Briefings on How To Use the Federal Register
For information on briefings in Washington, DC, see announcement on the inside cover of this issue.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper, 24x microfiche format and magnetic tape. The annual subscription price for the **Federal Register** paper edition is $375, or $415 for a combined **Federal Register**, Federal Register Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the Federal Register Index and LSA is $353; and magnetic tape is $37,500. Six month subscriptions are available for one-half the annual rate. The charge for individual copies in paper form is $4.50 for each issue, or $4.50 for each group of pages as actually bound; or $1.50 for each issue in microfiche form; or $175.00 per magnetic tape. All prices include regular domestic postage and handling. International customers please add 25% for foreign handling. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA or MasterCard. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250–7954.

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 58 FR 12345.

THE FEDERAL REGISTER

WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC

(two briefings)

WHEN: November 30 at 9:00 am and 1:30 pm

WHERE: Office of the Federal Register, 7th Floor Conference Room, 800 North Capitol Street NW, Washington, DC (3 blocks north of Union Station Metro)

RESERVATIONS: 202–523–4538

Printed on recycled paper containing 100% post consumer waste

Rules and Regulations

Federal Register
Vol. 58, No. 227
Monday, November 29, 1993

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Office of the Secretary

7 CFR Part 1

Appearance of USDA Employees as Witnesses in Judicial or Administrative Proceedings; Amendment

AGENCY: Office of the Secretary, USDA.

ACTION: Final rule.

SUMMARY: This document amends the regulations governing the appearance of USDA employees as witnesses in order to testify or produce official documents in judicial or administrative proceedings.

EFFECTIVE DATE: November 29, 1993.

FOR FURTHER INFORMATION CONTACT: Robert L. Siegler, Deputy Assistant General Counsel, Research and Operations Division, Office of the General Counsel, United States Department of Agriculture, Washington, DC 20250–1400, (202) 720–6035.

SUPPLEMENTARY INFORMATION: The regulations governing the appearance of USDA employees as witnesses to testify or produce official documents in judicial or administrative proceedings are amended to provide specific authority for heads of USDA agencies to delegate their responsibilities under the regulations to subordinate officials in their agencies.

This rule relates to internal agency management. Therefore, pursuant to 5 U.S.C. 553, notice of proposed rulemaking and opportunity for comment are not required, and this rule may be made effective less than 30 days after publication in the Federal Register. Further, since this rule relates to internal agency management, it is exempt from the provisions of Executive Order Nos. 12778 and 12866. Finally, this action is not a rule as defined by the Regulatory Flexibility Act, Pub. L. No. 96–354, and, thus, is exempt from the provisions of that Act.

List of Subjects in 7 CFR Part 1

Administrative practice and procedures; Witnesses.

PART 1—ADMINISTRATIVE REGULATIONS

Accordingly, part 1, title 7, Code of Federal Regulations is amended as follows:

1. The authority citation for part 1 continues to read as follows:

Authority: 5 U.S.C. 301, unless otherwise noted.

2. A new § 1.219 is added to subpart K to read as follows:

Subpart K—Appearance of USDA Employees as Witnesses in Judicial or Administrative Proceedings

* * * * *

§ 1.219 Delegations.

(a) Except as provided in paragraphs (b), (c), or (d) of this section, the head of a USDA agency may delegate his or her responsibilities under this subpart, including the retirement to be notified of the receipt of a subpoena as provided in §§ 1.214(a) and 1.216(a) of this part, to employees of his or her agency as follows:

(1) In the National office of the agency, to a level no lower than two levels below the agency head;

(2) In a field component of an agency, to a level no lower than the official who heads a state office.

(b) Notwithstanding paragraph (a) of this section, the Chief of the Forest Service may delegate his responsibilities under this subpart as follows:

(1) In the National office of the Forest Service, to a level no lower than a Deputy Chief of the Forest Service;

(2) In a field component of the Forest Service, to a level no lower than a Regional Forester or Station Director.

(c) Notwithstanding paragraph (a) of this section, the General Counsel may delegate his responsibilities under this subpart as follows:

(1) In the National office of the Office of the General Counsel, to a level no lower than an Assistant General Counsel;

(2) In the field component of the Office of the General Counsel, to Regional Attorneys who may redelegate their responsibilities to Associate Regional Attorneys and Assistant Regional Attorneys who report to them.

(d) The responsibilities assigned to heads of agencies and to Assistant and Under Secretaries in § 1.214(b)(2) of this part may not be redelegated.

Done this 17th day of November, 1993, at Washington, DC.

Mike Espy,

Secretary.

BILLING CODE 3410–01–M

Soil Conservation Service

7 CFR Part 623

Emergency Wetlands Reserve Program

AGENCY: Soil Conservation Service, USDA.

ACTION: Interim rule.

SUMMARY: The Emergency Supplemental Appropriations for Relief From the Major, Widespread Flooding in the Midwest Act of 1993 authorizes the use of funds appropriated under the Act, which are otherwise available for waterway and watershed repair under the Emergency Watershed Protection Program of the Soil Conservation Service (SCS), to restore cropland, which was inundated by the 1993 Midwest floods, to wetlands for the purposes of the Wetlands Reserve Program (WRP) authorized by title XII of the Food Security Act of 1985, as amended. This rule sets forth the policies, procedures, and requirements of the Emergency Wetlands Reserve Program (EWRP) that have been established to implement the 1993 emergency wetland restoration and conservation provisions. The EWRP will be available only in the following States: Illinois, Iowa, Kansas, Minnesota, Missouri, Nebraska, South Dakota, and Wisconsin. This rule does not affect the policies, procedures, or requirements of the Wetlands Reserve Program regulations issued by the Agricultural Stabilization and Conservation Services.

DATES: November 26, 1993.

COMMENT DEADLINE: In order to be considered, comments must be submitted in writing by December 27, 1993.

ADDRESSES: Send written comments to Edward G. Riekert, Director, Watershed

Projects Division, SCS, USDA, P.O. Box 2890, Washington, DC 20013.

FOR FURTHER INFORMATION CONTACT: Edward G. Riekert, telephone (202) 720–3527.

SUPPLEMENTARY INFORMATION: The WRP was established under the authority of sections 1237–1237f of the Food Security Act of 1985, as amended, 16 U.S.C. 3837–3837f, and is administered by the Agricultural Stabilization and Conservation Service (ASCS) pursuant to regulations found at 7 CFR part 703. Under the WRP, persons who own croplands and other related lands that have wetland characteristics or the potential for restoration of such characteristics and who agree to the restoration and long-term maintenance of those lands as wetlands may be eligible to enroll the lands in the WRP and receive a payment for the long-term maintenance easement and some cost-sharing assistance for the restoration costs.

The Emergency Supplemental Appropriations for Relief From Major, Widespread Flooding in the Midwest Act of 1993, Public Law 103–75, 107 Stat. 739, provides appropriations for the repair of "damages to the waterways and watersheds resulting from the Midwest floods and other disasters of 1993" under the Emergency Watershed Protection Program of the SCS. See 107 Stat. 742. That section of the emergency appropriations legislation further provides that if the Secretary of Agriculture "determines that the cost of land and levee restoration exceeds the fair market value of an affected cropland, the Secretary may use sufficient funds provided (under this section) to accept bids from willing sellers to enroll such cropland inundated by the Midwest floods of 1993 in any of the affected States in the Wetlands Reserve Program as authorized by subchapter C of chapter 1 of subtitle D of title XII of the Food Security Act of 1985."

Pursuant to the delegations of authority of the Department of Agriculture contained in 7 CFR part 2, the EWRP will be administered by the SCS as an adjunct to the WRP administered by the ASCS. The policies, procedures, and requirements provided in this rule are separate from and do not affect the policies, procedures, and requirements related to the WRP that are contained in 7 CFR part 703 and administered by ASCS.

Under the EWRP, SCS will purchase wetland conservation easements from persons owning cropland that was damaged by the 1993 Midwest floods if those lands have the potential for restoration to wetland conditions with hydrologic conditions of inundation or saturation of the soil and hydrophytic vegetation, and if the owner voluntarily agrees to restore and maintain those conditions. The functions and values of the wetlands for wildlife habitat, water quality improvement, flood water retention, floodway enhancement, ground water recharge, open space, aesthetic values, and environmental education. Furthermore, the wetland conservation easements will permanently prohibit use of the affected land as cropland. Additionally, the easement shall require permanent maintenance of the wetland conditions, except in the case of natural disaster.

Eligible land for purchase will include farmed wetlands or prior converted wetlands (converted prior to December 23, 1985), together with adjacent lands on which the wetlands are functionally dependent so long as the likelihood of successful restoration of such land and the potential wetland values merit inclusion in the program with reasonable costs. Farmed wetlands are lands that were drained, leveled, or otherwise manipulated prior to December 23, 1985 (the effective date of the Food Security Act of 1985) to the extent that agricultural crop production was made possible, but which continue to exhibit wetland characteristics. SCS will also consider for enrollment in the program:

(1) Farmed wetlands and adjoining lands with substantial wetland functions that are enrolled in the Conservation Reserve Program (CRP) administered under 7 CFR Part 1410 and were severely damaged by the 1993 Midwest floods;

(2) Other lands that would not otherwise be eligible if it is determined that inclusion in the program would promote the wetland values of the land.

The SCS State Conservationist will determine (1) the estimated costs of restoring the affected cropland to productive capacity and the estimated costs of repairing any associated levee, dike or other floodwater control systems; and (2) the fair market value (FMV) of the affected cropland based on an "as if restored" basis. If the estimated costs of the restoration and repair exceed the FMV of the affected cropland, the land will be eligible to be considered for enrollment in the EWRP. If the land is determined to be suitable for enrollment, the SCS State Conservationist will determine the FMV of the permanent easement offer that will be made. In determining the costs of cropland restoration, flood control system repair, the FMV of the affected cropland, and the FMV of the permanent easement, the SCS State Conservationist may use reasonably available information from appropriate sources to make the determinations.

Owners of lands determined to be eligible for enrollment in the EWRP and for which SCS makes an offer of enrollment may submit a bid of acceptance to the local SCS office.

To assure maximum benefits to the Federal Government, the SCS State Conservationist, in consultation with the U.S. Fish and Wildlife Service and input from a technical committee established by the State Conservationist, will establish a ranking process to determine the priority of the parcels offered for enrollment into the EWRP. The ranking process will consider floodway enhancement and environmental benefits per dollar of government expenditure for restoration and easement purchase. The State Conservationist will use the following criteria to establish a priority ranking for which enrollment in the EWRP will be offered and bids of acceptance accepted:

(1) Protection and enhancement of habitat for migratory birds and wildlife, including the contribution the restoration may make to the recovery of threatened and endangered species,

(2) Floodway expansion,

(3) Proximity to other protected wetlands,

(4) Level of wetland hydrologic conditions that could potentially be restored under the EWRP,

(5) Wetland functions and values,

(6) Likelihood of successful restoration of wetland values,

(7) Cost of restoration and easement purchases, and

(8) Other factors determined appropriate by SCS. Land behind a levee would have a lower priority than land where a levee does not exist or will be repaired.

The emergency watershed repair and wetland reserve provisions of Public Law 103–75 were passed in response to the devastating cropland losses caused by the Midwest floods of 1993. This disaster requires an immediate response to relieve flood damages. Complying with the normal comment procedures set forth in the Administrative Procedures Act would delay efforts to assist those harmed by the flood, further aggravating their losses, and would, therefore, be contrary to the public interest. Because of the urgency, SCS has determined that good cause exists to make this rule effective immediately. However, this interim rule affords the public a 30-day period following the effective date to submit written comments. SCS will consider all comments submitted in a timely manner

and will amend the rule if justified by the comments. Comments should be submitted, in writing, to the individual listed above as the information contact.

This interim/final rule is issued in conformance with Executive Order 12866. Based on information compiled by the Department, it has been determined this interim rule:

(1) Would have an annual effect on the economy of less than $100 million;

(2) Would not adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or state, local or tribal governments or communities;

(3) Would not create a serious inconsistency or otherwise interfere with an action taken or planned by another agency;

(4) Would not alter the budgetary impact of entitlements, grants, user fees, or loan programs or rights and obligations of recipients thereof; and

(5) Would not raise novel legal or policy issues arising out of legal mandates, the President's priorities, or principles set forth in Executive Order 12866.

The purpose of the EWRP is similar to that of the WRP, that is to restore certain cropland to wetlands and maintain them in wetland condition. An environmental assessment was prepared for WRP and it was determined that the program activities would not have a significant impact on the quality of the human environment. Therefore, an environmental impact statement was not needed for the WRP and, likewise, is not needed for this program. Copies of the environmental assessment for the WRP are available upon request.

This program is not subject to the provisions of Executive Order 12372 because it involves direct payments to individuals and not to State and local entities. See notice related to 7 CFR part 3015, subpart V, published at 48 FR 29115 (June 24, 1983).

The information collection requirements of the interim rule at 7 CFR part 623 have been submitted to OMB for approval under provisions of 44 U.S.C. chapter 33 in accordance with OMB emergency procedures set forth at 5 CFR 1320.18. An OMB control number will be assigned in accordance with these procedures. The public reporting burden for the information collections that would be required for compliance with these regulations is estimated to average 22 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

List of Subjects in 7 CFR Part 623

Administrative practices and procedures, Compliance procedures, Easements, Natural resources, Technical assistance, Wetlands Reserve Plan of Operations.

Interim Rule

Accordingly, Title VII of the Code of Federal Regulations is amended by adding a new part 623 to read as follows:

PART 623—EMERGENCY WETLANDS RESERVE PROGRAM

Sec.

623.1 Purpose and scope.
623.2 Definitions.
623.3 Eligible person.
623.4 Eligible land.
623.5 Ineligible land.
623.6 Transfer of lands from the CRP to the EWRP.
623.7 Terms of the easement.
623.8 Easement value.
623.9 Easement priority.
623.10 Application to participate.
623.11 Obligations of the landowner.
623.12 Payments to landowners by SCS.
623.13 Wetland Reserve Plan of Operations.
623.14 Easement modifications.
623.15 Transfer of land.
623.16 Monitoring and enforcement of easement terms and conditions.
623.17 Violations and Remedies.
623.18 Access to land.
623.19 Assignments.
623.20 Appeals.
623.21 Scheme and device.
623.22 Filing of false claims.

Authority: 16 U.S.C. 3837–3837f; Pub. L. 103–75, Chapter 1, 107 Stat. 739, 742.

§ 623.1 Purpose and scope.

(a) The regulations in this part set forth the policies, procedures, and requirements for the Emergency Wetlands Reserve Program (EWRP). Under the EWRP, SCS will make offers to purchase wetland conservation easements from persons owning croplands that were damaged by the 1993 Midwest floods if those lands have the potential for restoration to wetland conditions and if the owner voluntarily agrees to restore and maintain those conditions. The easements are to be purchased to promote the restoration and maintenance of wetland characteristics, such as hydrologic conditions of inundation or saturation of the soil and hydrophytic vegetation. The functions and values of the wetlands for wildlife habitat, water quality improvement, flood water retention, floodway enhancement, ground water recharge, open space, aesthetic values, and environmental education will thus be promoted. The wetland conservation easements will permanently prohibit use of the affected land as cropland. Additionally, the easement shall require permanent maintenance of the wetland conditions, except in the case of natural disaster.

(b) The EWRP is available only in the following States: Illinois, Iowa, Kansas, Minnesota, Missouri, Nebraska, South Dakota, and Wisconsin. Certain cropland areas within these States have been determined to have been inundated by the Midwest floods of 1993. As more fully defined and described in this part, eligible land may include farmed wetlands or prior converted wetlands (wetlands converted prior to December 23, 1985), together with adjacent lands on which the wetlands are functionally dependent so long as the likelihood of successful restoration of such land and the potential wetland values merit inclusion in the program with reasonable costs.

§ 623.2 Definitions.

The following definitions shall be applicable for the purposes of this part:

(a) *Agricultural commodity*—means any crop planted and produced by annual tilling of the soil, or on an annual basis by one trip planters, or alfalfa and other multiyear grasses and legumes in rotation as approved by the Secretary. For purposes of determining crop history, as relevant to eligibility to enroll land in the program, land shall be "considered planted to an agricultural commodity" during a crop year if, as determined by ASCS, as action of the Secretary prevented land from being planted to the commodity during the crop year.

(b) *Applicant*—means a person who submits to SCS an application to participate in the EWRP.

(c) *Commodity Credit Corporation*—a wholly owned government corporation within the U.S. Department of Agriculture.

(d) *Conservation District* (CD)—means a subdivision of a State or local government organized pursuant to applicable State law to promote soil and water conservation practices.

(e) *Conservation Reserve Program*—means the program under which long-term payments and cost-share assistance is provided to individuals to establish permanent vegetative cover on cropland that is highly erodible or environmentally sensitive.

(f) *Prior converted wetland*—means wetland that has been drained, dredged, filled, leveled, or otherwise manipulated (including any activity that results in impairing or reducing the flow, circulation, or reach of water) prior to December 23, 1985, for the purpose, or that has the effect, of

making the production of agricultural commodities possible if such production would not have been possible but for such action.

(g) *Cost-share payment*—means the payment made by SCS to assist program participants in establishing the practices required in a WRPO.

(h) *Chief*—means the Chief of the Soil Conservation Service, or the Chief's designee.

(i) *Easement*—means the real property interest acquired by SCS under this part for wetland restoration and maintenance and which is properly filed with the appropriate local or State government official.

(j) *Easement area*—means the land to which the approved wetland restoration practices and wetland conservation restrictions are to be applied.

(k) *Fair market value (FMV)*—means the price that a willing seller would accept and a willing buyer would pay in an open, informed transaction.

(l) *Farmed wetland*—means wetland that was drained, dredged, filled, or otherwise manipulated prior to December 23, 1985 to the extent that the production of agricultural commodities was made possible, but which continues to meet wetland criteria [refer to 7 CFR 12.32(a)(3) for descriptions of farmed wetlands].

(m) *Floodwater control systems*—means dikes, levees, or other similar structural measures for the protection of cropland from flooding.

(n) *FWS*—means the Fish and Wildlife Service of the United States Department of the Interior.

(o) *Local SCS office*—means the office of the Soil Conservation Service serving the county or combination of counties in which the landowner's farm or ranch is located.

(p) *Participant*—means a person(s) owning land subject to a perfected easement purchased by the Soil Conservation Service under this part.

(q) *Offer*—means the total payment SCS will make to a landowner to purchase an easement.

(r) *Permanent easement*—means an easement in perpetuity.

(s) *Substantially altered lands*—means lands which have not been and are not now wetlands but could likely develop wetland characteristics in the future, as a result of the Midwest floods of 1993.

(t) *Practice*—means the wetland and easement area development restoration measures agreed to in the WRPO to accomplish the desired program objectives.

(u) *Technical assistance*—means the assistance provided to land owners to facilitate implementation of the WRPO.

(v) *Wetland*—means land that (1) has a predominance of hydric soils; (2) is inundated or saturated by surface or groundwater at a frequency and duration sufficient to support a prevalence of hydrophytic vegetation typically adapted for life in saturated soil conditions; and (3) does support a prevalence of such vegetation under normal circumstances.

§ 623.3 Eligible person.

To be eligible to participate in the EWRP, a person must be the owner of eligible land for which enrollment is sought and must have been the owner of such land for at least the preceding 12 months prior to the time the enrollment offer is declared by SCS, as provided in this part. The person shall provide to SCS adequate proof of ownership of the land. SCS may waive the 12 month ownership requirement if:

(a) The land was acquired by will or succession as a result of the death of the previous owner; or

(b) Adequate assurances have been presented that the new owner of such land did not acquire such land for the purpose of placing it in the EWRP.

§ 623.4 Eligible land.

(a) Except as otherwise provided in this section, land is eligible for enrollment in the EWRP only if SCS determines that the land:

(1) Was inundated by the Midwest floods of 1993;

(2) If restored to productive condition, would have a fair market value that is less than the estimated costs of restoring the land to productive condition and repairing related floodwater control systems;

(3) Is likely to have its wetland value restored with minimal costs; and

(4) Is wetland farmed under natural conditions, a farmed wetland or prior converted wetland, or substantially altered lands which are cropland; or

(5) Is wetland that has been restored on the land under a CRP contract, or under a Federal or State wetland restoration program with an easement for a period of less than 30 years.

(b) To be eligible for enrollment in the EWRP, land must also:

(1) Be determined by ASCS to have been annually planted or considered planted to an agricultural commodity in at least 1 of the 5 previous crop years; or

(2) Be land under a CRP contract, in which case, the land need only to have been planted to an agricultural commodity during 2 of the 1981 through 1985 crop years.

(c) Other lands may be considered eligible if the inclusion of such lands in the EWRP easement would significantly add to the functions and values of the wetlands to be restored under this part, as determined by SCS.

(d) The criteria and procedures contained in 7 CFR part 12 will be used to identify wetlands, converted wetlands, and farmed wetlands.

§ 623.5 Ineligible land.

Notwithstanding any other provisions of this part, the following land is not eligible for enrollment in the EWRP:

(a) Land that contains either timber stands or trees established in connection with a CRP contract;

(b) Lands owned or acquired by an agency of the Federal Government;

(c) Land already subject to a deed restriction prohibiting the production of agricultural commodities or the alternation of existing wetland hydrologic conditions;

(d) Land located between the pre-flood mainstem levees and the river; or

(e) Land that was restored to wetland conditions, as required under Part 12 of this title, to mitigate the conversion of wetland to cropland use.

§ 623.6 Transfer of lands from the CRP to the EWRP.

Land that is subject to an existing CRP contract administered under 7 CFR parts 704 and 1410 may be transferred into the EWRP only if:

(a) The land and landowner(s) meet the requirements of this part; and

(b) The application for transfer into the EWRP is approved by Commodity Credit Corporation (CCC), if found to be in the interest of the program. If such transfer is requested by the owner and approved by CCC, the CRP contract for the property will be terminated or otherwise modified subject to such terms and conditions as are mutually agreed by the landowner, CCC, and SCS.

§ 623.7 Terms of the easement.

Landowners will grant to SCS an easement which shall run with the land and be in favor of SCS and its assigns or delegates. The easement shall require the land to be monitored as specified by the WRPO to promote the purposes of this part, including but not limited to maintenance of the restored wetland for entire length of the easement. Such easement shall: (a) be a permanent reserve interest easement; (b) require that the maintenance of the land be in accordance with the terms of the easement and with the terms of the WRPO and shall be the responsibility of the owners of the property and their successors of any kind, including, but not limited to, the owners' heirs and assigns; (c) grant to SCS a right of access

in favor of SCS and its delegates, assigns and successors of any kind, to the portion of the property which is subject to the provisions of the easement. Maintenance of such access shall be the responsibility of the owner and their successors of any kind; (d) reserve to SCS the right to permit such compatible uses of the easement area as may be identified in the WRPO; (e) reserve to the landowner those compatible uses identified in the WRPO that are permitted to be pursued by the landowner; (f) be signed by each person with an interest of any kind in the land covered by the easement; (g) permanently prohibit use of the easement area for cropland, except to harvest an agricultural commodity planted before the easement is perfected; and (h) require permanent maintenance of the wetland conditions, except in the case of natural disaster.

§ 623.8 Easement value.

SCS offers for easements will be based on the fair market value, as determined by the SCS State Conservationist, of the land covered by the easements. Fair market value will be based on post-flood conditions as if reclaimed. Land easement values will be determined by the State Conservationist in consultation with a technical committee. A technical committee shall included representatives of: ASCS, Extension Service, and FWS. Additionally, the State Conservationist may collect information from other sources as he deems necessary. Coordination between States will be provided by the Chief, SCS.

§ 623.9 Easement priority.

The State Conservationist, in consultation with the FWS and with input from a technical committee and other interested Federal agencies, will establish a ranking process to establish the priority of parcels offered into the EWRP. This process will rank the floodway enhancement and environmental benefits per dollar of government expenditure on restoration and easement purchase. The factors for determining the priority for selection will consider the following:

(a) Protection and enhancement of habitat for migratory birds and wildlife, including the contribution the restoration may make to the recovery of threatened and endangered species,

(b) Floodway expansion,

(c) Proximity to other protected wetlands,

(d) Level of hydrology restored,

(e) Wetland function or values,

(f) Likelihood of successful restoration of wetland values,

(g) Cost of restoration and easement purchase, and

(h) Other factors as determined appropriate by SCS.

§ 623.10 Application to participate.

(a) A person seeking to enroll land in the EWRP must apply for enrollment on an approved SCS form. The application to participate must be filed with the local SCS field office during an announced period for such submissions.

(b) A person submitting an application to participate shall not be obligated to accept an SCS offer to purchase an easement if one is forthcoming.

(c) An application to participate must be signed by all owners of the property or their duly authorized representative(s).

§ 623.11 Obligations of the landowner.

(a) All owners of land who accept an EWRP offer from SCS shall:

(1) Comply with the terms of the easement.

(2) Comply with all terms and conditions of the WRPO for the full life of the easement.

(3) Ensure that the easement granted to SCS is superior to the interest of all other parties who may have an interest in the easement area, except as authorized by SCS. Such action shall include, but not be limited to, obtaining a written statement of consent to such a superior easement from those holding a security interest or any other encumbrance or the land covered by the easement. Additionally, the landowner shall perfect the easement with superior SCS interest in accordance with State law.

(4) Agree to the permanent retirement of the aggregate total of crop acreage bases, and allotment and mandatory quota on the farm or ranch in order to maintain the base allotment on quota acres at or below the number of acres of cropland after the easement has been perfected.

(5) Not allow grazing or commercial use of the land covered by an easement except as provided for in the WRPO, or harvesting of any agricultural commodity produced on the land subject to the EWRP easement.

(6) Comply with Federal or State noxious week laws in the manner specified in the WRPO.

(7) Control other identified weed and pest species, in the manner specified in the WRPO.

(8) Be responsible for repairs, improvements, and inspections of the WRPO practices as necessary to maintain existing public drainage systems when the land is restored to the condition required by the terms of the easement, the contract, and the easement.

(9) Be permitted to control public access, in accordance with the WRPO, on the land enrolled in the program.

(10) Implement any additional provisions that are required by SCS in consultation with FWS in the contract, WRPO, or easement, in order to, as determined by SCS, facilitate the administration of the EWRP.

(11) Not alter the vegetation, except to harvest already planted crops or forage, or hydrology on such acres subsequent to perfection of the easement by the landowner, except as provided for in the easement or WRPO.

(12) Be responsible for the long-term management of the easement in accordance with the terms of the easement and related agreements including the WRPO. Owners may enter into agreements with Federal or State agencies or private organizations to assist in the management of the easement area. No SCS funds will be provided to these agencies or organizations for management expenses. Responsibility for management of the easement shall in all cases remain with the owner and the owner's successors of any kind regardless of whether arrangements are made for third-party management.

(13) Agree that each person with an interest in the land covered by an easement under EWRP shall be jointly and severally responsible for compliance with the WRPO, the easement, the provisions of this part, and for any refunds or payment adjustment which may be required for violation of any terms or conditions of the WRPO, the easement, or provisions of this part.

(14) Refrain from taking any action on the easement area unless specifically authorized in the reserve interest easement or the WRPO; and

(15) Secure any necessary local, State and Federal permits prior to commencing restoration of the designated area.

(b) In addition, program participants and their successors of any kind may:

(1) Not alter wildlife habitat and other natural land features of the enrolled land unless authorized by the WRPO.

(2) Apply pesticides or fertilizers on enrolled land or mow such land, only as provided for in the WRPO.

(3) Not engage in any activities on other land on the farm on which the easement exists that will, as determined by SCS; (i) alter the flow of surface or subsurface water into or out of the easement area except as specified in the

WRPO; or (ii) be otherwise inconsistent with the terms of the easement.

(c) The activities of any person on the property shall be considered for purposes of this section to be the actions of the program participant. However, if the SCS determines that the activities of the person were beyond the control of the program participants, SCS may adjust the remedies provided for in this part to the extent determined consistent with program goals. Obligations created by the easement shall run with the land and shall bind all persons having an interest in the property at any time whether such interest is created by death of the owner, sale, assignment, or otherwise.

§ 623.12 Payments to landowners by SCS.

(a) SCS will share the cost with landowners of rehabilitating the enrolled land in the EWRP as provided in the WRPO. The amount of the cost-share assistance shall be specified in the contract. Eligible costs for such cost-share assistance by SCS shall only include those costs which SCS determines are appropriate and shall be subject to the following restrictions:

(1) The State Conservationist will establish cost-share rates of between 75 to 100 percent of the historical cost of establishing or installing the practices specified in the WRPO; or pay the average cost of establishing the practices specified in the WRPO, based on the historical cost of establishing the practices in the State;

(2) Cost-share payments may be made only upon a determination that an approved practice or an identifiable unit of the practice has been completed in compliance with SCS approved standards and specifications; and

(3) Cost-share payments may not be made for the maintenance of the practice except as specifically permitted in writing by the State Conservationist.

(b) Notwithstanding paragraph (a)(3) of this section, cost share payments may be authorized for the replacement or restoration of practices for which cost share assistance has been previously allowed under the EWRP, but only if:

(1) Replacement or restoration of the practice is needed to meet the objectives for which the easement was established; and

(2) The failure of the original practice was due to reasons beyond the control of the participant.

(c)(1) SCS shall pay the amount agreed upon by SCS and the landowner for the purchase of the easement in a lump-sum amount after the easement is perfected in compliance with State law, except in the case of paragraph (c)(2) of this section.

(2) For all easements, SCS shall pay no more than 75 percent of the total easement price pending completion of the practices to restore the wetlands as provided under the WRPO. The remaining amount shall be paid when SCS determines the restoration is complete.

(d) After an easement is perfected, SCS will reimburse landowners for fair and reasonable expenses incurred for title searches, filing expenses, and related costs, as determined by SCS.

§ 623.13 Wetlands reserve plan of operations.

(a) After SCS has accepted the applicant for enrollment in the program, a WRPO will be developed by the landowner and SCS, in consultation with FWS.

(b) The WRPO shall:

(1) Include an aerial photo displaying the land offered for enrollment;

(2) Specify the manner in which the eligible land shall be restored, operated, and maintained to accomplish the goal of the program, including, but not limited to: (i) measures to control noxious weeds and insect pests in order to comply with applicable Federal, or State noxious weed and pest control laws; and (ii) measures to control other specified species of weeds, insects or pests;

(3) Specify compatible land uses for personal enjoyment for which the landowner may be compensated. These compatible land uses shall be reserved to the landowner in the easement. Such uses may include, among others: (1) recreational use, hunting and fishing; (ii) manage timber production including harvesting; and (iii) managed haying or grazing consistent with the goals of the program;

(4) Set out cost estimates of the practices required by the WRPO, the offer for the easement, and other reimbursement costs;

(5) Identify access routes to be maintained for wetland restoration activities and future management and easement monitoring in connection with the land to be enrolled;

(6) Make provisions deemed necessary for maintaining public drainage systems if present on lands subject to the WRPO;

(7) Contain scheduled implementation dates for restoration practices;

(8) Contain other provisions or limitations as SCS, in consultation with the FWS, determines to be necessary.

(c) SCS in consultation with FWS will collect from State or Federal agencies whatever additional information is deemed necessary for the development of the WRPO with the landowner.

(d) The WRPO must be signed by SCS, FWS, Conservation District (CD), and the landowner(s). However, if agreement between SCS and FWS, or CD at the local level is not reached within 20 calendar days, the WRPO shall be developed by the State Conservationist of SCS in consultation with FWS or CD.

(e) The WRPO may require that a temporary vegetative or water cover be established on the property if immediate establishment of a permanent cover is not practicable or otherwise desirable.

(f) The terms of an approved WRPO shall not relieve the program participant of any obligation or term imposed or provided for in the contract, the easement, or this part.

(g) WRPO, where appropriate, will provide for the development of a tree planting plan with the assistance of the FS or State forestry agency.

(h) The WRPO, where appropriate, will provide for the development by SCS of detailed plans for weed control, structural measures and their operation, vegetation establishment and management, and other measures as needed.

(i) Revisions of the WRPO to enhance or protect the value for which the easement was established may be made at any time at the request of either SCS, FWS, the owner and upon the concurrence of all three parties.

§ 623.14 Easement modifications.

After the easement has been perfected, no change will be made in the easement without a written request by the participant and the written consent of the Chief. Approval may be granted to achieve the goals of EWRP or facilitate the practical administration and management of the easement area or the program and the approval will not adversely affect the functions and values for which the easement was established. A modified easement shall be perfected in accordance with State law and SCS superior interest shall be reserved by the landowner in accordance with §§ 623.7 and 623.11(a)(3).

§ 623.15 Transfer of land.

(a) If a new owner purchases or obtains the right and interest in, or right to occupancy of, the land subject to a EWRP easement, such new owner shall be subject to the terms and conditions of the easement. The participant who is the signatory to the easement shall be entitled to receive all remaining payments, if any, for the purchase of the easement. Eligible cost-share payments shall be made to the participants. with respect to costs actually incurred.

(b) Upon the transfer of the property subject to an EWRP easement, any remaining cost-share payments shall be paid to the new owner or purchaser only if the new owner or purchaser becomes a party to the WRPO within 60 days of the perfection of the deed transferring title to the new owner. Such payments shall be paid in the manner agreed to by the participant and the buyer. The new owner or purchaser shall be responsible for assuring completion of all measures and practices required by the contract and the WRPO.

(c) Any transfer of the property prior to the perfection of the easement shall void any SCS offer or WRPO unless the new owner agrees to accept the offer within 60 days of the perfection of the deed transferring the land to the new owner.

§ 623.16 Monitoring and enforcement of easement terms and conditions.

(a) SCS or its representative shall be permitted to inspect each easement area at any and all times determined necessary by SCS to ensure that:

(1) Structural and vegetative restoration work are properly maintained;

(2) The wetlands and adjacent upland habitat of the easement area is being managed as required in the WRPO and the terms of the easement; and

(3) Uses of the area are consistent with the terms and conditions of the easement and the WRPO.

(b) If an owner or other interested party is unwilling to voluntarily correct, in a timely manner, deficiencies in compliance with the terms of the WRPO, the EWRP easement, or any related agreements, SCS may at the expense of any person who is subject to the EWRP easement correct such deficiency. Such SCS action shall be in addition to other remedies available to SCS.

(c) Monitoring and enforcement responsibilities may be delegated by SCS at any time to other Federal or State agencies. Landowners may transfer management responsibilities only to Federal, State, or local agencies or private organizations that have been approved by SCS in advance as having the appropriate authority, expertise, and resources necessary to carry out such delegated responsibilities.

§ 623.17 Violations and remedies.

(a) If a violation of the terms and conditions of the contract, the WRPO, or the recorded EWRP easement occurs, the easement shall remain in force and SCS may:

(1) Require the owner to fully restore the easement area to fulfill the terms and conditions of the easement and WRPO; and

(2) Require the owner, who received payments from SCS for any purpose under this part, to refund all or part of such payments received together with interest, as determined appropriate by SCS.

(b) If an owner fails to carry out the terms and conditions of an easement, appropriate legal action may be initiated. The owner of the property shall reimburse SCS for all costs incurred including, but not limited to, legal fees.

§ 623.18 Access to land.

In order to determine eligibility and compliance with respect to this part, representatives of the Department, or designee thereof, shall have the right of access to:

(a) Land which is the subject of an application made in accordance with this part,

(b) Land which is subject to an easement made in accordance with this part, and

(c) Records of the participant showing status of all ownership interest in lands subject to this part.

§ 623.19 Assignments.

Any participant entitled to any cash payment under this program may assign the right to receive such cash payments, in whole or in part.

§ 623.20 Appeals.

(a) A participant in the EWRP may obtain a review of any administrative determination concerning land eligibility, development of a WRPO, or any adverse determination under this part in accordance with the administrative appeal regulations provided in part 614 of this title.

(b) Before a person may seek judicial review of any action taken under this part, the person must exhaust all administrative appeal procedures set forth in paragraph (a) of this section, and for purposes of judicial review, no decision shall be a final agency action except a decision of the Chief of SCS under these procedures. No adverse action will be taken against a participant under this part until the administrative appeals have been exhausted.

§ 623.21 Scheme and device.

(a) If it is determined by SCS that a landowner has employed a scheme or device to defeat the purposes of this part, any part of any program payment otherwise due or paid such landowner during the applicable period may be withheld or be required to be refunded with interest thereon, as determined appropriate by SCS, and the contract with the landowner may be terminated. In such a case, SCS may also continue to hold the easement interest acquired under this part.

(b) A scheme or device includes, but is not limited to, coercion, fraud, misrepresentation, depriving any other person of payments for cost-share practices or easements for the purpose of obtaining a payment to which a person would otherwise not be entitled.

(c) An owner of land subject to this part who succeeds to the responsibilities under this part shall report in writing to SCS any interest of any kind in the land subject to this part that is retained by a previous participant. Such interest includes a present, future or conditional interest, reversionary interest or any option, future or present, with respect to such land and any interest of any lender in such land where the lender has, will, or can obtain, a right of occupancy to such land or an interest in the equity in such land other than an interest in the appreciation in the value of such land occurring after the loan was made. A failure of full disclosure will be considered a scheme or device under this section.

§ 623.22 Filing of false claims.

If it is determined by SCS that any participant has knowingly supplied false information or has knowingly filed a false claim, such participant shall be ineligible for any payment under this part. False information or false claims include claims for payment for practices which do not meet the specifications of the applicable WRPO. Any amounts paid under these circumstances shall be refunded, together with interest as determined by SCS, and any amounts otherwise due such participant shall be withheld.

Signed this 19th day of November, 1993, in Washington, DC.

James R. Lyons,

Assistant Secretary for Natural Resources and Environment.

BILLING CODE 4017–50–M

Agricultural Marketing Service

7 CFR Part 1160

[DA–92–29–B]

RIN 0581–AA44

Fluid Milk Promotion Program; Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This rule establishes an order implementing a national program for fluid milk promotion and consumer education. The program will be funded by a mandatory assessment on fluid milk products processed and marketed commercially in consumer-type packages by fluid milk processors in the 48 contiguous States. The order is authorized by the Fluid Milk Promotion Act of 1990, as amended by the Fluid Milk Promotion Act Amendments of 1993.

The order was approved by at least 50 percent of the fluid milk processors voting in the referendum, held October 12–21, 1993, and by fluid milk processors voting in the referendum that marketed 60 percent or more of the volume of fluid milk products marketed in the United States by all processors of fluid milk during the representative period of May 1993.

EFFECTIVE DATE: December 10, 1993.

FOR FURTHER INFORMATION CONTACT: Bonnie O. Tanner, Head, Promotion and Research Staff, room 2734, South Building, P.O. Box 96456, Washington, DC 20090–6456, (202) 720–6909.

SUPPLEMENTARY INFORMATION: Prior documents in this proceeding:

Invitation to Submit Comments and Notice of Public Meeting: Issued April 16, 1993; published April 21, 1993 (58 FR 21512).

Proposed Rule and Notice of Referendum: Issued August 30, 1993; published September 3, 1993 (58 FR 46877).

Final rule; Procedure for Conduct of Referenda and Rules of Practice Governing Proceedings on Petitions to Modify or to be Exempted from an Order; Issued August 30, 1993; published September 3, 1993 (58 FR 46761).

This final order is authorized under the Fluid Milk Promotion Act of 1990 (Title XIX, subtitle H, of the Food, Agriculture, Conservation, and Trade Act of 1990); (Pub. L. 101–624), which was enacted on November 28, 1990, and amended on August 11, 1993 (Pub. L. 103–72), hereinafter referred to as the Act.

We are issuing this rule in conformance with Executive Order 12866.

This final rule has been reviewed under Executive Order 12778, Civil Justice Reform. This action is not intended to have a retroactive effect. This final rule will not preempt any state or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule.

The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 1999K of the Act, any person subject to a fluid milk promotion order may file with the Secretary a petition stating that the order, any provisions of the order, or any obligation imposed in connection with the order is not in accordance with the law and requesting a modification of the order or to be exempted from the order. A person subject to an order is afforded the opportunity for a hearing on the petition. After a hearing the Secretary would rule on the petition. The Act provides that the district court of the United States in any district in which the person is an inhabitant, or has his principal place of business, has jurisdiction to review the Secretary's ruling on the petition, provided a complaint is filed not later than 20 days after the date of the entry of the ruling.

Regulatory Flexibility Act

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this final rule on small entities.

The most current information available indicates that there currently are about 620 fluid milk processors in the 48 contiguous States. This final rule exempts about 40 percent of these processors on the basis that they process and distribute no more than 500,000 pounds of fluid milk products per month. Small businesses in the fluid milk processing industry have been defined by the Small Business Administration (13 CFR 121.601) as those employing fewer than 500 employees. Under the fluid milk promotion order, most of the fluid milk processors who would be subject to the provisions of the order would be classified as small entities.

The promotion order requires each fluid milk processor who processes and markets commercially over 500,000 pounds of fluid milk products per month to remit 20 cents per hundredweight of such products. Initially, such collections will occur only for six months during the first 30 months the order is effective, and total about $55 million. Because the 20-cent rate amounts to less than 2 percent of the per hundredweight cost of raw milk to affected processors, the economic impact of the assessment will not be significant.

While this final rule imposes certain recordkeeping requirements on fluid milk processors, any information required under this rule would be readily available from records currently maintained by all processors. Thus, any increased recordkeeping resulting from this rule would be insignificant.

Based on the above, the Administrator of AMS has determined that the issuance of this final rule will not have a significant economic effect on a substantial number of small entities.

Paperwork Reduction

In accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35), the forms and reporting and recordkeeping requirements that are included in this final rule have been approved by the Office of Management and Budget (OMB) and were assigned OMB No. 0581–0093, except for Board member nominee information sheets that were previously assigned OMB No. 0505–0001. This action sets forth the provisions of the final order which establishes a national program for fluid milk promotion to be funded by fluid milk processors. Information collection requirements in these regulations include:

(1) A periodic report by each fluid milk processor. The estimated maximum number of respondents who are subject to monthly reporting requirements is 365. They would submit one report for each of the second through seventh months of the first 30 months of the program, and then report monthly if the program is continued. Since fluid milk processors who process and distribute not more than 500,000 pounds of fluid milk products per month are exempted from the order, an estimated additional 255 exempt processors would submit only one response for each fiscal period (no more frequently than once per year). The estimated average reporting burden is 30 minutes per response.

(2) A nominee background statement form for Board member nominees. The estimated number of respondents for this form is 60 during the first year of the program and approximately 20 annually thereafter. Each respondent would submit one response per year, with an estimated average reporting burden of 60 minutes per response.

(3) A requirement to maintain records sufficient to verify reports submitted under the order. The estimated maximum number of recordkeepers necessary to comply with this requirement is 620, each of whom will have an estimated average annual burden of 6 hours.

It should be noted that under the law the promotion program expires at the end of 1996.

Background

The Act authorizes the Secretary of Agriculture (Secretary) to establish a

national fluid milk promotion program. This program will be funded by an assessment on fluid milk processors. Milk processors who process and market over 500,000 pounds of milk per month will be required to remit 20 cents per hundredweight.

The Act provided for the submission of a proposal to establish a fluid milk promotion order by processors marketing at least 30 percent of the volume of fluid milk products marketed by all processors within the 48 contiguous states. The Secretary published the proposed order on April 21, 1993, and a public meeting was held April 29, 1993, to provide an opportunity for interested persons to question proponents regarding the proposal. In addition, written comments were invited, to be submitted no later than May 21, 1993.

A proposed rule and notice of referendum was issued on August 30, 1993, and published on September 3, 1993 (58 FR 46877), summarizing and responding to the comments received, and containing the provisions of the proposed rule on which fluid milk processors were to vote. At the same time, a final rule setting forth the procedure for conduct of referenda and rules of practice governing proceedings on petitions to modify or to be exempted from an order also was issued and published.

Additional Findings

Pursuant to 5 U.S.C. 553, it is hereby found and determined that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register**. It will require a significant amount of time for the National Fluid Milk Processor Promotion Board to be nominated, selected, and begin to function. Proponents of the program have requested that it become operational as soon as possible so that educational and promotional activities can be in place as soon as possible. Therefore, to assure the timely implementation of this Order, this final rule shall be effective on December 10, 1993.

List of Subjects in 7 CFR Part 1160

Milk, Fluid milk products, Promotion.

For the reasons set forth in the preamble, title 7 of the Code of Federal Regulations is hereby amended by adding part 1160 to read as follows:

Subpart—Fluid Milk Promotion Order

Definitions

§ 1160.101 Act.

Act means the Fluid Milk Promotion Act of 1990, Subtitle H of Title XIX of the Food, Agriculture, Conservation, and Trade Act of 1990, Public Law 101–624, 7 U.S.C. 6401–6417, and any amendments thereto.

§ 1160.102 Department.

Department means the United States Department of Agriculture.

§ 1160.103 Secretary.

Secretary means the Secretary of Agriculture of the United States or any officer or employee of the Department to whom authority has heretofore been delegated, or to whom authority may hereafter be delegated, to act in the Secretary's stead.

§ 1160.104 United States.

United States means the 48 contiguous states in the continental United States and the District of Columbia, except that United States means the 50 states of the United States of America and the District of Columbia under the following provisions: the petition and review under section 1999K of the Act, enforcement under section 1999L of the Act, and investigations and power to subpoena under section 1999M of the Act.

§ 1160.105 Board.

Board means the National Processor Advertising and Promotion Board established pursuant to 7 U.S.C. 6407(b)(1) and this subpart (hereinafter known as the National Fluid Milk Processor Promotion Board or Board).

§ 1160.106 Person.

Person means any individual, group of individuals, partnership, corporation, association, cooperative or other entity.

§ 1160.107 Fluid milk product.

(a) *Fluid milk product* means any of the following products in fluid or frozen form: milk, skim milk, lowfat milk, milk drinks, buttermilk, filled milk, and milkshake and ice milk mixes containing less than 20 percent total solids, including any such products that are flavored, cultured, modified with added nonfat milk solids, concentrated (if in a consumer-type package), or reconstituted.

(b) *Fluid milk product* does not include evaporated or condensed milk (plain or sweetened), evaporated or condensed skim milk (plain or sweetened), formulas specifically prepared for infant feeding or dietary use that are packaged in hermetically sealed glass or all-metal containers, any product that contains by weight less than 6.5 percent milk solids, and whey.

§ 1160.108 Fluid milk processor.

(a) *Fluid milk processor* means any person who processes and markets

commercially fluid milk products in consumer-type packages in the United States, except that the term fluid milk processor shall not include in each of the respective fiscal periods those persons who process and market not more than 500,000 pounds of such fluid milk products during the representative month set forth below:

(1) For the first fiscal period, the representative month shall be May 1993;

(2) For the second fiscal period, the representative month shall be the month that the Secretary uses as the representative month in the conduct of the continuation referendum; and

(3) For each additional fiscal period, the representative month shall be the first month of the fiscal period.

(b) Any person who did not qualify as a fluid milk processor for a fiscal period because of the 500,000-pound limitation shall not later qualify as a fluid milk processor during that fiscal period even though the monthly volume limitation is later exceeded during that period.

(c) Any person who qualified as a fluid milk processor for a fiscal period and whose monthly marketings of fluid milk products later become 500,000 pounds or less shall no longer qualify as a fluid milk processor during that fiscal period beginning with the month in which the marketings first dropped below the volume limitation.

(d) For the purpose of determining qualification as a fluid milk processor, each processor of fluid milk products shall report for the representative month of each fiscal period the hundredweight of fluid milk products processed and marketed by the processor.

§ 1160.109 Milk.

Milk means any class of cow's milk produced in the United States.

§ 1160.110 Class I price.

Class I price is the price that is established for Class I milk in each marketing area under milk marketing orders authorized by the Agricultural Marketing Agreement Act of 1937, as amended, 7 U.S.C. 601–674.

§ 1160.111 Promotion.

Promotion means the following activities:

(a) *Consumer Education*, which means any program utilizing public relations, advertising or other means devoted to educating consumers about the desirable characteristics of fluid milk products and directed toward increasing the general demand for fluid milk products.

(b) *Advertising*, which means any advertising or promotion program involving only fluid milk products and directed toward educating consumers about the positive attributes of fluid milk and increasing the general demand for fluid milk products.

§ 1160.112 Research.

(a) *Research* means market research limited to the support of promotion and consumer education efforts.

(b) *Research* does not include research directed to product characteristics such as nutrients; product development including new products; improved technology in production, manufacturing or processing; or any other efforts not directly applicable to measuring or increasing the effectiveness of promotion and consumer education activities in expanding sales of fluid milk products.

§ 1160.113 Fiscal period.

Fiscal period means prior to a continuation referendum, the initial period of up to 30 months that this subpart is effective. Thereafter, the fiscal period shall be such annual period as the Board may determine, except that the Board may provide for a lesser or greater period as it may find appropriate for the period immediately after the initial fiscal period to assure continuity of fiscal periods until the beginning of the first annual fiscal period.

§ 1160.114 Eligible organization.

Eligible organization means an organization eligible to nominate members of the Board and which meets the following criteria:

(a) Is a nonprofit organization pursuant to section 501(c) (3), (5), or (6) of the Internal Revenue Code (26 U.S.C. 501(c) (3), (5), or (6));

(b) Is governed by a board comprised of a majority of fluid milk processors; and

(c) Represents fluid milk processors on a national basis whose members process more than 50 percent of the fluid milk products processed and marketed within the United States.

§ 1160.115 Milk marketing area.

Milk marketing area means each area within which milk being marketed is subject to a milk marketing order issued pursuant to the Agricultural Marketing Agreement Act of 1937, as amended, 7 U.S.C. 601–674, or applicable state laws.

§ 1160.116 Initial referendum.

Initial referendum means the referendum among fluid milk processors that the Secretary conducted prior to the effective date of this subpart.

§ 1160.117 Continuation referendum.

Continuation referendum means that referendum among fluid milk processors that the Secretary shall conduct as provided in § 1160.501.

National Fluid Milk Processor Promotion Board

§ 1160.200 Establishment and membership.

(a) There is hereby established a National Fluid Milk Processor Promotion Board of 20 members, 15 of whom shall represent geographic regions and five of whom shall be at-large members of the Board. To the extent practicable, members representing geographic regions shall represent fluid milk processing operations of differing sizes. No fluid milk processor shall be represented on the Board by more than one member. The at-large members shall include at least three fluid milk processors and at least one member from the general public. Except for the member or members from the general public, nominees appointed to the Board must be active owners or employees of a fluid milk processor. The failure of such a member to own or work for the fluid milk processor with whom the member was associated at the time of his or her appointment to the Board shall disqualify that member for membership on the Board for the remainder of that term.

(b) In selecting the 15 Board members who represent geographic regions, one member shall be selected from each of the following regions:

Region 1. Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont.
Region 2. New York and New Jersey.
Region 3. Delaware, Maryland, Pennsylvania, Virginia, and the District of Columbia.
Region 4. Georgia, North Carolina and South Carolina.
Region 5. Florida.
Region 6. Ohio and West Virginia.
Region 7. Michigan, Minnesota, North Dakota, South Dakota and Wisconsin.
Region 8. Illinois and Indiana.
Region 9. Alabama, Kentucky, Louisiana, Mississippi and Tennessee.
Region 10. Texas.
Region 11. Arkansas, Iowa, Kansas, Missouri, Nebraska and Oklahoma.
Region 12. Arizona, Colorado, New Mexico, Nevada, and Utah.
Region 13. Idaho, Montana, Oregon, Washington and Wyoming.
Region 14. Northern California which shall be composed of the Northern California Marketing Area and the South Valley Marketing Area as defined by the Stabilization and Marketing Plan, as amended, issued by the California Department of Food and Agriculture pursuant to the provisions of Chapter 2,

Part 3, Division 21, of the California Food and Agriculture Code, effective February 3, 1992.

Region 15. Southern California which shall be composed of the Southern California Marketing Area as defined by the Stabilization and Marketing Plan, as amended, issued by the California Department of Food and Agriculture pursuant to the provisions of Chapter 2, Part 3, Division 21, of the California Food and Agriculture Code, effective February 3, 1992.

§ 1160.201 Term of office.

(a) The members of the Board shall serve for terms of three years, except that the members appointed to the initial Board shall serve proportionately, for terms of one year, two years, and three years, as determined by the Secretary. The terms of all Board members shall expire upon the suspension or termination of the order except as provided in § 1160.502.

(b) No member shall serve more than two consecutive terms, except that any member who is appointed to serve for an initial term of one or two years shall be eligible to be reappointed for a 3-year term.

§ 1160.202 Nominations.

Nominations for members of the Board shall be made in the following manner:

(a) The Secretary shall solicit nominations for the initial Board from individual fluid milk processors and other interested parties, including eligible organizations. Fluid milk processors and other interested parties may submit nominations for positions on the Board for regions in which they are located or market fluid milk, and for at-large members. Eligible organizations may submit a slate of nominees for seats in all regions and for at-large members.

(b) After the appointment of the initial Board, the Secretary shall announce at least 180 days in advance of the expiration of members' terms that such terms are expiring, and shall solicit nominations for such positions in the manner described in paragraph (a) of this section. Nominations for such positions should be submitted to the Secretary not less than 120 days prior to the expiration of members' terms.

§ 1160.203 Nominee's agreement to serve.

Each nominee for Board membership must file with the Secretary at the time of nomination a written agreement to serve on the Board if appointed.

§ 1160.204 Appointment.

From the nominations made pursuant to § 1160.202, the Secretary shall appoint the members of the Board on the basis of representation provided for in §§ 1160.200 and 1160.201.

§ 1160.205 Vacancies.

To fill any vacancy occasioned by the death, removal, resignation, or disqualification of any member of the Board, the Secretary shall appoint a successor from the most recent list of nominations made by individual fluid milk processors and other interested parties, including eligible organizations, for the Board, or from nominations made by the Board.

§ 1160.206 Procedure.

(a) A majority of the members shall constitute a quorum at a properly convened meeting of the Board. Any action of the Board shall require the concurring votes of at least a majority of those present and voting. The Board shall establish rules concerning timely notice of meetings.

(b) The Board may take action upon the concurring votes of a majority of members by mail, telephone, telegraph, or other means of electronic communication when, in the opinion of the chairperson of the Board, such action must be taken before a meeting can be called. Action taken by this emergency procedure is valid only if all members are notified and provided the opportunity to vote and any telephone vote is confirmed promptly in writing. Any action so taken shall have the same force and effect as though such action had been taken at a properly convened meeting of the Board.

§ 1160.207 Compensation and reimbursement.

The members of the Board and trustees, if any, named under § 1160.502, shall serve without compensation but shall be reimbursed for necessary and reasonable expenses incurred by them in the performance of their duties under this subpart.

§ 1160.208 Powers of the Board.

The Board shall have the following powers:

(a) To receive and evaluate, or on its own initiative develop, and budget for plans or projects to educate consumers and promote the use of fluid milk products and to make recommendations to the Secretary regarding such proposals;

(b) To administer the provisions of this subpart in accordance with its terms and provisions;

(c) To make rules and regulations to effectuate the terms and provisions of this subpart;

(d) To receive, investigate, and report to the Secretary complaints of violations of the provisions of this subpart;

(e) To employ such persons as the Board deems necessary and determine the duties and compensation of such persons;

(f) To contract with eligible organizations or other persons to conduct activities authorized pursuant to this subpart;

(g) To select committees and subcommittees of the Board members, to adopt bylaws, and to adopt such rules for the conduct of its business as it may deem advisable;

(h) To recommend to the Secretary amendments to this subpart; and

(i) With the approval of the Secretary, to invest, pending disbursement pursuant to a plan or project, funds collected through assessments authorized under § 1160.211 in, and only in, obligations of the United States or any agency thereof, in general obligations of any State or any political subdivision thereof, in any interest-bearing account or certificate of deposit of a bank that is a member of the Federal Reserve System, or in obligations fully guaranteed as to principal and interest by the United States.

§ 1160.209 Duties of the Board.

The Board shall have the following duties:

(a) To meet not less than annually, and to organize and select from among its members a chairperson, who may serve for a term of one year and not more than two consecutive terms, and to select such other officers as may be necessary;

(b) To prepare and submit to the Secretary for approval a budget for each fiscal period of the anticipated expenses and disbursements in the administration of this subpart, including a description of and the probable costs of consumer education, promotion and research projects. However, for the initial fiscal period, the budget shall be such sum as may be collected from assessments paid during that period;

(c) To develop and submit to the Secretary for approval promotion and consumer education, and research plans or projects;

(d) To the extent practicable, carry out consumer education and promotion programs under § 1160.301 in such a manner as to ensure that advertising coverage in each of the regions defined in § 1160.200 is proportionate to funds collected from each such region;

(e) To disseminate information to fluid milk processors or eligible organizations;

(f) To maintain minutes, books and records that accurately reflect all of the acts and transactions of the Board, which shall be available to the Secretary

for inspection and audit, and prepare and promptly report minutes of each Board meeting to the Secretary and submit such reports from time to time to the Secretary as the Secretary may prescribe, and to account with respect to the receipt and disbursement of all funds entrusted to it;

(g) To enter into contracts or agreements, with the approval of the Secretary, with such persons and organizations as the Board may approve for the development and conduct of activities authorized under this subpart and for the payment of the cost thereof with funds collected through assessments pursuant to § 1160.211 and income from such assessments. Any such contract or agreement shall provide that:

(1) The contractors shall develop and submit to the Board a plan or project together with a budget(s) showing the estimated cost of such plan or project;

(2) Any such plan or project shall be adopted upon approval of the Secretary; and

(3) The contracting party shall keep accurate records of all of its transactions and make periodic reports to the Board of all activities conducted pursuant to the contract or agreement, and provide accounts of all funds received and expended, and such other reports as the Secretary or the Board may require. The Secretary or employees of the Board periodically may audit the records of the contracting parties;

(h) For the initial fiscal period, the Board shall contract, to the extent practicable and subject to the approval of the Secretary, with an eligible organization to carry out the provisions of this subpart;

(i) To prepare and make public, at least annually, a report of its activities and an accounting for funds received and expended;

(j) To have an audit of its financial statements conducted by a certified public accountant in accordance with generally accepted auditing standards, at the end of the first 15 months of the initial fiscal period, at the end of the initial fiscal period, and at least once each fiscal period thereafter as well as at such other times as the Secretary may request, and to submit a copy of each such audit report to the Secretary;

(k) To give the Secretary the same notice of meetings of the Board and committees of the Board, including actions conducted under § 1160.206(b), as is given to such Board or committee members in order that the Secretary, or a representative of the Secretary, may attend such meetings;

(l) To submit to the Secretary such information pursuant to this subpart as may be requested;

(m) The Board shall take reasonable steps to coordinate the collection of assessments, and promotion, education, and research activities of the Board, with the National Dairy Promotion and Research Board established under section 113(b) of the Dairy Production Stabilization Act of 1983 (7 U.S.C. 4504(b)); and

(n) The Board shall conduct advertising using third parties only through contracts which shall prohibit the third party from selling, offering for sale, or otherwise making available advertising time or space to private industry members conducting brand-name advertising which immediately precedes, follows, appears in juxtaposition, or appears in the midst of Board-sponsored advertising.

§ 1160.210 Expenses.

(a) The Board is authorized to incur such expenses (including provision for a reasonable reserve) as the Secretary finds are reasonable and likely to be incurred by the Board for its administration, and to enable it to exercise its powers and perform its duties in accordance with the provisions of this subpart; except that, after the Board's first year, it shall not spend on its administration more than 5 percent of the assessments collected during any fiscal period subsequent to the initial fiscal period. Such administrative expenses shall be paid from assessments collected pursuant to § 1160.211.

(b) The Board shall reimburse the Secretary for administrative costs incurred by the Department from assessments collected pursuant to § 1160.211.

(c) Within 30 days after funds are remitted from Regions 14 and 15, the Board shall provide a grant of 80% of such funds to the entity authorized by the laws of the State of California to conduct an advertising program for fluid milk products in that State for the purpose of implementing a coordinated advertising program in the markets within those regions. Such grant shall be provided with the approval of the Secretary on the following conditions:

(1) The granted funds shall be utilized to implement a fluid milk promotion campaign within the markets within those regions. Verification of the implementation of this program shall be provided to the Board.

(2) The Board shall ensure that the recipients of these funds implement a research and evaluation program to determine the effect of such program on consumption of fluid milk within the region.

(3) The recipient of these funds must provide to the Board data from the research and evaluation programs so that the Board can determine the effect of the program on consumption of fluid milk.

§ 1160.211 Assessments.

(a) (1) Each fluid milk processor shall pay to the Board or its designated agent an assessment of $.20 per hundredweight of fluid milk products processed and marketed commercially in consumer-type packages in the United States by such fluid milk processor; *Provided, however,* That for the initial fiscal period the assessment due pursuant to this section shall be paid only on fluid milk products marketed during the second through the seventh months of that fiscal period. Producer-handlers required to pay assessments under section 113(g) of the Dairy Production Stabilization Act of 1983 (7 U.S.C. 4504(g)), and not exempt under § 1160.108, shall also pay the assessment under this subpart. No assessments are required on fluid milk products exported from the United States. If the Board is not in place by the date the first assessments are to be collected, the Secretary shall have the authority to receive assessments on behalf of the Board, and shall remit such assessments to the Board when it is convened.

(2) Within 30 days after the effective date of this subpart, the Secretary shall announce the establishment of the assessment each month in the Class I price announcement in each milk marketing area by adding it to the Class I price for the following month. In the event the assessment is suspended for a given month, the Secretary shall inform all fluid milk processors of the suspension in the Class I price announcement for that month. The Secretary shall also inform fluid milk processors marketing fluid milk products in areas not subject to milk marketing orders administered by the Secretary of the establishment or suspension of the assessment.

(3) Each processor responsible for remitting an assessment shall remit it to the Board not later than the last day of the month following the month that the assessed milk was marketed.

(b) Such assessments shall not:

(1) Reduce the prices paid under the Federal milk marketing orders issued under section 8c of the Agricultural Adjustment Act (7 U.S.C. 608c), reenacted with amendments by the Agricultural Marketing Agreement Act of 1937;

(2) Otherwise be deducted from the amounts that handlers must pay to producers for fluid milk products sold to a processor; or

(3) Otherwise be deducted from the price of milk paid to a producer by a handler, as determined by the Secretary.

(c) Money remitted to the Board or the Board's designated agent shall be in the form of a negotiable instrument made payable to the Board or its agent, as the case may be. Processors must mail remittances and reports specified in §§ 1160.108, 1160.211(a)(1), 1160.213, 1160.214, and 1160.401 to the location designated by the Board or its agent.

§ 1160.212 Influencing governmental action.

No funds collected by the Board under this subpart shall in any manner be used for the purpose of influencing governmental policy or action, except to recommend to the Secretary amendments to this subpart.

§ 1160.213 . Adjustment of accounts.

Whenever the Board or the Secretary determines through an audit of a processor's reports, records, books or accounts or through some other means that additional money is due the Board or to such processor from the Board, the Board shall notify that person of the amount due or overpaid. If the processor owes money to the Board, it shall remit that amount by the next date for remitting assessments as provided in § 1160.211. If the processor has overpaid, that amount shall be credited to its account and applied against amounts due in succeeding months.

§ 1160.214 Charges and penalties.

(a) Late-payment charge. Any unpaid assessments shall be increased 1.5 percent each month beginning with the day following the date such assessments were due. Any remaining amount due, which shall include any unpaid charges previously made pursuant to this section, shall be increased at the same rate on the corresponding day of each month thereafter until paid. For the purpose of this section, any assessment determined at a date later than prescribed by this subpart because of the failure of a processor to submit a report to the Board when due shall be considered to have been payable by the date it would have been due if the report had been filed when due. The receipt of a payment by the Board will be based on the earlier of the postmark date or the actual date of receipt.

(b) Penalties. The Secretary may assess any person who violates any provision of this subpart a civil penalty of not less than $500 nor more than $5,000 for each such violation. In the case of a willful failure to pay an assessment as required by this subpart, in addition to the amount due, the Secretary may assess an additional penalty of not less than $10,000 nor more than $100,000 for each such violation. The amount of any such penalty shall accrue to the United States, which may recover such amount in a civil suit. The remedies provided in this section are in addition to, and not exclusive of, other remedies that may be available by law or in equity.

Promotion, Consumer Education and Research

§ 1160.301 Promotion, consumer education and research.

(a) The Board shall receive and evaluate, or on its own initiative develop, and submit to the Secretary for approval any plans or projects authorized in §§ 1160.208 and 1160.209. Such plans or projects shall provide for:

(1) The establishment, issuance, effectuation, and administration of consumer education, promotion and research activities with respect to fluid milk products; and

(2) The evaluation of consumer education, promotion and research activities implemented under the direction of the Board, and the communication of such evaluation to fluid milk processors and the public.

(b) The Board shall periodically review or evaluate each plan or project authorized under § 1160.301(a) to ensure that it contributes to an effective program of promotion, consumer education and research. If the Board finds that any such plan or project does not further the purposes of the Act, the Board shall terminate that plan or project.

(c) No plan or project authorized under § 1160.301(a) may employ unfair or deceptive acts or practices with respect to the quality, value or use of any competing product.

(d) No plan or project authorized under § 1160.301(a) may make use of a brand or trade name of a fluid milk product, except that this paragraph does not preclude the Board from offering program material to commercial parties to use under such terms and conditions as the Board may prescribe, subject to approval by the Secretary.

Reports, Books and Records

§ 1160.401 Reports.

Each fluid milk processor marketing milk and paying an assessment under § 1160.211 shall be required to report upon the remittance of such assessments such information as the Board or the Secretary may require. Such information shall include but not be limited to the following:

(a) The quantity of fluid milk products marketed that is subject to the collection of the assessment;

(b) The amount of assessment remitted;

(c) The reason, if necessary, why the remittance is less than the number of hundredweights of milk multiplied by 20 cents; and

(d) The date any assessment was paid.

§ 1160.402 Books and records.

Each person subject to this subpart shall maintain and make available for inspection by agents of the Board and the Secretary such books and records as are necessary to carry out the provisions of this subpart and the regulations issued hereunder, including such records as are necessary to verify any reports required. Such books and records shall be retained for at least two years beyond the fiscal period of their applicability.

§ 1160.403 Confidential treatment.

(a) All persons, including agents and former agents of the Board, all officers and employees and all former officers and employees of the Department, and all officers and all employees and all former officers and employees of contracting agencies having access to commercial or financial information obtained from such books, records or reports under the Act and this subpart shall keep such information confidential, and not make it available to Board members. Only those persons, as determined by the Secretary, who have a specific need for such information in order to effectively administer the provisions of this subpart shall have access to such information. In addition, they shall disclose only that information the Secretary deems relevant, and then only in a suit or administrative hearing brought at the discretion, or upon the request, of the Secretary, or to which the Secretary or any officer of the United States is a party, and involving this subpart. Nothing in this section, however, shall be deemed to prohibit:

(1) The issuance of general statements based upon the reports of the number of processors, individuals, groups of individuals, partnerships, corporations, associations, cooperatives, or other entities subject to this subpart or statistical data collected from such sources, which statements do not identify the information furnished by any such parties, and

(2) The publication, at the direction of the Secretary, of the name of any

processor, individuals, group of individuals, partnership, corporation, association, cooperative, or other entity that has been adjudged to have violated this subpart, together with a statement of the particular provisions of the subpart so violated.

(b) Except as otherwise provided in this subpart, information obtained under this subpart may be made available to another agency of the Federal Government for a civil or criminal law enforcement activity if the activity is authorized by law and if the head of the agency has made a written request to the Secretary specifying the particular information desired and the law enforcement activity for which the information is sought.

(c) Any person violating this section, on conviction, shall be subject to a fine of not more than $1,000 or to imprisonment for not more than 1 year, or both, and if such person is an agent of the Board or an officer or employee of the Department shall be removed from office.

(d) Nothing in this subsection authorizes the Secretary to withhold information from a duly authorized committee or subcommittee of Congress.

Miscellaneous

§ 1160.501 Continuation referenda.

(a) At the request of the Board, but not later than one month after the initial fiscal period, the Secretary shall conduct a referendum among those persons who the Secretary determines were fluid milk processors during a representative period, as determined by the Secretary, to determine whether the order should be suspended or terminated.

(b) The Secretary at any time may conduct a referendum among those persons who the Secretary determines were fluid milk processors during a representative period, as determined by the Secretary, on whether to suspend or terminate the order. The Secretary shall hold such a referendum at the request of the Board or of any group of such processors that among them marketed during a representative period, as determined by the Secretary, 10 percent or more of the volume of fluid milk products marketed in the United States by all fluid milk processors.

(c) Any suspension or termination of the order on the basis of a referendum conducted pursuant to this section must be favored:

(1) By at least 50 percent of the fluid milk processors voting in the referendum; and

(2) By fluid milk processors voting in the referendum that marketed during a representative period, as determined by the Secretary, 40 percent or more of the volume of fluid milk products marketed in the United States by all processors of fluid milk.

(d) If the Secretary determines that the suspension or termination of the order is favored in the manner set forth in § 1160.501(c), the Secretary shall take such action within 6 months of such determination.

§ 1160.502 Proceedings after suspension or termination.

(a) Upon the suspension or termination of this subpart, the Board shall recommend to the Secretary not more than five of its members to serve as trustees for the purpose of liquidating the affairs of the Board. Once the Secretary has designated such members as trustees, they shall become trustees of all the funds and property that the Board owns, possesses, or controls, including unpaid and undelivered property or any other unpaid claim existing at the time of such termination. The actions of such trustees shall be subject to approval by the Secretary.

(b) The said trustees shall:

(1) Serve as trustees until discharged by the Secretary;

(2) Carry out the obligations of the Board under any contract or agreements that it entered pursuant to §§ 1160.208 and 1160.209;

(3) Account for all receipts and disbursements and deliver to any person designated by the Secretary all property on hand, together with all books and records of the Board and the trustees; and

(4) At the request of the Secretary, execute such assignments or other instruments necessary or appropriate to vest in the Secretary's designee full title and right to all of the funds, property, and claims of the Board or the trustees.

