By order issued February 28, 1986, the Director of Office of Electric Power Regulation granted certification of the facility as a cogeneration facility (34 FERC ¶ 62,411).

The topping-cycle cogeneration facility will be located in King City, California. The facility will consist of a combustion turbine generating unit, a heat recovery steam generator, and an extraction steam turbine generating unit. Thermal energy recovered from the facility will be used in the food processing plant. The primary energy source will be natural gas. The net
source of the facility will be “waste” in the form of bituminous coal refuse. The maximum net electric power production capacity of the facility will be 79.5 megawatts.

[Docket No. QF87-619-000]

On August 24, 1987, Keystone Shipping Company (Applicant), of 313 Chestnut Street, Philadelphia, Pennsylvania 19106 submitted for filing an application for certification of a facility as a qualifying cogeneration facility pursuant to § 282.207 of the Commission’s regulations. No determination has been made that the submittal constitutes a complete filing.

The proposed topping-cycle cogeneration facility will be located at the Monsanto Plant in Logan Township, Bridgeport, New Jersey. The facility will consist of four fluid bed combustors and two extraction/condensing steam turbine generators. The steam recovered from the facility will be used for process heating in the Monsanto Plant. The net electrical power production capacity of the facility will be 200 MW. The primary source of energy will be coal.

Installation of the facility is expected to commence in late 1988.

[Docket No. QF87-622-000]

On August 25, 1987, Oxford Energy of New York, Inc. (Applicant), of c/o Oxford Energy, Inc., 675 Third Avenue, New York, New York 10017 submitted for filing an application for certification for a facility as a qualifying small power production facility pursuant to § 282.207 of the Commission’s regulations. No determination has been made that the submittal constitutes a complete filing.

The small power production facility will be located in Ulster County, New York. The facility will consist of two refractory lined waterwall steam generators, and a steam turbine-generator. The primary energy source will be non-recappable scrap rubber tires. The maximum net electric power production capacity will be approximately 29,000 KW. Oil or natural gas will be used for start-up only, however such fossil fuel use will not exceed 1% of the total energy input to the facility during any calendar year period.

Standard Paragraph

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission’s Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,
Secretary.

Filing of Pipeline Refund Reports; Algonquin Gas Transmission Co. et al.

Take notice that the pipelines listed in the Appendix hereto have submitted to the Commission for filing proposed refund reports. The date of filing and docket number are also shown on the Appendix.

Any person wishing to do so may submit comments in writing concerning the subject refund reports. All such comments should be filed with the Federal Regulatory Commission, 825 North Capitol Street, N.E., Washington, DC 20426, on or before September 24, 1987. Copies of the respective filings are on file with the Commission and available for public inspection.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6717-01-M
Federal Register / Vol. 52, No. 179 / Wednesday, September 16, 1987 / Notices 34995

Reason for Filing

19th Revised Sheet No. 8 and 42nd Revised Sheet No. 129 contain revisions to FGT's Rate Schedules G and I and Rate Schedule T-3, respectively, to: (1) Adjust the Primary Adjustment to reflect an increase in FGT's average cost of gas purchased for sale and company use, net of amounts to be recovered through Incremental Pricing Surcharges; (2) adjust the Balancing Adjustment to amortize over the six-month adjustment period (October 1, 1987 through March 31, 1988), the balance in the current period Unrecovered Purchased Gas Cost Account as of June 30, 1987; (3) eliminate the Order 94 Surcharge established to amortize retroactive Order 94 production-related costs over the twelve-month period ending September 30, 1987; and (4) establish an Annual Charge Adjustment (ACA) charge.

7th Revised Sheet No. 9 contains the estimated Incremental Pricing Surcharges for the period October 1, 1987 through December 31, 1987. Original Sheet No. 57B establishes a new Section 22 of the General Terms and Conditions of its FERC Gas Tariff, which implements an ACA clause that provides for an ACA unit charge to be applicable to each of FGT's sales and transportation rate schedules. The Original Volume No. 3 tariff sheets incorporate reference to and applicability of the ACA unit charge to the transportation rate schedules.

The proposed effective date of the above referenced tariff sheets is October 1, 1987.

The above mentioned changes to the Primary and Balancing Adjustments are being made pursuant to section 15 [Purchased Gas Adjustment and Incremental Pricing Provision] of the General Terms and Conditions of FGT's FERC Gas Tariff, First Revised Volume No. 1 and § 154.38 et seq., of the Commission's Regulations (18 CFR 154.38, et seq.).

The net effort of the adjustments being filed for Rate Schedules G and I and for Rate Schedule T-3 are summarized below:

*Reflects rates effective July 1, 1987 pursuant to Docket No. RP86-137-006.*

FGT states that a copy of its filing has been served on all customers receiving gas under its FERC Gas Tariff, First Revised Volume No. 1, Original Volume No. 2, Original Volume No. 3, and interested states commissions and is being posted.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE, Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before September 17, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding.

Any person wishing to become a party must file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE, Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before September 15, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding.

Northwest states the purpose of this filing is to establish an Annual Charge Adjustment Clause ("ACA" Clause) in Northwest's tariff as appropriate and to set forth the applicable surcharge in its sales, transportation, and gathering rate schedules as required by Order No. 472.

Northwest requests an effective date of October 1, 1987.

Northwest states that a copy of this filing has been served on Northwest's jurisdictional customers and affected state regulatory commissions. Any persons desiring to be heard or protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE, Washington DC 20426, in accordance with Rules 211 or 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before September 15, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding.

Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb, Secretary.

[Docket No. RP87-110-000]

Change in Sales Rates and Adoption of ACA Clause; Northwest Pipeline Corp.

Take notice that on August 31, 1987, Northwest Pipeline Corporation ("Northwest") submitted for filing, to be a part of its FERC Gas Tariff, First Revised Volume No. 1, Original Volume No. 1-A, and Original Volume No. 2, the following tariff sheets:

First Revised Volume No. 1

Thirty-Seven Revised Sheet No. 10

First Revised Volume No. 2

First Revised Sheet No. 10-A

First Revised Sheet No. 100

Original Sheet No. 133-A

Original Volume No. 1-A

Eleventh Revised Sheet No. 201

First Revised Sheet No. 302

First Revised Sheet No. 312

First Revised Sheet No. 323

First Revised Sheet No. 333

Third Revised Sheet No. 339

Second Revised Sheet No. 344

Second Revised Sheet No. 345

First Revised Sheet No. 400

First Revised Sheet No. 419

Second Revised Sheet No. 4.4

Thirteenth Revised Sheet No. 2-B

First Revised Sheet No. 2-B-1

Northwest Pipeline Company (Panhandle) on August 31, 1987, tendered for filing certain revised tariff sheets, to its FERC Gas Tariff, Original Volume No. 1 and 2, to be effective as proposed. These revised sheets reflect an increase in...
Panhandle stated that in compliance with Opinion No. 265-A it included the revisions to its LS, SS and CS Rate Schedules reflecting the required treatment of the minimum commodity bill to be effective August 19, 1987. Panhandle stated that this filing is being made without prejudice to its rights to obtain judicial review or seek a stay of Opinion Nos. 265 and 265-A. Panhandle noted that it has reduced its non-gas cost of service by $64 million since the filing in Docket No. RP86-194, and that those reductions, including the reduction in the applicable federal corporate income tax rate, are included herein. Panhandle stated that the need for a rate increase arises as a direct and immediate consequence of reductions in projected throughput on its system attributable to Commission orders which seek to change the entire structure of Panhandle’s tariff, the consequential reductions in gas purchases by customers, some of whom have summarily ceased purchases from the Company entirely, and the anticipated nomination of Dv volumes mandated by Opinion No. 265-A. Panhandle also stated that these revised tariff sheets reflect volumes predicated on the assumption that Panhandle will be permitted to continue as an interim open access transporter until more permanent arrangements can be made, and that the rates for both sales and transportation services that are based on fully allocated costs and projected units of throughput.

In addition, Panhandle is proposing changes to the terms and conditions of its transportation Rate Schedules in view of recent Commission pronouncements regarding the terms and conditions of transportation provided under Part 284 of the Commission’s Regulations. Panhandle has reclassified the transmission function certain certificated items of plant which, in fact, perform transmission functions but which were previously classified to the gathering function. Panhandle requests that it be granted such waivers of the Regulations or such authority as may be necessary to make conforming accounting entries to reflect such changes.

Copies of this letter and enclosures are being served on all jurisdictional customers and applicable state regulatory agencies.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission in accordance with Rules 211 and 214 of the Commission’s Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before September 16, 1987. Protest will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb, Secretary.

BILLING CODE 6717-01-M

[Docket No. RP87-105-000]

Change in Tariff; Stingray Pipeline Co.

Take notice that on August 31, 1987, Stingray Pipeline Company (Stingray) tendered for filing the following tariff sheets to its FERC Gas Tariff, Original Volume No. 1:

Fourteenth Revised Sheet No. 4

Original Sheet No. 70-C

The proposed effective date of these revised sheets is October 1, 1987.

On May 29, 1987 the Commission issued Order No. 472 in Docket No. RM87-3-000. Order No. 472 provides that a natural gas company, such as Stingray Pipeline Company (Stingray), may file an Annual Charge Adjustment (ACA) clauses to its FERC Gas Tariff. This adjustment will permit the collection of 2.1 mills per Mcf to recover from its customers annual charges assessed it by the Commission under Part 382 of the Commission’s Regulations. Stingray states that pursuant to Order No. 472 in Docket No. RM87-3-000 and § 154.38(d)(6)(i) of the Commission’s Regulations, Stingray proposes a new Annual Charge Adjustment Provision to Stingray’s FERC Gas Tariff, Original Volume No. 1.

To the extent required, if any, Stingray requests that the Commission grant such waivers as may be necessary for acceptance of the tariff sheets submitted herewith, to become effective October 1, 1987, as previously described. Copies of this letter and enclosures are being served on all jurisdictional customers.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426.
The revised tariff sheets are being filed to incorporate into Texas Gas's Tariffs a FERC Annual Charge Adjustment (ACA) Unit Charge, as authorized by § 154.38(d) of the Commission's Regulations, which was added pursuant to Order No. 472 issued May 29, 1987, (39 FERC, Para. 61,206), and Order No. 472-A issued June 17, 1987, (39 FERC Para. 61,316). Order No. 472 arose out of section 3401(a)(1) of the Omnibus Budget Reconciliation Act of 1986, which requires the Federal Energy Regulatory Commission (Commission) to "assess and collect fees and annual charges in any fiscal year in amounts equal to all of the costs incurred by the Commission in that fiscal year." On or about July 16, 1987, Texas Gas received an Annual Charges Billing from the Commission for fiscal year 1987. Texas Gas was required to remit, by August 31, 1987, to the Commission, Texas Gas's portion of the Commission deficit. For the purpose of recovering this payment, Texas Gas has elected, pursuant to the authority outlined in Order No. 472, to institute the ACA unit charge of $.0020 per MMBtu, as set by the Commission on Texas Gas's Annual Charges Billing.

Copies of this filing were served on Texas Gas's jurisdictional customers and interested State commissions.

Any person desiring to be heard or protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE, Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before September 16, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are available for public inspection.

Kenneth F. Plumb,
Secretary.

FEDERAL HOME LOAN BANK BOARD

Application for Consideration Under Capital Forbearance

Date: September 10, 1987.

AGENCY: Federal Home Loan Bank Board.

ACTION: Notice.

SUMMARY: The public is advised that the Federal Home Loan Bank Board ("Board") has submitted a new information collection request, "Application for Consideration under Capital Forbearance" to the Office of Management and Budget for approval in accordance with the Paperwork Reduction Act (44 U.S.C. Chapter 35).

This information is necessary to review the application and determine whether the applicant meets eligibility requirements. Each institution requesting inclusion under the Capital Forbearance Policy must submit an application. The Board estimates that each application will require forty hours to complete.

DATE: Comments on the information collection request are welcome and should be received on or before October 1, 1987.

ADDRESS: Comments regarding the paperwork-burden aspects of the request should be directed to: Office of Management and Budget, Office of Information and Regulatory Affairs, Washington, DC 20503. Attention: Desk Officer for the Federal Home Loan Bank Board.

The Board would appreciate commenters sending copies of their comments to the Board.

Requests for copies of the proposed information collection requests and supporting documentation are obtainable at the Board address given below: Director, Information Services Section, Office of Secretariat, Federal Home Loan Bank Board, 1700 G Street NW., Washington, DC 20552. Phone: 202-377-6933.

FOR FURTHER INFORMATION CONTACT:

By the Federal Home Loan Bank Board.

John P. Ghizzonii, Assistant Secretary.

[Fact Finding Investigation No. 15]

Practices of Various Entities Operating as Intermediaries for the Transportation of Goods in the United States Waterborne Foreign Commerce; Order

The Commission initiated this investigation on September 17, 1986, to examine the practices of various entities that act as intermediaries for the transportation of goods in our waterborne foreign commerce. The Commission directed the Investigative Officer to provide a final report of findings and recommendations no later than one year after publication of the Order in the Federal Register (51 FR 33662, September 22, 1986). The Investigative Officer has now advised that additional time will be needed to fully and adequately complete the investigation and issue a comprehensive report.

Therefore, it is ordered, That the Investigative Officer shall issue to the Commission a final report of findings and recommendations on or before March 31, 1988. By the Commission September 8, 1987.

Tony P. Kominoff, Assistant Secretary.

Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street, NW., Room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the Federal Register in which this notice appears. The requirements for comments are found in § 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No: 224-200032.
Title: Virgin Islands Port Authority Crane Lease Agreement.
Parties: Virgin Islands Port Authority (Port Authority)
Tropical Shipping and Construction Co., Ltd. (Tropical)
Synopsis: Under the terms of the proposed agreement the Port Authority exclusively leases to Tropical one 30 foot long run capacity Paceco gantry Crane and related parts, inventory and equipment, located at the Third Port on St. Croix, Virgin Island. The term of this lease is for three years commencing July 1, 1985, with two options to renew for two additional five-year periods.

Agreement No: 224-200034.
Title: Port of San Diego Terminal Agreement.
Parties: San Diego Unified Port District (Port
District)
10th Avenue Cold Storage Company (Lessee)

Synopsis: The proposed agreement provides for the use of 51,111 square feet of
Transit Shed No. 1 at the 10th Avenue
Marine Terminal, San Diego, California.
The term of the agreement shall be for a
period of seven years, with one option to
extend for one additional five-year
period.

Agreement No: 224-011088-001.
Title: City of Los Angeles Terminal
Agreement.
Parties:
City of Los Angeles
Matson Terminals

Synopsis: The proposed agreement amendment clarifies the responsibilities
of the parties with respect to the
collection of tariff charges, revenue
sharing and payment procedures.

Agreement No: 224-200030.
Title: Virgin Island Terminal
Agreement.
Parties:
Virgin Islands Port Authority
Tropical Shipping and Construction,
Ltd., (Tropical)

Synopsis: The proposed agreement contains the terms and conditions under
which Tropical will occupy certain
parcels of land and section's of a
warehouse in Crown Bay, St. Thomas,
Virgin Islands for use in containerized
cargo operations.

By Order of the Federal Maritime
Commission.
Tony P. Kominotch,
Assistant Secretary.

DEPARTMENT OF HEALTH AND HUMAN SERVICES
Alcohol, Drug Abuse, and Mental Health Administration
Advisory Board Meeting
AGENCY: Alcohol, Drug Abuse, and Mental Health Administration, HHS.
ACTION: Notice of meeting.
SUMMARY: This notice sets forth the schedule and proposed agenda of the
forthcoming meeting of the agency's
Alcohol, Drug Abuse, and Mental Health Advisory Board in the month of October 1987. Board members will discuss issues in
the areas of treatment, research,
prevention, and education viz-a-viz the
legislative mandate. Attendance by the
public at these sessions will be limited
to space available.
Committee Name: Alcohol Drug
Abuse, and Mental Health Advisory
Board, ADAMHA.
Date and Time: October 13-14: 9:00
a.m.
Place: National Institute of Health,
Building 1, Wilson Hall, 3rd Floor, 9000
Rockville Pike, Bethesda, Maryland
20892.
Status of Meeting: Open.
Contact: Barbara Wagner, Room
12C05, Parklawn Building, 5000 Fishers
Lane, Rockville, Maryland 20857, (301)
443-1910.
Purpose: The Alcohol, Drug Abuse,
and Mental Health Advisory Board
assesses the national needs for
alcoholism, alcohol abuse, drug abuse,
and mental health treatment and
prevention services and the extent to
which those needs are being met by
State, local, and private programs, and
programs receiving funds under Title V
and Parts B and C of Title XIX of the
Public Health Service Act. The Board
provides advice and recommendations
to the Secretary and to the
Administrator, Alcohol, Drug Abuse,
and Mental Health Administration
respecting these activities to assist in
guiding national strategies aimed at the
amelioration of alcohol, drug abuse,
and mental health problems.
Substantive information, summaries
of the meetings, and roster of committee
members may be obtained from the
contact person listed above.
Peggy W. Cockrill,
Committee Management Officer, Alcohol,
Drug Abuse, and Mental Health
Administration.
Date: September 10, 1987.

National Public Lands Advisory Council; Meeting

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Meeting of the National Public Lands Advisory Council.

SUMMARY: Notice is hereby given that the National Public Lands Advisory Council will meet October 15 and 17, 1987, at the Hyatt Regency Hotel, 1750 Welton Street, Denver, Colorado. The meeting hours will be 8:00 a.m. to 11:30 a.m., on Thursday, the 15th, and 8:00 a.m. to 12:00 p.m. on Saturday, the 17th. On Friday, October 15, Council members will visit the Bureau of Land Management’s Denver Service Center for an orientation session highlighting land information system technology. The proposed agenda for the meeting is:

Thursday, October 15: The State view of public land management in Colorado; Council old and new business, to include Department responses to previous Council resolutions; Public statement period.

Saturday, October 17: Discussion of agendas for future Council sessions; Meetings of Council subcommittees (Energy and Minerals, Lands, and Renewable Resources); Reports from subcommittees to full Council and consideration of Council resolutions.

All meetings of the Council will be open to the public. Opportunity will be given for members of the public to make oral statements to the Council, beginning at 10:00 a.m. on Thursday, October 15. Speakers should address specific national public lands issues on the meeting agenda and are encouraged to submit a copy of their written comments by October 8 to the Bureau of Land Management’s Denver Service Center at the address listed below. Depending on the number of people who wish to address the Council, it may be necessary to limit the length of oral presentations.

DATES: October 15 and 17—Council Meeting. October 15—Public Statements.

ADDRESS: Copies of public statements should be mailed by October 8 to: Director, Denver Service Center (D-100), Bureau of Land Management, P.O. Box 25047, Denver, Colorado 80225-0047.

FOR FURTHER INFORMATION CONTACT: Karen Slater, Washington, DC Office, BLM, telephone (202) 343-2954; or Cathryn Davis, Denver Service Center, BLM, telephone (303) 236-6532.

SUPPLEMENTARY INFORMATION: The Council advises the Secretary of the Interior through the Director, Bureau of Land Management, regarding policies and programs of a national scope related to public lands and resources under the jurisdiction of BLM.

David C. O’Neal,
Deputy Director.

New Mexico; San Juan River Regional Coal Team Meeting and Request for Public Comments on the Long-Range Market Analysis for the Region

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of regional coal team meeting.

SUMMARY: The San Juan River Regional Coal Team (RCT) will meet to consider future development plans for Federal coal in the Region. The public is invited to attend.

The primary purposes of the meeting are to (1) recommend approval of the RCT Charter, (2) review the long-range market analysis, and (3) develop a recommendation on whether to resume or defer coal activity planning in the Region.

DATE: The RCT will meet at 9:00 a.m. on Tuesday, November 3, 1987.

ADDRESS: The meeting will be held at the Continental Inn, 4918 Cerrillos Road, Santa Fe, New Mexico 87501. Telephone (505) 473-4646.

FOR FURTHER INFORMATION CONTACT: Russell Jentgen or Keith Bennett at the above address by October 27, 1987. Comments received after the October 27, 1987, deadline, but before the RCT meeting, would be made available to the members of the RCT for consideration as time permits.

The RCT will consider information obtained from the public at this meeting to develop recommendations to guide future coal leasing decisions for the region.

Anyone who wishes to speak at the meeting is requested to provide written copies of their remarks. Written material will also be accepted in lieu of or in addition to any oral presentation.

Following is a preliminary agenda for this meeting:

1. Introductions
2. Approval of Minutes
3. Regional Coal Activity Status
   a. Preference Right Lease Applications (PRLA’s)
   b. Summarization of Coal Decisions in the following Resource Management Plans (RMP’s)
      (1) Farmington RMP
      (2) Rio Puerco RMP
      (3) Socorro RMP
      (4) Durango/San Miguel RMP
   c. Record of Decision on the San Juan Regional Coal Environmental Impact Statement (EIS)
4. Impacts from the Navajo/Hopi Resettlement Act Selections
5. Scheduled Company Presentations
6. Long-Range Market Analysis and Summary of Public Comments
7. RCT Activity Planning Discussions
   a. Resume Activity Planning
   b. Defer Activity Planning until after Tier I PRLA’s are fully adjudicated
   c. Deactivate the Region (in whole or in part) and Lease by Application
8. RCT Charter Decision
9. Public Comment
10. Scheduling of Next Meeting
11. Adjourn

Monte G. Jordan,
Alternate Chairperson. San Juan River Regional Coal Team.

35000 Federal Register / Vol. 52, No. 179 / Wednesday, September 16, 1987 / Notices
SUMMARY: A meeting of the Yuma District Advisory Council will be held on Friday, October 16, beginning at 10 a.m. in the Lake Havasu City Council Chambers located at 1795 Civic Center Boulevard.

FOR FURTHER INFORMATION CONTACT: Douglas B. Stockdale, Yuma District Office, 3150 Winson Avenue, Yuma, Arizona 85365, 602-726-3600.

SUPPLEMENTARY INFORMATION: Discussions will center on district program updates, Wild Horses and Burros, cooperative efforts to clean up dumps on public land, Bill Williams River cooperative management agreement, Havasu City Airport application, Land-Term Visitor Area use program, Highway 85 reconstruction on Parker Strip, and other Council-initiated topics. The public is invited to attend the meeting.

Written statements from the public may be filed for the Council's consideration. Statements must arrive at the District Office by October 13. Oral statements will also be accepted but, depending on the number of persons wishing to address the Council, a per-person time limit may be imposed.

Summary minutes of the District Advisory Council meeting will be maintained in the Yuma District Office and will be available for inspection and reproduction during regular business hours (7:45 a.m. through 4:30 p.m.) within 30 days of the meeting.

J. Darwin Snell, District Manager.

Realty Action; Lease/Conveyance of Public Lands in La Paz County, Yuma District, AZ

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Realty Action—lease/conveyance of Public Lands for Recreation and Public Purposes (R&PP).

SUMMARY: The following described public lands located in the community of Quartzsite, Arizona, in La Paz County, have been examined and found suitable for lease/conveyance to the Quartzsite School District for public school purposes and are so classified under the Recreation and Public Purposes Act of June 14, 1926, as amended (43 U.S.C. 869 et seq.):

Gila and Salt River Meridian, Arizona

T. 4 N., R. 19 W., Sec. 21, M&B within 5/45S40W4.

The area described contains 24.5 acres, more or less.

Lease or conveyance is consistent with BLM land use planning, would not affect any BLM programs, and would be in the public interest.

The lease/conveyance would be subject to the following conditions:

1. Provisions of the Recreation and Public Purposes Act and all regulations of the Secretary of the Interior.
2. A right-of-way thereon for ditches or canals constructed by the authority of the United States.
3. All minerals shall be reserved to the United States, together with the right to prospect for, mine, and remove the minerals.

Upon publication of this Notice in the Federal Register, these lands will be segregated from all forms of appropriation under any other public land laws, including the general mining laws, except for leasing under the mineral leasing laws.

For a period of 45 days from the date of publication of this notice, interested persons may submit comments regarding the proposed lease/conveyance or classification of the lands to the Bureau of Land Management, Yuma District Office, P.O. Box 5600, Yuma, Arizona 85364.

Any adverse comments will be reviewed by the State Director. In the absence of any adverse comments, the classification will become effective 60 days from the date of publication of this Notice.

FOR FURTHER INFORMATION CONTACT: Yuma Resource Area, Yuma District at (602) 726-6300.

J. Darwin Snell, District Manager.

Date: September 8, 1987.

Realty Action; Conveyance of Mineral Interest in California

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Realty Action—conveyance of the reserved mineral interests.

SUMMARY: The private lands described in this notice will be examined for suitability for conveyance of the reserved mineral interests pursuant to section 209 of the Federal Land Policy and Management Act of October 21, 1976.

The mineral interests will be conveyed in whole or in part upon favorable mineral examination.

FOR FURTHER INFORMATION CONTACT: Joan Mangold, BLM California State Office, 2600 Cottage Way, Room E-2041, Federal Office Building, Sacramento, California 95825, (916) 978-4815.

The purpose is to allow consolidation of surface and subsurface ownership, for the lands described below, where there are no known mineral values or in those instances where the reservation of ownership of the mineral interests in the United States interferes with or precludes appropriate nonmineral development of the lands and such development would be a more beneficial use of the lands than its mineral development.

Mount Diablo Meridian

T. 4 N., R. 14 E., Sec. 27, E2/4 lot 28, 1st 30.

The area described contains 7.32 acres in Calaveras County. Currently 100 percent of the mineral interest in these lands is owned by the United States.

The application was filed on August 13, 1987. Upon publication of this Notice of Realty Action in the Federal Register as provided in 43 CFR 2091.3-1(c) and 2720.1-1(b), the mineral interests owned by the United States in the private lands covered by the application shall be segregated to the extent that they will not be subject to appropriation under the public land laws, including the mining laws. The segregative effect of the application shall terminate by publication of an opening order in the Federal Register specifying the date and time of opening; or upon issuance of a patent or other document of conveyance to such mineral interests, or two years from the date of filing of the application, whichever occurs first (43 CFR 2091.3-2(f)).

Nancy J. Alex,
Chief, Lands Section Branch of Adjudication and Records.

BILLING CODE 4310-40-M
Issuance of Mineral Exchange Conveyance Document; Order Providing for Opening of Reconveyed Minerals; New Mexico

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The United States issued an exchange conveyance document to Cerrillos Land Company, on March 6, 1987, for the coal estate only in the following described land in McKinley County, New Mexico pursuant to section 206 of the Act of October 21, 1967 (43 U.S.C. 1718) and section 504(a) of the Act of December 19, 1980 (16 U.S.C. 410 ii-3):

New Mexico Principal Meridian, New Mexico

T. 15 N., R. 7 W., Sec. 18, lots 1 to 4, inclusive, E% and E½W½;
Sec. 20;
Sec. 22; lots 1, 5, NE¼, and E¾NW¾;
Sec. 28; NE¼NE¼, W¾NE¼, NW¼, and N½SW½;
Sec. 30, lots 1 to 4, inclusive, E% and E½W½.

T. 15 N., R. 8 W., Sec. 22; SE¼NE¼ and S¼;
Sec. 24;
Sec. 26;
Sec. 28; E½NE¼, SE½SW¼, and SE¼;
Sec. 34; N¼ and NE¼SE¼.

Aggregating 4,889.69 acres, more or less, were reconveyed under the mineral estate reconveyed under FR 41025 on November 12, 1986.

The mineral estate reconveyed on March 6, 1987, for the coal estate only in the above described land, the coal estate in 4,889.69 acres, more or less, in McKinley County, New Mexico and all Cerrillos Land Company’s mineral estate interest in the Chaco Culture National Historic Park and Archeological Protection Site lands in San Juan and McKinley Counties, New Mexico aggregating 4,889.69 acres, more or less, were reconveyed to the United States. The reconveyed lands were described in the Notice of Realty Action published in Vol. 49, page 49365 of the Federal Register on March 6, 1987, for a period of two additional years. Extension of the notice is necessary to complete the processing of this land exchange. Date of issue: September 8, 1987.

Joseph K. Bussing, District Manager.

**SUPPLEMENTARY INFORMATION:** The purpose of this Notice is to inform the public, pursuant to sec. 25 of the OCS Lands Act Amendments of 1978, that the Minerals Management Service is considering approval of the DOCD and that it is available for public review. Revised rules governing practices and procedures under which the Minerals Management Service makes information contained in DOCDs available to affected States, executives of affected local governments, and other interested parties became effective December 13, 1979 (4 FR 53685). Those practices and procedures are set out in revised § 250.34 of Title 30 of the CFR.

**ACTION:** Notice of Meeting.

**SUMMARY:** This notice sets forth the date of the forthcoming meeting of the Upper Delaware Citizens Advisory Council. Notice of this meeting is required under the Federal Advisory Committee Act.

**DATE:** September 25, 1987, 7:00 PM.

**INCLEMENT WEATHER RESCHEDULE DATE:** October 11, 1987.

**ADDRESS:** Town of Tusten Hall, Narrowsburg, New York.

**FOR FURTHER INFORMATION CONTACT:** John T. Hutskoy, Superintendent; Upper Delaware Scenic and Recreational River, P.O. Box C, Narrowsburg, N.Y. 12764-0159; 717-729-8251.

**SUPPLEMENTARY INFORMATION:** The Advisory Council was established under section 704 (f) of the National Parks and Recreation Act of 1978, Pub. L. 95-625, 16 USC § 1724 note, to encourage maximum public involvement in the development and implementation of the plans and programs authorized by the Act. The Council is to meet and report to the Delaware River Basin Commission, the Secretary of the Interior, and the Governors of New York and Pennsylvania in the preparation and implementation of the management plan, and on programs which relate to land and water use in the Upper Delaware region. The agenda for the meeting will be open to public comment.

The meeting will convene at the Kebo Valley Golf Club House, Eagle Lake Road, Bar Harbor, Maine, at 1:30 p.m. for the following reasons:

1. Swearing-in of the sixteen members.
2. Review of responsibilities of the Commission as outlined in the charter.
3. Review Pub. L. 99-420, including status of proposed acquisitions, and exchanges, as well as guidelines for developing private property within the Park and for accepting scenic easements outside the Park boundary.
4. Establish the following committees:
   - A. Nominating
   - B. Bylaws
   - C. Guidelines

The meeting is open to the public. It is expected that fifty persons will be able to attend the session in addition to the Commissioners member.

Interested persons may make oral/written presentations to the Commission or file written statements. Such requests should be made to the Federal Advisory Committee Act. Further information concerning this meeting may be obtained from the Superintendent, Acadia National Park, Bar Harbor, Maine 04609.

Herbert S. Cables, Jr., Regional Director.

Date: September 9, 1987.

**International Trade Commission**

[Investigation No. 337-TA-276]

Investigation; Certain Erasable Programmable Read Only Memories, Components Thereof, Products Containing Same and Processes for Making Such Memories

**AGENCY:** U.S. International Trade Commission.

**ACTION:** Institution of investigation pursuant to 19 U.S.C. 1337.

**SUMMARY:** Notice is hereby given that a complaint was filed with the U.S. International Trade Commission on August 5, 1987, pursuant to section 337 of the Tariff Act of 1930 (19 U.S.C. 1337), on behalf of Intel Corporation, 3065 Bowers Avenue, Santa Clara, California 95051. The complaint was amended on August 31, 1987. The complaint, as amended, alleges unfair methods of competition and unfair acts in the importation of certain erasable programmable read only memories, components thereof, and products containing same into the United States, or in their sale, actual or threatened, by reason of alleged direct and induced infringement of (1) claims 1-3 of U.S. Patent 4,103,189; (2) claims 1-3 of U.S. Letters Patent 4,048,518; (3) claims 1-3 of U.S. Letters Patent 4,193,169; (4) claims 1 and 2 of U.S. Letters Patent 4,223,394; (5) claims 1-4 of U.S. Letters Patent 4,519,051; or (6) claims 1-10 of U.S. Letters Patent 4,665,084, or in their manufacture abroad by a process which, if practiced in the United States, would...
infringe (1) claims 1-5, 7, and 8 of U.S. Letters Patent 4,114,255 or (2) claims 1-3 of U.S. Letters Patent 4,519,849. The complaint further alleges that the tendency of the unfair methods of competition and unfair acts is to destroy or substantially injure an industry, efficiently and economically operated, in the United States.

The complainant requests that the Commission institute an investigation and, after a full investigation, issue a general exclusion order and permanent cease and desist orders.

FOR FURTHER INFORMATION CONTACT:

Scope of investigation: Having considered the complaint, the U.S. International Trade Commission, on September 3, 1987, ordered that—
(1) Pursuant to subsection (b) of section 337 of the Tariff Act of 1930, an investigation be instituted to determine whether there is a violation of subsection (a) of section 337 in the unlawful importation of certain erasable programmable read only memories, components thereof, and products containing same into the United States, or in their sale, actual or threatened, by reason of alleged direct and induced infringement of (1) claims 14-17 of U.S. Letters Patent 5,008,108; (2) claims 1-3 of U.S. Letters Patent 4,048,518; (3) claims 1-3 of U.S. Letters Patent 4,103,165; (4) claims 1 and 2 of U.S. Letters Patent 4,223,394; (5) claims 1-4 of U.S. Letters Patent 4,519,050; or (6) claims 1-10 of U.S. Letters Patent 4,685,084, or in their manufacture abroad by a process which, if practiced in the United States, would infringe the invention and be sold at less than fair value (LTFV).

(2) The respondents are the following companies, alleged to be in violation of section 337, and are the parties upon which the complaint is to be served:

Hyundai Electronics Industries Co., Ltd., San 136-1, Ami-Ri, Bubal-Myun, Icheon-Ku, Kyungki-Do, Republic of Korea

Hyundai Electronics America, Inc., 4401 Great America Parkway, 3rd Floor, Santa Clara, California 95054

Atmel Corporation, 2005 Ringwood Avenue, San Jose, California 95131

International CMOS Technology, Inc., 2031 Concourse Drive, San Jose, California 95131

Cypress Electronics, Inc., 2175 Martin Avenue, Santa Clara, California 95050

All-American Semiconductor, Inc., 1625 NW 64th Avenue, Hialeah, Florida 33014

Pacesetter Electronics, Inc., 5417 E. La Palma Avenue, Anaheim, California 92807

(3) For the investigation so instituted, Janet D. Saxon, Chief Administrative Law Judge, U.S. International Trade Commission, shall designate the presiding administrative law judge. Responses to the complaint and notice of investigation must be submitted by the named respondents in accordance with §210.21 of the Commission's Rules of Practice and Procedure (19 CFR 210.21).

(4) Pursuant to §201.16(d) and 210.21(a) of the regulations, any party to this investigation who desires a public hearing to be held in connection therewith shall file a written request for such hearing within 10 days after service of notice of the institution of this investigation on such party, and notice of such request shall be given to all interested persons.

(5) Pursuant to §210.21(a), such responses will be considered by the Commission if received not later than 20 days after the date of service of the complaint.

Extensions of time for submitting a response will not be granted unless good cause therefor is shown.

Failure of a respondent to file a timely response to each allegation in the complaint and in this notice may be deemed to constitute a waiver of the right to appear and contest the allegations of the complaint and this notice, and to authorize the administrative law judge and the Commission, without further notice to the respondent, to find the facts to be as alleged in the complaint and this notice and to enter both an initial determination and a final determination containing such findings.

The complaint, except for any confidential business information contained therein, is available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Room 128, Washington, DC 20436, telephone 202-523-0471. Hearing-impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202-724-0002.

By order of the Commission.

Kenneth R. Mason,
Secretary.

Certain Forged Steel Crankshafts From the Federal Republic of Germany and the United Kingdom

Determinations

On the basis of the record developed in the subject investigations, the Commission determined, pursuant to section 735(b) of the Tariff Act of 1930 (19 U.S.C. 1675(b)), that an industry in the United States is materially injured by reason of imports from the Federal Republic of Germany and the United Kingdom of certain forged steel crankshafts, provided for in items 660.67 and 660.71 of the Tariff Schedules of the United States, that have been found by the Department of Commerce to be sold in the United States at less than fair value (LTFV).

Background

The Commission instituted these investigations effective May 13, 1987, following preliminary determinations by the Department of Commerce that imports of certain forged steel crankshafts from the Federal Republic of Germany and the United Kingdom were being sold at LTFV within the meaning of section 731 of the Act (19 U.S.C. 1677). Notice of the institution of the Commission's investigations and of a public hearing to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, DC, and by publishing the notice in the Federal Register of June 3, 1987, (52 FR 20790). The hearing was held in Washington, DC, on August 4, 1987, and all persons who requested the opportunity were permitted to appear in person or by counsel.

1 The record is defined in §207.2(i) of the Commission's Rules of Practice and Procedure (19 CFR 207.2(i)).
2 Chairman Liebeler dissenting.
3 The crankshafts subject to these investigations are forged carbon or alloy steel crankshafts with a shipping weight of between 40 and 750 pounds, whether machined or unmachined.

By Order of the Commission.

Kenneth R. Mason,
Secretary.

By Order of the Commission.

Kenneth R. Mason,
Secretary.

[Investigation No. 337–TA–270]

Import Investigations; Certain Noncontact Tonometers

Notice is hereby given that the prehearing conference in this matter will commence at 9:00 a.m. on September 28, 1987, in Hearing Room 6311 at the Interstate Commerce Commission Building at 12th Street and Constitution Avenue NW, Washington, DC, and the hearing will commence immediately thereafter.

The Secretary shall publish this notice in the Federal Register.

Janet D. Saxton,
Administrative Law Judge.

[Investigation No. 731–TA–355 (Final)]

Certain Silica Filament Fabric From Japan

Determination

On the basis of the record developed in the subject investigation, the Commission unanimously determines, pursuant to section 735(b) of the Tariff Act of 1930 (19 U.S.C. 1675d(b)), that an industry in the United States is materially injured by reason of imports from Japan of woven fabrics, of glass (silica filaments), whether or not colored, containing not over 17 percent of wool by weight, provided for in items 338.25 and 338.27 of the Tariff Schedules of the United States, that have been sold in the United States at less than fair value (LTFV).

The Commission also unanimously determines, pursuant to section 735(b)(4)(A) of the Act (19 U.S.C. 1673(b)(4)(A)), that the material injury is not by reason of massive imports of silica filament fabric from Japan over a relatively short period to an extent that it is necessary that the duty provided for in section 731 of the Act be imposed retroactively on those imports in order to prevent such injury from recurring.

Background

The Commission instituted this investigation effective May 13, 1987, following a preliminary determination by the Department of Commerce that imports of amorphous silica filament fabric from Japan were being sold at LTFV within the meaning of section 731 of the Act (19 U.S.C. 1673). Notice of the institution of the Commission’s investigation and of a public hearing to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, DC, and by publishing the notice in the Federal Register of June 11, 1987 (52 FR 22398). The hearing was held in Washington, DC, on August 5, 1987, and all persons who requested the opportunity were permitted to appear in person or by counsel.

By Order of the Commission.

Kenneth R. Mason,
Secretary.

INTERSTATE COMMERCE COMMISSION

[Finance Docket No. 31102]

Wisconsin Central Ltd.; Exemption Acquisition and Operation; Certain Lines of Soo Line Railroad Co.

Wisconsin Central Ltd. (WCL) has filed a notice of exemption to acquire and operate certain properties of the Soo Line Railroad Company (Soo). The properties include the following lines and trackage rights:

Withrow, MN, milepost 432.02 to Forest Park, IL, milepost 10.9 (including Duplainville, WI connecting track between the Soo’s Withrow, MN to Forest Park, IL and the Soo’s Milwaukee....

1 The record is defined in § 207.2(f) of the Commission’s Rules of Practice and Procedure (19 CFR 207.2(f)).
to Lacrosse, WI line; Waukesha branch line from milepost 100.63 of Soo's Withrow to Forest Park line to milepost 18.23 in or near Waukesha, but excluding any portion of the line lying north of milepost 16.56 on Soo's Brookfield line; Burlington to Sturtevant, WI branch line from milepost 25.929 westerly to the end of Soo's ownership, but excluding the line east of milepost 25.98; IHB connecting track, Franklin Park, IL between Soo's Withrow to Forest Park line and Indiana Harbor Belt Railroad mainline track; Withrow, MN, milepost 23.75 to Sault St. Marie, MI, milepost 494.1; Ladysmith, milepost 355.467 to Owen, WI, milepost 308.66; New Lisbon, milepost 0.32 to Tomahawk, WI, milepost 133.36; Argonne, milepost 242.7 to Neenah, WI, milepost 391.1; Ashland, milepost 435.495 to Spencer, WI, milepost 289.8; Green Bay, milepost 200.008 to North Milwaukee, WI, milepost 95.18; Cameron, milepost 98.1 to Rice Lake, WI, milepost 102.8; Chippewa Falls, milepost 350.92 to Eau Claire, WI, milepost 380.06 to Menasha, WI, milepost 333.2 to White Pine, MI, milepost 14.41; Baraga, milepost 23.0 to Trout Lake, MI, milepost 27.12; Neenah, milepost 186.4 to Manitowoc, WI, milepost 230.6; Negaunee, milepost 163.6 to Palmer, MI terminus; Vesper, milepost 16.2 to Nekoosa, WI, milepost 32.7; and trackage rights between Withrow, milepost 23.75 and points in the terminal of St. Paul/Minesapolis, MN; Duplainville, and points within the Milwaukee, WI terminal; Ladysmith, milepost 355.48 and Superior, WI, milepost 460.6; and assignment of incidental Soo trackage rights over other carriers including rights over Green Bay & Western between Black Creek, milepost 23.73 to Green Bay, WI, milepost 1.39 and over the Marinette, Tomahawk and Western between Bradley, milepost 5.4 and Tomahawk, WI, milepost 0.0. The aforesaid includes approximately 1,800 route miles and 173 route miles of trackage rights over the Soo.1

In connection with the transaction covered by this notice of exemption, WCL, which will be a Class II carrier, will issue securities. The issuance of these securities is exempt under 49 CFR 1173.1.

This notice is filed under 49 CFR 1150.31. If the notice contains false or misleading information, the exemption will be void ab initio.

The effective date of this notice has been stayed until October 26, 1987. Comments have been invited and must be filed with the Commission by September 25, 1987, and served on Robert H. Wheeler, Isham, Lincoln & Beale, Suite 5200, Chicago, IL 60602. Replies by applicant are due by October 2, 1987. A petition to vacate the commission's stay decision has been filed by WCL.

By the Commission, Jane F. Mackall, Acting Secretary.

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

Manufacturer of Controlled Substances; Notice of Withdrawal

On August 7, 1987, the Drug Enforcement Administration (DEA) published a Notice of Application in the Federal Register (Vol. 52, No. 152, pg. 30450) stating that Ayerst-Wyeth Pharmaceutical Inc., State Road 3 Kilometer 142.1, P.O. Box 2880, Guayama, Puerto Rico 00654, had submitted an application for registration as a bulk manufacturer of the basic classes of controlled substances listed below:

<table>
<thead>
<tr>
<th>Drug</th>
<th>Schedule</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dihydrocodeine (9120)</td>
<td>II</td>
</tr>
<tr>
<td>Bulk dextropropoxyphene (non-dosage forms) (9273)</td>
<td>II</td>
</tr>
</tbody>
</table>

On August 20, 1987, the DEA was advised that Ayerst-Wyeth Pharmaceutical Inc., State Road 3, Kilometer 142.1, P.O. Box 2880, Guayama, Puerto Rico 00654, wishes to withdraw its application for registration as a bulk manufacturer of dihydrocodeine (9120) and bulk dextropropoxyphene (non-dosage forms) (9273).

The application having been withdrawn, any proceedings relating to the application have been terminated and the publication withdrawn.

Gene R. Haislip,
Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration.

[FR Doc. 87-21253 Filed 9-15-87; 8:45 am]

BILLING CODE 4410-09-M

Quotas for Controlled Substances in Schedule I

AGENCY: Drug Enforcement Administration, Justice.

ACTION: Notice of Established 1987 Aggregate Production Quota for Ibogaine.

SUMMARY: This notice establishes the 1987 aggregate production quota for ibogaine, a Schedule I controlled substance.

DATE: This order is effective September 16, 1987.

FOR FURTHER INFORMATION CONTACT: Howard McClain, Jr., Chief, Drug Control Section, Drug Enforcement Administration, 1405 I Street, N.W., Washington, D.C. 20537. Telephone (202) 653–1398.

SUPPLEMENTARY INFORMATION: On June 30, 1987, a notice proposing to revise the 1987 aggregate production quota for ibogaine was published in the Federal Register (52 FR 24350). All interested persons were invited to comment on or object to the proposal on or before July 30, 1987.

Pursuant to section 3(c)(3) and 3(E)(2)(B) of Executive Order 12291, the Director of the Office of Management and Budget has been consulted with respect to these proceedings. The Administrator hereby certifies that this matter will have no significant impact upon small entities within the meaning and intent of the Regulatory Flexibility Act (5 U.S.C. section 601 et seq.). The establishment of annual aggregate production quotas for Schedules I and II controlled substances is mandated by law and by the international commitments of the United States. Such quota impact...
An applicant must be prepared to show one of the following as proof of timely mailing:

1. A reliably dated U.S. Postal Service postmark.
2. A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.
3. A dated shipping label, invoice, or receipt from a commercial carrier.
4. Any other dated proof of mailing acceptable to the Director of IMS.

If any application is mailed through the U.S. Postal Service, the Director does not accept either of the following as proof of mailing: (1) A private metered postmark; or (2) a mail receipt that is not date-cancelled by the U.S. Postal Service.

Applications delivered by hand: An application that is hand-delivered must be taken to the Institute of Museum Services, Old Post Office Building, 1100 Pennsylvania Avenue NW., Room 609, Washington, DC 20506.

IMS will accept a hand-delivered application between 9:00 a.m. and 4:30 p.m. (Washington, DC time) daily, except Saturdays, Sundays, and Federal holidays.

An applicant that is hand-delivered will not be accepted after 4:30 p.m. on the deadline date.

Program Information: Program information is contained in the following final regulations published June 17, 1983 in Federal Register Vol. 48, No. 118, pages 27727-27734; amendments published on April 10, 1984 Federal Register Vol. 49, No. 70, pages 14108-14111 and on June 15, 1984 Federal Register Vol. 49, No. 117, pages 24731-24733; and for a document relating to Final Regulations published on this program, see rule published elsewhere in this issue.

Further Information: For further information contact Theresa Michel, Public Affairs Officer, Institute of Museum Services, 1100 Pennsylvania Avenue NW., Washington, DC 20506. Telephone: (202) 786-6536.

Lois Burke Shepard,
Director, Institute of Museum Services.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

Institute of Museum Services; General Operating Support Program

Agency: Institute of Museum Services, National Foundation on the Arts and the Humanities.

Action: Grant Application Availability Notice for Fiscal Year 1988.

This grant application announcement applies only to the General Operating Support Program awards under 45 CFR Part 1180 for Fiscal Year 1988.

Nature of Program: IMS makes awards under the GOS program to museums to maintain, increase, or improve museum services. The purpose of these awards is to ease the financial burden borne by museums as a result of their increased use by the public and to help them carry out their educational role, as well as other functions. Section 206 of the Museum Services Act, Title II of Pub. L. 94-402, as amended, contains authority for this program. (20 U.S.C. 905).

Deadline Date for Transmittal of Applications: An application for a new grant must be mailed or hand-delivered by Friday, November 13, 1987.

Applications Delivered by Mail: An application sent by mail must be addressed to the Institute of Museum Services, 1100 Pennsylvania Avenue NW., Room 609, Washington, DC 20506. A date stamp or metered postmark (which is legible) will be acceptable to IMS as proof of mailing. Applications delivered by mail must be addressed to the Institute of Museum Services; General Operating Support Program; Federal Register, Room 609, 1100 Pennsylvania Avenue NW., Washington, DC 20506.

Packet to museums and other institutions on its mailing list. Applications may obtain Application Packets by writing or telephoning the Institute of Museum Services, 1100 Pennsylvania Avenue NW., Room 609, Washington, DC 20506, (202) 786-6539.

Applicable Regulations: Final regulations for the General Operating Support grant program were published in the Federal Register on June 17, 1983 FR Vol. 48, No. 118, pages 27727-27734. Amendments to these regulations were published in the Federal Register on April 10, 1984 FR Vol. 49, No. 70, pages 14108-14111 and on October 5, 1984, FR Vol. 49, No. 195 pages 39346-39349, on June 15, 1985 FR Vol. 49, No. 117 pages 24731-24733; and for a document relating to Final Regulations published on this program, see rule published elsewhere in this issue.

The regulations as amended implement the Museum Services Act. The amendments make technical and other changes in the eligibility conditions and other terms for the administration of the General Operating Support Program and remove unneeded provisions. As revised the regulations published on June 17, 1983 will apply to the award of grants for Fiscal Year 1987.

Further Information: For further information contact Theresa Michel, Public Affairs Officer, Institute of Museum Services, 1100 Pennsylvania Avenue NW., Washington, DC 20506. Telephone: (202) 786-6536.

Lois Burke Shepard,
Director, Institute of Museum Services.

BILLING CODE 7036-01-M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-285; Licensee No. DPR-40
EA 86-175]

Order Imposing Civil Monetary Penalty; Omaha Public Power District (Fort Calhoun Station)

I

Omaha Public District (licensee) is the holder of operating License No. DPR-40 issued by the Nuclear Regulatory Commission (NRC/Commission) on August 19, 1973. The license authorizes the licensee to operate the Fort Calhoun Station in accordance with the conditions specified therein.

ORDER

Pursuant to Section 238 of the Atomic Energy Act of 1954, as amended, and Section 122 of the Energy Reorganization Act of 1974, as amended, the NRC hereby issues the order set forth in this Notice.

The NRC has accepted the allegation of violations of regulations of the NRC by the licensee in connection with the operation of the Fort Calhoun Station in Nebraska.

The alleged violation is specified in the attached Notice of Violation No. 21-09-22-1197.

The order imposes a penalty of $75,000 in civil monetary penalties against the licensee.

The deadline for the licensee to submit a written statement or other documents in defense of the Order Imposing Civil Monetary Penalty is sixty (60) days after service of the Order."
II
A special inspection of the licensee's activities was conducted during September 16-20, 30, October 1-8, November 6-8, 18-22, and December 9-17, 1985. The results of this inspection indicated that the licensee had not conducted its activities in full compliance with NRC requirements. A written Notice of Violation and Proposed Imposition of Civil Penalty was served upon the licensee by letter dated January 26, 1987. The Notice stated the nature of the violations, the provisions of the NRC's requirements that the licensee had violated, and the amount of the civil penalty proposed for Violation I. The licensee responded to the Notice of Violation and Proposed Imposition of Civil Penalty by letter dated April 10, 1987.

III
After consideration of the licensee's response and the statements of fact, explanation, and request for reduction of severity level and remission of the civil penalty contained therein, the Deputy Executive Director for Regional Operations has determined, as set forth in the Appendix to this Order, that Violation I occurred as stated and that the penalty proposed for Violation I designated in the Notice of Violation and Proposed Imposition of Civil Penalty should be imposed.

IV
In view of the foregoing and pursuant to section 234 of the Atomic Energy Act of 1954, as amended (Act), 42 U.S.C. 2282, and 10 CFR 2.205, It Is Hereby Ordered That:

The licensee pay a civil penalty in the amount of Fifty Thousand Dollars ($50,000) within 30 days of the date of this Order, by check, draft, or money order, payable to the Treasurer of the United States and mailed to the Director, Office of Enforcement, U.S. Nuclear Regulatory Commission, ATTN: Document Control Desk Washington, DC 20555.

The licensee may request a hearing within 30 days of the date of this Order. A request for a hearing should be clearly marked as a “Request for an Enforcement Hearing” and shall be addressed to the Director, Office of Enforcement, U.S. Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington, DC 20555, with a copy to the Regional Administrator, U.S. Nuclear Regulatory Commission, Region IV, and a copy to the NRC Resident Inspector, Fort Calhoun Station. If a hearing is requested, the Commission will issue an Order designating the time and place of the hearing. If the licensee fails to request a hearing within 30 days of the date of this Order, the provisions of this Order shall be effective without further proceedings. If payment has not been made by that time, the matter may be referred to the Attorney General for collection.

In the event the licensee requests a hearing as provided above, the issues to be considered at such hearing shall be:

(a) Whether the licensee was in violation of the Commission's requirements as set forth in Violation I of the Notice of Violation and Proposed Imposition of Civil Penalty referenced in Section II above, and
(b) Whether, on the basis of such violation, this Order should be sustained.

Dated at Bethesda, Maryland, this 10th day of September 1987.

For the Nuclear Regulatory Commission.

James M. Taylor,
Deputy Executive Director For Regional Operations

Appendix—Evaluations and Conclusions

On January 26, 1987 a Notice of Violation and Proposed Imposition of Civil Penalty (Notice) was issued for violations identified during an NRC inspection. Omaha Public Power District responded to the Notice on April 10, 1987. The licensee admitted that Violation I occurred as stated in the Notice; however, the licensee requested reduction of the severity level and remission of the civil penalty. The NRC's evaluation and conclusion regarding the licensee's arguments are as follows:

Restatement of Violation I

10 CFR 50.59(a) allows the holder of a license to make changes in the facility as described in the safety analysis report (SAR) without prior Commission approval unless it involves a change in the technical specifications or involves an unreviewed safety question. An unreviewed safety question is created if the probability of occurrence or the consequences of an accident or malfunction of equipment important to safety previously evaluated in the SAR may have been increased.

An unreviewed safety question because the consequences of an accident previously evaluated in the SAR may have been increased.

2. On January 15, 1985, the licensee improperly analyzed the change to its facility as described above and concluded that an unreviewed safety question did not exist when, in fact, an unreviewed safety question did exist.

This is a Severity Level III violation (Supplement I).

Civil Penalty—$50,000.

Summary of Licensee's Response

The licensee admits that Violation I occurred but requests remission of the civil penalty based on reevaluation of the violation's severity level. The licensee reviewed the modification to YCV-1045 and admits that previous evaluations of the modification were not sufficiently comprehensive. However, it was concluded that the modification constituted a system enhancement and that an unreviewed safety question did not exist.
In evaluating whether the consequences of an accident, previously evaluated in the USAR may have been increased, the licensee identified three specific events as potentially impacted by the new “fail open” mode of YCV-1045. Of the analyses of the three events, only the analysis for the steam generator tube rupture (SGTR) event demonstrated an increased impact, revealing a small increase in the radiological consequences. Because the SGTR analysis of Section 14.14.5 of the USAR remained the bounding analysis, the licensee argues that neither the probability of occurrence or consequences of an equipment malfunction or accident previously identified were increased. To further support this conclusion the licensee discusses the probable existence of the release path directly to the atmosphere upon loss of instrument air when YCV-1045 was a “fail close” valve. The licensee argues that even as a “fail close” valve, YCV-1045 would have opened on residual system air pressure, so that the release path would have previously existed and was not created by the modification. The licensee’s response also addresses the other criteria for an unreviewed safety question delineated in 10 CFR 50.59 and concludes neither was applicable. In the licensee’s review of whether the margin of safety as defined in the basis for any Technical Specification is reduced, the discussion focuses on containment integrity. The licensee concludes that, because YCV-1045 is required to be open during certain accident conditions, containment integrity is unaffected by the valve’s “fail open” design.

**NRC Evaluation of Licensee’s Response**

The NRC staff has carefully reviewed the licensee’s response and has concluded that an unreviewed safety question did exist. The staff agrees with the licensee that with the modification of YCV-1045 to a “fail open” valve, system reliability was improved. However, the improvement of reliability without the addition of safety-related accumulators for valves YCV-1045 A/B introduced an unanalyzed release path through YCV-1045. A sufficiently comprehensive safety analysis/safety evaluation performed in 1979, 1983, or 1985 should have identified that the modification resulted in the introduction of a steam release path to the environment which was not previously considered in USAR Section 14.14.2 and which, as demonstrated by the licensee, increased the radiological consequences of the SGTR event. Contrary to the licensee’s argument, the consequences of a configuration change to a system described in the safety analysis report do not have to exceed those of the bounding analysis to constitute an unreviewed safety question. The consequences of a change in a system configuration need only result in an increase in the consequences of an accident when compared to those for that accident previously analyzed. If the specific accident conditions were not previously analyzed then an unreviewed safety question exists until the analysis is performed.

With regard to the licensee’s argument that the release path existed prior to the modification because sufficient instrument air pressure would have remained in the system to open YCV-1045, the NRC staff concludes that this is only a supposition. The licensee has not provided any factual basis in the form of an analysis to support this hypothesis. Since Violation I only addressed the existence of an unreviewed safety question because the consequences of an accident previously evaluated in the USAR May have been increased (10 CFR 50.59(2)(i)), the staff did not review in detail the licensee’s response addressing the other criteria for an unreviewed safety question. However, the staff does not agree with the licensee’s contention regarding containment isolation in that, the licensee did not adequately address the containment isolation function of valve YCV-1045, since the valve, along with valves HC-1041 and 1042, provides isolation capability for a system closed to the containment atmosphere. The modified “fail open” mode of valve YCV-1045 no longer provided the isolation function as designed. As such, during a loss-of-collant accident, concurrent with steam generator leakage, a continuing release of radioactive steam to the environment via YCV-1045 would occur until the valve was isolated manually-locally. Consequently, because between March 1980 and January 1985 an unreviewed safety question did exist when valve YCV-1045 was modified, the violation is appropriately categorized as a Severity Level III violation and therefore, the licensee’s request for remission of the civil penalty based on the reduction in severity level of the violation is not deemed to be appropriate.