(c) The Secretary's designee shall be subject to the same obligations with respect to funds, property or claims transferred or delivered pursuant to this subpart as the Board and the trustees.

(d) The Board, the trustees or the Secretary's designee shall deliver to the Secretary any residual funds not required to pay liquidation expenses, which funds may be used, to the extent practicable, to continue one or more of the promotion, research or nutrition education plans or projects authorized pursuant to this subpart.

§ 1160.503 Effect of suspension, termination or amendment.

Unless otherwise expressly provided by the Secretary, the suspension or termination of this subpart or of any regulation issued pursuant hereto, or the issuance of any amendment to either thereof, shall not:

(a) Affect or waive any right, duty, obligation, or liability of the Board or its trustees which shall have arisen or which may hereafter arise in connection with any provision of this subpart or any regulation issued thereunder;

(b) Release or extinguish any violation of this subpart or any regulation issued thereunder; or

(c) Affect or impair any rights or remedies of the United States, the Secretary, or any person, with respect to any such violation.

§ 1160.504 Personal liability.

No member or employee of the Board shall be held personally responsible, either individually or jointly, in any way whatsoever to any person for errors in judgment, mistakes, or other acts of either commission or omission by such member or employee, except for acts of dishonesty or willful misconduct.

§ 1160.505 Patents, copyrights, inventions and publications.

Any patents, copyrights, trademarks, inventions or publications developed through the use of funds collected under the provisions of this subpart are the property of the United States Government as represented by the Board, and shall, along with any rents, royalties, residual payments, or other income from the rental, sale, leasing, franchising, or other uses of such patents, copyrights, inventions, or publications, inure to the benefit of the Board. Section 1160.502 governs the disposition of all such property upon suspension or termination of this subpart.

§ 1160.506 Amendments.

The Secretary may from time to time amend provisions of this subpart. Any interested person or organization affected by the provisions of the Act may propose amendments to the Secretary.

§ 1160.507 Report.

The Secretary shall provide annually for an independent evaluation of the effectiveness of the fluid milk promotion program carried out under this subtitle during the previous fiscal year, in conjunction with the evaluation of the National Dairy Promotion and Research Board established under section 113(b) of the Dairy Production Stabilization Act of 1983 (7 U.S.C. 4504(b)).

§ 1160.508 Separability.

If any provision of this subpart is declared invalid or the applicability thereof to any person or any

circumstances is held invalid, such declaration or holding shall not offset the validity of the remainder of this subpart or the applicability thereof to other persons or circumstances.

Dated: November 16, 1993.

Eugene Branstool,

Assistant Secretary, Marketing and Inspection Services.

Commodity Credit Corporation

7 CFR Part 1421

RIN 0560-AD31

Price Support Loan Requirements; Farmer Owned Reserve Program Eligibility Requirements

AGENCY: Commodity Credit Corporation, USDA.

ACTION: Final rule.

SUMMARY: This final rule amends the regulations with respect to the Price Support Loan Program and the Farmer-Owned Reserve (FOR) Program which are conducted by the Commodity Credit Corporation (CCC) in accordance with section 110 of the Agricultural Act of 1949, as amended, (the 1949 Act). The interim rule, made final by this document, amended these provisions to offer producers an additional opportunity to declare their intentions for the 1992 feed grains FOR Program, and allow extensions of maturing 1990 FOR wheat loans and 1992 wheat and feed grain loans.

EFFECTIVE DATE: November 29, 1993.

FOR FURTHER INFORMATION CONTACT: Mark Overbo, Program Specialist, Cotton, Grain, and Rice Price Support Division, Agricultural Stabilization and Conservation Service (ASCS), United States Department of Agriculture (USDA), PO Box 2415, Washington, DC 20013-2415; telephone 202-720-8223.

SUPPLEMENTARY INFORMATION:

Executive Order 12866

This final rule is issued in conformance with Executive Order 12866. Based on information compiled by the Department, it has been determined that this final rule:

(1) Would have an annual effect on the economy of less than $100 million;

(2) Would not adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities;

(3) Would not create a serious inconsistency or otherwise interfere with an action taken or planned by another agency;

(4) Would not alter the budgetary impact of entitlements, grants, user fees, or loan programs or rights and obligations of recipients thereof; and

(5) Would not raise novel legal or policy issues arising out of legal mandates, the President's priorities, or principles set forth in Executive Order 12866.

Federal Assistance Program

The title and number of the Federal Assistance Program, as found in the Catalog of Federal Domestic Assistance, to which this rule applies are Commodity Loans and Purchases—10.051.

Regulatory Flexibility Act

It has been determined that the Regulatory Flexibility Act is not applicable because:

(1) This rule will not have a significant adverse impact on a substantial number of small entities since this rule liberalizes benefits and,

(2) The CCC is not required by 5 U.S.C. 553 or any other provision of law to publish a notice of proposed rulemaking with respect to the subject matter of these determinations.

Environmental Evaluation

It has been determined by an environmental evaluation that this action will have no significant impact on the quality of human environment.

Executive Order 12372

This program is not subject to the provisions of Executive Order 12372, which requires intergovernmental consultation with State and local officials. See the Notice related to 7 CFR part 3015, subpart V, at 48 FR 29115 (June 24, 1983).

Executive Order 12778

This final rule has been reviewed pursuant to Executive Order 12778. To the extent State and local laws are in conflict with these regulatory provisions, it is the intent of CCC that the terms of the regulations prevail. The provisions of this final rule are retroactive to the extent that this rule extends price support availability for loans which may have matured. Prior to any judicial action in a court of competent jurisdiction, administrative review under 7 CFR part 780 must be exhausted.

Paperwork Reduction Act

The information collections requirements for participating in the FOR Program have been approved for use by the Office of Management and Budget (OMB) through August 31, 1994, and assigned OMB No. 0560-0087. The amendments to 7 CFR part 1421 set forth in this final rule do not impose any new or revised information collection requirements to participate in FOR from those previously reviewed and approved by OMB.

Public reporting burden for these collections is estimated to average 15 minutes per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection, including suggestions for reducing the burden, to the Department of Agriculture, Clearance Officer, OIRM, AG Box 7630, Washington, DC 20250-0001; and to the Office of Management and Budget, Paperwork Reduction Project (OMB No. 0560-0087), Washington, DC 20503.

No comments were received during the comment period which ended on September 27, 1993.

Accordingly, under the authority of 7 U.S.C. 1421, 1423, 1425, 1441z, 1444f-1, 1445b-3a, 1445c-3, 1445e, and 1446f; 15 U.S.C. 714b and 714c, the interim rule amending 7 CFR part 1421 which was published at 58 FR 45039 on August 26, 1993, is adopted as a final rule without change.

Signed in Washington, DC on November 20, 1993.

Bruce R. Weber,

Acting Executive Vice President, Commodity Credit Corporation.

Peanuts

AGENCY: Commodity Credit Corporation, USDA.

ACTION: Final rule.

SUMMARY: This rule adopts without change the interim rule published in the **Federal Register** (58 FR 41625) on August 5, 1993, which amended the regulations for peanuts to increase, from $1.00 to $2.00, the maximum per net ton deduction that may be made from producer price support advances by the Southwestern Peanut Growers' Association (SWPGA) to fund activities of the association outside the price support program. The deductions are made only upon prior agreement of the

producer, and will have no effect on the amount of public outlay for the peanut program.

EFFECTIVE DATE: November 29, 1993.

FOR FURTHER INFORMATION CONTACT: David L. Kincannon, Tobacco and Peanuts Division, Agricultural Stabilization and Conservation Service, United States Department of Agriculture (USDA), P.O. Box 2415, Washington, DC 20013–2415, telephone 202–720–0152.

SUPPLEMENTARY INFORMATION:

Executive Order 12866

This final rule is issued in conformance with Executive Order 12866. Based on information compiled by the Department, it has been determined that this final rule:

(1) Would have an annual effect on the economy of less than $100 million;

(2) Would not adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities;

(3) Would not create a serious inconsistency of otherwise interfere with an action taken or planned by another agency;

(4) Would not alter the budgetary impact of entitlements, grants, user fees, or loan programs or rights and obligations of recipients thereof; and

(5) Would not raise novel legal or policy issues arising out of legal mandates, the President's priorities, or principles set forth in Executive Order 12866.

Federal Assistance Program

The title and number of the Federal assistance program, as found in the Catalog of Federal Domestic Assistance, to which this final rule applies are: Commodity Loans and Purchases—10.051.

Regulatory Flexibility Act

It has been determined that the Regulatory Flexibility Act is not applicable to this final rule since the Commodity Credit Corporation (CCC) is not required by 5 U.S.C. 553 or any other provision of law to publish a notice of proposed rulemaking with respect to the subject matter of this rule.

Executive Order 12372

This program/activity is not subject to the provisions of Executive Order 12372, which requires intergovernmental consultation with State and local officials. See the notice related to 7 CFR part 3015, subpart V, published at 48 FR 29115 (June 24, 1983).

Paperwork Reduction Act

The information collection requirements contained in the regulations at 7 CFR part 1446 for the peanut price support program were approved by the Office of Management and Budget (OMB), as required by 44 U.S.C. chapter 35, and assigned OMB control numbers 0560–0006, 0560–0014, and 0560–0033. This final rule does not change the information collection as approved by OMB. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to USDA, Clearance Officer, OIRM, AG Box 7630, Washington, DC 20250; and to the OMB Paperwork Reduction Project (OMB 0560–0006, 0560–0014, or 0560–0033), Washington, DC 20503.

Background

On August 5, 1993, an interim rule was published in the **Federal Register** (58 FR 41625) seeking public comments with respect to an increase in the maximum deduction that could be made from producer price support advances on loan peanuts by the SWPGA to fund activities outside the price support program. The maximum deduction was increased from $1 to $2 per net ton of peanuts pledged as collateral for a price support loan. A total of 177 comments were received, representing: 161 producers, a State peanut growers' association, 2 county growers' associations, a chamber of commerce, 5 peanut farm service companies, 6 respondents from 2 financial institutions, and a newspaper. The increase was opposed conditionally by 105 producers who were not satisfied with the accounting of the previously collected funds. These producers opposed the increase until a satisfactory accounting is made of previously collected funds. All remaining respondents favored the increase.

The increased deduction is a convenience to the SWPGA and its members. The amount involved is not onerous. The collection is strictly voluntary. The deduction provided for in the rules is a convenience. The funds involved are funds that are available, from the program standpoint, for unrestricted use by the producers. Absent extraordinary circumstances, the sufficiency of the association's accounting is a matter between the producers and the association alone. No such extraordinary circumstances are demonstrated by the comments. CCC does not endorse the collection of the funds. Also, CCC takes no position on how the funds should be used. There may, however, be restrictions that apply under law on the use of the funds. Those restrictions will continue to apply. Adoption of the rule as a final rule will not interfere with the accomplishment of the goals of the program. For these reasons, it has been determined that the interim rule should be adopted as a final rule.

Accordingly, under the authority of 7 U.S.C. 1359a, 1375, 1421 *et seq.*; 15 U.S.C. 714b and 714c, the interim rule amending 7 CFR part 1446 which was published at 58 FR 41625 on August 5, 1993, is adopted as a final rule without change.

Signed at Washington, DC, on November 20, 1993.

Bruce R. Weber,

Acting Executive Vice President, Commodity Credit Corporation.

7 CFR Part 1475

RIN 0560–AD49

Emergency Livestock Assistance

AGENCY: Commodity Credit Corporation, USDA.

ACTION: Interim rule.

SUMMARY: This interim rule would amend the regulations for the livestock emergency programs, which are authorized by the Agriculture Act of 1949 as amended, (the 1949 Act) and the Commodity Credit Corporation (CCC) Charter Act. This interim rule would provide a simplified method for determining total livestock feed needs. Other minor changes to update the regulations include changes in weight ranges and an appropriate amount of energy required to provide the daily maintenance needs for dairy goats; determining pasture value; applying the $50,000 payment limitation to crop year rather than calendar year; and calculating interest on refunds due CCC.

DATES: Interim rule effective November 29, 1993. Comments must be received on or before December 29, 1993 in order to be assured of consideration.

ADDRESSES: Submit comments to: Director, Emergency Operations and Livestock Programs Division, Agricultural Stabilization and Conservation Service (ASCS), United States Department of Agriculture (USDA), P.O. Box 2415, Washington, DC 20013–2415.

FOR FURTHER INFORMATION CONTACT: James C. Williams, Program Specialist, Emergency Operations and Livestock Programs Division, ASCS, USDA, P.O.

Box 2415, Washington, DC 20013–2415, telephone 202–690–1324.

SUPPLEMENTARY INFORMATION:

Executive Order 12866

This interim rule is issued in conformance with Executive Order 12866. Based on information compiled by the Department, it has been determined that this interim rule: (1) Would have an annual effect on the economy of less than $100 million; (2) would not adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities; (3) would not create a serious inconsistency or otherwise interfere with an action taken or planned by another agency; (4) would not alter the budgetary impact of entitlements, grants, user fees, or loan programs or rights and obligations of recipients thereof; and (5) would not raise novel legal or policy issues arising out of legal mandates, the President's priorities, or principles set forth in Executive Order 12866.

Regulatory Flexibility Act

It has been determined that the Regulatory Flexibility Act is not applicable to this interim rule since the CCC is not required by 5 U.S.C. 553 or any other provision of law to publish a notice of proposed rulemaking with respect to the subject matter of these determinations.

Environmental Evaluation

It has been determined by an environmental evaluation that this action will not have a significant impact on the quality of the human environment. Therefore, neither an Environmental Assessment nor an Environmental Impact Statement is needed.

Federal Assistance Program

The title and number of the Federal Assistance Program, as found in the Catalog of Federal Domestic Assistance, to which this rule applies are: Commodity Loans and Purchases—10.051.

Executive Order 12778

This interim rule has been reviewed in accordance with Executive Order 12778. The provisions of the interim rule do not preempt State laws and are not retroactive to 1992 and prior crop years. Before any judicial action may be brought regarding the provisions of this regulation, the administrative appeal provisions set forth at 7 CFR part 780 must be exhausted.

Executive Order 12372

This program/activity is not subject to the provisions of Executive Order 12372, which requires intergovernmental consultation with State and local officials. See notice related to 7 CFR part 3015, subpart V, published at 48 FR 29115 (June 24, 1983).

Paperwork Reduction Act

The amendments to 7 CFR part 1475 set forth in this interim rule will not result in any change in the public reporting burden.

Request for Comments

Comments are requested with respect to this interim rule and such comments shall be considered in developing the final rule.

Background

The regulations at 7 CFR part 1475 currently set forth the provisions which are used to administer the emergency livestock feed programs. These programs are authorized by the CCC Charter Act and the 1949 Act.

Title IV of the 1949 Act provides in part that the Secretary of Agriculture shall make one or more of certain specified programs available to eligible livestock owners if a livestock emergency exists in a State, county, or area. Over the past several years, the emergency livestock feed programs have come under increased criticism from livestock producers, Congressional staffs, as well as State and county ASCS office employees, concerning the method of computing the value of total livestock feed needs.

Previous regulations at 7 CFR 1475.6(i)(1)(i) provide the value of total livestock feed needs with respect to an owner of livestock, other than fish for food.

Presently, total livestock feed needs are computed as follows:

(1) Number of pounds of corn needed to maintain each livestock type and weight category; times

(2) Number of days in the feeding period; times

(3) A price established for corn, which is for:

(a) The preliminary computation, the posted county price (PCP) for corn, in the county, on the date LFP was approved for the county, and

(b) The final computation, the average PCP for corn, in the county, during the feeding period of each application.

The current method of recomputing the value of total livestock feed needs at the end of the feeding period has resulted in the following situations: The initial PCP, for counties that were approved for LFP early in the LFP crop year, generally were substantially higher than the average PCP during the individual producer's application feeding period, resulting in the producer's final total livestock feed needs being substantially less than the preliminary total livestock feed needs. In many cases, this substantially reduced a producer's program benefits. Some producers, who elected to take advance payments, became overpaid and were required to refund part of the program benefits computed at the beginning of the feeding period.

To more equitably provide emergency assistance, several options for computing a producer's total livestock feed needs were considered:

(1) Continue the current method,

(2) Use the corn PCP, in the county, on the day the county is approved for LFP to compute both the preliminary and final livestock feed needs,

(3) Use the previous 5-year average, dropping the high and low years of the PCP for corn, in the county, to compute both the preliminary and final livestock feed needs, and

(4) Use the same corn price established by CCC to determine normal production, feed loss, and feed available, to compute both preliminary and final livestock feed needs.

The last option was selected based on the following advantages:

(1) It would eliminate a cause of fluctuation in program benefits, over which the producer has no control;

(2) Producers will be able to more accurately predict their final benefits available based on total livestock feed needs;

(3) Producers will be able to make better educated management decisions;

(4) Fewer producers will be overpaid requiring refunds;

(5) It will be easier to explain benefits available to producers; and

(6) The price used to compute a producer's livestock feed benefits will be consistent for all producers applying in the same county.

Section 1475.3 is revised by modifying the definition for dairy cow "weight ranges" and to add a weight range for dairy goats in the table.

Section 1475.6(c) is revised to change the reference from CCC–653 to CCC–651.

Section 1475.6(e)(4) is being revised to clarify the manner in which pasture value is actually calculated for 1991 and subsequent crop years.

Section 1475.6(i)(1)(i)(A) is revised to clarify the method used to calculate total feed needs.

Section 1475.6(i)(2)(iii) is revised to correct a misprint in the **Federal Register**.

Section 1475.10(b) is revised to clarify when the emergency livestock feed program may be suspended or terminated in a contiguous county.

Section 1475.17 (a), (c), and (g) are being revised to clarify what type of interest will be charged on refunds to CCC.

Section 1475.22 is revised by changing the payment limitation from "calendar" year to "crop" year to be consistent with crop disaster payments and to simplify compliance with this statutory requirement.

List of Subjects in 7 CFR Part 1475

Animal feeds, Disaster assistance, Grant programs- agriculture, Livestock, Reporting and recordkeeping requirements.

Accordingly, 7 CFR part 1475 is amended as follows:

PART 1475—EMERGENCY LIVESTOCK ASSISTANCE

1. The authority citation for 7 CFR part 1475 continues to read as follows:

Authority: 7 U.S.C. 1427 and 1471–1471j, 15 U.S.C. 714b and 714c.

2. Section 1475.3 is amended by revising the table for the definition of "Weight ranges" to read as follows:

§ 1475.3 Definitions.

* * * * *

Weight ranges * * *.

Kind/type	Weight range	Daily energy requirement	Allowance/ day in lbs. of corn
(1) Beef cattle: Mcals			
Beef	Less than 400 ..	3.0 NE_m	3.5
Beef	400–799	5.2 NE_m	6.5
Beef	800–1099	7.0 NE_m	8.5
Beef	1100+	10.8 NE_m	12.5
Beef, cow	All	13.6 NE_m	15.7
Beef, bull	1000+	10.8 NE_m	13.0
(2) Dairy cattle:			
Dairy	Less than 400 ..	3.0 NE_m	3.5
Dairy	400–799	5.2 NE_m	6.5
Dairy	800–1099	7.0 NE_m	8.5
Dairy	1100+	10.8 NE_m	12.5
Dairy, cow	Less than 1100	20.4 NE_l	27.0
Dairy, cow	1100–1299	23.0 NE_l	31.0
Dairy, cow	1300–1499	24.5 NE_l	33.0
Dairy, cow	1500+	25.7 NE_l	34.5
Dairy, bull	1000+	12.0 NE_m	14.5
(3) Equine:			
Equine	Less than 450 ..	6.2 DE	4.4
Equine	450–649	8.9 DE	6.3
Equine	650–874	11.6 DE	8.2
Equine	875+	17.3 DE	11.6
(4) Swine: Kcals			
Swine	Less than 45	780 DE	.5
Swine	45–124	1630 DE	1.1
Swine	125+	2867 DE	1.9
Swine, sow	235+	9854 DE	6.5
Swine, boar	235+	5446 DE	3.7
(5) Sheep:			
Sheep	Less than 44	315 NE_m	.4
Sheep	44–82	718 NE_m	.9
Sheep	83+	973 NE_m	1.1
Sheep, ewe	150+	1420 NE_m	3.1
Sheep, ram	150+	1556 NE_m	1.7
(6) Goats: Mcals			
Goats	Less than 44	.70 DE_m	.5
Goats	44–82	1.59 DE_m	1.1
Goats	83+	2.16 DE_m	1.5
Goats, doe	125+	5.3 DE_m	3.5
Goats, doe, dairy 1994 and subsequent crop years	125+	7.6 DE_m	5.2
Goats, buck	125+	3.01 DE_m	2.1
(7) Poultry: Kcals			
Poultry	Less than 3.0 ...	150 ME	.1
Poultry	3.0–7.9	375 ME	.2
Poultry	8.0+	638 ME	.45

* * * * *

3. Section 1475.6 is amended by revising the section heading and paragraphs (c), (e)(4), (i)(1)(i)(A), and (i)(2)(iii) to read as follows:

§ 1475.6 Eligibility for assistance.

* * * * *

(c) A CCC–652 application worksheet and CCC–651 contract must be filed at the county ASCS office in an approved county or in a county ASCS office in a contiguous county.

* * * * *

(e) * * *

(4) For the 1991 and subsequent emergency livestock feed program crop years, the determination of a substantial

loss of production with respect to pasture, range, or other grazing land shall be computed based on the loss of current year grazing after the beginning of the livestock feed program crop year through the end of the feeding period. State ASC committees shall establish a carrying capacity for each type of grazing in the county. The normal grazing value will be based on the carrying capacity and the dollar value of the quantity of forage needed to maintain an animal unit for 1 day, as determined by DASCO.

* * * * *

(i) * * *

(1) * * *

(i) * * *

(A) The average cost of corn, as established by CCC, that is determined necessary to provide the energy requirements established for each weight class of livestock by type; times

* * * * *

(2) * * *

(iii) Dividing the sum of (i) and (ii) by 2.

* * * * *

4. Section 1475.10(b) is revised to read as follows:

§ 1475.10 Termination and suspension of program.

* * * * *

(b) Emergency livestock feed program assistance in a county contiguous to a county that requested and was determined eligible to receive livestock program assistance shall not be suspended or terminated.

5. Section 1475.17 is amended by revising paragraphs (a), (c), and (g) to read as follows:

§ 1475.17 Refunds to CCC; joint and several liability.

(a) In the event there is a failure to comply with any term, requirement, or condition for payment arising under the contract, or this part, and if any refund of a payment to CCC shall otherwise become due in connection with the contract, or this part, all payments made under this part to any person shall be refunded to CCC, together with interest as determined in accordance with paragraph (b) of this section and late-payment charges as provided for in part 1403 of this chapter.

* * * * *

(c) Interest shall be applicable to refunds required of the owner if CCC determines that payments or other assistance were provided to the owner and the owner was not eligible for such assistance. Such interest shall be charged at the rate of interest which the United States Treasury charges CCC for funds, as of the date CCC made such benefits available of the monies or benefits to be refunded. Such interest that is determined to be due CCC shall accrue from the date such benefits were made available by CCC to the date of repayment or the date interest increases in accordance with part 1403 of this chapter. CCC may waive the accrual of interest if CCC determines that the cause of the erroneous determination was not due to any action of the owner.

* * * * *

(g) In the event that the emergency livestock feed program contract was established as result of erroneous information provided by any owner to CCC, assistance available under the emergency livestock feed program contract shall be recomputed and any payments made or due under the contract shall be corrected as necessary. Any refund of payments which are determined to be required as a result of such recomputations of the contract shall be remitted with any applicable interest.

* * * * *

6. Section 1475.22 is revised to read as follows:

§ 1475.22 Benefits limitation.

The total amount of benefits that a person, as determined in accordance with part 1497 of this chapter, shall be entitled to receive under one or more of the programs established under this part, may not exceed $50,000 per livestock feed crop year for which payment is made or benefits received.

Signed at Washington, DC, on November 20, 1993.

Bruce R. Weber,

Acting Executive Vice President, Commodity Credit Corporation.

[FR Doc. 93-29070 Filed 11-26-93; 8:45 am]

BILLING CODE 3410-05-P

FARM CREDIT ADMINISTRATION

12 CFR Part 614

RIN 3052-AB46

Loan Policies and Operations

AGENCY: Farm Credit Administration.

ACTION: Final rule.

SUMMARY: The Farm Credit Administration (FCA), by the Farm Credit Administration Board (Board), adopts a final rule amending the regulation regarding the content of borrower rights notices for distressed loans. The FCA has learned that the foreclosure language requirement may unnecessarily offend borrowers. Therefore, the regulation will no longer require that Farm Credit System (System) institutions include a reference to foreclosure when notifying borrowers that their distressed loans may be suitable for restructuring.

EFFECTIVE DATE: The regulation shall become effective upon expiration of 30 days after publication in the **Federal Register** during which either or both Houses of Congress are in session. Notice of the effective date will be published in the **Federal Register**.

FOR FURTHER INFORMATION CONTACT:

Eric Howard, Policy Analyst, Office of Examination, Farm Credit Administration, McLean, VA 22102-5090, (703) 883-4498,

or

James M. Morris, Senior Attorney, Office of General Counsel, Farm Credit Administration, McLean, VA 22102-5090, (703) 883-4020, TDD (703) 883-4444.

SUPPLEMENTARY INFORMATION:

Background

The Agricultural Credit Act of 1987 (Pub. L. 100-233) enacted on January 6, 1988, amended the Farm Credit Act of 1971 (Act) to establish additional borrower rights. Final regulations on borrower rights (12 CFR parts 614, 615, and 618) were published on September 14, 1988 (54 FR 35427), and became effective on October 14, 1988. Section 614.4516 required that the lender notify a borrower that its loan is or has become a "distressed loan" as defined in the Act, and may be suitable for restructuring. On the determination that a loan is or has become distressed, the regulation also required that the lender notify the borrower that the alternative to restructuring may be foreclosure.

The FCA learned that the foreclosure language requirement could unnecessarily offend borrowers. The FCA now believes that the reference to "foreclosure" should be optional and is amending § 614.4516 to allow qualified lenders latitude in the timing of the foreclosure notification. Borrowers with distressed loans will still receive adequate warning of the possibility of foreclosure, since § 614.4519(a) requires that a qualified lender notify the borrower, not later than 45 days before commencing foreclosure proceedings, that the alternative to restructuring may be foreclosure.

Comment Received

On July 15, 1993, a proposed regulation incorporating this change was published in the **Federal Register** (58 FR 38091). One comment was received on the proposed regulation

from a State department of agriculture. The commenter requested that the FCA continue to require that institutions inform a borrower, in the initial notice that a loan is distressed, that the alternative to restructuring may be foreclosure. The commenter was concerned that some borrowers might disregard the importance of the distressed loan notice if the foreclosure language were not included. It is true that the regulations will no longer mandate that every distressed loan notice under § 614.4516 contain a reference to the possibility of foreclosure. However, the amendment will not shorten the time that must elapse after a borrower has been notified of the foreclosure option before foreclosure proceedings can be initiated. Section 614.4519(a) still requires that a qualified lender notify the borrower that the alternative to restructuring may be foreclosure at least 45 days before commencing foreclosure proceedings. Therefore, the FCA believes that existing regulations will continue to ensure that borrowers receive adequate warning of the possibility of foreclosure.

The commenter also suggested that the FCA require System institutions to include the distressed loan policy and an application for restructuring with the notice. Section 614.4516(a)(1) and (2) presently requires that a qualified lender include with the notification the lender's distressed loan policy and all materials needed in order to submit a restructuring application. The commenter also suggested that, in order to "reduce the potential for offending borrowers," the notice should detail what a borrower can do to avoid foreclosure, e.g., pay the account current within a specified period of time. Because § 614.4516 will no longer require mention of foreclosure, it is not necessary to mitigate the offensiveness of the reference to foreclosure. More importantly, although a borrower may generally have the ability to stop foreclosure by paying the account current, the options available to a borrower with a distressed loan vary from state to state and depend largely on the individual circumstances of the borrower. The borrower may, in fact, have options that are more favorable than paying the account current. Special legal expertise is needed in order to properly advise such borrowers. FCA does not believe that § 614.4516 should be amended to put the lending institution in the position of rendering legal advice to borrowers with distressed loans. Nor would such borrowers be well served by regulations that, by requiring lenders to provide certain minimal advice, give the borrowers a false sense that they have been informed of the best available options. Borrowers with distressed loans should obtain their own legal advice rather than relying on the lending institution for such advice. Therefore, the commenter's suggestions were not incorporated in the final regulation.

List of Subjects in 12 CFR Part 614

Agriculture, Banks, banking, Foreign trade, Reporting and recordkeeping requirements, Rural areas.

For the reasons stated in the preamble, part 614 of chapter VI, title 12 of the Code of Federal Regulations is amended to read as follows:

PART 614—LOAN POLICIES AND OPERATIONS

1. The authority citation for part 614 continues to read as follows:

Authority: Secs. 1.3, 1.5, 1.6, 1.7, 1.9, 1.10, 2.0, 2.2, 2.3, 2.4, 2.10, 2.12, 2.13, 2.15, 3.0, 3.1, 3.3, 3.7, 3.8, 3.10, 3.20, 3.28, 4.12, 4.12A, 4.13, 4.13B, 4.14, 4.14A, 4.14C, 4.14D, 4.14E, 4.18, 4.19, 4.36, 4.37, 5.9, 5.10, 5.17, 7.0, 7.2, 7.6, 7.7, 7.8, 7.12, 7.13, 8.0, 8.5 of the Farm Credit Act; 12 U.S.C. 2011, 2013, 2014, 2015, 2017, 2018, 2071, 2073, 2074, 2075, 2091, 2093, 2094, 2096, 2121, 2122, 2124, 2128, 2129, 2131, 2141, 2149, 2183, 2184, 2199, 2201, 2202, 2202a, 2202c, 2202d, 2202e, 2206, 2207, 2219a, 2219b, 2243, 2244, 2252, 2279a, 2279a–2, 2279b, 2279b–1, 2279b–2, 2279f, 2279f–1, 2279aa, 2279aa–5; sec. 413 of Pub. L. 100–233, 101 Stat. 1568, 1639.

Subpart N—Loan Servicing Requirements; State Agricultural Loan Mediation Programs; Right of First Refusal

2. Section 614.4516 is amended by revising the introductory text of paragraph (a) to read as follows:

§ 614.4516 Restructuring procedures.

(a) *Notice.* When a qualified lender determines that a loan is or has become a distressed loan, the lender shall provide written notice to the borrower that the loan may be suitable for restructuring. The qualified lender shall include with such notice:

* * * * *

Dated: November 18, 1993.

Curtis M. Anderson,

Secretary, Farm Credit Administration Board.

[FR Doc. 93–29139 Filed 11–26–93; 8:45 am]

BILLING CODE 6705–01–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 92–NM–245–AD; Amendment 39–8742; AD 93–23–08]

Airworthiness Directives; Corporate Jets Limited (Formerly British Aerospace) Model DH/BH/HS/BAe 125 Series Airplanes (Excluding Model BAe 125–1000A Series Airplanes), Equipped With Garrett Model TFE 731–3 Series Engines

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to certain Corporate Jets Model DH/BH/HS/BAe 125 series airplanes, that requires modification of the mounting arrangements of the battery contactors and emergency contactors in the rear equipment bay. This amendment is prompted by a report of an in-service electrical overheating incident caused by a battery short-to-ground through a battery contactor in the rear equipment bay. The actions specified by this AD are intended to prevent overheating of the battery contactors and emergency contactors, and a potential fire in the rear equipment bay.

DATES: Effective December 29, 1993.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of December 29, 1993.

ADDRESSES: The service information referenced in this AD may be obtained from Corporate Jets, Inc., 22070 Broderick Drive, Sterling, Virginia 20166. This information may be examined at the Federal Aviation Administration (FAA), Transport Airplane Directorate, Rules Docket, 1601 Lind Avenue SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: William Schroeder, Aerospace Engineer, Standardization Branch, ANM–113, FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington 98055–4056; telephone (206) 227–2148; fax (206) 227–1320.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations to include an airworthiness directive (AD) that is applicable to certain Corporate Jets

Model DH/BH/HS/BAe 125 series airplanes was published in the **Federal Register** as a supplemental notice of proposed rulemaking (NPRM) on August 11, 1993 (58 FR 42700). That action proposed to require modification of the mounting arrangements of the battery contactors and emergency contactors in the rear equipment bay.

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the single comment received.

The commenter supports the proposed rule.

After careful review of the available data, including the comment noted above, the FAA has determined that air safety and the public interest require the adoption of the rule as proposed.

The FAA estimates that 350 airplanes of U.S. registry will be affected by this AD, that it will take approximately 6 work hours per airplane to accomplish the required actions, and that the average labor rate is $55 per work hour. Required parts will cost approximately $600 per airplane. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $325,500, or $930 per airplane. This total cost figure assumes that no operator has yet accomplished the requirements of this AD.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption **ADDRESSES.**

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

93–23–08 Corporate Jets Limited (Formerly British Aerospace): Amendment 39–8742. Docket 92–NM–245–AD.

Applicability: Model DH/BH/HS/BAe 125 series airplanes, excluding Model BAe 125–1000A series airplanes; equipped with Garrett Model TFE 731–3 series engines; as listed in Corporate Jets Limited Service Bulletin SB.24–293–3501A, B, C, D, E, F, & G, Revision 2, dated March 31, 1993; certificated in any category.

Compliance: Required as indicated, unless accomplished previously. To prevent overheating of the battery contactors and emergency contactors and a potential fire in the rear equipment bay, accomplish the following:

(a) For Model BAe 125–800A series airplanes: Within 6 months after the effective date of this AD, modify the mounting arrangements of the battery contactors and emergency contactors in the rear equipment bay, Modification Number 253501, Parts A, B, F, & G, as appropriate; and prior to further flight, perform a functional test; in accordance with Corporate Jets Limited Service Bulletin SB.24–293–3501A, B, C, D, E, F, & G, Revision 2, dated March 31, 1993.

(b) For all other airplanes: Within 6 months after the effective date of this AD, modify the mounting arrangements of the battery contactors and emergency contactors in the rear equipment bay, Modification Number 253501, Parts C, D, & E, as appropriate; and prior to further flight, perform a functional test; in accordance with Corporate Jets Limited Service Bulletin SB.24–293–3501A, B, C, D, & E, Revision 1, dated February 4, 1993; or SB.24–293–3501A, B, C, D, E, F, & G, Revision 2, dated March 31, 1993.

(c) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Standardization Branch, ANM–113, FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Standardization Branch, ANM–113.

Note: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Standardization Branch, ANM–113.

(d) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

(e) The modifications and tests shall be done in accordance with Corporate Jets Limited Service Bulletin SB.24–293–3501A, B, C, D, & E, Revision 1, dated February 4, 1993; or Corporate Jets Limited Service Bulletin SB.24–293–3501A, B, C, D, E, F, & G, Revision 2, dated March 31, 1993; as applicable. (**Note:** The issue date of Service Bulletins SB.24–293–3501A, B, C, D, & E and SB.24–293–3501A, B, C, D, E, F, & G is indicated only on page 1 of each document; no other page of these documents is dated.) This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Corporate Jets, Inc., 22070 Broderick Drive, Sterling, Virginia 20166. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(f) This amendment becomes effective on December 29, 1993.

Issued in Renton, Washington, on November 17, 1993.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 93–28678 Filed 11–26–93; 8:45 am]

BILLING CODE 4910–13–P

---

14 CFR Part 39

[Docket No. 93–ANE–55; Amendment 39–8743; AD 93–16–15]

Airworthiness Directives; Teledyne Continental Motors IO–520, TSIO–520, IO–550, TSIO–550, and TSIOL–550 Series Reciprocating Engines

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule, request for comments.

SUMMARY: This document publishes in the **Federal Register** an amendment adopting Airworthiness Directive (AD) 93–16–15 that was sent previously to all known U.S. owners and operators of Teledyne Continental Motors (TCM) IO–520, TSIO–520, IO–550, TSIO–550, and TSIOL–550 series reciprocating engines by individual letters. This AD requires inspection of certain fuel pumps to determine which combination of fuel pump drive shaft and fuel pump drive coupling is installed, and replacement, if necessary, of fuel pump drive couplings that have less than the minimum required coupling

engagement with longer fuel pump drive couplings. This amendment is prompted by tests the manufacturer conducted on these components from an engine involved in a recent fatal accident. The actions specified by this AD are intended to prevent possible fuel pump drive shaft disengagement and loss of engine power.

DATES: Effective December 14, 1993, to all persons except those persons to whom it was made immediately effective by priority letter AD 93–16–15, issued on September 27, 1993, which contained the requirements of this amendment.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of December 14, 1993.

Comments for inclusion in the Rules Docket must be received on or before January 28, 1994.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), New England Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 93–ANE–55, 12 New England Executive Park, Burlington, MA 01803–5299.

The applicable service information may be obtained from Teledyne Continental Motors, P.O. Box 90, Mobile, AL 36601; telephone (205) 438–3411. This information may be examined at the FAA, New England Region, Office of the Assistant Chief Counsel, 12 New England Executive Park, Burlington, MA; or at the Office of the Federal Register, 800 North Capitol Street NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Jerry Robinette, Aerospace Engineer, Atlanta Aircraft Certification Office, FAA, Small Airplane Directorate, 1669 Phoenix Parkway, Suite 210C, Atlanta, GA 30349; telephone (404) 991–3810; fax (404) 991–3606.

SUPPLEMENTARY INFORMATION: On July 26, 1993, the Federal Aviation Administration (FAA) issued Notice of Proposed Rulemaking (NPRM) Docket No. 93–ANE–23 (58 FR 41645, August 5, 1993). That NPRM, applicable to Teledyne Continental Motors (TCM) IO–520, TSIO–520, IO–550, TSIO–550, and TSIOL–550 series reciprocating engines, proposed to require inspection of certain fuel pumps to determine which combination of fuel pump drive shaft and fuel pump drive coupling is installed, and replacement, if necessary, of fuel pump drive couplings that have less than the minimum required coupling engagement with longer fuel pump drive couplings. That inspection was required to be accomplished at the next 100 hour, annual, or progressive maintenance inspection after the effective date of that AD, whichever occurred first. That action was prompted by reports of seven incidents where the fuel pump drive shaft disengaged from the fuel pump drive coupling. That condition was caused by a fuel pump drive coupling, Part Number (P/N) 631263, that had less than the required minimum engagement with drive shaft, P/N 646176, due to the tolerance range in the fuel pump drive train. If the fuel pump drive shaft disengages in flight, engine power will be lost, and this loss of power could be critical depending on the phase of flight. That condition, if not corrected, could result in possible fuel pump drive shaft disengagement and loss of engine power.

Since the publication of that NPRM, the manufacturer conducted tests on these components from an engine involved in a recent fatal accident. In addition, the National Transportation Safety Board conducted a similar test. The results of these tests indicated that failure of the fuel pump drive coupling could have been a factor in that accident. The FAA has therefore determined that the public would be better served if the compliance time for the inspection were reduced to 30 hours time in service and that a priority letter be issued.

On September 27, 1993, the FAA issued priority letter AD 93–16–15, which requires inspection of certain fuel pumps to determine which combination of fuel pump drive shaft and fuel pump drive coupling is installed, and replacement, if necessary, of fuel pump drive couplings that have less than the minimum required coupling engagement with longer fuel pump drive couplings. The inspection must be accomplished within 30 hours TIS after the effective date of this AD.

The FAA has reviewed and approved the technical contents of TCM Mandatory Service Bulletin (MSB) No. M93–9, Revision 1, dated March 10, 1993, that describes procedures for inspecting fuel pumps to determine which combination of fuel pump drive shafts and fuel pump drive couplings is installed, and replacement, if necessary, of fuel pump drive couplings that have less than the minimum required coupling engagement with longer fuel pump drive couplings.

Since the unsafe condition described is likely to exist or develop on other engines of the same type design, the FAA issued priority letter AD 93–16–15 to prevent possible fuel pump drive shaft disengagement and loss of engine power. The AD requires inspection of certain fuel pumps to determine which combination of fuel pump drive shaft and fuel pump drive coupling is installed, and replacement, if necessary, of fuel pump drive couplings that have less than the minimum required coupling engagement with longer fuel pump drive couplings. The inspection must be accomplished within 30 hours TIS after the effective date of this AD. TCM has replaced fuel pump drive coupling, P/N 631263, with a longer fuel pump drive coupling, P/N 653359. This new fuel pump drive coupling is compatible with both of the fuel pump drive shafts, P/N 643689 and 646176, used in early and current fuel pump assemblies. The actions are required to be accomplished in accordance with the service bulletin described previously.

Since it was found that immediate corrective action was required, notice and opportunity for prior public comment thereon were impracticable and contrary to the public interest, and good cause existed to make the AD effective immediately by individual letters issued on September 27, 1993, to all known U.S. owners and operators of TCM IO–520, TSIO–520, IO–550, TSIO–550, and TSIOL–550 series reciprocating engines. These conditions still exist, and the AD is hereby published in the **Federal Register** as an amendment to § 39.13 of part 39 of the Federal Aviation Regulations (FAR) to make it effective to all persons.

Comments Invited

Although this action is in the form of a final rule that involves requirements affecting flight safety and, thus, was not preceded by notice and an opportunity for public comment, comments are invited on this rule. Interested persons are invited to comment on this rule by submitting such written data, views, or arguments as they may desire. Communications should identify the Rules Docket number and be submitted in triplicate to the address specified under the caption "**ADDRESSES.**" All communications received on or before the closing date for comments will be considered, and this rule may be amended in light of the comments received. Factual information that supports the commenter's ideas and suggestions is extremely helpful in evaluating the effectiveness of the AD action and determining whether additional rulemaking action would be needed.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the rule that might suggest a need to modify the rule. All comments submitted will be available, both before

and after the closing date for comments, in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this AD will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 93–ANE–55." The postcard will be date stamped and returned to the commenter.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The FAA has determined that this regulation is an emergency regulation that must be issued immediately to correct an unsafe condition in aircraft, and is not a "significant regulatory action" under Executive Order 12866. It has been determined further that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979). If it is determined that this emergency regulation otherwise would be significant under DOT Regulatory Policies and Procedures, a final regulatory evaluation will be prepared and placed in the Rules Docket. A copy of it, if filed, may be obtained from the Rules Docket at the location provided under the caption **ADDRESSES**.

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. app. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

93–16–15 Teledyne Continental Motors: Amendment 39–8743. Docket 93–ANE–55.

Applicability: Teledyne Continental Motors (TCM) Model IO–520B, IO–520BA, IO–520BB, IO–520C, IO–520CB, IO–520M, IO–520MB; IO–550A, IO–550B, IO–550C, IO–550G; TSIO–520B, TSIO–520BB, TSIO–520D, TSIO–520DB, TSIO–520E, TSIO–520EB, TSIO–520J, TSIO–520JB, TSIO–520K, TSIO–520KB, TSIO–520L, TSIO–520LB, TSIO–520N, TSIO–520NB, TSIO–520UB, TSIO–520VB, TSIO–520WB; TSIO–550B; and TSIOL–550A and TSIOL–550B reciprocating engines, with serial numbers lower than those listed in TCM Mandatory Service Bulletin (MSB) No. M93–9, Revision 1, dated March 10, 1993; which are equipped with the following fuel pumps: Part Numbers (P/N) 646210–1, –2, –8, –10, –11; P/N 646212–2, –5, –16, –17; P/N 646758–5, –7, –8, –9; P/N 646765–6 and –7; P/N 646766–1 and –2; 646767–1; 649368–19; or engines equipped with any fuel pump, regardless of part number that have had the fuel pump replaced in the field prior to the effective date of this AD with fuel pump drive shaft, P/N 646176, installed. These engines are installed on but not limited to the following aircraft: Beech Bonanza 35–C33A, E33A/C, F33A/C, S35, V35/A/B, A36/TC, B36TC; Beech Baron 95–C55/A, D55/A, E55/A, 58/A/P/PA/TC/TCA; Cessna 310R, T310P/Q/R, 320 D/E/F, 335 series, 340 series, 401 series, 402 series, 414 series; Cirrus VK–30; Lancaire IV; Mooney M20K with Rocket Engineering Corporation "Rocket Mooney" STC; Navion Model H; and Questair.

Compliance: Required as indicated, unless accomplished previously.

To prevent possible fuel pump drive shaft disengagement and loss of engine power, accomplish the following:

(a) Within the next 30 hours time in service after the effective date of this AD, visually inspect the fuel pump to determine which combination of fuel pump drive shaft and fuel pump drive coupling is installed, and replace, if necessary, fuel pump drive couplings that have less than the minimum required coupling engagement with longer fuel pump drive couplings, in accordance with Figure 1 of TCM MSB No. M93–9, Revision 1, dated March 10, 1993, as follows:

(1) If fuel pump drive shaft, P/N 646176, is installed with fuel pump drive coupling, P/N 631263, replace the fuel pump drive coupling with a serviceable fuel pump drive coupling, P/N 653359.

(2) If fuel pump drive shaft, P/N 643689, is installed with either fuel pump drive coupling, P/N 631263 or 653359, no further action is required.

(3) If fuel pump drive shaft, P/N 646176, is installed with fuel pump drive coupling, P/N 653359, no further action is required.

(b) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Atlanta Aircraft Certification Office. The request should be forwarded through an appropriate FAA Maintenance Inspector, who may add comments and then send it to the Manager, Atlanta Aircraft Certification Office.

Note: Information concerning the existence of approved alternative methods of compliance with this airworthiness directive, if any, may be obtained from the Atlanta Aircraft Certification Office.

(c) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

(d) The inspections, and replacement, if necessary, shall be done in accordance with the following service bulletin:

Document No.	Pages	Revision	Date
TCM MSB No. M93–9.	1–5	1	Mar. 10, 1993.

Total pages: 5.

This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Teledyne Continental Motors, P.O. Box 90, Mobile, AL 36601; telephone (205) 438–3411. Copies may be inspected at the FAA, New England Region, Office of the Assistant Chief Counsel, 12 New England Executive Park, Burlington, MA; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(e) This amendment becomes effective December 14, 1993, to all persons except those persons to whom it was made immediately effective by priority letter AD 93–16–15, issued September 27, 1993, which contained the requirements of this amendment.

Issued in Burlington, Massachusetts, on November 19, 1993.

Mark C. Fulmer,

Acting Manager, Engine and Propeller Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 93–ANE–54; Amendment 39–8744; AD 93–22–05]

Airworthiness Directives; Teledyne Continental Motors C85, C90, O–200, and O–240 Series Reciprocating Engines

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule, request for comments.

SUMMARY: This document publishes in the Federal Register an amendment adopting Airworthiness Directive (AD) 93–22–05 that was sent previously to all known U.S. owners and operators of Teledyne Continental Motors (TCM) C85, C90, O–200, and O–240 series reciprocating engines by individual letters. This AD requires an initial inspection to determine if a suspect carburetor air intake housing assembly is installed, and repetitive inspections for cracks, and replacement, if necessary, of carburetor air intake housing assemblies with serviceable assemblies. This amendment is prompted by four reports from one flight school in Scotland of engines found with cracks in the carburetor air intake housing assemblies. The actions specified by this AD are intended to prevent engine failure due to a cracked air valve in the carburetor air intake housing.

DATES: Effective December 14, 1993, to all persons except those persons to whom it was made immediately effective by priority letter AD 93–22–05, issued on November 4, 1993, which contained the requirements of this amendment.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of December 14, 1993.

Comments for inclusion in the Rules Docket must be received on or before January 28, 1994.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), New England Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 93–ANE–54, 12 New England Executive Park, Burlington, MA 01803–5299.

The applicable service information may be obtained from Teledyne Continental Motors, P.O. Box 90, Mobile, AL 36601; telephone (205) 438–3411. This information may be examined at the FAA, New England Region, Office of the Assistant Chief Counsel, 12 New England Executive Park, Burlington, MA; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Jerry Robinette, Aerospace Engineer, Atlanta Aircraft Certification Office, FAA, Small Airplane Directorate, 1669 Phoenix Parkway, Suite 210C, Atlanta, GA 30349; telephone (404) 991–3810, fax (404) 991–3606.

SUPPLEMENTARY INFORMATION: On October 4, 1993, the Federal Aviation Administration (FAA) issued priority letter AD 93–22–05, applicable to Teledyne Continental Motors (TCM) C85, C90, O–200, and O–240 series reciprocating engines, which requires an initial inspection to determine if a suspect carburetor air intake housing assembly is installed, and repetitive inspections for cracks, and replacement, if necessary, of carburetor air intake housing assemblies with serviceable assemblies. That action was prompted by four reports from one flight school in Scotland of engines found with cracks in the carburetor air intake housing assemblies. TCM conducted further investigations and found cracks in the air valve (commonly called the carburetor heat butterfly valve) and the welds in the air valve and shaft areas of carburetor air intake housing assemblies. These cracks can result in loss of engine power due to the separation of the air valve or a piece of it from the shaft, which can then block off the air flow to the carburetor. The restricted air flow results in partial or complete power loss depending on the amount of blockage. The cracks in the suspect assemblies were discovered at 122, 29, 11, and 0 hours time in service since installation on TCM O–200 series reciprocating engines; however, this condition may apply to TCM C85, C90, and O–240 series reciprocating engines. This condition, if not corrected, could result in engine failure due to a cracked air valve in the carburetor air intake housing.

Teledyne Continental Motors has determined that 102 carburetor air intake housing assemblies and 41 repair kits with parts not produced to the type design data were manufactured. These units were installed at the factory in new TCM Model O–200A engines with serial numbers 256030 through 256037. In addition, suspect carburetor air intake housing assemblies, Part Numbers (P/N) CE11141, CE11142, 639814, 639815, 641534, and repair kit assembly, P/N 641689, were sold as replacement parts after August 31, 1991, for TCM C85, C90, O–200, and O–240 series engines.

Teledyne Continental Motors has changed the P/N's for new assemblies; the PN's are as follows: P/N 653661, which supersedes P/N CE11142; P/N 653670, which supersedes P/N 639815; P/N 653675, which supersedes P/N 641534; and P/N 653657, which supersedes P/N 641689. Assemblies with P/N CE11141 and P/N 639814 have not been superseded, as these assemblies include an air filter, but their corresponding airbox P/N's are CE11142 and 639815.

Since both correctly manufactured parts (12 total) and suspect parts (a total of 114 assemblies and 41 repair kits) of the same P/N were sold after August 31, 1991, and 12 suspect assemblies and 11 suspect kits have been removed from service to date, a total of 132 assemblies must be inspected to determine which are suspect.

Teledyne Continental Motors also produced several assemblies, P/N 641534, which meet type design criteria. Prior to shipment of these parts to a distributor, TCM will mark them with a permanent ink stamp, "CSB 93–13", located on the inside of the housing assembly where it is easily seen from the air filter interface.

The FAA has reviewed and approved the technical contents of TCM Critical Service Bulletin (CSB) No. 93–13, dated August 12, 1993, that describes procedures for an initial inspection to determine if a suspect assembly is installed, repetitive inspections for cracks, and replacement, if necessary, of carburetor air intake housing assemblies with serviceable assemblies.

Since the unsafe condition described is likely to exist or develop on other engines of the same type design, the FAA issued priority letter AD 93–22–05 to prevent an engine failure due to a cracked air valve in the carburetor air intake housing. The AD requires an initial inspection to determine if a suspect carburetor air intake housing assembly is installed. Suspect carburetor air intake housing assemblies must be replaced with a serviceable assembly if a crack is found. In addition, this AD requires repetitive inspections for cracks, and replacement, if necessary, of carburetor air intake housing assemblies with serviceable assemblies. Replacement with serviceable carburetor air intake housing assemblies constitutes terminating action to the inspection requirements of this AD. The actions are required to be accomplished in accordance with the service bulletin described previously.

Since it was found that immediate corrective action was required, notice and opportunity for prior public comment thereon were impracticable and contrary to the public interest, and good cause existed to make the AD effective immediately by individual letters issued on October 4, 1993, to all known U.S. owners and operators of TCM C85, C90, O–200, and O–240 series reciprocating engines. These conditions still exist, and the AD is hereby published in the Federal Register as an amendment to § 39.13 of part 39 of the

Federal Aviation Regulations (FAR) to make it effective to all persons.

Comments Invited

Although this action is in the form of a final rule that involves requirements affecting flight safety and, thus, was not preceded by notice and an opportunity for public comment, comments are invited on this rule. Interested persons are invited to comment on this rule by submitting such written data, views, or arguments as they may desire. Communications should identify the Rules Docket number and be submitted in triplicate to the address specified under the caption ADDRESSES. All communications received on or before the closing date for comments will be considered, and this rule may be amended in light of the comments received. Factual information that supports the commenter's ideas and suggestions is extremely helpful in evaluating the effectiveness of the AD action and determining whether additional rulemaking action would be needed.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the rule that might suggest a need to modify the rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this AD will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 93–ANE–54." The postcard will be date stamped and returned to the commenter.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The FAA has determined that this regulation is an emergency regulation that must be issued immediately to correct an unsafe condition in aircraft, and is not a "significant regulatory action" under Executive Order 12866. It has been determined further that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979). If it is determined that this emergency regulation otherwise would be significant under DOT Regulatory Policies and Procedures, a final regulatory evaluation will be prepared and placed in the Rules Docket. A copy of it, if filed, may be obtained from the Rules Docket at the location provided under the caption ADDRESSES.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

93–22–05 Teledyne Continental Motors: Amendment 39–8744. Docket 93–ANE–54.

Applicability: Teledyne Continental Motors (TCM) Model O–200A reciprocating engines with Engine Serial Numbers 256030 through 256037; and TCM C85, C90, O–200, and O–240 series reciprocating engines with carburetor air intake housing assemblies, Part Numbers (P/N) CE11141, CE11142, 639814, 639815, 641534, and Repair Kit Assemblies, P/N 641689, purchased after August 31, 1991, without a permanent ink stamp "CSB 93–13" located on the inside of the housing assembly. These engines are installed on but not limited to the following aircraft: American Champion Models 7BCM, 7CCM, S7CCM, 7DC, S7DC, 7EC, S7EC, 7FC, 7JC, 7ECA, 11BC, S11BC, 11CC, S11CC, and 402; Anderson Greenwood Model 14; Cessna Model 120, 140, 140A, 150, 150A–M, and A150K–M; Luscombe Model 8E, 8F, and T–8F; McClish (Funk) Model B85C; Piper Model PA–18 and PA–19; Reims Model F150 G, H, J, K, L, M, FA150K, L, FRA150L, and M; Spinks Model Lark 95; Superior (Culver) Model V and V–2; Taylorcraft Model 19 and F–19; and Univair (Erco, Forney, Alon, Mooney) Model 415E, 415G, F–1, F–1A, A–2, and M–10.

Compliance: Required as indicated, unless accomplished previously.

To prevent engine failure due to a cracked air valve in the carburetor air intake housing assembly, accomplish the following:

(a) Within the next 5 hours time in service (TIS) after the effective date of this AD, inspect the carburetor air intake housing assembly in accordance with paragraph 2 of the Inspection Procedure section of TCM Critical Service Bulletin (CSB) No. 93–13, dated August 12, 1993.

(1) If the carburetor air intake housing assembly meets the requirements of Paragraph 2A of the Inspection Procedures of TCM CSB No. 93–13, dated August 12, 1993, no further action is required.

(2) If the carburetor air intake housing assembly meets the requirements of paragraph 2B of TCM CSB No. 93–13, dated August 12, 1993, inspect the carburetor air intake housing assembly for cracks. If cracks are found anywhere in the assembly, prior to further flight replace with a serviceable assembly.

(b) Thereafter, for assemblies that meet the requirements of paragraph 2B of TCM CSB No. 93–13, dated August 12, 1993, inspect the carburetor air intake housing assembly for cracks in accordance with Paragraphs 3 and 4 of the Inspection Procedure of TCM CSB No. 93–13, dated August 12, 1993, at intervals not to exceed 25 hours TIS since the last inspection. If cracks are found anywhere in the assembly, prior to further flight replace with a serviceable assembly.

(c) Inspect uninstalled carburetor air intake housing assemblies in accordance with paragraph (a) of this AD prior to installation.

(d) For the purpose of this AD, a serviceable carburetor air intake housing assembly is defined as:

(1) An assembly purchased on or before August 31, 1991; or

(2) An assembly that meets the inspection criteria of paragraph (a)(1) of this AD; or

(3) An assembly with the following P/N's:

(i) 653661, which supersedes CE11142;

(ii) 653670, which supersedes 639815;

(iii) 653675, which supersedes 641534;

(iv) 653657, which supersedes 641689; or

(4) An assembly, P/N 641534, with a permanent ink stamp "CSB 93–13" located on the inside of the housing assembly.

Note: The assemblies, P/N's CE11141 and 639814, have not been superseded, as these are assemblies with the air filter included, corresponding to airboxes, P/N's CE11142 and 639815.

(e) Replacement with a serviceable carburetor air intake housing assembly constitutes terminating action to the inspection requirements of this AD.

(f) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Atlanta Aircraft Certification Office. The request should be forwarded through an appropriate FAA Maintenance Inspector, who may add comments and then send it to the Manager, Atlanta Aircraft Certification Office.

Note: Information concerning the existence of approved alternative methods of compliance with this airworthiness directive, if any, may be obtained from the Atlanta Aircraft Certification Office.

(g) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the

requirements of this AD can be accomplished.

(h) The inspections, and replacement, if necessary, shall be done in accordance with the following service document:

Document No.	Pages	Revision	Date
TCM CSB No. 93–13	1–3	Original	Aug. 12, 1993.

Total pages: 3.

This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Teledyne Continental Motors, P.O. Box 90, Mobile, AL 36601; telephone (205) 438–3411. Copies may be inspected at the FAA, New England Region, Office of the Assistant Chief Counsel, 12 New England Executive Park, Burlington, MA; or at the Office of the Federal Register, 800 North Capitol Street NW., suite 700, Washington, DC.

(i) This amendment becomes effective December 14, 1993, to all persons except those persons to whom it was made immediately effective by priority letter AD 93–22–05, issued November 4, 1993, which contained the requirements of this amendment.

Issued in Burlington, Massachusetts, on November 19, 1993.

Mark C. Fulmer,

Acting Manager, Engine and Propeller Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Parts 375 and 388

[Docket No. RM94–3–000]

Revisions to Regulations Governing Freedom of Information Act Requests

Issued November 22, 1993.

AGENCY: Federal Energy Regulatory Commission.

ACTION: Final rule.

SUMMARY: The Federal Energy Regulatory Commission (Commission) is transferring authority to reduce or waive fees and to release documents requested under the Freedom of Information Act from the Director of Public Affairs to the Director, Office of External Affairs because of a recent reorganization.

EFFECTIVE DATE: This rule is effective November 22, 1993.

FOR FURTHER INFORMATION CONTACT: Adam Gurwitz, Office of the General Counsel, Federal Energy Regulatory Commission, 825 North Capitol Street, NE, Washington, DC 20426, (202) 208–0457.

SUPPLEMENTARY INFORMATION: In addition to publishing the full text of this document in the **Federal Register**, the Commission also provides all interested persons an opportunity to inspect or copy the contents of this document during normal business hours in room 3104, 941 North Capitol Street NE., Washington, DC 20426.

The Commission Issuance Posting System (CIPS), an electronic bulletin board service, provides access to the texts of formal documents issued by the Commission. CIPS is available at no charge to the user and may be accessed using a personal computer with a modem by dialing (202) 208–1397. To access CIPS, set your communications software to use 300, 1200, or 2400 bps, full duplex, no parity, 8 data bits and 1 stop bit. CIPS can also be accessed at 9600 bps by dialing (202) 208–1781. The full text of this document will be available on CIPS for 30 days from the date of issuance. The complete text on diskette in WordPerfect format may also be purchased from the Commission's copy contractor, LaDorn Systems Corporation, also located in room 3104, 941 North Capitol Street NE., Washington, DC 20426.

Order No. 562

Final Rule

I. Introduction

The Federal Energy Regulatory Commission (Commission) is revising its regulations in parts 375 and 388 transferring delegated authority to release or withhold documents, and to reduce or waive fees under the Freedom of Information Act (FOIA), from the Director of Public Affairs to the Director, Office of External Affairs.

II. Background and Discussion

The Commission's regulations authorize the Director of Public Affairs to determine whether to release or withhold non-public documents requested under the FOIA, and whether to reduce or waive fees associated with FOIA requests. See 18 CFR 375.312, 388.108, and 388.112. The Office of External Affairs recently was reorganized to combine the Division of Congressional Affairs and State Liaison with the Division of Public and Intergovernmental Affairs. This reorganization eliminated the Director of Public Affairs position. The Commission is amending its regulations to designate the Director, Office of External Affairs, as the official authorized to release or withhold FERC documents under FOIA and to reduce or waive FOIA fees.

This final rule will not effect any other changes to the Commission's FOIA procedures.

III. Regulatory Flexibility Certification

The Regulatory Flexibility Act of 1980 (RFA)[1] generally requires a description and analysis of final rules that will have significant economic impact on a substantial number of small entities.[2] Pursuant to section 605(b) of the RFA, the Commission hereby certifies that this rule will not have a significant economic impact on a substantial number of small entities.

IV. Environmental Statement

Issuance of this rule would not represent a major federal action having a significant adverse effect on the human environment under the Commission regulations implementing the National Environmental Policy Act.[3] This rule is procedural and falls within the categorical exemptions provided in the Commission's regulations. Neither an environmental impact statement nor an environmental assessment is required.[4]

[1] 5 U.S.C. 601–602.

[2] Section 601(c) of the RFA defines a "small entity" as a small business, a small not-for-profit enterprise, or a small governmental jurisdiction. A "small business" is defined by reference to section 3 of the Small Business Act as an enterprise which is "independently owned and operated and which is not dominant in its field of operation." 15 U.S.C. 632(a).

[3] See Order No. 486, 52 FR 47897 (Dec. 17, 1987), FERC Stats. & Regs., Regulations Preambles 1986–1990 ¶ 30,783 (Dec. 10, 1987) (codified at 18 CFR part 380).

[4] See 18 CFR 380.4(a)(1).

V. Information Collection Statement

Office of Management and Budget (OMB) regulations require that OMB approve certain information collection requirements imposed by agency rule.[5] This rule contains no information collection requirements and is not subject to OMB approval.

VI. Administrative Findings and Effective Date

This final rule is a rule of agency organization that does not alter any substantive rights or interests, but merely changes the title of the Commission official who is delegated authority to release or withhold documents under FOIA and to reduce or waive FOIA fees. Prior notice and comment under section 4 of the Administrative Procedure Act[6] are therefore unnecessary. The Commission finds good cause to make this rule effective immediately upon issuance. This rule therefore is effective November 22, 1993.

List of Subjects

18 CFR Part 375

Authority delegations (Government agencies), Seals and insignia, Sunshine Act.

18 CFR Part 388

Confidential business information, Freedom of information.

By the Commission.

Lois D. Cashell,

Secretary.

In consideration of the foregoing, the Commission is amending parts 375 and 388, Chapter I, Title 18, Code of Federal Regulations, as set forth below.

PART 375—THE COMMISSION

1. The authority citation for part 375 continues to read as follows:

Authority: 5 U.S.C. 551–557; 15 U.S.C. 717–717w, 3301–3432; 16 U.S.C. 791–828r, 791a note, 2601–2645; 42 U.S.C. 7101–7532.

2. Section 375.312 is revised to read as follows:

§ 375.312 Delegations to the Director, Office of External Affairs.

The Commission authorizes the Director, Office of External Affairs to waive or reduce fees in accordance with §§ 388.108 through 388.110 of this chapter.

[5] 5 CFR Part 1320.

[6] 5 U.S.C. 553(b) (1988).

PART 388—INFORMATION AND REQUESTS

3. The authority citation for part 388 is revised to read as follows:

Authority: 5 U.S.C. 301–305, 551–557; 42 U.S.C. 7101–7352.

§ 388.108 [Amended]

4. In § 388.108, paragraphs (a)(1)(i), (a)(2) through (a)(4) and (b)(1), the words "Director of Public Affairs" are removed and the words "Director, Office of External Affairs" are inserted in their place.

§ 388.112 [Amended]

5. In § 388.112, paragraph (e), the words "Director of the Division of Public Affairs" are removed and the words "Director, Office of External Affairs" are inserted in their place.

[FR Doc. 93–29105 Filed 11–26–93; 8:45 am]
BILLING CODE 6717–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 14

Advisory Committee; Clarifying Amendment

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the standing advisory committees' regulations to change the name of the over-the-counter (OTC) Drugs Advisory Committee. This action is being taken to more accurately describe this committee.

EFFECTIVE DATE: November 29, 1993.

FOR FURTHER INFORMATION CONTACT: Donna M. Combs, Committee Management Office (HFA–306), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–2765.

SUPPLEMENTARY INFORMATION: FDA is announcing that the name of the OTC Drugs Advisory Committee has been changed. After the establishment of this committee, on August 27, 1991, the agency decided that the name "Nonprescription Drugs Advisory Committee" would more accurately describe the committee. The committee reviews the safety and effectiveness of over-the-counter (nonprescription) human drug products which involves an exchange of views regarding both prescription and nonprescription status. The review of these various products or combinations thereof may include switches from one status to another. Therefore, the agency feels the name change will more accurately describe this committee to the public. In the **Federal Register** of September 30, 1993 (58 FR 51084), FDA published a notice and indicated that the name of the OTC Drugs Advisory Committee had been changed to the Nonprescription Drugs Advisory Committee in the charter renewal dated August 10, 1993. In this document, FDA is hereby formally changing the name of the committee by revising 21 CFR 14.100(c)(17).

Publication of this document constitutes a final action on this change under the Administrative Procedure Act (5 U.S.C. 553(b)(3)(B) and (d)) and under 21 CFR 10.40(d) and (e). Notice and public procedure and delayed effective date on this regulation are unnecessary and not in the public interest, because the final rule is merely a clarifying amendment to existing regulations and when effective will provide notice of accepted standards.

List of Subjects in 21 CFR Part 14

Administrative practice and procedure, Advisory committees, Color additives, Drugs, Radiation protection.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs, 21 CFR part 14 is amended as follows:

PART 14—PUBLIC HEARING BEFORE A PUBLIC ADVISORY COMMITTEE

1. The authority citation for 21 CFR part 14 continues to read as follows:

Authority: Secs. 201–903 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321–394; 21 U.S.C. 41–50, 141–149, 467f, 679, 821, 1034; secs. 2, 351, 354, 361 of the Public Health Service Act (42 U.S.C. 201, 262, 263b, 264); secs. 2-12 of the Fair Packaging and Labeling Act (15 U.S.C. 1451–1461); 5 U.S.C. App. 2; 28 U.S.C. 2112.

2. Section 14.100 is amended by revising the heading for paragraph (c)(17) to read as follows:

§ 14.100 List of standing advisory committees.

* * * * *

(c) * * *

(17) *Nonprescription Drugs Advisory Committee.*

* * * * *

Dated: November 19, 1993.

Jane E. Henney,

Deputy Commissioner for Operations.

[FR Doc. 93–29113 Filed 11–26–93; 8:45 am]
BILLING CODE 4160–01–F

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Public and Indian Housing

24 CFR Parts 905 and 941

[Docket No R–93–1690; FR–3550–I–01]

RIN 2577–AB34

Public and Indian Housing Development—Amendment to Calculation of Total Development Cost

AGENCY: Office of the Assistant Secretary for Public and Indian Housing, HUD.

ACTION: Interim rule.

SUMMARY: This interim rule amends the Department's regulations to remove donations (non-public or non-Indian housing funds) from the Department's calculation of total development cost (TDC). The Department's experience has indicated that the inclusion of donations within the TDC of projects has created unwarranted delays in the development process, and, in some cases, has been a contributory reason for cost increases in the low-income housing development process.

DATES: Effective date: This interim rule becomes effective on December 29, 1993, and will expire on May 29, 1995.

COMMENT DUE DATE: January 28, 1994.

ADDRESSES: Interested persons are invited to submit comments regarding this interim rule to the Office of General Counsel, Rules Docket Clerk, room 10276, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410. Communications should refer to the above docket number and title. A copy of each communication submitted will be available for public inspection and copying on weekdays between 7:30 a.m. and 5:30 p.m. at the above address. Facsimile (FAX) comments are not acceptable.

FOR FURTHER INFORMATION CONTACT: For Public Housing, Janice Rattley, Director of the Office of Construction, Rehabilitation and Maintenance, Department of Housing and Urban Development, 451 Seventh Street, SW., room 4136, Washington, DC. 20410. Telephone (202) 708–1800 (voice) or (202) 708–4594 (TDD). (These are not toll-free numbers.)

For Indian Housing, Dom Nessi, Director, Office of Native American Programs, Department of Housing and Urban Development, 451 Seventh Street, SW., room 4140, Washington, DC 20410. Telephone (202) 708–1015 (voice) or (202) 708–4594 (TDD). (These are not toll-free numbers.)

SUPPLEMENTARY INFORMATION: The regulations for HUD's public housing development program, which are codified at 24 CFR part 941, and HUD's Indian housing development regulations, which are codified at 24 CFR part 905, subpart C, provide for the inclusion of donations (non-public or non-Indian housing funds) that have been provided to public housing agencies and Indian housing authorities (collectively, "HAs') in the total development cost (TDC). The project TDC is then compared to the published TDC limitations currently in effect. The comparison can result in actual development costs that are less than, the same as, or more than the published TDC limitations. Under HUD's existing regulations, if the project TDC exceeds 100 percent of the published TDC limitation, notwithstanding the reason for the increase over the TDC limitation or the source of funding for the increase, the Field Office cannot approve the project TDC without authorization of the Regional Administrator or the Assistant Secretary of Public and Indian Housing. (See 24 CFR 941.406.) Similar provisions are contained in the Indian housing regulations. (See 24 CFR 905.255(d).) The approval procedure is intended to verify Field Office processing, and to ensure that the project TDC will provide modest, non-luxury, durable housing at a reasonable cost. In actual fact, however, the existing TDC approval process, which does not take into consideration that donations may be the reason for, or the source of payment of, the increase over the TDC limits, has resulted in unwarranted delays in the development process because of the amount of time it takes for the request to move through the system. In some cases, these delays have been a contributory reason for cost increases in development of public and Indian housing.

The amendments to be made by this interim rule will permit HUD Field Offices to calculate the project TDC relative to published TDC limitations, and to authorize HAs to proceed with developments, without referral to Regional Administrators or the Assistant Secretary, where funds in excess of TDC limits are provided through donations. Where funds in excess of TDC limits will not be provided through donations, Field Offices must continue to seek authorization from the Regional Administrators or the Assistant Secretary. HUD will not provide funds to HAs under section 5 of the U.S. Housing Act of 1937 in excess of TDC limitations without such authorization.

The Department is aware that other changes need to be made to part 941 to simplify and facilitate the development of public housing, and the Department is in the process of completely redesigning the public housing development program for this purpose. The Department will be issuing a proposed rule to amend 24 CFR part 941 to reflect the redesigned program, and to invite public comment on the Department's proposed redesign of the public housing development program. Thus, although additional and comprehensive changes are contemplated for part 941, the Department believes that it is in the best interest of HAs and the public to issue this interim rule, in advance of publication of the proposed rule, because the amendment to the calculation of the TDC is needed immediately to facilitate development of already reserved projects.

The specific sections in 24 CFR parts 905 and 941 to be amended by this interim rule are as follows:

Sections 905.102 and 941.103 are each amended by revising the definition of "total development cost" contained in these sections to clarify that maximum total development cost excludes any donations.

Sections 905.255 and 941.204 are amended to add a new paragraph to each section that will clarify that although donations are not included in the project TDC calculations, donations must be included in the project development cost budget. A new paragraph (j) would be added to § 905.255 and a new paragraph (d) would be added to § 941.204. Additionally, § 905.255(a)(2) would be amended to clarify that the "inclusion of all costs" discussed in this paragraph does not include donations.

Additionally, § 941.406 is amended to clarify that the total project cost refers to HUD funds.

Through implementation of these amendments, many developments in the pre-construction pipeline will be able to achieve construction starts sooner, which will benefit (1) low-income persons that need public and Indian housing, and (2) the public in general by creating local economic stimulus.

Justification for Interim Rulemaking

It is the Department's general policy to publish a rule for notice and comment before issuing a rule for effect, in accordance with its own rule on rulemaking, codified at 24 CFR part 10. However, part 10 provides for exceptions from that general rule where

the agency finds good cause to omit advance notice and public participation. The good cause requirement is satisfied when prior public procedure is determined to be "impracticable, unnecessary, or contrary to the public interest." (See 24 CFR 10.1)

The Department finds that good cause exists to publish this interim rule for effect without notice and prior public comment in that prior public procedure is contrary to the public interest. The amendments made by this interim rule are beneficial to HAs because they exclude donations from calculation of the total development cost (TDC) in the Department's public and Indian housing development programs. The Department's experience has shown that the inclusion of donations in the TDC has created unwarranted delays and contributed to cost increases in the public housing development process. Thus, not only HAs, but residents and prospective residents that the HAs serve benefit from these amendments.

Although this interim rule is being published for immediate effect, the Department requests comments from the public on this interim rule. All public comments will be considered by the Department in the development of a final rule.

Other Matters

Environmental Impact

A Finding of No Significant Impact with respect to the environment has been made in accordance with HUD regulations at 24 CFR part 50, which implement section 102(2)(C) of the National Environmental Policy Act of 1969. The Finding is available for public inspection between 7:30 a.m. and 5:30 p.m. weekdays in the Office of the Rules Docket Clerk at the above address.

Executive Order 12866

This interim rule was reviewed by the Office of Management and Budget under Executive 12866 as a significant regulatory action.

Impact on Small Entities

The Secretary, in accordance with the Regulatory Flexibility Act (5 U.S.C. 605(b)), has reviewed this interim rule before publication, and, by approving it, certifies that this interim rule will not have a significant economic impact on a substantial number of small entities. The interim rule's major effect is on HAs which are state and local governmental entities. The interim rule revises the manner in which the total development cost is calculated, and in so doing, reduces delays and costs in the development of public and Indian housing, which is beneficial to HAs.

Federalism Impact

The General Counsel, as the Designated Official under section 6(a) of Executive Order No. 12612, Federalism, has determined that this interim rule will not have a substantial, direct effect on the States or their political subdivisions or on the relationship between the Federal government and the States, or on the distribution of power or responsibilities among the various levels of government. The interim rule removes, rather than imposes, a program requirement.

Impact on the Family

The General Counsel, as the Designated Official under Executive Order 12606, The Family, has determined that this interim rule does not have a potential significant impact on family formation, maintenance, and general well-being, and thus is not subject to review under the Order. No significant change in existing HUD policies or programs will result from promulgation of this interim rule, as those policies and programs relate to family concerns.

Regulatory Agenda

This interim rule was listed as sequence number 1650 in the Department's Semiannual Agenda of Regulations published on October 25, 1993 (58 FR 56402, 56451) under Executive Order 12866 and the Regulatory Flexibility Act, and was submitted to the Committee on Banking, Housing and Urban Affairs of the Senate and the Committee on Banking, Finance and Urban Affairs of the House of Representatives under section 7(o) of the Department of Housing and Urban Development Act.

Catalog of Federal Domestic Assistance Program

The Catalog of Federal Domestic Assistance Program title and number is 14.850, Public and Indian Housing.

List of Subjects

24 CFR Part 905

Aged, Energy conservation, Grant programs—housing and community development, Grant programs—Indians, Indians, Individuals with disabilities, Lead poisoning, Loan programs—housing and community development, Loan programs—Indians, Low and moderate income housing, Public housing, Reporting and recordkeeping requirements.

24 CFR Part 941

Grant programs—housing and community development, Loan programs—housing and community development, Public housing.

Accordingly, 24 CFR parts 905 and 941 are amended as follows:

PART 905—INDIAN HOUSING PROGRAMS

1. The authority citation for part 905 continues to read as follows:

Authority: 25 U.S.C. 450e(b); 42 U.S.C. 1437a-1, 1437aa, 1437bb, 1437c, 1437cc, 1437d(c)(4)(D), 1437ee, and 3535(d).

2. In § 905.102, the definition of "Total development cost" is revised to read as follows:

§ 905.102 Definitions.

* * * * *

Total development cost. The sum of all HUD-approved costs for a project including all undertakings necessary for administration, planning, site acquisition, demolition, construction or equipment and financing (including the payment of carrying charges), and for otherwise carrying out the development of the project. The maximum total development cost excludes offsite water and sewer facilities development costs; costs normally paid for by other entities, but included in the development cost budget for the project for contracting or accounting convenience; and any donations received from public or private sources.

* * * * *

3. In § 905.255, paragraph (a)(2) is revised, and a new paragraph (j) is added to read as follows:

§ 905.255 Total development cost standard.

(a) * * *

(2) The costs covered by the TDC approved for a project, which is subject to the TDC standard, include all costs (excluding donations; see paragraph (j) of this section) associated with the project, except for the costs of off-site water and sanitation facilities infrastructure. The TDC limit for a project shall be calculated by multiplying the number of units for each bedroom size and structure type in the project by the applicable per unit TDC standard, and adding together the amounts for all the units in the project.

* * * * *

(j) *Donations.* Donations from other funding sources may be obtained by the IHA to supplement project costs which otherwise could not be included, provided that the added funds are not used for items which would result in substantially increased operating, maintenance, or replacement costs, and the HUD certification required under section 102 of the HUD Reform Act can

be made in accordance with 24 CFR part 12. Although donations are not subject to the TDC limitations set forth in paragraph (d) of this section, donations must be included in the project development cost budget, and legally acceptable written commitments must be provided to the IHA before the IHA can rely on the donations in its planning and contracting.

PART 941—PUBLIC HOUSING DEVELOPMENT

4. The authority citation for part 941 is revised to read as follows:

Authority: 42 U.S.C. 1437b, 1437c, 1437g, and 3535(d).

5. In § 941.103, the definition of "Total Development Cost" is revised to read as follows:

§ 941.103 Definitions.

* * * * *

Total development cost (TDC). The sum of all HUD-approved costs for planning (including proposal preparation), administration, site acquisition, relocation, demolition, construction and equipment, interest and carrying charges, on-site streets and utilities, non-dwelling facilities, a contingency allowance, insurance premiums, off-site facilities, any initial operating deficit, and other costs necessary to develop the project. The total development cost in the proposal, when reviewed and approved by the Field Office, becomes the maximum total development cost stated in the ACC. Upon completion of the project, the actual development cost is determined, and this becomes the maximum total development cost of the project for purposes of the ACC. The maximum total development cost excludes costs funded from donations. (See 24 CFR 941.204.)

6. In § 941.204, a new paragraph (d) is added to read as follows:

§ 941.204 Cost guidelines.

* * * * *

(d) *Donations.* Donations from other funding sources may be obtained by the PHA to supplement project costs which otherwise could not be included, provided that the added funds are not used for items that would result in substantially increased operating, maintenance or replacement costs, and the HUD certification required under section 102 of the HUD Reform Act can be made in accordance with 24 CFR part 12. Although donations are not subject to the TDC limitations set forth in § 941.406(a), donations must be included in the project development cost budget, and legally acceptable written commitments for such donations must be provided by the PHA for Field Office approval.

7. In § 941.406, paragraphs (a)(1) and (a)(2)(i) are revised to read as follows:

§ 941.406 Maximum development cost and advances.

(a) * * *

(1) The total project cost that may be approved and reserved with HUD funds for a proposed project at the time of the initial reservation of funds may not exceed 100 percent of the maximum TDC based on the most recently issued TDC limits.

(2)(i) After initial fund reservation and subject to the availability of funds:

(A) A Field Office may approve costs to be paid from HUD funds and reserve funds for a project up to 100 percent of the maximum TDC based on the most recently issued TDC limits;

(B) The Regional Administrator may authorize the Field Office to approve costs to be paid from HUD funds and reserve funds for a project up to 105 percent of the maximum TDC based on the most recently issued TDC limits;

(C) The Assistant Secretary may authorize the Field Offices to approve costs to be paid from HUD funds and reserve funds for a project above 105 percent of the maximum TDC, based on the most recently approved TDC limits.

* * * * *

Dated: November 19, 1993.

Joseph Shuldiner,

Assistant Secretary for Public and Indian Housing.

BILLING CODE 4210–33–P

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 47

[T.D. 8497]

RIN 1545–AS06

Vaccine Floor Stocks Tax of 1993

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Temporary regulations.

SUMMARY: This document contains temporary regulations relating to the floor stocks tax on vaccines held on August 10, 1993. These rules reflect changes to the law made by the Omnibus Budget Reconciliation Act of 1993 (Act). The temporary regulations provide guidance relating to the person liable for the tax, an exception to the tax, and the time for reporting and paying the tax.

EFFECTIVE DATE: These regulations are effective August 10, 1993.

FOR FURTHER INFORMATION CONTACT: Edward Madden (202) 622–4537 (not a toll-free call).

SUPPLEMENTARY INFORMATION:

Background

The Act reinstates the manufacturers excise tax on vaccines under section 4131 of the Internal Revenue Code (Code) effective August 11, 1993. The vaccine tax is imposed on DPT (diphtheria, pertussis, tetanus) vaccine at the rate of $4.56 per dose, DT (diphtheria, tetanus) vaccine at the rate of $0.06 per dose, MMR (measles, mumps, rubella) vaccine at the rate of $4.44 per dose, and polio vaccine at the rate of $0.29 per dose.

The Act also imposes a floor stocks tax, which does not appear in the Code, on these vaccines. The floor stocks tax is a one-time tax on taxable vaccines that were sold by the manufacturer, producer, or importer on or before August 10, 1993, on which no tax was imposed by section 4131 of the Code, and that were held at the last moment of August 10, 1993, for sale or use. The rates of floor stocks tax are equal to the tax rates for sales by the manufacturer, producer, or importer.

Explanation of Provisions

The regulations provide definitions relating to the floor stocks tax, identify the vaccines subject to the floor stocks tax, list the applicable rates of tax, and identify the persons liable for the tax (primarily doctors, public and private hospitals and clinics, and public health agencies).

The regulations also provide a de minimis exception to the floor stocks tax. Under this exception, any person that holds vaccines subject to a total tax of $1,000 or less is not required to report or pay the tax. If the tax exceeds $1,000, the full amount of tax must be reported and paid. Vaccines held by members of controlled groups must be aggregated for purposes of the de minimis exception. The de minimis exception is not prescribed by statute, but is being established for administrative convenience as were the de minimis exceptions contained in the Floor Stocks Tax provisions of the Environmental Tax Regulations (see 26 CFR 52.4682–4). The $1,000 threshold for tax is consistent with the de minimis exemption requested by the Department of Health and Human Services, which administers the Vaccine Injury Compensation Trust Fund.

The regulations provide that a return on Form 720, Quarterly Federal Excise

Tax Return, must be filed by February 28, 1994, and that the tax also must be paid by February 28, 1994. Persons that are also required to report other excise taxes for the fourth quarter of 1993 must report the floor stocks tax and the other excise taxes on the same Form 720. The due date for the return is February 28, 1994, even if returns for the other excise taxes are ordinarily due at an earlier date. This rule does not extend the time for making deposits or payments of any excise tax.

These regulations do not impose any specific recordkeeping requirements with respect to the floor stocks tax. However, the general recordkeeping requirements applicable to Form 720 apply. For example, inventories based on actual measurement, on a work-forward or work-back method, or any other method that accurately reflects vaccines held are acceptable.

Special Analyses

It has been determined that this Treasury decision is not a significant regulatory action as defined in Executive Order 12866. It also has been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) and the Regulatory Flexibility Act (5 U.S.C. chapter 6) do not apply to these regulations, and, therefore, a Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, these temporary regulations will be submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on their impact on small business.

Drafting Information

The principal author of these regulations is Edward Madden, Office of Assistant Chief Counsel (Passthroughs and Special Industries). However, other personnel from the IRS and Treasury Department participated in their development.

List of Subjects in 26 CFR Part 47

Excise taxes, Reporting and recordkeeping requirements.

Amendments to the Regulations

Accordingly, 26 CFR chapter I is amended as follows:

Paragraph 1. Part 47 is added to read as follows:

PART 47—FLOOR STOCKS TAXES

Subpart A—[Reserved]

Sec.

47.1–1T through 47.1–5T [Reserved]

Subpart B—Vaccine Floor Stocks Tax of 1993

47.2–1T Scope of subpart B (temporary).
47.2–2T Definitions relating to the vaccine floor stocks tax (temporary).
47.2–3T Imposition of vaccine floor stocks tax (temporary).
47.2–4T De minimis exception to vaccine floor stocks tax (temporary).
47.2–5T Requirements with respect to payment and return (temporary).

Authority: 26 U.S.C. 7805.

Section 47.2–5T also issued under section 13421(c) of the Omnibus Budget Reconciliation Act of 1993 (107 Stat. 312).

Subpart A—[Reserved]

§§ 47.1–5T [Reserved]

Subpart B—Vaccine Floor Stocks Tax of 1993

§ 47.2–1T Scope of subpart B (temporary).

The regulations in this subpart B relate to the vaccine floor stocks tax imposed by section 13421(c) of the Omnibus Budget Reconciliation Act of 1993 (107 Stat. 312). The tax is imposed on untaxed vaccines held at the last moment of August 10, 1993. This subpart describes the specific articles subject to tax, the rates of tax, and the persons liable for tax. This subpart also provides an exception to the tax and requirements for payment of tax and filing a return reporting the tax. This subpart is effective on August 10, 1993.

§ 47.2–2T Definitions relating to the vaccine floor stocks tax (temporary).

(a) *Terms used in section 4131.* For purposes of this subpart, terms that are also used in section 4131 have the same meaning as when so used.

(b) *Other terms.* For purposes of this section—

Act refers to the Omnibus Budget Reconciliation Act of 1993 (107 Stat. 312).

Controlled group means—

(i) Any controlled group of corporations within the meaning of section 1563(a), except that the phrase "more than 50 percent" is substituted for the phrase "at least 80 percent" each place it appears therein and a controlled group of corporations includes members that are described in section 1563(b)(2) (relating to excluded members); and

(ii) Any other group of organizations, at least one member of which is not a corporation, that is a brother-sister group under common control or a combined group under common control, with terms having the following meanings for this purpose:

(A) *Organization* means a sole proprietorship, a partnership, a trust, an estate, or a corporation.

(B) *Brother-sister group under common control* means two or more organizations if—

(*1*) The same five or fewer persons who are individuals, estates, or trusts own (directly and with the application of § 1.414(c)–4 of this chapter) a controlling interest of each organization;

(*2*) Taking into account the ownership of each person only to the extent that person's ownership is identical with respect to each organization, such persons are in effective control of each organization; and

(*3*) The five or fewer persons whose ownership is considered for purposes of the controlling interest requirement for each organization are the same persons whose ownership is considered for purposes of the effective control requirement.

(C) *Controlling interest* means—

(*1*) In the case of a corporation, ownership of stock possessing at least 50 percent of the total combined voting power of all classes of stock entitled to vote or at least 50 percent of the total value of the shares of all classes of stock of the corporation;

(*2*) In the case of a trust or estate, ownership of an actuarial interest (determined under § 1.52–1(f) of this chapter) of at least 50 percent of the trust or estate;

(*3*) In the case of a partnership, ownership of at least 50 percent of the profit interest or capital interest of the partnership; and

(*4*) In the case of a sole proprietorship, ownership of the sole proprietorship.

(D) *Effective control* has the meaning given that term in § 1.52–1(d)(3) of this chapter.

(E) *Combined group under common control* has the meaning given that term in § 1.52–1(e) of this chapter.

§ 47.2–3T Imposition of vaccine floor stocks tax (temporary).

(a) *Vaccines subject to tax.* Section 13421(c) of the Act imposes a floor stocks tax on any taxable vaccine (as defined in section 4132(a)(1) of the Internal Revenue Code)—

(1) Which was sold by the manufacturer, producer, or importer on or before August 10, 1993;

(2) On which no tax was imposed under section 4131 (or on which such tax was imposed and subsequently credited or refunded); and

(3) Which is held at the last moment of August 10, 1993, by any person for sale or use.

(b) *Rates of tax.* The rate of floor stocks tax on each taxable vaccine is the

rate of tax specified in section 4131(b)(1) of the Code.

(c) *Person liable for tax.* The person liable for the floor stocks tax on any vaccine subject to tax is the person that holds the vaccine at the last moment of August 10, 1993. For purposes of the floor stocks tax, a vaccine is held at the last moment of August 10, 1993, by the person that has title to the vaccine (whether or not delivery to that person has been made) at such time, as determined under applicable local law. There is no exemption from the floor stocks tax for the United States or for State or local governments. Each business unit that has, or is required to have, its own employer identification number is treated as a separate person for purposes of the floor stocks tax.

§ 47.2–4T De minimis exception to vaccine floor stocks tax (temporary).

(a) *De minimis exception*—(1) *In general.* Except as otherwise provided in this section, if the aggregate amount of floor stocks tax payable by a person does not exceed $1,000, that person is not required to report or pay the tax.

(2) *All amounts held subject to tax if threshold exceeded.* If the aggregate amount of floor stocks tax payable by a person exceeds $1,000, that person is required to report and pay the total amount of tax as determined without regard to this section.

(3) *Controlled groups.* A member of a controlled group (as defined in § 47.2–2T) is not excepted from reporting and paying floor stocks tax under this section if the aggregate amount of floor stocks tax payable by all members of the controlled group exceeds $1,000.

(b) *Examples.* The following examples illustrate the rules of this section:

Example 1. A holds 50 doses of DPT vaccine and 60 doses of polio vaccine on the last moment of August 10, 1993. A is not a member of a controlled group. A is not required to report and pay the floor stocks tax on any of the taxable vaccines because the aggregate amount of floor stocks tax payable by A (determined without regard to this section) does not exceed $1,000 ((50×$4.56 per dose of DPT vaccine)+(60×$0.29 per dose of polio vaccine)=$245.40).

Example 2. D, E, and F are members of the same controlled group. On the last moment of August 10, 1993, D holds 100 doses of DPT vaccine and 160 doses of polio vaccine; E holds 80 doses of DPT vaccine, 10 doses of MMR vaccine and 60 doses of polio vaccine; and F holds 20 doses of MMR vaccine and 10 doses of DT vaccine. Without regard to this section, D is liable for a tax of $502.40 ((100×$4.56 per dose of DPT vaccine) + (160×$0.29 per dose of polio vaccine)); E is liable for a tax of $426.60 ((80×$4.56 per dose of DPT vaccine)+(10×$4.44 per dose of MMR vaccine)+(60×$0.29 per dose of polio vaccine)); and F is liable for a tax of $89.40 ((20×$4.44 per dose of MMR vaccine)+(10×$0.06 per dose of DT vaccine)). Because the aggregate amount of floor stocks tax payable by all members of the group ($1,018.40) exceeds $1,000, each member of the controlled group must report and pay the floor stocks tax.

§ 47.2–5T Requirements with respect to payment and return (temporary).

(a) *Payment of tax.* The floor stocks tax is to be paid without assessment or notice on or before February 28, 1994.

(b) *Filing of return—(1) Form 720.* Except as provided in § 47.2–4T(a) (relating to the de minimis exception), every person liable for the floor stocks tax must make a return of the tax on Form 720, Quarterly Federal Excise Tax Return. The return is to be prepared and filed in accordance with the instructions relating to the return.

(2) *Time for filing—(i) In general.* The Form 720 required by paragraph (b)(1) of this section must be filed on or before February 28, 1994, and is a return for the fourth calendar quarter of 1993. A first return reporting only floor stocks tax is also a final return and therefore, in accordance with the instructions to Form 720, the box for "final return" must be marked.

(ii) *Return reporting other taxes.* A person must file only one Form 720 for a quarter. If a person is required under part 40 of this chapter to file Form 720 for the fourth calendar quarter of 1993 for other excise taxes earlier than February 28, 1994, that person files a single Form 720 for the quarter by February 28, 1994. This Paragraph (b)(2)(ii) does not extend the time for making deposits or paying any excise tax.

Margaret Milner Richardson,

Commissioner of Internal Revenue.

Approved: November 15, 1993.

Leslie Samuels,

Assistant Secretary of the Treasury.

RIN 1545–AS07

Fuel Floor Stocks Taxes Under the Omnibus Budget Reconciliation Act of 1993

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Temporary regulations.

SUMMARY: This document contains temporary regulations relating to the floor stocks taxes on gasoline, diesel fuel, and aviation fuel held on October 1, 1993; on diesel fuel held on January 1, 1994; and on commercial aviation fuel held on October 1, 1995. These rules reflect changes to the law made by the Omnibus Budget Reconciliation Act of 1993 (Act). The temporary regulations provide guidance relating to the persons liable for the taxes, exceptions to the taxes, and the times for reporting and paying the taxes.

EFFECTIVE DATE: These regulations are effective October 1, 1993.

FOR FURTHER INFORMATION CONTACT: Edward Madden (202) 622–4537 (not a toll-free call).

SUPPLEMENTARY INFORMATION:

Background

The Act makes several changes to the Internal Revenue Code with respect to the taxation of motor fuels. First, effective October 1, 1993, it increases the rates of excise taxes on gasoline, diesel fuel, and aviation fuel. The gasoline tax, under section 4081, increases from 14.1 cents per gallon to 18.4 cents per gallon; the diesel fuel tax, under section 4091, increases from 20.1 cents per gallon to 24.4 cents per gallon; and the aviation fuel tax, under section 4091, increases from 17.6 cents per gallon to 21.9 cents per gallon. These new rates include the 0.1-cent-per-gallon tax that funds the Leaking Underground Storage Tank (LUST) Trust Fund. Second, effective January 1, 1994, the Act generally moves the point of imposition of tax on diesel fuel to the terminal rack. Third, effective October 1, 1995, the Act increases the tax on fuel used in commercial aviation by 4.3 cents per gallon.

The Act also imposes three floor stocks taxes, which are not codified, on these fuels. The taxes are to be paid by persons holding fuel on the effective dates of the taxes.

The first floor stocks tax is a one-time tax on gasoline, diesel fuel, and aviation fuel that are held at the first moment of October 1, 1993, at a point in the distribution chain where these fuels would not otherwise be subject to the increased tax rates. The rate of the October 1, 1993, floor stocks tax is 4.3 cents per gallon.

The second floor stocks tax is a one-time tax on diesel fuel held by any person at the first moment of January 1, 1994, if (A) no tax was imposed on the fuel under section 4041(a) or 4091 as in effect on December 31, 1993, and (B) tax would have been imposed by section 4081, as amended by the Act, on any prior removal, entry, or sale of the fuel had section 4081 applied to the fuel for periods before January 1, 1994. The rate

of the January 1, 1994, floor stocks tax is 24.4 cents per gallon.

The third floor stocks tax is a one-time tax on commercial aviation fuel held by any person at the first moment of October 1, 1995, on which the Lust tax was imposed under section 4091 before October 1, 1995. The rate of the October 1, 1995, floor stocks tax is 4.3 cents per gallon.

Explanation of Provisions

The temporary regulations provide definitions relating to the floor stocks taxes. The definitions of "aviation fuel" and "diesel fuel" are in substance the same as the existing definitions under the Fuel Floor Stocks Tax of 1990 Regulations (26 CFR 42.2). The definition of "gasoline" is in substance the same as the existing definition under § 48.4081–1(i) of the Manufacturers and Retailers Excise Tax Regulations (26 CFR part 48). A new definition is added for "commercial aviation fuel." "Commercial aviation fuel" is any liquid (other than any product taxable under section 4081) that is suitable for use as fuel in an aircraft and is held for use or sale for use in a business of transporting persons or property for compensation or hire by air.

The regulations identify the fuels subject to the floor stocks taxes, list the applicable rates of tax, and identify the persons liable for the taxes.

Exceptions to the Floor Stocks Taxes

The regulations also provide rules relating to exceptions to the floor stocks taxes. First, the floor stocks taxes generally do not apply to fuel held exclusively for an exempt use. An exempt use is any use of a fuel (other than use in producing gasohol or a diesel fuel/alcohol mixture, or use as fuel in a train) that is described in section 6420, 6421, or 6427 and gives rise to a credit or payment from the IRS equal to the tax imposed under section 4081 or 4091, as the case may be. Generally, the regulations provide that fuel is held exclusively for an exempt use only if the person holding the fuel at the first moment of the tax imposition date actually uses the fuel in an exempt use. Accordingly, fuel is not held exclusively for an exempt use if it is held for resale (including resale to a person who will use the fuel for an exempt use). However, the ultimate purchaser of fuel for an exempt use may be entitled to a credit or payment equal to the floor stocks tax pursuant to section 34, 6416, 6420, 6421, or 6427.

Generally, diesel fuel held for use in a train is not treated as held for an exempt use and, therefore, a floor stocks tax applies to such fuel. Fuel held for the exclusive use of a State or local government in a train, however, is treated as exempt and is not subject to the floor stocks tax.

Second, the October 1, 1993, floor stocks tax does not apply to gasoline or diesel fuel held at the first moment of October 1, 1993, in the fuel supply tank of a motor vehicle or motorboat.

Third, a person is not liable for the October 1, 1993, floor stocks tax on gasoline if the amount of gasoline held by the person at the first moment of October 1, 1993, does not exceed 4,000 gallons. In determining whether this threshold is crossed, the amount of gasoline a person holds exclusively for an exempt use and the amount of gasoline held by a person in the fuel supply tank of a motor vehicle or motorboat are not taken into account. If a person holds more than 4,000 gallons of gasoline, then the floor stocks tax is imposed on all gasoline that is held by the person and that is not otherwise exempt.

Members of certain controlled groups must aggregate the gasoline held by all members in determining whether they hold no more than 4,000 gallons of gasoline. If holdings of all members in aggregate exceed 4,000 gallons, then the de minimis exception does not apply to any member of the group. The aggregation rule for controlled groups does not affect the requirement that each separate person liable for the floor stocks tax file a return.

Similar rules apply with respect to the October 1, 1993, floor stocks tax on diesel fuel and aviation fuel and the October 1, 1995, floor stocks tax on commercial aviation fuel, but the threshold amount under these rules is 2,000 gallons. There is no similar de minimis exception to the January 1, 1994, floor stocks tax on diesel fuel.

The temporary regulations provide that the January 1, 1994, floor stocks tax does not apply to any diesel fuel that would satisfy the dyeing and other requirements of section 4082, as amended by section 13242 of the Act. Temporary regulations providing rules relating to dyeing of diesel fuel and other requirements of section 4082 will be issued soon.

No specific exception is provided to any of the floor stocks taxes for fuel held in "dead storage" (i.e., the amount of fuel that will not be pumped out of a storage tank because the fuel is below the mouth of the draw pipe). Although exceptions to the floor stocks taxes are provided for fuel held for an exempt use and for dyed fuel, undyed fuel held in dead storage is not held for an exempt use and is, therefore, subject to the floor stocks taxes.

The temporary regulations define diesel fuel as a liquid suitable for use as a fuel in a diesel-powered highway vehicle or a diesel-powered train, aviation fuel as a liquid suitable for use as fuel in an aircraft, and gasoline as a product that is commercially known or sold as gasoline and is suitable for use as a motor fuel. Thus, the contents of a fuel storage tank are not subject to tax to the extent the owner can establish that they are not suitable for use as a fuel. However, the possibility that some liquids held in dead storage may not be suitable for use as a fuel does not justify a blanket exemption for otherwise taxable fuel that is held in dead storage.

Payment and Return

The tax must be paid with a return on Form 720, Quarterly Federal Excise Tax Return, filed by the applicable return date. Persons that are also required to report other excise taxes must report the floor stocks tax and the other excise taxes for the same calendar quarter on one Form 720. The due date for the return is the later of the floor stocks return date or the return date for the other excise taxes due for the same calendar quarter. This rule does not extend the time for making deposits or payments of the other excise taxes.

These regulations do not propose any specific recordkeeping requirements with respect to the floor stocks taxes. However, the general recordkeeping requirements applicable to Form 720 apply. In determining the amount of fuel subject to floor stocks taxes any acceptable method may be used. For example, inventories based on actual measurement, on a work-forward or work-back method, or any other method that accurately reflects fuel held are acceptable.

The applicable Form 720 and its separate instructions may be obtained at many local IRS offices or by calling the following toll-free number: 1–800–829–3676.

Special Analyses

It has been determined that this Treasury Decision is not a significant regulatory action as defined in Executive Order 12866. It also has been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) and the Regulatory Flexibility Act (5 U.S.C. chapter 6) do not apply to these regulations, and, therefore, a Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, these temporary regulations will be submitted to the Chief Counsel for Advocacy of the

Small Business Administration for comment on their impact on small business.

Drafting Information

The principal author of these temporary regulations is Edward Madden, Office of the Assistant Chief Counsel (Passthroughs and Special Industries). However, other personnel from the IRS and Treasury Department participated in their development.

List of Subjects in 26 CFR Part 47

Excise taxes, Reporting and recordkeeping requirements.

Amendments to the Regulations

Accordingly, 26 CFR part 47 is amended as follows:

PART 47—FLOOR STOCKS TAXES

Paragraph 1. The authority citation for part 47 continues to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

Par. 2. Subpart C is added to read as follows:

Subpart C—Fuel Floor Stocks Taxes Under the Omnibus Budget Reconciliation Act of 1993

Sec.

47.3–1T Scope of subpart C and effective date (temporary).
47.3–2T Definitions relating to the floor stocks taxes under subpart C (temporary).
47.3–3T Imposition of floor stocks tax on fuel held on October 1, 1993 (temporary).
47.3–4T Exceptions to the October 1, 1993, floor stocks tax (temporary).
47.3–5T Requirements with respect to payment and return for the October 1, 1993, floor stocks tax (temporary).
47.3–6T Imposition of the January 1, 1994, floor stocks tax on diesel fuel held on January 1, 1994 (temporary).
47.3–7T Exception to the January 1, 1994, floor stocks tax (temporary).
47.3–8T Requirements with respect to payment and return for the January 1, 1994, floor stocks tax (temporary).
47.3–9T Imposition of the October 1, 1995, floor stocks tax on commercial aviation fuel held on October 1, 1995 (temporary).
47.3–10T Exceptions to the October 1, 1995, floor stocks tax (temporary).
47.3–11T Requirements with respect to payment and return for the October 1, 1995, floor stocks tax (temporary).

Subpart C—Fuel Floor Stocks Taxes Under the Omnibus Budget Reconciliation Act of 1993

§ 47.3–1T Scope of subpart C and effective date (temporary).

The regulations in this subpart C relate to the fuel floor stocks taxes imposed by sections 13241(h), 13243, and 13245 of the Omnibus Budget Reconciliation Act of 1993 (107 Stat. 312). The tax under section 13241(h) is imposed on previously taxed gasoline, diesel fuel, and aviation fuel held by any person at the first moment of October 1, 1993 (the October 1, 1993, floor stocks tax). The tax under section 13243 is imposed on untaxed diesel fuel that does not satisfy the requirements of section 4082 (as amended by section 13242 of the Act) and that is held by any person at the first moment of January 1, 1994, at a point in the distribution chain outside the bulk transfer/terminal system (the January 1, 1994, floor stocks tax). The tax under section 13245 is imposed on commercial aviation fuel on which tax was imposed under section 4091 (even if only at the Leaking Underground Storage Tank Trust Fund financing rate) before October 1, 1995, and that is held by any person at the first moment of October 1, 1995 (the October 1, 1995, floor stocks tax). The regulations in this subpart describe the specific fuels subject to tax, the rates of tax, and the persons liable for tax. The regulations in this subpart also provide exceptions to tax and requirements for payment of tax and filing a return reporting tax. This subpart is effective on October 1, 1993.

§ 47.3–2T Definitions relating to the floor stocks taxes under subpart C (temporary).

Act is the Omnibus Budget Reconciliation Act of 1993 (107 Stat. 312).

Aviation fuel is any liquid (other than any product taxable under section 4081) that is commonly or commercially known or sold as a fuel that is suitable for use in an aircraft.

Commercial aviation fuel is any aviation fuel that is held for use or sale for use in a business of transporting persons or property for compensation or hire by air.

Controlled group means—

(1) Any controlled group of corporations within the meaning of section 1563(a), except that the phrase "more than 50 percent" is substituted for the phrase "at least 80 percent" each place it appears therein and a controlled group of corporations includes members that are described in section 1563(b)(2) (relating to excluded members); and

(2) Any other group of organizations, at least one member of which is not a corporation, that is a brother-sister group under common control or a combined group under common control, with terms having the following meanings for this purpose:

(i) *Organization* means a sole proprietorship, a partnership, a trust, an estate, or a corporation.

(ii) *Brother-sister group under common control* means two or more organizations if—

(A) The same five or fewer persons who are individuals, estates, or trusts own (directly and with the application of § 1.414(c)–4 of this chapter) a controlling interest of each organization;

(B) Taking into account the ownership of each person only to the extent that person's ownership is identical with respect to each organization, such persons are in effective control of each organization; and

(C) The five or fewer persons whose ownership is considered for purposes of the controlling interest requirement for each organization are the same persons whose ownership is considered for purposes of the effective control requirement.

(iii) *Controlling interest* means—

(A) In the case of a corporation, ownership of stock possessing at least 50 percent of the total combined voting power of all classes of stock entitled to vote or at least 50 percent of the total value of the shares of all classes of stock of the corporation;

(B) In the case of a trust or estate, ownership of an actuarial interest (determined under § 1.52–1(f) of this chapter) of at least 50 percent of the trust or estate;

(C) In the case of a partnership, ownership of at least 50 percent of the profit interest or capital interest of the partnership; and

(D) In the case of a sole proprietorship, ownership of the sole proprietorship.

(iv) *Effective control* has the meaning given that term in § 1.52–1(d)(3) of this chapter.

(v) *Combined group under common control* has the meaning given that term in § 1.52–1(e) of this chapter.

Diesel fuel means any liquid (other than gasoline) that is suitable for use in a diesel powered highway vehicle, diesel-powered train, or, after December 31, 1993, diesel-powered boat.

Fuel means gasoline, diesel fuel, and aviation fuel (including after September 30, 1995, commercial aviation fuel).

Gasoline means—

(1) All products (including gasohol) that are commonly or commercially known or sold as gasoline and are suitable for use as a motor fuel (other than products that are not sold as gasoline and have an American Society for Testing Materials octane number of less than 75 as determined by the motor method); and

(2) Gasoline blend stocks (as defined in § 48.4081–1(j) of this chapter).

Person includes each business unit that has, or is required to have, its own employer identification number.

§ 47.3–3T Imposition of floor stocks tax on fuel held on October 1, 1993 (temporary).

(a) *Fuels subject to tax.* Section 13241(h)(1) of the Act imposes a floor stocks tax on gasoline (including gasohol), diesel fuel, and aviation fuel—

(1) On which tax was imposed under section 4081 or 4091 before October 1, 1993; and

(2) That is held at the first moment of October 1, 1993, by any person.

(b) *Rate of tax.* The rate of the October 1, 1993, floor stocks tax is 4.3 cents per gallon.

(c) *Person liable for tax.* The person liable for tax on any fuel subject to the October 1, 1993, floor stocks tax is the person that holds the fuel at the first moment of October 1, 1993. Fuel is held by a person if the person has title to the fuel (whether or not delivery to that person has been made) at such time, as determined under applicable local law.

§ 47.3–4T Exceptions to the October 1, 1993, floor stocks tax (temporary).

(a) *Exception for fuel held for an exempt use*—(1) *Gasoline.* The October 1, 1993, floor stocks tax does not apply to gasoline held exclusively for an exempt use. In determining whether gasoline is held exclusively for an exempt use, the following rules apply:

(i) An exempt use, with respect to gasoline, is any use of gasoline (other than use in producing gasohol) that is described in section 6420, 6421, or 6427 and that entitles the ultimate purchaser to a credit or payment equal to the tax imposed by section 4081. Thus, for example, exempt use of gasoline includes use on a farm for farming purposes; use in an off-highway business use; use in certain intercity, local, and school buses; exclusive use by a State or local government or nonprofit educational organization; and use in commercial aircraft.

(ii) Gasoline is held exclusively for an exempt use only if the person that holds gasoline at the first moment of October 1, 1993, actually uses the gasoline in an exempt use.

(iii) Gasoline is not held exclusively for an exempt use if, at the first moment of October 1, 1993, the gasoline is held for resale (including resale to a person that will use the gasoline in an exempt use). Thus, for example, gasoline held by a gasoline service station for sale to a farmer for use on a farm for farming purposes is not exempt from the October 1, 1993, floor stocks tax. However, the farmer would be eligible to claim an income tax credit for an amount equal to the tax under sections 34 and 6420.

(2) *Diesel fuel.* The October 1, 1993, floor stocks tax does not apply to diesel fuel held exclusively for an exempt use. In determining whether diesel fuel is held exclusively for an exempt use, the following rules apply:

(i) An exempt use, with respect to diesel fuel, is any use of diesel fuel (other than use in producing a diesel fuel/alcohol mixture or as fuel in a diesel-powered train) that is described in section 6427 and that entitles the ultimate purchaser to a credit or payment equal to the tax imposed by section 4091. Thus, for example, exempt uses of diesel fuel include use other than as a fuel in a diesel-powered highway vehicle (as defined in § 48.4041–8(b)(4) of this chapter), use on a farm for farming purposes, exclusive use by a State or local government or nonprofit educational organization, and use in an off-highway business use.

(ii) Diesel fuel held for use in a diesel-powered train is not exempt from the October 1, 1993, floor stocks tax under this paragraph (a)(2) unless the fuel is held by a State or local government. Thus, the exemptions for use other than as fuel in a diesel-powered highway vehicle and off-highway business use do not apply to fuel used in a diesel-powered train. See section 6427(l)(3) as amended by section 13241 of the Act.

(iii) Diesel fuel is held exclusively for an exempt use only if the person that holds the fuel at the first moment of October 1, 1993, actually uses the diesel fuel in an exempt use.

(iv) Diesel fuel is not held exclusively for an exempt use if, at the first moment of October 1, 1993, the diesel fuel is held for resale (including resale to a person that will use the diesel fuel in an exempt use). Thus, for example, diesel fuel held by a retailer for sale to a construction company for use in the construction company's off-road machinery is not exempt from the October 1, 1993, floor stocks tax. However, the construction company would be eligible to claim a credit or payment equal to the tax under section 6427.

(3) *Aviation fuel.* The October 1, 1993, floor stocks tax does not apply to aviation fuel held exclusively for an exempt use. In determining whether aviation fuel is held exclusively for an exempt use, the following rules apply:

(i) An exempt use, with respect to aviation fuel, is any use of aviation fuel that is described in section 6427 and that entitles the ultimate purchaser to a credit or payment equal to the tax imposed by section 4091. Thus, for example, exempt use of aviation fuel includes any use on a farm for farming purposes, exclusive use by a State or local government or nonprofit educational organization, and use other than use as a fuel in an aircraft in noncommercial aviation (as defined in section 4041(c)).

(ii) Aviation fuel is held exclusively for an exempt use only if the person that holds the aviation fuel at the first moment of October 1, 1993, actually uses the aviation fuel in an exempt use.

(iii) Aviation fuel is not held exclusively for an exempt use if, at the first moment of October 1, 1993, the aviation fuel is held for resale (including resale to a person that will use the aviation fuel in an exempt use). Thus, for example, aviation fuel held by a fixed-base operator for sale to an airline for use in commercial aviation is not exempt from the October 1, 1993, floor stocks tax. However, the airline would be eligible to claim a credit or payment equal to the tax under section 6427.

(b) *Exception for gasoline or diesel fuel held in vehicle fuel supply tank.* The October 1, 1993, floor stocks tax does not apply to gasoline or diesel fuel held at the first moment of October 1, 1993, in the fuel supply tank of a motor vehicle (as defined in § 48.4041–8(c) of this chapter) or motorboat. This exception does not apply to fuel held in the fuel supply tank of a train or an aircraft.

(c) *Exception for certain amounts of fuel*—(1) *In general.* The October 1, 1993, floor stocks tax does not apply to—

(i) Gasoline that a person holds at the first moment of October 1, 1993, if the aggregate amount of gasoline held by that person at that moment does not exceed 4,000 gallons; and

(ii) Diesel fuel or aviation fuel that a person holds at the first moment of October 1, 1993, if the aggregate amount of diesel fuel or the aggregate amount of aviation fuel held by that person at that moment does not exceed 2,000 gallons.

(2) *Additional rules*—(i) *Coordination with other exemptions.* In determining the aggregate amount of gasoline, diesel fuel, or aviation fuel held by a person at the first moment of October 1, 1993, there is excluded the amount of gasoline, diesel fuel, or aviation fuel exempt from the October 1, 1993, floor stocks tax by reason of paragraph (a) of this section (relating to fuel held for exempt uses), or paragraph (b) of this section (relating to gasoline and diesel fuel held in the fuel supply tank of a motor vehicle or motorboat).

(ii) *All amounts held subject to tax if threshold exceeded.* The October 1, 1993, floor stocks tax applies to all amounts of gasoline, diesel fuel, or aviation fuel (as the case may be) held by a person (and not exempt from tax under paragraph (a) or (b) of this

section) if the aggregate amount of fuel held by the person at the first moment of October 1, 1993, exceeds 4,000 gallons in the case of gasoline or 2,000 gallons in the case of diesel fuel or aviation fuel.

(iii) *Controlled groups.* A member of a controlled group (as defined in § 47.3–2T) holds more than 4,000 gallons of gasoline if the aggregate amount of all gasoline held by all members of the controlled group exceeds 4,000 gallons. A member of a controlled group holds more than 2,000 gallons of diesel fuel or aviation fuel if the aggregate amount of all diesel fuel or aviation fuel, as the case may be, held by all members of the controlled group exceeds 2,000 gallons.

(3) *Examples.* The following examples illustrate the rules of this section:

Example 1. On October 1, 1993, A holds 10,000 gallons of gasoline, 6,000 gallons of which are held exclusively for use on a farm for farming purposes. The remaining 4,000 gallons are held for use in A's highway vehicles. A is not a member of a controlled group. A is not liable for the floor stocks tax on any of the 10,000 gallons because the aggregate amount of fuel held by A for uses other than exempt uses does not exceed 4,000 gallons.

Example 2. On October 1, 1993, B holds 1,900 gallons of diesel fuel and 3,900 gallons of gasoline. B is not a member of a controlled group. B is not liable for the floor stocks tax on diesel fuel because B's holdings of diesel fuel do not exceed 2,000 gallons. B is not liable for the floor stocks tax on gasoline because B's holdings of gasoline do not exceed 4,000 gallons.

Example 3. On October 1, 1993, C holds 4,100 gallons of gasoline for resale at a service station. C is liable for a floor stocks tax of $176.30 (4,100×$.043) on that gasoline.

§ 47.3–5T Requirements with respect to payment and return for the October 1, 1993, floor stocks tax (temporary).

(a) *Payment of tax.* The October 1, 1993, floor stocks tax is to be paid without assessment or notice on or before November 30, 1993.

(b) *Filing of returns*—(1) *Form 720.* Every person liable for the October 1, 1993, floor stocks tax must make a return of the tax on Form 720, Quarterly Federal Excise Tax Return. The return is to be prepared and filed in accordance with the instructions relating to the return.

(2) *Time for filing*—(i) *In general.* The Form 720 required by paragraph (b)(1) of this section must be filed on or before November 30, 1993, and is a return for the third calendar quarter of 1993. A first return reporting only the October 1, 1993, floor stocks tax is also a final return and therefore, in accordance with the instructions to Form 720, the box for "final return" must be marked.

(ii) *Return reporting other taxes.* A person must file only one Form 720 for a quarter. If a person is required under part 40 of this chapter to file Form 720 for the third calendar quarter of 1993 for other excise taxes earlier than November 30, 1993, that person files a single Form 720 for the quarter on or before November 30, 1993. This rule does not extend the time for making deposits or paying any excise tax.

§ 47.3–6T Imposition of the January 1, 1994, floor stocks tax on diesel fuel held on January 1, 1994 (temporary).

(a) *Fuel subject to tax.* Section 13243 of the Act imposes a floor stocks tax on diesel fuel held at the first moment of January 1, 1994, by any person if—

(1) No tax was imposed on the diesel fuel under section 4041(a) or 4091 as in effect on December 31, 1993; and

(2) Tax would have been imposed by section 4081, as amended by section 13242 of the Act, on any prior removal, entry, or sale of the diesel fuel had section 4081 applied to the diesel fuel for periods before January 1, 1994.

(b) *Rate of tax.* The rate of the January 1, 1994, floor stocks tax is 24.4 cents per gallon.

(c) *Person liable for tax.* The person liable for tax on any diesel fuel subject to the January 1, 1994, floor stocks tax is the wholesale distributor or other registered producer, recreational boat operator, or other person that holds the fuel at the first moment of January 1, 1994. Fuel is held by a person if the person has title to the fuel (whether or not delivery to that person has been made) at such time, as determined under applicable local law.

§ 47.3–7T Exception to the January 1, 1994, floor stocks tax (temporary).

(a) *In general.* The January 1, 1994, floor stocks tax does not apply to diesel fuel held exclusively for an exempt use. In determining whether diesel fuel is held exclusively for an exempt use, the following rules apply:

(1) An exempt use, with respect to diesel fuel, is any use of diesel fuel (other than in producing a diesel fuel/alcohol mixture or as fuel in a diesel-powered train) that is described in section 6427 (as in effect on January 1, 1994) and that would entitle the ultimate purchaser to a credit or payment equal to any tax imposed by section 4081 (as in effect on such date). Thus, for example, exempt uses of diesel fuel include use other than as a fuel in a diesel-powered highway vehicle (as defined in § 48.4041–8(b)(4) of this chapter), use on a farm for farming purposes, exclusive use by a State or local government or nonprofit educational organization, and use in an off-highway business use.

(2) Diesel fuel held for use in a diesel-powered train is not exempt from the January 1, 1994, floor stocks tax under paragraph (a)(1) of this section unless the fuel is held by a State or local government. Thus, the exemptions for use other than as fuel in a diesel-powered highway vehicle and off-highway business use do not apply to fuel used in a diesel-powered train. For circumstances in which diesel fuel held for use in a diesel-powered train may be exempt from the January 1, 1994, floor stocks tax, see paragraph (b) of this section (relating to the exemption for dyed fuel) and § 47.3–6T(a)(1), which exempts fuel that was previously taxed under section 4041(a) or 4091 (as in effect on December 31, 1993).

(3) Diesel fuel is held exclusively for an exempt use only if the person that holds the fuel at the first moment of January 1, 1994, actually uses the diesel fuel in an exempt use.

(4) Diesel fuel is not held exclusively for an exempt use if, at the first moment of January 1, 1994, the diesel fuel is held for resale (including resale to a person that will use the diesel fuel in an exempt use). Thus, for example, except in the case of dyed fuel described in paragraph (b) of this section, diesel fuel held by a heating oil retailer for sale for use as home heating oil is not exempt from the January 1, 1994, floor stocks tax. However, a homeowner who uses the fuel for heating purposes would be eligible to claim a credit or may be eligible for a payment equal to the tax under section 6427.

(b) *Exception for dyed fuel.* The January 1, 1994, floor stocks tax does not apply to diesel fuel that would have satisfied the requirements of section 4082 (relating to the exemption from the diesel fuel tax for dyed fuel) had that section, as amended by the Act, been in effect on the date the diesel fuel was removed from the terminal. (See § 47.3–6T(a)(2), which provides that the January 1, 1994, floor stocks tax applies only if tax would have been imposed by section 4081, as amended by section 13242 of the Act, on the removal of the fuel.) Thus, for example, diesel fuel held by a heating oil retailer for sale for use as home heating oil is exempt from the January 1, 1994, floor stocks tax if the fuel was removed from an approved terminal and, at the time of its removal, was dyed in the manner prescribed by section 4082.

§ 47.3–8T Requirements with respect to payment and return for the January 1, 1994, floor stocks tax (temporary).

(a) *Payment of tax.* The January 1, 1994, floor stocks tax is to be paid without assessment or notice on or before July 31, 1994.

(b) *Filing of returns*—(1) *Form 720.* Every person liable for the January 1, 1994, floor stocks tax must make a return of the tax on Form 720, Quarterly Federal Excise Tax Return. The return is to be prepared and filed in accordance with the instructions relating to the return.

(2) *Time for filing*—(i) *In general.* The Form 720 required by paragraph (b)(1) of this section must be filed on or before July 31, 1994, and is a return for the second calendar quarter of 1994. A first return reporting only January 1, 1994, floor stocks tax is also a final return and therefore, in accordance with the instructions to Form 720, the box for "final return" must be marked.

(ii) *Return reporting other taxes.* A person must file only one Form 720 for a quarter. If a person is required under part 40 of this chapter to file Form 720 for the second calendar quarter of 1994 for other excise taxes on or before July 31, 1994, that person files a single Form 720 for the quarter on or before July 31, 1994. This paragraph (b)(2)(ii) does not extend the time for making deposits or paying any excise tax.

§ 47.3–9T Imposition of the October 1, 1995, floor stocks tax on commercial aviation fuel held on October 1, 1995 (temporary).

(a) *Fuel subject to tax.* Section 13245 of the Act imposes a floor stocks tax on commercial aviation fuel on which tax was imposed under section 4091 before October 1, 1995, and which is held on the first moment of that date by any person. Tax is imposed under section 4091 even if imposed only at the Leaking Underground Storage Tank Trust Fund financing rate under that section.

(b) *Rate of tax.* The rate of the October 1, 1995, floor stocks tax is 4.3 cents per gallon.

(c) *Person liable for tax.* The person liable for tax on any commercial aviation fuel subject to the October 1, 1995, floor stocks tax is the person that holds the commercial aviation fuel at the first moment of October 1, 1995. Fuel is held by a person if the person has title to the fuel (whether or not delivery to that person has been made) at such time, as determined under applicable local law.

§ 47.3–10T Exceptions to the October 1, 1995, floor stocks tax (temporary).

(a) *Exception for commercial aviation fuel held for use as supplies for vessels or aircraft.* The October 1, 1995, floor stocks tax does not apply to commercial aviation fuel held exclusively for use as supplies for vessels or aircraft within the meaning of section 4221(d)(3). In determining whether commercial aviation fuel is held exclusively for such use, the following rules apply:

(1) Commercial aviation fuel is held exclusively for use as supplies for vessels or aircraft only if the person that holds the commercial aviation fuel at the first moment of October 1, 1995, actually uses the aviation fuel in that exempt use.

(2) Commercial aviation fuel is not held exclusively for use as supplies for vessels or aircraft if, at the first moment of October 1, 1995, the commercial aviation fuel is held for resale (including resale to a person that will use the aviation fuel as supplies for vessels or aircraft). Thus, for example, commercial aviation fuel held by a fixed base operator for sale to an airline for use in foreign trade is not exempt from the October 1, 1995, floor stocks tax. However, the airline would be eligible to claim a credit or payment equal to the tax under section 6427.

(b) *Exception for certain amounts of fuel*—(1) *In general.* The October 1, 1995, floor stocks tax does not apply to commercial aviation fuel that a person holds at the first moment of October 1, 1995, if the aggregate amount of commercial aviation fuel held by that person at that moment does not exceed 2,000 gallons.

(2) *Additional rules relating to the 2,000 gallon exception*—(i) *Coordination with other exemptions.* In determining the aggregate amount of commercial aviation fuel held by a person at the first moment of October 1, 1995, there is to be excluded the amount of commercial aviation fuel exempt from the October 1, 1995, floor stocks tax by reason of paragraph (a) of this section (relating to fuel held for an exempt use).

(ii) *All amounts held subject to tax if threshold exceeded.* The October 1, 1995, floor stocks tax applies to all amounts of commercial aviation fuel held by a person (and not exempt from tax under paragraph (a) of this section) if the aggregate amount of commercial aviation fuel held by the person at the first moment of October 1, 1995, exceeds 2,000 gallons.

(iii) *Controlled groups.* A member of a controlled group (as defined in § 47.3–2T) holds more than 2,000 gallons of commercial aviation fuel if the aggregate amount of all commercial aviation fuel held by all members of the controlled group exceeds 2,000 gallons.

(3) *Example.* The following example illustrates the rules of this paragraph (b):

Example. D, E, and F are members of the same controlled group. On October 1, 1995, D holds 2,000 gallons of commercial aviation fuel. E holds 1,500 gallons of commercial aviation fuel, and F holds 500 gallons of commercial aviation fuel. None of the commercial aviation fuel is held for an exempt use. Because the aggregate amount held by all members of the group is 4,000 gallons, which exceeds 2,000 gallons, all commercial aviation fuel held by each member is subject to the floor stocks tax. Thus, D is liable for tax of $86.00 (2,000 X $.043), E is liable for tax of $64.50 (1,500 X $.043), and F is liable for tax of $21.50 (500 X $.043).

§ 47.3–11T Requirements with respect to payment and return for the October 1, 1995, floor stocks tax (temporary).

(a) *Payment of tax.* The October 1, 1995, floor stocks tax is to be paid without assessment or notice on or before April 30, 1996.

(b) *Filing of returns*—(1) *Form 720.* Every person liable for the October 1, 1995, floor stocks tax must make a return of the tax on Form 720, Quarterly Federal Excise Tax Return. The return is to be prepared and filed in accordance with the instructions relating to the return.

(2) *Time for filing*—(i) *In general.* The Form 720 required by paragraph (b)(1) of this section must be filed on or before April 30, 1996, and is a return for the first calendar quarter of 1996. A first return reporting only October 1, 1995, floor stocks tax is also a final return and therefore, in accordance with the instructions to Form 720, the box for "final return" must be marked.

(ii) *Return reporting other taxes.* A person must file only one Form 720 for a quarter. If a person is required under part 40 of this chapter to file Form 720 for the first calendar quarter of 1996 for other excise taxes on or before May 31, 1996, that person files a single Form 720 for the quarter on or before May 31, 1996. This paragraph (b)(2)(ii) does not extend the time for making deposits or paying any excise tax.

Margaret Milner Richardson,

Commissioner of Internal Revenue.

Approved: November 10, 1993.

Leslie Samuels,

Assistant Secretary of the Treasury.

BILLING CODE 4830–01–U

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 117

[CGD09–93–034]

Drawbridge Operation Regulations, Chicago River, IL

AGENCY: Coast Guard, DOT.

ACTION: Notice of temporary deviation.

SUMMARY: Notice is hereby given that the Coast Guard has issued a temporary deviation to the regulations governing the opening of certain drawbridges over the Chicago River, from December 1 through December 31, 1993. This deviation requires the City to open the bridges on signal after receiving an advance notice of a vessel's intended time of passage through the draws without regard to the number of vessels to be afforded passage, and establishes specific periods of time in which these bridge openings are to be scheduled. The City is being granted this deviation to reduce the frequency with which it must open its drawbridges and provide time for necessary maintenance during the weekdays, Monday through Friday.

EFFECTIVE DATE: The period of deviation is effective from December 1, 1993, and continues through December 31, 1993.

FOR FURTHER INFORMATION CONTACT: Robert W. Bloom, Jr., Bridge Program Manager, Ninth Coast Guard District. Telephone number (216) 522–3933.

SUPPLEMENTARY INFORMATION: The flotillas of recreational sailboats have all returned to the boatyards for winter storage on the Chicago River system. This deviation is for the purpose of providing specific times on Saturdays and Sundays for sailboat movements on the river system, while providing the City with an uninterrupted period of Mondays through Fridays to perform maintenance on its bridges. The bridges affected by this deviation are listed below:

Main Branch

Lake Shore Drive
Columbus Drive
Michigan Avenue
Wabash Avenue
State Street
Dearborn Street
Clark Street
La Salle Street
Wells Street
Franklin-Orleans Street

South Branch

Lake Street
Randolph Street
Washington Street
Madison Avenue
Monroe Street
Adams Street
Jackson Boulevard
Van Buren Street
Eisenhower Expressway
Harrison Street
Roosevelt Road
18th Street
Canal Street
South Halsted Street
South Loomis Street
South Ashland Avenue

North Branch

Grand Avenue
Ohio Street
Chicago Avenue
North Halsted Street

This deviation from normal operating regulations is authorized in accordance with the provisions of title 33 of the Code of Federal Regulations, § 117.35, and applies only to the passage of recreational vessels. Under this deviation the bridges listed above operated by the City of Chicago shall operate as follows:

(a) The draws need open for the passage of recreational vessels only from 7 a.m. to 2 p.m. on Saturdays and on Sundays, and only after receiving a 24 hours advance notice.

(b) The Kinzie Street bridge, mile 1.81 across the North Branch, and Cermak Road bridge, mile 4.05 across the South Branch, shall continue to operate in accordance with requirements presently established in 33 CFR 117.391.

(c) All draws shall open for commercial vessels in accordance with current regulations in 33 CFR 117.391. In accordance with current regulations, including 33 CFR 117.391, government vessels of the United States, state and local vessels used for public safety, and vessels in distress shall be passed through the draws of all bridges as soon as possible at all times.

(d) This period of deviation is effective from December 1, 1993, through December 31, 1993.

Additional information may be obtained from Robert W. Bloom, Jr., Bridge Program Manager, Ninth Coast Guard District, room 2083D, 1240 East Ninth Street, Cleveland, Ohio 44199–2060, telephone (216) 522–3993.

Dated: November 22, 1993.

Rudy K. Peschel,

Rear Admiral, U.S. Coast Guard, Commander, Ninth Coast Guard District.

BILLING CODE 4910–14–M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[CA 45–1–5978; FRL–4806–7]

Conditional Approval of California's Substitute Program for the Clean-Fuel Fleet Program

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of final rulemaking (NFR).

SUMMARY: EPA is finalizing the conditional approval of revisions to the California state implementation plan (SIP) proposed in the **Federal Register** on May 7, 1993. EPA did not receive any written comments during the 30-day comment period.

The California Air Resources Board (CARB) requested EPA's conditional approval of its commitment to submit a substitute plan for the Clean Air Act (CAA or Act) Clean-Fuel Fleet program (fleet program). The CAA fleet program provisions require states, in order to opt-out of the fleet program, to submit a substitute program for all or a portion of the program(s) which achieve at least equal long-term emission reductions of ozone-producing and toxic air emissions. EPA has determined that, in limited circumstances, it may accept committal SIPs to perform CAA requirements. In this action, EPA is finalizing the conditional approval of California's commitment, thereby granting California the ability to opt-out of the fleet program.

EFFECTIVE DATE: This action is effective on December 29, 1993.

ADDRESSES: Copies of the committal SIP and Notice of Proposed Rulemaking are available for public inspection at the following EPA Region IX office during normal business hours: Mobile Sources Section, Air and Toxics Division, U.S. Environmental Protection Agency, Region IX, 75 Hawthorne Street, San Francisco, CA 94105.

FOR FURTHER INFORMATION CONTACT: Roxanne Johnson, Mobile Sources Section, (A–2–1), Air & Toxics Division, U.S. Environmental Protection Agency, Region IX, 75 Hawthorne Street, San Francisco, CA 94105, Telephone: (415) 744–1227.

SUPPLEMENTARY INFORMATION:

I. Background

On May 7, 1993 in 58 FR 27254, EPA proposed to conditionally approve the State of California's commitment to submit a substitute plan to "opt-out" of the CAA Clean-Fuel Fleet program. The

fleet program is to introduce (in 22 nonattainment cities) lower pollution emitting vehicles into centrally fueled fleets of (10 or more) vehicles in areas with the worst air quality problems. Section 246 of the Act directs certain states containing "covered areas," as defined in section 246(a), to revise their SIPs to require that "at least a specified percentage of all new covered fleet vehicles in model year 1998 and thereafter purchased by each covered fleet operated in each covered area shall be clean-fuel vehicles and shall use clean alternative fuels when operating in the covered area."

The goal of the fleet program is to reduce emissions of non-methane organic gases (NMOG) and oxides of nitrogen (NOx), and to demonstrate the feasibility of using clean-fuel vehicles in centrally-fueled fleets. A credit program for the fleet program along with transportation control measure exemptions for fleet vehicles was promulgated in a separate rulemaking (58 FR 11888, March 1, 1993).

California has proposed to opt-out of the fleet program by submitting California's low-emission vehicle (LEV) regulations as a substitute program. The SIP revision will commit California to achieve emission reductions equivalent to those predicted to occur with full implementation of the CAA fleet program.

II. Response to Comments

A 30-day public comment period was provided in the May 7, 1993, 58 FR 27253. EPA did not receive any written comments during the comment period, which ended on June 7, 1993.

III. EPA Evaluation and Final Action

EPA is finalizing action to conditionally approve the submittal revision for inclusion into the California SIP (see General Preamble for the Implementation of Title I of the Clean Air Act Amendments of 1990, April 16, 1992, 57 FR 13498, regarding the requirements of section 110(a) and part D of the CAA).

EPA determined that if California and other states are intending to opt-out of the fleet program they should do so by November 15, 1992, and should at that time submit and commit to a substitute plan. EPA conditionally approved California's commitment and the State will now be required to submit a fully adopted SIP revision fulfilling that commitment by May 15, 1994 (also the deadline for submitting SIP revisions to implement the fleet program pursuant to section 246(a) of the Act). If California fails to submit a SIP revision fulfilling its commitment of the substitute program by May 15, 1994, the conditional approval will be treated as a disapproval and the state will have an obligation to submit a fully-adopted SIP revision to implement the fleet program in accordance with section 246. EPA believes this approach is consistent with the provisions of the Act and will ensure that, by May 15, 1994, a SIP revision either implementing the fleet program or a substitute program achieving equivalent air quality benefits will have been submitted to EPA.

EPA will require much greater detail by May 15, 1994 describing why and how California's substitute program is sufficient to provide long-term reductions in ozone-producing, carbon monoxide and toxic air emissions equal to or greater than those provided by the CAA fleet program. EPA expects that California will consider its reasonable further progress goals (as defined in section 171 of the CAA) in deciding whether to opt-out of the fleet program. The State can still choose to implement part or all of the CAA fleet program by May 15, 1994.

Nothing in this action should be construed as permitting or allowing or establishing a precedent for any future request for revision to any SIP. Each request for revision to the SIP shall be considered separately in light of specific technical, economic, and environmental factors and in relation to relevant statutory regulatory requirements.

IV. Regulatory Process

This action has been classified as a Table 2 Action by the Regional Administrator under the procedures published in the **Federal Register** on January 19, 1989 (54 FR 2214–2225). On January 6, 1989, the Office of Management and Budget (OMB) waived Table 2 and Table 3 SIP revisions from the requirement of section 3 of Executive Order 12291 for a period of two years. U.S. EPA has submitted a request for a permanent waiver for Table 2 and Table 3 SIP revisions. The OMB has agreed to continue the waiver until such time as it rules on U.S. EPA's request. This request continues in effect under Executive Order 12866 which superseded Executive Order 12291 on September 30, 1993.

Under the Regulatory Flexibility Act, 5 U.S.C. 600 *et seq.*, EPA must prepare a regulatory flexibility analysis assessing the impact of any proposed or final rule on small entities. 5 U.S.C. 603 and 604. Alternatively, EPA may certify that the plan will not have a significant impact on a substantial number of small entities. Small entities include small businesses, small not-for-profit enterprises, and government entities with jurisdiction over populations less than 50,000.

Conditional approvals under section 110 and subchapter I, part D of the CAA do not create any new requirements, but simply approve requirements that the State is already imposing. Therefore, because the federal SIP-approval does not impose any new requirements, EPA certifies that this final action would not have a significant impact on any small entities affected. Moreover, due to the nature of the federal-state relationship under the CAA, preparation of a regulatory flexibility analysis would constitute federal inquiry into the economic reasonableness of State action. The CAA forbids EPA to base its actions concerning SIPs on such grounds. *Union Electric Co.* v *U.S. E.P.A.*, 427 U.S. 246, 256–266 (S.Ct. 1976); 42 U.S.C. 7410(a)(2).

List of Subjects in 40 CFR Part 52

Environmental protection, Administrative practice and procedure, Air pollution control for Ozone, Hydrocarbons, Intergovernmental relations, Motor vehicles' pollution, Nitrogen oxide, Reporting and recordkeeping requirements.

Dated: November 2, 1993.

Felicia Marcus,

Regional Administrator.

Part 52, chapter I, title 40 of the Code of Federal Regulations is amended to read as follows:

PART 52—[AMENDED]

1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401–7671q.

Subpart F—California

2. Subpart F is amended by adding § 52.219 to read as follows:

§ 52.219 Identification of plan—Conditional approval.

The plan revision commitments listed in paragraph (a) of this section were submitted on the date specified.

(a) On November 13, 1992, California submitted a commitment to prepare a revision to the California State Implementation Plan (SIP) for the California ozone nonattainment areas to address the requirement in section 182(c)(4)(B) of the 1990 Clean Air Act Amendments that requires the States to develop a SIP revision for all ozone nonattainment areas classified as serious and above to opt-out of the Clean-Fuel Fleet Program by submitting for EPA approval a substitute program(s) resulting in as much or greater long-term reductions in ozone-producing and

toxic air emissions. The State submittal contained an interim milestone to supply more accurate emission reduction data demonstrating equivalence no later than one year after the publication date of the Federal Register Notice approving the States committal SIP revision. California is required to submit the final SIP revision by May 15, 1994. The State held a public meeting on this committal SIP on March 17, 1992. The California SIP revisions are met automatically when the SIP revision concerns a regulation previously adopted by the Board.

Basic and Enhanced Vehicle Inspection and Maintenance Plan; Indiana

AGENCY: United States Environmental Protection Agency (U.S. EPA).

ACTION: Final rule.

SUMMARY: This action disapproves a revision to the Indiana State Implementation Plan (SIP) for the attainment of the National Ambient Air Quality Standard for ozone. This revision was intended to provide for the adoption and implementation of a vehicle inspection/maintenance (I/M) program meeting the requirements of U.S. EPA regulations, published in the Federal Register on November 5, 1992, concerning vehicle I/M programs (I/M Regulation) for the Lake, Porter, Clark, and Floyd Counties ozone nonattainment areas. The revision was submitted on December 2, 1992 and consisted of a commitment by the Governor's designee to the timely adoption and implementation of an I/M program meeting all the requirements of U.S. EPA's I/M regulations and a schedule for implementation of the required program. U.S. EPA's disapproval of the submittal is based on the failure by the State of Indiana to meet important milestones pertaining to the development and adoption of necessary rulemaking for the I/M program. Such failure prevented the State from meeting its commitment to submit a full revised I/M SIP by November 15, 1993. U.S. EPA proposed to disapprove the submittal on September 9, 1993.

EFFECTIVE DATE: The final rule is effective on December 29, 1993.

ADDRESSES: Materials relevant to this final rule are available at the following address: U.S. Environmental Protection Agency, Region 5, Air and Radiation Division, Regulation Development Branch, 77 West Jackson Boulevard, Chicago, Illinois 60604. The docket may be inspected between the hours of 8:30 a.m. until 12 noon and from 1:30 p.m. until 3:30 p.m. Monday through Friday. A reasonable fee may be charged by U.S. EPA for copying docket material.