**NRC Conclusion**

After careful consideration of the licensee’s response, the NRC staff concludes that the violation is significant in that an unreviewed safety question as defined in 10 CFR 50.59 existed and the violation is appropriately classified as a Severity Level III violation. Further, the licensee has not provided a sufficient basis for remission of the civil penalty. Consequently, the proposed civil penalty in the amount of Fifty Thousand Dollars ($50,000) should be imposed.

---

**Meeting: Advisory Committee on Reactor Safeguards; Subcommittee on Generic Items**

The ACRS Subcommittee on Generic Items will hold a meeting on September 30, 1987, Room 1046, 1717 H Street, NW., Washington, DC. The entire meeting will be open to public attendance.

The agenda for the subject meeting shall be as follows:

Wednesday, September 30, 1987—8:30 A.M. until the conclusion of business

The Subcommittee will continue the discussion on the effectiveness of the programs that address generic issues and USIs. Also, it will discuss with selected licensees the contribution to plant safety resulting from the implementation of the resolved generic issues and USIs.

Oral statements may be presented by members of the public with the concurrence of the Subcommittee Chairman: written statements will be accepted and made available to the Committee. Recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and Staff. Persons desiring to make oral statements should notify the ACRS staff member named below as far in advance as is practicable so that appropriate arrangements can be made. During the initial portion of the meeting, the Subcommittee, along with any of its consultants who may be present, may exchange preliminary views regarding matters to be considered during the balance of the meeting.

The Subcommittee will then hear presentations by and hold discussions with representatives of the NRC Staff, its consultants, and other interested persons regarding this review.

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman’s ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the cognizant ACRS staff member, Mr.
OFFICE OF PERSONNEL MANAGEMENT

Request for Extension of SF 172
Submitted to OMB for Clearance

AGENCY: Office of Personnel Management.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1980 (title 44 U.S.C. Chapter 33), this notice announces a proposed extension to an unchanged form which collects information from the public. Standard Form 172, Amendment to Application for Employment, is completed by individuals applying for Federal jobs who wish to update their Federal Employment SF 171. OPM and agency examining offices as well as agency appointing officials use the information provided to determine the individual’s qualifications for Federal employment. Approximately 175,909 respondents annually expend 87,955 burden hours to complete the SF 172. For copies of this proposal, call William C. Duffy, Agency Clearance Officer, on (202) 632-7714.

DATE: Comments on this proposal should be received on or before September 23, 1987.

ADDRESSES: Send or deliver comments to:
William C. Duffy, Agency Clearance Officer, U.S. Office of Personnel Management, 1900 E Street NW., Room 6410, Washington, DC 20415
Joseph Lackey, Information Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, Room 3002, New Executive Office Building, NW., Washington DC 20503

FOR FURTHER INFORMATION CONTACT: Laurence T. Lorenz, (202) 653-8076.

PACIFIC NORTHWEST ELECTRIC POWER AND CONSERVATION PLANNING COUNCIL

Hydropower Assessment Steering Committee; Meeting

ACTION: Notice of meeting.

Status: Open

SUMMARY: The Northwest Power Planning Council hereby announces a forthcoming meeting of its Hydropower Assessment Steering Committee to be held pursuant to the Federal Advisory Committee Act, 5 U.S.C. Appendix I, 1-4. Activities will include:
• Hydro Assessment Study report
• Other
• Public comment

DATE: September 21, 1987, 10:00 a.m.

ADDRESS: The meeting will be held in the Council’s central office, 850 S.W. Broadway, Suite 1100, Portland, Oregon.

FOR FURTHER INFORMATION CONTACT: Peter Paquet, 503-222-5161.
Edward Sheets, Executive Director.

POSTAL SERVICE

Privacy Act of 1974; Matching Program—Postal Service/California State Employment Development Department

AGENCY: Postal Service.

SUMMARY: The purpose of this document is to publish notice of the Postal Service’s plan to participate as a source agency in a match by computer of certain records in its Payroll System File (050.020, Finance Records—Payroll System) with the California State Employment Development wage and unemployment insurance claims files. The purpose of the match is to identify current or former employees of the Oakland Division postal facility who are receiving unemployment compensation and/or workers’ compensation benefits to which they are not entitled.

DATE: The match is expected to begin in September 1987.

ADDRESS: Send any comments to Records Officer, Room 8121, U.S. Postal Service, 475 L’Enfant Plaza, SW., Washington, D.C. 20260-5010. Copies of all written comments will be available for inspection and photocopying between 9:00 a.m. and 4:00 p.m., Monday through Friday, in Room 8121 at the above address.

FOR FURTHER INFORMATION CONTACT: Betty Sheriff, Records Office (202) 268-5158.

SUPPLEMENTARY INFORMATION: The Postal Inspection Service is initiating a matching project to identify postal employees of the Oakland, California Division who are receiving unreported wages from non-postal sources while receiving workers’ compensation and/or partial unemployment compensation benefits. The match will further identify current and former postal employees who may be receiving unemployment compensation benefits and/or benefits under the Federal Employees’ Compensation Act (FECA) to which they are not entitled. Set forth below is the information required by paragraph 5.f. (1) of the Revised Supplemental Guidance for Conducting Computerized Matching Programs issued by the Office of Management and Budget (47 FR 21656; May 19, 1982). A copy of this notice has been provided to both Houses of Congress and the Office of Management and Budget.

Report of a Matching Program: U.S. POSTAL SERVICE (USPS) AND CALIFORNIA STATE EMPLOYMENT DEVELOPMENT DEPARTMENT (CSEDD)

b. Program Description: Under the planned program, the USPS Inspection Service (IS) will submit to the CSEDD a computer tape containing approximately 4000 social security account numbers (SSANs) of employees of the Oakland Division postal facility. The CSEDD will match that tape of SSANs against its base wage file containing records of the wages reported by employers in the State and against its file of unemployment insurance claimants. For matched SSANs (i.e., “hits”), the CSEDD will provide the IS with the following information from its files: Individual name, SSAN, employer name and address, the most current five-quarter
wage information, and the most current unemployment benefit information. The IS will follow up on hits through review of USPS payroll and Office of Workers' Compensation Program records, and checks with employers reporting payment of wages to those individuals identified as hits. A reduction, suspension, or termination of benefit payments, collection of monies overpaid, and/or disciplinary measures against the employee may ensue when the circumstances warrant but only after due process has been afforded to the individual. When there are reasonable grounds to believe there has been a violation of criminal law, the matter may be referred for Federal or State prosecution. A joint investigation will be conducted by the Inspection Service and the Department of Labor, Office of the Inspector General, on those hits verified as suspect cases and case files may be established by the IS within the parameters of Privacy Act system USPS 080.010. Inspection Requirements Investigative File System (last published in 48 FR 10975 of March 15, 1983).

c. Period of the Match: The matching program will be on a one-time basis and is expected to begin in September 1987 and end no later than March 1989.

d. Security: The CSEDD personnel who perform the match will: (a) Have the only access to the USPS computer tape; (b) use it only to accomplish the official stated purpose of the match and for no other purpose; and (c) safeguard it from unauthorized access. Likewise, information disclosed to the IS by CSEDD on hits will be used by authorized personnel only for the purpose of the match and for no other purpose and will be safeguarded from unauthorized access. All information exchanged as a result of this matching project will be maintained in locked file areas when not in use.

e. Disposition of Records: The CSEDD will not retain or copy the tape provided by the IS and will return it to the IS within six months from the date of its receipt or upon completion of the actual computer run (comparison), whichever is sooner. All information compiled as a result of this matching effort must be destroyed as soon as the determination is made that no fraud or irregularity has occurred.

f. Further Comments: No bestowed rights, privileges, or benefits will be terminated solely on the basis of a "hit" or the records provided by the CSEDD in connection with this program.

Fred Eggleston,
Assistant General Counsel Legislative Division.

BILLING CODE 7710-12-M

Privacy Act of 1974; Matching Program—Postal Service/State of Washington Department of Social and Health Services

AGENCY: Postal Service.

SUMMARY: The purpose of this document is to publish notice of the Postal Service’s plan to participate in a computer matching program with the State of Washington Department of Social and Health Services to identify postal employees who are delinquent in repayment of public assistance related debts owed to that State.

DATE: The match is expected to begin in September 1987.

ADDRESS: Send any comments to Records Officer, Room 8121, U.S. Postal Service, 475 L’Enfant Plaza SW., Washington, DC. 20260–5010. Copies of all written comments will be available for inspection and photocopying between 8:00 a.m. and 4:00 p.m. Monday through Friday in Room 8121 at the above address.

SUPPLEMENTARY INFORMATION: The Office of Financial Recovery of the State of Washington Department of Social and Health Services is responsible for the collection of public assistance related debts owed to the State of Washington. That office has asked the USPS to match that tape against its public assistance related debts. The USPS will match that tape against its payroll system files (USPS 050.020, Finance Records—Payroll System) and will disclose to W-DSHS the following information about individuals common to both files (i.e., “hits”): Name, SSAN, date of birth, home address, facility where employed, last date of postal employment (as available), and wage information.

The information will be disclosed to the Office of Financial Recovery of the W-DSHS for comparison with its client files and a thorough review to verify the identity of matched individuals and their status as debtors consistent with the objectives of the matching program. Subsequent actions may include issuance of collection letters, liens against real property, and/or garnishment of wages. These or other collection actions taken by the W-DSHS will comport with all applicable due process standards. Further, the USPS Inspection Service may participate in the investigation of “hits” as a result of this matching program and establish investigative case files with the USPS parameters of Privacy Act system USPS 080.010, Inspection Requirements Investigative File System (last published in 48 FR 10975 of March 15, 1983).

Disclosure of this information is authorized by routine use No. 26 in USPS 050.020, Payroll System, most recently published in 52 FR 6251 of March 2, 1987.

c. Period of the Match: The matching program will be on a one-time basis and is expected to begin in September 1987 and end no later than March 1989.

d. Security: The USPS personnel who perform the match will: (a) Have the only USPS access to the W-DSHS computer tape; (b) use it for the purpose of the match and for no other purpose; and (c) safeguard it from unauthorized access. Likewise, the postal employee information disclosed to the W-DSHS will be used by authorized W-DSHS personnel only for the purpose of the
match and for no other purpose and will be safeguarded from unauthorized access.

e. Disposition of Records: The USPS will not retain or copy the tape provided by W-DSHS and will return it upon completion of the match. All information compiled as a result of this matching effort must be destroyed as soon as the determination is made that no irregularity has occurred.

f. Other Comments: No bestowed rights, privileges or benefits will be terminated solely on the basis of a "hit" or the records provided by the USPS in connection with this program.

Fred Eggleston,
Assistant General Counsel, Legislative Division.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–24898; File No. SR-Amex-87–12]

Self-Regulatory Organizations; American Stock Exchange, Inc.; Order Granting Accelerated Approval to Proposed Rule Change

On June 1, 1987, the American Stock Exchange, Inc. ("Amex"), submitted to the Securities and Exchange Commission ("Commission"), pursuant to section 19(b)(1) under the Securities Exchange Act of 1934 ("Act") 1 and Rule 19b–4 thereunder, 2 a proposed rule change to increase position and exercise limits for Treasury note options.

In 1982, when the Amex introduced 10-year Treasury note options, the average amount of each Treasury note series auctioned was less than half the amount offered at recent auctions. Position and exercise limits were established at a fixed 2,000 contracts (each Treasury note option contract represents $100,000 in underlying Treasury notes), which represented approximately 5 to 10% of the then publicly offered principal amount.

In recent years, however, the size of Treasury financings has increased substantially (e.g., the two currently trading Treasury notes each has public offerings of $9 billion and one issue subsequently reoffered an additional $9 billion). In response to the increased size of these public financings, the proposed rule change provides for position and exercise limits based on 10% of the amount of the specific publicly auctioned Treasury note, with a maximum limit of 12,000 contracts. In addition, if any of the underlying Treasury notes are subsequently reported as STRIPS (separate trading of registered interest and principal of securities), additional position limits must be reduced if those limits represent more than 12% of the non-STRIPS Treasury note. The Chicago Board Options Exchange, Inc. ("CBOE") sought the same change for its treasury note options and its 30-year Treasury bond options and, in June 1986, enacted position limits based on the public offering size of the 30-year Treasury bond.

The Commission previously has identified the principal purposes of position and exercise limits as: (1) To minimize the potential for manipulations and corners or squeezes of the underlying market; (2) To impose a ceiling on the position an investor with inside corporate or market information can establish through the use of options; and (3) To reduce the possibility for disruption of the options market itself, especially in illiquid options classes.

The Amex position and exercise limit of 10% of a Treasury note series does not pose a risk of manipulation of the market in the underlying Treasury notes because of the large and liquid supply of the notes deliverable against such option contracts. The Amex extension of existing position exercise and limits in Treasury note options reflects the increased dollar value of recently auctioned Treasury notes. Growth in institutional investor demand for Treasury notes creates a corresponding need for institutions to establish offsetting positions in derivative products (i.e., options or futures) to lessen their risk. In this regard, the Commission believes the Amex proposal to increase position and exercise limits to 10% of the value of the Treasury notes being offered publicly will enhance the utility of Treasury note options for large institutional investors and thereby increase the depth and liquidity of the market in the Treasury note options.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder as applicable to a national securities exchange, and, in particular, the requirements of section 6, 4 and the rules and regulations thereunder. There have been no discernible regulatory problems associated with current Treasury note option limits and the Amex proposal fundamentally represents a continuation of the current approach to such limits, with the increase proposed being essentially gradual ones relative to the size of recent issues of the underlying securities. Indeed, the Amex proposal enhances upon its current rule by accounting for stripping. The Amex proposal also appears to respond to market participants needs for greater limits in this area, and strikes an appropriate overall balance between the needs of market participants and the regulatory purposes position and exercise limits are designed to serve.

The Commission finds good cause for approving the proposed rule change prior to the thirtieth day after the date of publication of notice of filing thereof because the rule change is substantively identical to a proposed rule change previously filed by the CBOE and approved by the Commission.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the proposed rule change is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,
Secretary.

BILLING CODE 8010–01–M

Self-Regulatory Organizations; Order Approving Proposed Rule Change by the American Stock Exchange, Inc. Relating to Expansion of AUTO–EX System Order Size

Pursuant to section 19(b) of the Securities Exchange Act of 1934 ("Act") 3 and Rule 19b–4 thereunder, 4 the Commission continues to believe that proposals to increase position and exercise limits must be justified and evaluated separately. The Commission thus, has reviewed the proposed exercise limits separately and, as indicated, has concluded that these limits should not raise manipulation problems or increased concern over market disruption in the underlying securities.

The proposed rule change is approved.

The Commission finds good cause for approving the proposed rule change prior to the thirtieth day after the date of publication of notice of filing thereof because the rule change is substantively identical to a proposed rule change previously filed by the CBOE and approved by the Commission.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the proposed rule change is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,
Secretary.

BILLING CODE 8010–01–M

Self-Regulatory Organizations; Order Approving Proposed Rule Change by the American Stock Exchange, Inc. Relating to Expansion of AUTO–EX System Order Size

Pursuant to section 19(b) of the Securities Exchange Act of 1934 ("Act") 3 and Rule 19b–4 thereunder, 4
the American Stock Exchange, Inc. ("Amex" or "Exchange") submitted, on July 10, 1987, copies of a proposed rule change that would expand the Amex automated execution system for options ("AUTO-EX") by increasing the size of eligible marketable limit order limits from 10 to 20 contracts.

Notice of the proposed rule change, together with its terms of substance, was published in Securities Exchange Act Release No. 24732, July 28, 1987, 52 FR 28883, August 4, 1987. No comments were received regarding the proposal. AUTO-EX is an automated execution system that enables member firms to route public customer market and marketable limit orders up to 10 contracts through the system for automatic execution at the best prevailing price at the time the order is entered. AUTO-EX reports such executions back to the entering firm as well as to the last price. The AUTO-EX system maintains the priority of public limit orders on the specialist's book. The system differentiates between the bids and offers of limit orders on the book and all other bids and offers, and diverts an incoming AUTO-EX order to the specialist's post for manual execution against the limit order book if the best bid or offer in the marketplace is represented by a book order.

AUTO-EX is presently used in selected series of Major Market index options, in emergency situations involving high volume in particular equity options, and for certain orders in competitively traded options. The Amex states that the AUTO-EX system has received the strong support of Exchange member firms. The system results in "locked in" trades since the Exchange submits both sides to comparison, thereby eliminating operational burdens for users.

The Commission recently approved a proposed rule change to expand the Exchange's Amex Options Switching System ("AMOS") by increasing the size of contracts to be entered through AMOS from 10 to 20. The AMOS system provides Amex member firms with the means to route electronically options orders, up to the specified volume limits, to the post where the option is traded. Following the execution of an electronically routed order, the member receives an execution report back through the system. In approving the proposal, the Commission concluded that the increased order routing parameters requested by the Amex were justified due to a substantial increase in order flow.

AUTO-EX is an automatic order execution system that interlocks with the AMOS order routing system. In order for these interlocking systems to operate efficiently, the Exchange contends that it must have the authority to set the same 20-contract limit for both systems.

The Commission believes that increasing the size of eligible orders in the Amex's AUTO-EX system from 10 to 20 contracts can benefit the investing public by facilitating the execution of orders that have been routed through the Amex's AMOS system. The Commission also believes that increasing the number of contracts that can be executed through AUTO-EX from 10 to 20 will enhance further the Exchange's ability to process transactions expeditiously and effectively. The Commission also believes that the Amex's incorporation of the specialists' book into the routing and execution of orders will ensure that limit orders on the book will be protected. Moreover, as order routing and execution systems are integrally related, the Commission believes it logical to provide for automatic execution of the same number of contracts that are routed automatically to the appropriate post. Finally, the increase in size from 10 to 20 contracts does not alter significantly the nature of the orders eligible for AUTO-EX. The Commission therefore finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of section 6(b)(5) and section 11A(a)(1)(B) and the rules and regulations thereunder, in that it will foster cooperation and coordination with persons engaged in facilitating transactions in securities, and will result in more efficient and effective market operations.

It is therefore ordered, pursuant to Section 19(b) of the Act, that the proposed rule change is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,
Secretary.

BILLING CODE 8010-01-M

[Release No. 34-24994; File No. SR-CBOE-87-15]

Self-Regulatory Organizations; Chicago Board Options Exchange, Inc.; Order Approving Proposed Rule Change

Pursuant to section 19(b) of the Securities Exchange Act of 1934 ("Act") and Rule 19b-4 thereunder, the Chicago Board Options Exchange, Inc. ("CBOE" or "Exchange"), on April 27, 1987, submitted to the Securities and Exchange Commission a proposed rule change relating to government security options permits ("GSOPs" or "permits"). The proposal was published for comment in Securities Exchange Act Release No. 24440 (May 11, 1987), 52 FR 18632. As discussed below, several comment letters were received.

The proposed rule change would enable the CBOE to issue up to 20 three-year permits to trade government security options settled by physical delivery. These permits would be the successors to non-equity options permits issued in 1981, of which two remain in effect. Proposed Rule 3.22A would create 20 new permits with the same terms as the permits issued in 1981, except that the new permits would not carry a right to purchase a regular membership, no Exchange member would be allowed to hold more than two permits, and a sole proprietor member would be able to employ a nominee to use a permit.

In addition, the proposal would replace the term "non-equity options" with the term "government security options settled by physical delivery" in the Exchange rules relating to both the old and new permits. Finally, the definition of the phrase "non-equity options permit holder" contained in CBOE Rule 1.1(h)(b) would be omitted.
as duplicative, because a definition is provided in Chapter Three of the CBOE rules.

I. Comments

In a comment letter, J.S. Fossett & Co., Inc. ("Fossett"), a CBOE member, objected to the manner in which the issuance of GSOPs was authorized. In a March 30, 1987 notice of a special meeting and in an April 1, 1987 letter to CBOE members from Gary P. Lahey, Vice Chairman of the Exchange, the CBOE staff informed the membership that at an April 14, 1987 special meeting the issuance of GSOPs would be considered. The notice and letter informed the membership that issuance of the permits would be deemed authorized if a majority of the members voted affirmatively or if a quorum was not obtained at the end of a maximum of three days' balloting. By the end of the third day, April 16, 1987, a quorum had not been reached, so the GSOPs were deemed approved.

Fossett argues that an affirmative vote of a majority of the Exchange membership was required to authorize the issuance of GSOPs. Specifically, Fossett contends that because Section 2.1(a) of the CBOE Constitution requires that the issuance of Exchange memberships be approved by a majority vote of the CBOE members, the permits, which in Fossett's view "are nothing more than limited memberships" because they "give their holders the most important privilege of membership—the right to go on the Exchange floor and enter into transactions as a market maker," must be approved by an affirmative membership vote. In addition, Fossett noted that the special memberships approved by the CBOE in 1987, the non-equity options permits issued by the CBOE in 1981, and the foreign currency options permits issued by the CBOE in 1985 as well as limited trading permits issued by the American Stock Exchange, all were authorized by a majority voted for the relevant exchange's membership.

The CBOE responded in a letter, dated June 23, 1987, in which it argues that GSOPs are not memberships. In particular, the CBOE pointed out that the permits would exist for only three years and that permit holders would be entitled to trade only government security options, would have no right to petition or vote at Exchange meetings, would not pay Exchange dues, and would have no interest in Exchange assets. Finally, the CBOE asserted that it was not required to hold a vote on permit issuance and did so only "to give the membership an opportunity to indicate whether there was strong disagreement with the permit proposal." 11

In a letter, dated July 28, 1987, the CBOE reiterated its belief that GSOPs do not constitute memberships. The CBOE acknowledged that the definition of the term "member" in section 3(a)(3)(A) of the Act would include a GSOP holder, but argued that the CBOE Constitution's definition of "member" would not include a permit holder and that the two definitions have different purposes and are not required to be in agreement. In addition, the Exchange drew a distinction between permits and memberships by arguing that a permit would rise to the level of a membership if, for example, it were of unlimited duration, allowed trading in several established products, and included an interest in Exchange assets and the right to petition for and vote at CBOE meetings. 12

Fossett responded to the CBOE's contentsions in an August 6, 1987 letter, in which it cited the Act's definition of the term "member" and reiterated its point that GSOPs provide the essence of an exchange membership—the right to transact business on the exchange floor. Fossett also cited section 6(b)(3) of the Act, which requires an exchange's rules to "assure a fair representation of its members in the administration of its affairs." As Fossett pointed out, the CBOE relied on section 6(b)(3) of the Act in a previous rule filing seeking Commission approval of an amendment to section 2.1 of the CBOE Constitution to require membership approval of the issuance of additional memberships.

The CBOE then submitted a third letter, dated August 7, 1987. The CBOE stated that it does not believe it is possible to draw a hypothetical line between "permits" and "memberships," but that the significant limitations on GSOPs dictate a finding that GSOPs are not memberships for purposes of the CBOE Constitution. The Exchange also argued that there are different purposes behind the definitions of the term "member" in the Act and in the CBOE Constitution. In particular, the Act's definition is designed to bring within the purview of the Act all those who effect transactions on an exchange floor, while the CBOE Constitution's definition is meant to "preclude dilution of member rights, particularly access to the Exchange's trading floor in relation to established products." 13 The CBOE, while acknowledging that it would have been preferable to have included in section 2.1 of the CBOE Constitution an explicit provision allowing the Exchange to issue trading permits that provide inexpensive access to new products, argued that there is no administrative history suggesting that section 2.1 "was designed to limit the Exchange's ability to provide access to its floor in relation to the establishment of new products." 14

Finally, the CBOE submitted an August 26, 1987 letter discussing in detail the legislative history of the amendment of Article II, section 2.1(a) of the CBOE Constitution. The CBOE stated that it does not believe that GSOPs are memberships for purposes of the Act and reiterated its argument that GSOPs do not constitute memberships. 15

Fossett Letter I, supra note 5, at 2. Fossett also noted that a Philadelphia Stock Exchange proposal to create so-called equity specialist participations was defeated due to a lack of a quorum at a membership meeting. Id. at 4.

6 See id. at 2.

7 CBOE special memberships, which will expire after 10 years, were issued in 1980 to former options members of the Midwest Stock Exchange. Special members are entitled to a 1/6 vote at Exchange meetings and have no interest in Exchange assets. See CBOE Constitution, sections 2.1(d) and 2.6(b)-(d).

8 Foreign currency options permits entitled holders to effect transactions only in currency options and are subject to many of the same limitations applicable to government security options permits. See CBOE Rule 22.13.

9 Fossett Letter I, supra note 5, at 2. Fossett also noted that a Philadelphia Stock Exchange proposal to create so-called equity specialist participations was defeated due to a lack of a quorum at a membership meeting. Id. at 4.

10 See letter from Anne Taylor, Associate General Counsel, CBOE, to Joseph M. Furey, Branch Chief, Branch of Options Regulation, Division of Market Regulation, dated August 7, 1987.

11 See letter from Anne Taylor, Associate General Counsel, CBOE, to Howard Kramer, Assistant Director, Division of Market Regulation.

12 See id.

15 Id. at 2. The CBOE also agreed to include in Exchange Rule 1.1(b)(b) a definition of the term GSOP holder. This rule, which previously defined "non-equity options permit holder," would spell out the fact that permit holders are subject to all the provisions of the CBOE Constitution and rules other than those from which GSOPs expressly are exempted (e.g., those relating to voting rights and rights to Exchange assets). In this regard, the Commission agrees that, irrespective of whether the permit holders are "members" for purposes of the voting requirements regarding their issuances under the CBOE Constitution, the permit holders are "members" of the Exchange under the Act and subject to the rules of the Exchange that apply to members.

18 See letter from Anne Taylor, Associate General Counsel, CBOE, to Howard Kramer, Assistant Director, Division of Market Regulation.

19 See id. at 1.

20 Id. at 2.
the CBOE rules. In this regard, the language of the relevant CBOE provisions is somewhat circular, and thus is of Section 2.1 of the CBOE Constitution requires approval of membership offerings and Section 1.1(b) of the CBOE Constitution defines regular members as persons who acquire memberships made available by the Exchange in accordance with its rules. These sections, however, are not dispositive of whether something less than a full membership is a "membership made available by the Exchange." The Commission finds persuasive, however, the CBOE's position that section 2.1 is intended to prevent the issuance of additional memberships, which could dilute the value of existing memberships, without certain procedural steps being followed. Authorizing additional memberships, or granting additional memberships cheaply, could lessen the value of existing memberships. Section 2.1 ensures that such actions will not be taken unless certain procedures are followed (i.e., membership approval). These procedures would not be necessary, however, if the access to the trading floor that was granted was so limited in nature as not to affect the value of a full membership. Indeed, the amendment to the CBOE Constitution requiring member approval of additional Exchange memberships arose in the context of an attempt to issue 50 original, unsold full Exchange memberships, not limited trading permits. Accordingly, the CBOE should be able to issue permits granting access to its floor without membership approval if those permits are not significantly dilutive of the value of existing memberships.

While the GSOPs provide their holders with many of the same rights and obligations as do regular memberships, the CBOE Board of Directors reasonably has decided that the dilutive concerns underlying section 2.1 do not arise in connection with their issuance. The GSOPs are extremely limited in nature. They grant their holders only the right to trade a specific, low-volume or new product for a period of three years, they carry no voting rights, and they were created for the purpose of promoting trading in new options products. The Commission believes that the offering of GSOPs does not raise the same dilutive concerns as an offering of full memberships. The Commission, therefore, finds that the GSOPs need not be authorized by membership approval. This finding, however, is limited to GSOPs in particular, and does not necessarily extend to any type of trading permits the CBOE might create in the future. A permit that has more extensive rights and obligations than GSOPs may have such value as to be dilutive of existing memberships, and therefore constitute a "membership" for purposes of section 2.1 of the CBOE Constitution.

The GSOPs should afford market makers and floor brokers inexpensive access to government security options trading. This should facilitate transactions in such options, thereby enhancing market liquidity and providing a direct benefit to investors. At the same time, the permits do not contain incentives that could induce inappropriate trading by the permit holders. The Commission therefore finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of section 6(b) and the rules and regulations thereunder.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the proposed rule change, as amended, is approved.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

Jonathan G. Katz,
Secretary.