FOR FURTHER INFORMATION CONTACT: Francisco J. Acevedo, Environmental Engineer, Regulation Development Section, Regulation Development Branch (5AR-18J), United States Environmental Protection Agency, Region 5, 77 West Jackson Boulevard, Chicago, Illinois 60604, (312) 886-6061.Anyone wishing to come to Region 5 offices should first contact Francisco J. Acevedo.

SUPPLEMENTARY INFORMATION:

I. Background

On November 5, 1992 (57 FR 52950) U.S. EPA published a final regulation establishing the I/M requirements, pursuant to section 182 of the Act. The I/M regulation was codified at 40 CFR part 51, subpart S, and requires, among other things, that each State that is required to implement an I/M program must submit by November 15, 1992, a SIP revision including two elements: (1) A commitment from the Governor or his/her designee to the timely adoption and implementation of an I/M program meeting all the requirements of the I/M regulation; and (2) a schedule of implementation. In addition, the commitment was to provide interim milestones that the State must meet with regard to the timely implementation of any necessary legislation and regulations required to have full legal authority to implement the program. Failure by the State to meet any of the above mentioned requirements is grounds for U.S. EPA to disapprove the commitment.

Under the authority of the Governor, the Commissioner of the Indiana Department of Environmental Management, on December 2, 1992, submitted a SIP revision to satisfy certain requirements of the I/M regulation to U.S. EPA. A public hearing on this submittal was held by the State on October 22, 1992, in Gary, Indiana. The submittal included a commitment to the timely adoption and implementation of an I/M program in the Lake, Porter, Clark, and Floyd Counties ozone nonattainment areas meeting all the requirements of the I/M regulation and the Act by November 15, 1993, and a schedule of implementation.

On June 30, 1993, the Indiana legislature adjourned without taking necessary action to enable implementation of the I/M provisions mandated in the Clean Air Act and the I/M rule for Lake and Porter Counties. This failure to provide necessary authority has prevented the State from submitting a complete SIP revision containing all the required elements of the program by November 15, 1993.

U.S. EPA reviewed the December 2, 1992 commitment and proposed to disapprove it on September 9, 1993 (58 FR 47415), based on the failure by the State to meet the commitment and schedule contained in the SIP submittal pertaining to the adoption of necessary authority to implement I/M requirements during the 1993 Indiana General legislative session.

On August 17, 1993, U.S. EPA sent a letter to Governor Bayh of Indiana and to the Federal Highway Administration advising them that U.S. EPA has decided to exercise its discretionary authority under section 110(m) of the Act to impose sanctions at any time once a finding of SIP deficiency is made. Because of the failure of the Legislature to provide necessary authority to implement an enhanced I/M program in Lake and Porter Counties, it is U.S. EPA's intent to publish a proposed rule in the Federal Register in the near future proposing to limit certain Federal highway funding assistance statewide and to impose 2:1 emissions offset growth limitations for new and modified major stationary sources of volatile organic compounds and oxides of nitrogen in the ozone nonattainment counties of Lake, Porter, Clark, Floyd, Marion, St. Joseph, Elkhart, and Vanderburgh Counties. A public comment period of at least 30 days and an opportunity for public hearing(s) will be provided to solicit comments on the proposed imposition of sanctions.

This final disapproval of the State's commitment initiates the sanctions process under section 179(a). Under section 179(a), U.S. EPA is required to impose one of the sanctions under section 179(b) 18 months after the final disapproval if the deficiencies are not corrected by that time. In addition, the final disapproval triggers the Federal implementation plan requirement under section 110(c). Further, as stated above, U.S. EPA in an August 17, 1993, letter to Governor Bayh of Indiana has indicated its decision to exercise its discretionary authority under section 110(m) of the Act in this situation. Such discretionary authority allows U.S. EPA to impose sanctions at any time once a finding of SIP deficiency is made.

II. Public Comment/U.S. EPA Response

U.S. EPA received only one comment during the comment period, which ended October 12, 1993. In a September 24, 1993 letter, the Natural Resources Defense Council (NRDC) strongly supported U.S. EPA's proposal to disapprove the Indiana submittal. It also urged U.S. EPA to make the disapproval finding retroactive to November 15, 1992. In addition, NRDC supported U.S. EPA's decision to propose sanctions, and urged U.S. EPA to impose such sanctions statewide. Finally, NRDC stated its opposition to U.S. EPA's use of conditional approvals.

In response to NRDC's comment on making the disapproval retroactive, U.S. EPA does not believe that such action is appropriate. With regard to NRDC's comment on sanctions, U.S. EPA notes that it will be publishing a notice of proposed rulemaking in the **Federal Register** concerning this matter; NRDC may wish to comment in the context of that rulemaking. Finally, since U.S. EPA is disapproving the Indiana submittal in this action, NRDC's comments pertaining to U.S. EPA's authority with regard to conditional approvals is moot.

III. Rulemaking Action

U.S. EPA is disapproving this revision to the Indiana Ozone State Implementation Plan which fails to meet the requirements necessary to develop the required I/M program in the Indiana required areas.

Nothing in this action should be construed as permitting, allowing or establishing a precedent for any future request for revision to any SIP. U.S. EPA shall consider each request for revision to the SIP in light of specific technical, economic, and environmental factors and in relation to relevant statutory and regulatory requirements.

This action has been classified as a Table 2 Action by the Regional Administrator under the procedures published in the **Federal Register** on January 19, 1989 (54 FR 2214–2225). On January 6, 1989, the Office of Management and Budget (OMB) waived Table 2 and Table 3 SIP revisions from the requirement of section 3 of Executive Order 12291 for a period of two years. U.S. EPA has submitted a request for a permanent waiver for Table 2 and Table 3 SIP revisions. The OMB has agreed to continue the waiver until such time as it rules on U.S. EPA's request. This request continues in effect under Executive Order 12866 which superseded Executive Order 12291 on September 30, 1993.

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Carbon monoxide, Motor vehicle pollution control, Nitrogen oxide, Volatile organic compounds.

Dated: October 27, 1993.

David A. Ullrich,

Acting Regional Administrator.

For the reasons set out in the preamble, part 52, chapter 1, title 40 of the Code of Federal Regulations is amended as follows:

PART 52—[AMENDED]

1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401–7671q.

Subpart P—Indiana

2. Section 52.786 is amended by adding paragraph (h) to read as follows:

§ 52.786 Inspection and maintenance program.

* * * * *

(h) The State's December 2, 1992, commitment to timely adopt and implement enhanced inspection and maintenance (I/M) rules for Lake and Porter Counties is disapproved based on the failure of the State of Indiana to meet important milestones pertaining to the development and adoption of necessary authority for the I/M program. This disapproval initiates the sanction process of section 179(a) of the Act.

Approval and Promulgation of Air Quality Implementation Plans; New Mexico; Revision to the State Implementation Plan Addressing Carbon Monoxide (CO) for Albuquerque/Bernalillo County

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rulemaking.

SUMMARY: This action approves a revision to the New Mexico State Implementation Plan (SIP) addressing CO for Albuquerque/Bernalillo County, outside the boundaries of Indian lands. Certain elements of the complete Albuquerque/Bernalillo County CO SIP were submitted by the Governor of New Mexico to the EPA by cover letter dated November 5, 1992, for the purpose of bringing about the attainment of the National Ambient Air Quality Standards (NAAQS) for CO. These elements satisfy certain Federal requirements for an approvable nonattainment area CO SIP for Albuquerque/Bernalillo County. Therefore, this **Federal Register** (FR) action only approves some of the elements of the complete Albuquerque/Bernalillo County CO SIP, specifically the 1990 base year CO emissions inventory, the oxygenated fuels program, and the winter woodburning program. The remaining elements of the complete Albuquerque/Bernalillo County CO SIP, to be submitted to the EPA by November 15, 1993, will be acted upon in separate FR actions.

EFFECTIVE DATE: This action will become effective on January 28, 1994, unless notice is received by December 29, 1993, that someone wishes to submit adverse or critical comments. If the effective date is delayed, timely notice will be published in the **Federal Register.**

ADDRESSES: Written comments on this action should be addressed to Mr. Thomas H. Diggs, Chief, Planning Section, at the EPA Region 6 Office listed. Copies of the documents relevant to this action are available for public inspection during normal business hours at the following locations. The interested persons wanting to examine these documents should make an appointment with the appropriate office at least twenty-four hours before the visiting day.

U.S. Environmental Protection Agency, Region 6, Air Programs Branch (6T-AP), 1445 Ross Avenue, Suite 700,Dallas, Texas 75202–2733.

Mr. Jerry Kurtzweg (ANR–443), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460.

Albuquerque Environmental Health Department, Air Pollution Control Division, P.O. Box 1293, Albuquerque, New Mexico 87103.

FOR FURTHER INFORMATION CONTACT: Mr. Mark Sather, Planning Section (6T-AP), Air Programs Branch, U.S. EPA Region 6,1445 Ross Avenue, Dallas, Texas 75202–2733, telephone(214) 655–7258.

SUPPLEMENTARY INFORMATION:

Albuquerque/Bernalillo County, New Mexico, was designated nonattainment for CO and classified as moderate with a design value below 12.7 parts per million (ppm.) (specifically 11.1 ppm.), under sections 107(d)(4)(A) and 186(a) of the Clean Air Act (CAA), upon enactment of the Clean Air Act Amendments (CAAA) of 1990.[1] Please

[1] The CAAA of 1990 made significant changes to the air quality planning requirements for areas that do not meet (or that significantly contribute to ambient air quality in a nearby area that does not

Continued

reference 56 FR 56694 (November 6, 1991) and 57 FR 13498 and 57 FR 13529 (April 16, 1992). The air quality planning requirements for moderate CO nonattainment areas with a design value less than or equal to 12.7 ppm. are set out in subparts one and three of part D, Title I of the CAA. Subpart one contains provisions generally applicable to all nonattainment areas and subpart three contains provisions specifically applicable to CO nonattainment areas. Section 104 of the CAAA of 1990 amended part D of Title I of the CAA by adding two additional sections to subpart three (sections 186 and 187), which pertain to the classification of CO nonattainment areas and to the submission requirements of the SIPs for these areas, respectively. At times, subparts one and three overlap or conflict. The EPA has attempted to clarify the relationship among these various provisions in the General Preamble and, as appropriate, in this FR action.

The EPA has issued a "General Preamble" describing the EPA's preliminary views on how the EPA intends to review SIPs and SIP revisions submitted under Title I of the CAA, including those State submittals containing moderate CO nonattainment area SIP requirements (see generally 57 FR 13498 (April 16, 1992) and 57 FR 18070 (April 28, 1992)). Because the EPA is describing its interpretations here only in broad terms, the reader should refer to the General Preamble for a more detailed discussion of the interpretations of Title I advanced in this action and the supporting rationale. In this rulemaking action on certain elements of the Albuquerque/Bernalillo County, New Mexico, complete moderate CO SIP, the EPA is applying its interpretations, taking into consideration the specific factual issues presented.

On November 5, 1992, the Governor of New Mexico submitted to the EPA a SIP revision for CO concerning Albuquerque/Bernalillo County that was intended to satisfy CAA requirements due on November 15, 1992. The CAA outlines certain required items to be included in CO SIPs. The required items for the Albuquerque/Bernalillo County CO SIP, due November 15, 1992, unless otherwise noted, include: (1) A comprehensive, accurate, and current inventory of actual emissions from all sources of CO in the nonattainment area (sections 172(c)(3) and 187(a)(1) of the CAA); (2) no later than September 30, 1995, and no later than the end of each three year period thereafter, until the area is redesignated to attainment, a revised inventory meeting the requirements of sections 187(a)(1) and 187(a)(5) of the CAA;(3) a permit program to be submitted by November 15, 1993, which meets the requirements of section 173 for the construction and operation of new and modified major stationary sources of CO (section 172(c)(5)); (4) contingency measures dueNovember 15, 1993, that are to be implemented if the EPA determines that the area has failed to attain the primary standards by the applicable date (section 172(c)(9)); (5) a commitment to upgrade and submit a SIP revision for the Inspection and Maintenance (I/M) program by November 15, 1993 (section 187(a)(4)); and (6) an oxygenated fuels program (section 211(m)). As outlined below, the State of New Mexico's November 5, 1992, SIP revision for CO concerning Albuquerque/Bernalillo County, a moderate CO nonattainment area, was reviewed against the applicable requirements. The reader is referred to the November 5, 1992, Albuquerque/Bernalillo County CO SIP submittal and the EPA's supporting technical information for pertinent details regarding each requirement. These items are available for public review at the EPA Region 6 address indicated above.

Section 110(k) of the CAA sets out provisions governing the EPA's review of SIP submittals (see 57 FR 13565–13566). In this FR action, the EPA is approving only some of the elements of the complete Albuquerque/Bernalillo County CO SIP, specifically the 1990 base year CO emissions inventory, the oxygenated fuels program, and the winter woodburning program. The remaining elements of the complete Albuquerque/Bernalillo County CO SIP, to be submitted to the EPA by November 15, 1993, will be acted upon in separate FR actions.

Analysis of City/County Submission

1. Procedural Background

The CAA requires States to observe certain procedural requirements in developing implementation plans and plan revisions for submission to the EPA. Section 110(a)(2) of the CAA provides that each implementation plan submitted by a State must be adopted after reasonable notice and public hearing.[2] See also section 110(l) of the CAA. Also, the EPA must determine whether a submittal is complete and therefore warrants further EPA review and action (see section 110(k)(1) and 57 FR 13565). The EPA's completeness criteria for SIP submittals are set out at 40 CFR part 51, appendix V (1991), as amended by 56 FR 42216 (August 26, 1991). The EPA attempts to make completeness determinations within 60 days of receiving a submission. However, a submittal is deemed complete by operation of law if a completeness determination is not made by the EPA six months after receipt of the submission.

After providing adequate notice, Albuquerque/Bernalillo County held public hearings on September 9, 1992, and onOctober 7, 1992, to entertain public comment on certain elements of the complete CO implementation plan Following the public hearings, these elements were adopted by the City/County and signed by the Governor on November 5, 1992, and submitted to the EPA as a proposed revision to the SIP.

The SIP revision was reviewed by the EPA to determine completeness shortly after its submittal, in accordance with the completeness criteria referenced above. A letter datedJanuary 15, 1993, was forwarded to the Governor indicating the completeness of the submittal and the next steps to be taken in the review process.

2. CO Emission Inventory

Section 172(c)(3) of the CAA requires that nonattainment plan provisions include a comprehensive, accurate, and current inventory of actual emissions from all sources of relevant pollutants in the nonattainment area. Albuquerque/Bernalillo County included the requisite inventory in the CO SIP. The base year for the inventory was 1990, using a three month CO season of November 1990 through January 1991. Stationary point sources, stationary area sources, on-road mobile sources, and nonroad mobile sources of CO were included in the inventory. Stationary sources with emissions of greater than 100 tons per year within a 25-mile buffer of the nonattainment area were also included in the inventory. The following list presents a summary of the CO peak season daily emissions estimates in tons per day by source category: Point Sources, 0.76 tons per day; Area Sources, 66.14 tons per day; Mobile On-Road Sources, 231.69 tons per day; Mobile Nonroad Sources, 41.18 tons per day; Total Sources, 339.77 tons per day. Available guidance for preparing emission inventories is provided in the General Preamble (57 FR 13498, April 16, 1992).

Section 110(k) of the CAA sets out provisions governing the EPA's review

meet) the CO NAAQS (see Pub. L. No. 101–549, 104 Stat. 2399). References herein are to the CAAA, 42 U.S.C. 7401 *et seq.*

[2] Section 172(c)(7) of the Act requires that plan provisions for nonattainment areas meet the applicable provisions of section 110(a)(2).

of base year emission inventory submittals in order to determine approval or disapproval under section 187(a)(1). The EPA is granting approval of the Albuquerque/Bernalillo County 1990 base year CO emissions inventory submitted on November 5, 1992, based on the Level I, II, and III review findings. The following paragraphs outline the review procedures performed on the inventory.

The Level I and II review process is used to determine that all components of the base year inventory are present. The review also evaluates the level of supporting documentation provided by the State, and assesses whether the emissions were developed according to current EPA guidance. The data quality is also evaluated.

The Level III review process is outlined here and consists of nine points that the inventory must include. For a base year emission inventory to be acceptable, it must pass all of the following criteria: (1) An approved Inventory Preparation Plan must be provided and the Quality Assurance contained in the Inventory Preparation Plan must be performed and its implementation documented; (2) adequate documentation must be provided that enables the reviewer to determine the emission estimation procedures and the data sources used to develop the inventory, and summary emissions by categories of source type must be provided; (3) the point source inventory must be complete; (4) point source emissions must have been prepared or calculated according to the current EPA guidance; (5) the area source inventory must be complete; (6) the area source emissions must have been prepared or calculated according to the current EPA guidance; (7) the methods used to develop vehicle miles traveled (VMT) estimates (e.g., a network transportation planning model) must follow EPA guidance, and the VMT methods must be adequately described and documented in the inventory report; (8) the MOBILE model must be correctly used to produce emission factors for each of the vehicle classes; and (9) nonroad mobile emissions must be prepared according to current EPA guidance for all of the source categories.

The base year emission inventory will be approved if it passes Levels I, II, and III of the review process. Detailed Level I and II review procedures can be found in the following document—"Quality Review Guidelines for 1990 Base Year Emission Inventories," U.S. Environmental Protection Agency, Office of Air Quality Planning and Standards, Research Triangle Park, North Carolina, July 27, 1992. Level III review procedures are specified in a memorandum from John S. Seitz to the Regional Air Division Directors, entitled "Emission Inventory Issues," June 24, 1993.[3]

The EPA is approving this emission inventory as meeting the requirements of section 187(a)(1) of the CAA. The EPA's review of the Albuquerque 1990 base year CO emission inventory provided positive answers to all of the Level III review criteria.Please reference Appendix Two of the Albuquerque/ Bernalillo County CO SIP for specific details on the inventory, and the EPA's Technical Support Document for details of the EPA's evaluation of the inventory. Finally, it should be noted that no later than September 30, 1995, and no later than the end of each three year period thereafter (until the area is redesignated to attainment), Albuquerque/Bernalillo County will be required to submit to the EPA a revised inventory meeting the requirements of sections 187(a)(1) and 187(a)(5) of the CAA.

3. Nonattainment New Source Review Permit Program

Albuquerque/Bernalillo County has submitted new source review (NSR) regulatory revisions to the EPA. These revisions were proposed for approval by the EPA at 57 FR 43653(September 22, 1992). The revisions were due independently of the November 15, 1992, moderate CO nonattainment area SIP requirements addressed in this FR action. Please reference the above FR notice. In the proposed approval actions, the EPA outlined certain amendments to be made by the City of Albuquerque to their NSR program before the EPA could process the final approval actions. The City has adopted the required amendments and submitted them to the EPA by cover letter from the Governor dated May 17, 1993. The final approval action of the Albuquerque/ Bernalillo County nonattainment NSR permit program will be addressed in detail in a separate FR action.

4. Contingency Measures

As per section 172(c)(9) of the CAA, all nonattainment SIPs must contain contingency measures (due November 15, 1993) that are to be implemented if the area fails to make reasonable further progress (RFP) or to attain the NAAQS by the applicable date. These contingency measures are to be implemented immediately after the EPA determines failure of RFP or attainment of standards. The contingency measures for the Albuquerque/ Bernalillo County CO SIP, due independently of the November 15, 1992, moderate CO nonattainment area SIP requirements addressed in this FR action, will be addressed in a separate FR action after the November 15, 1993, submittal due date.

5. I/M SIP Revision

Section 187(a)(4) of the CAA provides a savings clause for vehicle I/M programs. All moderate CO nonattainment SIPs must include a vehicle I/M program as described in section 182(a)(2)(B). Albuquerque/ Bernalillo County has adopted and is currently implementing an I/M program. Albuquerque/Bernalillo County has also submitted a committal SIP to the EPA, per provisions of the General Preamble (57 FR 13530), stating that a comprehensive SIP revision will be submitted to the EPA by November 15, 1993, which will upgrade the existing Albuquerque/Bernalillo County I/M program to meet the new requirements mandated by the CAAA of 1990. The EPA will act on the committal SIP, and will act upon the final I/M program, in separate FR actions.

6. Oxygenated Fuels Program

Motor vehicles are significant contributors of CO emissions. An important measure toward reducing these emissions is the use of cleaner-burning oxygenated gasoline. Extra oxygen, contained within the oxygenate in the fuel, enhances fuel combustion and helps to offset fuel-rich operating conditions, particularly during vehicle starting, which are more prevalent in the winter.

Section 211(m) of the CAA requires that various States submit revisions to their SIPs and implement oxygenated gasoline programs by no later than November 1, 1992. This requirement applies to all States with CO nonattainment areas with design values of 9.5 ppm. or more, which is based generally on 1988 and 1989 data. Each State's oxygenated gasoline program must require gasoline sold or dispensed in the specified control area to contain not less than 2.7 percent oxygen by weight during that portion of the year in which the area is prone to high ambient concentrations of CO (the control period).

The EPA announced guidance on the establishment of control periods, by

[3] Memorandum from John S. Seitz, Director, Office of Air Quality Planning and Standards, to the Regional Air Division Directors, entitled "Emission Inventory Issues," U.S. EPA, Office of Air Quality Planning and Standards, Research Triangle Park, North Carolina, June 24, 1993.

area, in the FR on October 20, 1992.[4] The EPA also announced the availability of oxygenated gasoline credit program guidelines in the October 20, 1992, FR.[5] Under a credit program, marketable oxygen credits may be generated from the sale of gasoline with a higher oxygen content than is required (i.e., an oxygen content greater than 2.7 percent by weight). These oxygen credits may be used to offset the sale of gasoline with a lower oxygen content than is required. As an alternate to the credit program, the State may elect a program in which a minimum of 2.7 percent by weight oxygen must be present in every gallon of gasoline sold.

The EPA also issued labeling regulations under section 211(m)(4) of the CAA. These labeling regulations were published in the **Federal Register** on October 20, 1992.[6]

The City of Albuquerque has adopted an Oxygenated Fuel Program that covers the County of Bernalillo, New Mexico (the control area), which is also the Albuquerque Metropolitan Statistical Area. In this action, the EPA is approving the oxygenated fuel program, based on Albuquerque/Bernalillo County Regulation 35–*Alternative Fuels.* The control period for the program is from November 1 of one year to February 28 or 29 of the following year, and the program is one in which all oxygenated gasoline must contain a minimum oxygen content of 2.7 percent by weight of oxygen. The City/County has adopted labeling regulations, enforcement procedures, and oxygenate test methods in conformity with Federal regulations. For further details of the oxygenated fuels program, the reader is referred to the Technical Support Document.

7. Winter Woodburning Program

The City/County also included its episodic woodburning curtailment program in the November 5, 1992, CO SIP submittal. This program was not required to be submitted as a part of the CO SIP, but was included per an earlier separate request of the EPA regarding particulate control in the Albuquerque area. However, significant reductions of CO have also resulted from the implementation of this program, based on Regulation 34–*Woodburning.* In this action, the EPA is approving the provisions found in Regulation 34, as well as a commitment letter dated March 22, 1993, from Sarah B. Kotchian, Director, Albuquerque Environmental Health Department, to A. Stanley Meiburg, Director, Air, Pesticides and Toxics Division, EPA Region 6, pertaining to the correction of an enforceability deficiency in Regulation 34. Please refer to the Technical Support Document for details regarding Regulation 34 and the commitment letter.

8. Enforceability Issues

All measures and other elements in the SIP must be enforceable by the State and the EPA (see sections 172(c)(6), 110(a)(2)(A) and 57 FR 13556). The EPA criteria addressing the enforceability of SIPs and SIP revisions were stated in a September 23, 1987, memorandum (with attachments) from J. Craig Potter, Assistant Administrator for Air and Radiation, et. al. (see 57 FR 13541). The criteria include, for example: ensuring that the rules contained in the SIP are explicit in their applicability to the regulated sources; ensuring that compliance dates are clearly specified; ensuring that compliance periods and test methods are clearly noted; ensuring that adequate recordkeeping is required; and ensuring that any exemptions or variances are clear in their applicability and in how they are triggered. In addition to enforceable requirements, nonattainment area plan provisions must contain a program that provides for enforcement of the control measures and other elements in the SIP (see section 110(a)(2)(C)).

The City of Albuquerque/Bernalillo County has an enforcement program that will ensure that certain control measures contained in the Albuquerque/Bernalillo County CO SIP (i.e., the oxygenated fuels and winter woodburning programs) are adequately enforced. The City/County has also submitted a commitment letter to the EPA pertaining to the correction of an enforceability deficiency in Regulation 34 regarding the winter woodburning program.

Final Action

The EPA in this action is approving the following elements of the complete Albuquerque/Bernalillo County CO SIP: The 1990 base year CO emissions inventory, the oxygenated fuels program, and the winter woodburning program, which were submitted by the Governor to the EPA by cover letter dated November 5, 1992. The remaining elements of the complete Albuquerque/Bernalillo County CO SIP, to be submitted to the EPA by November 15, 1993, will be acted upon in separate FR actions.

The EPA has reviewed these revisions to the New Mexico SIP and is approving them as submitted. The EPA is publishing this action without prior proposal because the Agency views this as a noncontroversial amendment and anticipates no adverse comments. This action will be effective January 28, 1994, unless, by December 29, 1993, notice is received that adverse or critical comments will be submitted.

If such notice is received, this action will be withdrawn before the effective date by publishing two subsequent notices. One notice will withdraw the final action, and another will begin a new rulemaking by announcing a proposal of the action and establishing a comment period. If no such comments are received, the public is advised that this action will be effective January 28, 1994.

Nothing in this action should be construed as permitting or allowing or establishing a precedent for any future request for revision to any SIP. Each request for revision to the SIP shall be considered separately in light of specific technical, economical, and environmental factors, and in relation to relevant statutory and regulatory requirements.

Miscellaneous

Under the Regulatory Flexibility Act, 5 U.S.C. 600 *et seq.*, the EPA must prepare a regulatory flexibility analysis assessing the impact of any proposed or final rule on small entities (5 U.S.C. 603 and 604). Alternatively, the EPA may certify that the rule will not have a significant impact on a substantial number of small entities. Small entities include small businesses, small not-for-profit enterprises, and government entities with jurisdiction over populations of less than 50,000.

SIP approvals under section 110 and subchapter I, part D, of the CAA do not create any new requirements, but simply approve requirements that the State is already imposing. Therefore, because the Federal SIP-approval does not impose any new requirements, I certify that it does not have a significant impact on any small entities affected. Moreover, due to the nature of the Federal-State relationship under the CAA, preparation of a regulatory flexibility analysis would constitute Federal inquiry into the economic reasonableness of State action. The CAA forbids the EPA to base its actions concerning SIPs on such grounds

[4] See "Guidelines for Oxygenated Gasoline Credit Programs and Guidelines on Establishment of Control Periods under section 211(m) of the CAAA—Notice of Availability," 57 FR 47849 (October 20, 1992).

[5] See footnote 4. The EPA was issued guidelines for credit programs under section 211(m)(5) of the CAA.

[6] See "Notice of Final Oxygenated Fuels Labeling Regulations under section 211(m) of the Clean Air Act as Amended—Notice of Final Rulemaking," 57 FR 47769. The labeling regulations may be found at 40 CFR part 80, § 80.35.

(*Union Electric Co.* v. *U.S. E.P.A.*, 427 U.S. 246, 256–66 (1976); 42 U.S.C. 7410(a)(2)).

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by January 28, 1994. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

Executive Order 12866

This action has been classified as a Table 2 Action by the Regional Administrator under the procedures published in the **Federal Register** on January 19, 1989 (54 FR 2214–2225). On January 6, 1989, the Office of Management and Budget (OMB) waived Table 2 and Table 3 SIP revisions from the requirement of section 3 of Executive Order 12291 for a period of two years. U.S. EPA has submitted a request for a permanent waiver for Table 2 and Table 3 SIP revisions. The OMB has agreed to continue the waiver until such time as it rules on U.S. EPA's request. This request continues in effect under Executive Order 12866 which superseded Executive Order 12291 on September 30, 1993.

[AS-FRL–4808–2]

National Emission Standards for Hazardous Air Pollutants; Amendments to Compliance Extensions for Early Reductions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: Pursuant to section 112(i)(5) of the Clean Air Act (Act), a rule was promulgated in the **Federal Register** on December 29, 1992 to implement granting extensions to compliance with section 112(d) emission standards to sources that have achieved early reductions of hazardous air pollutants (HAPs). This action makes several amendments to the original Early Reductions Rule including: (1) Revisions to the deadlines for submitting permit applications, reduction demonstrations, and source testing results, (2) a clarification of the status of an enforceable commitment under certain situations, and (3) correction of a typographical error regarding the high-risk weighting factor for hexachlorocyclopentadiene. As EPA began implementation of the Early Reductions Rule it became apparent that certain timing problems existed with respect to demonstrations that early reductions had been achieved and the issuance of permits to sources that qualify for a compliance extension. Additionally, some questions were posed by potential program participants on the nature of enforceable commitments. This action is needed to alleviate the timing problems and clarify EPA's treatment of enforceable commitments. The intended results are to improve EPA's ability to determine that actual reductions are achieved before a compliance extension is granted, to make the permit issuance process more workable, and make the provisions of the Early Reductions Program more clear to potential participants.

EFFECTIVE DATE: November 29, 1993.

Docket. All information used in the development of this final action is contained in the preamble below. However, Docket No. A–90–47, containing the supporting information for the original Early Reductions Rule, is available for public inspection and copying between 8:30 a.m. and 3:30 p.m., Monday through Friday, at EPA's Air Docket Section, Waterside Mall, room M–1500, 1st floor, 401 M Street SW., Washington DC 20460. A

reasonable fee may be charged for copying.

FOR FURTHER INFORMATION CONTACT: Mr. David Beck, Emission Standards Division (MD–13), U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 2771, telephone (919) 541–5421.

SUPPLEMENTARY INFORMATION: The information presented in this preamble is organized as follows:

I. Background
II. Summary of and Rationale for Rule Changes
A. Early Reductions Demonstration
B. Permit Application Deadlines
C. Enforceable Commitments
D. Hexachlorocyclopentadiene
E. Effective Date
F. Judicial Review
III. Administrative Requirements

I. Background

The Clean Air Act Amendments of 1990 revised section 112 of the Act, which directs EPA to establish national emission standards for sources of HAP. One of the new provisions, section 112(i)(5), offers sources that emit HAPs an incentive for achieving substantial emission reductions earlier than would be required by standards promulgated under section 112(d). Specifically, the early reductions provision allows granting an existing source emitting HAPs a six-year compliance date extension for an applicable section 112(d) standard, upon demonstration by the owner or operator that the source has achieved, prior to certain dates, a HAP reduction of 90 percent or more from established base year HAP emission levels (95 percent reduction is required for sources emitting particulate HAP).

Generally, participating sources would have to achieve the 90 (95) percent reduction prior to proposal of an applicable section 112(d) standard. However, sources that would be subject to early section 112(d) standards also have the option of participating by submitting to EPA, prior to proposal of an applicable section 112(d) standard, an enforceable commitment to achieve the 90 (95) percent reduction before January 1, 1994. Sources successfully demonstrating qualifying HAP reductions would be granted the compliance extension in a permit issued pursuant to title V of the Act. The permit would establish an alternative emission limitation to be met by the source to ensure that the early reductions are maintained.

On December 29, 1992, EPA promulgated in the **Federal Register** (57 FR 61970) an implementing rule for the early reductions provisions of the Act. As incorporated in the Code of Federal Regulations under title 40, part 63, subpart D, the Early Reductions Rule established procedures and requirements for source owners or operators wishing to obtain the six-year compliance extension. Among other provisions, the rule contains guidelines for demonstrating achievement of qualifying early reductions and established deadlines by which owners or operators must file permit applications to request a compliance extension.

II. Summary of Rule Changes and Rationale

A. Early Reductions Demonstration

According to section 112(i)(5), the early reductions are to be demonstrated with respect to verifiable and actual emissions in a base year not earlier than calendar year 1987. The EPA's interpretation of this language was that total actual HAP emissions from the source over the entire base year (calendar year basis) is the benchmark from which the early reductions will be measured. The Early Reductions Rule implemented this interpretation and required owners or operators to establish base year emissions using "the best available data accounting for actual emissions, during the base year, of all hazardous air pollutants from each emission point listed in the source * * *". As an example, an early reductions source may have actual HAP emissions of 100 tons in the base year selected.

To determine whether a source's reductions qualify for a compliance extension, post-reduction emissions must be established on a similar basis and compared to base year emissions. The Early Reductions Rule specifies post-reduction emissions as "the best available data on an annual basis accounting for actual emissions, after the base year and following employment of emission reduction measures, of all hazardous air pollutants from each emission point in the source * * *". Therefore, the source in the example from the preceding paragraph with base year emissions of 100 tons per year would be required to document actual post-reduction HAP emissions on a tons per year basis as well.

As stated previously, to obtain a compliance extension, a participating source must achieve sufficient reductions before proposal of an applicable section 112(d) standard or, for sources making enforceable commitments, before January 1, 1994. Emission reduction projects completed on the day before the applicable deadline would count toward the early reduction target of an overall 90 (95) percent reduction. However, after the deadline passes, the source would be expected to emit HAP at the 90 (95) percent reduced level on an annual basis. Therefore, a source having actual HAP emissions of 100 tons in the base year would be expected to emit 10 tons or less of actual HAP emissions during the year following the proposal date of an applicable 112(d) standard to qualify for a compliance extension. (And, of course, would have to maintain that level until the compliance extension expires). For sources making enforceable commitments, actual HAP emissions would have to be 10 tons or less during calendar year 1994 to qualify.

The Early Reductions Rule also required participants to request compliance extensions in the context of title V permit applications. The applications were to consist of two main parts: (1) The demonstration that early reductions had been achieved and (2) permit terms and conditions, including emission limits, monitoring methods, and recordkeeping and reporting requirements proposed by the owner or operator for the early reductions source. Applications had to be filed before proposal of an applicable standard or, for sources making enforceable commitments, by December 1, 1993. The combined requirements, to file permit applications on or before the date emission reductions have to be achieved and to include the reduction demonstration in the permit application, essentially precludes the source owner or operator from demonstrating post-reduction "actual" HAP emissions as envisioned by the early reductions provision of the Act. To provide a reduction demonstration under this scenario, the participant has to project what emissions will be for the post-reduction year. In most cases, this would mean that short-term emission rates for the emitting units in the early reductions source would have to be extrapolated using expected production conditions for the post-reduction year.

Such a situation is not satisfactory to ensure that sufficient early reductions actually are achieved before a compliance extension is granted. The HAP emission rate from a source can be expected to vary during a year due to seasonal factors, shifting production schedules, changing product mixes, or other factors. Therefore, it is possible that a source that can show a low emission rate the day before proposal of an applicable section 112(d) standard may have a much higher HAP emission

rate days, weeks, or months later. With the language in the Early Reductions Rule promulgated on December 29, 1992, it would be possible to grant a compliance extension to a source that never emits 90 (95) percent less than base year emissions, solely based on a "future-actual" extrapolation of a low, short-term, emission rate. Following through on the example of the source having base year emissions of 100 tons per year, suppose the source has made an enforceable commitment and on December 1, 1993 submits a permit application and a reduction demonstration showing that on November 20, 1993 emissions were 50 pounds per day. Based on that rate, the source projects 1994 emissions to be 18,250 lbs. or 9.1 tons per year (50 lbs. per day multiplied by 365 days) and would be eligible to obtain a compliance extension. However, since no permit would be in place for the source and wouldn't be until the title V permit is issued late in 1994, no monitoring and reporting requirements apply and EPA may never be sure that 1994 actual emissions would achieve the predicted level.

To rectify the apparent discrepancy between the promulgated Early Reductions Rule and the intent of the early reductions provisions of the Act regarding the demonstration of early reductions, EPA is making several changes to the rule. The demonstration of early reductions no longer will accompany the permit application. Rather, the reduction demonstration will be required after the end of the post-reduction year, which is the year following proposal of an applicable section 112(d) standard or calendar year 1994, for sources making enforceable commitments. Specifically, participants will have to submit reduction demonstrations after the end of the post-reduction year but within 13 months of the proposal date of an applicable emission standard or, for sources subject to enforceable commitments, by January 31, 1995. The description of post-reduction emissions from the promulgated Early Reductions Rule [§ 63.74(d)(2)] has been revised to state specifically that actual emissions for the post-reduction year must be demonstrated.

These changes ensure that EPA will receive an accounting of post-reduction emissions for the year immediately after the reduction deadline and ensure that no compliance extensions will be granted until actual post-reduction emissions are demonstrated and approved for the year after the reduction deadline. Early Reductions participants will have to track post-reduction emissions to make the year end demonstration, and EPA recommends that sources institute the monitoring procedures that the source will propose in the permit application to help in documenting post-reduction emissions.

Related to the revised requirement for demonstrating early reductions, two paragraphs from the original rule have been deleted. The first is § 63.74(d)(4) which required the owner or operator to submit evidence that emission reductions used to qualify for a compliance extension were achieved prior to the applicable reduction deadline. This provision was rendered superfluous by the change to require the post-reduction emission demonstration to represent actual emissions during the year after the applicable reduction deadline, instead of a projection of what actual post-reduction emissions likely would be. In other words, the criterion to determine whether the reduction deadline was met will be the showing that actual emissions in the post-reduction year were low enough to qualify the source for a compliance extension.

The second paragraph deleted is § 63.74(i), which instructed owners or operators to extrapolate post-reduction emission rates to an annual basis. Similar to the provision discussed in the above paragraph, this provision is now unnecessary because the post-reduction emissions demonstration no longer will be a prediction of emission levels for the post-reduction year.

B. Permit Application Deadlines

Two other date changes are being made to the Early Reductions Rule, primarily as a result of the change to the reduction demonstration submittal date. First, the permit application deadlines for sources participating in the Early Reductions Program have been revised. Originally, sources that had not made enforceable commitments were to submit applications by the date of proposal of the applicable section 112(d) standard or, if later, within 120 days of approval of the involved State's title V permit program. The revised deadline is 120 days after proposal of the applicable section 112(d) standard or, if later, within 120 days of establishment of a title V permit program (either a State or federal program). For sources that have made enforceable commitments, the application date is revised from December 1, 1993 to April 30, 1994.

Permits for early reductions sources are to be issued within 12 months of receipt of a complete application, and under the previously promulgated application dates, EPA technically could be required to issue permits before the post-reduction demonstration could be evaluated and a decision made on whether to grant a compliance extension. Moving the application submittal date to 120 days after proposal of an applicable section 112(d) standard, or April 30, 1994 for sources making enforceable commitments, would more closely match the date EPA must issue a permit with the date EPA would be ready to do so.

Another reason for delaying the December 1, 1993 application deadline for sources subject to enforceable commitments is that no title V permitting mechanism will be in place at that time. The December 1, 1993 deadline presumed that a title V permitting mechanism, either approved State title V programs or a promulgated federal title V program, would be operational by that time to process applications, and that such a program would be operational sufficiently ahead of the deadline to allow sources time to compose permit applications based on the permit program requirements. However, this is not the case. States likely will not obtain approval of their title V permit programs until late in 1994, or later, and a federal program for issuing title V permits probably will not be promulgated until 1995. Therefore, there will be no title V permitting mechanism in place before December 1, 1993.

To fill the permitting mechanism void, EPA intends to promulgate a specialty title V program solely for the purpose of processing and issuing permits for sources participating in the early reductions program. However, that program has not yet been promulgated, and probably won't be until mid-1994. At best, a specialty title V permit program will have just been proposed by the December 1, 1993 deadline, leaving little to no time for Early Reductions Program participants to see the proposed permit program requirements and prepare applications for submission. Revising the deadline to April 30, 1994 alleviates this problem.

Since the specialty permit program likely will not have been promulgated by the new April 30, 1994 deadline, participants will have to compose permit applications based on the proposed specialty program. In the event that there are significant changes between the proposed and promulgated versions of the specialty permit program, participants would be have to amend their permit applications to accommodate the changes.

The second change revises the deadline for submittal of source test results for sources subject to enforceable

commitments. The promulgated Early Reductions Rule, although requiring the post-reduction emission demonstration to accompany the permit application, allowed owners or operators to submit source test results in support of post-reduction emissions as late as 120 days after the deadline for submitting permit applications, or for sources subject to enforceable commitments, March 31, 1994. The later submittal of test results allowed sources that had implemented reduction measures just before the early reduction deadline time to perform source tests and analzye and compile the results. The test result submittal date for sources subject to enforceable commitments is being revised to April 30, 1994, coinciding with the revised permit application date for such sources. The date is not revised for other sources since it already coincides with the revised permit application date.

It may seem incongruent that the post-reduction emission demonstration does not have to be submitted until after the post-reduction year has ended, yet the results from any source testing done to support post-reduction emissions must be submitted well ahead of that time. However, the point of asking for test results earlier is to see that any planned source tests are performed early in the post-reduction year, thereby giving a timely indication of the performance of emission reduction measures. Allowing tests to be performed late in the post-reduction year would not ensure detection of initial emissions levels during the post-reduction year. It is emphasized that submittal of test results does not constitute the post-reduction emissions demonstration. Test results or other indications of short-term emission levels would have to be coupled with relevant monitoring information over the year to demonstrate actual, annual, post-reduction HAP emissions for the early reductions source. Relevant monitoring information could include monitoring emissions directly or monitoring process parameters or control device parameters that are related to emissions performance.

C. Enforceable Commitments

A new paragraph § 63.75(f) is added to clarify the status of enforceable commitments that have not been approved and are still undergoing the approval process. An enforceable commitment includes a description of the early reductions source, associated HAP emission estimates for the base year selected, and a commitment to reduce HAP emissions by 90 (95) percent before January 1, 1994. The EPA will review and approve/disapprove base year emissions contained in an enforceable commitment according to the procedures in § 63.76 of the Early Reductions Rule. This process was instituted to help verify the technical adequacy and representativeness of base year emission estimates and, in turn, assure that the resulting target post-reduction emission levels are appropriate to qualify sources for compliance extensions.

If EPA finds base year emissions to be deficient in some way, the source must revise the enforceable commitment to take into account EPA's comments. If the source owner or operator cannot or chooses not to respond to EPA comments on the base year emission estimates, the source will be considered withdrawn from the program. Without EPA approval of base year emissions, an enforceable commitment is not in effect and is not enforceable. The new language under § 63.75(f) clarifies this point and the fact that when an unapproved enforceable commitment is still undergoing the approval process after the date commitments can be withdrawn without penalty (December 1, 1993), the source does not have to continue to seek approval of the commitment and will not be subject to enforcement action. Once again, the enforceable commitment must be approved to be in effect and enforceable.

A related concern raised to EPA is whether a source that has made an enforceable commitment and that has demonstrated achieving the required reductions must actually receive the compliance extension and be issued the title V permit, or could the source give up the extension and simply meet the applicable section 112(d) standard on schedule and without penalty? This question arose from a concern expressed by potential participants that some of the terms and conditions imposed in a permit issued to an early reductions source may be rigorous to the point that the source owner or operator would prefer compliance with the applicable standard under section 112(d) of the Act. While EPA considers the possibility of such a scenario remote, it is acknowledged that the terms and conditions of permits issued to early reductions sources may be more individualized and subject to judgements made by the permitting authority than permits issued to similar sources complying with section 112(d) standards. For example, section 112(d) standards likely will specify monitoring requirements for subject sources, which will then be implemented in title V permits, whereas the monitoring requirements for emission reduction measures employed by an early reductions source must be generated through reasoned application of existing information on monitoring similar sources in similar situations.

Should the scenario in the above paragraph arise, the source owner or operator could withdraw from the Early Reductions Program without penalty provided that the terms of the enforceable commitment were met. In an enforceable commitment, an owner or operator commits to achieving before January 1, 1994 a 90 (95) percent reduction in emissions from the established base year HAP emission level at the early reductions source. If the owner or operator submits a demonstration (as defined by the amended Early Reductions Rule) that promised reductions had been achieved before the deadline and that demonstration is approved by EPA, then the terms of the enforceable commitment will have been met and the source could decide to forego receiving the compliance extension and instead meet the applicable section 112(d) standard on schedule, without penalty.

D. Hexachlorocyclopentadiene

Finally, the high-risk weighting factor for hexachlorocyclopentadiene (CAS No. 77474) as listed in Table 1 of § 63.74 is corrected to read "10" instead of "100." This change simply corrects a typographical error from the publication of the Early Reductions Rule.

E. Effective Date

The EPA is publishing this rule as a final rule, and it is effective immediately upon publication. The Agency believes that this action is supported by the "good cause" exception in the Administrative Procedures Act, which permits an agency for "good cause" to proceed directly to a final rule where issuing a proposed rule would be "impracticable, unnecessary, or contrary to the public interest" (5 U.S.C. 553(b)(B)) and for "good cause found" (5 U.S.C. 553(d)) to dispense with the general requirement that a rule be published 30 days before its effective date. The EPA believes that "good cause" exists here to issue a final, immediately effective rule because of the nearness of the December 1, 1993 permit application deadline (for sources that have made enforceable commitments) specified in the December 29, 1992 version of the Early Reductions Rule. If the changes in this rulemaking were only being proposed, then the December 1, 1993 application date would still be in effect and this would negate the intent of the changes such as delaying the permit application date until April 30, 1994 for sources that have made enforceable commitments.

Furthermore, EPA views this action, which delays information submissions but improves accounting measurements, as noncontroversial.

F. Judicial Review

Under section 307(b)(1) of the Act, judicial review of the actions taken by this final rule is available only by the filing of a petition for review in the U.S. Court of Appeals for the District of Columbia Circuit within 60 days of publication of this action. Under section 307(b)(2) of the Act, the requirements that are the subject of this final rule may not be challenged later in civil or criminal proceedings brought by EPA to enforce these requirements.

III. Administrative Requirements

A. Paperwork Reduction Act

The information collection requirements of the previously promulgated Early Reductions Rule (57 FR 61970) were submitted to and approved by the Office of Management and Budget. A copy of this Information Collection Request (ICR) document (OMB control number 2060–0222) may be obtained from Sandy Farmer, Information Policy Branch (PM–223Y); U.S. Environmental Protection Agency; 401 M Street, SW.; Washington, DC 20460 or by calling (202) 260–2740. Today's changes to the Early Reductions Rule do not affect the information collection burden estimates made previously, only the timing of submittal of the information requested has been affected somewhat. Therefore, the ICR has not been revised.

B. Executive Order 12866 Review

This rule was classified "non-significant" under Executive Order 12866 and, therefore was not reviewed by the Office of Management and Budget.

C. Regulatory Flexibility Act

The Regulatory Flexibility Act of 1980 requires the identification of potentially adverse impacts of federal regulations upon small business entities. The Act specifically requires the completion of a Regulatory Flexibility Analysis in those instances where small business impacts are possible. Because this rulemaking imposes no adverse economic impacts, a Regulatory Flexibility Analysis has not been prepared.

Pursuant to the provisions of 5 U.S.C. 605(b), I hereby certify that this rule will not have a significant economic impact on a substantial number of small business entities.

List of Subjects in 40 CFR Part 63

Environmental protection, Air pollution control, Hazardous air pollutants, Reporting and recordkeeping requirements.

Dated: November 22, 1993.

Carol M. Browner,

Administrator.

For the reasons set out in the preamble, 40 CFR part 63 is amended as follows:

PART 63—[AMENDED]

1. The authority citation for part 63 continues to read as follows:

Authority: 42 U.S.C. 7401 et seq.

2. In § 63.74 paragraph (d)(2) is revised and paragraphs (d)(4) and (i) are removed and reserved as follows:

§ 63.74 Demonstration of early reduction.

* * * * *

(d) * * *

(2) The best available data accounting for actual emissions, during the year following the applicable emission reduction deadline as specified in § 63.72(a)(2), of all hazardous air pollutants from each emission point in the source listed pursuant to paragraph (b)(2) of this section.

* * * * *

(d)(4) (Reserved).

* * * * *

(i) (Reserved).

* * * * *

3. In § 63.74 Table 1 entitled "List of High-Risk Pollutants," the entry for "hexachlorocyclopentadiene" (CAS No. 77474) is revised to read as follows:

§ 63.74 Demonstration of early reduction.

* * * * *

TABLE 1.—LIST OF HIGH RISK POLLUTANTS

Cas. No.	Chemical	Weighting factor
*	* * * *	*
77474 ...	Hexachlorocyclopentadiene.	10
*	* * * *	*

4. Section 63.75 is amended by adding paragraph (f) to read as follows:

§ 63.75 Enforceable commitments.

* * * * *

(f) An enforceable commitment submitted under this section shall not be in effect and enforceable until the base year emissions contained in the commitment have been approved according to the procedures in § 63.76. An owner or operator is under no obligation to continue to seek approval of commitments that have not been approved by December 1, 1993.

5. Section 63.77 is revised to read as follows:

§ 63.77 Application procedures.

(a) To apply for an alternative emission limitation under § 63.72, an owner or operator of the source shall file a permit application with the appropriate permitting authority.

(b) Except as provided in paragraph (e) of this section, the permit application shall contain the information required by § 63.74, as applicable, and the additional information required for a complete permit application as specified by the applicable permit program established pursuant to title V of the Act.

(c) Permit applications under this section for sources not subject to enforceable commitments shall be submitted by the later of the following dates:

(1) 120 days after proposal of an otherwise applicable standard issued under section 112(d) of the Act; or

(2) 120 days after the date an applicable permit program is approved or established pursuant to title V of the Act.

(d) Permit applications for sources subject to enforceable commitments pursuant to § 63.75 shall be submitted no later than April 30, 1994.

(e) The post-reduction emissions information required under § 63.74 (d)(2), (d)(3), and (d)(5) shall not be filed as part of the initial permit application but shall be filed later as a supplement to the application. This supplementary information shall be filed no earlier than one year after the date early reductions had to be achieved according to § 63.72(a)(2) and no later than 13 months after such date.

(f) If a source test will be the supporting basis for establishing post-reduction emissions for one or more emissions units in the early reductions source, the test results shall be submitted by the applicable deadline for submittal of a permit application as specified in paragraph (c) or (d) of this section.

(g) Review and disposition of permit applications submitted under this section will be accomplished according to the provisions of the applicable permit program established pursuant to title V of the Act.

BILLING CODE 6560–50–P

40 CFR Part 81

[CA-44-1-5804; FRL-4807-3]

Designation of Areas for Air Quality Planning Purposes; California

AGENCY: U.S. Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: Pursuant to the Clean Air Act as amended November 15, 1990 (Act), the Environmental Protection Agency (EPA) is authorized to redesignate areas (or portions thereof) as nonattainment for the PM–10 (particles with an aerodynamic diameter less than or equal to a nominal 10 micrometers) national ambient air quality standards (NAAQS). Additionally, under this section of the Act, the Governor of any state (or his/her designee) may, on the Governor's own motion, submit to EPA a revised designation of any area or portion of an area in a state. EPA, in turn, must approve or deny such redesignation.

In this final action, EPA is approving the California Air Resources Board's (CARB) (the Governor's designee) recommendation regarding the PM–10 designation for the Mono Basin portion of Mono County, California. EPA is taking final action to revise the PM–10 designation for this area from "unclassifiable" to "nonattainment." The redesignation is based upon recorded violations of the PM–10 NAAQS which occurred on or after January 1, 1989. A more detailed discussion regarding the Mono Basin portion of Mono County is provided in the following portions of this notice.

EFFECTIVE DATE: December 29, 1993.

ADDRESSES: Information supporting this final action can be obtained by contacting: Wallace Woo, Chief, Plans Development Section, Air Planning Branch (A–2–2), United States Environmental Protection Agency, Region IX, 75 Hawthorne Street, San Francisco, California, 94105, (415) 744–1207.

FOR FURTHER INFORMATION CONTACT:

Stephanie Valentine, Plans Development Section (A–2–2), Air Planning Branch, United States Environmental Protection Agency, Region IX, 75 Hawthorne Street, San Francisco, California, 94105, (415) 744–1178.

Barbara A. Bates (PM–10), Plans Development Section (A–2–2), Air Planning Branch, United States Environmental Protection Agency, Region IX, 75 Hawthorne Street, San Francisco, California, 94105, (415) 744–1206.

SUPPLEMENTARY INFORMATION:

I. PM–10 Background

On July 1, 1987, EPA revised the NAAQS for particulate matter (52 FR 24634), replacing total suspended particulates as the indicator for particulate matter with a new indicator called "PM–10" that includes only those particles with an aerodynamic diameter less than or equal to a nominal 10 micrometers ("μ"). At the same time, EPA set forth regulations for implementing the revised particulate matter standards and announced EPA's State implementation plan (SIP) development policy elaborating PM–10 control strategies necessary to assure attainment and maintenance of the PM–10 NAAQS (see generally 52 FR 24672). EPA adopted a PM–10 SIP development policy dividing all areas of the country into three categories based upon their probability of violating the new NAAQS: (1) Areas with a strong likelihood of violating the new PM–10 NAAQS and requiring substantial SIP adjustments were placed in Group I; (2) areas that might well have been attaining the PM–10 NAAQS and whose existing SIP's most likely needed less adjustment were placed in Group II; (3) areas with a strong likelihood of attaining the PM–10 NAAQS and, therefore, needing adjustments only to their preconstruction review program and monitoring network were placed in Group III (52 FR 24672, 24679–24682).

Pursuant to sections 107(d)(4)(B) and 188(a) of the Act, areas previously identified as Group I, as well as Group II and Group III areas which had monitored violations of the PM–10 NAAQS prior to January 1, 1989 were, by operation of law upon enactment of the 1990 Amendments to the Clean Air Act (Pub. L. No. 101–549, 104 Stat. 2399), designated as moderate nonattainment areas for PM–10. All other areas of the country with no violations of the PM–10 NAAQS prior to January 1, 1989, including Mono Basin, were designated as unclassifiable for PM–10 by operation of law upon enactment of the 1990 Amendments [section 107(d)(4)(B)(iii) of the Act]. Formal codification in 40 CFR part 81 of those areas designated nonattainment and unclassifiable for PM–10 by operation of law upon enactment was announced in a **Federal Register** notice dated November 6, 1991 (56 FR 56694). See also 57 FR 56762 (November 30, 1992).

II. EPA's Final Action to Redesignate Mono Basin

On the basis of air quality data, planning and control considerations, or any other air quality-related considerations the Administrator deems appropriate, EPA is authorized to initiate redesignation of unclassifiable areas (or portions thereof) as nonattainment for PM–10 pursuant to section 107(d)(3) of the Act by notifying the state that available information indicates that the designation of the area should be revised. After providing an opportunity for the State to respond, EPA must promulgate the redesignation that EPA deems necessary and appropriate, consistent with section 107(d)(3)(C) of the Act. In addition, section 107(d)(3)(D) provides that a Governor of a state (or his/her designee) may, on his or her own initiative, submit to EPA a revised designation of an area within the state. EPA must approve or deny the redesignation.

In a letter to EPA, dated August 1, 1991, the California Air Resources Board (CARB), the Governor's designee, recommended that EPA redesignate the Mono Basin portion of Mono County as nonattainment for the 24-hour PM–10 NAAQS. In a **Federal Register** notice dated July 16, 1993 (58 FR 38331) EPA proposed to approve redesignation of the Mono Basin as nonattainment for PM–10 and solicited comments on this proposal. The public comment period closed August 16, 1993.

As described in more detail in the proposal, exceedances of the 24-hour PM–10 NAAQS were measured at the Warm Springs monitoring site in 1988 and 1990 (the monitor did not operate during 1989 for reasons unrelated to air quality). Two such exceedances were monitored in 1991. Four exceedances were measured in the area during 1992, two at the Warm Springs monitoring site and two at the Simis Ranch site.

Section 107(d)(1)(A) of the Act sets out definitions of nonattainment, attainment, and unclassifiable status. These definitions provide the applicable legal standard for designations or redesignations to the relevant attainment status. A nonattainment area is defined as any area that does not meet, or that significantly contributes to ambient air quality in a nearby area that does not meet, the national primary or secondary ambient air quality standard for the relevant pollutant [see section 107(d)(1)(A)(i)[1]]. The exceedance monitored in the Mono Basin area demonstrate that the area does not meet the 24-hour PM–10 NAAQS. Further, in determining appropriate boundaries for

[1] The EPA has construed the definition of nonattainment area to require some material or significant contribution to a violation in a nearby area. The Agency believes it is reasonable to conclude that something greater than a molecular impact is required.

the Mono Basin nonattainment area, EPA has considered not only areas where violations of the PM–10 NAAQS have been monitored, but nearby areas which significantly contribute to such violations. An unclassifiable area is defined as any area that cannot be classified on the basis of available information as meeting or not meeting the national primary or secondary ambient air quality standard for the pollutant [see section 107(d)(1)(A)(iii)].

III. Response to Comments

In the July 16, 1993 proposal for today's action, EPA provided a 30-day comment period ending August 16, 1993, in order to solicit public comments on "all aspects" of the proposal to redesignate the Mono Basin portion of Mono county, California, from "unclassifiable" to "nonattainment" for PM–10 (58 FR 38333). Comments from one party were received. The Department of Water and Power of the City of Los Angeles ("LADWP") submitted a letter dated August 16, 1993[2]. In this final rulemaking, EPA has considered and responded to LADWP's comments, below. EPA has determined that it is appropriate to finalize the redesignation in the manner proposed. The public is referred to the July 16, 1993 notice of proposed rulemaking for a full discussion of the action EPA is finalizing.

Comment 1: The LADWP describes the Mono Lake area and contends that: Only a relatively small amount of exposed lake bed produces PM–10 emissions; PM–10 emissions are produced only under certain windy conditions; and the area impacted by the PM–10 emissions is relatively desolate with little or no human habitation.

Response 1: This comment has no bearing on whether the area meets or does not meet the PM–10 NAAQS. Section 107 of the Act sets forth the procedures for designating the attainment status of an air basin and the criteria that the EPA must use in making that designation. Where the EPA has both received a request for redesignation from a Governor, or the Governor's designee, and available data demonstrates a violation of the relevant NAAQS, EPA believes it is appropriate to approve the State's request and to redesignate the area as nonattainment. As set forth in the notice of proposed rulemaking, both of these factors are present in this rulemaking action. The EPA has received from the California Air Resources Board, the designee for the Governor of California, a request to redesignate Mono Basin portion of Mono County to nonattainment for PM–10. In addition, ambient air monitoring data clearly establishes a violation of the NAAQS for PM–10. The EPA defines ambient air as that portion of the atmosphere, external to buildings, to which the public has access. See 40 CFR 50.1(e). The public has access to the Mono Basin areas in which air monitors have measured violations of the NAAQS for PM–10.

The role of wind conditions in Mono Basin is for consideration during the state implementation plan (SIP) development process that follows a nonattainment designation. See section 188(f) of the Act. In any event, the legislative report accompanying the addition of section 188(f) to the Act states that the emissions from exposed portions of the Mono Lake shoreline should be considered anthropogenic sources:

> The term anthropogenic sources is intended to include activities that are anthropogenic in origin. An example of such sources is the dry lake beds at Owens and Mono Lakes in California, which give rise to dust storms that are a result of the diversion of water that would otherwise flow to such lakes and should be considered anthropogenic sources. H.R. Rep. No. 490, 101st Cong., 2d Sess. 265–66 (1990).

Comment 2: The LADWP asserts that the air quality in the Mono Basin is excellent, and that the only population center in the Basin, the Town of Lee Vining, has never experienced an exceedance of the NAAQS for PM–10.

Response 2: See Response 1. The exceedances of the NAAQS for PM–10 experienced at the Warm Springs and Simis Ranch areas provide sufficient evidence that there is a PM–10 air quality problem in the Mono Basin.

Comment 3: The LADWP claims that designation of the Mono Basin as nonattainment for PM–10 could influence the California Water Resources Control Board's judgment or actions in balancing the uses of the Mono Lake area's public trust resources. The LADWP asserts that designation of the area as nonattainment would result in the Board "feeling obligated" to raise the level of Mono Lake without the benefit of the SIP development process. This in turn could negatively impact: the scenic resources of the Mono Lake area; water and hydroelectric supplies for the citizens of Los Angeles; and recreational resources along the Owens River and associated lakes.

Response 3: See Response 1. It is inappropriate for EPA to delay making its final technical judgment regarding the air quality status of the area because of the potential political implications outlined by the commenter. Further, upon final redesignation of the Mono Basin to nonattainment for PM–10, the appropriate California agencies will have 18 months to develop a SIP for the Mono Basin area. The SIP process serves to identify the sources of pollution which contribute to violations of the NAAQS and develop control strategies for those sources. While the reasonableness of implementing available control measures, including economic factors, are considered during the SIP development process, EPA's redesignation of the attainment status of the Mono Basin area is based upon the presence or absence of violations of the NAAQS in that air basin. See section 107(d)(1)(A)(i) of the Act.

Comment 4: The LADWP argues that environmental statutes should be implemented on a cost-benefit basis and that in the case of the Mono Basin the costs of bringing the area into attainment of the NAAQS for PM–10 would outweigh the health benefits of achieving attainment.

Response 4: See Responses 1 and 3; see also *Central Arizona Water Conservation Dist.* v. *EPA*, 990 F.2d 1531 at 1542, n.10 (9th Cir. 1993), cert. denied 62 U.S.L.W. 3245 (October 4, 1993).

IV. Significance of Today's Action

In taking final action to redesignate Mono Basin to nonattainment for PM–10, Mono Basin will by operation of law initially be classified as moderate [see section 188(a) of the Act]. For areas redesignated nonattainment for PM–10 and, classified as moderate, States must submit PM–10 SIP's to EPA within 18 months of the nonattainment redesignation meeting the applicable requirements of Part D, Title I of the Act [see, e.g., sections 172(c) and 189 of the Act]. In addition to meeting the general nonattainment area plan requirements identified in section 172(c) of the Act, the moderate area SIP must specifically include:

[2] Additionally, in a letter dated August 2, 1993, the Los Angeles Department of Water and Power (LADWP) requested a 90-day extension of the deadline for submitting comments on the proposed redesignation. The LADWP asserted that a "decision by the EPA regarding the PM–10 attainment/nonattainment status of the Mono Basin at this time may unduly influence the public trust balancing decision of the [California Water Resources Control] Board" in upcoming hearings regarding water rights in the Mono Basin. In a letter dated August 12, 1993, EPA denied the request for an extension of the comment period on the grounds that the EPA's action regarding the attainment or nonattainment designation of an air basin are made on the technical and legal merits of the situation, and that the Clean Air Act does not allow the EPA to "balance interests" when making such designations.

(A) Either: (i) A demonstration (including air quality modeling) that the plan will provide for attainment as expeditiously as practicable, but no later than the end of the sixth calendar year after the areas's designation as nonattainment; or (ii) a demonstration that attainment by such date is impracticable [see section 189(a)(1)(B)].

(B) Provisions to assure that reasonably available control measures (including reasonably available control technology) for the control of PM–10 shall be implemented no later than 4 years after designation [see section 189(a)(1)(C)].

(C) A new source review permit program, meeting the requirements of section 173 of the Act, for the construction and operation of new and modified major stationary sources of PM–10 [see section 189(a)(1)(A)].

(D) Quantitative milestones to be achieved every 3 years until the area is redesignated attainment and which demonstrate "reasonable further progress" towards attainment [see section 189(c)].

(E) Control requirements for PM–10 precursors. The control requirements applicable to major stationary sources of PM–10 (e.g., reasonably available control technology and nonattainment new source review control requirements) also must apply to major stationary sources of PM–10 precursors unless EPA determines that sources of precursors do not contribute significantly to PM–10 levels which exceed the NAAQS in the area [see section 189(e)].

EPA has issued detailed guidance on the Clean Air Act requirements applicable to moderate PM–10 nonattainment areas. See 57 FR 13498 (April 16, 1992) & 57 FR 18070 (April 28, 1992).

The State is also required to submit contingency measures, pursuant to section 172(c)(9) of the Act, which are to take effect without further action by the State or by EPA, upon a determination by EPA that an area has failed to make reasonable further progress or attain the PM–10 NAAQS by the applicable attainment date (see 57 FR 13510–13512, 13543–13544). The EPA is establishing the schedule for submission of contingency measures as called for in section 172(b) of the Act. The State is to submit contingency measures for Mono Basin within 18 months of the effective date of today's final rule. This is the same time the other moderate area SIP requirements described above are due.

The EPA also has the authority to reclassify Mono Basin to serious if EPA determines that the area cannot practically attain the PM–10 standards for moderate areas by the applicable attainment date or if the area fails to timely attain the NAAQS. See section 188(b) of the Act. In addition to meeting the requirements applicable to moderate nonattainment areas, areas reclassified as serious must implement more stringent control requirements.

VI. Miscellaneous

A. Regulatory Flexibility Act

Under the Regulatory Flexibility Act (RFA), 5 U.S.C. 601–612, EPA must prepare a regulatory flexibility analysis assessing the impact of any proposed or final rule on small entities. The requirement of preparing such analysis is inapplicable, however, if the Administrator certifies that the proposed rule will not have a significant economic impact on a substantial number of small entities (see 5 U.S.C. 605(b)). The final redesignation of Mono Basin will not impact or impose any significant requirements on a substantial number of small entities.

Redesignation of an area to nonattainment under section 107(d)(3) of the Act does not impose any new requirements on small entities. Redesignation is an action that affects the status of a geographical area and does not impose any regulatory requirements on sources. To the extent that the state must adopt new regulations, based on an area's nonattainment status, EPA will review the effect those actions have on small entities at the time the state submits these regulations. Accordingly, I hereby certify that the action proposed today will not have a significant economic impact on a substantial number of small entities.

B. Executive Order 12866

This action has been classified as a Table 2 Action by the Regional Administrator under the procedures published in the **Federal Register** on January 19, 1989 (54 FR 2214–2225). On January 6, 1989, the Office of Management and Budget (OMB) waived Table 2 and Table 3 SIP revisions from the requirement of section 3 of Executive Order 12291 for a period of two years. U.S. EPA has submitted a request for a permanent waiver for Table 2 and Table 3 SIP revisions. The OMB has agreed to continue the waiver until such time as it rules on U.S. EPA's request. This request continues in effect under Executive Order 12866 which superseded Executive Order 12291 on September 30, 1993.

List of Subjects in 40 CFR Part 81

Environmental protection, Air pollution control, Intergovernmental relations, National parks, Wilderness areas.

Dated: November 12, 1993.

John Wise,

Acting Regional Administrator.

For reasons set forth in the preamble, part 81 of title 40, Code of Federal Regulations, is amended to read as follows:

PART 81—[AMENDED]

1. The authority citation for part 81 continues to read as follows:

Authority: 42 U.S.C. 7401–7671q.

2. Section 81.305 is amended in the table for "California—PM–10" by adding an entry for "Mono County" to read as follows:

§ 81.305 California.

* * * * *

CALIFORNIA—PM–10 NONATTAINMENT AREAS

Designated area	Designation		Classification

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 90–162; FCC 93–458]

Financial Interest and Syndication Rules

AGENCY: Federal Communications Commission.

ACTION: Final rule; petitions for reconsideration.

SUMMARY: By this Memorandum Opinion and Order, the Commission generally affirms its decision in the Second Report and Order in this proceeding, which modified the financial interest and syndication (finsyn) rules. In addition, the Commission responds to petitions for reconsideration of the Second Report and Order; makes minor adjustments to the reporting requirements in § 73.661 of its Rules; makes a technical correction to § 73.660(a) of its Rules; and codifies in new § 73.663 the approach adopted in the Second Report and Order toward scheduling the expiration of the finsyn rules.

EFFECTIVE DATE: December 29, 1993, except for the amendments to § 73.661, which shall go into effect December 29, 1993, or upon approval by the Office of Management and Budget, whichever is later. The Commission will publish a document announcing the effective date of the § 73.661 amendments in the Federal Register.

FOR FURTHER INFORMATION CONTACT: David E. Horowitz or Kathleen O'Brien Ham, (202) 632–7792.

SUPPLEMENTARY INFORMATION: Public reporting burden for the collection of information under § 73.661 is estimated to average 182 hours per response. The recordkeeping for the collection of information under § 73.3526(a)(11) is estimated to average 12 hours per recordkeeper. These estimates include the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing the burden, to the Federal Communications Commission, Office of Managing Director, AMD–PIRS, Records Management Division, Washington, DC 20554, and to the Office of Management and Budget, Paperwork Reduction Project (3060–0479), Washington, DC 20503.

This is a synopsis of the Commission's Memorandum Opinion and Order in MM Docket No. 90–162, adopted September 23, 1993, and released October 22, 1993. The complete text of this Memorandum Opinion and Order is available for inspection and copying during normal business hours in the FCC Reference Center (room 239), 1919 M Street, NW., Washington, DC, and also may be purchased from the Commission's copy contractor, International Transcription Service, (202) 857–3800, 2100 M Street, NW., suite 140, Washington, DC 20037.

Synopsis of Memorandum Opinion and Order

1. In this Memorandum Opinion and Order, the Commission addresses the issues raised in petitions for reconsideration of its Second Report and Order (Second R&O), 58 FR 28927 (May 18, 1993), which amended the financial interest and syndication ("finsyn") rules. For the most part, the petitions and responsive pleadings reiterate arguments that the Commission considered and rejected in its Second R&O. After careful review, the Commission finds no new evidence warranting fundamental changes in the rules as adopted. To the extent that new arguments have made, particularly with respect to the Commission's decision in the Second R&O to exempt emerging networks from most finsyn restrictions and to schedule a timetable for expiration of all finsyn constraints, the Commission is, with a few minor exceptions, also unpersuaded that the rules should be changed. Thus, by this Memorandum Opinion and Order, the Commission denies most aspects of the petitions before it. The Commission does, however, make minor adjustments to the reporting requirements set forth in § 73.661 of its Rules, and makes a technical correction to the language of § 73.660(a) of its Rules. In addition, the Commission has decided to codify in new § 73.663 the approach adopted in the Second R&O toward scheduling the expiration of the finsyn rules.

2. The Commission initiated this proceeding in 1990 to determine whether modification of the finsyn rules was warranted. Those rules, originally adopted in 1970, placed significant restrictions on the ability of the established networks (ABC, CBS and NBC) to own programming and engage in the practice of syndication. The Commission had imposed these restraints to limit network control over television programming and thereby encourage the development of a diversity of programs through diverse and antagonistic sources of program services. In its 1991 Report and Order (R&O), 56 FR 26242 (June 6, 1991), the Commission declined to substantially repeal the 1970 finsyn rules, but did relax them, observing that the role and power of the three established networks had diminished, that cable television had emerged as a competitive force, and that the fundamental objectives of the rules—to foster a robust syndication industry and to prevent extraction of rights from non-network producers—

had been advanced. Despite these advances, a majority of Commissioners remained concerned that the underlying objectives of the rules could not be achieved fully in the absence of such rules. Accordingly, the Commission took a measured approach toward relieving the restrictions under which the networks operate.

3. On appeal, the United States Court of Appeals for the Seventh Circuit ("Court" or "Seventh Circuit") vacated the Commission's 1991 R&O, except insofar as the Commission abrogated the 1970 finsyn rules. See *Schurz Communications* v. *FCC (Schurz)*, 982 F.2d 1043 (7th Cir. 1992). In the Court's view, the R&O failed to explain adequately how the 1991 rules satisfied the Commission's goals of program source and outlet diversity, or why the Commission rejected certain network arguments raised during the course of the proceeding. In response to the Court's action, the Commission sought additional public comment on the general and specific issues cited in the *Schurz* decision. After due deliberation and review of the record, the Court's opinion and ongoing changes in the marketplace, the Commission amended the finsyn rules again, issuing the Second R&O under reconsideration here. The Commission stated its view that these new finsyn rules "comport more accurately with the weight of the evidence presented in this proceeding, address the concerns cited by the Seventh Circuit in *Schurz*, and constitute the best approach for furthering our goals of diversity and competition."

4. The current finsyn rules place no restrictions on network acquisition of financial interests and passive syndication rights ("back-end rights") in network programming, except for certain reporting requirements. There are also no limits on the amount of "in-house" [1] programming a network can produce and distribute through its network distribution system, and no restrictions on network ownership and syndication of all non-prime time network programming and all non-entertainment network programming (whether prime time or not). Active syndication by a network of prime time entertainment network programming, however, along with network participation in the first-run syndication market, is circumscribed. More specifically, the networks are prohibited from actively syndicating prime time entertainment network programming or first-run non-network programs to television stations within the United States. Any such program for which a network holds syndication rights must be syndicated domestically through an independent syndicator. Moreover, a network cannot hold or acquire a continuing financial interest or syndication right in any first-run non-network program distributed in the United States unless the network has solely produced that program.

5. With respect to foreign markets, the networks may purchase, without restriction, foreign syndication rights in off-network programming distributed outside of the United States and first-run programming distributed solely outside the United States. Under these same conditions, the networks may also engage in active syndication abroad. The networks may also purchase foreign syndication rights in, including active syndication of, first-run programming in foreign markets even if the program is also distributed domestically, so long as the network has produced the programming solely in-house.

6. In promulgating these rules, the Commission relaxed major aspects of the 1991 regime. Most significant was its decision to remove virtually all restrictions on network acquisition of back-end rights in network programming. While the 1991 rules allowed some such acquisitions, these rules required waiting and "cooling off" periods between stages of negotiation, barred network-initiated co-production arrangements with outside producers, and imposed certification requirements. Another significant change from the 1991 rules was the Commission's adoption of a mechanism for removing all remaining finsyn regulation. Specifically, the restrictions will expire two years after similar restrictions set forth in consent decrees that currently bind CBS, ABC, and NBC are lifted by the U.S. District Court that has jurisdiction over those decrees. The Commission also relaxed the 1991 rules by exempting emerging networks from finsyn constraints, except for reporting requirements that are triggered once the emerging network provides 16 hours of prime time programming per week to interconnected affiliates.

7. While the Commission created a less restrictive finsyn regime than the one it had adopted in 1991, it did extend the 1991 prohibition on active network syndication to all domestic syndication, regardless of whether the network had produced the program in-house or acquired it from an outside producer. Under the 1991 rules, the networks were permitted to syndicate actively their prime time entertainment shows that were produced in-house and aired on their own networks, although a companion restriction imposed a 40 percent cap on the use of such programming in a network's prime time schedule to counter the resulting incentive for networks to produce most of their own prime time schedules. To prevent the networks from abusing their 1991 opportunities to syndicate programming actively, however, the Commission imposed restrictions against affiliate favoritism and warehousing practices.

8. In the Second R&O, the Commission revisited its approach toward active network syndication and concluded that more cautious treatment was appropriate in the interests of diversity and competition, particularly in light of its companion decision to lift virtually all restrictions on acquisition of back-end rights in network programming. In addition, the Commission recognized that the revised restrictions on active syndication obviated the need for either the 40 percent programming cap or the affiliate favoritism restraints, both of which were consequently eliminated. In contrast, the Commission retained the anti-warehousing safeguard, recognizing that the network ban on active syndication would have no proscriptive effect on a network's ability to warehouse programming. The Commission also observed that under this new regime, the rules were not only simpler, but they also avoided interfering with the networks' prerogatives to compose their prime time schedules with as much in-house programming as they deemed appropriate. Finally, the Commission indicated that modification of the 1991 approach toward active syndication and the consequent return to a more restrictive regime in this area would not disrupt any network syndication activities undertaken between 1991 and 1993 because the consent decrees have independently barred the networks from active syndication during this period.

9. *Review and Expiration of Rules.* In the Second R&O, the Commission retained the remaining FCC finsyn restrictions until two years after the entry of an order by the U.S. District Court, Central District of California ("District Court"), granting the networks' motions to modify certain restrictions of the consent decrees that now limit, independent of FCC rule, network participation in the financial interest and syndication areas. The Commission stated that it would launch an inquiry eighteen months after the District Court removed these consent decree restrictions to provide an

[1] "In-house" productions refer to co-production arrangements between a network and an outside domestic or foreign producer, as well as programming produced solely by a network.

opportunity for comment to those who believe that retention of restrictions is warranted. The burden of proof in that proceeding will be on proponents of retaining the rules. The Commission states that unless it issued an order to the contrary, all remaining finsyn restrictions would expire six months after the Commission launched this review.

10. The non-network opponents of the Commission's review and expiration framework fundamentally misconstrue the basis for retention of restrictions on active network syndication and network participation in the first-run market. Based on a review of the entire record, the Commission had concluded that current market conditions alone do not justify retention of the 1991 finsyn restrictions. At the same time, the Commission recognized that it is impossible to be certain that the dangers discussed at length in this proceeding will not come to pass. The Commission was, however, able to identify those areas where it was certain that harm from such dangers would not occur. As the Commission states in the Second R&O:

> [W]e have identified and are removing the portion of the finsyn rules hose elimination appears least likely to cause such harm and most likely to create positive effects—i.e., the restraints on network acquisition of financial interests and passive syndication rights, and all restraints in connection with programs distributed in foreign markets.

11. With respect to active network syndication of prime time entertainment off-network programs and network involvement in the first-run market, however, the Commission viewed the risks of deregulation as having "a closer nexus to [the Commission's] traditional interest in diversity that could be adversely affected if [its] predictions prove inaccurate." The "predictions" to which the Commission referred were not simply predictions that the market would, in two years, develop to the point of justifying elimination of the remaining finsyn constraints. Indeed, the Commission determined that current market conditions would justify removal of these constraints were it not for several critical non-market factors. First, the Commission predicted that the networks would not behave in ways detrimental to diversity and competition if the constraints were lifted now, but it could not be absolutely certain that lifting the constraints would cause no harm. Second, a more cautious approach appeared to be warranted with respect to syndication because of the more significant risk of damage to outlet diversity in the event that the Commission prematurely removed these last restrictions. In addition, a third factor played into the Commission's decision to take a phased approach toward lifting the finsyn rules: The Commission recognized that immediate elimination of all the rules could be disruptive and have unintended and unforeseen negative effects, given the fact that the finsyn regulatory scheme has been in place for over two decades. During this time, industry participants have come to rely on the structure imposed by that regulatory scheme.

12. In view of these three factors, the Commission concluded that it would be irresponsible to remove all restrictions at the current time. Instead, the Commission deemed it appropriate to proceed somewhat cautiously, to ensure, insofar as possible, that the modifications of the restrictions would be smoothly integrated into industry practices without harming the public interest. Moreover, while recognizing that the first factor (lack of certainty) will always be present when an agency removes restrictions on a market, the Commission sought to reduce its force by taking a phased approach toward deregulating in this area. Thus, the Commission indicated that its lack of certainty regarding the danger of removing the active syndication and first-run constraints would be reduced if, after two years of network participation in the program acquisition market, there were no unintended negative consequences. Accordingly, the Commission scheduled a review as an additional safeguard to gauge as responsibly as possible whether its conclusion regarding the state of the 1993 market—that it can operate effectively without finsyn restrictions—and of developing market trends was accurate.

13. In view of the above, the Commission states that the principal objection to its review and expiration mechanism raised by the non-network petitioners is without merit. In essence, petitioners argue that the Commission has acted unlawfully by scheduling the elimination of rules without providing a reasoned basis to justify their elimination. The bases for the scheduled elimination of the rules are set forth in the Second R&O, which concluded that current market conditions alone do not justify continuation of the finsyn regime. Moreover, since the scheduled elimination of the rules is based upon the Commission's conclusions about the current state of the market—conclusions reached after extensive proceedings and full opportunity for comment—it is appropriate to place the burden of proof on those who seek to overturn these conclusions at the time of the review. Furthermore, the request to extend existing or modified portions of the finsyn rules past the expiration date (ie., the anti-warehousing safeguard, the reporting requirements and a behavioral restriction against affiliate favoritism) will be unnecessary unless it is demonstrated at the time of review that the Commission's conclusion in the Second R&O about the current market are in error.

14. Given its view of the market, the Commission states that it has tried to give the networks the greatest possible leeway while still crafting an approach that would give the Commission some indication how the market will, in practice, respond to network entry. Thus, the Commission rejects proposals to retain or add restrictions. While a number of petitioners have argued that the two-year period is too short for enough information to develop to enable the Commission to conduct a meaningful review, this time frame will allow the Commission to observe some degree of network acquisition of financial interests. In addition, the Commission expects the Fox network to qualify as an emerging network in the near future, and to begin, soon thereafter, to become subject to the reporting requirements. Since Fox is not otherwise constrained by the finsyn restrictions, the Commission expects to obtain useful information about that network's syndication activities. Moreover, since the three established networks will not necessarily limit themselves to purchasing syndication rights in newly-launched programs, the Commission may see their participation in syndication by the time of review. More importantly, the Commission is not using the review period as a testing ground for observing specifically how networks handle their limited role in syndication. Rather, it will review their behavior in the program acquisition market primarily, where the most discernible activity will occur. If that behavior appears to reflect an unanticipated degree of market power, the Commission will regard that evidence as a strong indication that its overall marketplace analysis may have been misplaced.

15. The networks' general opposition to the Commission's framework is based on the view that all finsyn restrictions should be eliminated at once. This course of action would be unwise and would unnecessarily jeopardize the public interest. There is also a network objection to the linkage between the end of the rules and the lifting of the consent decrees. This linkage, however, is an essential practical component of the Commission's decision not to strip a vay

all finsyn constraints until the Commission has had some opportunity to review an empirical showing by opponents of elimination about network market behavior under the modified rules. Until the consent decrees are lifted, it will be virtually impossible for the Commission to verify its predictions about such behavior. Thus, as was explained in the Second R&O, the Commission did not link the final review and expiration of the rules to the consent decrees because of any close relationship of the rules to antitrust principles, as the networks assert, but rather for very practical reasons. Thus, on this point, there is no inconsistency between the 1991 R&O and the Commission's decision in the Second R&O.

16. *Network Acquisition of Back-End Rights.* When the Commission eliminated the 1991 restrictions on network acquisition of back-end rights in network prime time entertainment programming, it concluded that its 1991 market analysis was too narrow, and that program producers are not so limited in finding buyers for their products to justify continued restraints on network participation in the purchase of these back-end rights. To the contrary, the record revealed a host of existing and emerging alternative outlets for program producers, serving to ensure that the three established networks cannot reduce producer profits below a competitive level or otherwise extract concessions that producers generally would not give in a competitive market.

17. Moreover, the Commission determined that competition among the networks themselves acts as an additional constraint on their exercise of market power, and it observed that the decline in network audience share demonstrates further erosion of their power. Furthermore, the Commission concluded that the 1991 restrictions in this area are not only inherently ineffective as a means of restraining any network power that might exist, but they also work to the detriment of the Commission's goal of fostering source and program diversity by eliminating the networks as effective sources of financing for producers. And, in fact, the Commission discerned from the record that the production community has become increasingly concentrated over the course of the finsyn regime.

18. The producers' fundamental premise in contesting the Second R&O is that the host of alternative outlets to which the production community can turn to avoid a given network's purported coercion—the 100 cable television networks; the burgeoning first-run market; the new Fox network; and the other established networks with which a producer is not dealing at the time—is insufficient to prevent each of the three established networks from extracting, on an ongoing basis, supra-competitive concessions from their suppliers of prime time entertainment programs. The Commission rejected this assessment of the market in the Second R&O, given such factors as the breadth of alternative outlets, their programming expenditures, the significant degree of commonality between their suppliers and those of the established networks, the increasing incidence of cross-over from the established networks to these alternative outlets, and the increasing similarity in budget and quality between prime time network entertainment programs and non-network entertainment programming.

19. The producers' response is to assert that neither cable network nor first-run syndication buyers purchase programming of a type and at a price sufficiently similar to that aired by the networks during prime time to offer a reasonable alternative outlet to producers of prime time network entertainment programming. Thus, the producers argue that cable networks primarily offer specialized programming, news, or low-budget topical or game shows, none of which fare well in subsequent domestic or foreign syndication, and that only a small amount of programming sold in first-run consists of entertainment programs that can be syndicated after their initial run. The Commission states that its appropriate regulatory focus is not on whether producers would generally prefer to strike deals with one of the established networks, but rather whether the overall demand for programming in the broadcast and cable marketplace limits a network's ability to control the market or dictate prices for prime time entertainment programs. The Commission affirms its conclusion that the marketplace does, in fact, place such limits on the networks, and states that the producers have provided insufficient evidence to call this conclusion into question.

20. The Commission observes that the producers have ignored or erroneously discounted several critical factors that led to the conclusion that the networks lack sufficient market power to justify regulation in this area. First, nothing was said about the emergence of Fox as a viable "fourth" network that provides program producers with a highly significant alternative outlet and thus operates as a check on the power of the traditional networks.

21. Second, the effect of the potential for competition in limiting market power was ignored. When competition looms on the horizon, established businesses will act and plan accordingly, recognizing that if they overreach, their potential competitors are better positioned to match or beat the terms they set. Thus, the potential for competition constrains the power of established entities such as the networks. Additionally, in the brief interval since the Commission adopted the Second R&O, there is increasing evidence that additional competition from new networks is more than just potential—it is becoming a reality.

22. Third, the producers discount the effect that internetwork competition has in limiting network power. They argue that the structure of the negotiations process between the networks and their program suppliers, coupled with similarities of contractual terms and the like, demonstrate that the networks do not compete for programming. The Commission has, however, previously considered and rejected the Coalition's bases for this argument.

23. Fourth, the producers improperly discount the significance of the networks' declining audience share when they argue that such a decline is irrelevant to the issue of the networks' market power in the program acquisition market. The broadside criticism that audience share is irrelevant to the networks' power in the program acquisition market lacks merit. Viewership is the direct measure by which advertisers pay stations, which translates into profits. Program expenditures, in turn, are a critical device for increasing audience. To the extent a network loses audience, it has an incentive to increase programming expenditures, which places it in a weaker position vis-a-vis its program suppliers. At the same time, however, losses in a network's audience could impair the network's ability to pay its suppliers, which can result in the loss of the best talent to other distributors.

24. The Commission also sees no merit in the producers' criticism of its conclusion that the 1991 finsyn restrictions—by preventing the free play of three additional sources of funds—limit the overall opportunities of the production community to secure financing, thus undermining the Commission's goal of fostering source and program diversity. The Commission reiterates that the constraints of the marketplace will prevent the networks from securing undue concessions from the production community as a whole, and that under the finsyn regime the

production community has grown increasingly concentrated since 1970.

25. In view of the Commission's conclusion that the networks lack the power to abuse their position in acquiring programming, the request for reinstatement of a negotiations separation requirement is rejected. Moreover, the Commission reiterates its finding that such a requirement would artificially impede producers' efforts to obtain network financing, thus working against diversity goals. Furthermore, the Commission remains unconvinced that such a requirement could, in any event, effectively prevent network exercise of undue market power. The Commission also sees no need to reinstate the 1991 requirement that a network certify that it has not conditioned the relinquishment of producer rights and interests on access to the network. Such a certification presupposes that the program acquisition market is not competitive. Since the Commission has expressly found to the contrary, the elimination of that certification requirement is affirmed. Moreover, the Commission agrees that there are costs associated with such a certification requirement; unless the Commission is persuaded that a certification requirement is necessary to further legitimate goals, it will not, as a primary tenet of regulatory policy and law, impose requirements that may create costs.

26. Finally, the Commission rejects the proposal to impose a strict passivity requirement on all financial interests purchased by the networks. The current rules are designed to ensure that the networks do not play an active role in syndicating prime time entertainment network programming. Thus, the networks are required to use an independent syndicator to syndicate any programming in which they hold syndication rights. Moreover, the Commission provided an additional safeguard when it stated in the Second R&O that it would consider complaints if a party can make a showing undermining the credibility of the "independence" of such a syndicator. The Commission also points out that if a network holds a financial interest in a program, without any accompanying syndication right, it has no legal say in the syndication of that program. To the extent that a network would attempt to exercise influence or control over the syndication of such a program, the Commission would view this as a violation of its ban on active network syndication. Accordingly, the Commission would consider complaints regarding this behavior as well, upon a proper showing that the network had exercised such control or influence.

27. *Network Syndication of Off-Network Programming.* The record in this proceeding supports the conclusion that current market conditions alone do not justify retention of finsyn restrictions. Thus, the Commission's decision in the Second R&O to retain some measure of finsyn regulation, such as the ban on active domestic syndication by networks of their prime time entertainment programming and the prohibition against warehousing, was generally premised on three critical non-market factors: (1) The impossibility of being certain that lifting finsyn constraints would cause no harm, (2) the more significant risk of damage to outlet diversity in the event the Commission improvidently removed the remaining restrictions, and (3) the danger that immediate elimination of all the rules would be disruptive and have unintended and unforeseen negative effects.

28. Accordingly, the Commission adopted a cautious approach that prohibits, *inter alia*, active syndication by networks of prime time entertainment programming in the off-network domestic syndication area until the scheduled expiration of the rules. This approach is especially appropriate while the Commission observes whether the concerns arising from its decision to remove restrictions on network acquisition of back-end rights will, in practice, prove unjustified. The Commission repealed the restrictions on acquisition of back-end rights because it was satisfied that such repeal would further its goals of competition and diversity. Nonetheless, recognizing the considerable dispute even in this area, along with the inherent uncertainty of predicting future events after repeal, the Commission deemed it appropriate to observe how the networks act in the disputed areas where it has deregulated before it proceeds with further deregulation. The line the Commission drew reflects both its greater surety that repeal of financial interest restrictions in the off-network context is warranted and its conclusion that removal of the other restrictions poses a risk of greater harm if the Commission's informed predictions about network activity in the syndication (and first-run) areas are wrong. Incorrect predictions about network behavior in the latter areas would most greatly affect independent stations and undermine the important role they play in providing service to the public.

29. Network petitioners mistakenly contend that the Commission imposed the active syndication ban merely to eliminate the 40 percent production cap and thus remove the networks' incentive to increase their in-house productions. In fact, the Commission first determined that the most responsible approach for phasing out the finsyn regime was to lift all restrictions in one area before lifting restrictions in others. Thus, the Commission removed all prohibitions on network acquisition of back-end rights to network programming, but circumscribed network activities in the active syndication and first-run areas. While the approach of the Second R&O is, admittedly, more restrictive with respect to active syndication than the 1991 approach, the Commission determined that maintaining restrictions on active network syndication has significant advantages as a method for phasing out the finsyn regime. Once this determination was made, the Commission was able to remove the 40 percent limit on network prime time in-house programming; given their blanket freedom to acquire passive interests in network programming, regardless of production arrangement, coupled with the restrictions on active syndication, the networks no longer have an incentive to inflate the amount of their in-house productions. Thus, any need for the 40 percent cap is obviated.

30. The Commission also disagrees with contentions that it relied on the simplicity of the active syndication ban as an independent basis for imposing it. In the Second R&O, the Commission recognized that the new regime (including the scheduled expiration of the rules) was not only warranted for the reasons discussed herein, but it also had the advantage of simplicity and thus responded to a specific concern (i.e., that the 1991 rules were overly complex and unwieldy) voiced by the *Schurz* Court in its decision vacating the 1991 rules.

31. The Commission also refutes the contention that it used the consent decrees—and the fact that the networks are prohibited from engaging in active syndication thereunder—as a justification for its own ban. Again, this argument is based on a misreading of the Second R&O. The purpose of the Commission's statements about the nugatory effect of modifying the 1991 rules' approach toward active syndication in light of the consent decrees was to signal that this change would not have any practical effect in disrupting any network syndication activities undertaken between 1991 and 1993, for the simple reason that the consent decrees will have barred any such activities during this period.

32. The Commission defends its decision to proceed cautiously before lifting the syndication restrictions by first waiting to observe network behavior in the program acquisition area. The Commission believes that what occurs in the deregulated financial interest side of the programming market will likely be relevant to the Commission's decision to phase out the remaining syndication rules. For example, if information gathered in the future concerning network acquisition of ownership rights suggests that the networks have, contrary to the Commission's predictions, acquired the syndication rights to most attractive network programs, the Commission might reconsider its decision to schedule repeal of the remaining rules. The Commission also believes that evidence of network abuses in the programming acquisition market could presage anticompetitive behavior in the off-network syndication market. Finally, the Commission believes that if the networks abuse their financial interest freedoms in the face of the Commission's deregulatory efforts, they could be found to be acting in bad faith. Such actions would weigh heavily against permitting the remaining rules to expire. Indeed, such actions could result in a tightening of the Commission's finsyn rules.

33. The Commission rejects network challenges to its warehousing position and its concerns about affiliate favoritism insofar as the Commission has focused on the ability of the networks to "steer hit shows" toward affiliates and away from independent stations. There is evidence in the record to raise concerns that the networks may have the ability and incentive to steer popular off-network shows toward affiliates or otherwise give them an advantage, either by withholding from syndication programs still in the network run or by favoring affiliates during the sale of off-network programs. If the networks do in fact behave in this manner, the record indicates that independent stations would be harmed, and that such harm could undermine the Commission's diversity goals. Moreover, the record provides strong evidence that independent stations rely quite heavily on hit programs for their competitive viability, and that the significant harm that would flow by impeding this source of programming would damage outlet diversity. While the networks' economic theory disputing the underpinnings of these charges—that networks will not and cannot inflict such harm by controlling access to hit programs—is well known, in an abundance of caution, the Commission appropriately decided in the Second R&O to postpone lifting the syndication restrictions until its theoretical analysis is tested by some degree of practical experience in the financial interest area. The Commission also rejects network contentions that affiliate favoritism restrictions are ineffective in light of a network's ability to achieve the same ends by directly compensating its affiliates (rather than by steering hit shows toward its affiliates). Direct compensation does not appear to be an effective tactic.

34. The Commission declines to amend its 1993 rules to expand its warehousing restriction to prohibit the networks from accomplishing, through network exclusivity clauses, results similar to those that could be achieved by warehousing programs in which the networks themselves hold syndication rights. There is not even a theoretical need for such a restriction until after the prohibition contained in the consent decrees expires in 1995. (Such exclusivity clauses are prohibited until 1995 under the consent decrees.) Moreover, the Commission believes that the occurrence of "back-door" warehousing practices are speculative. Should these types of practices pose a problem in the future, the Commission retains the right to revisit the issue.

35. Finally, on its own motion, the Commission makes a technical correction to language of the rule banning active syndication, 47 CFR 73.660(a). The first sentence of subsection (a) limits the ban to prime time entertainment network programs or first-run, non-network programs, while the second sentence imposes a requirement that the networks use an independent syndicator for "any programs for which a network holds syndication rights." The independent syndicator requirement was the complement to the active syndication ban, and the Commission intended the former to apply only to those programs covered by the ban. Accordingly, the Commission amends the second sentence to read: "Any *such* programs for which a network holds syndication rights * * *" (emphasis added).

36. *Network Participation in the First-Run Market.* As with off-network syndication, petitioners have generally failed to raise any new facts or convincing arguments that would cause the Commission to alter its views on network acquisition and syndication of first-run programming as set forth in the Second R&O. The Commission therefore affirms the limits that it placed on network participation in the first-run market.

37. The Commission states that constraints on network participation in the first-run market are critical to the overall framework established in the Second R&O for phasing out the finsyn regime. As stated above, a key component of the Commission's decision to remove restraints on network acquisition of back-end rights in network programming is the fact that the burgeoning first-run market constitutes a significant alternative outlet for program producers, which supports the Commission's predictive conclusion that the networks do not have the power to coerce anticompetitive concessions from the production community once they are free to purchase such back-end rights. Because the Commission will not know whether this prediction is accurate until the networks begin to exercise their new-found acquisition rights, it determined that any risk of compromising the critical first-run market during the transition toward a finsyn-free environment would be imprudent. Thus, in the Second R&O the Commission established a framework that permits network entry into the off-network program acquisition area, but which, through the period of transition, maintains the character of the first-run market as a fully alternative outlet for program producers. While the Commission has taken this action out of an abundance of caution, it expects that network behavior in the program acquisition area will confirm the Commission's prediction that continued restraint in the first-run area are unnecessary. Thus, the Commission has established a sunset for these remaining constraints.

38. Moreover, the Commission is particularly concerned that it does not jeopardize the goal of outlet diversity, which would be the case if the Commission is wrong in predicting that network involvement in syndication of first-run product would not adversely affect the market. For the reasons the Commission took a cautious approach toward active network syndication of off-network programming, it also concluded that it should proscribe network activity on the syndication side of the first-run market. Thus, the Commission has chosen not to remove syndication restraints without first observing network behavior in the network program acquisition market.

39. The Commission observes that network challenges to the first-run restrictions do not take proper account of the reasons for proceeding cautiously in this area. For example, networks assert that independent station demand alone can accommodate both the influx

of network-supplied first-run programming and the current levels of non-network programming. While this may prove true, the Commission is concerned that network participation in the first-run market could possibly reduce the overall supply of high-quality, first-run shows, given the structure of the market. As discussed before, the success of a first-run program depends upon achieving clearances by: (1) The most powerful stations in the two few markets and (2) a large number of markets throughout the country. The Commission fears that the networks could use their owned and affiliated stations to launch first-run programming and shut out the programming of their competitors. While the Commission believes such anti-competitive behavior is not the inevitable result of the networks' unique position, the Commission is not willing to take the risk until it has seen how the networks behave in the off-network program acquisition context, where the ability to control the market is less likely.

40. Additionally, until it has had some opportunity to witness network behavior in the areas it has relaxed, the Commission remains concerned about the effect of network participation in first-run syndication on the objectives of PTAR, 47 CFR 73.658(k). PTAR was adopted to promote the development of television programs by sources other than the three established networks. As a result, more original programming exists today from more non-network sources than at any time prior to the adoption of PTAR. The Commission is sensitive to concerns that allowing the networks to participate in first-run syndication may compromise the accomplishments of PTAR, especially if network syndicators affect the ability or incentive of broadcast stations to schedule independently produced programming during one of the four hours of prime time. As the Commission has stated before, a dramatic reduction in the sources and variety of access period programs would be contrary to the public interest.

41. In conclusion, the Commission believes the networks have ignored the unique role that top-market, network-owned stations, coupled with vast networks of affiliated stations operating primarily in the VHF band, play in determining the success or failure of first-run programs. In proceeding cautiously, the Commission will ensure, to the extent possible, that it is correct in predicting that the networks will not, by favoring network first-run programs over non-network, first-run shows, reduce the amount of independent first-run programming aired on local stations. Thus, the Commission is mindful of the risk that independent first-run syndicators may find themselves at a disadvantage once they begin to compete against network-produced first-run programs. While the Commission believes, however, that the network advantages alone are probably not sufficient to justify continued regulation, the need for caution warrants retention of the first-run constraints during the pendency of the transition period.

42. Reporting Requirements. In the Second R&O, the Commission adopted a set of reporting requirements tailored to facilitate its review of the effects that the finsyn rule changes would have on network behavior. Under these requirements, the networks must file semi-annual reports identifying all network prime time entertainment programs and first-run non-network programs in which they hold or acquire financial interests or syndication rights. In addition, the networks must provide various related information, such as details concerning the independent syndicators that market such programming, and lists of stations to which the networks themselves syndicate. The Commission stated that the networks not only must file these reports with the Commission, but also must place the reports in each network owned and operated station public file before the first regular business day of September and March of each year.

43. On reconsideration, the Commission has been asked to reconsider three discrete elements of these reporting requirements. Specifically, network petitioners oppose (a) reporting on programs where the only right or interest held by the network is in foreign syndication and the program was produced solely in-house, (b) reporting on programs where the network acquired the right or interest before the effective date of the original 1970 finsyn restrictions, and (c) listing sales to foreign stations of programs that a network actively syndicates abroad. These petitioners argue that this type of information is irrelevant to the Commission's planned review of network behavior under the new finsyn regime, and that collection of this information would be burdensome.

44. The Commission holds that the reporting requirements should be modified in certain regards, but not to the extent requested. With respect to the first element (programming produced solely in-house and syndicated exclusively abroad), the Commission makes no changes. The Commission believes that such information would be relevant for its scheduled review of network behavior under the current finsyn regime and that compliance with this element would not pose an undue burden on the networks. Information on network in-house productions distributed solely abroad will help provide a more complete picture of the scope of network in-house production activities, which will enable the Commission to place in perspective increased network activity in the program production and acquisition market once the networks are free to purchase back-end rights in off-network programming. In addition, throughout the review period prior to the expiration of the rules, it is imperative that the Commission attain thorough information that would reveal any potential for abuse in a finsyn-free environment. The networks' distribution and syndication behavior abroad may have an indirect unanticipated effect on the domestic production and distribution market. Thus, the Commission must obtain sufficient information to conduct a complete assessment of network activity, both domestically and overseas.

45. The Commission is, however, sensitive to the networks' concern that the reporting requirements may force them to disclose sensitive proprietary information. Accordingly, with respect to the third element of the reporting requirements (lists of sales to foreign stations of programs that they actively syndicate abroad), the Commission will modify the rules to clarify that the networks need not provide proprietary or confidential customer lists of foreign stations, but may either redact the identity of the stations (if contracts are provided as part of the reports) or report the market (city and country) to which a specific program is syndicated. However, the Commission is unconvinced that this requirement either places a significant burden on the networks during the eighteen-month review period or is irrelevant to the Commission's review.

46. The Commission sees no reason to make any major change to the remaining element of the reporting requirements (programs acquired before the effective date of the 1970 rules). One of the goals of the Commission's scheduled review of the finsyn rules is to assess the scope of the networks' program ownership under the relaxed regime. Since programming purchased by a network before the 1970 rules became effective and retained to date constitutes a portion of the network's current holdings, the Commission could not form an accurate picture of those holdings without the specific

information that this particular reporting requirement is designed to place on the record. Moreover, information about pre-1970 acquisitions will provide data on specific interests that the networks obtained before regulation, which will establish a baseline against which to compare network transactions in the post-deregulation period. Significantly parallel transactions from the pre-1970 and post-deregulation periods could be probative during the Commission's review of the remaining finsyn regulations. Thus, the Commission will continue to require that the networks provide this information. While the networks have failed to demonstrate that they would encounter any significant burden in doing so, the Commission observes that one aspect of the rule could be difficult or impossible to satisfy for pre-1970 programs: The § 73.661(a) obligation to identify the party who initiated negotiations that led to network acquisition of finsyn rights. Accordingly, the Commission will eliminate the obligation to provide this information for programs acquired by a network before the effective date of the 1970 finsyn rules.

47. Exemption for Emerging Networks. In the Second R&O, the Commission decided to exempt "emerging networks" from most of the remaining finsyn regulations. The Commission recognized that without such an exemption, entities on the threshold of becoming "networks," such as Fox, would be discouraged from programming to capacity, thereby depriving independent stations of access to quality first-run programming important to their ability to compete. The Commission observed that subjecting Fox to finsyn restrictions once its prime time offerings pass 15 hours, only to have the restrictions expire after the provisions in the network consent decrees are lifted, would serve no useful purpose and would likely only discourage Fox from expanding its prime time offerings to capacity. In sum, the Commission stated that adoption of this exemption would remove a significant impediment to the development of competition with the established networks, and would precipitate an increase in the amount of programming available to broadcast stations not affiliated with these established networks. Moreover, the Commission observed that the exemption would preserve a degree of competitive equilibrium in the video marketplace as the Commission proceeded through the phased transition toward elimination of all finsyn restrictions.

48. The objections to the exemption for emerging networks stem from contentions that the established networks do not differ in any material regard from Fox (and presumably any other entity that approaches the network definitional threshold). The Commission disagrees, stating that Fox operates its network on a decidedly different level than the major networks, due in large part to the fact that its distribution system is primarily UHF-based and it competes against three firmly entrenched, decades-old competitors. The Commission has nevertheless recognized that Fox is a significant competitive force and substantially contributes to the diversity of the marketplace on every level. Thus, the Commission has cited Fox's emergence in the marketplace as a significant factor in relaxing the finsyn regime and scheduling the elimination of the rules. Accordingly, while it is clear that the established networks operate at a distinct advantage compared to Fox, the Commission states that the critical question is whether this fact justifies different regulatory treatment. The differences, coupled with the critical role that the exemption plays in the Commission's conclusions about the dynamics of the marketplace and how the finsyn rules can be safely eliminated, lead inexorably to the conclusion that the distinction the Commission has drawn between the established and emerging networks is not only rationally based, but integral to its substantial governmental interest in fostering diversity and competition.

49. The Commission has temporarily retained certain finsyn restrictions on the established networks in large part to ensure that the Commission's conclusions about the marketplace are correct, to avoid significant harm to the market's diversity and competitive structure in the event the Commission has misjudged its dynamics, and to make a smooth transition toward a non-finsyn regime. Encouraging the continued growth of entities which is the function of the exemption clearly solidifies the bases for the marketplace conclusions. In contrast, regulation that discourages emerging competition undermines the conclusion that the market could function competitively and will increase in diversity if the Commission were to remove all finsyn constraints. Thus, removing the exemption would alter the framework of the Commission's analysis that led it to conclude that the finsyn rules should be phased out. Moreover, the exemption will allow the Commission to see how an entity that approaches the functioning of the established networks operates in the syndication market. In addition, the fact that Fox operates at a lower plane and did not participate in the market behaviors that led to the finsyn rules, makes the Commission more confident that no abuses will occur. Furthermore, as the Commission observed above, it would serve no useful purpose to subject Fox and other emerging networks to finsyn rules that are slated to expire shortly. In contrast, maintaining certain finsyn rules under which the established networks operate serves a substantial governmental interest—ensuring an orderly transition toward a non-finsyn regime so as to preserve a competitive equilibrium in the marketplace, avoid unintended and unforeseen negative effects and thus safeguard diversity and competition.

50. With respect to the proposals to impose warehousing constraints and anti-affiliate favoritism measures on emerging networks, the Commission believes such restraints would create an unnecessary layer of regulation on such networks' operations, and, therefore, the Commission declines to adopt such safeguards. As the Commission has indicated, its view of the market is that such networks could not create any damage to the public interest even if they were to engage in such practices, and the Commission is certain enough of this view to implement it at the current time, given the overall framework it has established for phasing out the finsyn rules.

Administrative Matters

Regulatory Flexibility Act

51. Pursuant to the Regulatory Flexibility Act of 1980, the Commission included a final analysis in the Second R&O detailing (1) the need for and purpose of the rules, (ii) the summary of issues raised by public comment in response to the initial regulatory flexibility analysis, Commission assessment, and changes made as a result, and (iii) significant alternatives considered and rejected. No substantive changes have occurred pertaining to the final analysis as a result of the petitions for reconsideration.

Ordering Clauses

52. Accordingly, *it is ordered*, That the petitions for reconsideration filed by the Association of Independent Television Stations, Inc., CBS Inc., Chris-Craft/Tribune et al., the Coalition to Preserve the Financial Interest and Syndication Rule, and National Broadcasting Company, Inc., are granted

to the extent indicated herein and are otherwise denied.

53. *It is further ordered,* That pursuant to authority contained in sections 4(i), 301, 303 (b), (f), (g), (i), and (j), 307(d), 308(b), 309(a), 310, 312, 313 and 314 of the Communications Act of 1934, as amended, part 73 of the Commission's Rules is amended as set forth below.

54. *It is further ordered,* That the amendments to 47 CFR part 73 adopted in this Memorandum Opinion and Order shall go into effect 30 days after publication in the **Federal Register,** except for the amendments to § 73.661, which shall go into effect 30 days after publication in the **Federal Register** or upon approval by the Office of Management and Budget, whichever is later.

Acting Secretary.

Amendatory Text

Part 73 of title 47 of the Code of Federal Regulations is amended as follows:

PART 73—RADIO BROADCAST SERVICES

1. The authority citation for part 73 continues to read as follows:

Authority: 47 U.S.C. 154, 303, 334.

2. Section 73.660 is amended by revising paragraph (a) to read as follows:

§ 73.660 Television network participation in program syndication.

(a) No television network, other than an "emerging network" as defined in § 73.662(g), may actively syndicate any prime time entertainment or first-run non-network program to television stations within the United States. Any such programs for which a network holds syndication rights shall be syndicated domestically through an independent syndicator.

* * * * *

3. Section 73.661 is amended by revising paragraph (a) and the first sentence of paragraph (b) to read as follows:

§ 73.661 Network television program ownership and syndication reports.

(a) A television network shall maintain reports identifying all network prime time entertainment programs, whether aired on its own or another network, and all first-run non-network programs in which the network holds or acquires financial interests or syndication rights. The network shall identify the name of the program, the type of program (network or first-run), the nature of the interest or right held in the program, the dates the program (if a network program) began and ended its network run, and the date the program (if a first-run program) first appeared in syndication. Where a network has, before June 5, 1993, but not on or before August 1, 1972, acquired an interest or right in a program presented to the public, the network shall identify the party that initiated negotiations that led to network acquisition of such interest or right. Any contract or agreement creating or conveying a financial interest or syndication right shall be made available to the Commission upon request.

(b) For any television network that actively syndicates any prime time entertainment program or any first-run non-network program, the network shall maintain reports that list the sales to broadcast stations of any such programming it actively syndicates; provided, however, that with respect to sales of programs to broadcast stations outside the United States, the network may either redact the identity of such stations (if contracts are provided as part of the reports) or report the market (city and country) to which a specific program is syndicated rather than the identity of the station. * * *

* * * * *

4. Section 73.663 is redesignated as § 73.664, and a new § 73.663 is added to read as follows:

§ 73.663 Expiration of the financial interest and syndication rules.

The Commission shall initiate a proceeding to review network activities in the financial interest and syndication areas no later than eighteen months after the entry of an Order by the United States District Court, Central District of California ("District Court") in Civ. Nos. 74–3599–R, 74–3600–R and 74–3601–R, lifting restrictions of the consent decrees administered therein that overlap the restrictions of 47 CFR 73.659, 73.660 and 73.661. In the Commission's review proceeding, the Commission shall presume that expiration of said Sections is warranted, and the burden of proof shall be placed on those who oppose the expiration. Unless the Commission takes affirmative action to the contrary, said Sections shall expire two years after the entry of the aforementioned Order by the District Court.

Note: The Commission shall publish a document in the **Federal Register** announcing the expiration of said Sections.

BILLING CODE 6712–01–M

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

48 CFR Part 1852

Change to the NASA FAR Supplement Promoting More Efficient Use of Contracts for Federal Information Processing Resources by Allowing Delivery of Such Resources to All NASA Installations; Correction

AGENCY: Office of Procurement, Procurement Policy Division, National Aeronautics and Space Administration (NASA).

ACTION: Correction to final rule.

SUMMARY: This notice corrects the final rule published in the **Federal Register** of November 8, 1993 (58 FR 59188). The final rule contained changes to the NASA FAR Supplement to allow broader agency-wide use of contracts for Federal Information Processing (FIP) resources.

EFFECTIVE DATE: This correction is effective on November 8, 1993.

FOR FURTHER INFORMATION CONTACT: Tom O'Toole, NASA Headquarters, Office of Procurement, Procurement Policy Division (Code HP), Washington, DC 20546. Telephone: (202) 358–0478.

SUPPLEMENTARY INFORMATION:

Background

On November 8, 1993, a final rule to amend the NASA FAR Supplement to allow more efficient use of contracts for FIP resources was published in the **Federal Register** (58 FR 59188). Under the new regulation, options or indefinite delivery/indefinite quantities on contracts for FIP resources that are in excess of the NASA contracting activity's ultimate requirements may be ordered for delivery to other NASA installations.

Need for Correction

As published, the final rule did not specify dates for the new Alternate Delivery Point clause and its Alternate I.

Correction of Publication

Accordingly, the publication on November 8, 1993 of the final rule which was the subject of FR Doc. 93–27413, is corrected as follows:

1852.239–70 [Corrected]

1. On page 59189, in the second column, in section 1852.239–70, the references to "[Date]" after the title of the Alternate Delivery Points clause and its Alternate I are corrected to read "[NOVEMBER 1993]" in both instances.

Tome Luedtke,

Acting Deputy Associate Administrator for Procurement.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 625

[Docket No. 930815–3215; I.D. 111893D]

Summer Flounder Fishery

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Emergency interim rule, extension of effective date.

SUMMARY: An emergency interim rule is in effect through November 24, 1993, that allows two or more states, under mutual agreement and with the concurrence of the Director, Northeast Region, NMFS (Regional Director), to transfer or combine summer flounder commercial quota. The Secretary of Commerce (Secretary) extends the emergency interim rule from November 25, 1993, through December 31, 1993, because conditions warranting the emergency still exist.

DATES: The interim regulations amending part 625 published on August 26, 1993 (58 FR 45075) are extended from November 25, 1993, through December 31, 1993.

ADDRESSES: Copies of documents supporting this action may be obtained from: Richard B. Roe, Regional Director, National Marine Fisheries Service, Northeast Regional Office, One Blackburn Drive, Gloucester, MA 01930–3799.

FOR FURTHER INFORMATION CONTACT: Hannah Goodale, Fishery Policy Analyst, 508–281–9101.

SUPPLEMENTARY INFORMATION: Under section 305(c) of the Magnuson Fishery Conservation and Management Act (Magnuson Act), the Secretary promulgated an emergency interim rule (58 FR 45075, August 26, 1993) that allowed two or more states, under mutual agreement and with the concurrence of the Regional Director, to transfer or combine summer flounder commercial quota. The emergency rule was effective from August 23, 1993, through November 24, 1993. At the request of the Mid-Atlantic Fishery Management Council, the Secretary extends the emergency interim rule through December 31, 1993, or until superseded by the final rule implementing Amendment 5 to the Fishery Management Plan for the Summer Flounder Fishery. This action is taken under the authority of section 305(c)(3)(B) of the Magnuson Act because conditions warranting the emergency still exist.

Proposed Rules

Federal Register
Vol. 58, No. 227
Monday, November 29, 1993

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 93–NM–69–AD]

Airworthiness Directives; Corporate Jets Limited Model BAe 125–1000A Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes the adoption of a new airworthiness directive (AD) that is applicable to all Corporate Jets Model BAe 125–1000A series airplanes. This proposal would require replacement of the white 'EMERG CONTCTRS' annunciator screen on roof panel 'CG' of the flight deck with an amber screen. This proposal is prompted by a report that the annunciator screen currently installed on these airplanes is not a color that would alert the flight crew that corrective action may be necessary. The actions specified by the proposed AD are intended to ensure that the flight crew is alerted to conditions when standby electrical power is not available.

DATES: Comments must be received by January 31, 1994.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–103, Attention: Rules Docket No. 93–NM–69–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056. Comments may be inspected at this location between 9 a.m. and 3 p.m., Monday through Friday, except Federal holidays.

The service information referenced in the proposed rule may be obtained from Corporate Jets, Inc., 22070 Broderick Drive, Sterling, Virginia 20166. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington.

FOR FURTHER INFORMATION CONTACT: Stephen Slotte, Aerospace Engineer, Standardization Branch, ANM–113, FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington 98055–4056; telephone (206) 227–2797; fax (206) 227–1320.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 93–NM–69–AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM–103, Attention: Rules Docket No. 93–NM–69–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056.

Discussion

The Civil Aviation Authority (CAA), which is the airworthiness authority for the United Kingdom, recently notified the FAA that an unsafe condition may exist on all Corporate Jets Model BAe 125–1000A series airplanes. The CAA advises that illumination of the 'EMERG CONTCTRS' annunciator light on the flight deck panel indicates that one (or both) of the emergency battery contactors is not closed and that future corrective action may be necessary. The emergency battery contactors connect the respective main aircraft battery to the busbar. When both contactors are not closed, the airplane cannot achieve the time requirement for operation without normal electrical power that is specified in the Federal Aviation Regulations (FAR). The 'EMERG CONTCTRS' annunciator is intended to alert the flight crew when standby electrical power is not available.

Currently, the 'EMERG CONTCTRS' annunciator screen on roof panel 'CG' at indicator position code 'HZ' on the flight deck of these airplanes has a white lens cover. Part 25 of the FAR requires, in part, that caution lights such as the 'EMERG CONTCTRS' annunciator that are installed in the cockpit must be amber in color. Illumination of an amber light indicates to the flight crew that possible future corrective action may be necessary. While dispatch of this airplane is not permitted when the 'EMERG CONTCTRS' annunciator is illuminated, illumination of the white 'EMERG CONTCTRS' annunciator screen during flight may not alert the flight crew that corrective action is necessary. This condition, if not corrected, could result in the flight crew being unaware that standby electrical power is not available.

Corporate Jets Limited has issued Service Bulletin SB.31–44–3645A, dated January 15, 1993, that describes procedures for replacement of the white 'EMERG CONTCTRS' annunciator screen on roof panel 'CG' of the flight deck with an amber screen. Installation of the amber screen will ensure that the appropriate flight deck indication requirements discussed previously are met, and that the flight crew is properly alerted to conditions when standby power is not available. The CAA classified this service bulletin as mandatory.

This airplane model is manufactured in the United Kingdom and is type certificated for operation in the United States under the provisions of Section 21.29 of the Federal Aviation Regulations and the applicable bilateral

airworthiness agreement. Pursuant to this bilateral airworthiness agreement, the CAA has kept the FAA informed of the situation described above. The FAA has examined the findings of the CAA, reviewed all available information, and determined that AD action is necessary for products of this type design that are certificated for operation in the United States.

Since an unsafe condition has been identified that is likely to exist or develop on other airplanes of the same type design registered in the United States, the proposed AD would require replacement of the white 'EMERG CONTCTRS' annunciator screen on roof panel 'CG' of the flight deck with an amber screen. The actions would be required to be accomplished in accordance with the service bulletin described previously.

The FAA estimates that 13 airplanes of U.S. registry would be affected by this proposed AD, that it would take approximately 1 work hour per airplane to accomplish the proposed actions, and that the average labor rate is $55 per work hour. Required parts would be supplied by the manufacturer to operators at no cost. Based on these figures, the total cost impact of the proposed AD on U.S. operators is estimated to be $715, or $55 per airplane. This total cost figure assumes that no operator has yet accomplished the proposed requirements of this AD action.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption "ADDRESSES."

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

Corporate Jets Limited (formerly British Aerospace): Docket 93–NM–69–AD.

Applicability: All Model BAe 125–1000A series airplanes, certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

To ensure that the flight crew is aware that standby electrical power is not available, accomplish the following:

(a) Within 105 days after the effective date of this AD, replace the white 'EMERG CONTCTRS' annunciator screen on roof panel 'CG' of the flight deck with an amber screen in accordance with Corporate Jets Limited Service Bulletin SB.31–44–3645A, dated January 15, 1993.

(b) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Standardization Branch, ANM–113, FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Standardization Branch, ANM–113.

Note: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Standardization Branch, ANM–113.

(c) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

Issued in Renton, Washington, on November 22, 1993.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–P

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 47

[PS–50–93]

RIN 1545–AR95

Vaccine Floor Stocks Tax of 1993

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice of proposed rulemaking by cross-reference to temporary regulations.

SUMMARY: In the Rules and Regulations section of this issue of the **Federal Register**, the IRS is issuing temporary regulations relating to the floor stocks tax on vaccines held on August 10, 1993. These rules reflect changes to the law made by the Omnibus Budget Reconciliation Act of 1993. The temporary regulations provide guidance relating to the person liable for the tax, an exception to the tax, and the time for reporting and paying the tax. The text of those temporary regulations also serves as the text of these proposed regulations.

DATES: Written comments and requests for a public hearing must be received by January 28, 1994.

ADDRESSES: Send submissions to: Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, room 5228, Attn: CC:DOM:CORP:R (PS–50–93), Washington, DC 20044. In the alternative, comments and requests may be hand delivered to: CC:DOM:CORP:R (PS–50–93), Internal Revenue Service, room 5228, 1111 Constitution Avenue NW., Washington, DC 20224.

FOR FURTHER INFORMATION CONTACT: Edward Madden (202) 622–4537 (not a toll-free call).

SUPPLEMENTARY INFORMATION:

Background

The temporary regulations in the Rules and Regulations section of this issue of the **Federal Register** add a new 26 CFR part 47. This document proposes regulations the text of which is the same as the text of those temporary regulations. The preamble to the temporary regulations explains the temporary regulations.

Special Analyses

It has been determined that this notice of proposed rulemaking is not a significant regulatory action as defined in Executive Order 12866. It also has been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) and the Regulatory

Flexibility Act (5 U.S.C. chapter 6) do not apply to these regulations, and, therefore, a Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, this notice of proposed rulemaking will be submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on its impact on small business.

Comments and Requests for a Public Hearing

Before these proposed regulations are adopted as final regulations, consideration will be given to any written comments that are submitted timely (preferably a signed original and eight copies) to the Internal Revenue Service. All comments will be available for public inspection and copying. A public hearing will be scheduled and held upon written request by any person who timely submits written comments. If a public hearing is scheduled, notice of the date, time, and place for the hearing will be published in the Federal Register.

Drafting Information

The principal author of these regulations is Edward Madden, Office of Assistant Chief Counsel (Passthroughs and Special Industries). However, other personnel from the IRS and Treasury Department participated in their development.

List of Subjects in 26 CFR Part 47

Excise taxes, Reporting and recordkeeping requirements.

Proposed Amendments to the Regulations

Accordingly, 26 CFR part 47 is proposed to be added to read as follows:

PART 47—FLOOR STOCKS TAXES

Subpart A—[Reserved]

Sec.

47.1–1 through 47.1–5 [Reserved]

Subpart B—Vaccine Floor Stocks Tax of 1993

Sec.

47.2–1 Scope of subpart B.
47.2–2 Definitions relating to the vaccine floor stocks tax.
47.2–3 Imposition of vaccine floor stocks tax.
47.2–4 De minimis exception to vaccine floor stocks tax.
47.2–5 Requirements with respect to payment and return.

Authority: 26 U.S.C. 7805.

Section 47.2–5 also issued under section 13421(c) of the Omnibus Budget Reconciliation Act of 1993 (107 Stat. 312). [The text of this part 47, as proposed, is the same as the text of the temporary regulations published elsewhere in this issue of the Federal Register.]

Margaret Milner Richardson,

Commissioner of Internal Revenue.

26 CFR Part 47

[PS–49–93]

RIN 1545–AR94

Fuel Floor Stocks Taxes Under the Omnibus Budget Reconciliation Act of 1993

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice of proposed rulemaking by cross-reference to temporary regulations.

SUMMARY: In the Rules and Regulations section of this issue of the Federal Register, the IRS is issuing temporary regulations relating to the floor stocks taxes on gasoline, diesel fuel, and aviation fuel held on October 1, 1993; on diesel fuel held on January 1, 1994; and on commercial aviation fuel held on October 1, 1995. These rules reflect changes to the law made by the Omnibus Budget Reconciliation Act of 1993. The temporary regulations provide guidance relating to the persons liable for the taxes, exceptions to the taxes, and the times for reporting and paying the taxes. The text of those temporary regulations also serves as the text of these proposed regulations.

DATES: Written comments and requests for a public hearing must be received by January 28, 1994.

ADDRESSES: Send submissions to: Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, room 5228, Attn: CC:DOM:CORP:R (PS–49–93), Washington, DC 20044. In the alternative, comments and requests may be hand delivered to: CC:DOM:CORP:R (PS–49–93), Internal Revenue Service, room 5228, 1111 Constitution Avenue, NW., Washington, DC 20224.

FOR FURTHER INFORMATION CONTACT: Edward Madden, (202) 622–4537 (not a toll-free call).

SUPPLEMENTARY INFORMATION:

Background

The temporary regulations in the Rules and Regulations section of this issue of the Federal Register amend 26 CFR part 47. This document proposes regulations the text of which is the same as the text of those temporary regulations. The preamble to the temporary regulations explains the temporary regulations.

Special Analyses

It has been determined that this notice of proposed rulemaking is not a significant regulatory action as defined in Executive Order 12866. It also has been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) and the Regulatory Flexibility Act (5 U.S.C. chapter 6) do not apply to these regulations, and, therefore, a Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, this notice of proposed rulemaking will be submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on its impact on small business.

Comments and Requests for a Public Hearing

Before these proposed regulations are adopted as final regulations, consideration will be given to any written comments that are submitted timely (preferably a signed original and eight copies) to the Internal Revenue Service. All comments will be available for public inspection and copying. A public hearing will be scheduled and held upon written request by any person who timely submits written comments. If a public hearing is scheduled, notice of the date, time, and place for the hearing will be published in the Federal Register.

Drafting Information

The principal author of these regulations is Edward Madden, Office of Assistant Chief Counsel (Passthroughs and Special Industries). However, other personnel from the IRS and Treasury Department participated in their development.

List of Subjects in 26 CFR Part 47

Excise taxes, Reporting and recordkeeping requirements.

Proposed Amendments to the Regulations

Accordingly, 26 CFR part 47 is proposed to be amended as follows:

PART 47—FLOOR STOCKS TAXES

Paragraph 1. The authority citation for part 47 continues to read in part as follows:

Authority: 26 U.S.C. 7805.

Par. 2. Subpart C is proposed to be added to read as follows:

Subpart C—Fuel Floor Stocks Taxes Under the Omnibus Budget Reconciliation Act of 1993

Sec.

47.3–1 Scope of subpart C and effective date.
47.3–2 Definitions relating to the floor stocks taxes under subpart C.
47.3–3 Imposition of floor stocks tax on fuel held on October 1, 1993.
47.3–4 Exceptions to the October 1, 1993, floor stocks tax.
47.3–5 Requirements with respect to payment and return for the October 1, 1993, floor stocks tax.
47.3–6 Imposition of the January 1, 1994, floor stocks tax on diesel fuel held on January 1, 1994.
47.3–7 Exception to the January 1, 1994, floor stocks tax.
47.3–8 Requirements with respect to payment and return for the January 1, 1994, floor stocks tax.
47.3–9 Imposition of the October 1, 1995, floor stocks tax on commercial aviation fuel held on October 1, 1995.
47.3–10 Exceptions to the October 1, 1995, floor stocks tax.
47.3–11 Requirements with respect to payment and return for the October 1, 1995, floor stocks tax.

(The text of this subpart C of part 47, as proposed, is the same as the text of the temporary regulations published elsewhere in this issue of the **Federal Register**.)

Margaret Milner Richardson,

Commissioner of Internal Revenue.

Approval and Promulgation of Air Quality Implementation Plans; Pennsylvania; Stage II Vapor Recovery Regulations

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing two actions in this document. The first is a proposed limited approval/limited disapproval of a revision to the Pennsylvania State Implementation Plan (SIP) submitted by the Commonwealth of Pennsylvania. This revision establishes and requires the use of Stage II vapor recovery at gasoline dispensing facilities in ozone nonattainment areas classified as moderate, serious, or severe in the Commonwealth. The second is a proposed approval of the Pennsylvania Stage II regulation as supplemented by Section 6.7 (b), (c), and (h) and Section 17(2) of the Pennsylvania Air Pollution Control Act, as amended on June 29, 1992. The intended effect of this document is to propose (a) limited approval/limited disapproval of the Pennsylvania regulation requiring Stage II vapor recovery gasoline dispensing facilities (Chapter 129.82), and (b) approval of the Pennsylvania regulation, Chapter 129.82, as supplemented with Section 6.7 (b), (c), and (h) and Section 17 (2) of the Pennsylvania Air Pollution Control Act, as amended on June 29, 1992.

DATES: Comments must be received on or before December 29, 1993.

ADDRESSES: Comments may be mailed to Thomas J. Maslany, Director; Air, Radiation, and Toxics Division; U.S. Environmental Protection Agency, Region III; 841 Chestnut Building; Philadelphia, PA 19107. Copies of the documents relevant to this action are available for public inspection during normal business hours at the Air, Radiation, and Toxics Division, U.S. Environmental Protection Agency, Region III, 841 Chestnut Building, Philadelphia, PA 19107; U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460, Attention: Jerry Kurtzweg; and Commonwealth of Pennsylvania Department of Environmental Resources Bureau of Air Quality Control, P.O. Box 8468, 400 Market Street, Harrisburg, PA 17105–8468.

FOR FURTHER INFORMATION CONTACT: Cynthia H. Stahl, (215) 597–9337, at the EPA Region III address indicated in the **ADDRESSES** section.

SUPPLEMENTARY INFORMATION: On March 4, 1992, the Pennsylvania Department of Environmental Resources (PADER) submitted a revision to its State Implementation Plan (SIP) for Stage II vapor recovery. This submittal by Pennsylvania responds to the Clean Air Act requirement that States with moderate, serious, and severe ozone nonattainment areas submit regulations for Stage II vapor recovery by November 15, 1992. In Pennsylvania, these areas are the Pittsburgh moderate ozone nonattainment area, the Reading moderate ozone nonattainment area, and the Philadelphia severe ozone nonattainment area. The Pennsylvania revision consists of a regulation that requires gasoline dispensing facilities in moderate, serious, and severe ozone nonattainment areas in Pennsylvania to install and use Stage II vapor recovery according to the following schedule:

For facilities that commenced construction after November 15, 1990, compliance with the regulation is required by August 8, 1992, (six months after adoption of the Pennsylvania regulation).

For facilities that dispense more than 100,000 gallons of gasoline per month, based on the average monthly sales for the 2-year period immediately preceding February 8, 1992, compliance with the regulation is required by February 8, 1993 (one year after adoption of the Pennsylvania regulation).

All other facilities that dispense more than 10,000 gallons of gasoline per month are required to comply by February 8, 1994 (two years after adoption of the Pennsylvania regulation).

A separate provision specifically for the Philadelphia severe ozone nonattainment area requires gasoline dispensing facilities with annual throughputs of greater than 10,000 gallons to install Stage II vapor recovery equipment immediately upon addition or replacement of one or more underground storage tanks if such addition or replacement commenced after February 8, 1992.

The DER regulation states that independent small business marketers of gasoline as defined by section 305 of the CAA are exempt if their monthly throughput is less than 50,000 gallons. These schedules and requirements are consistent with the CAAA requirements.

Background

I. Pennsylvania Regulation, Chapter 129.82

The Pennsylvania Stage II regulation does not meet all of the requirements contained in EPA's October 1991 Stage II guidance document for enforcement and EPA's technical guidance documents (EPA–450/3–91–022a and EPA–450/3–91–022b). Specifically, the Pennsylvania regulation does not require that subject gasoline dispensing facilities pass functional testing requirements for the newly installed Stage II vapor recovery equipment, or that facilities be re-tested when suspected of violations or as a follow-up to a violation, or that recertification of the facility occur every fifth year or upon major facility modification (defined as a 75% or greater equipment change), whichever comes first. The functional testing includes performance of the Liquid Blockage Test, the Leak Test, and the Dynamic Backpressure Test, all of which are described in the guidance documents, referenced above. The EPA Stage II guidance documents also describe inspection frequency requirements and facility training requirements. These latter requirements must be included in the

Commonwealth's compliance manual or other enforceable document which is referenced by the regulation and incorporated into the Pennsylvania SIP.

The Pennsylvania regulation requires applicable gasoline dispensing facilities to use a Stage II vapor recovery system that collects at least 90% by weight of the vapors displaced or drawn from a vehicle fuel tank during refueling or a higher percent reduction required by EPA under section 182 of the CAAA. Pennsylvania proposed the Stage II vapor recovery regulations in June 1990, prior to enactment of the 1990 Clean Air Act Amendments. Between the time of initial proposal and the adoption of the Pennsylvania Stage II regulation, EPA issued its Stage II guidance. This guidance, among other requirements, requires 95% control of the vapors displaced during the refueling of a motor vehicle.

The Pennsylvania Stage II regulation is also deficient in that it does not specifically require that the Stage II equipment installed and used in the Commonwealth is certified by the California Air Resources Board (CARB) or is equivalent to such certification. The above mentioned requirement to change the emission control from 90% to 95% is not as critical if the certification specifications require CARB certified equipment since this equipment is expected to obtain 95% control. Each of these deficiencies, pertaining to functional testing and certification requirements must be corrected in order for EPA to fully approve the DER Stage II regulation.

II. Pennsylvania Air Pollution Control Act, Stage II Requirements

On June 29, 1992, the Pennsylvania Senate passed the Pennsylvania Air Pollution Control Act (Senate Bill No. 1650). This legislation was signed and made effective on July 9, 1992. The legislation includes all the language of the Pennsylvania DER Stage II regulation plus the necessary functional testing and certification requirements and emission control requirements. Specifically, the requirements pertaining to Stage II in the legislation differ from the Pennsylvania Stage II regulation in two major ways. The first is that it corrects the deficiencies in the Stage II regulation by requiring that the functional testing and certification requirements and emission control requirements based on EPA's guidance is to be used. Specifically, Section 6.7 (h) of the Pennsylvania Senate Bill No. 1650, Session of 1992, states that the functional testing and certification requirements to be used in Pennsylvania's regulation are those located in EPA's guidance documents developed under section 182 of the Clean Air Act for areas classified as moderate, serious, severe, or extreme ozone nonattainment. The second is that it extends the final compliance dates for the applicable sources built after November 15, 1990 to May 15, 1993 (six months from the effective date of the legislation), for facilities dispensing greater than 100,000 gallons per month to November 15, 1993 (one year from the effective date of the legislation), and for all other facilities to November 15, 1994 (two years from the effective date of the legislation). Section 17(2) made Section 6.7 of the legislation effective on November 15, 1992. The compliance dates in the DER Stage II regulation allow the last group of affected sources up to February 8, 1994 to comply with the regulation (two years from the effective date of the regulation).

The Clean Air Act requires that States adopt and submit to EPA Stage II vapor recovery regulations by November 15, 1992. The Stage II regulations are to require that, within 6 months after the adoption date of the regulation (but no later than May 15, 1993), gasoline dispensing facilities which were constructed after November 15, 1990, comply with the Stage II vapor recovery requirements. In addition, within one year after the adoption date of the regulation (but no later than November 15, 1993), gasoline dispensing facilities which dispense at least 100,000 gallons of gasoline per month, based on average monthly sales for the two year period before the adoption date comply with the Stage II requirements. Within two years after the adoption date of the regulation (but no later than November 15, 1994), all other gasoline dispensing facilities are required to comply with the Stage II vapor recovery requirements. Although the compliance dates in the Pennsylvania DER Stage II regulations and the Pennsylvania legislation are different, they are both consistent with the Clean Air Act requirements.

If the Pennsylvania legislation, Senate Bill No. 1650, when formally submitted, is substantially changed in areas other than those identified in this notice, EPA will evaluate those changes and may publish another notice of proposed rulemaking. If no substantial changes are made other than those areas cited in this notice, EPA will publish a Final Rulemaking Notice on the revisions. The final rulemaking action by EPA will occur only after the SIP revision has been adopted by the State and submitted formally to EPA for incorporation into the SIP.

Since the compliance dates in the DER Stage II regulation differ from those in the Pennsylvania legislation, EPA is soliciting comment on the compliance dates in the DER regulation and on the more distant compliance dates in the Pennsylvania legislation. If, between this proposed rulemaking notice and preparation of the final rulemaking notice, Pennsylvania supplements its Stage II regulation by submitting Section 6.7 (b), (c), (h), and section 17(2) of the Stage II portion of the Pennsylvania Air Pollution Control Act (Senate Bill No. 1650) as a SIP revision, EPA will approve the Stage II vapor recovery requirements of the legislation as a supplement to the DER Stage II regulation, including the more distant compliance dates and the specific testing, certification and emission control requirements. EPA is proposing to approve the compliance dates in the legislation and the specific functional testing and certification requirements in that legislation in addition to the DER Stage II regulation, Chapter 129.82, without further proposal in the Federal Register. If Pennsylvania chooses to submit the legislation as a supplement to the DER Stage II regulations, the SIP submittal of the legislation should be limited to those paragraphs cited above. If Pennsylvania does not submit any additional regulation or legislation to correct the deficiencies in its DER Stage II regulation prior to final rulemaking, EPA will complete its rulemaking action on the March 4, 1992 SIP revision request. The consequence of a final limited disapproval of this regulation will be that within 18 months of the final limited disapproval, EPA will be able to begin the sanctions process under section 179 of the Act.

EPA recognizes that the Pennsylvania legislation is now effective and enforceable in the Commonwealth. Therefore, although this legislation has not been submitted to EPA, EPA is structuring today's proposal to include the possibility of approving the DER Stage II regulation and disapproving the DER Stage II regulation for the limited purpose of allowing Pennsylvania the opportunity to correct its Stage II regulation, or fully approving the DER Stage II regulation with the functional testing and certification requirements of Section 6.7 (h) and the compliance dates in Section 6.7 (b) and (c) and Section 17 (2) of the legislation as a supplement to the DER regulation.

Further details pertaining to this proposed limited approval/limited disapproval action can be found in the accompanying Technical Support Document.

EPA is soliciting public comments on the issues discussed in this notice or on other relevant matters. In particular, EPA is soliciting comment on the limited approval of the DER Stage II regulation alone and on the approvability of the DER Stage II regulation as supplemented and modified by the Pennsylvania legislation, if that legislation is formally submitted to EPA prior to the final rulemaking of the DER Stage II regulation. These comments will be considered before taking final action. Interested parties may participate in the Federal rulemaking procedure by submitting written comments to the EPA Regional office listed in the ADDRESSES section of this document.

Proposed Action

EPA is proposing two actions in today's notice. The first is a proposed limited approval/limited disapproval of the Pennsylvania DER Stage II regulation, Chapter 129.82. The second is a proposed approval of the Pennsylvania Stage II regulation as supplemented by Section 6.7 (b), (c), (h), and Section 17(2) of the Pennsylvania Air Pollution Control Act, as amended on June 29, 1992.

I. Proposed Limited Approval/ Disapproval

EPA believes that it is warranted in proposing a limited approval of the Pennsylvania Stage II regulation because such approval would strengthen the SIP. The DER Stage II regulation, however, does not meet all applicable requirements under part D of the CAAA, and thus, EPA cannot grant full approval of this regulation pursuant to section 110(k)(3). Also, because the submitted regulation is not composed of separable parts that meet all the applicable requirements of the CAAA, EPA cannot grant partial approval of the regulation pursuant to section 110(k)(3). EPA may, however, grant a limited approval of the submitted regulation under section 110(k)(3) in light of EPA's authority pursuant to section 301(a) to adopt regulations necessary to further strengthen the SIP. Thus, in order to strengthen the SIP, EPA is proposing a limited approval of Pennsylvania's Stage II vapor recovery regulation, Chapter 129.82, under section 110(k)(3) and 301(a) of the CAAA. The approval is limited in the sense that the regulation is not being fully approved under 110(k)(3) and Part D of the CAAA since it does not meet the section 182(a)(2)(A) requirement found under part D of the CAAA. Under section 182(b)(3)(A), States with moderate and worse ozone nonattainment areas are required to submit their SIP revisions to EPA by November 15, 1992. Since Pennsylvania did not submit, by November 15, 1992, additional changes to the Stage II regulation in order to make it fully approvable, EPA is required to also propose a limited disapproval of the Pennsylvania DER Stage II regulation because it is missing the functional testing and certification as well as sufficient emission control requirements necessary for full approval of the regulation. Under section 179(a)(2), if the Administrator disapproves a submission under section 110(k) for an area designated nonattainment, based on the submission's failure to meet one or more of the elements required by the Act, the Administrator must apply one of the sanctions set forth in section 179(b) unless the deficiency has been corrected within 18 months of such disapproval. Section 179(b) provides two sanctions available to the Administrator: Highway funding and offsets. The 18 month period referred to in section 179(a) will begin at the time EPA publishes final notice of this disapproval. Moreover, the final disapproval triggers the federal implementation plan (FIP) requirement under section 110(c).