[FR Doc. 87-21364 Filed 9-15-87; 8:45 am]
BILLING CODE 8010-01-M

Self-Regulatory Organization; Chicago Board Options Exchange, Inc.; Order Approving Proposed Rule Change

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") 1 and Rule 19b-4 thereunder, 2

25 The Commission notes that GSOP holders will be subject to the same trading rules and disciplinary procedures as regular members. This should ensure that a permit holder's activities are consistent with the obligations of a member of a national securities exchange as defined in the Act. See note 15, supra.

28 As discussed above at note 15, the CBOE has agreed to include a definition of GSOP holder in CBOE Rule 1.1(h).

the Chicago Board Options Exchange, Inc. ("CBOE" or "Exchange"), on July 14, 1987, filed with the Securities and Exchange Commission ("Commission") a proposed rule amendment relating to its Retail Automatic Execution System ("RAES"). The proposal was published for comment in Securities Exchange Act Release No. 24751 (July 28, 1987), 52 FR 28884. No comments were received.

The proposed rule change would allow the CBOE to increase the number of options on the Standard & Poor's 500 Index ("OEX") eligible for execution through RAES from 10 to 20 per order. RAES currently permits the automatic execution of certain public customer orders for up to 10 contracts in a limited number of OEX series. In support of its proposal, the CBOE noted in its rule filing that RAES in OEX allows customers to enjoy firm quotes to 10 contracts in eligible series; increases the efficiency of order entry and handling, trade matching and reporting; enhances the Exchange's audit trail; and adds to the Exchange's Order Routing System customer orders routed over the Exchange's Order Routing System ("ORS") and 8.2% of OEX ORS customer contracts.

The Exchange believes that increasing the size of OEX orders eligible for execution through RAES to 20 contracts will increase the average percentage of OEX customer orders executed through RAES by approximately 2.5%, while increasing the average percentage of OEX customer contracts executed through RAES by about 2.4%. Thus, the Exchange has stated that expansion to 20 contracts will provide timely execution and enhance audit trails, fill reporting, price reporting and trade matching for a greater number of OEX orders. This should increase customer confidence and reduce the number of transactions required to be executed manually on the trading floor.

The Commission agrees that expansion of the number of OEX orders eligible for execution through RAES should enhance the efficient functioning of OEX trading on the Exchange. This enhanced efficiency will provide a direct benefit to public customers and remove impediments to and help to perfect the mechanism of a free and open market. Moreover, the increase in size from 10 to 20 contracts does not alter significantly the nature of the orders eligible for RAES. The Commission accordingly finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of section 6 and the rules and regulations thereunder.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the proposed rule change is approved.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

Jonathan G. Katz,
Secretary

BILLING CODE 8010-01

[Release No. 34-24893; File No. SR-DTC-87-12]

Self-Regulatory Organizations; Depository Trust Co., Filing and Immediate Effectiveness of Proposed Rule Change

Pursuant to section 19(b) of the Securities Exchange Act of 1934 ("Act"), notice is hereby given that on August 10, 1987, the Depository Trust Company ("DTC") filed with the Securities and Exchange Commission a proposed rule change as described below. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

The proposed rule change would codify as part of DTC's Participant Operating Procedures DTC's existing procedures relating to: (1) Credit of dividend, principal, and interest proceeds to participants' cash accounts; (2) reversal of those credits in certain circumstances (e.g., issuer default); and (3) refund of DTC's overnight investment income to participants who also act as paying agents on DTC-eligible issues.

The proposal also would codify DTC's current practice of passing through to participants charges by DTC's interest collection agent for interest costs incurred from late bearing municipal bond interest payments. These procedures previously were approved in

3 RAES also handles public customers orders in options on the Standard & Poor's 500 Index and on equity securities of six corporations. A more comprehensive description of RAES is contained in the Commission's initial order approving the CBOE's implementation of RAES on a pilot basis. See Securities Exchange Act Release No. 21095 (January 28, 1986), 52 FR 4823.

5 52 FR at 28894.

8 For payments of $1,000,000 or more, DTC can withhold crediting if: (a) DTC has not received by 12:00 noon Eastern time on the payable date advice that it has received such payment, and (b) DTC's prior experience with the payor indicates that such payment will not be received before 12:00 noon Eastern time on the payable date. For payments of less than $1,000,000, DTC can withhold crediting if: (1) DTC has not received payment by 12:00 noon Eastern time on the payable date, and (2) DTC management determines that the securities involved are of comparable value to DTC's prior experience with the payor. DTC's prior experience with the payor indicates that such payment will not be received on the payable date.

9 DTC credits participants for payments of interest on redemptions of non-municipal securities on the date such payments are received by DTC. DTC participants for interest on redemptions of municipal securities also on the date such payments are received by DTC.
from a paying agent within ten (10) business days of the payable date for:
(1) an error by the paying agent; (2) a failure by the issuer to pay; or (3) the bankruptcy of the issuer on or prior to the payable date. DTC also charges back for any errors made by DTC as a result of erroneous announcements or calculations of payments credited to participants in anticipation of payments which have not been received by DTC 10 business days after the payable date.4 For charge-backs resulting from a paying agent's written request, DTC notifies the participant one business day prior to the date DTC enters the charge-back in the participant's daily money settlement account.5 Although DTC usually verifies the facts stated in the notice from the paying agent, DTC does not have any obligation to do so. If the paying agent notifies DTC more than 10 business days after the payable date, DTC is not required to charge back a participant's account but will cooperate with the paying agent and the participant to resolve the matter. For DTC initiated charge-backs, DTC gives participants one business day notice if the charge-back occurs within ten business days after payable date. Otherwise, DTC notifies participants five (5) business days prior to the charge-back.

Under its current procedures, DTC also invests, overnight, funds received from paying agents and remits to participants income derived from those investments. DTC encourages paying agents to make dividend, principal, interest and redemption payments in same-day funds. DTC's settlement system, however, credits these payments to participants in next-day funds. As a result, payments come as close as practicable to passing these payments on to participants in same-day funds. DTC invests the funds overnight and refunds the investment income to participants on a monthly basis. The following is a description of DTC's investment procedures.

Generally, income from the investment of dividend, principal, interest, and redemption payments is refunded to participants on a monthly basis. The amount of the refund, however, may be reduced in the following four instances. First, a refund will be decreased if all or part of that refund must be used to fund credits to participants for payments due to be received (but not received) on the preceding business day. Second, the amount of a refund to a participant who is (or is affiliated with) a payor may be reduced as follows: (a) No refund will be paid if less than 90% of payments due over the three preceding months from the participant (or the participant's affiliate) are received by DTC in same-day funds on payable date; (b) any refund paid to participant who pays (or whose affiliate pays) 90% or more of its payments on payable date in same-day funds will be reduced by (i) the percentage of the prior month's payments not received on payable date, plus (ii) the percentage of the prior month's payments not received in same-day funds. Third, the amount of a refund to a participant who pays (or whose affiliate pays) 90% or more of its payments on payable date in same-day funds may be reduced by an amount equal to any interest expense incurred by DTC to fund credits to participants for payments due from this payor which were not received on payable date. Finally, no refund shall be paid to a payor of municipal securities payments who does not provide CUSIP number identification on payments of redemption proceeds.

DTC also passes through to participants the interest collection agent's costs from late bearer municipal bond interest payments (called a "funds usage charge"). DTC channels all coupons for bearer municipal bonds to a central interest collection agent ("Agent"). On payable date, the Agent pays DTC the total interest payments from those bonds regardless of whether the Agent has collected such interest from the various paying agents. For interest payments received late by the Agent from paying agents, the Agent charges DTC a funds usage charge. DTC passes this charge on a pro rata basis to participants that received those particular payments.

DTC's proposed rule change would codify as part of DTC's Participant Operating Procedures the procedures described herein. In a previous order,6

the Commission approved DTC's crediting, charge-back, and investment procedures as they apply to dividend payments on equity securities and interest and principal payments on debt securities. The Commission stated that these procedures are designed to improve the timeliness of payments to DTC participants and enhance the safeguarding of funds in DTC's custody or control. In that Order, the Commission also approved DTC's procedure with regard to funds usage charges.

DTC believes that the proposed rule change is consistent with section 17A of the Act because it is designed to enhance the timeliness of dividend, principal, interest, and redemption payments to DTC participants and improve processing and recordkeeping by DTC and its participants. DTC also believes that the procedures to be codified are designed to enhance the safeguarding of funds in DTC's custody or control.

The rule change has become effective pursuant to section 19(b)(3)(A) of the Act and Rule 10b-6. The Commission may summarily abrogate the rule change at any time within 60 days of its filing if it appears to the Commission that abrogation is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

You may submit written comment within 21 days after notice is published in the Federal Register. Please file six copies of your comment with the Secretary of the Commission, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, with accompanying exhibits, and all written comments, except for material that may be withheld from the public under 5 U.S.C. § 552, are available at the Commission's Public Reference Room, 450 Fifth Street NW., Washington, DC. Copies of the filing also will be available for inspection and copying at the principal office of DTC. All submissions should refer to File No. SR-DTC-87-12.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

Jonathan G. Katz,
Secretary.

[FR Doc. 87-21366 Filed 9-15-87;8:45 am]
Self-Regulatory Organizations; Filing and Order Granting Accelerated Approval to a Proposed Rule Change by Midwest Stock Exchange, Inc.; Extension of the Suspension of Application of the Mandatory Posting Rule

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on July 23, 1987 the Midwest Stock Exchange, Incorporated ("MSE" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II and III below, which have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

In its filing SR-MSE-87-1, the MSE suspended the application of Article XXX, Rule 1.01 (I)(b)(c) (Mandatory Posting Rule) for the two six-month periods ending June 30, 1986 and December 31, 1986. The Exchange has determined to extend the suspension of the application of the Mandatory Posting Rule for an additional six month period ending June 30, 1987.

Although the progress of revising the evaluation criteria for mandatory posting has been significant, it has been slower than initially anticipated. In the event that revised evaluation criteria are not approved and implemented prior to the end of the year, postings pursuant to the current Mandatory Posting Rule will resume for the six month period ending December 31, 1987.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organizations included statements concerning the purpose of and basis for the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B) and (C) below, of the most significant aspects of such statements.

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The Mandatory Posting Rule requires the Exchange to semianually post for applications any security for which the Exchange's market share (determined as a percentage of number of trades reported to the tape) is less than the third largest among all exchanges and is also less than the Exchange's average market share for all specialist-assigned issues for the previous six month period. If a co-specialist's stock is posted pursuant to this Rule and he chooses to reapply for it, he is entitled to a hearing before the Committee on Specialist Assignment and Evaluation ("CSAE") pursuant to Article XVII, Rule 3 on the evaluation of his performance in the posted issue.

The first posting pursuant to the Rule was made in January 1986 for the six month period ending December 31, 1985. Since that time, CSAE representatives have met with Floor member representatives to review current evaluation criteria and consider revisions to such criteria. Because substantial progress had been made by this group to revise the evaluation criteria, the CSAE decided to suspend the application of the Mandatory Posting Rule for the two six-month periods ending June 30, 1986 and December 31, 1986. The CSAE and the Exchange's Board of Governors ("Board"), have determined to extend the suspension of the Mandatory Posting Rule for an additional six month period ending June 30, 1987 while it continues its review of the current evaluation criteria.

The CSAE anticipates that revised criteria, subject to Commission approval, will be available to review specialist performance by December 31, 1987. In the event revised criteria have not been implemented by this date, however, it is anticipated that the postings will resume under the current Mandatory Posting Rule.

The proposed rule change is consistent with section 6 of the Act in that it will encourage the dissemination of more competitive markets by the MSE, thereby promoting just and equitable principles of trade, and, in general, protecting investors and the public interest.

(B) Self-Regulatory Organization's Statement on Burden on Competition

The MSE does not believe that the proposed rule change will impose any burdens on competition.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

CSAE representatives and Exchange staff have been meeting on an ongoing basis with Floor member representatives to receive input on revising specialist evaluation criteria.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange requests that the proposed rule change be given accelerated effectiveness pursuant to Section 19(b)(2) of the Act. The Exchange anticipates that revised specialist evaluation criteria will be developed by December 31, 1987. The Board determined to suspend the application of the Mandatory Posting Rule for an additional six month period ending June 30, 1987 with the expectation that the CSAE representatives, Exchange staff members, and Floor members will submit to the Board revised specialist evaluation criteria in the near future.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the MSE. All submissions should refer to the file number in the caption above and should be submitted by October 7, 1987.

V. Conclusion

The Commission finds that the proposed rule change is consistent with
the requirements of the Act and the rules and regulations thereunder, applicable to a national securities exchange, and, in particular, the requirements of Section 6 and the rules and regulations thereunder.

As noted in the previous Commission order approving suspension of the Mandatory Posting Rule for the two six-month periods ending June 30 and December 31, 1986, the Commission believes that it is important for the Exchange to monitor the performance of MSE specialists and co-specialists to ensure that they provide the best possible markets for the securities they trade. In this regard, the Commission believes the Exchange’s plan to revise its mandatory posting evaluation criteria is part of continuing effort to develop comprehensive, balanced, and fair specialist performance standards.

Based on the above, the Commission finds good cause for approving the proposed rule change prior to the thirtieth day after the date of publication of notice of filing thereof in that approval of the proposed rule change would suspend the application of the Rule for an additional six months while simultaneously providing the Exchange with additional time to complete its review and submit to the Commission revised specialist evaluation performance criteria. The Commission, therefore, believes that accelerated approval of the proposed rule change is appropriate.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the proposed rule change be, and hereby is, approved.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,
Secretary.

[Billing Code 5100-01-M]

Self-Regulatory Organizations; Application for Unlisted Trading Privileges and of Opportunity for Hearing; Midwest Stock Exchange, Inc.

September 10, 1987

The above named national securities exchange has filed applications with the Securities and Exchange Commission pursuant to section 12(f)(1)(B) of the Securities Exchange Act of 1934 and Rule 12f-1 thereunder, for unlisted trading privileges in the following securities:

- Del-Vel Financial Corporation, Common Stock, $1.00 Par Value (File No. 7-4037)
- Furr’s/Bishop’s Cafeterias, L.P., Depositary, Preference, Units (File No. 7-4038)
- John Fluke MFG, Co., Common Stock, $.50 Par Value (File No. 7-4059)
- American Trust for American Express Shares, Scores (File No. 7-4040)
- American Trust for Ford Shares, Scores (File No. 7-4041)
- American Trust for Mobil Oil Shares, Scores (File No. 7-4042)
- American Trust for Bristol-Myers Shares, Scores (File No. 7-4043)
- American Trust for Coca-Cola Shares, Scores (File No. 7-4044)
- American Trust for Dow Chemical Shares, Scores (File No. 7-4045)
- American Trust for General Electric Shares, Scores (File No. 7-4046)
- Lewis Galoob Toys, Inc., Common Stock, $0.10 Par Value (File No. 7-4047)
- Turner Broadcasting System, Inc., Class A Common Stock, 6 1/4 Par Value (File No. 7-4048)
- Turner Broadcasting System, Inc., Class B Common Stock, 6 1/4 Par Value (File No. 7-4049)
- Solitron Devices, Inc. (Del.) Common Stock, $1.00 Par Value (File No. 7-4050)

These securities are listed and registered on one or more other national securities exchange and are reported in the consolidated transaction reporting system.

Interested persons are invited to submit on or before October 1, 1987 written data, views and arguments concerning the above-referenced applications. Persons desiring to make written comments should file three copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW, Washington, DC 20549. Commentators are requested to address whether they believe the grant of UTP is consistent with section 12(f)(1)(C). In considering an application for extension of UTP to OTC securities under section 12(f)(1)(C), the Commission is required to take account of, among other matters, the public trading activity in such security, the character of such trading, the impact of such extension on the existing markets for such securities, and the desirability of removing impediments to and the progress that has been made toward the development of a national market system. The Commission may not grant such application if any rule of the national securities exchange making an application under 12(f)(1)(C) would unreasonably impair the ability of any dealer to solicit or effect transactions in such security for his own account, or would unreasonably restrict competition among dealers in such security or between such dealers acting in the activity of market makers who are specialists and such dealers who are not specialists.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,
Secretary.

[Billing Code 5100-01-M]
Self-Regulatory Organizations; Order Approving Proposed Rule Change by the New York Stock Exchange, Inc.; Indications of Interest Upon Openings and Reopenings

The proposal retains the current requirement of waiting at least fifteen minutes from the first indication of interest before reopening a stock, but reduces the additional delay required for reopening when more than one indication is necessary. Under the proposal, the additional fifteen minute waiting period currently required after each subsequent indication would be reduced to either five or ten minutes depending upon the circumstances.

The proposal also sets forth situations where opening indications will be permitted, subject in most cases to the waiting periods described above. It permits the dissemination of an initial indication with the approval of a Floor Official before 9:30 for a security which is a spinoff or for which a trading halt had existed at the close of the prior trading session; permits indications before opening the security in the case of an initial public offering with the approval of a Floor Director or Floor Governor; and in any other situation, permits pre-opening indications with the approval of a Floor Director or Floor Governor and authorizes them to tailor the waiting periods to the situation.

In its filing, the NYSE states that the purpose of the proposed rule change is to eliminate its competitive disadvantage arising out of inconsistencies between the CTA Plan, of which the NYSE is a participant, and the NYSE’s policy on reopenings. The CTA Plan permits markets to resume trading after fifteen minutes as measured by “T time” (i.e., the time at which news has been fully disclosed), so long as the market has disseminated indications of interest during that fifteen minute period, whereas the NYSE cannot resume trading until fifteen minutes after the last indication prints. The proposed rule change reflects the NYSE’s determination that, when one or more indications follows an initial indication, investors and other off-floor participants will have an adequate time to react to indications. As noted above, there still would be the fifteen minute minimum requirement, thereby continuing a longer waiting period than required under the current CTA Plan.

The Commission has carefully reviewed the proposal and believes the proposal adequately balances the need to provide the public sufficient time to react to indications of interest with the NYSE’s desire to be competitive with other marketplaces. Although the proposal does reduce the overall waiting period where successive indications occur, it does not permit the reopening of the market any earlier than fifteen minutes from the first indication. The NYSE will monitor the implementation of these procedures and report its findings to the Commission at the conclusion of the first year of the policy’s operation.

The Commission also believes that the granting to Floor Officials, Governors, and Directors of discretion to approve dissemination of pre-opening indications in instances such as contemplated in the proposal is appropriate. Floor officials are appointed by the Exchange for the purpose of ensuring that required procedures are followed by members. These officials are trained to make appropriate decisions concerning procedures on the floor and should be very familiar with floor operations and trading situations. Accordingly, the NYSE should be able to rely on their expertise in authorizing pre-opening indications. Based on the above, the Commission finds that the proposed rule change is consistent with the requirements for the Act and the rules and regulations thereunder applicable to a national securities exchange and, in particular, the requirements of section 6 and the rules and regulations thereunder.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the proposed rule change (File No. SR-NYSE-87-14) be, and hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,
Secretary.

[FR Doc. 87-21308 Filed 9-15-87; 8:45 am]
BILLING CODE 8010-01-M

Self-Regulatory Organizations; The Options Clearing Corp.; Order Granting Approval to Proposed Amendments to Options Disclosure Document

On August 29, 1987, the Options Clearing Corporation (“OCC”), in conjunction with the American Stock Exchange, Inc., the Chicago Board Options Exchange, Inc., the New York Stock Exchange, Inc., the Pacific Stock Exchange, Inc., the Philadelphia Stock Exchange, Inc. and the National Association of Securities Dealers, Inc. (collectively, the self-regulatory organizations (“SROs”)) submitted to the Commission amended copies of an options disclosure document (“ODD”) pursuant to Rule 9b-1 of the Securities Exchange Act of 1934 (“Act”). Rule 9b-1 requires that the ODD contain information concerning, among other matters, the mechanics of buying, writing and exercising standardized options, and the risks of trading the options, and prohibits a broker or dealer from accepting a customer’s options order, or approving a customer’s account for trading, unless the broker furnishes the customer with an ODD.
The disclosure document filed with the Commission reflects recent changes in the options markets. For example, the revised document discusses some of the special characteristics and risks of internationally-traded options; the commencement of evening trading in foreign currency options; the possibility that the settlement value of certain index options may be determined by reference to the prices of the constituent stocks at times other than the close of trading; proposals to trade options on Treasury yield measures that would be settled in cash rather than by the delivery of underlying securities; and new settlement procedures for foreign currency options. The ODD also states that in the future the time period during which European-style options may be exercised may be extended beyond the current one-day period.

2 E.g., the document discusses the possibility that option premiums in foreign countries for internationally-traded options may not reflect current prices of the underlying interests in the United States, because foreign options markets may be open for trading during hours or on days when U.S. markets are closed.

4 Disclosure regarding this issue previously was approved by the Commission, and was made by the OCC and SROs, by means of a supplement to the ODD. See Securities Exchange Act Release No. 24586, March 25, 1987, 52 FR 10651. The present amendments provide further disclosure of the ramifications of settlement procedures based on other than the closing prices of the underlying stock.

5 As of the date of this release, the Commission has not approved any new debt option contracts as described in the amended ODD’s new section on Treasury yield options. Assuming that such Treasury yield options ultimately are approved for options trading, the Commission separately will consider, at that time, whether the ODD, as approved in this Order, adequately describes the characteristics and risks of such options.

6 Accordingly, the Commission’s determination to approve the revised ODD does not necessarily entail a conclusion that the ODD disclosure regarding proposed Treasury yield options complies with Rule 9b-1.

7 The revised ODD states that the Intermarket Clearing Corporation ("ICC"), a wholly owned subsidiary of OCC, may act as OCC’s agent in making foreign currency option settlements with OCC Clearing Members. ICC’s settlement procedures are same as those of OCC. In addition, OCC has established procedures whereby Clearing Members may maintain customers to make settlement directly with an OCC Clearing Member.

8 At the current time all of the European-style options traded on U.S. markets are exercisable only on the day before expiration. The Commission reserves judgment regarding the adequacy of the revised ODD’s disclosure concerning this matter pending the filing of SRO proposals to effectuate such a change, and Commission approval thereof.

Rule 9b-1 provides that an options market must file five copies of amendments to the ODD with the Commission at least 30 days prior to the date definitive copies of the amendment must be furnished to customers unless the Commission determines otherwise having due regard to the adequacy of the information disclosed and the protection of investors. This provision is intended to permit the Commission either to accelerate or extend the time period definitive copies of a disclosure document may be distributed to the public.

The Commission has reviewed the amended disclosure document and finds that it is consistent with the protection of investors and in the public interest to allow its distribution as of September 17, 1987. For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,
Secretary.

[FR Doc. 87-21309 Filed 9-15-87; 8:45 am]
BILLING CODE 8010-01-M

[Release No. 34-24889; File No. SR-Phlx-67-20]

Self-Regulatory Organizations; Philadelphia Stock Exchange, Inc.; Order Approving Proposed Rule Change

Pursuant to section 19(b) of the Securities Exchange Act of 1934 ("Act") and Rule 19b-4 thereunder, the Philadelphia Stock Exchange, Inc. ("Phlx" or "Exchange"), on June 10, 1987, filed with the Securities and Exchange Commission ("Commission") a proposed rule change that would allow the Phlx to list options on a 20-stock Utility Index. The proposed rule change was published for comment in Securities Exchange Act Release No. 24722 (July 20, 1987), 52 FR 28403. No comments were received on the proposed rule change.

The Phlx proposes to list options on a Utility Index which it has developed. This narrow-based index would be comprised of 20 common stocks of domestic companies that are involved primarily in electric power generation. These companies include many of the most highly capitalized American electric utility companies. The Utility Index would be capitalization-weighted and its value would be updated at least every minute during the trading day. Options on the Utility Index would be traded pursuant to current Exchange rules governing the trading of index options. These rules govern matters such as units of trading, exercise prices, expiration cycles, premium quotations, position and exercise limits, and replacement of stocks in an index. The only rule amendment proposed by the Phlx in connection with listing Utility Index options is an amendment to Rule 1006A ("Other Restrictions on Options Transactions and Exercise") that would specify that the Exchange would offer only European-style options on the Utility Index and that, accordingly, no restrictions on exercise would be in effect until the last trading day prior to expiration.

The Commission previously has indicated that minimum standards should be designed to ensure that narrow-based index options are not used as a subterfuge to trade options on individual stocks that do not meet the options eligibility standards or as a substitute for trading options on individual stocks. See Phlx Rule 1000A(a)(1). The Utility Index will be subject to the Phlx’s rules relating to broad-based indexes, which often differ from the requirements relating to broad-based indexes. For example, Phlx Rule 722 requires margin for short call and put positions in narrow-based indexes to be deposited and maintained in an amount equal to the premium, or market value of the contract, plus 125% of the index’s dollar value, less any amount the option is out-of-the-money, with a minimum required margin of premium plus 5% of the contract’s dollar value. By contrast, the margin requirement for a broad-based index generally is the premium, or market value of the contract, plus 5% of the index’s dollar value, less any amount the option is out-of-the-money, with a minimum required margin of premium plus 2% of the index’s dollar value. Under Phlx Rule 1001A(b)(1), position and exercise limits for narrow-based indexes are 6,000 contracts, while Phlx Rule 1000A(a) sets position and exercise limits for broad-based indexes at an aggregate contract value of $300 million.

8 Details relating the calculation of the Index value and the composition of the Index, including a list of the specific stocks and their prices, market values and relative weights in the Utility Index, were included in the original rule filing. See 52 FR at 28404-05.

9 See Phlx Rules 1000A-1103A.

Although a European-style option is designed so that exercise cannot occur prior to the option’s expiration date, investors are free to trade out of their positions at any time throughout the life of the option.

The options exchanges have adopted uniform option eligibility standards. To be eligible for options trading, a company’s common stock must, for example, have a market price per share of at

Continued
way to trade options on one stock that makes up a very large proportion of the index. The Commission has decided, however, that, rather than setting an absolute minimum number of securities that could be included in a narrow-based index, the exchanges should establish appropriate standards and submit proposed index options to the Commission for review. In view of the Commission's concerns regarding potential abuses in connection with narrow-based indexes, the exchanges generally have set forth criteria that must be met for industry or narrow-based indexes. For example, the Pacific Stock Exchange's ("PSE") rules require that no stock comprise greater than 50% of the index and that any stock constituting greater than 10% of the index be eligible for options trading.1 In addition, if the index consists of fewer than 20 stocks, at least 50% of its value must be comprised of options-eligible stocks; if it consists of 20 or more stocks, at least 35% of its value must be options-eligible stocks. Other exchanges, however, such as the Phlx, have chosen to provide less specific guidance in their Rules as to what minimum criteria must be satisfied for designation as a narrow-based index.10

Regardless of the specificity provided by an exchange in its rules, however, the Commission must determine that the proposed index option satisfies the relevant statutory criteria. In particular, the Commission finds that the proposed index contains a sufficient number of active and liquid stocks so that the index is not susceptible to manipulation, and that the index is not used as a surrogate for trading options on securities that themselves are not options-eligible.

The Phlx's proposed Utility Index satisfies all of the guidelines described above, even the very detailed criteria set forth in PSE Rule XXI. No stock in the Utility Index comprises more than 10% of the value of the index.11 The stocks in the index are, for the most part, activity traded.12 In addition, 80% of the securities in the Stock Utility Index are options-eligible.13 Finally, no one individual or group of the 20 stocks has a capitalization that is so large in comparison to the other stocks in the index that its price movements will impact disproportionately the index's value. Consequently, the Commission finds that the proposed rule change is approved.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the proposed rule change is approved. For the Commission, by the Division of Market Regulation pursuant to delegated authority.

Jonathan G. Katz, Secretary.

BILLING CODE 8010-01-M

[Release No. 34-24897; File No. SR-SCCP-87-02]

Self-Regulatory Organizations; Stock Clearing Corporation of Philadelphia; Order Approving Proposed Rule Change

The Stock Clearing Corporation of Philadelphia ("SCCP") on June 6, 1987, filed a proposed rule change with the Commission under section 19(b) of the Securities Exchange Act ("Act"). As explained in greater detail below, the proposal would authorize SCCP to establish procedures for the automated

utility stocks will attract widespread investor participation, the Commission accepts the Phlx's representation in a September 6, 1987 telephone conversation that a utility industry index would serve an economic function by allowing investors to hedge portions of utility stocks and take positions with respect to price movements in the utility segment of the market. Telephone conversation between Michele Berkowitz, Staff Counsel, Phlx, and David Underhill, Attorney, Division of Market Regulation, SEC. Accordingly, because the Commission is satisfied that the Index will not raise regulatory problems and can serve an economic function, because any benefits that might be derived by market participants would likely be outweighed by the potential for manipulation, diminished public confidence in the integrity of the markets, and other valid regulatory concerns. While it is unclear whether an index product based on 20

13 All of the Utility Index's 20 component stocks are listed and traded on the New York Stock Exchange. For the six-month period March 1, 1987 through August 31, 1987, average daily trading volume for these stocks has ranged from a low of approximately 184,179 shares for Centerior Energy to a high of 773,323 shares for Pacific Gas and Electric.

14 According to the Phlx, the 16 of the 20 Utility Index stocks are options-eligible. These include: American Electric Power Co.; Centerior Energy Co.; Commonwealth Edison Co.; Consolidated Edison of N.Y.; Detroit Edison Co.; Dominion Resources, Inc.; Duke Power Co.; East River Electric Power Co.; Centerior Energy Co.; Consolidated Edison of Southern California Edison Co.; Southern Company; and Texas Utilities Co. The four utility stocks that are not options-eligible are: Union Electric Co.; Pacificorp; Ohio Edison Co.; and Northeast Utilities.

15 According to figures supplied by the Phlx, the correlation coefficients for the Utility Index as compared with the Dow Jones Utility Average (15 stocks) and the Standard & Poor's Electric Average (21 stocks) are greater than 65% over terms ranging from 150 days to 10 years. See letter from William W. Uchimoto, Acting General Counsel, Phlx, to David Underhill, Attorney, Division of Market Regulation, SEC, dated August 6, 1987. 

16 Unlike the regulations under the Commodity Exchange Act, the federal securities laws do not contain an explicit "economic purpose" test for new options products. Nevertheless, to approve a new options proposal the Commission must be satisfied that its introduction is in the public interest. See section 6(b)(5) of the Act, 15 U.S.C. 78f(b)(5) (1982). Such a finding would be difficult to make with respect to an options product that is not hedging or other economic function, because any benefits that might be derived by market participants would likely be outweighed by the potential for manipulation, diminished public confidence in the integrity of the markets, and other valid regulatory concerns. While it is unclear whether an index product based on 20

transfer and processing of customers' security accounts. The Commission published notice of the proposal in the Federal Register on July 17, 1987, to solicit public comment.1 No public comment was received. This order approves the proposal.

I. Description

The proposal would authorize SCCP to establish procedures for the automated transfer and processing of customer securities accounts on behalf of SCCP participants.2 The procedures would include the establishment of time periods and regulations for the automated transfer of a participant's customers' securities accounts, including transfer initiation forms, instructions, reports to participants, and any information required by SCCP to transfer a securities account from one clearing agency participant to another participant. Further, SCCP would be authorized to adopt procedures concerning acceptances or rejections of customers' account transfer and the transfer of items in customer accounts through its Continuous Net Settlement ("CNS") System or Trade-by-Trade System.3 SCCP further states that it currently is drafting rules of implementation for this enabling proposal.4

The proposal provides that SCCP would not be liable for the completeness or accuracy of the information contained in a participant's request to transfer a customer's securities account through the facilities of SCCP or otherwise, for the completeness or accuracy of any document necessary for a participant to transfer a customer's securities account; or for the validity of information regarding any particular asset contained in a customer securities accounts. SCCP states that its sole responsibility would be to make any transfer initiation documentation or information forms available to the delivering participant who is to transfer the account or to return such forms to the receiving participant to whom the account is to be transferred.5

II. SCCP's Rationale

The purpose of the proposal is to allow transfers of customer securities accounts among SCCP participants, and between a SCCP participant and a participant of another registered clearing agency that has established an automated account transfer service. SCCP states that the proposal would provide the necessary enabling authority for SCCP to establish procedures for an automated account transfer service, including applicable forms, reports, instructions, or other necessary information and data. SCCP also states that the proposal is consistent with the Act, particularly section 17A of the Act, because it would facilitate the prompt and accurate clearance and settlement of securities transactions, including customer account transfers.

III. Discussion

The Commission believes that SCCP's proposal is consistent with the Act. The Commission finds that the proposal would promote the timely and accurate transfer of customer's securities accounts in accordance with section 17A of the Act and, more particularly, that the use of automated procedures for transferring accounts would enhance efficiency and reduce expenses in account transfer processing. The proposal also should help to reduce, for depositary-eligible securities, the manually intensive handling of security certificates and related paperwork between broker-dealers.

The Commission notes that ACATS is already in effect at NSCC and at Midwest Clearing Corporation. Additionally some securities exchanges, including the New York Stock Exchange and the Midwest Stock Exchange, require their member organizations dealing with the public to use ACATS for customer account transfers.

The Commission also notes that SCCP's proposal includes declarations of responsibility for, among other things, the accuracy or completeness of instructions for customer account transfers. The Commission believes those declarations are appropriate because SCCP generally would not be in position to monitor those documents for completeness or accuracy. Under the proposal, SCCP would act simply as intermediary in relaying account transfer information to NSCC (as its facilities manager for ACATS) and among participants. The proposal does not alter SCCP's higher standard of care applicable to the safeguarding of securities and funds. Accordingly, the Commission believes that SCCP's standard of care under the proposal is consistent with the Act.10

The Commission recognizes that the proposal authorizes SCCP to establish procedures for the ACATS services and that it provides a framework for that service in SCCP's rules. Accordingly, SCCP must file its procedures for review under the Act before initiating any customer's account transfer on behalf of SCCP participants.

IV. Conclusion

For the reasons discussed above, the Commission finds that the proposal is consistent with the requirements of the Act and, in particular, with section 17A of the Act, and the rules and regulations thereunder.

It is therefore ordered, pursuant to section 19(b)[2] of the Act, that the above-mentioned proposed rule change (File No. SR–SCCP–07–02) be, and hereby is, approved.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

Jonathan G. Katz,
Secretary.

[FR Doc. 87–21314 Filed 9–15–87; 8:45 am]

BILLING CODE 8010–01–M

3 SCCP states in its filing the NSCC has agreed to serve as the facilities manager for the proposal.

4 SCCP would provide services primarily to Philadelphia Stock Exchange ("PHLX") members and SCCP participants that are not members of the National Securities Clearing Corporation ("NSCC").

5 SCCP states that SCCP's responsibility for, among other things, the accuracy or completeness of information forms available to the delivering participant who is to transfer the account or to return such forms to the receiving participant to whom the account is to be transferred.

6 The proposal would not affect SCCP's liability for establishing CNS positions which are governed by SCCP's existing rules. Telephone conversation between William W. Uchimoto, Acting General Counsel, SCCP, and Thomas C. Etter, Attorney, Securities and Exchange Commission, August 24, 1987. Additionally, PHLX plans to adopt a rule requiring its member organizations dealing with the public to use ACATS. Telephone conversations between William W. Uchimoto, Acting General Counsel, SCCP, and Thomas C. Etter, Attorney, Securities and Exchange Commission, September 9, 1987.

10 The proposal provides for establishing CNS positions which are governed by SCCP's existing rules. Telephone conversation between William W. Uchimoto, Acting General Counsel, SCCP, and Thomas C. Etter, Attorney, Securities and Exchange Commission, August 24, 1987.

Summary of Application:

Relevant 1940 Act Sections:

Officer, SEC, 450 5th

1. Applicant is the holding company of

2. At December 31, 1986, Applicant

3. The French government which

4. Applicant and its banking

5. Applicant has a substantial banking

6. In addition, Applicant is subject to federal reporting requirements under the Bank Holding Company Act of 1956, and the United States branches, offices and agencies of the Subsidiary are subject to reporting and examination requirements under the International Banking Act of 1978, which are similar to those imposed on domestic banks that are members of the Federal Reserve System.

7. Applicant wishes to be able to have access to the United States capital markets through private placements or public offerings of its debt, and its equity securities, either directly or in the form of American Depositary Shares, evidenced by American Depositary Receipts. With respect to public offerings of its debt and equity securities, and Applicant would register such securities under the Securities Act of 1933 (the "1933 Act") and would become subject to and would comply with the reporting requirements applicable to foreign issuers under the Securities Exchange Act of 1934.

8. Applicant would ensure that any future placement, including the private placement to be made in connection with the privatization described above, of its debt or equity securities in the United States under circumstances not requiring registration under the 1933 Act would meet the prevailing standards for exemption from registration. Applicant would not effect any such private placement without obtaining an opinion of Under States counsel that the placement would be exempt from the registration requirements of the 1933 Act.

Applicant's Legal Analysis

1. The requested order is necessary or appropriate in the public interest. By
providing the Applicant with the opportunity to have greater access to the United States capital markets, approval of the application would advance the policies underlying the International Banking Act of 1978, which include placing United States banks and foreign banks on a basis of competitive equality in their United States transactions. Approval would also make a foreign issuer’s debt or equity securities available to the general investing public, as well as to institutional and sophisticated investors, subject to the protections of the United States securities laws.

2. The requested order is consistent with the protection of investors. Applicant is subject to a comprehensive scheme of regulation both in France and the United States. Imposition of a second scheme of regulation would impose superfluous inhibitions and expense without contributing to the protection of investors. The requested order is consistent with the purposes of the 1940 Act because regulation of institutions similar to the Applicant was not within the intent of the 1940 Act.

Applicant’s Conditions

Applicant agrees to the following undertakings:

1. In connection with the private placements and registered offerings of Applicant’s debt and equity securities, the disclosure contained in the prospectus or private placement memorandum would be at least as comprehensive as that customarily provided with respect to foreign issuers making those type of offerings in the United States. Any prospectus or memorandum relating to an offering would contain a description of Applicant. It would also contain the Applicant’s most recently published financial statements audited by a firm of independent public accountants of recognized international standing and would disclose any material differences between the accounting principles applied in the preparation of such financial statements and United States generally accepted accounting principles applicable to United States banks. Such financial statements would be updated to reflect material changes in the financial condition of Applicant.

2. Applicant agrees that all issues of its debt securities in the United States shall have received prior to issuance one of the three highest investment grades from at least one nationally recognized statistical rating organization and that Applicant’s United States counsel shall have certified that such rating has been received, provided, however, that no such rating need to obtained with respect to any such issue if, in the opinion of Applicant’s United States counsel, an exemption from registration is available under Section 4 of the 1933 Act.

3. Applicant undertakes that in the event of an offering in the United States of debt securities denominated in a currency other than United States dollars, Applicant will set forth in the prospectus or memorandum relating to such offering (i) the rate of exchange between the currency in which the securities are denominated and United States dollars as of a recent date and (ii) appropriate disclosure of the risks to investors regarding the potential for exchange rate fluctuations.

4. Applicant undertakes to submit expressly to the jurisdiction of the federal and New York courts in the City of New York for the purpose of any suit, action or proceeding arising out of any offering conducted in reliance upon the order of the SEC requested hereby or in connection with the debt or equity securities distributed thereby. Applicant further undertakes that in connection with any such offering of debt or equity securities it would appoint an agency in the City of New York to accept service of process. Such submission to jurisdiction and appointment of an agent for service of process would be irrevocable for as long as any of the Applicant’s debt or equity securities issued in reliance upon the order of the SEC requested hereby remained outstanding in the United States. Such submission of jurisdiction and appointment of agency for service of process would not affect the right of any holder of such debt or equity securities to bring suit in any court having jurisdiction over the Applicant by virtue of the offer and sale of the securities or otherwise. The agent for service of process would not be a trustee for the holders of securities or have any responsibilities or duties to act for such holders.

5. Applicant has a substantial banking presence in the United States through the New York and Chicago branches of the Subsidiary, and the Subsidiary’s offices and agencies in other states. Applicant represents that it has no present intention to curtail its banking operations in France so as to cease to be subject to banking regulation in France.

For the SEC, by the Division of Investment Management, pursuant to delegated authority.

Jonathan G. Katz,
Secretary.

BILLING CODE 8010–01–M

[Release No. IC–15969; File No. 812–6758]   

Application; Valley Opportunities Incorporated

AGENCY: Securities and Exchange Commission (“SEC”).

ACTION: Notice of application for an order under the Investment Company Act of 1940 (the “1940 Act”).

Applicant: Valley Opportunities Incorporated (“Applicant”).

Relevant 1940 Act Sections: Order requested under section 3(b)(2), or, alternatively, under section 6(c) exempting the Applicant from all provisions of the 1940 Act.

Summary of Application: Applicant seeks an order declaring it to be primarily engaged in a business other than that of investing, reinvesting, owning, holding or trading in securities investment company or, alternatively, granting it an exemption from all provisions of the 1940 Act and the rules and regulations thereunder.

Filing Date: The Application was filed on June 12, 1986, and amended on September 3, 1987.

Hearing or Notification of Hearing: If no hearing is ordered, the Application will be granted. Any interested person may request a hearing on this Application, or ask to be notified if a hearing is ordered. Any request must be
received by the SEC by 5:30 p.m., on October 2, 1987. Request a hearing in writing, giving the nature of your request, the reason for the request, and the issues you contest. Serve the Applicant with the request, either personally or by mail, and also send the request to the Secretary of the SEC, along with proof of service by affidavit, or, for lawyers, by certificate. Request notification of the date of hearing by writing to the Secretary of the SEC.

ADDRESS: Secretary, SEC, 450 Fith Street, NW., Washington, DC 20549.

Valley Opportunities Incorporated, 120 South Front Street, Mankato, Minnesota 55601.

FOR FURTHER INFORMATION CONTACT: Curtis R. Hilliard, Special Counsel (202) 272-3030, of the Division of Investment Management (Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION:
Following is a summary of the Application. The complete Application is available for a fee from either the SEC’s public reference branch in person, or the SEC’s commercial copier (800)–231–3282 (in Maryland, (301)–288–4300).

Applicant’s Representations

1. Applicant is a newly organized development stage company formed to encourage commercial and industrial development in the Mankato-North Mankato area of southern Minnesota.

Applicant’s common stock has initially been distributed in an offering made pursuant to Rule 506 of Regulation D under section 4(2) of the Securities Act of 1933 (the “1933 Act”). Approximately $626,000 was raised from 26 investors in $600,000 from a large group of investors, however, which is likely to raise the total number of Applicant’s security holders to over 100, pursuant to Regulation A or section 3(a)(11) under the Securities Act of 1933, as amended. Because of this, Applicant hereby requests an order pursuant to section 3(b)(2) of the 1940 Act, declaring that Applicant is directly and “primarily engaged in a business or businesses other than that of investing, reinvesting, owning, holding or trading securities”, or pursuant to section 6(c) of the 1940 Act, exempting Applicant from all provisions of the 1940 Act.

2. Applicant has been advised by counsel, and in turn has advised its shareholders to over 100, pursuant to Rule 506 of Regulation D under section 4(2) of the Securities Act of 1933 (the “1933 Act”). Approximately $626,000 was raised from 26 investors in this offering, all of which are businesses located in the Mankato-North Mankato area. All of the investors represented in their subscription documents that they acquired the shares for purposes of investment and not for resale. The common shares of the Company are also subject to substantial restrictions on transfer, and bear a restrictive legend to that effect. No public active trading market is expected ever to develop for such common shares.

2. Applicant has been advised by counsel, and in turn has advised its investors, that it is not an “investment company” for purposes of the 1940 Act by virtue of the provisions of section 3(c)(1) of the 1940 Act, since Applicant is not making and does not currently propose to make a public offering of its securities and since its outstanding securities are held by less than 100 persons. Applicant now contemplates raising up to an additional $400,000-$600,000 from a large group of investors, however, which is likely to raise the total number of Applicant’s security holders to over 100, pursuant to Regulation A or section 3(a)(11) under the Securities Act of 1933, as amended. Because of this, Applicant hereby requests an order pursuant to section 3(b)(2) of the 1940 Act, declaring that Applicant is directly and “primarily engaged in a business or businesses other than that of investing, reinvesting, owning, holding or trading securities”, or pursuant to section 6(c) of the 1940 Act, exempting Applicant from all provisions of the 1940 Act.

3. Applicant is a newly organized development stage company formed to encourage commercial and industrial development in the Mankato-North Mankato area. Applicant’s activities are focused on attracting new businesses to the area through, for example, advertisements in trade journals, direct mailings, surveys of local businesses, referrals from local chambers of commerce and various state agencies and other suitable activities. Applicant also provides a wide range of services as an accommodation to new businesses in its locale.

Applicant’s Legal Conclusions

1. Applicant concedes that it may fall within the definition of an investment company under section 3(a)(3) of the 1940 Act because the value of its permitted investments most likely will exceed 40% of the value of Applicant’s total assets. Moreover, although Applicant is primarily engaged in the business of promoting commercial and industrial development in a narrowly defined geographic area, it is possible that, due to the requirement that 75% of its stockholders’ equity be invested in the permitted investments, Applicant could be deemed to be primarily engaged in the business of investing in securities, and therefore could fall within the definition of an “investment company” under section 3(a)(1)(1) of the 1940 Act. Applicant contends, however, that the requested order is appropriate in the public interest and consistent with the protection of investors and the purposes and the policies of the 1940 Act.

2. In support of its assertion, Applicant states that its board of directors has adopted a resolution requiring that no more than 40% of its investments may be made in securities which do not meet the definition of “government securities” as set forth in section 2(a)(16) of the 1940 Act. Moreover, Applicant asserts that although it is intended that applicant will be self-sustaining and eventually profitable, all investors have been advised that the primary purpose of applicant is the promotion of commercial and industrial development, and not the maximization of return on its shareholders’ equity investments. Applicants Articles of Incorporation require a vote of two-thirds of the shareholders in order to change the requirement that 75% of its funds be invested in “permitted investments”. This arrangement leaves the day-to-day operations of Applicant to its staff and to the volunteers serving the Applicant’s board of directors, and reserves the decisions with respect to large investments or changes in its capital fund to its shareholders.

3. Applicant asserts that its primary business and the business of its predecessor (Valley Industrial Development Company (“VIDC”), a not-for-profit corporation which carried out development activities in the Mankato-North Mankato prior to Applicant’s formation) has always been and will continue to be the promotion of economic and commercial development, rather than investment in securities. Applicant’s many volunteers have focused almost exclusively on the economic and commercial development aspects of Applicant.

Second, although Applicant’s offering materials warned of the applicability of the 1940 Act, its promoters, in their business plan, and Applicant’s offering materials clearly identified its primary business as that of promoting commercial and economic development. Moreover, the marketing efforts of Applicant’s many volunteers have focused almost exclusively on the economic and commercial development aspects of Applicant.

4. Applicant’s present behavior is consistent with its primary purpose of promoting development, as evidenced by its activities to date, and management’s almost single-minded attention to development activities, as opposed to investment activities. Management of Applicant and VIDC spend no more than 1% of their time in managing the capital fund. An investment committee consisting of four...
bankers from the community makes the
decisions with respect to Applicant's
capital fund. Before any brief meeting of
the committee has been held, to date.
Another meeting of the committee is
scheduled in the next few weeks but in
view of the self-imposed limits on the use
of Applicant's capital fund, the meeting is
anticipated to last only about half an
hour. Applicant currently has
approximately 75% of its capital fund
(approximately $470,000 of the total of
$600,000 approximately) invested in
United States Treasury obligations. The
decision to restrict the capital fund to
such conservative investments was
intended to ensure a high degree of
safety in preserving Applicant's capital
with a minimum of investment
management, as opposed to increasing
the capital fund through aggressive
investment management. Accordingly,
Applicant's investment committee
spends very little time in managing the
capital fund, which distinguishes it from
virtually all investment companies.

5. Although Applicant's sole source of
"income" is the income from its capital
fund, the real source of its income is the
proceeds raised from local businesses
who are investing in the economic and
commercial development of the
community and not in the hope that they
would get a favorable return on their
money. The proceeds from Valley's
operations are not likely to cover
expenses, but in the event that they do,
that will be the only true income from the
operations. And although
Applicant's offering materials clearly
identify the goal of making Applicant a
profitable operation, were it not for the

Applicant's Conditions

If the requested order is granted, the
Applicant agrees to the following
conditions:

1. Applicant will not engage in the
trading of securities for short-term
speculative purposes.

2. Applicant will be subject to all
administrative, procedural and
jurisdictional provisions of the 1940 Act
and sections 9, 17(a)-(e), 31, 36(a) and 37
of the rules promulgated thereunder, as
well as all sections of the 1940 Act and
the rules promulgated thereunder
necessary to implement and enforce the
above sections of the 1940 Act, as if it
were a registered investment company.

3. Regarding any future offerings of its
securities, Applicant will (a) not make
such offerings unless they are only to
promote the industrial and commercial
development in the area consistent with
Applicant's Articles of Incorporation; (b) make
such offerings only to residents of or
businesses having a substantial
presence in the Area; (c) require
purchasers to represent that (i) they are
purchasing for investment and not with
a view to resale, (ii) with respect to any
person purchasing in excess of $10,000
of the securities being offered, the
amount purchased does not exceed 20%
of such purchaser's net worth and (iii)
they have such knowledge and
experience in financial and business
matters that they are capable of
evaluating the merits and risks of the
prospective investment; (d) require
purchasers to enter into a shareholders'
agreement whereby the Issuer and the
Shareholders will have the right to
purchase a selling Shareholder's
securities for the same price initially
paid by such selling shareholder to
Issuer for the Shares to be sold; and (e)
provide disclosure to investors prior to
purchase of the conditions imposed by
this Condition (3) and the restriction on
the payment of dividends imposed by
Condition (4);

4. Dividends will not be paid to
Applicant's shareholders without
Applicant either registering under the
1940 Act or obtaining the prior approval
of the SEC.

5. Applicant will hold regular
meetings of its shareholders for the
purpose of electing directors and
transacting whatever other business
may come before the meeting;

6. Applicant will submit for
shareholder ratification or approval at
each annual shareholders' meeting the
appointment of an independent certified
public accountant engaged by
Applicant;

7. Applicant will make available to
shareholders its annual audited financial
statements; and

8. Applicant will not repurchase any
of its shares for a purchase price greater
than it received upon the original
issuance of such shares.

9. Applicant will continue to invest its
funds with a view toward promoting
industrial and commercial development in
the Mankato-North Mankato area,
and thus the development of a
productive economic climate in the area,
and not to making profits through
investments in securities.

Federal Railroad Administration

Metro North Commuter Railroad

The Metro North Commuter Railroad
has petitioned the Federal Railroad
Administration (FRA) seeking approval
to remove all automatic wayside signals
and install a traffic control system with
the cap signals between milepost 0.7
and milepost 6.1 on the Harlem Line, all
within the City of New York, New York.
These proceedings are identified as FRA
Block Signal Application Nos. 2684 and
2699.

After examining the carrier's proposal
and the available facts, the FRA has
determined that a public hearing is
necessary before a final decision is
made on these proposals.

Accordingly, a public hearing is
hereby set for 10:00 a.m. on December
10, 1987, in Room 305A of the Jacob K.
Javits Federal Building at 26 Federal
Plaza in New York, New York.

The hearing will be an informal one,
and will be conducted in accordance
with Rule 25 of the FRA Rules of
Practice (49 CFR 211.25), by a
representative designated by the FRA.

The hearing will be a nonadversary
proceeding and, therefore, there will be
no cross-examination of persons
presenting statements. The FRA
representative will make an opening
statement outlining the scope of the
hearing. After all initial statements have
been completed, those persons who
wish to make brief rebuttal statements
will be given the opportunity to do so in
the same order in which they made their

35027
initial procedures, if necessary for the conduct of the hearing, will be announced at the hearing.

[BS-Ap-No. 2705]

Southern Pacific Transportation Co.

The Southern Pacific Transportation Company has petitioned the Federal Railroad Administration (FRA) seeking approval to discontinue the automatic block signal system between Lyoth, California, and Fresno, California, a distance of approximately 122 miles. This proceeding is identified as FRA Block Signal Application No. 2705.

After examining the carrier’s proposal and the available facts, the FRA has determined that a public hearing is necessary before a final decision is made on these proposals.

Accordingly, a public hearing is hereby set for 10:00 a.m. on November 10, 1987, in Room 210 of the U.S. Post Office Building at 801 I Street in Sacramento, California.

The hearing will be an informal one, and will be conducted in accordance with Rule 25 of the FRA Rules of Practice (49 CFR 211.25), by a representative designated by the FRA.

The hearing will be a nonadversary proceeding and, therefore, there will be no cross-examination of persons presenting statements. The FRA representative will make an opening statement outlining the scope of the hearing. After all initial statements have been completed, those persons who wish to make brief rebuttal statements will be given the opportunity to do so in the same order in which they made their initial statements. Additional procedures, if necessary for the conduct of the hearing, will be announced at the hearing.

Issued in Washington, DC, on September 10, 1987.
J. W. Walsh.
Associate Administrator for Safety.

UNITED STATES INFORMATION AGENCY

A Grants Program for Private Not-for-Profit Organizations in Support of International Educational and Cultural Activities

The United States Information Agency (USIA) announces a program of selective assistance and limited grant support to non-profit activities of United States institutions and organizations in the Private Sector. The program is designed to increase mutual understanding between the people of the U.S. and other countries and to strengthen the ties which unite our societies. The information collection involved in this solicitation is covered by OMB Clearance Number 3110-0175, entitled “A Grants Program for Private, Non-Profit Organizations in Support of International Educational and Cultural Activities,” announced in the Federal Register June 3, 1987.

Private sector organizations interested in working cooperatively with USIA on the following concept are encouraged to so indicate:

The American Judiciary Branch: A Study Tour for Turkish Justice Officials: The Office of Private Sector Programs will assist in supporting a two-week study tour to expose Turkish justice officials to the judiciary Branch of the U.S. Government. This program will focus on the constitutional origin of the judicial systems in both societies as well as American legal processes and the administration of justice in our democracy. The program will include travel to Washington, DC, and at least one state capital. Participants will include representatives of Turkey’s judicial/legal system.

USIA is most interested in working with organizations that show promise for innovative and cost-effective programming; and with organizations that have potential for obtaining private-sector funding in addition to USIA support. Organizations must have the substantive expertise and logistical capability needed to successfully develop and conduct the above project and should also demonstrate a potential for designing programs which will have a lasting impact on their participants.

Interested organizations should submit a request for complete application materials—postmarked no later than fifteen days from the date of this notice—to the address listed below. The Office of Private Sector Programs will then forward a set of materials which contains proposal guidelines. Office of Private Sector Programs will also forward a set of materials which contains proposal guidelines. The Office of Private Sector Programs will also forward a set of materials which contains proposal guidelines. The Office of Private Sector Programs will also forward a set of materials which contains proposal guidelines.

Robert Francis Smith, Director, Office of Private Sector Programs.

These meetings will be for the purpose of evaluating the scientific merit of research conducted in each specialty by Veterans’ Administration investigators working in Veterans Administration Medical Centers and clinics.

The meetings will be open to the public up to the seating capacity of the rooms at the start of each meeting to discuss the general status of the program. All of the Merit Review Board meetings will be closed to the public after approximately one-half hour from the start, for the review, discussion and evaluation of initial, and renewal research projects.

The closed portion of the meeting involves: discussion, examination, reference to, and oral review of site visits, staff and consultant critiques of research protocols, and similar documents. During this portion of the meeting, discussion and recommendations will deal with qualifications of personnel conducting the studies, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy, as well as research information, the premature disclosure of which would be likely to significantly frustrate implementation of proposed agency action regarding such research projects. As provided by subsection 10(d) of Pub. L. 92-463, as amended by Pub. L. 94-409, closing portions of these meetings is in accordance with 5 U.S.C. 552(c) (6) and (9)(B). Because of the limited seating capacity of the rooms, those who plan to attend should contact Dr. Arlene E. Mitchell, Chief, Program Review Division, Medical Research Service, Veterans Administration, Washington, DC (202) 233-5065 at least five days prior to each meeting. Minutes of the meetings and rosters of the members of the Boards may be obtained from this source.

By direction of the Administrator.
Rosa Maria Fontanez,
Committee Management Officer.

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

FEDERAL COMMUNICATIONS COMMISSION

FCC To Hold Open Commission Meeting, Thursday, September 17, 1987

The Federal Communications Commission will hold an Open Meeting on the subjects listed below on Thursday, September 17, 1987, which is scheduled to commence at 9:30 a.m., in Room 255, at 1919 M Street, NW, Washington, DC.

Agenda, Item No., and Subject

General—1—Title: Revision on Part 15 of the rules regarding the operation of radio frequency devices without an individual license. Summary: The FCC will consider the adoption of a Notice of Proposed Rule Making which addresses a number of changes in the technical and administrative provisions for operation of a non-licensed radio frequency device.

General—2—Title: Amendment of Parts 2 and 22 of the Commission’s Rules relative to Cellular Communications Systems (Gen. Docket No. 84-1231); Amendment of Parts 2, 15 and 90 of the Commission’s Rules and Regulations to Allocate Frequencies in the 500 MHz Reserve Band for private Land Mobile Use (Gen. Docket 84-1233); Amendment of Parts 2, 22 and 25 of the Commission’s Rules to Allocate Spectrum for, and to Establish other rules and policies pertaining to the use of radio frequencies in a Land Mobile Satellite Service for the provision of Various Common Carrier Services (Gen. Docket No. 84-1234). Summary: The Commission will consider a second Memorandum Opinion and Order addressing eight petitions for reconsideration of frequency allocations made in the Report and Order in the above proceedings.