II. Proposed Approval of Chapter 129.82 as Supplemented by Section 6.7 (b), (c), (h), and Section 17(2) of the Pennsylvania Legislation

Due to circumstances surrounding the enforceability of the Stage II regulation, EPA is structuring today's proposal to include approving the DER Stage II regulation (Chapter 129.82) with the functional testing and certification requirements of Section 6.7(h) and the compliance dates in Section 6.7 (b) and (c) and Section 17 (2) of the legislation as a supplement to the DER regulation. As stated above, the legislation has not been formally submitted to EPA, and EPA will not delay its rulemaking action on the March 4, 1992 DER Stage II regulation SIP submittal. Therefore, if the legislation is not formally submitted to EPA prior to final rulemaking of the March 4, 1992 SIP submittal, EPA will complete its rulemaking action on the March 4, 1992 submittal without further consideration of the Pennsylvania legislation.

Nothing in this action should be construed as permitting or allowing or establishing a precedent for any future request for revision to any state implementation plan. Each request for revision to the state implementation plan shall be considered separately in light of specific technical, economic, and environmental factors and in relation to relevant statutory and regulatory requirements.

Under the Regulatory Flexibility Act, 5 U.S.C. 600 *et seq.*, EPA must prepare a regulatory flexibility analysis assessing the impact of any proposed final rule on small entities. 5 U.S.C. 603 and 604. Alternatively, EPA may certify that the rule will not have a significant impact on a substantial number of small entities. Small entities include small businesses, small not-for-profit enterprises, and government entities with jurisdiction over populations of less than 50,000.

SIP approvals under sections 110 and 301, and subchapter I, part D of the CAA do not create any new requirements, but simply approve requirements that the State is already imposing. Therefore, because the Federal SIP approval does not impose any new requirements, I certify that it does not have a significant impact on any small entities affected. Moreover, due to the nature of the Federal-State relationship under the CAA, preparation of a flexibility analysis would constitute Federal inquiry into the economic reasonableness of state action. The Clean Air Act forbids EPA to base its actions concerning SIPs on such grounds. *Union Electric Co.* v. *U.S. EPA*, 427 U.S. 246, 255–66 (1976); 42 U.S.C. 7410(a)(2).

This action has been classified as a Table 2 Action by the Regional Administrator under the procedures published in the **Federal Register** on January 19, 1989 (54 FR 2214–2225). On January 6, 1989, the Office of Management and Budget (OMB) waived Table 2 and Table 3 SIP revisions from the requirement of section 3 of Executive Order 12291 for a period of two years. U.S. EPA has submitted a request for a permanent waiver for Table 2 and Table 3 SIP revisions. The OMB has agreed to continue the waiver until such time as it rules on U.S. EPA's request. This request continues in effect under Executive Order 12866 which superseded Executive Order 12291 on September 30, 1993.

The Regional Administrator's decision to approve or disapprove the SIP revision will be based on whether it meets the requirements of section 110(a)(2)(A)–(K), 110(a)(3), and part D of the Clean Air Act, as amended, and EPA regulations in 40 CFR part 51.

Approval And Promulgation Of Air Quality Implementation Plans; Commonwealth of Pennsylvania; Oxygenated Gasoline Program

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to approve a state implementation plan (SIP) revision submitted by the Commonwealth of Pennsylvania. This revision establishes and requires the implementation of an oxygenated gasoline program in the Pennsylvania portion of Philadelphia Consolidated Metropolitan Statistical Area (CMSA). This SIP revision was submitted to satisfy the Clean Air Act Amendments of 1990 (the Act) which requires all carbon monoxide nonattainment areas with a design value of 9.5 part per million (ppm) or greater based generally on 1988 and 1989 air quality monitoring data to implement an oxygenated gasoline program. The intended effect of this action is to propose approval of the oxygenated gasoline program. This action is being taken in accordance with section 110 of the Clean Air Act.

DATES: Comments must be received on or before December 29, 1993.

ADDRESSES: Comments may be mailed to Thomas J. Maslany, Director, Air, Radiation, and Toxics Division, U.S. Environmental Protection Agency, Region III, 841 Chestnut Building, Philadelphia, PA 19107. Copies of the documents relevant to this action are available for public inspection during normal business hours at the Air, Radiation, and Toxics Division, U.S. Environmental Protection Agency, Region III, 841 Chestnut Building, Philadelphia, PA 19107 and the Commonwealth of Pennsylvania, Department of Environmental Resources, Bureau of Air Quality Control, P.O. Box 8468, 400 Market Street, Harrisburg, PA 17105.

FOR FURTHER INFORMATION CONTACT: Mrs. Kelly L. Bunker, (215) 597-4554.

SUPPLEMENTARY INFORMATION:

I. Introduction

Motor vehicles are significant contributors of carbon monoxide emissions. An important measure toward reducing these emissions is the use of cleaner-burning oxygenated gasoline. Extra oxygen enhances fuel combustion and helps to offset fuel-rich operating conditions, particularly during vehicle starting, which are more prevalent in the winter.

Section 211(m) of the Act requires that various states submit revisions to their SIPs, and implement oxygenated gasoline programs by no later than November 1, 1992. This requirement applies to all states with carbon monoxide nonattainment areas with design values of 9.5 parts per million or more based generally on 1988 and 1989 air quality monitoring data. Each state's oxygenated gasoline program must require gasoline for the specified control area(s) to contain not less than 2.7 percent (%) oxygen by weight during that portion of the year in which the areas are prone to high ambient concentrations of carbon monoxide. Under section 211(m)(2), the oxygenated gasoline requirements are to generally cover all gasoline sold or dispensed in the larger of the CMSA or the Metropolitan Statistical Area (MSA) in which the nonattainment area is located. Under section 211(m)(2), the length of the control period, to be established by the EPA Administrator, shall not be less than four months in length unless a state can demonstrate that, because of meteorological conditions, a reduced control period will assure that there will be no carbon monoxide exceedances outside of such reduced period. EPA announced guidance on the establishment of control periods by area in the **Federal Register** on October 20, 1992.[1]

In addition to the guidance on establishment of control period by area, EPA has issued additional guidance related to the oxygenated gasoline program. On October 20, 1992, EPA announced the availability of oxygenated gasoline credit program guidelines in the **Federal Register.**[2] Under a credit program, marketable oxygen credits may be generated from the sale of gasoline with a higher oxygen content than is required (i.e. an oxygen content greater than 2.7% by weight). These oxygen credits may be used to offset the sale of gasoline with a lower oxygen content than is required. Where a credit program has been adopted, EPA's guidelines provide that no gallon of gasoline should contain less than 2.0% oxygen by weight.

EPA issued labeling regulations under section 211(m)(4) of the Act. These labeling regulations were published in the **Federal Register** on October 20, 1992.[3]

II. Background

Part of Philadelphia County in the Commonwealth of Pennsylvania is designated nonattainment for carbon monoxide and classified as moderate with a design value of 11.6 ppm, based on 1988 and 1989 data. Under section 211(m) of the Act, the Commonwealth of Pennsylvania was required to submit a revised SIP under section 110 and part D of title I of the Act by November 15, 1992 which included an oxygenated gasoline program for the Pennsylvania portion of the Philadelphia CMSA. The counties in Pennsylvania which are impacted by this program are Bucks, Chester, Delaware, Montgomery and Philadelphia.

On November 12, 1992 the Commonwealth of Pennsylvania submitted a revision to its SIP for an oxygenated gasoline program. The revision included revisions to 25 PA Code Chapter 121, General Provisions, section 121.1 Definitions, and the additions of section 126.1 Oxygenate Content of Gasoline to 25 PA Code Chapter 126, Standards for Motor Fuels. These regulatory revisions were adopted by the Commonwealth on June 16, 1992. On February 16, 1993 an amendment to the November 12, 1992 SIP revision was officially submitted to EPA. The amendment corrected a typographical error in 25 PA Code Chapter 121, section 121.1 in the definition of "oxygenated gasoline". The corrected version of the definition was adopted by the Commonwealth on October 24, 1992. EPA summarizes its analysis of the state submittal below. A more detailed analysis of the state submittal is contained in a Technical Support Document (TSD) dated June 15, 1993, which is available from the Region III office listed in the Addresses section of this document.

III. EPA'S Analysis of Pennsylvania's Oxygenated Gasoline Program

As discussed above, section 211(m)(2) of the Act requires that gasoline sold or dispensed for use in the specified control areas contain not less than 2.7% oxygen by weight. Under section 211(m)(5), the EPA Administrator

---

[1] See "Guidelines for Oxygenated Gasoline Credit Programs and Guidelines on Establishment of Control Periods under section 211(m) of the Clean Air Act as Amended--Notice of Availability," 57 FR 47853 (October 20, 1992).

[2] See foonote 1. EPA has issued guidelines for credit programs under section 211(m)(5) of the Act.

[3] See "Notice of Final Oxygenated Fuels Labeling Regulations under section 211(m) of the Clean Air Act as Amended--Notice of Final Rulemaking," 57 FR 47769. The labeling regulations may be found at 40 CFR part 80, § 80.35.

issued guidelines for credit programs allowing the use of marketable oxygen credits. The Commonwealth of Pennsylvania has elected to adopt a regulation allowing the use of marketable oxygen credits and establishing a 2.0% minimum oxygen content. Under EPA's credit program guidelines, all gasoline sold or dispensed during the control period by each control area responsible party (CAR or Blender CAR)[4] must contain an average oxygen content of not less than 2.7% by weight. The Commonwealth of Pennsylvania has adopted this type of oxygen content provision. The following sections of this document address some specific elements of the state's submittal. Parties desiring more specific information should consult the TSD.

Applicability and Program Scope

Section 211(m)(2) requires oxygenated gasoline to be sold during a control period based on air quality monitoring data and established by the EPA Administrator. The Commonwealth of Pennsylvania has established a November 1 to February 29 control period which is consistent with the EPA guidance.

All gasoline sold or dispensed for use within a given control area and during a given control period must comply with the average 2.7% oxygen content requirement and must contain not less than 2.0% oxygen by weight. Marketable oxygen credits may only be used or traded within the boundaries of the control area in which they were created, and only during the applicable control period. The Pennsylvania regulation complies with these guidelines.

Section 211(m)(2) requires that the oxygenated gasoline program apply to all gasoline sold or dispensed in the larger of the CMSA or MSA in which the nonattainment area is located. The Commonwealth of Pennsylvania's oxygenated gasoline regulations require oxygenated gasoline to be sold in Pennsylvania portion of the Philadelphia CMSA, which is consistent with the requirements of section 211(m)(2) of the Act. Specifically, the Pennsylvania regulation requires oxygenated gasoline to be sold in the counties of Bucks, Chester, Delaware, Montgomery and Philadelphia which make up the Pennsylvania portion of the Philadelphia CMSA.

Registration and Reporting Requirements

EPA's credit program guidelines specify that all parties intending to trade marketable oxygen credits should register with the state at least 30 days in advance of each control season. The 30 day time period is intended to allow the state flexibility, and is a suggested provision. Upon acceptance, Control Area Responsible Party[5] (CAR) identification numbers should be issued by the state. EPA guidelines specify that no party should be allowed to generate, trade, buy or sell credits without a CAR identification number.

The Commonwealth of Pennsylvania's registration requirements state that all parties intending to trade marketable oxygen credits shall submit an application to the Commonwealth at least 3 months prior to the start of the control period. The Pennsylvania regulation's registration requirements satisfy EPA's guidance.

EPA has also specified that records should be retained by all parties in the gasoline distribution system. EPA's guidelines impose the following responsibilities on various parties in the gasoline industry. Persons who produce or import gasoline (refiners and importers) are responsible for assuring that the gasoline is tested and that the accompanying documentation accurately reflects oxygen content. Persons who transport, store, or sell gasoline (refiners, importers, blenders, distributors, resellers, retailers, wholesale purchaser-consumers) have various responsibilities associated with assuring that only oxygenated gasoline is sold or dispensed for use in control areas. Terminal owners and operators are responsible for assuring that the oxygen content of the gasoline they receive, handle, or dispense is accurate. Retailers and wholesale purchaser-consumers are responsible for assuring that gasoline intended for sale during the control period contains at least 2.0% oxygen by weight.

According to EPA's guidance, all parties in the gasoline distribution network who are located or do business within a control area, and whose product is eventually sold into the control area for ultimate use, should be required to keep records concerning certain day-to-day activities. Under these guidelines, refiners and importers should be required to keep a copy of all the tests that are performed on batches of gasoline prior to shipment, as well as copies of the bills of lading or transfer documents for each batch. Carriers and distributors should be required to keep copies of the documents which accompany every batch of gasoline their employees handle. Terminal owners and operators and CARs and blender CARs should be required to keep records of both the gasoline they receive from upstream parties, as well as copies of all the tests performed and records created before the gasoline was transferred to a downstream party.

Pennsylvania's recordkeeping requirements for all parties comply with EPA guidelines on recordkeeping.

EPA guidelines also require that CARs commission an annual attest engagement[6], performed by either an internal auditor or independent Certified Public Account (CPA). The guidelines also specify that the standardized forms, specifying agreed-upon procedures for the conduct of the attest engagement, for use by the internal auditor or CPA be provided by the state.

The Pennsylvania regulations require each CAR and blender CAR to conduct or have conducted an attest engagement at the end of the control period. The Commonwealth's regulation requires that the attest engagement report be submitted to the Commonwealth within 60 days after the end of the control period. Pennsylvania has developed and provided a standardized report form for use by the internal auditor or CPA. The Pennsylvania regulation complies with EPA guidance on attest engagements.

Prohibited Activities

EPA's credit program guidelines contain provisions designed to ensure that gasoline that fails to meet the 2.0 % by weight minimum oxygen content requirement is not available for use within a control area. Generally, CARs or blender CARs may not transfer gasoline for use in a control area that contains less than the minimum percent of oxygen by weight to parties who are not themselves registered as CARs or blender CARs. Under EPA's credit program guidelines, regulated parties, including refiners, importers, oxygenate

[4] EPA's October 20, 1992 guidelines define a "Control Area Responsible party," or CAR, as a person who owns oxygenated gasoline which is sold or dispensed from a control area terminal. EPA also has a separate definition for a "Blended CAR" as a person who owns oxygenated gasoline which is sold or dispensed from a control area oxygenate blending facility. A Blender CAR is, in general, a party downstream from a terminal who blends oxygenates into gasoline or who otherwise changes the oxygen content of gasoline intended for use in a control area. Unless otherwise noted, the use of the term "CAR" in this notice refers to both CARs and Blender CARs.

[5] See footnote 6.

[6] When an averaging program is implemented, each CAR and Blender CAR should be required to submit reports to the states detailing certain activities during the control period. Information should be included specifying the following: The volumes of gasoline bought, sold and transferred; volumes and types of oxygenates bought, sold, and transferred; number of credits bought, sold or transferred; and a detailed demonstration of how credits were calculated.

blenders, carriers, distributors, or resellers may not fail to comply with recordkeeping requirements.[7] The Pennsylvania regulation complies with EPA's guidelines on these prohibited activities.

Transfer Documents

EPA's credit program guidelines specify that transfer documents should include the following information: Date of the transfer, name and address of the transferor, name and address of the transferee, the volume of gasoline which is being transferred, the proper identification of the gasoline as oxygenated or nonoxygenated, the location of the gasoline at the time of the transfer, the type of oxygenate, and for transfers upstream of the control area terminal and for transfers between CARs, include the oxygen content by weight and the oxygenate volume of the gasoline. Records are to be kept in a location where they are available for state review.

The Pennsylvania regulation complies with the EPA transfer document guidelines.

Enforcement and Penalty Schedules

State oxygenated gasoline regulations must be enforceable by the state oversight agency. EPA recommends that states visit at least 20% of regulated parties during a given control period. Inspections should consist of product sampling and record review. In addition, each state should devise a comprehensive penalty schedule. Penalties should reflect the severity of a party's violation, the compliance history of the party, as well as the potential environmental harm associated with the violation.

The Pennsylvania 25 PA Code Chapter 126, section 126.1 does not address enforcement provisions; however, enforcement provisions for the oxygenated gasoline program are found in section 9 of the Pennsylvania Air Pollution Control Act as amended on June 29, 1992. The Pennsylvania Air Pollution Control Act allows for the adoption of regulations for oxygenated gasoline. Section 9 of the Pennsylvania Air Pollution Control Act states that employees of the Department of Environmental Resources who are authorized to conduct inspections or investigations are declared to be law enforcement officers and are authorized to issue or file citations for violations of any regulation adopted under the Pennsylvania Air Pollution Control Act, and that the General Counsel is authorized to prosecute the offenses. This section provides for authority to enforce the oxygenated gasoline regulation. Section 9 also provides for penalty provisions. The provisions provided are both civil and criminal, depending on the type and severity of the violation. Pennsylvania's enforcement and penalty provisions are acceptable.

Test Methods and Laboratory Review

EPA's sampling procedures are detailed in appendix D of 40 CFR part 80. EPA has recommended, in its credit program guidelines, that states adopt these sampling procedures. The Commonwealth of Pennsylvania has adopted EPA sampling procedures.

Each state regulation must include a test method. The Pennsylvania regulation requires that compliance be determined in accordance with testing methodologies specified by the EPA. EPA's guidelines allow for the use of either the oxygenate flame ionization detector (OFID) test, preferred by EPA, or the American Society for Testing and Materials (ASTM) standards test method, Designation D 4815–89, although another method could be used if approved by EPA. Therefore, the Pennsylvania oxygenated gasoline regulation allows for the use of the either the OFID or the ASTM D 4815–89 test method, or any other method, if approved by EPA.

EPA has established an interim testing tolerance which states appropriate ranges for credit and per-gallon programs.[8] As EPA states in the memorandum, the purpose of the testing in a credit program is to determine if a sample meets the 2.0% minimum oxygen content requirement and to determine whether the documentation that accompanied that gasoline is correct. For a per-gallon (non-credit) program, the purpose of the testing is to determine whether the gasoline contains less than 2.7% oxygen by weight. The Pennsylvania regulation requires that compliance be determined in accordance with testing methodologies specified by the EPA. Therefore, the Pennsylvania oxygenated gasoline regulation requires the use of EPA's interim testing tolerance as stated in the October 5, 1992 memorandum and, when established, the use of EPA's final testing tolerance.

The Pennsylvania regulation requires that oxygen content compliance calculations be performed in accordance with procedures specified by the EPA. Therefore, the Pennsylvania oxygenated gasoline regulation requires the use of the compliance calculations as described in EPA's guidance document entitled "Guidelines for Oxygenated Gasoline Credit Programs under Section 211(m) of the Clean Air Act as Amended". The announcement of availability of this guidance document was published in the **Federal Register** on October 20, 1992 (57 FR 47853).

Labeling

EPA was required to issue Federal labeling regulations under section 211(m)(4) of the Act. These regulations, published in the **Federal Register** on October 20, 1992[9], required the following statement be posted for a per-gallon program or credit program with a minimum oxygen content requirement:

"The gasoline dispensed from this pump is oxygenated and will reduce carbon monoxide pollution from motor vehicles."

The Federal regulation also specifies the appearance and placement requirements for the labels.

EPA has strongly recommended that states adopt their own labeling regulations, consistent with the Federal regulation. The Commonwealth of Pennsylvania has adopted labeling requirements as part of its oxygenated gasoline regulation. The state requirement for the statement that is to be printed on the label is consistent with the Federal regulation. The portion of the state oxygenated gasoline regulation specifying the appearance and placement of the label differs from the Federal regulation in the following ways: (1) The Federal regulation requires that the posting be in block letters of no less than 20 point bold type whereas the Pennsylvania regulation requires that posting be in block letters of at least a 36 point bold type; and (2) the Federal regulation requires that the label be placed on the upper two-thirds of the vertical surface of the pump whereas the Pennsylvania regulation requires the label to be placed on the upper one-third of the vertical surface of the pump. These two differences in the State regulation are acceptable.

EPA's review of this material indicates the state has adopted an oxygenated gasoline regulation in accordance with the requirements of the Act. EPA is proposing to approve the Pennsylvania SIP revision for an oxygenated gasoline program, which was submitted on November 12, 1992 and February 16, 1993. EPA is soliciting

[7] EPA's recommended provisions for prohibited activities are found at pages 59-61 of the credit program guidelines.

[8] See Memorandum dated October 5, 1992 from Mary T. Smith, Director, Field Operations and Support Division to State/Local Oxygenated Fuels Contacts.

[9] See footnote 3.

public comments on the issues discussed in this document or on other relevant matters. These comments will be considered before taking final action. Interested parties may participate in the Federal rulemaking procedure by submitting written comments to the EPA Regional office listed in the Addresses section of this document.

IV. This Action

Proposed Action

EPA is proposing to approve the amendments to 25 PA Code Chapter 121, section 121.1 Definitions, and 25 PA Code Chapter 126, section 126.1 Oxygenate Content of Gasoline as revisions to the Pennsylvania SIP.

Nothing in this action should be construed as permitting orallowing or establishing a precedent for any future request for revision to any SIP. Each request for revision to the SIP shall be considered separately in light of specific technical, economic, and environmental factors and in relation to relevant statutory and regulatory requirements.

Under the Regulatory Flexibility Act, 5 U.S.C. 600 *et seq.*, EPA must prepare a regulatory flexibility analysis assessing the impact of any proposed or final rule on small entities. 5 U.S.C. 603 and 604. Alternatively, EPA may certify that the rule will not have a significant impact on a substantial number of small entities. Small entities include small businesses, small not-for-profit enterprises, and government entities with jurisdiction over populations of less than 50,000.

SIP approvals under section 110 and subchapter I, part D of the Clean Air Act do not create any new requirements but simply approve requirements that the state is already imposing. Therefore, because the Federal SIP approval does not impose any new requirements, the Administrator certifies that it does not have a significant impact on any small entities affected. Moreover, due to the nature of the Federal-state relationship under the Act, preparation of a flexibility analysis would constitute Federal inquiry into the economic reasonableness of state action. The Clean Air Act forbids EPA to base its actions concerning SIPs on such grounds. *Union Electric Co.* v. *U.S. EPA*, 427 U.S. 246, 255–66 (1976); 42 U.S.C. 7410(a)(2).

This action has been classified as a Table 2 Action by the Regional Administrator under the procedures published in the Federal Register on January 19, 1989 (54 FR 2214–2225). On January 6, 1989, the Office of Management and Budget (OMB) waived Table 2 and Table 3 SIP revisions from the requirement of section 3 of Executive Order 12291 for a period of two years. U.S. EPA has submitted a request for a permanent waiver for Table 2 and Table 3 SIP revisions. The OMB has agreed to continue the waiver until such time as it rules on U.S. EPA's request. This request continues in effect under Executive Order 12866 which superseded Executive Order 12291 on September 30, 1993.

The Administrator's decision to approve or disapprove the SIP revision will be based on whether it meets the requirements ofsection 110(a)(2)(A)-(K), 110(a)(3), and part D of the Clean Air Act, as amended, and EPA regulations in 40 CFR part 51.

[AD-FRL–4804–4]

National Emission Standards for Hazardous Air Pollutants: Halogenated Solvent Cleaning

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule and test method; notice of public hearing.

SUMMARY: The EPA is proposing to regulate the emissions of certain organic hazardous air pollutants from new and existing halogenated solvent cleaning machines, which are among the sources being regulated under section 112 of the Clean Air Act. The proposed rule would require sources to achieve emission limits reflecting the application of the maximum achievable control technology consistent with section 112(d) of the Clean Air Act. The proposed rule would reduce the emissions of the halogenated organic chemicals identified in the Clean Air Act list of 189 hazardous air pollutants including methylene chloride, perchloroethylene, trichloroethylene, 1,1,1-trichloroethane, carbon tetrachloride, and chloroform. To determine the emissions from solvent cleaning machines, a new reference test method 307 is proposed.

A public hearing will be held, if requested, to provide interested persons an opportunity for oral presentation of data, views, or arguments concerning the proposed standards for halogenated solvent cleaning machines.

DATES: *Comments.* Comments must be received on or before January 28, 1994.

Public Hearing. If anyone contacts the EPA requesting to speak at a public hearing by December 20, 1993, a public hearing will be held on December 29, 1993 beginning at 9 a.m. Persons wishing to present oral testimony must contact Ms. Lina Hanzely of the EPA at (919) 541–5673 by December 20, 1993. Persons interested in attending the hearing should call Ms. Hanzely at the same number to verify that a hearing will be held.

ADDRESSES: *Comments.* Comments should be submitted (in duplicate, if possible), to: Air Docket (LE–131), ATTN: Docket No. A–92–39, Room M1500, U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460.

Public Hearing. Persons interested in attending the hearing or wishing to present oral testimony should notify Ms. Hanzely, Chemicals and Petroleum Branch, Emission Standards Division (MD–13), U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711, telephone number (919) 541–5673.

Background Information Documents. The background information and supporting documents for the proposed standards may be obtained from the U.S. Environmental Protection Agency Library (MD–35), Research Triangle Park, North Carolina 27711, telephone number (919) 541–2777. Please refer to one or all of the following documents.

Background Information Document:

"Halogenated Solvent Cleaning National Emission Standards for Hazardous Air Pollutants Background Information Document":

Supporting Document:

"Status of Alternative Solvents and Processes to Halogenated Solvent Cleaning"

Docket. Docket No. A–92–39, containing supporting information used in developing the proposed standards, is available for public inspection and copying between 8:30 a.m. and 3:30 p.m., Monday through Friday, at the EPA's Air Docket, Room M1500, U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC. A reasonable fee may be charged for copying.

FOR FURTHER INFORMATION CONTACT: For information regarding the proposed standards, contact Mr. Paul Almodóvar at (919) 541–0283, Chemicals and Petroleum Branch (MD–13), Emission

Standards Division, U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711.

SUPPLEMENTARY INFORMATION: The following outline is provided to aid in reading the preamble to the proposed regulation.

I. List of Source Categories and Subcategories
A. Halogenated Solvent Cleaning Operations: Major and Area Source Designation
B. Halogenated Solvent Cleaning Category and Subcategories
II. Background
A. Halogenated Solvent Cleaning Source Category Characterization

F. Clean Air Act Procedural Requirements

The following acronym and abbreviation list is provided as an aid in reading the preamble to the proposed standards.

Acronym and Units of Measure Abbreviation List

1990 Amendments=Clean Air Act as amended
Act=Clean Air Act
AEERL=Air and Energy Engineering Research Laboratory
C=chloroform
CFC–113=chlorofluorocarbon-113
CT=carbon tetrachloride
CTG=control techniques guideline
FBR=freeboard ratio
ft^2=square feet
ft/min=feet per minute
GACT=generally available control technology
HAP=hazardous air pollutant(s)
kWH=kilowatt hours
kg/hr=kilograms per hour
MACT=maximum achievable control technology
m^2=square meters
MC=methylene chloride
Mg=megagram
Mg/yr=megagrams per year
m/min=meters per minute
NAPCTAC=national air pollution control technology advisory committee
NESHAP=national emission standards for hazardous air pollutants
NPV=net present value
NSPS=new source performance standards
OMB=Office of Management and Budget
OSHA=Occupational Safety and Health Administration
OTVC=open top vapor cleaner
PCE=perchloroethylene
RCRA=Resource Conservation and Recovery Act
RFA=Regulatory Flexibility Act
RIA=regulatory impact analysis
SAGE=Solvent Alternative Guide
SIC=Standard Industrial Classification
TCA=1,1,1-trichloroethane
TCE=trichloroethylene
VOC=volatile organic compound

I. List of Source Categories and Subcategories

A. Halogenated Solvent Cleaning Operations: Major and Area Source Designation

Section 112 of the Act requires the EPA to evaluate and control emissions of HAP. The control of HAP is to be achieved through promulgation of emission standards under sections 112(d) and 112(f) for categories of sources that emit HAP. The EPA published a notice in the **Federal Register** outlining the procedures used to identify a preliminary draft list of categories of major sources and area sources of HAP on June 21, 1991 (56 FR 28548). On July 16, 1992 (57 FR 31592), a list of categories of sources was published. Halogenated solvent cleaning was listed as a category of both major and area sources. Accordingly, the EPA is today proposing emissions standards under section 112 of the Act for halogenated solvent cleaning operations applicable to both area and major sources of halogenated solvent cleaning machines.

In the preamble to the list of source categories, a finding of "threat of adverse effects" was made for the halogenated solvent cleaning source category.

Due to the high usage and emissions of these cleaners throughout industry, as well as the large number of cleaners, the EPA determined that there is a great potential for exposure to the HAP's used as solvents. One of the cleaning solvents, TCA, has also been implicated as causing stratospheric ozone depletion. Trichloroethane(1,1,1) will be phased out with other Agency regulations under Title VI of the CAA.

The health effects associated with halogenated solvent cleaners are best documented for MC, TCE, and PCE. Both MC and TCE are considered probable human carcinogens and are classified in Group B2, while PCE is still under review.

Evidence indicating the carcinogenicity of MC is available through animal studies. Animal inhalation studies on MC have shown significant increases in liver and lung adenomas and carcinomas in both males and females. Other animal studies have indicated that exposure to elevated levels of MC can cause benign mammary tumors. Based upon this available animal evidence, the Agency has determined that MC is a probable human carcinogen. In addition to these adverse effects, short-term exposure to MC has been known to cause impairments in central nervous system (CNS) functioning. Case reports of exposure to MC have shown that humans exposed to MC exhibited narcosis, irritability, analgesia, and fatigue.

Both PCE and TCE are moderately toxic substances that appear to target the CNS, causing dizziness, headaches and slowing of mental activity. Over longer periods of exposure, these adverse effects may also be seen in the liver and kidneys as well as the eyes and upper respiratory tract. The carcinogenic effects from both these chemicals has also been investigated, mostly through animal experiments. Results of TCE tests indicate that inhalation may result in the formation of renal tumors. Other TCE studies suggest that inhalation is fetotoxic and may cause litter resorption and reduced fetal body weight.

An Agency analysis has been conducted of nationwide exposures, individual lifetime risks, and population incidence from halogenated solvent cleaners emissions. This analysis estimates that as many as six increased cancer cases are attributable to halogenated solvent cleaners, annually, in the U.S. This study also suggests that upper-bound maximum individual lifetime risks in the proximity of these cleaners range from one in 1,000,000 (1×10^{-6}) to one in 10,000 (1×10^{-4}). Nationally, the maximum individual risk near a large facility with multiple conveyorized cleaners is as high as five in 10,000 (5×10^{-4}).

Based upon the evidence presented, the Agency found that cleaners using halogenated solvents present a threat of adverse impact to human health or the environment. The Agency therefore added them to the categories of area sources on their initial list of source categories (57 FR 31576).

B. Halogenated Solvent Cleaning Category and Subcategories

The halogenated solvent cleaner source category does not constitute a distinct industry, but is an integral part of many industries. The halogenated solvent cleaner source category consists of two basic types of solvent cleaning machines: batch and in-line cleaning machines (also called continuous cleaning machines). Both of these equipment types are designed to use solvent to clean parts. The solvent is either used to clean in its nonvapor form (referred to as cold cleaning) or heated and used to clean in its vapor form (referred to as vapor cleaning).

Most halogenated solvent use within the halogenated solvent cleaner source category is in vapor cleaning for both batch and in-line cleaning machines. The proposed standards cover the use of any halogenated HAP solvent (e.g., TCA, TCE, MC, PCE, CT, C), either by itself or in a blend, listed on the HAP list in section 112(b) of the Act and used in a solvent cleaning machine. The halogenated solvent CFC–113 is not listed on the HAP list; therefore, cleaners using this solvent are not covered by these proposed standards.

Most batch cold cleaning machines are small maintenance cleaning machines or parts washers that typically use mineral spirits, Stoddard solvents, and alcohols, which are all nonhalogenated solvents. Because this standard applies only to halogenated solvents, these nonhalogenated solvent processes are not included in the proposed standards. The only identified machines that use halogenated solvents in a batch cold cleaning machine application are carburetor cleaners.

Therefore, today's proposed regulations for batch cold cleaning machines are based on the control of carburetor cleaners, but apply to all cold cleaners using halogenated solvents or blends. It should be noted that nonvapor in-line (continuous) cleaning machines using halogenated solvents are covered by the proposed rule for in-line cleaning machines.

When the initial source category list was published (57 FR 31576), the Agency stated that the establishment of subcategories within a source category would be considered during the development of emission standards under authority of section 112(d). The initial source category list contained only one major and one area category for halogenated solvent cleaning. Solvent cleaning machine emissions and emissions reduction potential have been found to depend upon a number of variables, including size, operating schedule, and machine type. The appropriateness of specific controls is dependent on technical feasibility and emission reduction potential. The halogenated solvent cleaning source category has been divided into four size ranges of batch vapor cleaning machines, one in-line cleaning machine size, and one batch cold cleaning machine size considering the available data. It is the intent of the Agency to amend the initial source category list by substituting the following halogenated solvent cleaning subcategories for the categories published in the initial source category list when the halogenated solvent cleaning regulation is promulgated.

1. Small batch vapor cleaning machines <0.6 m^2 (6.5 ft^2); major and area source list;
2. Medium batch vapor cleaning machines 0.6 m^2 (6.5 ft^2) to 1.21 m^2 (13 ft^2); major and area source list;
3. Large batch vapor cleaning machines >1.21 m^2 (13 ft^2) to 2.51 m^2 (27 ft^2); major and area source list;
4. Very large batch vapor cleaning machines >2.51 m^2 (27 ft^2); major and area source list;
5. In-line cleaning machines (vapor and cold) (all sizes); major and area source list; and
6. Batch cold cleaning machines (all sizes); area source list.

The EPA requests comment on the appropriateness of the subcategorization proposed today. Comment is also requested concerning whether there is a basis for removing any of these subcategories from the source category list. Specific information is requested concerning whether the delisting criteria of section 112(c)(9) are met, or whether, in the alternative, it would be appropriate, in the case of any proposed subcategory, to conduct an assessment under section 112(c)(3) of the effect on human health or the environment before finally creating such subcategory and adding it to the source category list.

II. Background

A. Halogenated Solvent Cleaning Source Category Characterization

The five most commonly used halogenated solvents in solvent cleaning machines are MC, PCE, TCA, TCE, and CFC–113. These solvents are used alone and in blends that may contain two or more halogenated solvents or alcohol and other solvents. However, other halogenated solvents, including C and CT, are also used to a limited extent. With the exception of CFC–113, all are HAP covered by these standards. Although the technical analyses do not include data on C and CT halogenated HAP solvents, these solvents are covered under the proposed standards. The proposed standards would control C and CT halogenated solvent emissions from a solvent cleaning machine the same as for the halogenated HAP solvents included in the technical analyses (i.e., MC, PCE, TCA, TCE).

An estimated 199,700 Mg (219,670 tons) of halogenated solvents (i.e., MC, PCE, TCA, TCE) are used in solvent cleaning machines annually. This estimate represents an estimated 16,400 halogenated solvent batch vapor and 8,100 in-line (vapor and cold) cleaning machines nationwide. Of the 199,700 Mg (219,670 tons) consumed, an estimated 95,000 Mg (104,500 tons) are consumed by batch vapor cleaning machines (primarily OTVC's); and 45,800 Mg (50,380 tons) by in-line cleaning machines (including the use for photoresist stripping). An estimated 58,900 Mg (64,790 tons) of halogenated solvent is used in cold cleaning. This cold cleaning machines halogenated solvent consumption estimate is believed by the EPA to include carburetor cleaner (1,400 Mg [1,540 tons]) use and other cleaning operations such as wipe-cleaning and other clean-up solvent uses. These other operations are not included in the source category covered by today's proposed standards.

The use of TCA and CT is expected to decline as a result of the phaseout of these halogenated solvents mandated by Title VI of the Act and presidential order. However, since their use may extend into the future, CT and TCA are included in the proposed standards.

Halogenated solvent consumption has decreased over the last decade because of solvent recycling efforts, future mandated production phase-outs for TCA, and environmental and occupational health concerns surrounding the use of PCE and MC.

The estimated national baseline HAP emissions for the halogenated solvent cleaner source category are 128,600 Mg/yr (141,400 tons per year). Batch vapor cleaning machine emissions are estimated to represent 66 percent of the emissions, in-line cleaning machines represent 33 percent, and carburetor cleaners the remaining 1 percent. These emissions estimates reflect the level of emission control achieved by the affected industry in the absence of EPA standards.

B. Historical Overview

Control technique guidelines were established in 1977 for the control of VOC from solvent cleaning machines; recommended requirements were adopted by 33 States. In 1980, NSPS were proposed for the solvent cleaning machine industry. The NSPS were never promulgated. An alternative control technology document for halogenated solvent cleaning machines was published in 1989 after substantial review by industry.

The EPA was subsequently sued for not promulgating the NSPS and is under consent decree to propose a NESHAP within 3 years of the passage of the 1990 Amendments to be promulgated within 1 year of proposal. The required proposal date for the halogenated solvent cleaner source category NESHAP is November 15, 1993. The information from the alternative control technology document was updated, as appropriate, in developing the technical basis for the proposed NESHAP. These proposed standards fulfill the NESHAP proposal requirements under the consent decree.

III. National Emission Standards for Hazardous Air Pollutants Decision Process

A. Source of Authority for National Emission Standards for Hazardous Air Pollutants Development

Title III of the 1990 Amendments was enacted to help reduce the increasing amount of nationwide air toxics emissions. Under title III, section 112 of the Act was amended to give the EPA the authority to establish national standards to reduce air toxics from sources that emit one or more HAP. Section 112(b) contains a list of HAP that are the specific air toxics to be regulated by a NESHAP. Section 112(c) directs the EPA to use this pollutant list to develop and publish a list of source categories for which a NESHAP will be developed. The EPA must list all known categories and subcategories of "major sources" ("major sources" emit or have the potential to emit, considering controls, 9.1 Mg/yr [10 tons per year] or greater of any one HAP or 22.7 Mg/yr [25 tons per year] or greater of total HAP) that emit one or more of the listed HAP. Area source (i.e., nonmajor) categories and subcategories selected by the EPA for NESHAP development will be based on the Administrator's judgment that the sources, individually or in aggregate, pose a "threat of adverse effects to human health or the environment," or alternatively will be listed and regulated under authority of section 112.

B. Criteria for Development of National Emission Standards for Hazardous Air Pollutants

The NESHAP are to be developed to control HAP emissions from both new and existing sources according to the statutory directives set out in section 112, as amended. The statute requires the standards to reflect the maximum degree of reduction in emissions of HAP that is achievable for new or existing sources. The NESHAP must reflect consideration of the cost of achieving the emission reduction, and any nonair quality health and environmental impacts, and energy requirements for control levels more stringent than the MACT floors. (As described in section III.C. of this preamble, the MACT floor is the minimum stringency level for MACT standards, and is determined according to section 112(d) of the Act.) The emission reduction may be accomplished through application of measures, processes, methods, systems or techniques including, but not limited to, measures that:

1. Reduce the volume of, or eliminate emissions of, such pollutants through process changes, substitution of materials or other modifications;

2. Enclose systems or processes to eliminate emissions;

3. Collect, capture or treat such pollutants when released from a process, stack, storage, or fugitive emissions point;

4. Are design, equipment, work practice, or operational standards (including requirements for operator training or certification) as provided in section 112(h); or

5. Are a combination of the above [section 112(d)(2)].

To develop a NESHAP, the EPA collects information concerning the industry, including information on emission source characteristics, control technologies, data from HAP emission tests at well-controlled facilities, and information on the costs and other energy and environmental impacts of emission control techniques. The EPA uses this information to analyze possible regulatory approaches.

Although NESHAP are normally structured in terms of numerical emission limits, alternative approaches are sometimes necessary. In some cases, physically measuring emissions from a source may be impossible or at least impracticable due to technological and cost limitations. Section 112(h) authorizes the Administrator to promulgate a design, equipment, work practice, or operational standard, or combination thereof, in those cases where it is not feasible to prescribe or enforce an emissions standard.

C. Maximum Achievable Control Technology Floor Determination and Process of Developing Regulations for Major and Area Sources

The EPA must set MACT standards for each of the source categories listed under section 112(c) of the Act that contain major sources. Such standards must be set at a level at least as stringent as the "floor." Congress provides certain very specific directives to guide the EPA in the process of determining the regulatory floor. As described below, area sources may be regulated with either a MACT standard or a GACT standard. A GACT standard is not required to be as stringent as the MACT floor.

For MACT, Congress specified that the EPA shall establish standards that require "the maximum degree of reduction in emissions of the HAP * * * that the Administrator, taking into consideration the cost of achieving such emission reduction, and any nonair quality health and environmental impacts and energy requirements, determine is achievable for new or existing sources in the category or subcategory to which such emission standard applies * * *" [the Act section 112(d)(2)]. In addition, Congress limited the Agency's discretion by establishing a minimum baseline or "floor" for standards. For new sources, the standards for a source category or subcategory "shall not be less stringent than the emission control that is achieved in practice by the best controlled similar source, as determined by the Administrator" [the Act, section 112(d)(3)]. Congress provided that existing source standards could be less stringent than new source standards but could be no less stringent than the average emission limitation achieved by

the best performing 12 percent of the existing sources (excluding certain sources) for categories and subcategories with 30 or more sources or the best performing 5 sources for categories or subcategories with fewer than 30 sources [the Act, section 112(d)(3)].

Once the floor has been determined for new or existing sources for a category or subcategory, the Administrator must set a MACT standard that is no less stringent than the floor. Such standards must then be met by *all* sources within the category or subcategory. However, in establishing standards, the Administrator may distinguish among classes, types, and sizes of sources within a category or subcategory [the Act, section 112(d)(1)]. Thus, for example, the Administrator could establish two classes of sources within a category or subcategory based on size and establish a different emission standard for each class, provided both standards are at least as stringent as the MACT floor.

In addition, the Act provides the Administrator further flexibility to regulate area sources. Section 112(d)(5) provides that in lieu of establishing MACT standards under section 112(d), the Administrator may promulgate standards that provide for the use of "generally available control technologies or management practices." Area source standards promulgated under this authority (GACT standards) would not be subject to the MACT "floors" described above. Moreover, for source categories subject to standards promulgated under section 112(d)(5), the EPA is not required to conduct a residual risk analysis under section 112(f).

At the end of the data gathering and analysis, the EPA must decide whether it is more appropriate to follow the MACT or the GACT approach for regulating an area source category. An area source is "any stationary source of HAP that is not a major source." As stated previously, MACT is required for major sources. If all or some portion of the sources emits less than 9.1 Mg/yr (10 tons per year) of any one HAP (or less than 22.7 Mg/yr [25 tons per year] of total HAP), then it may be appropriate to define subcategories within the source category and apply a combination MACT/GACT approach, MACT for major sources and GACT for area sources. In other cases, it may be appropriate to regulate both major and area sources in a source category under MACT.

The next step in establishing a MACT or GACT standard is the investigation of regulatory alternatives. With MACT standards, only alternatives at least as stringent as the floor may be considered. Information about the industry is analyzed to develop model plant populations for projecting national impacts, including HAP emission reduction levels, costs, energy, and secondary impacts. Several regulatory alternative levels (which may be different levels of emissions control or different levels of applicability or both) are then evaluated to determine the appropriate MACT or GACT level.

The regulatory alternatives for new versus existing sources may be different, and separate regulatory decisions must be made for new and existing sources. For both source types, the selected alternative may be more stringent than the MACT floor. However, the control level selected must be technically achievable. In selecting a regulatory alternative to represent MACT or GACT, the Agency considers the achievable reduction in emissions of HAP (and possibly other pollutants that are co-controlled), the cost and economic impacts, energy impacts, and other environmental impacts. The objective is to achieve the maximum degree of emission reduction without unreasonable economic or other impacts.

The selected regulatory alternative is then translated into a proposed regulation. The regulation implementing the MACT or GACT decision typically includes sections of applicability, standards, test methods, and compliance demonstration, monitoring, reporting, and recordkeeping. The preamble to the proposed regulation provides an explanation of the rationale for the decision. The public is invited to comment on the proposed regulation during the public comment period. Based on an evaluation of these comments, the EPA reaches a final decision and promulgates the standard.

IV. Summary of Proposed Standards

A. Sources Covered by the Standard

Hazardous air pollutant emissions from the halogenated solvent cleaner source category and its subcategories are being regulated under sections 112(d) and (h) of the Act. The proposed standards cover the use of any halogenated solvent (e.g., TCA, TCE, MC, PCE, CT, C) listed on the HAP list in section 112(b) of the Act in a solvent cleaner. The proposed standards would regulate listed halogenated HAP emissions from each new and existing batch and in-line solvent cleaning machine. The regulated source is the individual halogenated solvent cleaning machine.

As authorized under section 112(h) of the Act, the proposed standards consist of a combination of equipment controls, work practices, and operational requirements to provide the best demonstrated HAP emissions control for halogenated solvent cleaning machines. Alternative emission limits are also proposed.

B. Proposed Standards

The standards proposed include multiple alternatives to allow owners or operators maximum compliance flexibility. These standards include an equipment standard, in conjunction with work practice requirements, and an alternative overall solvent emissions standard.

If an owner or operator elects to comply with the equipment standard, they must install one of the control combinations listed in the regulation, use an automated parts handling system to process all parts, and follow multiple work practices. The control combinations for new and existing batch and in-line cleaners are shown in table 1. As an alternative to selecting one of the control combinations listed in the regulation, an owner or operator may demonstrate that the batch vapor or in-line cleaning machine can meet the idling mode emission limit specified in the standards. The idling emission limits are also shown in table 1. In addition to maintaining this idling mode emission limit, the owner or operator of a batch vapor or in-line machine must use an automated parts handling system to process all parts and comply with the work practice standards. No idling standard is proposed for batch cold cleaning machines.

TABLE 1.—CONTROL COMBINATIONS OR IDLING LIMIT ALTERNATIVES FOR SOLVENT CLEANING MACHINES[a]

Cleaner type/size (m^2 solvent/air interface area)	Control combination options or	Idling limits (kg/hr per m^2 solvent/air interface area)
Batch vapor cleaning machines (≤1.21 m^2)	Freeboard ratio of 1.0, freeboard refrigeration device, reduced room draft or	0.15
	Bi-parting cover used during idling and working modes, freeboard refrigeration device, reduced room draft or.	
	Bi-parting cover used during idling and working modes, freeboard ratio of 1.0, reduced room draft or.	
	Freeboard refrigeration device, manual cover used during idling mode, reduced room draft	
Batch vapor cleaning machines (>1.2 m^2)	Bi-parting cover used during idling and working modes, freeboard refrigeration device, reduced room draft or.	0.15
	Dwell, freeboard refrigeration device, reduced room draft or	
	Bi-parting cover used during idling and working modes, freeboard refrigeration device, super heated vapor or.	
	Freeboard ratio of 1.0, reduced room draft, super heated vapor or	
	Dwell, reduced room draft, super heated vapor or	
	Bi-parting cover used during idling and working modes, reduced room draft, super heated vapor or.	
	Bi-parting cover used during idling and working modes, dwell, reduced room draft.	
All batch cold cleaning machines	Cover, water layer.	
All existing in-line cleaning machines	1.0 freeboard ratio, freeboard refrigeration device	N/A
All new in-line cleaning machines	Superheated vapor system, freeboard refrigeration device	0.10
		0.10

[a] Each owner or operator of a solvent cleaning machine would adopt one of the control combinations listed in table 1 or demonstrate that their solvent cleaning machine can achieve and maintain specified idling emission limits (kg/hr per m^2 solvent/air interface area). N/A = not applicable.

Compliance with the equipment standard for all batch vapor and in-line machines is demonstrated through the monitoring of process parameters. All controls must be monitored either weekly or monthly, as specified in the regulation. Annual reports of monitoring results, and quarterly reports of exceedances of monitored parameters are required. Any exceedance of a monitored parameter would be a violation of the standard. Batch vapor or in-line halogenated solvent cleaning machine operators are required to be trained in the proper operation (work practices) of the cleaning machine to ensure emissions reduction. If requested during an inspection by the Administrator, an owner or operator would need to demonstrate that all batch vapor or in-line solvent cleaning machine operators understand and follow the required work practices. This would be demonstrated by passing an operator test supplied by the inspector. No monitoring or operator test is proposed for batch cold cleaning machines.

As an alternative to the equipment and work practice standard, an owner or operator of a batch vapor or in-line machine may elect to demonstrate that the solvent cleaning machine emits less than the overall solvent emission limit specified in the standards. These specified emission limits are presented in table 2. Compliance is demonstrated by maintaining records of solvent additions and removals and using mass balance equations to calculate emissions. Annual reports including emission calculations, and quarterly reports of exceedances of the emission limit are required. A cleaning machine that meets the overall solvent emission limit is not subject to any other requirements, including monitoring process parameters or the work practice standards. No alternative emission standard is proposed for batch cold cleaning machines.

TABLE 2.—ALTERNATIVE COMPLIANCE EMISSION LIMITS FOR SOLVENT CLEANING MACHINES

Solvent cleaning machine	3-month rolling average monthly emission limit (kg/m^2-month)
Batch vapor solvent cleaning machines	109.8
Existing in-line solvent cleaning machines	153.2
New in-line solvent cleaning machines	98.5

C. Relationship of Standards to the Pollution Prevention Act

The Congress passed and the President signed into law the Pollution Prevention Act of 1990 (PPA) making pollution prevention a national policy. Section 6602 (b) identifies an environmental management hierarchy in which pollution "should be prevented or reduced whenever feasible; pollution that cannot be prevented should be recycled in an environmentally safe manner, whenever feasible; pollution that cannot be prevented or recycled should be treated in an environmentally safe manner whenever feasible; and disposal or other releases into the environment should be employed only as a last resort * * * " In short, preventing pollution before it is created is preferable to trying to manage, treat or dispose of it after it is created.

According to PPA section 6603(5), source reduction is defined as reducing the generation and release of hazardous substances, pollutants, wastes, contaminants or residuals at the source, usually within a process. The term includes equipment or technology modifications, process or procedure modifications, reformulation or redesign of products, substitution of raw materials, and improvements in housekeeping, maintenance, training or inventory control. Source reduction does not include any practice that alters the physical, chemical or biological characteristics or the volume of a hazardous substance, pollutant or contaminant through a process or activity that is not integral to or necessary for producing a product or providing a service.

Pertaining to this proposal, section 6604(b)(2) of the EPA directs the EPA to, among other things, "review regulations of the Agency prior and subsequent to

their proposal to determine their effect on source reduction." The EPA believes that this proposed rule is consistent with the purpose of the Act's requirement to consider source reduction technologies. The Agency's emphasis on source reduction hierarchy is also entirely consistent with Clean Air Act Amendments of 1990, particularly the air toxics provision (title III) that requires the maximum achievable emission reductions through measures that "reduce the volume of, or eliminate emissions of, such pollutants through process changes, substitution of materials or other modifications; * * * " etc.

In todays proposed standards, the EPA has incorporated the application of the environmental source reduction management hierarchy. These proposed standards encourage source reduction as follows:

1. Encourages elimination or reduction of the need to clean whenever feasible. Although the option is not widely available at this time, there are some emerging processes and technologies that facilitate the elimination or reduction of the need to clean and the industry should be encouraged to move toward this goal;

2. Increases the efficiency of cleaning operations to reduce the emissions, and thereby reduces the overall use of halogenated solvents; this may be achieved through modification of certain equipment (e.g., adding a cover, increasing the free board ratio, etc.) or through adoption of new technologies (e.g., totally enclosed or vacuum systems);

3. Improves the housekeeping measures, work practices and maintenance of equipment; and

4. Discourages the use of end-of-pipe or treatment technologies, such as carbon adsorption units that may have significant multi-media impacts.

In addition, a number of alternative solvents and cleaning processes exist that may further promote source reduction in this source category. Alternative solvents include aqueous, semi-aqueous, hydrochloro-fluorocarbons, and organic solvents. Alternative cleaning processes include the use of ice particles, plasma, pressurized gases, super critical fluids, ultraviolet/ozone, mechanical, thermal vacuum deoiling, and no-clean processes that eliminate the need for surface cleaning. However, there is no "drop-in" alternative to replace halogenated solvent cleaning operations at this time and selection of an alternative may depend largely on the substrate to be cleaned, the type of soil to be cleaned, level of cleanliness required and other factors. Although the switch-over to certain alternatives may eliminate the use and emission of halogenated solvents, or reduce an impact to one media, the substitute may not when considered from a multi-media perspective, lead to an overall environmental improvement. Generally speaking, many of the alternatives are not without some trade-offs and cross-media transfer problems. Sources contemplating switch-over to alternatives need to carefully weigh the trade-offs before a decision is made.

For further information regarding alternative solvents, the EPA has established an on-line Solvent Alternative Guide, referred to as SAGE. The SAGE is accessible through the EPA's Technology Transfer Network under the Control Technology Center Bulletin Board; modem number (919) 541–5742. The SAGE was established to be used as an analytical tool to assist persons with making an educated decision on potential alternative solvents based on their needs. Information accessible includes costs, potential secondary impacts, and requirements for use. Information included in SAGE is based on available case studies and is constantly evolving.

For further information regarding SAGE, contact Mr. Charles Darvin at (919) 541–7633, Air and Energy Engineering Research Laboratory (MD–61), Office of Research and Development, U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711.

D. Regulatory Agenda

Although no one is expected to switch to alternative solvents as a direct result of today's proposed standards, the EPA recognizes the industry trend to reduce or eliminate halogenated solvent cleaning machines. Several ongoing Agency activities could potentially have an impact on owners or operators of halogenated solvent cleaning machines who elect to switch to alternative cleaning techniques. The following is a list of current projects and contact names; information on each of these programs is published twice a year in the EPA Agenda.

(1) Metal Products and Machinery Effluent Guideline—The EPA is currently developing effluent standards under the Clean Water Act for this industry. Solvent cleaning operations generating wastewater (e.g., aqueous or semi-aqueous operations) will likely be included. For more information, contact: Bill Cleary of the U. S. Environmental Protection Agency's Office of Water at (202) 260–9817.

(2) Aerospace Industry NESHAP—The EPA is currently developing emission standards under the Act for this industry. This standard will cover wipe cleaning operations performed in the aerospace industry. For more information, contact: Vicki Booth of the U. S. Environmental Protection Agency at (919) 541–0164.

(3) Solvent Alternative Guide (SAGE)—The EPA has developed SAGE, a computer program that provides suggestions for alternative industrial cleaning and degreasing technologies. Users of the program provide information regarding their surface cleaning requirements and SAGE provides cleaning options that can satisfy those requirements. Options include aqueous and semiaqueous systems, supercritical fluids systems, and low vapor pressure biodegradable cleaning systems. For more information, contact: Charles H. Darvin of the U. S. Environmental Protection Agency at (919) 541–7633.

V. Summary of Environmental, Energy, and Economic Impacts

A. Air

The proposed standards would reduce nationwide emissions of hazardous air pollutants from halogenated HAP solvent cleaning machines by 80,400 Mg/yr (88,440 tons per year), or 63 percent in 1996 compared to the emissions that would result in the absence of the proposed standards. No adverse secondary air impacts are expected from the implementation of control options.

B. Water and Solid Waste

There are no adverse water or solid waste impacts anticipated from the promulgation of these standards. However, the use of some halogenated solvents is expected to decline as a result of the phaseout mandated by the 1990 Amendments, the Montreal Protocol, and presidential order; and aqueous cleaners have been chosen by many owners or operators as a cleaning alternative. These standards have the potential to cause some owners or operators to switch to aqueous cleaners or other alternative cleaning technologies; although, this effect is expected to be minor compared to the other factors listed above. As discussed in section IV. C., sources contemplating switch-over to alternatives need to carefully weigh the trade-offs before a decision is made as there may be trade-offs and cross-media (i.e., water) transfer problems. There is a potential impact on water quality from the use of carbon adsorption from the regeneration of

carbon beds. The use of carbon adsorbers, however, is not recommended under these proposed standards. Carbon adsorbers are not expected to be selected by owners or operators to control halogenated HAP solvent emissions because of their expense relative to other control options. The quantity of waste solvent or carbon from existing carbon adsorption units disposed of as hazardous waste would not be affected by the proposed standards.

C. Energy Impacts

The anticipated energy impacts result from increased electricity usage for additional air pollution control devices, such as freeboard refrigeration devices, and automated parts handling systems. The national annual energy usage is expected to increase from 57.2 million kWH/yr to 117.1 million kWH/yr, which is equivalent to approximately 32.5 thousand barrels of oil.

D. Cost Impacts

The implementation of this regulation is expected to result in an overall annual national net savings of $30.4 million. This includes a net annualized savings from installation of control devices of $46.8 million and a total monitoring, reporting, and recordkeeping cost of $16.5 million. These savings will come from the significant decrease in solvent emissions and, therefore, solvent consumption, which outweigh the overall cost of air pollution control equipment and monitoring and recordkeeping costs. The only solvent cleaning machine subcategory that would incur an overall national cost is the small cleaning machine. The national annual cost for small cleaning machines is $6.3 million.

E. Economic Impacts

The analysis attempted to compute the impacts on the facilities with the highest control costs. Those facilities were the small facilities, and these facilities were defined using the specifications listed earlier for a small model solvent cleaning machine. Monitoring, recordkeeping, and reporting costs were included with the control costs as an input to the economic impact analysis. Economic impacts were not computed for facilities with negative costs, which include all the affected facilities except for small and medium solvent cleaning machines and new in-line solvent cleaning machines. The methodology for calculating economic impacts is discussed at length in the background information package (see the Background Information Documents section near the beginning of this preamble).

The economic impact analysis shows that the economic impacts from this proposed standard are insignificant. Since a majority of solvent cleaning facilities that will be affected by the standard will actually experience negative costs, the analysis calculated impacts only for those facilities that did not experience negative costs. With the chosen alternatives, and under the assumption that facilities experiencing positive costs cannot pass on any increase in costs from the standard to consumers, the increase in total cost of production for facilities in 39 SIC codes ranges from 0.02 to 0.61 percent (existing cleaning machines), and 0.01 to 0.58 percent (new cleaning machines). The major reason for such small increases in production cost is the small cost share that is attributable to solvent cleaning machines uses. This share ranges from 0.1 (SIC 376—Guided Missiles, Space Vehicles, Parts) to 9.7 percent (SIC 359—Industrial Machinery, n.e.c. [not elsewhere classified]). Due to the small increase in production cost, the impetus for facilities with positive costs to switch to substitutes for halogenated solvent cleaning operations is minor as a result of this standard alone. There will also be minimal effects on the markets for the solvents themselves.

VI. Rationale

A. Selection of Pollutants and Source Categories for Regulation

1. Designated Pollutants

The source category for these proposed standards are solvent cleaning machines that use any of the listed halogenated HAP solvents. During the NSPS and NESHAP development, the HAP studied included MC, PCE, and TCE. The "Alternative Control Technology Document—Halogenated Solvent Cleaners" (EPA–450/3–89–030) also analyzed CFC–113, CT, C, and TCA. All of these solvents except for CFC–113 are HAP listed in the Act and are regulated under these proposed standards. As discussed earlier, the use of TCA and CT is expected to decline as a result of the phaseout mandated by the 1990 Amendments, the Montreal Protocol, and presidential order. However, since their use will extend sometime into the future, TCA and CT are included in proposed standards.

2. Halogenated Solvent Cleaning Machines.

The halogenated solvent cleaning source category does not constitute a distinct industrial category, but is an integral part of many major and minor industries. The largest quantities of halogenated solvents used for cleaning machines are in the following SIC codes.

1. SIC 25–Furniture and Fixtures;
2. SIC 34–Fabricated Metal Products;
3. SIC 36–Electric and Electronic Equipment;
4. SIC 37–Transportation Equipment; and
5. SIC 39–Miscellaneous Manufacturing.

Additional industries that use halogenated solvents in cleaning include the following.

1. SIC 20–Food and Kindred Products;
2. SIC 33–Primary Metals;
3. SIC 35–Nonelectric Machinery; and
4. SIC 38–Instruments and Clocks.

Nonmanufacturing industries such as railroad, bus, aircraft, and truck maintenance facilities; automotive and electric tool repair shops; automobile dealers; and service stations also use halogenated solvent cleaning machines.

Batch and in-line cleaning machines are subject to these proposed standards. Brief cleaning machine and process descriptions for these cleaning machine types are discussed in the following paragraphs. These process descriptions are discussed at length in the background information package (see Background Information Documents).

3. Batch Vapor Cleaners.

The most common type of batch vapor cleaning machine is the OTVC; however, other (non-OTVC) batch vapor cleaning machines such as the cross-rod batch vapor cleaning machine have been developed to accommodate varying industrial cleaning demands.

The basic OTVC tank is designed to generate and contain solvent vapor. The tank is equipped with a heating system that uses steam, electricity, hot water, or heat pumps to boil liquid solvent. As the solvent boils, dense solvent vapors rise and displace the air inside the tank. The solvent vapors rise to the level of the primary condensing coils. Coolant (e.g., water, refrigerant) is circulated or recirculated through the condensing coils to provide continuous condensation of rising solvent vapors, thereby creating a controlled vapor zone that prevents vapors from escaping the tank. Condensing coils are generally located around the inside walls of the cleaner, although in some equipment the primary coils are at one end or side of the cleaner.

During the vapor cleaning machine operation, solvent vapors condense on the cooler workload entering the vapor

zone. Condensing solvent dissolves some contaminants and flushes both dissolved and undissolved soils from the workload. Condensed solvent and dissolved or entrained contaminants then drain back into the sump below. When the temperature of the workload reaches that of the vapor, condensation ceases and the vapor phase cleaning machine process is complete. In some instances, the vapor cleaning machine cycle is supplemented, or even replaced, by the immersion of the part into the hot, liquid solvent.

There are numerous batch vapor cleaning machine process variations of the basic vapor cleaning cycle to accommodate differing parts cleaning requirements. Cleaning machine cleaning cycle variations include, but are not limited to, immersion-vapor-spray and vapor-spray-vapor cycles, and nonboiling solvent sections with vapor sections.

Parts are introduced into the cleaning machine manually or with the use of an automated parts handling system. In manual operations, the attendant lowers the parts basket into the cleaning machine and removes the basket once the cleaning has been completed. An automated parts handling system replaces manual operations and decreases potential worker exposure to HAP.

Variations to the basic design include dual or multiple chamber units and ultrasonics. Dual chamber units typically use one chamber for generating the solvent vapor, and the other for immersion cleaning or spraying applications. Some units with multiple chambers include ultrasonics in one of the chambers. Ultrasonics incorporates high frequency sound waves to produce pressure waves in the liquid solvent. Minute vapor pockets are formed in areas of low pressure within the liquid. These pockets collapse as the pressure in the zone cycles to high pressure. The constant creation and collapse of these vapor pockets provides a scrubbing action to aid cleaning.

Non-OTVC batch vapor cleaning machines are hybrids of an OTVC and an in-line cleaning machine. These batch vapor cleaning machines are generally larger and more enclosed than a typical OTVC and typically use conveyorized automated parts handling systems for moving parts through the cleaning cycle. For example, the cross-rod non-OTVC batch vapor cleaning machine is an enclosed cleaning machine that uses rods that suspend parts baskets as they are conveyed through the machine by a pair of power-driven chains.

Similar to OTVC batch vapor cleaning machines, cleaning chambers can contain halogenated solvent for vapor, spray, and immersion cleaning. Controls for OTVC's will be as effective, or more effective, on non-OTVC batch vapor cleaning machines as they are essentially more enclosed OTVC's. Therefore, analysis of the standards based on OTVC batch vapor cleaning machines is reasonable and representative.

4. Batch Cold Cleaning Machines

Batch cold cleaning machines typically use nonhalogenated solvents. Carburetor cleaning machines were the only batch cold cleaning machines identified that use halogenated solvents. In these cleaning machines, MC is blended with other solvents and additives to reduce flammability and increase dissolving power. Emissions from these cleaning machines are typically well controlled because the cleaning solution used contains water, which forms a water layer above the solvent mixture in the tank. The best known control used for carburetor cleaning machines is the use of a cover on the tank and a water layer on the solvent surface. These controls significantly reduce evaporation of MC.

Although in the past some other cold cleaning machines have been sold for use with halogenated solvents, no other cold cleaning machines other than carburetor cleaning machines were identified as using halogenated solvent HAP.

5. In-line (Vapor and Cold) Cleaning Machines.

In-line cleaning machines employ automated parts loading on a continuous basis. In-line cleaning machines can operate in the vapor or nonvapor phase; however, the majority of in-line cleaning machines using halogenated solvents are vapor cleaning machines. An in-line cleaning machine is usually individually designed for a specific workload and production rate. In-line cleaning machines are generally enclosed, except for parts and conveyor inlet and exit openings. The four main types of in-line cleaning machines using halogenated solvents are the monorail, belt, strip, and printed circuit board processing equipment (photoresist strippers, flux cleaners, and developers).

The same cleaning techniques are used in in-line cleaning machines as with batch cleaning machines but are typically larger scale operations than with batch units.

B. Selection of Emissions To Be Covered by the Standards

Halogenated solvent cleaning machines (batch and in-line cleaning machines) are characterized by three operating modes. These operating modes are idling, working, and downtime. Cold cleaners do not have an idling mode.

The three operating modes have characteristic emission mechanisms associated with them. In addition, miscellaneous fugitive emissions from several other loss mechanisms may also occur. Miscellaneous fugitive emissions include those emissions that occur as a result of leaks, filling/draining losses, wastewater losses, start-up/shutdown losses (losses that occur when a cleaning machine is turned on or off), distillation losses, and solvent decomposition losses.

1. Idling Emissions.

Idling emissions are emissions that occur when the cleaning machine is turned on and ready to operate, but is not actively processing parts. Air and solvent vapor interface losses that occur during the idling mode consist of solvent vapor diffusion (or evaporation from liquid solvent in a cold cleaning machine) and solvent vapor convection induced by a warm freeboard.

Diffusion occurs because molecules of solvent move from higher concentrations in the vapor zone to lower concentrations in the air. Because molecular activity increases at higher temperatures, diffusion rates are temperature dependent. Idling diffusion emissions plateau when vapor and air solvent concentrations reach a steady state. Disturbance of this steady state will result in an increase in emissions due to diffusion losses. The diffusion rate steady state can be disturbed if an air flow is introduced across the air and solvent vapor interface as the result of room drafts or a lip exhaust.

Convection occurs from the tank walls being heated from the heated liquid solvent and resulting vapor. The emissions occur as a result of the convective flow up along the freeboard that carries solvent vapor out of the cleaning machine. The amount of convective loss depends on how warm the freeboard walls become. Adequate cooling of the walls by cooling coils can reduce convective losses. Because idling losses can be significant and controls are available to reduce these emissions, idling losses will be controlled by these proposed standards.

2. Working Emissions

Working emissions are emissions that occur when the cleaning machine is

turned on and operating (parts are cycling through the cleaning process). Working emission mechanisms for vapor cleaning machines are the same as for idling emissions with additional emissions occurring from the disturbance of the solvent and vapor air interface caused by the introduction and extraction of parts being cleaned, cleaning process (e.g., spraying), the entrainment of solvent vapor on the part as a workload (parts being cleaned) is pulled out of the cleaning machine, and solvent liquid dragout (solvent that remains on the surfaces of clean parts after the parts are removed from the cleaning machine). Working emissions from cold cleaners (batch or in-line) include liquid dragout and cleaning process losses.

Halogenated solvent loss rates are typically the largest during this mode as compared with idling and downtime modes. Because of the large emission potential, working emissions will be controlled by these proposed standards.

3. Downtime Emissions

Downtime emissions are solvent emissions that occur when the heat to the sump (cleaning machine tank) is turned off and the cleaning machine is not operating. Downtime emission mechanisms include evaporation of solvent from the liquid solvent surface and subsequent diffusion into the ambient air. Halogenated solvent loss rates are typically the lowest during this mode as compared to idling and working modes. Generally, these emissions are minimized by the use of a cover, which is required by these standards when the cleaning machine is in the downtime mode. This requirement is considered to exist in the baseline.

4. Miscellaneous Fugitive Emissions

In addition to HAP halogenated solvent losses that occur when the machine is down, idling, or working, there are several other solvent loss mechanisms that contribute to overall losses from a halogenated solvent cleaning machine. These include filling and draining losses as well as machine start-up and shutdown losses. Work practices are included in the proposed standards to reduce these emissions.

C. Emission Control Options

Halogenated solvent cleaning machine emission control options include those controls added to the cleaning machine and those that apply to the cleaning machine operating practices. Alternative cleaning technologies and some emerging new technologies may also be potential options for the reduction of HAP halogenated solvent cleaning machine emissions. This section focuses on batch vapor and in-line (cold and vapor cleaners). Controls for batch cold cleaners are discussed in section VI.A.4.

1. Solvent Cleaning Machine Control Technologies

Emission control technologies for the halogenated solvent cleaning machine industry are classified as idling and/or working mode emission controls for both batch vapor and in-line cleaning machines. Table 3 presents the control efficiencies for various solvent vapor emission control techniques for idling and working modes. A description of these solvent vapor emission controls is summarized here. These emission control techniques are discussed at length in the background information document (see Background Information Documents).

TABLE 3.—SOLVENT VAPOR EMISSION CONTROL EFFICIENCIES FOR VARIOUS CONTROL TECHNIQUES

Cleaner	Control technique	Control efficiency [a] percent	
		Idling	Working
Batch vapor cleaner	Cover	40	0
	Bi-Parting Cover	40	40
	FBR 0.75—>1.0	20	20
	FBR 1.0—>1.25	10	10
	Freeboard refrigeration device	40	40
	Primary condenser temperature (30 to 40 percent of the solvent boiling point).	40	40
	Reduce wind speed 30.3 m/min (100 ft/min)—>calm (15.2 m/min [<50 ft/min]).	50	50
	Hoist	0	35
	Dwell	0	30
In-line cleaners	Freeboard refrigeration device	60	60
	Carbon adsorption system	60	60

[a] Control efficiency over a typical cleaner.
Typical batch cleaner: OTVC with a 0.75 freeboard ratio, circumferential water-cooled primary condensing coils, a manual cover, and located in a room with windspeeds in excess of 30.3 m/min (100 ft/min).
Typical in-line cleaner (vapor and cold): A typical in-line cleaner has water-cooled condenser coils.