General—3—Title: Amendment of Part 1 of the Commission’s Rules and Regulations concerning Ex Parte Communications and Presentations in Commission Proceedings. Summary: The Commission will consider whether any aspects of its new ex parte rules should be reconsidered.

Common Carrier—1—Title: Report and Order in CC Docket No. 86-309, Inquiry into Policies to be Followed in the Authorization of Common Carrier Facilities to Provide Telecommunications Service off of the Island of Puerto Rico. Summary: The Commission will consider adoption of Policies concerning the authorization of common carrier facilities to provide service off of Puerto Rico.

Common Carrier—2—Title: Order on Reconsideration, CC Docket 86-111, Separation of Costs of regulated telephone service from costs of nonregulated activities. Summary: The Commission will consider petitions for reconsideration of various aspects of its Joint Cost Order.

Mass Media—1—Title: Amendment of Parts 1, 63, and 76 of the Commission’s Rules to Implement the provisions of the Cable Communications Policy Act of 1984 (MM Docket No. 84-1296). Summary: The Commission will consider a Memorandum Opinion and Order addressing certain amendments to its rules implementing provisions of the Cable Communications Policy Act of 1984.

This meeting may be continued the following work day to allow the Commission to complete appropriate action.

Additional information concerning this meeting may be obtained from Sarah Lawrence, Office of Congressional and Public Affairs, telephone number (202) 632-5050.

Federal Communications Commission.

William J. Tricarico,
Secretary.

BILLING CODE 6712-01-M
SECURITIES AND EXCHANGE COMMISSION

Agency Meetings

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Pub. L. 94-409, that the Securities and Exchange Commission will hold the following meetings during the week of September 14, 1987:

A closed meeting will be held on Tuesday, September 15, 1987, at 2:30 p.m. An open meeting will be held on Wednesday, September 16, 1987, at 10:00 a.m., in Room 1C30.

The Commissioners, Counsel to the Commissioners, the Secretary of the Commission, and recording secretaries will attend the closed meeting. Certain staff members who are responsible for the calendared matters may also be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, one or more of the exemptions set forth in 5 U.S.C. 552b(c) [4], [8], [9][A] and [10] and 17 CFR 200.402(a) [4], [8], [9][i] and [10], permit consideration of the scheduled matters at a closed meeting.

Commissioner Cox, as duty officer, voted to consider the items listed for the closed meeting in closed session.

The subject matter of the closed meeting scheduled for Tuesday, September 15, 1987, at 2:30 p.m., will be:

1. Consideration of whether to issue a release publishing for public comment proposed Rules 13e-2 and 14d-11 which would prohibit, subject to certain exceptions, purchases, offers to purchase, arrangements or understandings to purchase or solicitation of offers to sell which would result in any person increasing his ownership by ten percent or more of a class of securities once a tender offer has formally commenced for such class of securities and until 10 business days after the scheduled expiration date of the tender offer, unless such actions are conducted pursuant to the tender offer rules. The restriction would apply to the target company, bidders and third parties. The proposed Rules would subject bidders to similar requirements, and exceptions thereto, from the time a bidder commences a tender offer by means of public announcement until either it formally commences by other means or 30 business days have expired since the bidder has withdrawn such public announcement. For further information, please contact David A. Sirignano at (202) 272-3097 or Jonathan E. Gottlieb at (202) 272-2607.

2. Consideration of whether to propose changes in Forms 10-K and 10-Q that would require registrants, after reasonable inquiry, to provide information not filed in Form 3 and 4 reports required during the reporting period and identify any of their directors, officers, or ten percent security holders that have failed to file all of their Form 3 and 4 reports required during the reporting period in a timely manner. Copies of the Form 3 and 4 would be required to be sent to the registrant to aid its monitoring of such filings.

In addition, the Commission will consider proposing to condition the safe harbor of Rule 144 upon the seller having filed all required Forms 3 and 4 in a timely manner during the 12 months preceding filing of Form 144 and any sales pursuant to the Rule. Form 144 would be amended to include a positive representation concerning the seller’s compliance with Section 16(a) of the Securities Exchange Act of 1934. For further information, please contact Brian Lane at (202) 272.2568.

3. Consideration of whether to adopt Rule 206(4)-4 under the Investment Adviser’s Act of 1940 which would codify an investment adviser’s fiduciary obligation to disclose material financial and disciplinary information to clients. For further information, please contact Debra J. Kertzman at (202) 272-2107.

At times changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: Nancy Morris at (202) 272-3085.

Jonathan G. Katz,
Secretary.

PLACE: Room 1C30, 1703 H Street NW., Washington, DC 20549.

STATUS: Open to the Public.

MATTERS TO BE CONSIDERED

1. Agenda
2. Minutes
3. Ratifications
4. Petitions and Complaints
5. Inv. 731-TA-343 (Final) (Tapered Roller Bearings and Parts Thereof from Japan)—briefing and vote.
6. Inv. 731-TA-363 (Preliminary) (Certain Bimetallic Cylinders from Japan)—briefing and vote.
7. Inv. 701-TA-224 (Final) (Remand) (Live Swine and Pork from Canada)—briefing and vote.
8. Any items left over from previous agenda.

CONTRACT PERSON FOR MORE INFORMATION: Kenneth R. Mason, Secretary, (202) 523-0161.

Kenneth R. Mason,
Secretary.

[FR Doc. 87-21378 Filed 9-11-87; 4:37 pm]

BILLING CODE 7020-02-M

INTERNATIONAL TRADE COMMISSION

PREVIOUSLY ANNOUNCED TIME AND DATE OF THE MEETING: 10:00 a.m., Wednesday, September 9, 1987.

Change in time for the meeting: 9:30 a.m., Wednesday, September 9, 1987.

In conformity with 19 CFR 201.37(b), Commissioners Leibeler, Burnsdale, Eckes, and Rohr determined that Commission business required the change in time of the meeting on September 9, 1987, and affirmed that no earlier announcement of the change in time was possible, and directed the issuance of this notice at the earliest practicable time. Commissioner Lodwick disapproved.

CONTACT PERSON FOR MORE INFORMATION: Kenneth R. Mason, Secretary, (202) 523-0161.

Kenneth R. Mason,
Secretary.

Part II

Department of the Interior

Fish and Wildlife Service

50 CFR Part 17
Endangered and Threatened Wildlife and Plants; Determination of Lepidomeda vittata (Little Colorado Spinedace) To Be a Threatened Species With Critical Habitat; Final Rule
The Little Colorado spinedace, \textit{Lepidomeda vittata}, was first collected west of the 100th meridian by members of the U.S. Topographical and Geographical Survey (Wheeler 1889). The species was described by E.D. Cope in 1874 from that collection. Cope listed the type locality as the “Chiquito Colorado,” which was later defined as “the Little Colorado River somewhere between the mouth of the Zuni River and Sierra Blanca (White Mountain)” (Miller and Hubbs 1960). This fish is a member of the family Cyprinidae and is generally less than 10 centimeters (4 inches) in total length. The species is endemic to the upper portions of the Little Colorado River and to its north flowing, permanent tributaries on the Mogollon Rim and the northern slopes of the White Mountains in eastern Arizona. This naturally restricted historic range has been significantly reduced in the past 50 years by habitat destruction, use of fish toxicants, and the introduction of exotic predatory and competitive fish species.

There are many reasons for these fluctuations, and historically they have probably reflected cyclic periods of drought and/or increased rainfall. However, in more recent history the impact of human activities on habitat alteration and loss due to impoundment, removal of water from the streams, channelization, grazing, road building, urban growth, and other human activities. The decline is also related to the introduction and spread of exotic predatory and competitive fish species, and the use of ichthyotoxicants in many of its native streams. In addition, several water development projects have been or are being proposed for the remaining habitat of the species. Remaining Little Colorado spinedace habitat is found on U.S. Forest Service, Bureau of Land Management, State of Arizona, and privately-owned lands. This rule will implement Federal protection provided by the Act for \textit{Lepidomeda vittata}.

The species was described by E.D. Cope in 1874 from that collection. Cope listed the type locality as the “Chiquito Colorado,” which was later defined as “the Little Colorado River somewhere between the mouth of the Zuni River and Sierra Blanca (White Mountain)” (Miller and Hubbs 1960). This fish is a member of the family Cyprinidae and is generally less than 10 centimeters (4 inches) in total length. The species is endemic to the upper portions of the Little Colorado River and to its north flowing, permanent tributaries on the Mogollon Rim and the northern slopes of the White Mountains in eastern Arizona. This naturally restricted historic range has been significantly reduced in the past 50 years by habitat destruction, use of fish toxicants, and the introduction of exotic predatory and competitive fish species.

Populations of the Little Colorado spinedace, like those of many other desert fishes, fluctuate dramatically from year to year. There are many reasons for these fluctuations, and historically they have probably reflected cyclic periods of drought and/or increased rainfall. However, in more recent history the impact of human activities on habitat alteration and loss due to impoundment, removal of water from the streams, channelization, grazing, road building, urban growth, and other human activities. The decline is also related to the introduction and spread of exotic predatory and competitive fish species, and the use of ichthyotoxicants in many of its native streams. In addition, several water development projects have been or are being proposed for the remaining habitat of the species. Remaining Little Colorado spinedace habitat is found on U.S. Forest Service, Bureau of Land Management, State of Arizona, and privately-owned lands. This rule will implement Federal protection provided by the Act for \textit{Lepidomeda vittata}.

The complete file for this rule is available for public inspection during normal business hours, by appointment, at the U.S. Fish and Wildlife Service Regional Office, 500 Gold Avenue SW, Room 4000 (P.O. Box 1306) Albuquerque, New Mexico 87103.

FOR FURTHER INFORMATION CONTACT: Mr. Gerald Burton, Endangered Species Biologist, Endangered Species Office, U.S. Fish and Wildlife Service, Region 2 (see ADDRESSES above) 505/766-3972 or FTS 474-3972.
The Little Colorado spinedace inhabits very small to moderate sized streams and is characteristically found in pools with water flowing over fine gravel and silt-mud substrates. During periods of drought spinedace are believed to persist in springs and intermittent submersed pools; and during flooding they tend to distribute themselves throughout the stream. The spinedace spawns primarily in early summer, but continues at a reduced level until early fall (Minckley 1973). The Colorado spinedace was included in the Service’s “Review of Vertebrate Wildlife for Listing as Endangered or Threatened Species” published in the Federal Register on December 30, 1982 (47 FR 59454–60). It was considered a category 1 species, indicating that the Service had substantial biological information to support a proposal to list as endangered or threatened. On April 12, 1983, the Service received a petition from the Desert Fishes Council to list the Little Colorado spinedace. This petition was found to contain substantial scientific or commercial information, and a notice of finding was published on June 14, 1983 (48 FR 27273). After a review and evaluation of the petition’s merits, the Service found that the petitioned action is warranted, and a notice of the finding that the species warranted listing was published in the Federal Register on July 13, 1984 (49 FR 28583). A proposed rule to list Lepidomeda vittata was published on May 22, 1985 (50 FR 21095). Lepidomeda vittata is listed by the State of Arizona as a threatened species, Group 3 (Arizona Game and Fish Commission 1982), which are those species “... whose continued presence in Arizona could be in jeopardy in the foreseeable future.”

Summary of Comments and Recommendations

In the May 22, 1985, proposed rule (50 FR 21095) and associated notifications, all interested parties were requested to submit factual reports or information that might contribute to the development of a final rule. Appropriate State agencies, county governments, Federal agencies, scientific organizations, and other interested parties were contacted and requested to comment. A newspaper notice was published in the White Mountain Independent, Show Low, Arizona, on June 18, 1985, that invited general public comment. Fifteen letters of comment were received. No public hearing was requested or held. Comments in opposition to the listing were received from Phelps Dodge Corporation. Both the U.S. Forest Service and the Arizona Department of Transportation support the listing but oppose the critical habitat designation.

The Arizona State Claghouse had no comments on the proposal. Letters in support of the listing and designation of critical habitat were received from The Nature Conservancy, Arizona Game and Fish Department, the Desert Fishes Council, Dr. R.R. Miller, and Mr. C.O. Minckley. Economic Data were provided by the U.S. Bureau of Reclamation, Federal Highways Administration, Environmental Protection Agency, Arizona Game and Fish Department, U.S. Forest Service, and Arizona Department of Transportation.

The Nature Conservancy supported both the listing and designation of critical habitat and recommended that the watersheds for the stream segments identified as critical habitat be included in that designation. The Service feels that the inclusion of the entire watershed in a critical habitat designation for this fish is not justified biologically. The designation of critical habitat is used for those areas that are crucial to the continued survival of a species and normally includes areas occupied either permanently or temporarily by the species. Although the Service has authority, under section 3(5)(A)(ii) of the Act, to designate as critical habitat areas that are not occupied by the species, the best available scientific data do not substantiate the entire watershed as critical to the survival of the spinedace. However, the Service recognizes the importance of the watersheds in maintaining quality habitat for the spinedace, and the Service believes that any Federal activities in the watersheds that would adversely affect the critical habitat, as designated in the rivers, would be subject to section 7 of the Endangered Species Act. If it should later appear that buffer zones in the watershed are essential to the conservation of the species and, therefore, should be designated as critical habitat, then the Service will propose appropriate revisions to the critical habitat.

Phelps Dodge Corporation expressed opposition to the proposed rule for the following reasons: (1) It would jeopardize the water supply to its Morenci operations; (2) it may prevent any significant future developments or modifications of the few streams that exist in Arizona and on some in New Mexico; and (3) it should have been preceded by an Environmental Impact Statement and a Regulatory Impact Analysis. The Service response is as follows: (1) Existing operations are subject to the requirements of section 7(a)(2) of the Act if Federal agency involvement continues with respect to the project. Ongoing projects subject to the continuing exercise of Federal discretion must comply with section 7(a)(2) at all stages of project planning and implementation. As noted in Anson v. Hill, 437 U.S. 153 (1978), “it is clear Congress foresaw that section 7 would, on occasion, require agencies to alter ongoing projects in order to fulfill the goals of the Act.” 437 U.S. at 186 (footnote omitted). Critical habitat designation is not expected to affect existing operations; however, if Federal involvement is required for these operations to continue they would be subject to the requirements of section 7(a)(2) of the Act. (2) Presently, approximately 44 miles of stream in Arizona, which represent a very small percentage of the States' entire surface drainage, are being proposed for critical habitat designation. Critical habitat designation does not prevent all development or modification but prohibits Federal actions that are likely to result in the destruction or adverse modification of critical habitat. Thus, any activity funded, authorized or conducted by the Federal government must be planned to avoid the destruction or adverse modification of critical habitat. (3) On October 25, 1983, on the basis of recommendations from the Council on Environmental Quality and on a decision by the Sixth Circuit Court of Appeals, the Service published a notice in the Federal Register (48 FR 49244; October 25, 1983) stating that Environmental Assessments would no longer be prepared for regulations adopted pursuant to section 4(a) of the Endangered Species Act, this has been the Service's past experience that most National Environmental Policy Act (NEPA) environmental assessments were prepared for section 4(a) actions, all resulted in a finding of no significant impact. Statutory deadlines for listing a species and declaring its critical habitat, as well as the statutory limits on the Service's discretion, make preparation of an Environmental Impact Statement (EIS) both impractical and unnecessary. Preparation of an EIS would not be consistent with the purposes and policies of either the Act or NEPA, which basically center on environmental protection. The Service prepares both a determination of effects and an economic analysis document on each critical habitat rule in compliance with Executive Order 12291 and section 4(b)(2) of the Act, respectively. These documents include an analysis of the best information available on economic or other impacts posed by the designation of critical habitat and an
analysis of any alternative critical habitat boundaries. When added to the administrative record generated through the public comment period of a proposed rule, this economic analysis should provide, at the very least, the functional equivalent of NEPA documentation, which would satisfy the information-gathering, analytical, and environmental protection goals of the Act. In further response to this comment, the Service notes that Regulatory Impact Analyses (RIA) are only required for "major rules" as defined by Executive Order 12291. Because the Department's Determination of Effects for this rule indicates that, after an analysis of impacts, the critical habitat rule is not major, no RIA is required.

The Arizona Game and Fish Department supported both the listing and the designation of critical habitat. The Department did, however, question the impact that stocking of rainbow trout into portions of the Little Colorado River, including extant spinedace habitat, could have upon the species. The Department further pointed out that it has not been demonstrated that rainbow trout prey extensively on spinedace. Arizona also requested that future use of piscicides not be ruled out in these waters. The Service responds that stocking of "put and take" size rainbow trout into habitats occupied by spinedace does not have a direct impact on the species since rainbow trout of that size are primarily insectivorous and most are caught by anglers soon after being stocked. Competition for food and space may occur briefly, but principally during the times that spinedace metabolism is low. A far greater threat to the spinedace comes from the brown trout, which is not only piscivorous, but is also capable of successfully reproducing and establishing itself in these streams. Future use of piscicides in streams supporting Little Colorado spinedace would be evaluated and if long-term benefits accrued to the spinedace which outweighed short-term impacts, use of piscicides would be considered. If an action of this type were to be conducted on Federal lands, or was to be done by the State using Federal funds, section 7 consultation would be required.

The U.S. Forest Service supported the listing of the spinedace, but questioned the need for designating critical habitat for the species. The Fish and Wildlife Service responds that the designation of critical habitat for a listed species places a special emphasis upon those areas and notifies Federal agencies of their obligation to ensure that no action they authorize, fund, or carry out is likely to result in the destruction or adverse modification of critical habitat. The U.S. Forest Service also questioned the designation of intermittent reaches of stream as critical habitat. The Service responds that critical habitat does not have to be continually occupied by the species but may be used by the species during certain times of the year. Thus, a gravel bar that is dry during fall and winter may be used by spawning fish during spring and summer. In determining what areas are critical habitat, consideration is given to those physical and biological features that are essential to the conservation of a given species and that may require special management considerations or protection. Such requirements include sites for breeding, reproduction and rearing of offspring. Another question raised by the U.S. Forest Service involved the width of critical habitat outward from the stream and why only the stream was proposed as critical habitat. The Service responds that a riparian buffer zone is sometimes included in the critical habitat to indicate the importance of the stream bank ecosystem to the survival of the species and that actions along the stream banks can affect the continued existence of the fish. Because of the steep, canyon-like banks of much of the spinedace habitat, inclusion of riparian zones in the critical habitat was not included. (Also see the Service answer to the Nature Conservancy.) The U.S. Forest Service also questioned why the portion of Nutrioso Creek that flows through its land was singled out as critical habitat when the spinedace is found over a much broader range in the creek. The Service responds that only a small population of spinedace is found outside of the portion of Nutrioso Creek not fronted by U.S. Forest Service land, and that maximum protection for the species can be achieved by designating the U.S. Forest Service portion of the stream as critical habitat. The U.S. Forest Service also felt that time and effort spent gathering economic information for provision to the Service could be better used on other endeavors. The Service responds that the Act and other laws require the Service to prepare various economic and other impact analyses of critical habitat designations. The Service will propose the best available data when conducting these analyses. The Service recognizes and appreciates the time and effort spent by the U.S. Forest Service and other agencies in collecting and preparing this information.

The Arizona Department of Transportation requested that all bridge crossings be excluded from designation of critical habitat. The Service responds that the Secretary may exclude any area from critical habitat if he determines that the benefits of such exclusion outweigh the benefits of specifying such an area as part of the critical habitat, unless he determines, based on the best scientific and commercial data available, that the failure to designate such area as critical habitat will result in the extinction of the species concerned. The Economic Analysis prepared by the Service did not show the economic benefits of exclusion of the bridge crossings, or any other area being considered, to outweigh the benefits of designating the area as critical habitat. Furthermore, use of private, State, or local funds for activities which do not require a Federal permit is not restricted by the critical habitat designation. The Service will assist the Arizona Department of Transportation in developing a workable program which involves both protection of the spinedace and adequate and safe highway facilities for the public.

Mr. C. O. Minckley suggested that golden shiners were only a problem in the upper portion of Chevelon Creek and are far removed from the lower portion which is being designated as critical habitat. The Service has changed the rule to reflect this recommendation. He also suggested that the upper end of the Chevelon Creek critical habitat stop at Bell Cow Canyon. This recommendation was also incorporated into the final rule. Lastly, he suggested the Nutrioso Creek critical habitat be extended upstream to the reach of Nutrioso and the reach of the Little Colorado River from Saint Johns to Lyman Reservoir be included in the critical habitat designation. The Service responds that suggested stream reaches were not included in the original proposal and have not been thoroughly sampled. Future efforts will include sampling the suggested reaches to determine if they contain those constituent elements essential to the conservation of the spinedace and which may require special management considerations or protection. If the suggested reaches fit the criteria of critical habitat, a proposal to revise the critical habitat designation can be published at a later date.

The Federal Highway Administration (FHWA) noted that the map for the Nutrioso Creek portion of critical habitat was in error. Work completed on U.S. 666 in 1982 eliminated two of the three creek crossings below Nelson Reservoir. The Service responds that the map for critical habitat in this final rule had
been changed accordingly. The FHA also noted that a future upgrading project near the town of Nutrioso is planned; this is upstream from the critical habitat and no problems are expected.

Summary of Factors Affecting the Species

After a thorough review and consideration of all information available, the Service has determined that the Little Colorado spinedace should be classified as a threatened species. Procedures found at section 4(a)(1) of the Endangered Species Act (16 U.S.C. 1531 et seq.) and regulations (50 FR Part 424) promulgated to implement the listing provisions of the Act were followed. A species may be determined to be an endangered or threatened species due to one or more of the five factors described in section 4(a)(1). These factors and their application to the Little Colorado spinedace (*Lepidomeda vittata*) are as follows:

A. The present or threatened destruction, modification, or curtailment of its habitat or range. Much of the historic habitat of the Little Colorado spinedace has been adversely modified or destroyed by human activities. One of the most detrimental of these has been the impoundment of the rivers and streams. The spinedace is a stream dwelling fish and is unable to exist in reservoirs. There are now approximately 150 impoundments in the Little Colorado basin, ranging in size from small stock tanks to reservoirs of up to 1,400 surface acres. Except for a few of the small stock tanks located on streams, these reservoirs are uninhabitable by the spinedace. In many areas, these reservoirs have inundated and thus destroyed previously occupied spinedace stream habitat. In addition, these impoundments have often resulted in the total or partial dewatering of long downstream reaches of stream, resulting in the destruction of spinedace habitat. The presence of these reservoirs also adversely affects the continued existence of the spinedace upstream and downstream from the reservoir through predation by, and competition with, exotic fish species.

Human uses including riparian destruction, urban growth, mining, timber and pulpwood harvest, road construction, livestock grazing, and other watershed disturbances have also been detrimental to spinedace habitat. The precise effects of many of these uses on fish populations, particularly spinedace, are difficult to define. However, these uses have resulted in many changes to the streams used by the Little Colorado spinedace such as channelizing, erosion and channel downcutting, and organic pollution, alteration of flow regimes, alteration of stream temperature, and excessive siltation. In the 1890's, the Little Colorado River above Grand Falls was a perennial stream with extensive riparian areas of grasses, cottonwoods, and willows. Extensive swamps and marshy areas existed above the town of Winslow (Miller 1961). The river now has perennial flow only in the uppermost of 10 to 15 percent of its length.

Future threats to the remaining habitat of the Little Colorado spinedace come from the same human uses that have resulted in past habitat alteration and destruction. There are several proposed new water projects for the area, and additional new projects continue to be proposed as water demand increases. Wilkin's Dam, at the confluence of Clear and East Clear Creeks, is a proposed Bureau of Reclamation project, a part of the larger Mogollon Mesa project which would also include a new dam on upper Chevelon Creek. Wilkin's Dam would inundate approximately 8 miles of stream and significantly decrease downstream flows, while contributing significantly to the problem of exotic predatory and competitive fishes in East Clear Creek (see Factors C and E). This project is presently inactive and is not expected to be reactivated in the near future. In 1977, the Arizona Public Service Corporation did test drilling to tap groundwater in the Chevelon Creek drainage. This water was to be used for their Cholla Lake generating facility near Holbrook, Arizona; however, the quality of the water found in the test drilling was too poor for their needs. Additionally, the Arizona Game and Fish Department has identified nine potential sites within existing spinedace range that they are considering for future recreational impoundments. Much of the remaining Little Colorado spinedace habitat is afforded some protection by inaccessibility or by public ownership of the lands. The East Clear Creek population is located on the Coconino and Apache-Sitgreaves National Forests; portions of the Little Colorado River, Silver and Nutrioso Creeks populations are also located on the Apache-Sitgreaves National Forest, and the lower portion of Chevelon Creek flows through a rugged canyon in relatively roadless country. As the human population of the adjacent areas increases, and the demand for water and recreational access increases, those spinedace populations on public or presently inaccessible lands will be subjected to mounting pressures for water projects, road construction, and other development.

B. Overutilization for commercial, recreational, scientific, or educational purposes. There is no evidence that the Little Colorado spinedace is overused for any of these purposes.

C. Disease or predation. Predation by exotic piscivorous fish has been shown to be a contributing factor in the decline of many native southwestern fishes, and has undoubtedly been a major factor in the decline of the Little Colorado spinedace. The spinedace was historically associated with few, if any, fish predators. Of the native fish species of the Little Colorado River, only the roundtail chub (*Gila robusta*) was a potential predator on spinedace. However, in the past 100 years, several exotic predatory fish species have been introduced into Little Colorado spinedace habitats. These species include black bullhead (*Ictalurus melos*), channel catfish (*Ictalurus punctatus*), yellow bullhead (*Ictalurus natalis*), green sunfish (*Lepomis cyanellus*), largemouth bass (*Micropterus salmoides*), and brown trout (*Salmo trutta*). The continuing adverse impact of these predators on the Little Colorado spinedace and the possibility of further introduction and spread of predatory fish is a significant threat to the existence of the spinedace. The construction of reservoirs in or near spinedace habitat exacerbates the threat of exotic fish introductions and the spread of predatory fishes. This occurs because reservoirs are desirable habitat for many predatory game fishes, many of which are purposely introduced for recreational purposes. The introduction of such fish into these reservoirs allows and encourages their spread throughout the range of the Little Colorado spinedace. Additionally, parasites introduced with such exotic fish may adversely affect the spinedace.

D. The inadequacy of existing regulatory mechanisms. The State of Arizona lists this species under Group 3 of the Threatened Wildlife of Arizona. Group 3 includes, "Species or subspecies whose continued presence in Arizona could be in jeopardy in the foreseeable future" (Arizona Game and Fish Commission 1982). Under this designation, taking of the Little Colorado spinedace is regulated and is allowed only under a collecting permit or by licensed angling. However, no protection of the habitat is included in such a designation and no management plan exists for this species.

E. Other natural or manmade factors affecting its continued existence. The
introduction of exotic fishes into the habitat of the Little Colorado spinedace poses a major threat to the spinedace from competitive interactions as well as from predation. In upper Chevelon Creek, golden shiners were present in such large numbers in 1965 that the Arizona Game and Fish Department treated the stream with a piscicide (fish toxicant) in an unsuccessful attempt to eradicate them. This treatment was considered necessary because the golden shiner competes with young game fish, particularly trout (Minckley 1973). Since the Little Colorado spinedace is “troutlike in its behavior and habitat requirements” (Miller 1963), it is quite likely that the golden shiner is also a significant competitor with the Little Colorado spinedace (Minckley and Carufel 1967). The possibility of the further introduction of other competitive species, particularly the red shiner (Notropis lutrensis) into spinedace habitats is an additional threat to the Little Colorado spinedace. The red shiner has been shown to displace the spinedace (Meda fulgida) in portions of the Gila River system (Minckley 1973). These shiners are widespread in Arizona. The red shiner is commonly used for bait, thus increasing the probability of its eventual introduction into Little Colorado spinedace habitat also increases that probability because of the increased use of bait in the fishery which develops in such reservoirs. Other exotic fishes, particularly cyprinids and minnow and Rio Grande killifish, may also be a competitive threat to the Little Colorado spinedace, and it has been found that the spinedace is generally rare or absent where exotic fish other than trout are present.

Another important factor in the decline of the Little Colorado spinedace has been the use of piscicides (fish toxicants) in the streams of the Little Colorado River drainage. Most of the major game fish streams of the drainage have been subjected to poisoning, with such chemicals as rotenone and toxaphene, in generally unsuccessful attempts to rid these streams of “trash” fish such as carp, suckers, chubs, and shiners and thereby improve the streams for game fish (Miller 1963). The Little Colorado River was treated from Lyman Reservoir downstream for approximately 10 miles in 1951, and Chevelon Creek was treated twice in 1965 (Mickley and Carufel 1967), and again several years later. These treatments undoubtedly significantly reduced both the populations and range of the Little Colorado spinedace.