Covers are used on halogenated solvent cleaning machines to eliminate drafts within the freeboard and to reduce diffusion losses. A bi-parting cover is a cover made to close around the cables holding parts baskets when the basket is inside the cleaner. A bi-parting cover allows for complete enclosure during the cleaning phase. Covers can be manually operated, or electronically powered.

The freeboard height on a batch vapor cleaning machine is the distance from the solvent/vapor air interface to the top of the tank walls. The freeboard zone serves to reduce solvent/vapor air interface disturbances caused by room drafts and provides a column through which diffusing solvent molecules must migrate before escaping into the ambient air. Higher freeboards reduce diffusional losses by diminishing the effects of air currents and lengthening the diffusion column.

In all vapor cleaning machines, solvent vapor created within the machine is prevented from overflowing through use of primary condenser coils. Freeboard refrigeration devices are a second set of cooling coils located above the primary condenser coils of the cleaning machine. Freeboard refrigeration devices have proven to be an effective control for diffusion losses.

Although a primary condenser is standard equipment on all OTVC's, the cooling temperature and design of the coils have an effect on idling losses. A lower cooling temperature, will lower diffusion losses. This is generally achieved by the use of a refrigerant rather than water.

Air movement over a batch vapor cleaning machine affects the solvent emission rate by sweeping away solvent vapors diffused into the freeboard area and creates turbulence in the freeboard area that increases solvent diffusion as well as solvent vapor and air mixing. By reducing the air speed over the cleaning machine, there is a reduction in these emissions.

The method employed for moving parts through the halogenated vapor cleaning machine cycle has a direct effect on the magnitude of workload related emissions. Rapid movement of parts will increase solvent loss due to carry-out of liquid solvent and entrainment of solvent vapor, and increased disturbance at the solvent/vapor air interface. Use of a mechanical parts handling system (hoist) can reduce emissions by consistently moving parts into and out of the machine at appropriate rates, such as 3.3 m/min (11 ft/min), thereby eliminating excess losses caused by manual operation. Manual operators can move parts at speeds in excess of 24.2 m/min (80 ft/min).

Another advantage of mechanical parts handling is the potential for precise control of the dwell time (i.e., the length of time the part remains in the vapor zone). Proper dwell time decreases emissions by ensuring that the parts have reached the solvent temperature prior to removal from the machine. If parts have not reached the solvent vapor temperature, condensation would still occur as parts are withdrawn from the machine and solvent carry-out losses would increase.

Carbon adsorption can be employed as a control technique in conjunction with a lip exhaust system. With these systems, peripheral exhaust ducts capture the diffusing solvent vapors and to some extent solvent evaporating from clean parts and directs them through an activated carbon bed. The solvent vapor molecules are adsorbed onto the activated carbon, removing the solvent from the vent stream before discharging to the atmosphere. However, the use of lip exhausts increases overall consumption and even when exhausted vapors are controlled by a carbon adsorption unit, does not reduce emissions any more than the other techniques discussed above. Therefore, use of lip exhausts, even those routed to carbon adsorbers, is discouraged. Available anecdotal test data support the EPA's belief that lip exhausts are not required to meet OSHA limits. Attaining OSHA limits is generally the rationale behind the use of a lip exhaust, however, OSHA does not require their use. Furthermore, there are increased cross-media transfer problems associated with the use of carbon adsorption, including increased air, solid/hazardous waste and wastewater impacts.

Control efficiencies for the listed control techniques were derived from emission tests performed on idling and working batch vapor and in-line cleaning machines. Data were available from multiple tests of control techniques on a wide variety of cleaning machines. The EPA evaluated these data and determined an overall average control efficiency for each control technique for the idling and working modes. These control efficiencies represent the average emission reduction attained over a typical cleaning machine. For purposes of calculating these efficiencies, a typical batch cleaning machine is an OTVC having a 0.75 FBR, circumferential water-cooled primary condensing coils, a manual cover (used during downtime), and located in a room with windspeeds in excess of 30.3 m/min (100 ft/min). It is assumed that no lip exhaust is present, unless already vented to a carbon adsorber. A typical in-line (vapor and cold) cleaning machine has water-cooled condenser coils.

It is believed that many of these techniques could also reduce downtime emissions. However, insufficient data were available to assign downtime control efficiencies to the control techniques. Therefore, a zero-percent control efficiency of downtime emissions was used in all analyses.

Generally, multiple control techniques are used in combination on a single cleaning machine. When controls are used in combination, there is an increase in the achievable control efficiency. However, the efficiencies of the two controls added to one cleaning machine are not additive. The net efficiency of two controls is less than the additive sum, because the second control is controlling only the emissions not already controlled by the first control (i.e., the controls are essentially acting in series). The formula for determining the net efficiency for two controls is as follows:

$$E_{eff} = E_1 - + E_2 - E_1 E_2$$

where:

E_{eff}=net efficiency of the combined controls;

E_1=efficiency for control 1; and

E_2=efficiency for control 2.

Similar equations for determining the net efficiency of more than two control devices were also developed.

Redundancy among options occurs when control techniques control the same emissions using similar principles. For example, freeboard refrigeration devices and reduced primary condenser temperature controls both reduce vaporization losses by cooling the freeboard and have an associated 40 percent control efficiency under idling and working conditions. Tests have demonstrated that limited-to-no benefit is obtained by having both techniques employed on the same unit. Similarly, an enclosed design is considered to exert equivalent control as a reduced room draft and a cover; these control techniques may also be considered redundant.

2. Alternative Cleaning Technologies

Rather than reducing the emissions of halogenated solvents by controlling halogenated solvent cleaning machines, it is possible in some instances to replace halogenated solvent cleaning machines or the solvent itself with alternative cleaning technologies. Alternative cleaning technologies include the use of alternative solvents, alternative cleaning machines, and no-clean technologies. These proposed standards allow use of these alternatives in place of a halogenated solvent cleaning machine.

Alternative solvents are generally classified as hydrochlorofluorocarbons, aqueous, semi-aqueous, or organic. Alternative cleaning technologies or processes can also be used to replace common halogenated solvents. Many of these processes are still in the developmental stages. These processes include: (1) Ice particles; (2) plasma; (3) pressurized gases; (4) supercritical fluids; (5) ultraviolet/ozone; (6) mechanical; (7) thermal vacuum deoiling; and (8) no-clean technologies. No-clean technologies include process modifications that eliminate the need for surface cleaning, including the use of low solids flux and controlled atmosphere soldering.

In developing the regulatory approach for controlling this source category, the role of alternative cleaning agents and technologies was considered. However, the proposed NESHAP does not mandate a switch from halogenated solvents to an alternative solvent or technology for the following reasons:

1. Controls exist that can significantly and efficiently reduce the emissions of halogenated solvents from solvent cleaning machines. These controls can

reduce the emissions to a level more stringent than the MACT floor for these units.

2. Determination of an acceptable alternative cleaning technology is site and application specific and can take several years to develop. Not all of the applications are known, and it is uncertain whether an acceptable alternative technology exists for every application.

3. While HAP use could be eliminated or reduced, discharges of other pollutants, to wastewater or air could be increased. Because the switch from a halogenated solvent cleaning machine system to an alternative solvent system is application specific, the relative impacts of making a total switch cannot be confidently assessed.

The EPA has set up a solvent work group that has begun an investigation of the broader uses of alternative solvents and cleaning processes. This group will continue to address this issue after today's proposal. The EPA plans, between proposal and promulgation, to make a better assessment of the feasibility of the use of these alternative technologies and their magnitude of their multi-media impacts.

Currently available information concerning alternative cleaning agents and technologies is available for public inspection and copying from the docket (A–92–39) containing supporting information used in developing the proposed standards. This information is contained in a memo entitled "Status of Alternative Solvents and Processes to Halogenated Solvent Cleaning." The document number for this memo is II-B–14. The docket is available for public inspection and copying between 8:30 a.m and 3:30 p.m., Monday through Friday, at the EPA's Air Docket, Room M1500, U. S. Environmental Protection Agency, 401 M Street, SW, Washington, DC. A reasonable fee may be charged for copying.

As discussed in section II.C., a solvent alternative guide has been developed by the EPA's AEERL to assist users and State or local agencies in the case-by-case evaluation of alternative cleaning agents. The solvent alternative guide (called SAGE) is a computer on-line analytic tool that provides a facility with comprehensive information on some potential solvent alternatives and their associated impacts based on their cleaning needs. This computer system is evolving as further information is obtained. Refer to section IV.C. for further information on accessing SAGE.

The EPA is aware that there may be specific applications where these alternative cleaning agents and technologies are viable alternatives. The EPA requests comments and information on any known application of these agents or technologies and whether they should be considered in the MACT analysis. Information supplied needs to include specifics on applicability, costs, and multi-media impacts (i.e., air, water, soil). Information obtained will be considered by the EPA in the final rulemaking. The EPA may promulgate a rule that requires these technologies for specific applications.

3. New Technologies

Two new solvent cleaning machine technologies are currently being developed by industry. However, at present, these technologies are still under development and insufficient data are available to include these technologies in the MACT decision for these proposed standards.

One such system controls the total processing environment. This reportedly allows the use of many solvent alternatives, including compounds that are vapors at room temperature. The system is a closed loop comprising a processing chamber capable of withstanding both full vacuum and pressure, a gas liquid separator, a compressor or blower, a temperature swing solvent stripper, a gas accumulator, and a gas reheater. The system also contains a vacuum pump and a solvent recycle/supply system. This system is not expected to have idling or downtime emissions because the closed loop remains isolated during nonoperating periods.

The second technology is also applicable to conventional cleaning machine processes and can be retrofit to existing OTVC's. Vendors report that the use of solvents with boiling points as low as 10 °C (50 °F) are expected to be practical and cost effective. This system isolates the solvent process from the environment to avoid solvent loss and worker exposure. This is accomplished by the use of a lightweight perimeter enclosure to enclose the process, a closed-loop temperature swing solvent recovery, a gas accumulator (to accommodate fluctuations of vapor volume and control pressure in the perimeter), and a vacuum air lock to get parts in and out. This system, as with the first system discussed, is not expected to have idling or downtime emissions because the closed loop remains isolated during non-operating periods.

Because of the lack of data, and developmental nature of these technologies, they were not included in the selection of MACT for these proposed standards. These proposed standards, however, would allow the use of new and innovative technologies where they could be demonstrated to be equivalent to the control levels of the proposed NESHAP by complying with the alternative emission limit.

The EPA is currently evaluating enclosure technologies as described above at two facilities. The EPA is evaluating information on the solvents that these systems are designed to use, products that the systems can clean, ability to retrofit existing cleaning systems with the technology, and industries that use these systems.

The EPA is requesting any comments or information concerning new technologies that are feasible and can be justified as the basis for the final rule. Information supplied needs to include specifics on applicability, control efficiency, costs, and multi-media impacts (i.e., air, water, soil). Information obtained will be considered by the EPA in the final rulemaking. The EPA may promulgate a rule that requires these technologies for specific applications.

4. Fugitive Emission Controls

Fugitive emission control for the halogenated solvent cleaner industry vary according to the fugitive loss mechanism. These emission controls are discussed below.

Filling and draining losses occur from open handling procedures and are minimized by operating practices that require that the transfer of HAP solvent be by the use of a threaded or other leakproof coupling with the end of the pipe in the solvent sump being located beneath the liquid solvent surface.

Wastewater losses occur when water is decanted from the separator containing a slight amount of solvent. These losses are considered to be minimal if a separator is correctly designed, operated, and maintained. Provisions for the proper maintenance of the cleaner and controls are included in these proposed standards.

Start-up and shutdown losses are losses that occur during the transition time from when a solvent cleaning machine is turned on or off to the time when equilibrium is achieved. These losses are controlled by some of the same controls that control idling losses. For example, starting the condenser coolant prior to turning on the sump heater is a start-up procedure that facilitates solvent condensation in the saturated zone above the liquid solvent before solvent vapors rise out of the cleaner.

Distillation losses are losses that occur when solvent is regenerated through onsite distillation for reuse.

Losses that occur due to distillation are from evaporation during transfer and from leaks in the equipment; therefore, transfer and operating leak and detection provisions cover any losses that may occur from distillation processes.

Solvent decomposition losses result from the solvent mixture turning acidic due to reactions occurring with water. Emissions occur during handling and disposal of the solvent. This solvent is subject to controls under RCRA that serve to minimize losses by stringent handling and disposal guidelines. These proposed standards do not interfere with RCRA's handling and disposal guidelines to minimize HAP emissions.

D. Development of Regulatory Alternatives

With the exception of the batch cold cleaning machine subcategory, multiple regulatory alternatives were developed for each of the solvent cleaning machine source categories. The only batch cold cleaning machines that the EPA identified that use a halogenated solvent were carburetor cleaners, which are controlled with a cover and a water layer in the absence of a regulation. No additional control techniques were identified that could further reduce the emissions from these cleaning machines. The Administrator determined that the cover and the water layer represent GACT. Therefore, today's proposed standards require the use of a cover and a water layer on all batch cold cleaners. Since the only identified HAP cold cleaners using halogenated solvents are carburetor cleaners, the proposed standard will not have an associated control cost and will not result in an emission reduction because carburetor cleaning machines already incorporate the GACT level of control. Rather, the standard will ensure that new batch cold cleaning machines that use halogenated solvents have the appropriate emission controls. In order to ensure the proper operation of existing batch cold cleaning machines, the standard for cold cleaning machines requires that the cover and the water layer be in place whenever the batch cold cleaning machine is cleaning parts.

The only impact associated with the regulation of batch cold cleaning machines is the reporting cost. Each owner or operator of a batch cold cleaning machine is required to submit a report stating that they have a batch cold cleaning machine and are complying with the standard. This report is discussed in more detail in section VI.I. The estimated respondent cost of 100,000 initial notifications averaged over a 3-year period is $1.1 million. The estimated Federal government cost for 100,000 initial notifications averaged over a 3-year period is $308 thousand.

The EPA solicits comments and supporting data on the inclusion of batch cold cleaning machines in today's proposal. Specifically, the EPA requests comments on the reasonableness of setting GACT standards equal to the baseline level of control, which achieve no HAP emission reduction. Also, the EPA requests data and comment on the existence of other HAP batch cold cleaning machines and whether the proposed standards would be reasonable for those machines.

The regulatory alternatives developed for the five remaining solvent cleaning machine source subcategories are discussed below.

1. Selection of MACT Floor

Emission standards for new and existing sources promulgated under section 112(d) of the Act must represent the maximum degree of reduction achievable; this is typically referred to as the MACT. The Act establishes minimum levels, or "floors," for MACT standards. These floors are to be determined as follows:

(1) for new sources, the MACT floor cannot be "less stringent than the emission control that is achieved in practice by the best controlled similar source * * *."

(2) for existing sources with more than 30 sources, the MACT floor cannot be less stringent than "the average emission limitation achieved by the best performing 12 percent of the existing sources * * *."

The MACT floors for the halogenated solvent cleaning machine source subcategories are based on control efficiency and sales data obtained from section 114 questionnaires sent to solvent cleaning machine vendors. In this section 114 questionnaires data were gathered for cleaning machines in each subcategory. These data are assumed to be representative of the control levels achieved by the industry as a whole, and represent the best information available to the Administrator.

Using the control efficiencies for the individual control devices, the combined control efficiency formula, and the model cleaning machine operating schedules, a control efficiency was calculated for each reported cleaning machine. The control combination efficiencies were rounded to the nearest 10 percent increment (i.e., 10 percent control, 20 percent control, etc.) due to data and precision. The combinations were then grouped by their combined control efficiencies. All the cleaning machines were grouped based on control efficiencies and ranked from the highest control efficiency combination to the lowest control efficiency combination. The floor for existing sources in each subcategory was then determined by calculating the weighted-average level of control for the top performing 12 percent. The MACT floors, for batch vapor cleaning machine existing sources are as follows: 10 percent for small, 40 percent for medium, 40 percent for large, 60 percent for very large. The MACT floor is 30 percent for existing source in-line cleaners. The MACT floor for new sources in each subcategory was determined by determining the maximum control level achieved (control level of the best-controlled existing source) for each subcategory. The MACT floors for batch cleaning machine new sources are as follows: 40 percent for small, 50 percent for medium, 60 percent for large, 60 percent for very large. The MACT floor is 40 percent for new source in-line cleaning machines.

2. Development of Additional Regulatory Alternatives

Regulatory alternatives were developed for each of the five solvent cleaning machine subcategories. The least stringent regulatory alternative that was examined in detail is the MACT floor; therefore, the MACT floor is always presented as the first alternative. To develop the regulatory alternatives, potential control levels for each subcategory were developed and analyzed. First, all reasonable control combinations were evaluated for their emission reduction potential for each subcategory, based on a typical operating schedule. Then the control combinations were grouped into control levels, rounded to the nearest 10 percent increment. Next, the capital costs were evaluated and the median cost combination was determined for each control level. Median costs were selected instead of average costs because the median costs have a particular control combination associated with each, whereas an average cost may not correspond to any of the available control combinations. Median costs were selected as opposed to the lowest cost combination because some combinations may not be feasible for all cleaning machines. For each subcategory, the control combination cost that represented the median capital cost was chosen to represent the control level.

Once the median cost control combinations were selected, the costs of each control level were evaluated for each subcategory. The total annual cost

for each control level was estimated from the annualized capital costs, the annual operation costs; the monitoring, reporting and recordkeeping costs, and the solvent cost savings realized from reduced solvent consumption. The cost per unit of emissions reduction, or cost effectiveness, was then determined for each control level and inferior control options were identified. Inferior control options are defined as those control levels with higher costs than other levels that achieve the same or greater emission reductions. The remaining non-inferior control options made up the set of regulatory alternatives for each subcategory. Both the existing and the new small batch vapor cleaning machine control options at the MACT floor levels were identified as inferior options; however, because they are the MACT floor, they are included as the first regulatory alternatives for this subcategory. Table 4 presents the regulatory alternatives for each subcategory.

TABLE 4.—SOLVENT CLEANER SOURCE SUBCATEGORY REGULATORY ALTERNATIVES

	Existing	New
Batch vapor cleaner:		
Small	I—10% (floor)	I—40% (floor).
	II—30%	II—50%
	III—50%	III—60%
	IV—60%	
Medium	I—40% (floor)	I—50% (floor).
	II—50%	II—60%
	III—60%	
Large	I—40% (floor)	I—60 (floor).
	II—70%	II—70%
Very large	I—60% (floor)	I—60% (floor).
	II—70%	II—70%
In-line	I—30% (floor)	I—40% (floor).
	II—50%	II—50%
		III—70%

The control cost analysis for the regulatory alternatives indicates that a large number of solvent cleaning facilities will have negative costs for moving from the estimated current level of control to meeting each regulatory alternative. That is, the annualized cost of purchasing and operating the control device is less than the cost savings realized by the reduced solvent costs. This savings implies that many facilities have had the possibility of reducing their costs but have not yet taken the opportunity to do so in the absence of the standard. An important question for any analysis of the impact of the proposed regulation is what portion of the firms with this potential savings would realize the savings in the absence of the proposed regulation and what portion would only realize the savings if forced to by the regulation. The main analysis assumes that none of the firms would undertake the control in the absence of regulation requiring control. However, a sensitivity analysis addresses the implications if the firms with the greatest cost savings undertake the control even in the absence of regulation.

This sensitivity analysis uses a criterion of a savings of $25,000 in NPV above all costs of the purchase, operation, and maintenance of the emissions control equipment. The sensitivity analysis thus assumes that a net savings of $25,000 or more will assure that the firm will undertake the control. For these firms the sensitivity analysis does not attribute any emission reduction or cost to the regulation because it assumes the control would be undertaken whether or not there is a regulation. The criterion of $25,000, was chosen for it was a midpoint between the smallest capital investment ($11,200) and the largest capital investment ($38,100) necessary to comply with the standard. Thus, if a solvent cleaning machine operator would experience a return on investment of at least $25,000 in NPV from installing emissions control equipment, the operator would do so in the absence of the standard, and vice versa. Regardless of whether this investment is required by regulation, the level of emission reduction is the same, since solvent cleaning machine operators choosing to invest in control equipment in the absence of a standard will control emissions by the levels the standard requires. This sensitivity analysis did allow analysis of the impact on incremental cost effectiveness and benefit cost analysis of varying assumptions concerning this baseline control issue. There is no marked change in the values obtained for incremental cost effectiveness or benefit cost analysis. Therefore, the uncertainty concerning the baseline level of control does not change the relative attractiveness or the selection of regulatory alternatives. Because reducing this uncertainty would be both quite difficult and not helpful in making the selection among the regulatory alternatives, further analysis beyond the sensitivity analysis was not needed. More information on the baseline investment criterion is available in the background information document (see the Background Information Documents section near the beginning of this preamble).

3. Evaluation of National Costs

After the regulatory alternatives were determined, the national costs were estimated. Information on the location and number of batch and in-line cleaning machines in the United States is difficult to obtain because of the large number of solvent cleaning machines existing within many different industries. Therefore, a method to estimate the nationwide number of solvent cleaning machines was developed using available data such as nationwide solvent consumption and average cleaning machine emission rates. In general, the numbers of cleaning machines were estimated based on the quantity of solvent consumed at the national level, assumptions on the breakdown of the national cleaning machine population (i.e., sizes and percentage of controlled cleaners), and typical solvent consumption rates for each size and control combination. The population of halogenated solvent batch vapor and in-line cleaning machines was estimated to be 24,500.

Assuming an average 15-year lifespan for a solvent cleaning machine and that the number of cleaning machines will remain constant from 1993 to 1996, it was determined that in 1996 (first year of compliance), the cleaning machine population will be 20 percent new cleaning machines (4,900) and 80 percent existing cleaning machines (19,600).

Based on the responses to section 114 surveys, the distribution of cleaning machines among the different control levels (i.e., 10 percent, 20 percent, etc.) was determined for all cleaning machines sold in the last 10-year period. This distribution was used as the control efficiency distribution for existing cleaning machines. The control efficiency distribution of those cleaning machines sold in 1990 was used as the control efficiency distribution for new cleaning machines.

The national cost for cleaning machines to achieve a particular regulatory alternative comprised the sum of the capital; and monitoring, reporting and recordkeeping costs for all cleaning machines to move from their current levels of control to the regulatory alternative level. If a cleaning machine was at or above a regulatory alternative level, that cleaning machine incurred no capital costs; but did incur monitoring, reporting and recordkeeping costs. The corresponding total emission reductions were also estimated and, with the total national costs, used to calculate the average cost

effectiveness for each regulatory alternative. Then the incremental cost of moving from one regulatory alternative to the next regulatory alternative was determined. Table 5 presents the national costs, emission reductions, and the average and incremental cost effectiveness values for the regulatory alternatives with a cost credit for reductions in solvent usage.

TABLE 5 —NATIONAL COSTS AND EMISSION REDUCTIONS FOR SOLVENT CLEANERS—WITH SOLVENT RECOVERY CREDITS

Cleaner size	Regulatory alternative* (percent)	Net annualized cost ($/yr)	HAP emission reduction (MG)	Average cost effectiveness ($/MG)	Incremental cost effectiveness ($/MG)
Existing:

* = Regulatory alternative I is MACT floor. () = Negative values are shown in parentheses.

The costs in table 5 include a cost credit for reductions in solvent usage that result from increased emission control. Table 6 presents national costs, emission reductions, and the average and incremental cost effectiveness for the regulatory alternatives without a cost credit for reductions in solvent usage. The EPA solicits comments on operating experience from users of solvent cleaning machines concerning whether it is appropriate to include a credit for solvent not consumed when calculating the costs and cost effectiveness of the regulatory alternatives. For the remainder of this preamble, the cost effectiveness values from table 5 are presented, which include credits for the reduction in solvent usage.

TABLE 6.—NATIONAL COSTS AND EMISSION REDUCTIONS FOR SOLVENT CLEANERS—WITHOUT SOLVENT RECOVERY CREDITS

4. Benefits Analysis

A benefit analysis was undertaken to examine and illustrate the value of requiring control approaches more stringent than the MACT floor level. The analysis was not conducted on every affected solvent cleaning machine. The analysis started with a risk characterization study on two model solvent cleaning machines, one small and one medium, that were placed in the center of three large cities in different areas of the United States (Detroit, Atlanta, and New York City). Estimates of the total number of people exposed, potential risk to the most exposed, and potential number of cancer cases per year were generated. Applying the regulation to the model cleaning machines yielded emissions reductions, and the monetary benefits from the reductions were then calculated on a per Mg (ton) basis. It should be noted that this analysis assumes that the model plant configurations are representative of solvent cleaning machines in the nation and the population density of the three modelled cities is representative of the nation as a whole.

To complete the analysis required two stages: the first, valuing the reduction in annual cancer mortality risk; the second, valuing the reduction in non-cancer effects. Results from the first stage showed monetary benefits (all computed in 1990 dollars) ranging from $181 to $964 per Mg ($164.54 to $876.36 per ton). For the second stage, the implicit per Mg (ton) value needed to equate incremental costs and benefits was calculated. This showed that implicit benefits after removing credit for reducing cancer incidence for VOC per Mg (ton) must be in the range from $0 to $559 per Mg ($0 to $508.18 per ton) for new medium solvent cleaning machines, and $1,866 to $2,649 per Mg ($1,696.36 to $2,408.18 per ton) for existing and new small solvent cleaning machines. Ranges were computed based on the level of credit for reduction in cancer mortality risk. Methods to fully quantify the non-cancer human health and the ecological benefits of reduced exposures to these chemicals are complex, and in some cases, controversial.

Assuming a policy-based VOC reduction decision criterion of $2,000/Mg ($1,818.18 per ton), the benefits analysis supports emissions control at the selected regulatory alternatives unambiguously except for the small solvent cleaning machines and the new in-line solvent cleaning machines. The $2,000/Mg ($1,818.18 per ton) of VOC reduction decision criterion that has been used as a value for decision-making lies within the upper end of the range for these two solvent cleaning machine types. For these machines, the benefits analysis is not definitive, neither clearly supporting or refuting the proposed levels of control by the benefit/cost criterion. Further information is available in a background information document (see the Background Information Documents section near the beginning of this preamble).

E. Selection of Maximum Achievable Control Technologies

When establishing standards under section 112(d) of the Act, the Administrator must establish limits that reflect the maximum achievable emission reduction, or MACT. However, for area sources, section 112(d)(5) states that "the Administrator may * * * elect to promulgate standards or requirements * * * which provide for the use of generally available control technologies or management practices." This is typically referred to as GACT. Since these standards include area sources, an evaluation of the appropriate regulatory approach for area sources was needed.

The use of GACT as opposed to MACT for area sources is not required by the Act. A GACT approach might be warranted if significant adverse economic impact is expected on small sources. This might especially be the case where the small sources are also small businesses that could not afford the capital expenditure associated with meeting MACT. There could also be some concern that appropriately trained individuals would not be available to operate sophisticated controls. A GACT approach may also be warranted if there is a technological limitation to installing a control device on smaller emission sources.

In this source category, no reason that would lead to using a GACT approach for batch vapor and in-line cleaning machines is known to exist. Although a number of cleaning machines are expected to be located at small businesses, the use and operation of these cleaners do not represent a significant portion of their business. Batch vapor and in-line solvent cleaning operations typically represent only a small portion of the total operating expenses of a source; generally ranging from 0.1 to 9.7 percent. Therefore, any impact from the standards would not be likely to have a significant impact on the overall facility.

There is no technological barrier to the use of controls on smaller sources. When developing the standards for this source category, the determination of MACT was made for multiple cleaning machine size ranges. The levels selected are above the MACT floor and are equivalent to the levels that would have been established if a GACT approach were used.

While the technological sophistication of controls may increase as the level of control increases, proper operation is still relatively simple. Normal training procedures that would be present at any facility to ensure proper use of the cleaning machine would typically be sufficient to ensure proper control device operation. Some of the control devices are less prevalent on the smaller size cleaning machines; however, there is no technological reason why the controls cannot be applied to these units.

Since there are no significant economic, technological, or feasibility issues that would warrant selecting a GACT approach for batch vapor and in-line cleaning machine area sources in this industry, MACT is warranted for the batch vapor and in-line cleaning machines subcategories. This proposed standard is based on MACT control applied to all batch vapor and in-line cleaning machines and GACT control applied to all batch cold cleaning machines.

Requiring area sources to meet MACT as opposed to GACT means that the section 112(f) requirement, that EPA conduct a residual risk analysis 8 years after promulgation of the MACT standard, will apply to those sources. The EPA requests comment on whether this residual risk requirement should be a factor to be weighed in determining whether MACT or GACT should apply to a category or subcategory of area sources. For example, in the present case, where MACT and GACT would require the same level of control, is it permissible to call the standard GACT for area sources in order to exempt those sources from the requirements of 112(f)?

1. Evaluation of Regulatory Alternatives

The EPA has chosen the most stringent regulatory alternative for each solvent cleaning machine source subcategory for both existing and new cleaning machines, considering emission reduction, cost, economic, and other environmental impacts. As shown in table 5, the incremental cost effectiveness of moving from the next most stringent to the most stringent regulatory alternative for these subcategories ranged from an incremental cost-effectiveness savings of $600/Mg ($550 per ton) to a incremental cost effectiveness of $2,830/Mg ($2,570 per ton) of HAP emission reduction. No adverse economic or other environmental impacts are expected for any of the alternatives presented. Batch cold cleaning machines are not included in this table, but are proposed to be regulated under GACT, as discussed in section VI.D.

The analysis for existing and new small and medium batch vapor cleaning machines and new in-line cleaning machines revealed incremental cost-effectiveness estimates ranging from $1,120/Mg to $2,830/Mg associated with adopting the most stringent regulatory alternatives. For large and very large batch vapor cleaning machines, and existing in-line cleaning machines there were incremental cost savings for the most stringent regulatory alternative. Cost savings occur because the control techniques reduce solvent emissions from cleaning machines, thereby reducing the amount of new solvent that must be purchased. The savings in solvent purchase costs outweigh the cost of installing and operating the controls. In light of these incremental cost effectiveness estimates and because no adverse economic or environmental impacts are expected, the most stringent alternatives for the batch vapor and in-line cleaning machine source subcategories are selected as MACT.

The EPA requests comments on it's estimates of the cost, emission reduction benefits, and recovery credits, and solicits comments on the appropriateness of selecting the most stringent alternative for each of the subcategories (particularly for the small and medium subcategories).

Table 7 presents a summary of the MACT standards for existing and new solvent batch vapor and in-line cleaning machine source subcategories covered by these standards. The proposed standards are based on the EPA's evaluation of all data currently available. The EPA invites comment on all the regulatory alternatives presented in this preamble, ranging from the floor to the alternative technologies discussed in section VI.C. Before promulgating a final rule, the EPA will evaluate all additional information and data submitted. Based on this evaluation, the promulgated standards could be set at the MACT floor level, or at the level of any of the other regulatory alternatives presented in this preamble, but will not be less stringent than the floor. The EPA could also establish MACT based on the alternative technologies discussed in section VI.C.

TABLE 7.—SOLVENT CLEANER SOURCE SUBCATEGORY SELECTED REGULATORY ALTERNATIVES

	Existing (percent)	New (percent)
Batch vapor:		
Small	IV—60	III—60
Medium	III—60	II—60
Large	II—70	II—70
Very large	II—70	II—70
In-line	II—50	III—70

F. Selection of Format for the Proposed Standards

Section 112(d) of the Act requires that emission standards for control of HAP be prescribed unless, in the judgment of the Administrator, it is not feasible to prescribe or enforce emission standards. Section 112(h) identifies two conditions under which it is not considered feasible to prescribe or enforce emission standards. These conditions include: (1) If the HAP cannot be emitted through a conveyance device, or (2) if the application of measurement methodology to a particular class of sources is not practicable due to technological or economic limitations. If emission standards are not feasible to prescribe or enforce, then the Administrator may instead promulgate equipment, work practice, design or operational standards, or a combination thereof.

Multiple approaches for regulating the halogenated solvent batch vapor cleaning and in-line source subcategories are being proposed. The formats include equipment standards (i.e., control technique requirements) coupled with work practices; idling emission limit standards coupled with equipment standards (i.e., use of a hoist) and work practices; and an alternative overall solvent emission limit standard. The owner or operator of a batch vapor or in-line cleaning machine would select one of these compliance approaches.

Multiple compliance alternative options are being proposed for batch vapor and in-line cleaning machines to allow these cleaning machine owners or operators flexibility. It was determined that a combination of standard formats best met the halogenated solvent batch vapor and in-line cleaning machine subcategories' compliance needs because of the vast number of different industries and operating schedules associated with the use of these cleaners.

An emission limit standard was considered initially, as required by the Act. Solvents are not generally emitted through a conveyance device. The only exception is when a lip exhaust is used at the edge of the cleaning machine to draw vapors away from the workers.

However, available information indicates that these devices increase losses from the machine unless controlled by a carbon adsorber. Carbon adsorbers are not a component of the regulatory alternatives selected as MACT. In addition, emissions from solvent cleaning machines are dependent on the working schedule, which varies widely within and across solvent cleaning subcategories. Since no conveyance device is used, and emissions are variable, establishing an emission standard for all solvent cleaning machines was not technologically possible. However, emission standards were used to the extent possible in these standards.

An emission limit based on a limited working schedule was established as an alternate standard for solvent batch vapor and in-line cleaning machines. This limit represents, at a minimum, the MACT level of control. For some cleaning machines the alternative emission limit could be more stringent than MACT. In particular, it is expected that this alternate standard will be more difficult to meet for larger machines and machines operating for more than one shift or that clean parts with difficult configurations. It was not possible to account for these variables when establishing alternative emission limits without making the alternative standard unenforceable or overburdensome. Sources meeting the alternative emission limits proposed today are subject to less burdensome monitoring, recordkeeping, and reporting requirements than sources meeting the other combinations of idling emission limits and equipment and work practice standards. The reduced burden provides an incentive for innovative emissions control strategies to limit solvent use.

An idling emission standard was then evaluated. An idling emission standard would allow a numerical standard to be set without considering workload and operating schedules of the solvent cleaning subcategories. However, maintaining an idling emission limit does not ensure maximum emission reductions at all times. Therefore, work practices and equipment standards (i.e., use of a hoist) were established as part of this compliance alternative. The idling emission limit compliance alternative may be economically impracticable for some owners and operators. A compliance test would need to be performed for each cleaning machine if vendors do not supply model cleaning machine test data indicating idling emission limit compliance. Therefore, the EPA concluded that establishing an idling emission limit for all sources would not be practicable. However, an idling emission limit was developed as an alternative compliance method because it allows for the development and use of new emission control techniques.

An emission reduction (percent) standard was also evaluated for the halogenated solvent batch vapor and in-line cleaning machine source subcategories. It was determined that this format was not feasible or practicable for halogenated solvent cleaning operations because the percent emission reduction from a cleaning machine would depend on the percentage of time working. A percentage emission reduction standard would be economically impracticable to determine because the percentage of time working varies within and across solvent cleaning operations. It would also be technologically impracticable to measure a percent emission reduction for the halogenated solvent cleaning source category as most control techniques for solvent cleaning machines prevent emissions from leaving the machine and therefore do not allow for simultaneous measurement of uncontrolled and controlled emissions.

Use of an equipment standard, in conjunction with work practices, was then evaluated for the halogenated solvent batch vapor and in-line cleaning source subcategories. An equipment standard would include requirements for control techniques or combinations of control techniques to meet MACT. This would be used in conjunction with work practice requirements to ensure MACT limits are met. The equipment standard compliance format allows an owner or operator flexibility in meeting the established MACT limits, and allows use of existing control devices an owner or operator may have in place. The equipment standard compliance format also allows for compliance without meeting a specified emission limit that may not be feasible to measure, or achievable to meet because of varying operating schedules.

Equipment standards were determined for the batch vapor and in-line halogenated solvent cleaning subcategories based on control efficiencies estimated for a "typical" operating schedule, and control efficiencies for individual controls based on tests. Work practice standards were established as a supplement to equipment standards to ensure that the desired emission reductions are met and maintained.

Work practice standards include proper operating and maintenance practices, and are proposed to minimize solvent emissions from poor operating and maintenance practices. Work practice standards would include reducing or preventing room drafts near the solvent cleaning machine, spray design and techniques, start-up and shutdown procedures, workload introduction and removal techniques, parts racking to facilitate drainage, solvent transfer practices, and operator qualification test requirements.

In summary, equipment and work practice standards are used as the basis of today's proposed standards. Under this format, a facility is required to monitor equipment control parameters and work practices to ensure compliance. Two additional compliance format alternatives are included: (1) An idling emissions limit, plus the use of a hoist and work practices, and (2) an emission limit standard. These format alternatives are proposed as alternative compliance methods for operator or owner flexibility.

The idling compliance emission level for the emission limit approach was set based on the solvent air interface (kg emissions per m^2 solvent air interface [lb emissions per ft^2 solvent air interface]) and on a 2-hour a day working schedule for batch cleaning machines and an 8-hour a day working schedule for in-line cleaning machines. The batch vapor cleaning machine working schedule is considered to be slightly more than "typical" for small and medium batch vapor cleaning machines, and less than "typical" for large and very large batch vapor cleaning machines.

The overall compliance emission levels for the batch vapor and in-line cleaning machine subcategories were determined by taking the idling emission rates for an uncontrolled cleaning machine and applying the maximum idling emission reduction component identified for the selected regulatory alternative control levels to get an idling emission standard.

The proposed batch cold cleaning machine source subcategory regulatory format approach consists of an equipment standard coupled with work practices. The owner or operator of a batch cold cleaning machine would follow the equipment standard and work practices in order to comply with the regulation.

G. Modification and Reconstruction Considerations

Section 112(g) of the Act establishes requirements for sources that are modified or reconstructed. Provisions for modifications and reconstructions are being developed under separate rulemakings, and will be applicable to

all halogenated HAP sources subject to today's proposed regulations.

H. Selection of Monitoring Requirements

Section 114(a)(3) requires enhanced monitoring and compliance certification of all major stationary sources. The annual compliance certifications certify whether or not compliance has been continuous or intermittent. Enhanced monitoring shall be capable of detecting deviations from each applicable emission limitation or other standard with sufficient reliability and timeliness to determine continuous compliance over the applicable reporting period. Such monitoring data will be directly enforceable. If monitoring required under these standards is not performed the owner or operator would be in violation of the regulation. The best way to assure continuous compliance is through continuous emission monitoring. However, EPA must consider technical feasibility and cost when selecting enhanced monitoring systems. Section 504(b) states that continuous emission monitoring is not required for determining compliance if other means are sufficiently reliable and timely. Emission monitoring was considered for the emission limit portions of the standards. Continuous emissions monitoring was determined not to be feasible for the halogenated solvent cleaner source category because emissions are not ducted through a control device under these proposed standards and are not measured in a manner that allows for continuous emissions monitoring.

The batch cold cleaning machine subcategory is a subcategory of area sources. The machines in this subcategory are typically located at small businesses, such as automotive service stations. The emissions from individual cleaning machines are small and the controls required for this subcategory are already in place on all cleaning machines. Proper operation is relatively simple. In addition, if not properly operated, the facility would lose additional solvent. Since operation is relatively simple and there is an economic incentive to maintain proper operation, no periodic monitoring is proposed. Even though no monitoring is required, the owner or operator would be required to continuously meet the standards. Violations would be easily detected through random inspections.

Owners or operators choosing to comply with the alternative emission limit standards would be required to conduct monthly solvent consumption mass balance emissions estimates. This method would require the owner or operator to maintain a log of solvent additions and deletions for each cleaner and demonstrate that the emissions based on a 3-month rolling average, from each solvent cleaning machine (calculated from these records) are equal to or less than the established limits for their cleaner. If the 3-month rolling-average emissions from a solvent cleaning machine exceeds the established limits, or monitoring is not done, the owner or operator would be in violation of the regulation.

For owners or operators complying with the alternative idling emission standards in conjunction with the use of a hoist and work practices, the selected monitoring approach would require that the idling reference test method 307, also being proposed today, be used to demonstrate compliance with the idling limit and establish the monitoring parameters for the solvent cleaning machine. Method 307 uses a liquid level procedure, where the change in liquid level corresponds directly to the amount of solvent lost from the cleaner. The emissions compliance parameters to be monitored are determined by this test. The owner or operator would need to demonstrate that the frequency and types of parameters monitored on the solvent cleaning machine were sufficient to demonstrate continued compliance with the idling standard. A owner or operator that fails to monitor control parameters or does not maintain the same control system operating parameters as during the test is in violation of the regulation.

The proposed standards include equipment standards that require use of specific control techniques or control technique combinations. In order to ensure that the control efficiency level is maintained, monitoring requirements are required. Monitoring each control system operating parameter would be necessary to ensure effective and continuous emission reduction.

Control system monitoring entails the measurement or monitoring of a parameter that is determined to demonstrate compliance. Monitoring of control system operating parameters can entail visual inspection or control-specific measurement devices.

Monthly visual inspection monitoring would be required for automated or manual covers to ensure that covers completely cover the machine opening, are in place, secure, and closing properly.

Monitoring requirements for each control device that are necessary to ensure proper operation were determined. These monitoring requirements would include the use of a velometer to measure windspeed across a solvent cleaner for reduced room draft, and a thermometer or thermocouple to measure the center of the air blanket temperature for a freeboard refrigeration device or superheated vapor system. These control parameters would be monitored weekly under these proposed standards. Failure to monitor control system operating parameters, or to maintain control system parameters as required, would be a violation of the regulation.

Proposed work practice standards have been set to minimize emissions associated with operating solvent cleaners. Direct monitoring of work practice standard compliance would be difficult. It was determined that an operator qualification test would be the best work practice monitoring technique. This test would be completed by an operator during inspection, if requested by the Administrator. The operator qualification test would include, but may not be limited to, the following information.

1. The correct way to determine the adequate cycle time;
2. How to determine if a specific control device is functioning;
3. The correct part entry and exit speed and a method for calculating this speed;
4. The proper use of a cover;
5. The impacts of room drafts on a cleaning machine and how to mitigate the impacts;
6. The proper parts orientation; and
7. The basic cleaning machine parts and their functions.
8. The procedures followed at halogenated solvent cleaning machine startup, shutdown, and during halogenated solvent cleaning machine malfunction.

I. Selection of Recordkeeping and Reporting Requirements

Under section 114(a) of the Act, the Administrator may require any person who owns or operates any emission source, who the Administrator believes may have information subject to any requirement of this Act on a one-time, periodic, or continuous basis, establish and maintain records; make reports; use and maintain monitoring equipment; and use such audit procedures, or methods; and provide such other information as the Administrator may reasonably require.

Owners of machines in the batch cold cleaning machine subcategory are typically small businesses, such as an automotive service station. As discussed in section VI.H., no monitoring is required for these sources. In order to eliminate unnecessary burden, these sources are required to submit only an

initial notification and are exempt from all other recordkeeping and reporting requirements in both the proposed standards and in the General Provisions of Part 63. The initial notification must contain the name and address of the facility as well as a certified statement that each batch cold cleaning machine at the facility meets the applicable requirements of Subpart T.

These proposed standards for the 5 remaining subcategories would require recordkeeping and reporting to verify emission limit standard compliance, and equipment and work standards compliance. All records must be kept for 5 years. The proposed recordkeeping provisions would require that each owner or operator electing to comply with the overall emission limit standard option maintain records of dates and amounts of solvent added to the tank, solvent composition of wastes removed from the cleaning machine, and materials balance calculation sheets documenting the 3-month rolling average solvent consumption estimates calculated each month for their solvent cleaning machine. Each owner electing to comply with the idling emission limit format, supported by equipment and work practice standards option, would be required to maintain records of equipment design, date of installation, and control device monitoring results for 5 years.

Each owner electing to comply with the equipment and work practice standards would be required to keep records of the monthly or weekly monitoring of control equipment parameters, owners's manuals for the solvent cleaning machine and controls, and the date of installation for the solvent cleaning machine and all of its control devices.

As proposed by the General Provisions (Subpart A of this part), a startup, shutdown, and malfunction plan will be determined, followed, and kept on-site for audit inspection.

An initial notification report would be required for each halogenated solvent cleaning machine HAP source. This report would include the name and address of the facility where the solvent cleaning machine is located; solvent cleaning machine design characteristics (type of cleaner, solvent air interface area); yearly halogenated solvent consumption for each cleaning machine; and existing solvent cleaning machine control devices.

An initial compliance report would be required within 30 days of the date of compliance (2 years after promulgation for existing sources). This report would indicate whether each solvent cleaning machine complies with the regulation, and the standard format the owner or operator elects to adopt to comply with the regulation. The initial compliance report would include an initial test report (vendor-supplied or using reference test method 307) for those owners or operators choosing to comply with the idling emission standard format. Along with the initial test report, an owner or operator would also report the control parameters to be maintained and monitored in order to comply with the standards. This initial compliance report would also include the 3-month solvent consumption rolling average for those owners or operators choosing to comply with the overall emission limit standard. If an owner or operator chooses the equipment and work practice standard format, the initial report would include control equipment verification information and a control parameter monitoring report within 30 days of the date of compliance.

After cleaning machine owners and operators verify compliance, they are only required to submit a compliance report to the Administrator annually, unless noncompliance with the standards is indicated. This report includes the startup, shutdown, and malfunction reporting requirements as proposed by the General Provisions (Subpart A of this part). If any exceedances occur, startup, shutdown and malfunction reporting requirements will be submitted as part of the exceedance report.

Exceedance of any of the regulatory standards, at any time after the applicable compliance date, would require that a report of noncompliance be submitted. This report would include regulation violations such as when any of the monitored operating parameters were outside the required values (e.g., a temperature recorded at the center of the air blanket that is above regulation-specified levels, or when visual observations reveal that a cover does not close properly). These reports would be submitted quarterly.

Additional reporting requirements for owners and operators that elect to comply with the overall emission limit include reports on solvent consumption materials balance emissions documenting the rolling 3-month average emissions every year. Solvent consumption records are often maintained as solvent purchase records by a facility operator or owner; therefore, it would not be a burden to record and report solvent consumption.

J. Operating Permit Program

Under title V of the Act, major sources of HAP as defined by section 112 would be required to obtain an operating permit. Often, emission limits, monitoring, and reporting and recordkeeping requirements are scattered among numerous provisions of SIP's or Federal regulations. As discussed in the promulgated regulation for the operating permit program published on July 21, 1992 (57 FR 32250), this new permit program includes all of the requirements that pertain to a single major stationary source in a single document. Sources subject to the program are required to submit complete permit applications within a year after a State program is approved by the EPA or, where a State program is not approved, within a year after a program is promulgated by the EPA. If an emission standard for area sources has been established under this part, the EPA can choose to exempt that area source from the requirement to obtain a permit if permitting them is determined by the EPA to be impracticable, infeasible, or unnecessarily burdensome. The EPA proposes in today's standards that the cold batch cleaning machine subcategory be exempt from the requirement to obtain a permit based on the reasons outlined above.

K. Solicitation of Comments

The EPA specifically requests comment on the following issues:

1. For this source category, the EPA is proposing that all area sources be regulated by MACT except the batch cold cleaner subcategory, which will be required to meet GACT. No specific criteria are statutorily prescribed to determine whether GACT is warranted for area sources in a particular source category. The EPA requests comments on criteria that were used in this proposal and any other(s) that the commenter believes should be used in making this determination. In addition, as discussed in section VI.E., the EPA requests comment on whether the application of section 112(f) should be a factor in deciding whether to apply MACT or GACT to an area source category or subcategory.

2. As discussed in section I.B., the EPA requests comment on its proposed subcategorization of the listed source category. Specific information is requested concerning whether the delisting criteria of section 112(c)(9) are met, or alternatively, whether a finding under section 112(c)(3) should be made for individual subcategories.

3. Standards for batch cold cleaning machines proposed today are based on carburetor cleaners, but apply to any HAP batch cold cleaning machines. The EPA could not identify any other use of

halogenated HAP solvents in cold cleaning machines. The EPA solicits comments and supporting data on the inclusion of batch cold cleaning machines in today's proposal or alternative strategies for addressing emissions from this subcategory that are consistent with the Act. Specifically, the EPA requests comments on the reasonableness of setting standards equal to the baseline level of control. Also, the EPA requests data and comments on the existence of other HAP batch cold cleaning machines and whether the proposed standards would be reasonable for those machines.

4. Limited data were identified by the EPA concerning downtime emission controls and control efficiencies for the halogenated solvent cleaning machine subcategories. The EPA solicits comments and data on downtime emission controls and control efficiencies.

5. At the NAPCTAC meeting in December 1992, there was concern expressed by industry that the control efficiencies used to evaluate the emission reductions and costs for the various options represent "typical" facilities as measured in the laboratory and may not match the operating conditions and schedules for each individual cleaning machine. However, multiple compliance alternatives are provided for this NESHAP, including equipment, work practice, and emission limit (idling and overall) standards since the data were generally obtained under laboratory conditions. The equipment standards, in conjunction with work practices, allows compliance without meeting a specified emission limit. No compliance method requires demonstration with a percent reduction standard. The EPA believes that the multiple compliance alternatives in today's proposal ensures maximum control while minimizing the potential impacts of the use of laboratory data for "typical" cleaning machines. The EPA requests comments on this issue and any available data on control techniques for halogenated solvent cleaners.

6. The EPA solicits comment and data on whether it is appropriate to include credits for reductions in solvent usage when calculating the annualized costs and cost effectiveness values of the regulatory alternatives.

7. Alternative cleaning technologies presented in the preamble include alternative solvents, alternative cleaning machines and no-clean technologies. The EPA is seeking information on specific applications of these cleaning technologies and whether they should be used as the basis for MACT in the promulgated standards. Information supplied needs to include specifics on applicability, costs, and multi-media impacts (i.e., air, water, soil). Information obtained will be considered by the EPA in the final rulemaking.

8. The EPA has not fully evaluated room enclosures as an option for reducing fugitive emissions. Room enclosures could potentially capture and control fugitive emissions from solvent cleaning machines. However, occupational exposure health risks, costs, available room space, and halogenated solvent cleaning machine accessibility could be potential problems associated with the use of room enclosures. The EPA is seeking comment on the cost, impacts, feasibility, and specific applicability of these controls and whether these controls should be considered as MACT for the promulgated standards.

9. The EPA is currently testing and gathering quantitative information on two low solvent emitting vapor cleaning systems. The EPA is also collecting information on the solvents that these systems are designed to use, products that the systems can clean, ability to retrofit existing cleaning systems with the technology, and industries that use these systems. The EPA requests comments or information concerning these new technologies that justify the feasibility of their inclusion in the final rule.

Any comments submitted to the Administrator on this proposed rule for existing and new halogenated solvent cleaners, however, should contain specific information and data pertinent to an evaluation of the magnitude and severity of its impact and suggested alternative courses of action that would avoid this impact.

VII. Administrative Requirements

A. Public Hearing

A public hearing will be held, if requested, to discuss the proposed standard in accordance with section 307(d)(5) of the Act. Persons wishing to make an oral presentation on the proposed standards for halogenated solvent cleaning machines should contact the EPA at the address given in the ADDRESSES section of this preamble. Oral presentations will be limited to 15 minutes each.

Any member of the public may file a written statement before, during, or within 30 days after the hearing. Written statements should be addressed to the Air Docket Section address given in the ADDRESSES section of this preamble and should refer to Docket No. A–92–39.

A verbatim transcript of the hearing and written statements will be available for public inspection and copying during normal working hours at the EPA's Air Docket Section in Washington, DC (see **ADDRESSES** section of this preamble).

B. Docket

The docket is an organized and complete file of all the information submitted to or otherwise considered by the EPA in the development of this proposed rulemaking. The principal purposes of the docket are: (1) To allow interested parties to readily identify and locate documents so that they can intelligently and effectively participate in the rulemaking process and (2) to serve as the record in case of judicial review (except for interagency review material [307(d)(7)(A)]).

C. Executive Order 12866

Under Executive Order 12866 (58 FR 51735, 10/04/94), the Agency must determine whether the regulatory action is "significant" and therefore subject to OMB review and the requirements of the Executive Order. The order defines "significant" regulatory action as one that is likely to lead to a rule that may:

1. Have an annual effect on the economy of $100 million or more, or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local or tribal governments or communities;

2. Create a serious inconsistency or otherwise interfere with an action taken or planned by another agency;

3. Materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligation of recipients thereof; or

4. Raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in the Executive Order.

Pursuant to the terms of Executive Order 12866, it has been determined that this rule is a "significant" regulatory action. This action was submitted to OMB for review. Changes made in response to OMB suggestions or recommendations will be documented in the public record to be included in the docket listed at the beginning of today's notice under **ADDRESSES.** The docket is available for public inspection at the EPA's Air Docket Section, which is listed in the **ADDRESSES** section of this preamble.

D. Paperwork Reduction Act

The information collection requirements in this proposed rule have

been submitted for approval to the OMB under the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.* An Information Collection Request document has been prepared by EPA (ICR No. 1652–01), and a copy may be obtained from Sandy Farmer, Information Policy Branch, EPA, 2136, 401 M Street, SW., Washington, DC 20460, or by calling (202) 260–2740. The public reporting and recordkeeping burden for this collection of information is estimated to average 57 hours (or to vary from 36 to 142 hours) the first year. This reporting and recordkeeping burden is estimated to average 42 hours (or to vary from 29 to 55 hours) annually, thereafter. This includes time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Chief, Information Policy Branch, PM–223Y, U. S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460, and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503, marked "Attention: Desk Officer for the EPA." The final rule will respond to any OMB or pubic comments on the information collection requirements contained in this proposal.

E. Regulatory Flexibility Act

The RFA, (or Public Law 96–354, September 19, 1980) requires Federal agencies to give special consideration to the impact of regulation on small businesses. The RFA specifies that a regulatory flexibility analysis must be prepared if a proposed regulation will have a significant economic impact on a substantial number of small entities. Regulatory impacts are considered significant if:

1. Annual compliance costs increase total costs of production by more than 5 percent.

2. Annual compliance costs as a percent of sales are at least 20 percent (percentage points) higher for small entities.

3. Capital cost of compliance represent a significant portion of capital available to small entities.

4. The requirements of the regulation are likely to result in closures of small entities.

A "substantial number" of small entities is generally considered to be more than 20 percent of the small entities in the affected industry. Since the economic analysis deals only with small entities (in this case, facilities), conclusions can be drawn from what was done there already. Each of the criteria for significant impacts will be considered in turn.

The largest increase in total cost of production from increased emission control is 0.61 percent (SIC 359—Industrial Machinery, n.e.c.). This figure is well below the significant-impact threshold of five percent.

Assessing the differential impacts, measured by a comparison of compliance costs as a percent of sales for small and large entities, is more difficult as large model facilities were not analyzed in the economic impact analysis. Treatment of this small business impacts criterion involves creating two large model facilities.

If it is assumed that large facilities use large solvent cleaning machines, then compliance costs for large cleaning machines are negative, and are thus savings. To be conservative, it is assumed here that large model facilities possess five very large solvent cleaning machines, so that a "maximum savings" case is modelled. This case is important as it models the maximum cost differential between large and small facilities.

Large model facilities were created for SIC 359 (Industrial Machinery, n.e.c.) and SIC 254 (Partitions and Fixtures). SIC 359 was chosen because the small model facilities in this group experience the highest cost absorption impact when compared with other small model facilities. SIC 254 was used because it had the smallest average per-facility revenue of facilities with greater than 100 employees. Thus, if they incur the same absolute savings as other large facilities, their relative percentage savings will be the highest, and they will experience the greatest cost savings in percentage terms as a result of the standard. The cost differentials are in no case larger than one percentage point. Thus, by this criterion, small business impacts are not deemed significant.

The third criterion focuses on the amount of capital available to small businesses or facilities. Since the capital costs incurred as a result of investment in control equipment needed for small businesses to meet the standard was less than 10 percent of the businesses' total assets in all 39 affected SIC codes, it was concluded that the total assets of small facilities will not be so adversely affected as to prohibit the procurement of outside financing. (Examining an increase in capital costs as a percentage of total assets is a measure of the ability of a firm or facility to meet this capital costs increase.) The conclusion, then, is that lack of available capital will not be an obstacle for small facilities in complying with the regulation.

Criterion number four stipulates that small business impacts are significant if compliance leads to closure. The only implication of closure in the economic impact analysis is found in the section on earnings impacts. Here it was found that, under worst-case assumptions, closures might occur in only two SIC codes, 254 and 259 (Miscellaneous Furniture and Fixtures), given their low rate of profitability in the baseline. If this indeed occurs, the question of whether or not these closures make up a substantial portion of small entities must be addressed. The actual number of impacted facilities in the 39 impacted SIC codes is unknown. If it can be assumed that each SIC is impacted in the same proportion, a proxy for the share of impacted facilities represented by SIC codes 254 and 259 is the total number of facilities in these SIC codes as a share of the total number of potentially impacted firms. Standard Industrial Classification codes 254 and 259 hold a combined total 3,194 small facilities. This makes up 3.4 percent of the total 93,121 small facilities in all 39 SIC codes. Thus, in the extreme case that some closures result, the number of closures is estimated to far less than the amount required for substantial number of impacted facilities.

In conclusion, and pursuant to the provisions of 5 U.S.C. 605(b), I hereby certify that this proposed rule, if promulgated, will not have a significant economic impact on a substantial number of small entities, for the impacts do not meet or exceed the four previously stated criteria in the RFA guidelines.

Further information on the RFA screening effort is available in the background information package (see the Background Information Documents section near the beginning of this preamble).

F. Clean Air Act Procedural Requirements

In accordance with section 117 of the Act, publication of this proposal was preceded by consultation with appropriate advisory committees, independent experts, and Federal departments and agencies. The Administrator will welcome comments on all aspects of the proposed regulation, including health, economic and technological issues, and on the proposed liquid level procedure test method.

Section 112(d)(6) requires the Administrator to review this regulation no less often than every 8 years. In addition, section 112(f)(2) requires a

single review within 8 years of promulgation. This review will include an assessment of factors such as evaluation of the residual health risks, any overlap with other programs, the existence of alternative methods, enforceability, improvements in emission control technology and health data, and the recordkeeping and reporting requirements.

List of Subjects in 40 CFR Part 63

Environmental protection, Air pollution control, Hazardous substances, Halogenated solvent cleaning machines, Reporting and recordkeeping requirements.

Dated: November 15, 1993.

Carol M. Browner,

The Administrator.

For the reasons set out in the preamble, title 40, chapter I, part 63, of the Code of Federal Regulations is amended as set forth below:

PART 63—NATIONAL EMISSION STANDARDS FOR HAZARDOUS AIR POLLUTANTS FOR SOURCE CATEGORIES

1. The authority citation for part 63 continues to read as follows:

Authority: 42 U.S.C. 7401, 7412, 7414, 7416, and 7601.

2. Part 63 is amended by adding subpart T consisting of §§ 63.460 through 63.468 to read as follows:

Subpart T—National Emission Standards for Halogenated Solvent Cleaning

Sec.

63.460 Applicability and designation of source.
63.461 Definitions.
63.462 Standards.
63.463 Alternative standards.
63.464 Test methods.
63.465 Monitoring procedures.
63.466 Recordkeeping requirements.
63.467 Reporting requirements.
63.468 Equivalent methods of control.

Subpart T—National Emission Standards for Halogenated Solvent Cleaning

§ 63.460 Applicability and designation of source.

(a) The provisions of this subpart apply to each individual solvent cleaning machine that uses methylene chloride, perchloroethylene, trichloroethylene, 1,1,1-trichloroethane, carbon tetrachloride, chloroform, or any blend using a halogenated solvent as a cleaning solvent.

(b) The provisions of subpart A of this part apply to owners or operators of batch vapor and in-line cleaning machine sources.

(c) The owners or operators of batch cold cleaning machine sources are not subject to the provisions of subpart A of this part.

(d) Each solvent cleaning machine that commences construction or reconstruction on or after November 29, 1993 shall achieve compliance with the provisions of this subpart immediately upon startup or the date of promulgation of this subpart, whichever is later.

(e) Each solvent cleaning machine that commenced construction or reconstruction before November 29, 1993 shall achieve compliance with the provisions of the subpart no later than 24 months after the date of promulgation of this subpart.

(f) The following authorities shall be retained by the Administrator and not transferred to a State: (To be determined by EPA at the final rule stage.)

§ 63.461 Definitions.

Terms used in this subpart are defined as follows:

Air blanket means the layer of air inside the solvent cleaning machine freeboard which extends from the solvent/air interface to the top coil of the freeboard refrigeration device. The center of the air blanket is equidistant between the sides and between the top and bottom of the air blanket.

Automated parts handling system means a mechanical device that carries all parts and parts baskets from the initial loading of soiled parts through the removal of the cleaned parts at a controlled speed. Automated parts handling systems include, but are not limited to, hoists and conveyors.

Batch cleaning machine means a solvent cleaning machine in which individual parts or a set of parts move through the entire cleaning cycle before new parts are introduced into the solvent cleaning machine. An open top vapor cleaning machine is a type of batch cleaning machine.

Bi-parting cover means an automatic cover for a solvent cleaning machine that consists of two halves that slide horizontally when the cover is being opened or closed. A bi-parting cover can be closed while parts are in the solvent cleaning machine.

Carburetor cleaning machine means a small maintenance solvent cleaning machine or parts washer that uses room temperature liquid solvent and solvent blends to clean parts (typically carburetors). Carburetor cleaning machines have a water layer over the solvent that provides control of emissions. Carburetor cleaning machines typically consist of a pail containing the solvent and water layer, a basket in which the parts are placed, and a gasketed cover containing a motor which rotates the basket.

Clean liquid solvent means fresh unused solvent or used solvent that has been filtered, skimmed, and/or distilled to remove soils (e.g., skimmed of oils or sludge and strained of metal chips.)

Cold cleaning machine means any device or piece of equipment that contains and uses solvent in the liquid phase to clean and remove soils from the surfaces of materials.

Cover means a lid, top, or portal cover for a solvent cleaning machine. Types of covers include, but are not limited to, bi-parting, roll-top, and hinged covers.

Downtime mode means the time period when the solvent cleaning machine is turned off.

Dwell means the period of time when parts are held within the freeboard area of the solvent cleaning machine after cleaning to allow solvent to drain from the parts back into the solvent cleaning machine.

Existing means any solvent cleaning machine that commenced construction or reconstruction on or before November 29, 1993.

Freeboard area means for a batch cleaning machine the area within the solvent cleaning machine that extends from the solvent/air interface to the top of the solvent cleaning machine. For an in-line cleaning machine, it is the area within the solvent cleaning machine that extends from the solvent/air interface to the bottom of the entrance or exit opening, whichever is lower.

Freeboard height means for a batch cleaning machine the distance from the solvent/air interface to the top of the cleaning machine. For an in-line cleaning machine, it is the distance from the solvent/air interface to the bottom of the entrance or exit opening, whichever is lower.

Freeboard ratio means a ratio of the solvent cleaning machine freeboard height to the smaller interior dimension (length, width, or diameter) of the solvent cleaning machine.

Freeboard refrigeration device (also called a chiller) means a set of secondary coils mounted in the freeboard area which carry a refrigerant to provide a chilled air blanket above the solvent vapor.

Hoist means a mechanical device that carries the parts basket and the parts to be cleaned from the loading area, into the solvent cleaning machine, and to the unloading area at a controlled speed. A hoist can be operated by controls or can be programmed to cycle parts through the cleaning cycle automatically.

Hot vapor recycle means a solvent cleaning system for vapor cleaning

machines in which parts are cleaned using superheated solvent vapor that is recirculated in the vapor zone.

Idling mode means the time period when a solvent cleaning machine is turned on but is not actively cleaning parts.

In-line cleaning machine (also called a continuous cleaning machine) means a solvent cleaning machine that uses an automated parts handling system, typically a conveyor, to provide a continuous supply of parts to be cleaned. These units are fully enclosed except for the conveyor inlet and exit portals. In-line cleaning machines can be either cold or vapor cleaning machines.

Leak-proof coupling means a threaded or other type of coupling which prevents solvents from leaking while filling or draining solvent to/from the solvent cleaning machine.

Lip exhaust means a device installed around the top of the opening of a solvent cleaning machine that draws in air and solvent vapor emissions and ducts them away from the solvent cleaning area.

Manual cover means a lid, top, or portal cover for a solvent cleaning machine that is opened and closed by physically lifting, sliding, or pulling it (i.e., is not operated mechanically). Manual covers include, but are not limited to, hinged, sliding, and roll-top covers.

Monthly reporting period means the calendar month in which the owner or operator of a solvent cleaning machine is required to calculate and report the solvent emissions from each solvent cleaning machine.

New means any solvent cleaning machine, the construction or reconstruction of which is commenced after the Administrator first proposes a relevant standard under this part.

Open top vapor cleaning machine means a batch solvent cleaning machine that has its upper surface open to the air and boils solvent to create solvent vapor that is used to clean parts.

Primary condenser means a series of circumferential cooling coils on a vapor cleaning machine through which a refrigerant is circulated or recirculated to provide continuous condensation of rising solvent vapors and, thereby, create a controlled vapor zone which prevents vapors from escaping from the cleaning machine.

Reduced room draft means decreasing the flow or movement of air across the solvent cleaning machine to meet the specifications of § 63.462(e)(2)(ii).

Soils means water-insoluble contaminants that are removed from the parts being cleaned. Soils include, but are not limited to, grease, oils, waxes, metal chips, carbon deposits, fluxes, and tars.

Solvent cleaning machine means any device or piece of equipment that uses halogenated solvent in the liquid or gaseous phase to clean and remove soils from the surfaces of materials.

Solvent/air interface means for a vapor cleaning machine the location of contact between the concentrated solvent vapor layer and the air. For a cold cleaning machine it is the location of contact between the liquid solvent and the air.

Solvent/air interface area means for a vapor cleaning machine the surface area of the solvent vapor that is exposed to the air. For a cold cleaning machine it is the surface area of the liquid solvent that is exposed to the air.

Solvent vapor zone means for a vapor cleaning machine the area which extends from the liquid solvent surface to the solvent vapor/air interface.

Sump means the part of a solvent cleaning machine where the liquid solvent is located.

Sump heater coils means the heating system on a vapor cleaning machine which uses steam, electricity, or hot water to boil the liquid solvent.

Superheated vapor system means employing the use of heating coils that boil liquid solvent generating solvent vapors that are heated to temperatures that are more than 1.5 times greater than the solvent boiling point.

Vapor cleaning machine means a batch or in-line solvent cleaning machine that boils liquid solvent generating solvent vapor that is used as an integral part of the cleaning cycle.

Water cover means for a batch cold cleaning machine a layer of water which floats above the denser solvent and provides control of solvent emissions. In many cases, the solvent used in batch cold cleaning machines is sold containing the appropriate amount of water to create a water cover.

Working mode means the time period when the solvent cleaning machine is turned on and is actively cleaning parts.

§ 63.462 Standards.

(a) Except as provided in § 63.463, each existing, new, or reconstructed batch vapor or in-line solvent cleaning machine shall conform to the following design requirements:

(1) Each cleaning machine shall be equipped with a cover that may be readily opened or closed, completely covers the cleaner openings when in place, and is free of cracks, holes, and other defects.

(2) Each cleaning machine shall have a freeboard ratio of at least 0.75.

(3) Each cleaning machine shall use an automated parts handling system at a maximum speed of 3.3 meters per minute for transporting all parts and parts baskets from the initial loading of parts through removal of cleaned parts.

(4) Each vapor cleaning machine shall be equipped with a device that shuts off the sump heat if the sump liquid solvent level drops down to the height of the sump heater coils.

(5) Each vapor cleaning machine shall be equipped with a vapor level control device which shuts off sump heat if the vapor level in the vapor cleaning machine rises above the height of the primary condenser.

(6) No lip exhaust shall be used, unless all collected solvent vapors are routed through a carbon adsorber.

(b) Except as provided in § 63.463, each owner or operator of an existing or new batch vapor cleaning machine shall comply with either paragraph (b)(1) or (b)(2) of this section:

(1) Each owner or operator of a batch vapor cleaning machine with a solvent/air interface area of 1.21 square meters or less shall:

(i) Employ one of the control combinations listed in table 1 of this subpart, or

(ii) Demonstrate that their solvent cleaning machine can achieve and maintain an idling emission limit of 0.15 kilograms per hour per square meter of solvent/air interface area, determined using the procedures in § 63.464(a).

(2) Each owner or operator of a batch vapor cleaning machine with a solvent/air interface area of greater than 1.21 square meters shall:

(i) Employ one of the control combinations listed in table 2 of this subpart, or

(ii) Demonstrate that their solvent cleaning machine can achieve and maintain an idling emission limit of 0.15 kilograms per hour per square meter of solvent/air interface area, determined using the procedures in § 63.464(a).

(c) Except as provided in § 63.463, each owner or operator of an in-line cleaning machine shall comply with paragraph (c)(1) or (c)(2) of this section, as appropriate:

(1) Each owner or operator of an existing in-line cleaning machine shall:

(i) Employ a 1.0 freeboard ratio and a freeboard refrigeration device, or

(ii) Demonstrate that their solvent cleaning machine can achieve and maintain an idling emission limit of 0.10 kilograms per hour per square meter of solvent/air interface area, as provided in § 63.464(a).

(2) Each owner or operator of a new in-line cleaning machine shall:

(i) Employ a super heated vapor system and a freeboard refrigeration device, or

(ii) Demonstrate that their solvent cleaning machine can achieve and maintain an idling emission limit of 0.10 kilograms per hour per square meter of solvent/air interface area, as determined using the procedures in § 63.464(a).

(d) Except as provided in § 63.463, each owner or operator of an existing or new batch vapor or in-line solvent cleaning machine shall meet all of the following required work and operational practices that are applicable to the type of cleaner:

(1) The cover(s) to each solvent cleaning machine shall be closed during the downtime mode.