No estimate has been made of Little Colorado spinedace population sizes; however, it is well known that their numbers fluctuate markedly. Because of this, threats to the spinedace must be analyzed as to their impact at the lowest population levels. Habitat alterations which may not significantly affect populations at moderate or high levels may be disastrous at low population levels, and could lead to extirpation of the species.

The Service has carefully assessed the best scientific and commercial information available regarding the past, present, and future threats faced by this species in determining to make this rule final. Based on this evaluation, the preferred action is to list the Little Colorado spinedace as threatened. Threatened status seems appropriate because of the severely reduced range of the species, and because of the many threats to the fish and its remaining habitat. If this species is not listed, it could reasonably be expected to become endangered within the foreseeable future and thus not listing would be a violation of the Act’s intent. Since the species is still extant in several locations and the threats to the species are generally localized, the species is not in danger of extinction at this time and thus endangered status is not appropriate.

Critical Habitat

Critical habitat, as defined by section 3 of the Act means: (i) The specific areas within the geographical area occupied by a species, at the time it is listed in accordance with the Act, on which are found those physical or biological features (I) essential to the conservation of the species and (II) that may require special management considerations or protection, and (ii) specific areas outside the geographical area occupied by a species at the time it is listed, upon a determination that such areas are essential for the conservation of the species.

Section 4(a)(3) of the Act requires that critical habitat be designated to the maximum extent prudent and determinable concurrently with the determination that a species is endangered or threatened. Critical habitat is being designated for the Little Colorado spinedace to include the following:

(1) East Clear Creek, Coconino County, Arizona: approximately 18 miles of stream extending from the confluence with Leonard Canyon upstream to the Blue Ridge reservoir dam, and approximately 13 miles of stream extending from the upper end of Blue Ridge Reservoir upstream to Potato Lake.

(2) Chevelon Creek, Navajo County, Arizona: approximately 8 miles of stream extending upstream from the confluence with the Little Colorado River to the confluence of Bell Cow Canyon.

(3) Nutrioso Creek, Apache County, Arizona: approximately 5 miles of stream from the Apache-Sitgreaves National Forest boundary upstream to the Nelson Reservoir dam.

These stream portions were chosen for critical habitat designation because they presently support healthy self-perpetuating populations of the Little Colorado spinedace. They provide all of the ecological, behavioral, and physiological requirements necessary for the survival of the spinedace.

However, due to the extreme fluctuations which Little Colorado spinedace populations exhibit, these areas may not support the most stable and healthy populations of spinedace at any given time in the future. At present, the Silver Creek and Little Colorado River populations are spotty and/or difficult to locate, but this situation may change with periodic population fluctuations. This designation of critical habitat is based on the best available information. If new information demonstrates additional critical habitat areas are necessary for this species, they must be subject to a new Federal Register proposal.

Section 4(b)(8) of the Act requires, for any proposed or final regulation that designates critical habitat, a brief description and evaluation of those activities (public or private) that may adversely modify such habitat or may be affected by such designation. Any activity that would deplete the flow, lessen the amount of minimum flow, or significantly alter the natural flow regime of East Clear, Chevelon, or Nutrioso Creeks could adversely impact the critical habitat. Such activities include, but are not limited to, channelization, impoundment, and water diversion. Any activity that would extensively alter the channel morphology of East Clear, Chevelon, or Nutrioso Creeks could adversely affect the critical habitat. Such activities include, but are not limited to, groundwater pumping, impoundment, and water diversion. Any activity that would extensively alter the water chemistry of East Clear, Chevelon, or Nutrioso Creeks could adversely affect the critical habitat. Such activities include, but are not
limited to, release of chemical or biological pollutants at a point source or by dispersed release.

Section 4(b)(2) of the Act requires the Service to consider economic and other impacts of designating a particular area as critical habitat. The Act has emphasized species. Wilkin's Dam on Clear Creek is a Bureau of Reclamation project and section 7 consultation will be required if that project is ever reactivated (it is currently in inactive status). On Chevelon Creek, the majority of the land is privately-owned, and is used for livestock grazing. Other activities that might be affected by this proposal could include future water development projects if they are federally funded or authorized. At the lower end of Chevelon Creek, there is a small portion of land owned by the Arizona Game and Fish Department, which is the Chevelon Creek Wildlife Area. No effects from this proposal are expected on its management since it is already being managed for wildlife values and upon listing would include the spinedace. On the privately-owned lands on Silver and Nutrioso Creeks, and the Little Colorado River, no effect is expected from this proposal. It is possible that future water development projects on these lands might be affected if such projects have any Federal involvement. On portions of those streams on the Apache-Sitgreaves National Forest no effect is expected.

The Act and implementing regulations found at 50 CFR 17.21 and 17.31 set forth a series of general prohibitions and exceptions that apply to threatened and endangered wildlife. These prohibitions, in part, make it illegal for any person subject to the jurisdiction of the United States to take, import or export, ship in interstate commerce in the course of a commercial activity, or sell or offer for sale in interstate or foreign commerce any listed species. It also is illegal to possess, sell, deliver, carry, transport or ship any such wildlife that has been taken illegally. Certain exceptions apply to agents of the Service and State conservation agencies.

The above discussion generally applies to threatened species of fish or wildlife. However, the Secretary has the discretion, under section 4(d) of the Act, to issue such special regulations as are necessary and advisable for the conservation of a threatened species. The State of Arizona presently regulates direct taking of the Little Colorado spinedace through the requirement of State collecting permits. Since the primary threat to this species stems from habitat disturbance and modification, and not from direct taking of the species or from commercialization, the Service concludes that the State's collecting permit system is more than adequate to protect the species from excessive taking, so long as such takes are limited to: educational purposes, scientific purposes, the enhancement of the propagation or survival of the species, zoological exhibition, and other conservation purposes consistent with the Endangered Species Act. A separate Federal permit system is not required to address the current threats to the species. Therefore, a special rule for the Little Colorado spinedace is proposed that will allow taking to occur for the above stated purposes without the need for a Federal permit, if a State collecting permit is obtained and all other State wildlife conservation laws and regulations are satisfied. In relying upon the State's permitting system, however, and not establishing separate Federal permitting procedures, the Service is issuing a final rule that in effect, precludes any further application of piscicides that would result in the taking of the Little Colorado spinedace, unless it is in accordance with an approved conservation plan for the species. The special rule also acknowledges the fact that incidental take of the species by State-licensed recreational fishermen is not a significant threat to this species. Therefore, such incidental take will not be a violation of the Act if the fisherman immediately returned the taken fish to its habitat. It should be recognized that any activities involving the taking of this species not otherwise enumerated in the special rule are prohibited. Without this special rule, all of the prohibitions under 50 CFR 17.31 would apply. The Service believes that this special rule will allow for more efficient management of the species, thereby facilitating its conservation. For these reasons, the Service has concluded that this regulatory measure is necessary and advisable for the conservation of the Little Colorado spinedace.

National Environmental Policy Act

The Fish and Wildlife Service has determined that the Environmental Assessment, as defined under the authority of the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to section 4(a) of the Endangered Species Act of 1973, as amended. A notice outlining the Service's reasons for this determination was published in the Federal Register on October 25, 1983 (48 FR 49244).

Regulatory Flexibility Act and Executive Order 12291

The Department of the Interior has determined that designation of critical habitat for this species is not a major rule under Executive Order 12291 and certifies that this designation will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.). These determinations are based on a Determination of Effects...
that is discussed below and available at the Region 2 Office of Endangered Species, U.S. Fish and Wildlife Service (see ADDRESSES).

The Service has prepared an economic analysis and believes that economic and other impacts of this critical habitat designation on the Forest Service are not significant in the foreseeable future. The economic impact analysis concluded that Federal program costs would be minimal and would be incurred as the cost of planning to prevent introduction of exotic species and adverse effects from logging activities. No economic impacts on individuals or State and local governments were identified, and no impact on the national or regional economy, commerce, or employment were discerned.

Author

The author of this final rule is Gerald L. Burton, Endangered Species Biologist, U.S. Fish and Wildlife Service, Albuquerque, New Mexico [505/766-3972 or FTS 474-3972]. Status information was provided by C.O. Minckley, Flagstaff, Arizona.

3. Add the following paragraph (t) as a special rule to § 17.44

§ 17.44 Special rules—Fishes.

(t) Little Colorado spinedace (*Lepidomeda vittata*).

(1) No person shall take this species, except in accordance with applicable State Fish and Wildlife conservation laws and regulations in the following instances: for educational purposes, scientific purposes, the enhancement of conservation purposes consistent with the Act.

(2) Any violation of applicable State fish and wildlife conservation laws or regulations with respect to the taking of this species is also a violation of the Endangered Species Act.

(3) No person shall possess, sell, deliver, carry, transport, ship, import, or export, by any means whatsoever, any such species taken in violation of these regulations or in violation of applicable State fish and wildlife conservation laws or regulations.

(4) It is unlawful for any person to attempt to commit, solicit another to commit, or cause or to be committed, any offense defined in paragraphs (t) (1) through (3) of this section.

4. Amend § 17.95(e) by adding critical habitat of the Little Colorado spinedace in the same alphabetical order as the species occurs in § 17.11(h).

§ 17.95 Critical habitat—Fish and wildlife.

(e) LITTLE COLORADO SPINEDACE (*Lepidomeda vittata*)

Arizona:

1. *Coconino County*. East Clear Creek; approximately 18 miles of stream extending from the confluence with Leonard Canyon (NE 1/4 Sec. 11 T14N R12E) upstream to the Blue Ridge Reservoir dam (SE 1/4 Sec. 33 T14N R11E), and approximately 13 miles of stream extending from the upper end of Blue Ridge Reservoir (east boundary SE 1/4 Sec. 36 T14N R10E) upstream to Potato Lake (NE 1/4 Sec. 1 T12N R9E).
2. Navajo County. Chevelon Creek: approximately 8 miles of stream extending from the confluence with the Little Colorado River (NW¼ Sec. 23 T18N R17E) upstream to Bell Cow Canyon (SE¼ of the SW¼ Sec. 11 T17N R17E).

3. Apache County. Nutrioso Creek: approximately 5 miles of stream extending from the Apache-Sitgreaves National Forest boundary (north boundary Sec. 5 T8N R30E) upstream to the Nelson Reservoir dam (NE¼ Sec. 29 T8N R30E).

Constituent elements, for all areas of critical habitat, include clean, permanent flowing water, with pools and a fine gravel or silt-mud substrate.

Susan Recce,
Acting Assistant Secretary for Fish and Wildlife and Parks.

Part III

Department of Health and Human Services

Public Health Service

42 CFR Part 36
Indian Health Service; Final Rule
DEPARTMENT OF HEALTH AND HUMAN SERVICES

Public Health Service

42 CFR Part 36

Indian Health Service

AGENCY: Health Resources and Services Administration, Public Health Service, IHS.

ACTION: Final rule.

SUMMARY: These are final rules governing who may receive health services from the Indian Health Service (IHS). Under these rules, and eligible person must be: (1) A member of a federally recognized Indian tribe, and (2) reside within a designated Health Service Delivery Area (HSDA). The regulation provides for a one-year transition period prior to implementation and a waiver for Indian children (18 and under) who are ineligible under the new rule and who have at least one natural parent who is eligible. These eligibility requirements are applicable to both direct and contract health services.

Under section 105(a) of the Indian Self-Determination Act, Pub. L. 93-638, 25 U.S.C. 450q(a), IHS funds may be expended only for carrying out the “functions, authorities, and responsibilities” which the Secretary would otherwise have carried out with those funds. Therefore, tribes and tribal organizations operating facilities under Pub. L. 93-638 must also adhere to the eligibility provisions and procedures in these rules and are not authorized to serve persons with IHS funds who do not meet these criteria.

FOR FURTHER INFORMATION CONTACT:
Richard J. McCloskey, Indian Health Service, Room 6A-20, 5600 Fishers Lane, Rockville, Maryland 20857, Telephone: 301-443-1116. (This is not a toll free number).

SUPPLEMENTARY INFORMATION: On June 10, 1986, a notice of proposed rulemaking (NPRM) was published in the Federal Register (51 FR 21118 et seq.) proposing changes to the regulations governing who may receive health services from the IHS. Interested persons were given until October 8, 1986, to submit written comments, suggestions, or objections. Because of the interest expressed in this proposal, on October 10, 1986 a notice was published in the Federal Register (51 FR 36412) extending the comment period to November 7, 1986.

A. Changes Made From the Proposed Rules

These rules are the product of a careful analysis of over 11,000 submissions by individuals; groups; Indian and non-Indian organizations; state, local, and tribal governments; and the Congress submitted to the Department during the comment period. In addition, we received approximately 10,000 pages of transcripts taken at more than 120 public meetings held at selected locations throughout the country. On the basis of this analysis the Department has modified the proposed rules as noted below:

1. The proposed eligibility requirement that persons must be one quarter (1/4) or more Indian or Alaska Native ancestry has been deleted.

Many commentors expressed concern that inclusion of a specific blood quantum requirement would interfere with a tribe’s sovereignty by eliminating some tribal members from eligibility based upon racial identity rather than on the political relationship which exists between tribes and the Federal Government. Other commentors opposed the blood quantum criteria for a variety of other reasons; e.g., establishment of a blood quantum requirement would violate Indian treaty or statutory rights; shift the Federal government’s financial burden and responsibility to others; be “termination”; be racial discrimination between Indians; divide Indian families; and present tremendous difficulties involved in proving degree of Indian descent. The Department does not believe that any of these arguments necessarily preclude use of a specific blood quantum as a criteria for receipt of Federal health benefits. As we indicated in the preamble to the NPRM, blood quantum requirements, as well as tribal membership, have historically been used by Congress, Federal agencies, and the courts to determine who is an “Indian” for purposes of Federal benefits, claims, awards, and Federal jurisdiction. Nevertheless, there is substantial merit in many of the comments submitted and the overwhelming response by Indian people, tribal governments, and the Congress, was in opposition to the blood quantum criteria. There was strong feeling in the Indian community that criteria governing eligibility for IHS services should, to the extent possible, conform with tribal membership requirements and the use of blood quantum would eliminate some tribal members from eligibility for IHS services. We agree and, therefore, have deleted blood quantum as a criteria for eligibility in the final rule.

In addition, we have deleted the definition of Indian ancestry which specified descent from a member of a Federally recognized tribe. This was proposed as a means of calculating Indian blood quantum. Since the blood quantum criteria has been dropped and the tribal membership requirement remains, the definition is no longer needed.

2. Section 36.12 has been revised to delete the language in [a](1)“**...**, or eligible for membership in, * * * *This language was originally included to permit those people of Indian descent who are eligible for, but not currently enrolled in, a federally recognized tribe to be eligible for IHS services. Although some commentors were against limiting eligibility to members of tribes, a majority of commentors, in opposing the blood quantum criteria, did so partially on the basis that tribal membership should be sufficient criteria. We have decided that any person eligible for tribal membership but not enrolled will have more than enough time to become a member during the one year transition period provided for in this regulation. This decision is consistent with our decision that only members of Federally recognized tribes will be eligible for IHS services.

Those Indian people who are eligible for tribal membership but who do not wish to exercise their membership eligibility for whatever personal reasons they may have, are free to make this choice. We recognize that they will also be choosing to be ineligible for IHS services. This same result follows when a tribal member chooses to move beyond the geographical range of the IHS program. In both cases, however, the individual has within the power to change their selection.

3. The NPRM proposed to make non-Tribal Indians eligible if they were at least one-half (1/2) or more Indian descent. We have deleted this criteria because of our decision that eligibility should be based on tribal membership rather than blood quantum and because of the overwhelming opposition expressed to any blood quantum requirements. In proposing blood quantum, a majority of commentors did so at least partially on the basis that tribal membership should be a sufficient criteria. We agree. Services are provided to Indian people because of the political relationship which exists between tribes and the Federal Government rather than on a racial basis.
4. We have included an exception to the tribal membership requirement for minor children (16 and under) of tribal members. The child must have one natural parent who is a tribal member and the child must meet all other requirements. This exception does not apply to non-Indian adopted, foster or step-children of eligible Indians.

This exception is in response to a number of comments from Indian tribes that the current regulations do not allow for non-Indian foster children who are under the age of 16 to reside in a HSDA and who are not otherwise enrolled in the program. The tribes have expressed concern that this exclusion results in a number of non-Indian foster children being denied access to IHS services.

5. Section 36.12 as proposed would have allowed former residents of HSDA's and their minor children to return only to their home communities to obtain services without reestablishing residency. The final rule will permit former residents of HSDA's and their minor children to return to any HSDA (not necessarily their former community of residence) to obtain services available in IHS and IHS funded facilities. They will not, however, be eligible for contract health services. To preclude Indians from obtaining IHS services could restrict their mobility and discourage them from seeking employment in off reservation areas.

6. Section 36.15(d), governing changes in HSDA boundaries, has been revised to make it clear that while any tribe may request a change in HSDA boundaries, consultation with all the affected tribes is required. This is to assure that no tribe is unknowingly impacted by expansion or contraction of the HSDA resulting from the request of another tribe.

7. Section 36.12(b)(4) has been revised to delete language that would have required the prior written approval of the Service Unit Director, for good cause shown, to permit continued eligibility for a 90-day grace period after an eligible person ceased to reside in a HSDA. Language similar to that contained in the present regulations has been substituted, permitting persons who cease to reside in a HSDA and who are neither students nor transients to be eligible for services for a period of 90 days from such departure. This 90 day grace period is included in order to provide a reasonable period for the making of alternative arrangements for health services. We do not wish to impose an additional administrative burden by requiring either prior written approval of the Service Unit Director or the need to establish good cause.

8. Language has been added to provide for a transition period prior to implementation of the new rules. Many commentors expressed concern that those excluded by any new rules should be allowed adequate time to arrange alternate coverage for their health care needs. In order to provide time to obtain alternate services and to complete treatment on a timely basis, we have provided for a transition period of one year as follows:

The rule will not take effect until six months after publication to permit time for administrative steps necessary for implementation and education. After implementation there will be a second six month grace period during which those who would lose their eligibility under the new regulations and who had made use of an IHS or IHS funded facility within 3 years prior to the implementation date, shall retain eligibility if they reside in a HSDA.

Provisions have been included to assure that persons no longer eligible under these rules but who on the last day of the one year transition period are under treatment for any active condition or under treatment for a chronic degenerative disease or condition will continue to be considered as IHS beneficiaries until such time as their condition may be stabilized and other health care providers and medical assistance programs responsible will be notified.

These provisions provide that:

(1) Inpatients in IHS and IHS funded facilities and those receiving inpatient care under contract, including contract health services, may continue to receive services at IHS expense until the need for hospitalization and follow-up services has ended as determined by the responsible IHS or tribal physician. In addition, treatment for chronic degenerative conditions may be provided for no longer than 1 year beyond the point where it was otherwise safe to transfer treatment to other providers.

(2) Those actively undergoing a course of outpatient treatment either in IHS and IHS funded facilities or through contract health services, termination of which would impair health of the individual patient, may continue to receive the treatment at IHS expense for a reasonable length of time, until the course of treatment reaches a point where it may safely be terminated or the patient transferred to other providers as determined by the responsible IHS or tribal physician. In addition, treatment for chronic degenerative conditions may be provided for no longer than 1 year beyond the point where it was otherwise safe to transfer treatment to other providers, and

(3) All patients receiving care under (1) and (2) above shall be notified that, after discharge from care provided under any of the above circumstances, they will no longer be eligible for service as IHS beneficiaries. These patients shall be offered assistance in locating other health care providers and medical assistance programs.

9. For purposes of clarification, language has been added to the definitions of "appropriate ordering officials" and "Service Unit Director" to include the equivalent contract official administering IHS programs under such authority as the Indian Self-Determination Act, Pub. L. 93-638.

10. The definition of "Program Director" has been deleted as this term is no longer used by the IHS.

11. The first sentence in § 36.12(c), has been revised to clarify that the provision applies only to IHS facilities and programs and to facilities and programs operated and/or owned by tribes and funded by the IHS.

12. Language has been added to § 36.15 (a) (b) and (c) to clarify that HSDA's may only include geographic areas within the United States. Under the Snyder Act, appropriations are authorized for "Indians throughout the United States". This will remove from eligibility Indians residing outside the United States who in the past may have received direct services from IHS facilities.

13. Language has been added to § 36.16 to clarify that IHS will only maintain currently eligible people in its registration system and further that persons requesting Beneficiary Identification Cards (discussed later) need not submit new evidence of tribal membership and residence if such evidence is already on file. The IHS will make the determination as to whether or not the materials on file are sufficient.

B. Discussion of comments

1. A number of commentors (approximately one-third) suggested that we retain the current eligibility rules rather than adopt the proposed changes. There was widespread confusion, however, as to what the current requirements were with a significant number under the mistaken opinion that the tribes currently determine eligibility for IHS services.
We believe that tightening eligibility requirements based upon tribal membership and residency and combining the requirements applicable to both direct and contract services will enable us to allocate resources better and will enhance coordination of patient care in IHS and non-IHS facilities. Moreover, Congress has directed that "*[IHS must address the issue of an expanding service population. In terms of defining who is or should be generally eligible for IHS services,]*" H.R. Rep. No. 97-942, 97th Cong., 2nd Sess. at p. 108 (1982).

This approach will also be relatively simple to administer as it will basically be left to the tribes to verify who their members are. An additional factor, however, is that those currently not federally recognized have a formal process through which they may petition for such recognition through the BIA's Federal acknowledgement program.

3. Many commentors expressed the view that the tribes should determine who is eligible for services for the IHS. We believe that deletion of the 1/4 blood quantum criteria as an additional requirement to tribal membership will accommodate these concerns.

The tribal membership criteria without the (1/4) blood quantum requirement clarifies that IHS services are not provided to Indian people because of their racial identity but rather primarily on the political relationship which exists between tribes and the Federal government. The tribal governments, by establishing their membership requirements, also establish eligibility for IHS services for their members who choose to reside in an IHS Health Service Delivery Area (HSDA).

4. Some commentors were concerned about the effect on those who would no longer be eligible for care and were in favor of permanently "grandfathering" in current eligibles who would not meet the new requirements. We believe these concerns are adequately addressed by a number of provisions in this rule directed at mitigating its impact on persons no longer eligible as IHS beneficiaries. These provisions include the one-year transition period, provisions for minor Indian children, and provisions to assure continuity of care for persons in active treatment or with chronic degenerative conditions. In light of these provisions we have rejected the idea of permanently grandfathering all former eligibles.

5. Some commentors suggested that this was a "major rule" under Executive Order 12291, and a regulatory impact analysis was required. As was explained in the preamble in the NPRM, the proposed rule does not have cost implications for the economy of $100 million or more independent of the IHS appropriation, nor will it result in a major increase in cost for consumers, industries, or Government agencies, nor will it adversely affect competition. Accordingly, it has been determined that the rule is not a major rule under Executive Order 12291, and a regulatory impact analysis is not required.

6. Some commentors suggested that non-Indian spouses and other non-Indian family members of an eligible Indian should be eligible for services as IHS beneficiaries. This is not possible under current law. The fiscal year 1983 Appropriation Act for the Department of the Interior and Related Agencies, Pub. L. 97-394, which includes the appropriation for the Indian Health Service, restricted eligibility for non-Indians for no-charge services to situations involving a pregnancy, acute infectious diseases or public health hazards. IHS regulations have been amended to conform to Pub. L. 97-394 (48 FR 11220 et seq.), and this rule retains those restrictions.

7. A number of Commentors stated that they were opposed to the geographic residency requirement. The reasons were varied but included the arguments that all tribal members should be eligible regardless of residency and that residency violates the Snyder Act which provides for services for Indians throughout the United States. This is an issue we previously addressed in 1978 in connection with promulgation of the contract health services regulations (42 FR 34650 et seq., August 4, 1978). While IHS does have authorizing legislation (Snyder Act, etc.) to provide services to "Indians throughout the United States"; in appropriating funds Congress has generally provided funds for services to federally recognized Indians who live on or near Federal Indian reservations with certain exceptions, e.g., Urban projects.

This rule initially includes as HSDAs all current Contract Health Service Delivery Areas (CHSDA) and non-CHSDA service areas. In addition, the final rule adopts the proposed administrative method permitting the Director, IHS to revise CHSDA service areas. In addition, the final rule also permits the Bureau of Indian Affairs (BIA) to establish geographic boundaries after consultation with the Indian tribes affected and consideration of the criteria spelled out in the rule. Tribes are also allowed to request boundary changes. Revisions made by the Director will be published in the Federal Register.

8. Some commentors were concerned that combining eligibility rules for direct and contract health services and limiting eligibility to residents of the HSDA's will, for the first time, deny direct services to many Indians in areas beyond the HSDA's. Residency within a defined geographic service area is currently a requirement under the contract health service regulations and under this rule a residency requirement would apply to both direct and contract health services. We believe that requiring residency on or near reservations for both direct and contract care is not only a key element of this
rule but is also prudent policy and consistent with Congressional intent. 

9. This rule does away with the “close economic and social ties” test. If an Indian person resides in a HSDA and is a member of a Federally recognized tribe, he or she is eligible for IHS services both direct and contract. There were 37 tribal comments and 317 individual comments in favor of a residency requirement. Those in favor of residency did not address the close ties test. Nevertheless, we believe that deleting the close ties test is consistent with the overall approach and will simplify administration of the program and provide the individual with a clearer eligibility requirement.

10. Several commentors requested that implementation of the proposed regulations be postponed for various periods because there had not been enough consultation with the tribes. The issues involved in the NPRM were first presented in June 6, 1983, when a Federal Register notice (48 FR 25273) was published which outlined a number of options for eligibility criteria for Indians served by the IHS and solicited comments on these options. The proposed regulations have received extensive public exposure with a 150 day comment period resulting in over 11,000 submissions by individuals; groups; Indian and non-Indian organizations; state, local and tribal governments; and the Congress. In addition, over 120 public meetings were held to take public comments which resulted in over 10,000 pages of transcripts.

11. Some commentors were in favor of giving the tribes power to clear, veto, or even solely define the geographic areas in which Indians served by the IHS and solicited comments on these options. The rule permits any Indian tribe located within a HSDA to submit to the appropriate Area Director(s) requests for changes in HSDA boundaries based on criteria contained in the regulation. The rule includes consultation with any other tribes affected by the proposal. The tribal request, all tribal comments, and the Area Director’s recommendation and findings will be submitted to the IHS Director or to the Director’s designee, who makes the final determination.

12. A number of commentors were concerned that the rule might have a disproportionate impact on Indians in California and, therefore, special rules should be included for California Indians to take into account special historical factors in that State, such as failure to ratify treaties and past termination policies. Other commentors expressed opposite concerns claiming a special definition for California Indians would expand the current Indian service population in California and in effect “protect” the current California service population from the effects of any new eligibility rules, thus being unfair to Indians in other parts of the country who would be subject to and would have to bear the impact of any new rules.

Establishing separate eligibility requirements for California could set a precedent both for local diverse eligibility criteria and for inclusion of non-tribal Indian groups in other states. We have concluded that, absent specific Congressional direction to do so, it would be inappropriate for the Department to treat California Indians differently under this rule. The relationship between the Federal government and Indian Tribes is well established. Mechanisms are in place to correct historical anomalies through the BIA Federal acknowledgement program. We believe the most reasonable and prudent policy with respect to eligibility for services from the IHS is to make it clear that such services are available to members of Federally recognized tribes.

It is within the jurisdiction of the BIA Federal acknowledgement program and the Congress to correct any historical anomalies with respect to Indian groups not now recognized.

C. Fee for Service Care

As was explained in the proposed rule we are also updating the regulation to specify those circumstances in which the IHS may provide direct services at its facilities on a fee-for-service basis. These include:

(a) In emergencies under section 322(b) of the Public Health Service Act, 42 U.S.C. 249[b], and 42 CFR 32.110 of the regulations; 
(b) To Public Health Service and other federal beneficiaries under Economy Act (31 U.S.C. 1535) arrangements to the extent that providing services does not interfere with or restrict the provision of services to Indian and Alaska Native beneficiaries; and 
(c) To non-beneficiaries residing within the HSDA under policies approved by the tribe or tribes located on the reservation but only to the extent that providing services does not interfere with or restrict the provision of services to Indian and Alaska Native beneficiaries. 

This rule will not necessarily eliminate the actual provision of services to those individuals who will no longer retain eligibility. They may still receive services from IHS facilities on a fee-for-service basis under one of the above conditions.

D. Beneficiary Identification Cards (BIC)

Only 92 comments were received on this subject and of these 84 were opposed to the use of BICs.

Nevertheless, a registration process and issuance of BICs will enable the IHS to have more accurate knowledge of beneficiary populations and make it easier to identify beneficiaries and to expedite the provision of services in various clinical settings. The absence of a card will not preclude an otherwise eligible Indian from obtaining services, though it may delay the administrative determination that an individual is eligible for services on a no charge basis.

E. Evidence of Tribal Membership

We have added a provision to clarify responsibilities for determining or demonstrating that a person is a member of a federally recognized tribe. Identification of federally recognized tribes is a BIA responsibility and the IHS relies on the BIA both for identification of federally recognized tribes and for resolution of controversies as to whom or what body officially speaks for or represents a tribe.

Obtaining acknowledgment as a Federally recognized tribe is governed by regulations at 25 CFR Part 83. The IHS will work with both the BIA and the tribes to determine membership but it is the responsibility of the individuals to demonstrate that they are member of a federally recognized tribe.

Under this rule, the IHS will recognize two methods of demonstrating tribal membership:

(1) Documentation that the applicant meets the requirements of tribal membership as prescribed by the charter, articles of incorporation, other legal instrument or traditional process of the tribe and has been officially designated a tribal member by an authorized tribal official or body; or

(2) Certification of tribal enrollment or membership by the Secretary of the Interior acting through the (BIA).

This will help local IHS officials identify beneficiaries as well as provide necessary guidance to resolve any disputes regarding tribal membership.

F. Comments Beyond Scope

Several comments were received that went beyond the scope of the notice. They include suggestions: (1) That IHS charge Indians for services provided, or require a means test; and (2) that IHS
use contract health service funds to buy group health insurance policies.

Determination Concerning Impact of the Rule

This rule does not have cost implications for the economy of $100 million or more independent of the IHS appropriation, nor will it result in a major increase in cost for consumers, industries, or Government agencies, nor will it adversely affect competition. Therefore, the Secretary has determined that the rule is not a "major rule under Executive Order 12291, and a regulatory impact analysis is not required. Further, these regulations will not have a significant economic impact on a substantial number of small entities, and therefore do not require a regulatory flexibility analysis under the Regulatory Flexibility Act of 1980.

Paperwork Reduction Act

Sections 36.12(b)(2), 36.14(a), 36.15(d), and 36.16 contain information collections that are subject to approval by the Office of Management and Budget under the Paperwork Reduction Act of 1980, which have been approved under control number 0915-0107.

List of Subjects in 42 CFR Part 36

Alaska natives, Indians, Health, Health facilities, Health service delivery areas, Contract health services.

Robert E. Windom
Assistant Secretary for Health.

Approved: July 8, 1987.

Ottis R. Bowen,
Secretary.

For the reasons set out in the preamble, we are amending 42 CFR Part 36 as follows:

PART 36—[AMENDED]

1. The authority citation for Part 36 continues to read as follows:

2. Subpart A is amended by revising the title, removing § 36.1, and redesignating §§ 36.2 and 36.3 as §§ 36.1 and 36.2 respectively, to read as follows:

Subpart A—Purpose

Sec.

§ 36.1 Purpose of the regulations.

§ 36.2 Administrative instructions.

3. Subparts B and C are amended by:

A. Redesignating § 36.12(c) as § 36.11(d);

B. Revising § 36.12;

C. Revising and redesignating § 36.21 as § 36.10;

D. Redesignating § 36.24 as § 36.13;

E. Removing § 36.14 and by revising paragraph (a) introductory text of § 36.25 and then by redesignating § 36.25 as § 36.14. The revised paragraph (a) introductory text would read as set forth below;

F. Adding new § 36.15 and § 36.18 to read as set forth below; and

G. Adding OMB control number 0915-0107 at the end of §§ 36.12, 36.14, 36.15, and 36.16.

The revised and added portions of Subpart B read as follows:

§ 36.10 Definitions.

As used in this subpart: "Alternate resources" means resources other than those of the Indian Health Service available and accessible to the individual, such as health care providers and institutions, health care payment sources, or other health care programs for the provision of health services (e.g., Medicare, Medicaid, State or local health care programs or private insurance), for which the individual may be eligible or would be eligible except for the individual's eligibility for any IHS program.

"Appropriate ordering official" means, unless otherwise specified by contract with the health care facility or provider or by a contract with a tribe or tribal organization, the ordering official for the Service Unit in which the individual requesting contract health services or on whose behalf the services are requested, resides.

"Area Director" means the Director of an Indian Health Service Area Office designated for purposes for administration of Indian Health Service Programs.

"Contract health services" means health services provided at the expense of the Indian Health Service from public or private medical or hospital facilities other than those of the Service or those funded by the Service.

"Emergency" means any medical condition for which immediate medical attention is necessary to prevent the death or serious impairment of the health of an individual.

"Health Service Delivery Area" means a geographic area designated pursuant to § 36.15 of this Subpart.

"Indian tribe" means any Indian tribe, band, nation, or other organized group or community, including any Alaska Native village or regional or village corporation as defined in or established pursuant to the Alaska Native Claims Settlement Act, 43 U.S.C. 1601 et seq., which is recognized as eligible for the special programs and services provided by the United States to Indians because of their status as Indians.

"Reservation" means any Federally recognized Indian tribe's reservation, Pueblo, or colony, including former reservations in Oklahoma, Alaska Native regions established pursuant to the Alaska Native Claims Settlement Act (43 U.S.C. 1601 et seq.), and Indian allotments if considered reservation land by the Bureau of Indian Affairs.

"Reside" means living in a locality with the intent to make it a fixed and a permanent home. The following persons will be deemed residents of the Health Service Delivery Area:

(1) Students who are temporarily absent from the Health Service Delivery Area during full time attendance at programs of vocational, technical, or academic education including normal school breaks;

(2) Persons who are temporarily absent from the Health Service Delivery Area for purposes of travel or employment (such as seasonal or migratory workers);

(3) Indian children placed in foster care outside the Health Service Delivery Area by order of a court of competent jurisdiction and who were residents within the Health Service Delivery Area at the time of the court order.

"Secretary" means the Secretary of Health and Human Services and any other officer or employee of the Department of Health and Human Services to whom the authority involved has been delegated.

"Service" means the Indian Health Service.

"Service Unit Director" means the Director of Indian Health Service programs for a designated geographical or tribal area of responsibility or the equivalent official of a contractor administering an IHS program.

§ 36.12 Persons to whom health services will be provided.

(a) Subject to the requirements of this subpart, the Indian Health Service will provide direct services at its facilities, and contract health services, as medically indicated, and to the extent that funds and resources allocated to the particular Health Service Delivery Area permit, to persons of Indian or Alaska Native descent who:

(1) Are members of a federally recognized Indian tribe; and

(2) reside within a Health Service Delivery Area designated under § 36.15; or

(3) Are not members of a Federally recognized Indian tribe but are the natural minor children (18 years old or under) of a member of a Federally
recognized tribe and reside within a Health Service Delivery Area designated under § 36.15.

(b) Subject to the requirements of this subpart, the Indian Health Service will also provide direct services at its facilities and, except where otherwise provided, contract health services, as medically indicated and to the extent that funds and resources allocated to the particular Health Service Delivery Area permit, to people in the circumstances listed below:

(1) To persons who meet the eligibility criteria in paragraph (a) of this section except for the residency requirement, who formerly resided within a Health Service Delivery area designated under § 36.15, and who present themselves to any Indian Health Service or Indian Health Service funded facility (and to minor children of such persons if the children meet the eligibility criteria in paragraph (a) of this section except for the residency requirement). Contract health services may not be authorized for these individuals;

(2) To a non-Indian woman pregnant with an eligible Indian’s child but only during the period of her pregnancy through post-partum (generally about 6 weeks after delivery). In cases where the woman is not married to the eligible Indian under applicable state or tribal law, paternity must be acknowledged in writing by the Indian or determined by order of a court of competent jurisdiction;

(3) To non-Indian members of an eligible Indian’s household if the medical officer in charge determines that the health services are necessary to control acute infectious disease or a public health hazard; and

(4) To an otherwise eligible person for up to 90 days after the person ceases to reside in a Health Service Delivery Area when the Service Unit Director has been notified of the move.

(c) Contract health services will not be authorized when and to the extent that Indian Health Service or Indian Health Service funded facilities are available and accessible to provide the needed care. When funds are insufficient to provide the volume of contract health services needed by the service population, the Indian Health Service shall determine service priorities on the basis of medical need. Contract health services will not be authorized when and to the extent that, alternate resources for payment:

(1) Are available and accessible to the beneficiary, or

(2) Would be available and accessible if the beneficiary were to apply for them, or

(3) Would be available and accessible under state or local law or regulation in the absence of the individual’s eligibility for contract health services from the Indian Health Service or Indian Health Service funded programs.

(d) The Indian Health Service may provide direct services at its facilities on a fee-for-service basis to persons who are not beneficiaries under paragraphs (a) and (b) of this section under a number of authorities including the following:

(1) In emergencies under section 322(b) of the Public Health Service Act, 42 U.S.C. 249(b), and 42 CFR 32.111 of the regulations;

(2) To Public Health Service and other Federal beneficiaries under Economy Act (31 U.S.C. 1535) arrangements to the extent that providing services does not interfere with or restrict the provision of services to Indian and Alaska Native beneficiaries; and

(3) To non-beneficiaries residing within the Health Service Delivery Area when approved by the tribe or tribes located on the reservation but only to the extent that providing services does not interfere with or restrict the provision of services to Indian and Alaska Native beneficiaries. (Approved by the Office of Management and Budget under control number 0915-0107)

§ 36.14 Reconsideration and appeals.

(a) Any person who has applied for and been denied health services or eligibility by the Indian Health Service or by any contractor contracting to administer an Indian Health Service program or portion of a program, including tribes and tribal organizations contracting under the Indian Self-Determination Act, shall be notified of the denial in writing together with a statement of all the reasons for the denial. The notice shall advise the applicant that within 30 days from the receipt of the notice the applicant may...

(Approved by the Office of Management and Budget under control number 0915-0107)

§ 36.15 Health Service Delivery Areas.

(a) The Indian Health Service will designate and publish as a notice in the Federal Register specific geographic areas within the United States including Federal Indian reservations and areas surrounding those reservations as Health Service Delivery Areas.

(b) The Indian Health Service may, after consultation with all the Indian tribes affected, redesignate the boundaries of any Health Service Delivery Area followed by publication of a notice in the Federal Register. Any redesignation of a Health Service Delivery area will include the reservation, and those areas close to the reservation boundaries which can reasonably be considered part of the reservation service area. The redesignation must be based on consideration of the following factors:

(1) The number of persons residing in the off-reservation area who would be eligible under § 36.12(a) (1) and (3).

(2) The number of persons residing in the off-reservation area who have traditionally received health services from the Indian Health Service and whose eligibility for services would be affected;

(3) The geographic proximity of the off-reservation area to the reservation;

(4) Whether the Indians residing in the off-reservation area can be expected to need and to use health services provided by the Indian Health Service given the alternative resources (health facilities and payment sources) available and accessible to them;

(c) Notwithstanding paragraphs (a) and (b) of this section, the Indian Health Service may designate States, subdivisions of States such as counties or towns, or other identifiable geographic areas such as census divisions or zip code areas, as Health Service Delivery Areas where reservations are nonexistent, or so small and scattered and the eligible Indian population so widely dispersed that it is inappropriate to use reservations as the basis for defining the Health Service Delivery Area.

(d) Any Indian tribal government may request a change in the boundaries of the Health Service Delivery Area. Such a request should be supported by documentation related to the factors for consideration set out in paragraph (b) of this section and shall include documentation of any consultation with or notification of other affected or nearby tribes. The request shall be submitted to the appropriate Area Director(s) who shall affirm all Indian tribes affected the opportunity to express their views orally and in writing. The Area Director(s) shall then submit the request, including all comments, together with the Area’s recommendation and independent findings or verification of the factors set out in paragraph (b) of this section, to the Indian Health Service Director or to the Director’s designee for the Indian Health Service decision. The decision of the Indian Health Service Director or the Director’s designee shall constitute final agency action on the tribe’s request. Changes in the boundaries of Health Service Delivery Areas will be published in the Federal Register.
§ 36.16 Beneficiary Identification Cards and verification of tribal membership.

(a) The Indian Health Service will issue Beneficiary Identification Cards as evidence of beneficiary status to persons who are currently eligible for services under § 36.12(a). Persons requesting Beneficiary Identification Cards must submit or have on file evidence satisfactory to the Indian Health Service of tribal membership and evidence satisfactory to the Indian Health Service of residence within a Health Service Delivery Area. The absence of a Beneficiary Identification Card will not preclude an otherwise eligible Indian from obtaining services through it may delay the administrative determination that an individual is eligible for services on a no charge basis.

(b) For establishing eligibility or obtaining a Beneficiary Identification Card, applicants must demonstrate that they are members of a Federally recognized tribe. Membership in a Federally recognized tribe is to be determined by the individual tribe or the Bureau of Indian Affairs. Therefore, the Indian Health Service will recognize two methods of demonstrating tribal membership:

(1) Documentation that the applicant meets the requirements of tribal membership as prescribed by the charter, articles of incorporation, or other legal instruments or traditional processes of the tribe and has been officially designated a tribal member by an authorized tribal official or body; or

(2) Certification of tribal enrollment or membership by the Secretary of the Interior acting through the Bureau of Indian Affairs.

(c) Demonstrating membership in a Federally recognized tribe is the responsibility of the applicant. However, the Indian Health Service may consult with the appropriate tribe or the Bureau of Indian Affairs on outstanding questions regarding an applicant’s tribal membership if the Indian Health Service has some documentation that it believes may be helpful to the tribe or the Bureau of Indian Affairs in making their determination.

(Approved by the Office of Management and Budget under control number 0915-0107)

Subpart D—Transition Provisions

§ 36.31 Transition period.

(a) The transition period for full implementation of the new eligibility regulations consists of three parts:

(1) A six month delayed implementation;

(2) A six month grace period; and

(3) A health care continuity period determined by medical factors.

§ 36.32 Delayed implementation.

(a) The eligibility requirements in Subparts A and B of this part become effective March 16, 1988.

(b) During the six month delayed implementation period the former eligibility regulations will apply.

§ 36.33 Grace period.

(a) Upon the effective date referred to in § 36.32(a), individuals who would lose their eligibility under the new eligibility regulations published on September 16, 1987, and who have made use of an Indian Health Service of Indian Health Service funded service within three years prior to September 16, 1987 (date of publication of the new eligibility regulations) shall retain their eligibility for a six month grace period ending September 16, 1988. During this grace period such individual’s eligibility will continue to be determined under the former regulations except that the new residency requirements established by Subparts A and B must be met for the individual to be eligible.

(b) All individuals who receive services during the grace period based on paragraph (a) of this section and whose eligibility will terminate on September 16, 1988, shall be notified in writing that after September 16, 1988 they will no longer be eligible for services as Indian Health Service beneficiaries. Such written notice should include an explanation of their appeal rights as provided in § 36.14 of this part. These patients shall be offered assistance in locating other health care providers and medical assistance programs.

§ 36.34 Care and treatment of people losing eligibility.

(a) Individuals who lose their eligibility on September 16, 1988, (end of the grace period) and on that date are actively undergoing treatment may still be provided services for a limited period in the following circumstances:

(1) Inpatients in IHS and IHS funded facilities and those receiving inpatient care under contract, including contract health services, may continue to receive such care and necessary follow-up services at Indian Health Service expense until the need for hospitalization and follow-up services has ended as determined by the responsible Indian Health Service or tribal physician, all other conditions being met including medical priorities;

(2) Those actively undergoing a course of outpatient treatment either in Indian Health Service and Indian Health Service funded facilities or through contract health services, termination of which would impair the health of the individual patient, may continue to receive the treatment at Indian Health Service expense for a reasonable length of time, until the course of treatment reaches a point where it may safely be terminated or the patient transferred to other providers as determined by the responsible Indian Health Service or tribal physician, all other conditions being met including medical priorities.

(3) Those under treatment for chronic degenerative conditions may be provided additional treatment at Indian Health Service expense for no longer than 1 year beyond the end of the grace period notwithstanding any determination that it was otherwise safe to transfer treatment to other providers, all other conditions met including medical priorities.

(b) All patients receiving care under paragraph (a) of this section shall be notified in writing that, after discharge from care provided under any of the above circumstances, they will no longer be eligible for services as Indian Health Service beneficiaries. Such notice shall include an explanation of their appeal rights as provided in § 36.14 of this part. These patients shall be offered assistance in locating other health care providers and medical assistance programs.

Part IV

Department of Transportation

Federal Aviation Administration

14 CFR Part 91
Special Federal Aviation Regulation No. 47; Special Flight Authorization for Noise Restricted Aircraft; Notice of Proposed Rulemaking
DEPARTMENT OF TRANSPORTATION
Federal Aviation Administration

14 CFR Part 91

Special Federal Aviation Regulation No. 47; Special Flight Authorization for Noise Restricted Aircraft

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Proposed Rulemaking (NPRM).

SUMMARY: Special Federal Aviation Regulation (SFAR) 47 provides for limited issuance of special flight authorizations to conduct certain nonrevenue operations that are otherwise prohibited by the Part 91, Subpart E, noise restrictions. The current rule terminates on December 31, 1987. This proposal would extend SFAR 47 through December 31, 1989, and require all requests for special flight authorizations to be submitted in writing five days prior to effective date. The FAA does not plan to extend the SFAR beyond January 1, 1990.

DATE: Comments must be received on or before October 16, 1987.

ADDRESSES: Comments on the proposal are to be marked “Docket No. 24349” and mailed in duplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rules Docket (AGC-204), Docket No. 24394, 80 Independence Ave., SW., Washington, DC 20591; or delivered in duplicate to Room 916, 800 Independence Ave., SE., Washington, DC 20591, or by calling (202) 267-3484. Requests should be identified by the docket number of this proposed rule. Persons interested in being placed on a mailing list for future notices of proposed rulemaking should also request a copy of Advisory Circular No. 11-2, Notice of Proposed Rulemaking Distribution System, which describes the application procedure.

Synopsis of the Proposal

Under Part 91 of the Federal Aviation Regulations, on or after January 1, 1985, no person may operate a civil subsonic turbojet airplane with maximum weight of more than 75,000 pounds to or from an airport in the United States unless that airplane has been shown to comply with Stage 2 or Stage 3 noise levels under Part 36. This restriction applies to U.S. registered aircraft that have standard airworthiness certificates and foreign registered aircraft that would be required to have a U.S. standard airworthiness certificate in order to conduct the operations intended for the airplane were it registered in the United States. SFAR 47 was adopted February 26, 1985, (50 FR 7751, February 26, 1985) to permit certain operations of noise restricted aircraft without a formal grant of exemption under FAR Part 11. The FAA has determined this process to be very cost beneficial and time efficient to both the government and the private sector. On December 31, 1986, FAA extended SFAR 47 for a one-year period until December 31, 1987, in order to facilitate the removal of remaining non-noise compliant airplanes from the United States. The FAA believes that by January 1, 1990, nearly all non-compliant Stage 1 aircraft will have been modified to meet Stage 2 noise standards or be out of service. Moreover, if a situation arises that an aircraft needs to be hukkitted after January 1, 1990, the FAR Part 11 exemption process is available. The FAA plans no further action to extend the SFAR beyond this date.

In addition, from experience gained in the issuance of special flight authorizations, the FAA believes a change establishing a time frame for submitting SFAR 47 requests is required due to the number of last-minute requests submitted.

The FAA proposes to amend section 3 of SFAR 47 to require the applicant for a special flight authorization to submit its request in writing five days before the applicant’s requested flight date. This time frame will prevent any delays in issuing the requested authorizations, and assist the applicant in insuring the flight can be commenced as planned.

More information contained in this proposal have been submitted to OMB for review. Comments on the requirements should be submitted to the Office of Information and Regulatory Affairs (OMB), New Executive Office Building, Room 3001, Washington, DC 20503; Attention: FAA Desk Officer (Telephone 202-395-7340). A copy should be submitted to the FAA docket.

Economic Impact

This proposal has minimal economic impact. Adoption of the proposal would allow an alternative from the exemption process for certain operations, reducing administrative costs upon operators and the FAA. While the operations are not without some noise costs, these costs can be characterized as trivial, since the number of operations at any one local airport will be extremely low in number. Even though benefits will exceed costs for this proposal, the FAA finds that the SFAR, if adopted, is not likely to have significant economic impact upon a substantial number of small entities. The basis for this is the very low number of requests which FAA foresees as a result of the adoption of this proposal. This number should not exceed twenty over the life of the regulation. Accordingly, preparation of a full regulatory evaluation is not required.

List of Subjects in 14 CFR Part 91

Air carriers, Aviation safety, Safety, Aircraft, Aircraft pilots, Air traffic control, Pilots, Airspace, Air
transportation, Airworthiness directives and standards.

Environmental Analysis

Pursuant to Department of Transportation "Policies and Procedures for Considering Environmental Impacts" (FAA Order 1050.1D), a Finding of No Significant Impact has been prepared. The changes proposed in this rule do not significantly affect the quality of the human environment.

The Proposed Amendment

Accordingly, the FAA proposes to amend Part 91 of the Federal Aviation Regulations (14 CFR Part 91) by amending Special Federal Aviation Regulation 47 to read as follows:

PART 91—GENERAL OPERATING AND FLIGHT RULES

1. The authority citation for Part 91 continues to read as follows:

Authority: 40 U.S.C. 1301(7), 1303, 1344, 1346, 1352 through 1355, 1401, 1421 through 1431, 1471, 1472, 1502, 1510, 1522, 2121 through 2125; Articles 12, 29, 31, and 32(a) of the Convention on International Civil Aviation (61 State 11190); 42 U.S.C 4321 et seq.; E.O. 11514; 49 U.S.C. 106(g) [Revised Pub. L. 87–449, January 12, 1963].

Special Federal Aviation Regulation 47—[Amended]

2. By amending paragraph 3 to add one paragraph as follows:

(j) Written requests should be received five days prior to requested flight date.

3. By removing from paragraph 5 the word "1987" and substituting the word "1989."

The proposal has minimal economic consequences. Accordingly, for reasons stated earlier the FAA has determined that: (1) The amendment does not involve a major rule under Executive Order 12291; (2) the amendment is not significant nor does it require a Regulatory Evaluation under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) it is certified that under the criteria of the Regulatory Flexibility Act that the amendment will not have significant economic impact on a substantial number of small entities. In addition, this proposal, if adopted would have little or no impact on trade opportunities for U.S. firms doing business overseas, or for foreign firms doing business in the United States.

Issued at Washington, DC on September 11, 1987.

Norman H. Plummer,
Director of Environment and Energy.

Health Care Financing Administration

Medicare Program; Inpatient Hospital Deductible and Coinsurance Amounts and Part A Premium for the Uninsured Aged for 1988; Notice
DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Care Financing Administration

[OACT-11-N]

Medicare Program; Inpatient Hospital Deductible and Coinsurance Amounts and Part A Premium for the Uninsured Aged for 1988

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Notice.

SUMMARY: This notice announces the inpatient hospital deductible and coinsurance amounts and the monthly hospital insurance premium for the uninsured aged for calendar year 1988 under Medicare’s hospital insurance program. The Medicare statute specifies the formulae to be used to determine these amounts.

The inpatient hospital deductible will be $540. The daily coinsurance amounts will be: (a) $135 for the 61st through 90th days of hospitalization; (b) $270 for lifetime reserve days; and (c) $67.50 for the 21st through 100th days of extended care services furnished in a skilled nursing facility. The monthly Medicare hospital insurance premium for the 12 months beginning January 1, 1988 (for individuals who are not insured under the Social Security or Railroad Retirement Retirement Acts and do not otherwise meet the requirements for entitlement to Part A) is $234.

FOR FURTHER INFORMATION CONTACT: Barb Klees, (301) 694-2780.

SUPPLEMENTARY INFORMATION:

I. Inpatient Hospital Deductible and Coinsurance Amounts

Section 1813 of the Social Security Act (the Act) (42 U.S.C. 1395i—2(d)(2)) provides for an inpatient hospital deductible and certain coinsurance amounts to be deducted from the amount payable by Medicare for inpatient hospital services and extended care services furnished an individual. Section 1813(b)(2) of the Act, as amended by section 9301 of the Omnibus Budget Reconciliation Act (OBRA) of 1986, Pub. L. 99-509, requires the Secretary to determine and publish a monthly Medicare hospital insurance premium for the uninsured aged for the 12 months beginning January 1, 1988 (for individuals who are not insured under the Social Security or Railroad Retirement Retirement Acts and do not otherwise meet the requirements for entitlement to Part A) is $234.

Because the coinsurance amounts in section 1813 of the Act are fixed percentages of the inpatient hospital deductible for services furnished in the same calendar year, the increase in the deductible has the effect of also increasing the amount of coinsurance the Medicare beneficiary must pay. Thus, for inpatient hospital services or extended care services furnished in 1988, the daily coinsurance for the 61st through 90th days of hospitalization (¼ of the inpatient hospital deductible) will be $135; the daily coinsurance for lifetime reserve days (½ of the inpatient hospital deductible) will be $270; and the daily coinsurance for the 21st through 100th days of extended care services in a skilled nursing facility (¼ of the inpatient hospital deductible) will be $67.50.

The estimated cost to beneficiaries due to these increases is $200 million. This amount is based on an estimated 7.3 million beneficiaries who will have 7.9 million benefit periods and use 2.9 million hospitalization days, 1.1 million lifetime reserve days, and 4.2 million skilled nursing facility coinsurance days in 1988.

II. Part A Premium for the Uninsured Aged

Under the authority in section 1816(d)(2) of the Social Security Act (42 U.S.C. 1395f—2(d)(2)), I have determined that the monthly Medicare hospital insurance premium for the uninsured aged for the 12 months beginning January 1, 1988 is $234.

Section 1818 of the Social Security Act (Act) provides for voluntary enrollment in the hospital insurance program (Part A of Medicare), subject to payment of a monthly premium, of certain persons age 65 and older who are uninsured for social security or railroad retirement benefits and do not otherwise meet the requirements for entitlement to hospital insurance. (Persons insured under the Social Security or Railroad Retirement Acts need not pay premiums for hospital insurance.)

The formula specified in this section requires that, for the period beginning January 1, 1988, the 1973 base year premium ($33) be multiplied by the ratio of (1) the 1987 inpatient hospital deductible to (2) the 1973 inpatient hospital deductible, rounded to the nearest multiple of $1, or, if midway between multiples of $1, to the next higher multiple of $1.

Under section 1813(b)(2) of the Act, the 1988 inpatient hospital deductible was determined to be $540. The 1973 deductible was actuarially determined to be $76, although the 1973 deductible...
was actually promulgated to be only $72, to comply with a ruling of the Cost of Living Council. (See 37 FR 21452, October 11, 1972.) The monthly premium for the 12-month period beginning January 1, 1988 has been calculated using the $76 deductible for 1973, since this more closely satisfies the intent of the law. Thus, the monthly hospital insurance premium is $33 \times \left( \frac{540}{76} \right) = \$234.47, which is rounded to $234.

The monthly hospital insurance premium for the uninsured aged for the 12-month period beginning January 1, 1988, will increase to $234. That amount is 4 percent higher than the $226 monthly premium amount for the 12-month period beginning January 1, 1987.

The estimated cost of this increase to the approximately 18 thousand enrollees who do not otherwise meet the requirements for entitlement to hospital insurance will be about $2 million.

III. Regulatory Impact Statement

This notice merely announces amounts required by legislation. This notice is not a proposed rule or a final rule issued after a proposal, and does not alter any regulation or policy. Therefore, we have determined, and the Secretary certifies, that no analyses are required under Executive Order 12291 or the Regulatory Flexibility Act (5 U.S.C. 601 through 612).

Federal Register
Vol. 52, No. 179
Wednesday, September 16, 1987
As the official handbook of the Federal Government, the Manual is the best source of information on the activities, functions, organization, and principal officials of the agencies of the legislative, judicial, and executive branches. It also includes information on quasi-official agencies and international organizations in which the United States participates.

Particularly helpful for those interested in where to go and who to see about a subject of particular concern is each agency’s “Sources of Information” section, which provides addresses and telephone numbers for use in obtaining specifics on consumer activities, contracts and grants, employment, publications and films, and many other areas of citizen interest. The Manual also includes comprehensive name and subject/agency indexes.

Of significant historical interest is Appendix C, which lists the agencies and functions of the Federal Government abolished, transferred, or changed in name subsequent to March 4, 1933.

The Manual is published by the Office of the Federal Register, National Archives and Records Administration.