(2) The parts baskets or the parts being cleaned in an open top batch vapor cleaner shall not occupy more than 50 percent of the solvent/air interface area, unless the parts baskets or parts are introduced at a speed of 0.9 meters per minute or less.

(3) Any spraying operations shall be done within the vapor zone or within a section of the solvent cleaning machine that is not directly exposed to the ambient air.

(4) Parts or parts baskets shall not be removed from any solvent cleaning machine until condensation or dripping has stopped.

(5) Parts shall be oriented so that the solvent drains from them freely. Parts having cavities or blind holes shall be tipped or rotated before being removed from any solvent cleaning machine.

(6) During startup of each vapor cleaning machine, the primary condenser shall be turned on before the sump heater.

(7) During shutdown of each vapor cleaning machine, the sump heater shall be turned off, and the solvent vapor layer allowed to collapse before the primary condenser is turned off.

(8) When solvent is added or drained from any solvent cleaning machine, the solvent shall be transferred using threaded or other leakproof couplings and the end of the pipe in the solvent sump shall be located beneath the liquid solvent surface.

(9) Each solvent cleaning machine and associated controls shall be maintained as recommended by the manufacturers of the equipment.

(10) Each owner or operator of a solvent cleaning machine shall complete and pass a test of solvent cleaning operating procedures if requested during an inspection by the Administrator.

(11) Waste solvent, still and sump bottoms shall be collected and stored in closed containers. The closed containers may contain a device that would allow pressure relief, but would not allow liquid solvent to drain from the container.

(e) Each owner or operator of a batch vapor or in-line solvent cleaning machine complying with paragraph (b)(1), (b)(2), (c)(1), or (c)(2) of this section shall:

(1) Conduct monitoring of each control device as provided in § 63.465.

(2) Operate each control device used to comply with these standards within the following parameters:

(i) If a freeboard refrigeration device is used to comply with these standards, the owner or operator shall ensure that the temperature at the center of the air blanket is 20 degrees below the ambient room temperature.

(ii) If a reduced room draft is used to comply with these standards, the owner or operator shall:

(A) Ensure that the movement of air across the solvent cleaning machine does not exceed 15.2 meters per minute at any time, and

(B) Establish and maintain the operating conditions under which the wind speed was demonstrated to be 15.2 meters per minute or less as described in § 63.465(a)(2).

(iii) If a bi-parting cover is used to comply with these standards, the owner or operator shall ensure that the cover opens only for part entrance and removal, completely covers the cleaner openings when closed, and is free of cracks, holes, and other defects.

(iv) If a manual cover is used to comply with these standards, the owner or operator shall ensure that the cover is in place whenever parts are not in the solvent cleaning machine, completely covers the cleaner openings when in place, and is free of cracks, holes, and other defects.

(v) If a dwell is used to comply with these standards, the owner or operator shall:

(A) Determine the appropriate dwell time for each part or parts basket as described in § 63.464(c), and

(B) Ensure that parts are held in the freeboard area of the solvent cleaning machine after cleaning for the determined dwell time.

(vi) If a super-heated vapor system is used to comply with these standards, the owner or operator shall ensure that the temperature at the center of the solvent vapor zone is 50 percent above the solvent's boiling point.

(f) Each owner or operator of a batch vapor or in-line solvent cleaning machine complying with paragraph (b)(1)(ii), (b)(2)(ii), (c)(1)(ii), or (c)(2)(ii) of this section shall:

(1) Conduct an initial performance test to:

(i) Demonstrate compliance with the applicable idling emission limit, and

(ii) Establish parameters that shall be monitored to demonstrate compliance.

(2) Conduct monitoring of the parameters identified in the initial performance test. The required monitoring frequency will be determined by the Administrator and will be based on the variability of the parameters that are established.

(3) Operate solvent cleaning machine within parameters identified in the initial performance test.

(g) Each owner or operator of a batch cold solvent cleaning machine shall:

(1) Employ a tightly fitting cover that shall be closed at all times except during parts entry and removal.

(2) Employ a water layer on the surface of the solvent within the cleaning machine.

(3) Collect and store waste solvent in closed containers. The closed container may contain a device that would allow pressure relief, but would not allow liquid solvent to drain from the container.

§ 63.463 Alternative standards.

(a) As an alternative to meeting the requirements in § 63.462, each owner or operator of a batch vapor or in-line solvent cleaning machine subject to the provisions of this subpart may:

(1) Maintain a log of solvent additions and deletions for each cleaner, and

(2) Ensure that the emissions from each solvent cleaning machine are equal to or less than the limits presented in table 3 of this subpart, as determined using the procedures in § 63.464(b).

(b) Each owner or operator of a batch vapor or in-line solvent cleaning machine complying with § 63.463(a) of this subpart shall demonstrate compliance with the applicable 3-month rolling average monthly emission limit in table 3 of this subpart on a monthly basis, as described in § 63.464(b).

§ 63.464 Test methods.

(a) Each owner or operator of a batch vapor or in-line solvent cleaning machine choosing to comply with § 63.462(b)(1)(ii), (b)(2)(ii), (c)(1)(ii), or (c)(2)(ii) shall determine the idling emission rate of the solvent cleaning machine using Reference Method 307 in appendix A of this part.

(b) Each owner or operator of a batch vapor or in-line solvent cleaning machine choosing to comply with § 63.463(a) shall, on the first day of every month:

(1) Ensure that the solvent cleaning machine system contains only clean liquid solvent,

(2) Using the records of all solvent additions and deletions for the previous monthly reporting period required under § 63.463(a), determine solvent emissions (E_i) using the following equation, except as provided in paragraph (b)(3) of this section:

$$E_i = SA_i - LSR_i - SSR_i \quad (1)$$

where:

E_i=the total solvent emissions from the solvent cleaning machine during the most recent monthly reporting period [kilograms of solvent].

SA_i=the total amount of liquid solvent added to the solvent cleaning machine during the most recent monthly reporting period i, [kilograms of solvent].

LSR_i=the total amount of clean liquid solvent removed from the solvent cleaning machine during the most recent monthly reporting period i, [kilograms of solvent].

SSR_i=the total amount of solvent removed from the solvent cleaning machine in solid waste, as supported by tests conducted using EPA reference method 25d, during the most recent monthly reporting period i, [kilograms of solvent].

(3) Owners or operators for which SSR_i is an unknown can, as an alternative to the method described in paragraph (b)(2) of this section, determine solvent emissions using the following procedure:

(i) Determine SSR_i using the following equation:

$$SSR_i = (EF)(SA_i) - LSR_i \quad (2)$$

where:

SSR_i=the total amount of solvent removed from the solvent cleaning machine in solid waste during the most recent monthly reporting period i, [kilograms of solvent].

EF = an emission factor which has the following values. For existing and new batch vapor cleaning machines: small and medium cleaning machines = 0.41, large and very large cleaning machines = 0.48. For existing in-line cleaning machines = 0.36. For new in-line cleaning machines = 0.48

SA_i=the total amount of liquid solvent added to the solvent cleaning machine during the most recent monthly reporting period i, [kilograms of solvent].

LSR_i=the total amount of clean liquid solvent removed from the solvent cleaning machine during the most recent monthly reporting period i, [kilograms of solvent].

(ii) Use the value of SSR_i obtained from equation (2) to solve for E_i in equation (1).

(4) Determine the monthly rolling average, EA, for the 3-month period ending with the most recent reporting period using the following equation:

$$EA = \frac{\sum_{j=1}^{3} E_j}{3} \quad (3)$$

where:

EA=the average solvent emissions over the preceding 3 monthly reporting periods, (kilograms of solvent/month).

E_j=solvent emissions for each month (j) for the most recent 3 monthly reporting periods (kilograms of solvent).

j=1 = the most recent monthly reporting period.

j=2 = the monthly reporting period immediately prior to j=1.

j=3 = the monthly reporting period immediately prior to j=2.

(c) Each owner or operator of a batch vapor or in-line solvent cleaning machine choosing to use a dwell to comply with § 63.462 shall determine the appropriate dwell for each part or parts basket using the following procedure:

(1) Determine the amount of time for the part or parts basket to cease dripping once placed in the vapor zone.

(2) The minimum proper dwell period is equal to 35 percent of the time determined in paragraph (c)(1) of this section.

§ 63.465 Monitoring procedures.

(a) Except as provided in paragraph (c) of this section, each owner or operator of a batch vapor or in-line solvent cleaning machine complying with § 63.462(b)(1)(i), (b)(2)(i), (c)(1)(i), or (c)(2)(i) shall conduct weekly monitoring of the following control devices:

(1) If a freeboard refrigeration device is used to comply with these standards, the owner or operator shall use a thermometer or thermocouple to measure the temperature at the center of the air blanket while the solvent cleaning machine is in the idling mode.

(2) If a reduced room draft is used to comply with these standards, the owner or operator shall measure the windspeed using the following procedure:

(i) Determine the direction of the wind current by slowly rotating a velometer until the maximum speed is located.

(ii) Orient a velometer in the direction of the wind current at each of the four corners of the machine.

(iii) Record the reading for each corner.

(iv) Average the values obtained at each corner and record the average wind speed.

(3) If a super-heated vapor system is used to comply with these standards, the owner or operator shall use a thermometer or thermocouple to measure the temperature at the center of the solvent vapor zone while the solvent cleaning machine is in the idling mode.

(b) Except as provided in paragraph (c) of this section, each owner or operator of a batch vapor or in-line solvent cleaning machine complying with § 63.462 (b)(1)(i), (b)(2)(i), (c)(1)(i), or (c)(2)(i) shall conduct monthly monitoring of the following control devices, as appropriate:

(1) If a bi-parting cover is used to comply with these standards, the owner or operator shall conduct a monthly visual inspection to determine if the bi-parting cover is opening and closing properly, completely covers the cleaning machine openings when closed, and is free of cracks, holes, and other defects.

(2) If a manual cover is used to comply with these standards, the owner or operator shall inspect the cover monthly to ensure that it is free of cracks, holes, or other defects.

(3) If a hoist is used to comply with these standards, the owner or operator shall determine the hoist speed by measuring the time it takes to travel a measured distance (meters per minute).

(4) If a dwell is used to comply with these standards, the owner or operator shall determine the dwell time by measuring the period of time that parts are held within the freeboard area of the solvent cleaning machine after cleaning.

(c) Each owner or operator using a control device listed in paragraph (a) or (b) of this section can use alternative monitoring procedures approved by the Administrator.

(d) Each owner or operator of a batch vapor or in-line solvent cleaning machine complying with § 63.462(b)(1)(ii), (b)(2)(ii), (c)(1)(ii), or (c)(2)(ii) shall establish monitoring parameters and procedures which demonstrate compliance, and submit such parameters and procedures and other rationale to the Administrator for approval.

§ 63.466 Recordkeeping requirements.

(a) Each owner or operator of a batch vapor or in-line solvent cleaning machine complying with the provisions of § 63.462 shall maintain records of the following for the lifetime of the machine:

(1) Owner's manuals for the solvent cleaning machine and control equipment,

(2) The date of installation for the solvent cleaning machine and all of its control devices,

(3) If a dwell is used to comply with these standards, records of the tests, required in § 63.464(c), used to

determine an appropriate dwell time for each part or parts basket.

(4) Each owner or operator of a batch vapor or in-line solvent cleaning machine complying with the provisions of § 63.462 (b)(1)(ii), (b)(2)(ii), (c)(1)(ii), or (c)(2)(ii) shall maintain records of the initial performance test, including the idling emission rate and values of the monitoring parameters measured during the test.

(b) Each owner or operator of a batch vapor or in-line solvent cleaning machine complying with the provisions of § 63.462 shall maintain records of the results of control device monitoring required under § 63.465(a), (b), (c), and/or (d) either in computerized or written form for a period of 5 years.

(c) Each owner or operator of a batch vapor or in-line solvent cleaning machine complying with the provisions of § 63.463 shall maintain records of the following for a period of 5 years:

(1) The dates and amounts of solvent that is added to the solvent cleaning machine;

(2) The solvent composition of wastes removed from cleaning machines as measured during batch specific tests or as calculated using the procedure described in § 63.464(b)(3); and

(3) Calculation sheets showing how monthly emissions and the rolling 3-month average emissions from the solvent cleaning machine were determined, and the results of all calculations.

§ 63.467 Reporting requirements.

(a) Each owner or operator of an existing batch vapor or in-line solvent cleaning machine subject to the provisions of this subpart shall submit an initial report to the Administrator no later than 90 days after the date of promulgation of this subpart. This report shall include the following:

(1) The name and address of the owner or operator; and

(2) The address (i.e., physical location) of the solvent cleaning machine(s); and

(3) A brief description of each solvent cleaning machine, including machine type (batch vapor, or in-line), solvent/air interface area, and existing controls; and

(4) An estimate of the yearly consumption of halogenated solvents for each solvent cleaning machine.

(b) Each owner or operator of an existing batch cold solvent cleaning machine subject to the provisions of this subpart shall submit an initial report to the Administrator no later than 90 days after the date of promulgation of this subpart. This report shall include the following:

(1) The name and address of the owner or operator; and

(2) The address (i.e., physical location) of the solvent cleaning machine(s); and

(3) A brief description of each solvent cleaning machine, including machine type (such as, carburetor cleaner), solvent/air interface area, and existing controls;

(4) An estimate of the yearly consumption of halogenated solvents for each solvent cleaning machine; and

(5) A statement, signed by the owner or operator of the solvent cleaning machine, stating that the solvent cleaning machine for which the report is being submitted, is in compliance with the provisions of this subpart.

(c) Each owner or operator of a batch vapor or in-line solvent cleaning machine complying with the provisions of § 63.462 shall submit to the Administrator an initial statement of compliance for each solvent cleaning machine within 30 days after the compliance date specified in § 63.460 (b) and (c). This statement shall include the following:

(1) A list of the control equipment used to achieve compliance for each solvent cleaning machine; and

(2) For each piece of control equipment required to be monitored, a list of the parameters which are monitored and the values of these parameters measured on or during the first month after the compliance date; and

(3) Each owner or operator of a solvent cleaning machine complying with the provisions of § 63.462(b)(1)(ii), (b)(2)(ii), (c)(1)(ii), (c)(2)(ii) shall submit a test report for tests of idling emissions meeting the specifications in Method 307 of appendix A of this subpart.

(i) This test must be on the same specific model cleaner used at the source and can be done by the owner or operator or can be supplied by the vendor of that solvent cleaning machine.

(ii) This report must clearly state the monitoring parameters and monitoring frequency required to demonstrate continuous compliance.

(iii) If a solvent cleaning machine vendor test report is used to demonstrate compliance, it shall include the following for the solvent cleaning machine tested: Model name, the date the solvent cleaning machine was tested, serial number, a drawing of the solvent cleaner tested.

(iv) If a solvent cleaning machine vendor test report is used the owner or operator of the solvent cleaning machine shall:

(A) Submit a statement by the solvent cleaning machine vendor that the unit tested is the same as the unit the report is being submitted for; or

(B) Demonstrate to the Administrator's satisfaction that the solvent emissions from the solvent cleaning machine for which the test report is being submitted are equal to or less than the solvent emissions from the solvent cleaning machine in the vendor test report.

(4) Conditions to maintain the wind speed requirements of § 63.462(e)(2)(ii).

(d) Each owner or operator of a batch vapor or in-line solvent cleaning machine complying with the provisions of § 63.463 shall submit to the Administrator an initial statement of compliance for each solvent cleaning machine within 30 days after the compliance date specified in § 63.460 (b) and (c). The statement shall include the results of the first 3-month average emissions calculation.

(e) Each owner or operator of a batch vapor or in-line solvent cleaning machine complying with the provisions of § 63.462 shall submit a control device monitoring report every year beginning one year after the compliance date specified in § 63.460 (b) and (c). This control device monitoring report should contain all of the following:

(1) The results of all control equipment monitoring recorded under § 63.466 (a); and

(2) A signed statement from the facility owner stating that, "All operators of solvent cleaning machines have received training on the proper operation of solvent cleaning machines and their control devices sufficient to pass the test required in § 63.462 (d)(10)."

(f) Each owner or operator of a batch vapor or in-line solvent cleaning machine electing to comply with the provisions of § 63.463 shall submit a solvent consumption report every year. This solvent consumption report shall contain all of the following:

(1) The average monthly solvent consumption for the solvent cleaning machine in kilograms/month; and

(2) The 3-month monthly rolling average solvent consumption estimates calculated each month using the method as described in § 63.464(b)(4).

(g) The owner or operator of an affected facility must submit an exceedance report if any required monitoring or emissions calculations indicate that any applicable requirements of § 63.462 or § 63.463 are not met. This report must be submitted on a quarterly basis for any quarter in which there is an exceedance. This report must include the reason for the exceedance and a description of the repairs performed, if applicable.

§ 63.468 Equivalent methods of control.

Upon written application, the Administrator may approve the use of equipment or procedures after they have been satisfactorily demonstrated to be equivalent, in terms of reducing emissions of halogenated solvents to the atmosphere, to those prescribed for compliance within a specified paragraph of this subpart. The application must contain a complete description of the equipment or procedure and the proposed equivalency testing procedure and the date, time, and location scheduled for the equivalency demonstration.

TABLE 1.—CONTROL COMBINATIONS FOR BATCH VAPOR SOLVENT CLEANING MACHINES WITH A SOLVENT/AIR INTERFACE AREA OF 1.21 SQUARE METERS OR LESS

Option	Control combinations
1	Freeboard ratio of 1.0, freeboard refrigeration device, reduced room draft.
2	Bi-parting cover used during idling and working modes, freeboard frigeration device, reduced room draft.
3	Bi-parting cover used during idling and working modes, freeboard ratio of 1.0, reduced room draft.
4	Freeboard refrigeration device, manual cover used during idling mode, reduced room draft.

TABLE 2.—CONTROL COMBINATIONS FOR BATCH VAPOR SOLVENT CLEANING MACHINES WITH A SOLVENT/AIR INTERFACE AREA GREATER THAN 1.21 SQUARE METERS

Option	Control combinations
1	Bi-parting cover used during idling and working modes, freeboard refrigeration device, reduced room draft.
2	Dwell, freeboard refrigeration device, reduced room draft.
3	Bi-parting cover used during idling and working modes, freeboard refrigeration device, super heated vapor.
4	Freeboard ratio of 1.0, reduced room draft, super heated vapor.
5	Dwell, reduced room draft, super heated vapor.
6	Bi-parting cover used during idling and working modes, reduced room draft, super heated vapor.
7	Bi-parting cover used during idling and working modes, dwell, reduced room draft.

TABLE 3.—EMISSION LIMITS FOR BATCH VAPOR AND IN-LINE SOLVENT CLEANING MACHINES

Solvent cleaning machine	3-month rolling average monthly emission limit (kilograms/square meters-month)
Batch vapor solvent cleaning machines	109.8
Existing in-line solvent cleaning machines	153.2
New in-line solvent cleaning machines	98.5

3. Appendix A to part 63 is amended by adding in numerical order Method 307 to read as follows:

Appendix A to Part 63—Test Methods

* * * * *

Method 307—Determination of Emissions from Halogenated Solvent Vapor Cleaning Machines Using a Liquid Level Procedure

1. Applicability and Principle

1.1 Applicability. This method is applicable to the determination of the halogenated solvent emissions from solvent vapor cleaners in the idling mode.

1.2 Principle. The solvent level in the solvent cleaning machine is measured using inclined liquid level indicators. The change in liquid level corresponds directly to the amount of solvent lost from the solvent cleaning machine.

2. Apparatus

Note: Mention of trade names or specific products does not constitute endorsement by the Environmental Protection Agency.

2.1 Inclined Liquid Level Indicator. A schematic of the inclined liquid level indicators used in this method is shown in Figure 307–1; two inclined liquid level indicators's having 0.05 centimeters divisions or smaller. Glass, Teflon, or any similar material that will not react with the solvent shall be used. A 6-in. x 1-in. slope is recommended; however the slope may vary depending on the size and design of the solvent cleaning machine. **Note:** It is important that the inclined liquid level indicators be constructed with ease of reading in mind. The inclined liquid level indicators should also be mounted such that they can be raised or lowered if necessary to suit the solvent cleaning machine size.

2.2 Horizontal Indicator. Device to check the inclined liquid level indicators orientation relative to horizontal.

2.3 Velocity Meter. Hot-wire and vane anemometers, or other devices capable of measuring the flow rates ranging from 0 to 15.2 meters per minute across the solvent cleaning machine.

3. Procedure

3.1 Connection of the Inclined Liquid Level Indicator. Connect one of the inclined liquid level indicators to the boiling sump drain and the other inclined liquid level indicator to the immersion sump drain using Teflon tubing and the appropriate fittings. A schematic diagram is shown in Figure 307–2.

3.2 Positioning of Velocity Meter. Position the velocity meter so that it measures the flow rate of the air passing directly across the solvent cleaning machine.

3.3 Level the Inclined Liquid Level Indicators.

3.4 Initial Inclined Liquid Level Indicator Readings. Open the sump drainage valves. Allow the solvent cleaning machine to operate long enough for the vapor zone to form and the system to stabilize (check with

manufacturer). Record the inclined liquid level indicators readings and the starting time on the data sheet. A sample data sheet is provided in Figure 307–3.

3.5 Final Inclined Liquid Level Indicators Readings. At the end of the 16 hour test run, check to make sure the inclined liquid level indicators are level; if not, make the necessary adjustments. Record the final inclined liquid level indicators readings and time.

3.6 Determination of Solvent Vapor/Air Interface Area for Each Sump. Determine the area of the solvent/air interface of the individual sumps. Whenever possible, physically measure these dimensions, rather than using factory specifications. A schematic of the dimensions of a solvent cleaning machine is provided in Figure 307–4.

4. Calculations

4.1 Nomenclature.

A_B=Area of boiling sump interface, m^2 (ft^2).

A_I=Area of immersion sump interface, m^2 (ft^2).

A_V=Area of solvent vapor/air interface, m^2 (ft^2).

E=Emission rate, g/m^3-hr (lb/ft^3-hr).

K=100 cm/m for metric units.

=12 in./ft for English units.

L_{Bf}=Final boiling sump inclined liquid level indicators reading, cm (in.).

L_{Bi}=Initial boiling sump inclined liquid level indicators reading, cm (in.).

L_{If}=Final immersion sump inclined liquid level indicators reading, cm (in.).

L_{Ii}=Initial immersion sump inclined liquid level indicators reading, cm (in.).

S_B=Length of the boiling sump, m (ft).

S_I=Length of the immersion sump, m (ft).

S_V=Length of the solvent vapor/air interface, m (ft).

W_B=Width of the boiling sump, m (ft).

W_I=Width of the immersion sump, m (ft).

W_V=Width of the solvent vapor/air interface, m (ft).

ρ=Density of solvent, g/m^3 (lb/ft^3).

θ=Test time, hr.

4.2 Area of Sump Interfaces. Calculate the areas of the boiling and immersion sump interfaces as follows:

$A_B=S_BW_B$ Eq. 307–1

$A_I=S_IW_I$ Eq. 307–2

4.3 Area of Solvent Vapor/air Interface. Calculate the area of the solvent vapor/air interface as follows:

$A_V=S_VW_V$ Eq. 307–3

4.4 Emission Rate. Calculate the emission rate as follows:

$$E=\frac{(L_{B_f}-L_{B_i})\rho A_B+(L_{I_f}-L_{I_i})\rho A_I}{K A_v \theta} \qquad \text{Eq. } 307-4$$

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of Child Support Enforcement

45 CFR Parts 302, 303, and 304

Child Support Enforcement Program: Paternity Establishment

AGENCY: Office of Child Support Enforcement (OCSE), HHS.

ACTION: Notice of proposed rulemaking.

SUMMARY: These proposed rules would implement the requirements of section 13721 of the Omnibus Budget Reconciliation Act of 1993 (Pub. L. 103–66) signed by the President on August 10, 1993, which amend title IV-D of the Social Security Act (the Act). The provisions amend the Act to require States to adopt procedures for a simple civil process for the voluntary acknowledgment of paternity, including early paternity establishment programs in hospitals. For paternity cases that remain contested, the new statutory provisions require States to adopt a variety of procedures designed to streamline the paternity establishment process. These include the use of default orders, a presumption of paternity based on inclusionary genetic test results, conditions for admission of genetic test results as evidence, and expedited decision-making processes for paternity cases in which title IV-D services are being provided.

DATES: Consideration will be given to written comments received by January 28, 1994.

The statute provides that the requirements become effective October 1, 1993, or later if enactment of State law is necessary to conform to the requirements. However, in no event shall the requirements be effective later than the first day of the first calendar quarter beginning after the close of the first regular session of the State legislature that begins after August 10, 1993. In the case of State that has a 2-year legislative session, each year of such session shall be deemed to be a separate regular session of the State legislature.

ADDRESSES: Address comments to: Office of Child Support Enforcement, Department of Health and Human Services, 370 L'Enfant Promenade SW., Washington, DC 20447, Attention: Director, Policy and Planning Division. Comments will be available for public inspection Monday through Friday, 8:30 a.m. to 5 p.m. on the 4th floor of the Department's offices at the above address.

FOR FURTHER INFORMATION CONTACT: Andrew Williams, OCSE Division of Policy and Planning, (202) 401–1467.

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

This rule does not require any information collection activities and, therefore, no approvals are necessary under the Paperwork Reduction Act.

Background

Paternity establishment is a necessary first step in the child support enforcement process in cases where a child is born out-of-wedlock. I addition to child support, paternity establishment may result in other financial benefits, including Social Security benefits, pension benefits, veterans' benefits, and other rights of inheritance. Furthermore, paternity establishment may give children social and psychological and a sense of family heritage, be a first step in creating a psychological and social bond between father and child, and provide important medical history information.

Congress and the Federal government have long recognized the importance of paternity establishment. In 1975, enactment of Title IV–D of the Social Security Act required States to establish public child support agencies. These agencies provided paternity establishment services. The Child Support Enforcement Amendments of 1984 required States to permit paternity to be established until a child's 18th birthday. In 1988, the Family Support Act contained several provisions designed to improve paternity establishment: A performance standard, timeframes for case processing, enhanced funding (90 percent Federal financial participation) for genetic testing, a requirement that States compel all parties in a contested paternity case to submit to genetic testing upon the request of a party, a requirement that states compel each parent to provide his or her social security number as part of the birth certificate issuance process, and a clarification of the expansion of the requirement permitting paternity establishment to 18 years of age.

Partly as a result of these Federal efforts, the number of paternities established each year by the IV–D Child Support Enforcement program has increased substantially from about 270,000 in FY 1987 to over 515,000 in FY 1992—an increase of over 90 percent in just five years. However, about 28 percent American children, over a million children each year, are born to unmarried mothers. Paternity is still not established in a sizable number of these cases. Even in cases where paternity is established, the process is often lengthy and adversarial in nature.

Therefore, the President and Congress decided to further reform the system with the Omnibus Budget Reconciliation Act of 1993. This new statute and these proposed implementing regulations are intended to increase both the number of paternities established for children born out-of-wedlock and the timeliness with which paternity establishment is accomplished. These provisions will increase the number of paternities established by voluntary acknowledgment. However, some cases will remain contested, and these reforms should expedite the process for resolving those cases as well.

Many of these reforms are based on innovative State practices and recommendations of the U.S. Commission on Interstate Child Support. The Interstate Commission was created by Congress as part of the Family Support Act of 1988 to recommend ways of improving the interstate establishment and enforcement of child support awards. In 1992, the Commission issued its comprehensive final report to the Congress which contained numerous recommendations, including recommendations for improving paternity establishment in both interstate and intrastate cases.

Because Congress added the newly-mandated practices to section 466(a) of the Act, they are requirements which States must meet as a condition of State plan approval under section 454 of the Act. We propose to add the new State plan requirements to 45 CFR 302.70. Each State's title IV–D plan must be approved for the State to receive Federal financial participation in the operation of its Child Support Enforcement program.

Statutory Authority

These proposed regulations are published under the authority of section 466(a) of the Social Security Act (the Act), as amended by the Omnibus Budget Reconciliation Act of 1993. Section 466(a)(2), as amended, eliminates the State option for including paternity establishment in expedited processes, thereby requiring States to include paternity establishment in expedited processes. New subsection 466(a)(5)(C) requires States to have laws and procedures for a simple civil process for voluntarily acknowledging paternity under which the State must provide that the rights and responsibilities of acknowledging paternity are explained and ensure that

due process safeguards are afforded. Such procedures must include a hospital-based program for the voluntary acknowledgment of paternity during the period immediately preceding or following the birth of a child. New subsection 466(a)(5)(D) requires States to have laws and procedures under which the voluntary acknowledgment of paternity creates a rebuttable, or at the option of the State, conclusive presumption of paternity, and under which such voluntary acknowledgment is admissible as evidence of paternity. New subsection 466(a)(5)(E) requires States to have laws and procedures under which the voluntary acknowledgment of paternity must be recognized as a basis for seeking a support order without first requiring any further proceedings to establishing paternity.

New subsection 466(a)(5)(F) requires States to have laws and procedures which provide that (i) any objection to genetic test results must be made in writing within a specified number of days before any hearing at which such results may be introduced into evidence, and (ii) if no objection is made, the test results are admissible as evidence of paternity without the need for foundation testimony or other proof of authenticity or accuracy. New subsection 466(a)(5)(G) requires States to have laws and procedures which create a rebuttable or, at the option of the State, conclusive presumption of paternity upon genetic testing results indicating a threshold probability of the alleged father being the father of the Child.

New subsection 466(a)(5)(H) requires States to have laws and procedures requiring a default order to be entered in a paternity case upon a showing of service of process on the defendant and any additional showing required by State law. New section 466(a)(11) requires States to have laws and procedures under which the State must give full faith and credit to a determination of paternity made by any other State, whether established through voluntary acknowledgment or through administrative or judicial processes. These proposed regulations are also published under the general authority of section 1102 of the Act, which requires the Secretary to publish regulations that may be necessary for the efficient administration of the functions for which she is responsible under the Act.

In addition to the provisions discussed in this proposed rule, the new statue also revises the paternity establishment performance standard which States must meet. The performance standard will be dealt with separately in another rule.

Description of Regulatory Provisions

In developing this proposed rule, we were cognizant of the fact that the President has created a White House Working Group on Welfare Reform, Family Support, and Independence that is examining how to strengthen the Child Support Enforcement program. However, this proposed rule is based on existing law and does not attempt to anticipate future statutory change or recommendations that may emanate from the Working Group.

Required State Laws—Section 302.70(a)

Section 466(a) of the Act requires a State to enact laws providing for these new requirements. Consistent with implementation of the Family Support Act requirements, however, States may implement provisions using regulation, procedure, or court rule, instead of law, if such regulation, procedure, or rule has the same force and effect under State law on the parties to whom they apply.

To simplify the regulatory language, we propose to delete effective dates of IV–D State plan requirements currently listed in 45 CFR 302.70(a). Each IV–D State plan requirement, including the new paternity ones, remains effective on the date indicated by the statute or implementing regulation.

Simple Civil Process for Voluntarily Acknowledging Paternity—Sections 302.70(a)(5)(iii) and 303.5(a)

We propose to implement the requirements of new section 466(a)(5)(C) of the Act by amending 45 CFR 302.70(a)(5) to add new paragraph (iii). This provision would require each State to have laws and procedures for a simple civil process for voluntarily acknowledging paternity. Under such process, the State must provide that the rights and responsibilities of acknowledging paternity are explained and ensure that due process safeguards are afforded. This requirement builds upon the Family Support Act of 1988, which encouraged simple civil procedures for the voluntary acknowledgment of paternity, by making such procedures mandatory. Studies and State experience have shown that many men will voluntarily acknowledge paternity if given the opportunity. When paternity is established voluntarily with the cooperation of both parents, the cost, conflict, and delays of contested cases can be avoided. Most, if not all, States already have some type of voluntary acknowledgment procedures in place, but this new law should ensure that these procedures are simple and are regularly used.

As part of the voluntary acknowledgment procedures, States would be required to explain to both parents the rights and responsibilities of acknowledging paternity and afford due process safeguards, including any due process requirements under State law. As long as the explanation meets State due process requirements, it may be verbal or in writing. However, we recommend that States list the rights and responsibilities of acknowledging paternity, including the duty to financially support the child, on the acknowledgment form or other written materials. This disclosure of rights should be clear and easily understood.

The statute requires that the voluntary acknowledgment procedures include hospital-based programs. (Such hospital-based programs are discussed more extensively later in this preamble). However, because the statute includes hospital-based programs as part of a broader requirement for voluntary acknowledgment procedures, we believe that Congress intended these procedures to encompass more than just the hospital-based programs. Therefore, we propose to require at new 45 CFR 302.70(a)(5)(iii)(B) that the procedures include a process for voluntarily acknowledging paternity outside of hospitals.

The voluntary acknowledgment process should be available at any time to any father who wants to voluntarily acknowledge paternity. Ideally, States will allow fathers multiple opportunities to voluntarily acknowledge at any stage in the process. Even if a man is initially reluctant to voluntarily acknowledge parentage because he is unsure whether he is actually the father, he may be willing to do so after receiving genetic test results which indicate a high probability of paternity.

Acknowledgment form. States may choose various simple civil methods for obtaining voluntary acknowledgments. At a minimum, however, proposed 45 CFR 302.70(a)(5)(iii)(D) would require each State to have a voluntary acknowledgment form or affidavit. Such forms are already used by many States. The voluntary acknowledgment form must include, at a minimum, instructions for filing the acknowledgment with the designated agency (see below for discussion on filing acknowledgments with the designated agency) and lines for the parents' social security numbers and addresses. In addition, proposed 45 CFR 302.70(a)(5)(iii)(C) would require States

to have laws and procedures requiring that a voluntary acknowledgment be signed by both parents, and that the parents' signatures be authenticated by a notary public or witness(es).

The requirements at proposed 45 CFR 302.70(a)(5)(iii)(C) and (D) are meant to ensure that States' voluntary acknowledgment contains these basic elements, States should be able to legally recognize and act upon acknowledgments obtained in other States, which should improve interstate case processing. In addition, the social security numbers and addresses may provide valuable locate and identifying information. States can meet the requirements of proposed 45 CFR 302.70(a)(5)(iii)(C) and (D) by developing and mandating the use of a form which contains the required elements, signature lines for both parents, and signature lines for a notary public or witness(es).

Filing acknowledgments. Proposed 45 CFR 302.70(a)(5)(iii)(E) would require the State to have laws and procedures for filing voluntary acknowledgments with either the State IV–D agency or a centralized State agency that provides the State IV–D agency access to copies of, and identifying information on, the acknowledgements. If the agency is not the IV–D agency, it may be the vital statistics agency, a registry of putative fathers, or some other type of registry or agency. Instead of allowing a State to have multiple filing agencies (such as local courts), we proposed to require that the filing agency be a centralized entity so that it will be easier to match acknowledgements with IV–D cases and control access to the acknowledgments.

If a State chooses its vital statistics agency (or similar agency responsible for birth registration) as its filing agency, it may want to link the filing process with procedures for including the father's name on the birth certificate. In some States, a voluntary acknowledgment is a sufficient basis to list the acknowledging man as the child's father on the birth certificate. The filing of voluntary acknowledgments with a vital statistics agency may also be a way of obtaining social security numbers from parents as required during the birth registration process by section 205(c)(2)(C)(ii) of the Social Security Act. Proposed 45 CFR 302.70(a)(5)(iii)(D) would require that voluntary acknowledgment forms include lines for parents' social security numbers.

Under this provision, a State's procedures would not have to require that a completed and notarized acknowledgment be filed with the appropriate agency in order to be a valid acknowledgement. Moreover, the procedures do not have to require that any particular party or agency file the acknowledgments (except for hospital-based programs as required by proposed 45 CFR 303.5(g)(2)(iv) and explained later in this preamble). However, proposed 45 CFR 302.70(a)(5)(iii)(D) would require that the State include on acknowledgment forms instructions for filing the acknowledgment with the designated agency. As a result, the parties would be aware of the filing procedures and could easily file the acknowledgment themselves. If a State's filing agency is its vital statistics agency (or similar agency responsible for birth registration), it may choose to link these filing instructions with instructions for adding the father's name to the birth certificate.

The purpose of filing acknowledgements with an agency is to ensure that the IV–D agency has access to copies of acknowledgments so that it can use the acknowledgments to establish and enforce child support in cases where the parents voluntarily acknowledged paternity prior to the case becoming a IV–D case. If the acknowledgments are filed with an agency other than the IV–D agency, that agency would be required to give the IV–D agency access to identifying information and copies of filed acknowledgements. This identifying information should include sufficient information to enable the IV–D agency to determine if an acknowledgment matches a IV–D case—for example, names and social security numbers. The identifying information should enable the IV–D agency to match IV–D cases needing paternity establishment with voluntary acknowledgments previously filed with the designated agency. If allowable under State law, a State may also choose to give access to other agencies, other than the IV–D agency, that may benefit from the paternity records (e.g., agencies which need the records to establish benefit claims, such as Social Security).

To ensure that voluntary acknowledgments are used in IV–D case processing, proposed 45 CFR 303.5(h) would compel each IV–D agency to determine, in cases needing paternity establishment, if a voluntary acknowledgment has been filed with the agency designated by the State in accordance with 45 CFR 302.70(a)(5)(iii)(E). This would include acknowledgments obtained through hospital-based programs. Once a IV–D agency matches a case with a voluntary acknowledgment filed with the designated agency, it would then use that acknowledgment to seek a support order in IV–D cases. A State may use any means it chooses to determine if a voluntary acknowledgment has been filed with the designated agency. A IV–D agency would not need to make this determination in cases where it already has a copy of a voluntary acknowledgment. Under proposed 45 CFR 302.70(a)(5)(iii)(E), the IV–D agency should have access to identifying information concerning men who have acknowledged paternity and copies of acknowledgments filed with the appropriate agency. We encourage States to develop automated means for matching cases and obtaining information from the appropriate agency where acknowledgments are filed. If necessary, the IV–D agency should enter into a cooperative agreement with the designated agency responsible for filing acknowledgments in order to obtain copies of acknowledgments and identifying information.

FFP Availability for filing Agency. Federal financial participation (FFP) would not be available for the costs of establishing or maintaining a separate agency where acknowledgments are filed, unless that agency is the IV–D agency. While we would not pay FFP for the operational costs of the filing agency, FFP would be available for the costs of determining if a filed acknowledgment matches a IV–D case and for establishing cooperative arrangements. Under current 45 CFR 304.20(b)(2)(i), which allows FFP for costs associated with reasonable efforts to determine the identity of a child's father, FFP would be available for costs the IV–D agency incurs in determining whether a voluntary acknowledgment has been filed with the designated agency in IV–D cases needing paternity establishment. Federal financial participation would also be available, under current 45 CFR 304.20(b)(1)(iii) for the costs of establishing a cooperative arrangement (in accordance with 45 CFR 302.34 and 303.107), governing the routine exchange of information regarding acknowledgments, between the IV–D agency and the agency where acknowledgments are filed.

IV–D agency activity. To reflect the newly-mandated procedures for the voluntary acknowledgment of paternity, proposed 45 CFR 303.5(a) would require, for all cases referred to the IV–D agency or applying for services under 45 CFR 302.33 in which paternity has not been established and a voluntary acknowledgment of paternity has not been obtained, the IV–D agency must: (1) Provide an alleged father the opportunity to voluntarily acknowledge paternity in accordance with 45 CFR

302.70(a)(5)(iii), and (2) attempt to establish paternity by legal process established under State law if he fails to voluntarily acknowledge paternity.

Under this requirement, the IV–D agency must offer the alleged father the opportunity to voluntarily acknowledge paternity. The IV–D agency should advise the man that the mother has named him as the father of the child, describe the procedures for voluntarily acknowledging paternity, and advise him of his rights. Before contacting the alleged father, States could require a sworn statement of the mother or some other evidence of paternity to substantiate the mother's claim.

In order to satisfy this requirement, the IV–D agency must document in the case record the date on which the alleged father is sent or given notice of the paternity action and the opportunity to voluntarily acknowledge. Child support staff may contact the alleged father by telephone, written notice, or in person as appropriate under the circumstances and State law.

Written notice may be given by mail, personal service, or other means; however, it must be addressed specifically to the individual alleged father. We strongly encourage that language in written notices be "reader-friendly": i.e., clear and easy to understand. Many of the States which currently use such notices ask the father to come to the IV–D agency for a conference or hearing where the may voluntarily acknowledge. The conference allows IV–D staff to explain, in person, the rights and responsibilities associated with the establishment of paternity. Designated agency personnel would be available to serve as witnesses for, or notarize, signatures on voluntary acknowledgments. Alternatively, at least one State allows the parents to return the completed acknowledgement form to the IV–D office by mail; the parents may have their signatures notarized at a local bank or other entity.

A IV–D agency might want to inform the alleged father at the time it provides him an opportunity to voluntarily acknowledge that formal paternity establishment action will begin if the alleged father does not voluntarily acknowledge within a specified timeframe. Furthermore, this proposed rule would not prevent a IV–D agency from combining service of process necessary for a legal paternity determination with the offer of the opportunity to voluntarily acknowledge. For example, some States serve a notice or claim of alleged paternity and support obligation on the putative father, informing him of the opportunity to voluntarily acknowledge he may consent to genetic testing and subsequently acknowledge paternity. If the man fails to voluntarily acknowledge, the State can then adjudicate paternity based on the initial notice without the need for serving process a second time.

If an alleged father refuses or is reluctant to voluntarily acknowledge paternity, States could encourage genetic testing. Some men who will not voluntarily acknowledge will consent to genetic testing. States could adopt procedures for conducting testing, if the alleged father consents, prior to a formal filing of an action to establish paternity with the court of administrative authority. Even in cases where the main is initially unwilling to voluntarily acknowledge, he may consent to genetic testing and subsequently acknowledge paternity if the test results show a high probability of paternity, without the need for a hearing or formal adjudication.

We propose to delete the existing program standard timeframes for establishing paternity at 45 CFR 303.5(a). These timeframes are no longer necessary given the proposed inclusion of paternity establishment in the expedited process timeframe. It would be duplicative to retain the paternity timeframe since the same time period is covered by the proposed expedited process timeframe. (See discussion under expedited process section later in this preamble.)

Hospital-Based Paternity Establishment Programs—Sections 302.70(a)(5)(iii)(A), 303.5(g), 304.20(b)(2), and 304.23(d)

Experience of States has indicated that a father of a child born to an unmarried mother is more likely to be present and to admit paternity during the time surrounding birth than later on. Early paternity establishment reduces location difficulties and administrative costs which can occur if paternity establishment is delayed. The earlier paternity is established, the sooner the child will have access to the father's medical benefits, medical history information, a relationship with the father, child support, and other benefits resulting from paternity establishment.

In enacting the Omnibus Budget Reconciliation Act of 1993, the President and Congress recognized the importance of establishing a child's paternity as close in time to birth as possible, but requiring hospital-based programs for obtaining voluntary acknowledgements. Proposed 45 CFR 302.70(a)(5)(iii)(A) would implement section 466(a)(5)(C) of the Act by requiring each State to have laws, regulations, and/or binding procedures for a hospital-based program for the voluntary acknowledgment of paternity during the period immediately preceding or following the birth of a child.

About half of the States already have or are developing hospital-based programs to obtain voluntary acknowlegments of paternity (although often on less than a statewide basis). Even some hospitals in States without organized programs have, for years, accepted voluntary acknowledgments of paternity from patients and alleged fathers. Typically, in an organized program, trained hospital employees provide information about paternity establishment to the parents, inform them of their rights, and give the putative father the opportunity to voluntarily acknowledge paternity. Such programs have been quite effective in obtaining voluntary paternity acknowledgments; some hospital-based programs have successfully obtained voluntary acknowledgments for about 40 percent of their out-of-wedlock births. Preliminary results from OCSE-funded program improvement projects in New York City and Denver confirm the success of hospital-based programs in obtaining voluntary acknowledgments. Some States with programs have also documented savings in administrative costs that would otherwise typically be incurred in paternity establishment. In developing these proposed regulations, OCSE met with officials from established hospital-based programs in several States.

Because Congress added the hospital-based program requirement to section 466(a) of the Act, all States must provide for a hospital-based program by law, regulation and/or binding procedures. This approach is consistent with implementation of Family Support Act requirements. It is also consistent with the differing experience of States that have already implemented hospital-based programs—some found legislation to be useful; others were successful in implementing programs administratively.

At a minimum, proposed 45 CFR 302.70(a)(5)(iii)(A) would require that State law, regulation, and/or binding procedure compel all public and private birthing hospitals to participate in hospital-based programs as defined in § 303.5(g)(2). At State option, State law may include an enforcement mechanism for dealing with noncompliance by hospitals. However, under existing 45 CFR 302.70(d), a State could apply for an exemption from enacting a law, regulation, or binding procedure providing for a hospital-based program, if the State documents that it has

already implemented a hospital-based program otherwise meeting Federal requirements in every birthing hospital in the State without the necessity of enacting binding laws or regulations.

We proposed to define birthing hospital in 45 CFR 301.1 as a hospital that has a licensed obstetric care unit or is licensed to provide obstetric services, or a licensed birthing center associated with a hospital. Since we do not believe programs should be mandated in hospitals (such as geriatric hospitals) that do not routinely provide maternity services, we propose limiting the hospital-based program requirement to hospitals with an obstetric care unit or licensed to provide obstetric services. In the definition of birthing hospital, we also include birthing centers associated with a hospital. A birthing center is a facility outside a hospital that provides maternity services. Generally, such centers use midwives and provide services for women who expect no complications during birth. Frequently, a hospital will provide back-up services to a birthing center if complications develop. Since in some localities, a significant number of births occur in birthing centers, we believe voluntary acknowledgment programs should be established in such centers that are associated with hospitals.

Proposed 45 CFR 303.5(g) describes the State's responsibilities in implementing the hospital-based program. To accommodate divergent State practices, we propose that the State as a whole rather than the IV–D agency in particular be responsible for meeting the hospital-based program requirements in proposed 45 CFR 303.5(g). In some States with an existing hospital-based program, the State health department, not the IV–D agency, has primary responsibility or shares responsibility for the program. In other States, the IV–D agency has primary responsibility. We do not want to interfere with or disrupt the operation of existing, successfully-functioning programs. Therefore, the requirements in proposed 45 CFR 303.5(g) place responsibility on "the State" rather than the "IV–D agency." This approach is consistent with the statute, which does not require that the IV–D agency be directly responsible for the implementation of hospital-based programs, but in no way relieves the State of the responsibility to meet Federal requirements as a condition of IV–D State plan approval.

First, proposed 45 CFR 303.5(g)(1) would require the State to establish, in cooperation with hospitals, a hospital-based program in every public and private birthing hospital. We recognize that States need some time to fully implement these programs. States must have laws, regulations and/or binding procedures in place on October 1, 1993 (or if legislation is required, the beginning of the first calendar quarter after the close of the first regular session of the State legislature that begins after August 10, 1993.

However, even if a State needs to enact legislation, it may begin working to implement the program immediately by contacting hospitals and appropriate agencies and developing forms, written materials, and training procedures. The programs must be operational in birthing hospitals statewide no later than January 1, 1995. Depending on their circumstances, this gives States over a full year after the Federal mandate's effective date to gear up to a statewide program. As of January 1, 1995, any State needing legislation for its hospital-based program will have completed its first legislative session (as defined by the statute) since enactment of the Omnibus Budget Reconciliation Act of 1993 and had the opportunity to pass legislation. We would view January 1, 1995 as an outer limit; States are encouraged to proceed more expeditiously in light of the magnitude of the problem this new law is intended to address.

As part of the process of establishing hospital-based programs, IV–D agencies could enter into cooperative arrangements (in accordance with 45 CFR 302.34 and 303.107) or other contracts with birthing hospitals or other State agencies. A State could also hire a contractor to implement the hospital-based program. We encourage the State to work closely with the State hospital association; State staff that have implemented existing programs indicate that the hospital association was a key player in implementation.

Elements of a hospital-based program. Proposed 45 CFR 303.5(g)(2) defines a hospital-based program by listing the services and functions that such a program must, at a minimum, provide during the period immediately preceding or following the birth of a child to an unmarried woman in the hospital. These services are based on the experience provided by States that have already implemented hospital-based programs. The State must ensure, in cooperation with the hospitals, that the program performs all of these functions.

We are proposing that each hospital-based program provide services to unmarried mothers and alleged fathers. A program would not be required to provide services to married mothers. In most cases where a child is born to a married mother, paternity is not at issue. If the mother of a newborn is married, her husband is presumed to be the father of the child. In some cases, the husband may not actually be the biological father and paternity may be an issue. We do not propose that a hospital-based program be required to intervene in such complex cases; however, it may do so at State option. At least one State has adapted its hospital-based program to address such cases. This State has developed forms which allow the husband to rebut the presumption that he is the father and allow the other man to acknowledge his paternity. Using these procedures, the State has been able to obtain a significant number of voluntary acknowledgments.

Under proposed 45 CFR 303.5(g)(2)(i), a hospital-based program would provide to both the mother and alleged father, if he is present in the hospital: (A) Written materials about paternity establishment, (B) the forms necessary to voluntarily acknowledge paternity, (C) a written description of the rights and responsibilities of acknowledging paternity, and (D) the opportunity, prior to discharge from the hospital, to speak with staff, either by telephone or in person, who are trained to clarify information and answer questions about paternity establishment.

The written description of rights and responsibilities may be included in either the written materials or on the forms, or may be a separate document. The written materials, forms, and description of rights and responsibilities should ensure that the parents of every child born in a birthing hospital to an unmarried couple receive information about paternity establishment, along with the forms necessary to pursue voluntary paternity establishment. Hospitals already distribute a variety of materials and forms to patients, and providing paternity materials and forms could be incorporated into their existing procedures. The State would provide the materials and forms to the birthing hospitals in accordance with proposed 45 CFR 303.5(g)(4).

The opportunity to speak with staff in person or via telephone, as required in proposed 45 CFR 303.5(g)(2)(i)(D), should allow the parents to ask questions or seek assistance in completing the voluntary acknowledgment forms, if necessary. The staff could either be hospital staff (e.g., medical social workers, medical records technicians, or medical provider staff), IV–D, or other agency staff. Most existing programs use hospital staff.

Under proposed 45 CFR 303.5(g)(2)(ii), a hospital-based program would provide the unmarried mother

and alleged father, if he is present, the opportunity to voluntarily acknowledge paternity in the hospital. Each program is encouraged to make staff available, including during evening and weekend visiting hours, to ensure that all unmarried mothers and alleged fathers present at the hospital are afforded this opportunity. If paternity acknowledgment forms must be notarized under State law or procedure, notaries (designated hospital staff in some ongoing programs) should be available to notarize acknowledgments in the hospital.

The parents must be given the chance to acknowledge paternity regardless of the child's public assistance status or whether an application has been filed for IV–D child support services. In many cases, a mother will not have applied for IV–D services or public assistance prior to her child's birth. However, if the case eventually enters the IV–D program, child support establishment and enforcement will be expedited and administrative costs avoided if the father has previously acknowledged paternity.

A hospital-based program, under proposed 45 CFR 303.5(g)(20(iii), would afford due process safeguards. As mentioned, proposed 45 CFR 303.5(g)(2)(i)(C) would require a hospital-based program to provide each unmarried mother and alleged father a written description of the rights and responsibilities of acknowledging paternity. Beyond this minimum requirement, a hospital-based program should ensure that State due process requirements are met. We recommend that staff be trained to ensure that the voluntary aspect is promoted and maintained. Alleged fathers should not be pressured into signing acknowledgments.

If either the mother or the man does not agree that the man is the father, the hospital-based program need not intervene. Hospital workers should not be required to mediate disputes between parties. If a party in a case wishes to establish paternity without the cooperation of the other party, he or she could contact the IV–D agency or a private attorney.

Under proposed 45 CFR 303.5(g)(2)(iv), a hospital-based program must forward completed acknowledgments to the agency designated by the State in accordance with proposed 45 CFR 302.70(a)(5)(iii)(E). This will ensure that the IV–D agency has access to and can use the acknowledgments in cases that become IV–D cases.

Although not a requirement, States may want to incorporate the opportunity for genetic testing into its hospital-based program. A readily available testing capability may encourage additional fathers to voluntarily acknowledge or expeditiously resolve any doubts as to paternity. At least one State plans to pilot-text genetic testing in hospitals. Another State routinely obtains stipulations in the hospital where both parties agree to undergo genetic testing at a later date.

Withholding services in some cases. Proposed 45 CFR 303.5(g)(3) would allow a hospital-based program to withhold services related to acknowledging paternity, when necessitated by State law, in cases where the mother or alleged father is a minor or a legal action (e.g., adoption) is already pending. Some States may have laws which prohibit voluntary acknowledgments of paternity by minors, or the State may want hospital-based personnel to avoid interference in cases where a legal action is pending. Therefore, the hospital-based program would not be required to provide services to the mother and alleged father in such cases, if provision of services is prohibited by State law. However the services listed in 45 CFR 303.5(g)(2) should be provided to other unmarried parents.

Written materials and forms. The State itself must provide certain services to support the hospital-based programs. Proposed 45 CFR 303.5(g)(4) would require the State to provide to all public and private birthing hospitals in the State written materials about paternity establishment, forms necessary to voluntarily acknowledge paternity, and a written description of the rights and responsibilities of acknowledging paternity. Hospital-based programs would then distribute these materials and forms to unmarried mothers and alleged fathers in accordance with proposed 45 CFR 303.5(g)(2)(i). The State would be responsible for ensuring that the birthing hospitals have a sufficient supply of these items to distribute them to unmarried mothers and alleged fathers upon birth of a child.

The written materials about paternity establishment could be brochures, pamphlets, or similar materials that describe the benefits of paternity establishment and the consequences of a voluntary acknowledgment.

The forms necessary to voluntarily acknowledge paternity may be the same forms that are used to voluntarily acknowledge paternity outside of the hospital setting. A voluntary acknowledgment form must meet the requirements in proposed 45 CFR 302.70(a)(5)(iii) (C) and (D)—i.e., a voluntary acknowledgment must be signed by both parents with their signatures authenticated by a notary public or witness(es), and the form must include, at a minimum: instructions for filing the acknowledgment with the designated agency in accordance with 45 CFR 302.70(a)(5)(iii)(E) and lines for the parents' social security numbers and addresses.

The description of rights and responsibilities may be a separate document or included on the other written materials or forms. It should describe rights that each party is giving up by signing the acknowledgment. It should also describe the rights and responsibilities, including the duty to support the child financially, that each party will assume as a result of signing the acknowledgment. These rights and responsibilities will vary by State, depending on State law.

In order to ensure that the materials are easily understandable to the intended audience, they should be clearly written. States with large non-English speaking populations are encouraged to provide materials in languages other than English.

Although not a requirement, States may also want to provide applications for, and materials relating to, IV–D services to hospitals for distribution to maternity patients, in order to encourage unmarried mothers to apply for IV–D services. Although mothers may decide not to apply for IV–D services while in the hospital, they may decide to apply for services sometime after leaving the hospital. A mailing address on the application could indicate where the form should be mailed once completed.

Training, guidance, and written instructions. Proposed 45 CFR 303.5(g)(5) would require the State to provide training, guidance, and written instructions regarding the voluntary acknowledgment of paternity as necessary to operate the hospital-based program. State could use training sessions, written instructions or handbooks, audio or video tapes, technical assistance provided via telephone, or other means to meet this requirement. Regardless of the method, the State should ensure that staff, as they assume the responsibility, are instructed on the operations of the program. One State with an existing program has provided formal training every few years, while providing technical assistance and guidance via telephone and written instructions to supplement the training sessions. Another State is developing a videotape

for training hospital-based program staff.

Annual assessment. Finally, proposed 45 CFR 303.5(g)(6) would require the State to assess each birthing hospital's program on at least an annual basis. To assess each program, we suggest that States examine data regarding the number of out-of-wedlock births and the number of voluntary acknowledgments in each hospital. This data is already collected by vital statistics agencies in some States. At least one State with an existing program uses such data to monitor each hospital. If the State Identifies a birthing hospital with few or no acknowledgments, it contacts the hospital to identify the problem, if any, and takes action (e.g., staff training or technical assistance) to correct the problem. The intent of this requirement is not to establish performance quotas or to create pressure for hospitals to obtain acknowledgments, but rather to ensure that hospitals are operating effective programs.

FFP Availability for hospital-based programs. We propose that Federal financial participation (FFP) be available for certain costs associated with hospital-based programs. First, under current 45 CFR 304.20(b)(1)(iii), FFP would be available for the costs associated with establishing necessary agreements between the IV–D agency and birthing hospitals or other State agencies. Second, FFP would be available for IV–D staff that work on developing and implementing (e.g., training, drafting materials, meeting with hospital officials) the hospital-based program. Third, under an existing policy issuance, FFP is available for a nominal payment per acknowledgment to birthing hospitals to help defray administrative costs. We propose to codify this policy in regulation at 45 CFR 304.20(b)(2)(vi), which would make FFP available for payments of $20 or less to birthing hospitals for each voluntary acknowledgment obtained through a hospital-based program as defined by proposed 45 CFR 303.5(g)(2). Several States have found such payments to be successful in demonstrating "good faith" and obtaining the cooperation of hospitals. However, States would not be required to provide payments to hospitals, although FFP would only be available for payments actually made. The $20 per voluntary acknowledgment is also available for voluntary acknowledgments obtained in other entities that provide prenatal or birthing services. Fourth, proposed 45 CFR 304.20(b)(2)(vii) would make FFP available for the costs of developing and providing to birthing hospitals and other entities that provide prenatal or birthing services written and audiovisual materials about paternity establishment and forms necessary to voluntarily acknowledge paternity.

Finally, proposed 45 CFR 304.20(b)(2)(viii) would make FFP available for reasonable and essential short-term training regarding voluntary acknowledgment of paternity associated with a State's hospital-based program as defined by 45 CFR 303.5(g)(2). Although the training must be short-term in order to eligible for FFP, the training may be provided on a periodic basis so that new staff will also receive the short-term training. We propose to revise 45 CFR 304.23(d), which limits the availability of FFP for training to specific circumstances, to allow for FFP as provided for in proposed 45 CFR 304.20(b)(2)(viii).

FFP would be available for the costs of developing and providing materials and forms as well as for the costs of training, as described above, regardless of whether these services are provided through a contractor or directly by the State.

Consistent with current policy, FFP would not be available for other costs, including hospital operational and staff costs. Except in limited and clearly defined circumstances as already enunciated, we do not believe that other costs of hospitals, health care providers, vital statistics agencies, or public educational programs should be financed through the IV–D program. If a public entity other than the IV–D agency develops or distributes the paternity establishment materials, provides nominal payments per acknowledgment, or provides training to hospital-based program staff, that entity must have a cooperative arrangement (in accordance with 45 CFR 302.34 and 303.107) in order for the State to receive FFP for these activities.

We encourage but do not require States to extend their hospital-based programs beyond birthing hospitals to clinics, health departments, and other facilities. Since a mother's stay in a hospital after birth is relatively short, parents may benefit from receiving information about paternity establishment before birth, in prenatal clinics for example. To encourage the expansion of early paternity establishment programs beyond hospitals, we are proposing that FFP be available for developing and providing materials about paternity establishment and forms necessary to acknowledge, not only to hospitals, but to other entities that provide prenatal or birthing services. Similarly, we propose that FFP be available for payments of $20 of less, not only to birthing hospitals, but to other entities that provide prenatal or birthing services and obtain a voluntary acknowledgment.

Effect of Voluntary Acknowledgment: Presumption of Paternity; Admissible as Evidence—Section 302.70(a)(5)(iv)

We are proposing to implement the requirements of new section 466(a)(5)(D) of the Act by adding 45 CFR 302.70(a)(5)(iv). This provision would require each State to have laws and procedures under which the voluntary acknowledgment of paternity creates a rebuttable or, at the option of the State, conclusive presumption of paternity, and under which such voluntary acknowledgment is admissible as evidence of paternity.

Currently, the legal effect of a voluntary acknowledgment varies from State-to-State. Under the Uniform Parentage Act, which has been adopted by 18 States, an acknowledgment filed with the appropriate court or agency creates a presumption of paternity. In other States, however, an acknowledgment may simply be considered some evidence of paternity. In a few States, a voluntary acknowledgment has the same force and effect as a paternity judgment. This proposed regulation would ensure that voluntary acknowledgments are meaningful and used to expedite paternity establishment in every State.

A presumption is a rule of evidence by which finding of a basic fact gives rise to a presumed fact, until the presumed fact is rebutted. In this situation, the existence of a voluntary acknowledgment of paternity gives rise to a presumption of paternity. A rebuttable presumption can be overturned by sufficient proof. In a paternity case, a rebuttable presumption of paternity would shift the burden of proof to the presumed father to disprove paternity, if he chooses to contest paternity after the acknowledgment. A conclusive presumption would have the same legal effect as a judgment for paternity. If a State enacts laws under which a voluntary acknowledgment creates a conclusive presumption, the State may still allow challenges, just as judgments can be challenged (e.g., in cases where there is evidence that the acknowledgment was obtained by fraud or coercion, or where signatures were forged).

Conditions for Admission of Genetic Test Results as Evidence—Section 302.70(a)(5)(v)

Although the combined effect of the various provisions discussed above should increase the number of

paternities established by voluntary acknowledgment, some cases will remain contested. The Omnibus Budget Reconciliation Act of 1993 and this proposed rule contain provisions designed to expedite such contested cases.

In recent years, scientific advancements in genetic testing have revolutionized the paternity determination process in contested cases. Genetic tests can produce exclusionary evidence eliminating a man from consideration as the biological father or provide convincing evidence reflecting the high probability that he is the alleged father (inclusionary results), leaving little or no doubt as to whether an alleged father is actually the biological father. Statutory or case law in virtually all States provides that genetic test results are admissible as evidence. However, in some States, the process for admitting such evidence can be cumbersome.

Proposed 45 CFR 302.70(a)(5)(v), which would implement new section 466(a)(5)(F) of the Act, would improve the process for admitting rest results in legal proceedings. It would require each State to have laws and procedures which provide that any objection to genetic testing results must be made in writing within a specified number of days before any hearing at which within a specified number of days before any hearing at which such results may be introduced into evidence. Further, laws and procedures must specify that if no objection is made, a written report of the test results is admissible as evidence of paternity without the need for foundation testimony or other proof of authenticity or accuracy.

This provision would have two major benefits. First, it would prevent last-minute challenges to genetic test results. Last minute challenges are particularly difficult to meet since they may require testimony from laboratory technicians and experts who often live out-of-state and must travel long distances.

Second, in cases where no objection is timely raised, this provision would expedite the process of allowing a written report of the genetic test results to be admitted as evidence without the need for foundation testimony. Some States currently have cumbersome foundation requirements (e.g., requiring the testimony of every person involved with the chain of custody of the blood sample) that are unnecessary if no objection to the test results is raised. This proposed rule would not lower the standards for admission of genetic test results in evidence, but would prohibit a party from objecting to the admission of the test results, unless an objection is raised in a timely fashion.

Under the proposed regulation, States would have flexibility to set the timeframe within which objections must be made prior to a hearing. The U.S. Commission on Interstate Child Support recommended a 21-day timeframe. Several States already have requirements under which genetic test results are admissible as evidence without foundation testimony unless objected to within a specified timeframe. At least four States have a timeframe that requires an objection to genetic test results be made at least 20 days prior to trial; two States require objections to be made at least 30 days prior to trial.

At least four other States have timeframes, but these timeframes allow objections within a specified number of days of "receiving a copy of the testing report" on "after service of the written test results". Since these timeframes do not require objections to be raised within a specified period prior to the hearing, they will need to be modified in order to meet the requirements of the Omnibus Budget Reconciliation Act of 1993 and the proposed implementing regulations at 45 CFR 302.70(a)(5)(v). Some other States have statutes which require objections to be raised "within the time limit" or "within the time allowed by the court". Such statutes will need to be modified to include a specified number of days or, alternatively, court rules should specify the number of days allowed. Finally, some State statutes include timeframes for raising objections to genetic test results but do no explicitly indicate that a written report of such results is admissible as evidence without foundation testimony if no objection is raised. A State, through statute, regulation, or binding procedure, must meet both parts of this requirement.

While this proposed rule requires that genetic test results be admissible without foundation in cases where no objection is raised, the judge or decisionmaker who determines matters of fact still must decide what weight to accord the test results in a particular case in light of other evidence presented. Moreover, this provision does not prevent a State or its tribunals from setting standards for laboratory accreditation or procedures and parameters regarding what type of tests can be admissible as evidence. While we encourage all States to admit genetic testing results that have proven to be reliable, we recognize that as new testing technologies are developed, there may be a need to critically examine new procedures in the scientific community and in the courts before test results from such procedures are used on a widespread basis.

Presumption of Paternity Based on Genetic Test Results—Section 302.70(a)(5)(vi)

New section 466(a)(5)(G) of the Act and proposed implementing regulation 45 CFR 302.70(a)(5)(vi) would require each State to have laws and procedures which create a rebuttable or, at the option of the State, conclusive presumption of paternity based on genetic testing results which indicate a threshold probability of the alleged father being the father of the child.

Just as a voluntary acknowledgement would create a presumption of paternity (discussed earlier), genetic test results that meet or exceed a specific threshold probability, determined by the State, would create a presumption of paternity. A presumption of paternity should expedite paternity resolution in cases where a presumption is established. A rebuttable presumption would shift the burden of proof to the presumed father to disprove a paternity allegation. A conclusive presumption would have the same effect as a judgment for paternity. If a State chooses to adopt a conclusive presumption, it may provide for conditions under which the presumption, like a judgment, can be challenged and potentially overturned (e.g. in cases where the wrong man is tested or the test results, after timely objection, are proven to be incorrect). In the vast majority of cases, however, a threshold probability test result will eliminate the necessity of extensive hearings. If there is, on rare occasions, a serious allegation of fraudulent testing or inaccurate analysis, then, repeat testing should simply be ordered.

States would be allowed the flexibility to designate the specific threshold probability that creates a presumption of paternity. This threshold probability is the probability based upon analysis of genetic test results that the alleged father is the biological father of the child (i.e., the "inclusion" probability). It should not be confused with the laboratory's statistical capability of excluding a certain percentage of those men who are incorrectly identified as the father (i.e., the "exclusion" probability). A growing number of States, currently about half, have adopted a presumption of paternity standard based on genetic test results. State statutory threshold probabilities generally range from 95 to 99 percent. We recommend that the remaining States choose a standard within this range. If the inclusion

probability equals or exceeds the threshold, then the burden of proof shifts to require the alleged father to prove non-paternity. Many States have contracts with genetic testing laboratories that require a battery of tests to be performed sequentially and only as necessary until the alleged father has been excluded or the threshold probability for establishing a presumption of paternity under State law has been attained. Each additional genetic market that is examined eliminates an additional segment of the population from the pool of men who have the requisite genetic characteristics to be the child's biological father. If the alleged father remains in that genetic pool, each additional test performed incrementally increases the likelihood of inclusionary probability that he is the child's father.

The presumption based on genetic test results required by proposed 45 CFR 302.70(a)(5)(vi) and the presumption based on a voluntary acknowledgment required by proposed 45 CFR 302.70(a)(5)(iv) are minimum requirements. States may certainly establish or rely on additional presumptions. The Uniform Parentage Act (UPA), a model State law that has been adopted by approximately 18 States, contains several presumptions of paternity. For instance, under the UPA, if, while the child is under the age of majority, the man receives the child into his home and openly holds out the child as his natural child, he is presumed to be the natural father of the child.

In some cases, the presumption of paternity created by genetic test results may conflict with a presumption created by a voluntary acknowledgment, a presumption of legitimacy created by marriage, or another presumption. For example, a child born to a married woman is presumed to have been fathered by the woman's husband in most States; however, genetic test results could create a presumption that another man is actually the father. Several States have enacted choice of law provisions to address these conflicting presumptions. The Uniform Parentage Act provides that if two or more presumptions arise which conflict with each other, the presumption which, on the facts, is founded on the weightier considerations of policy and logic controls.

Voluntary Acknowledgment or Genetic Test Results Meeting or Exceeding State's Threshold Probability Is Basis for Seeking Support Order—Sections 302.70(a)(5)(vii) and 303.4(d)

We propose to implement new section 466(a)(5)(E) of the Act by adding 45 CFR 302.70(a)(5)(vii). This provision would require each State to have laws and procedures under which a voluntary acknowledgment or genetic test results meeting or exceeding the State's threshold probability (established in accordance with 45 CFR 302.70(a)(5)(vi)) must be recognized as a basis for seeking a support order without first requiring any further proceedings to establish paternity.

As a result, filing of a petition seeking a support order and information-gathering necessary for support order establishment should begin in a IV–D case as soon as a voluntary acknowledgment is obtained or genetic test results meeting or exceeding the State's threshold are received. This should help ensure that the child receives financial support at the earliest possible date.

In many States, once the father voluntarily acknowledges paternity or genetic test results establish a presumption of paternity, a court or administrative agency must legally establish paternity by taking further action, such as filing or ratifying the acknowledgment or issuing a paternity order. This proposed rule would not prohibit States from having such procedures as long as action to seek a child support order begins as soon as paternity is acknowledged or genetic test results meeting or exceeding a State's threshold are received. Moreover, we encourage States to combine paternity and support order establishment in the same proceeding, if both are needed in a case. In cases where a presumption of paternity has been created by a voluntary acknowledgment or genetic test results meeting or exceeding the State's threshold, a man seeking to challenge and rebut the presumption could be given the opportunity to do so during the support order proceeding. This would allow the State to collapse the final determination of paternity into the same proceeding as order establishment.

Alternatively, a State may choose to establish support awards on the basis of a rebuttable presumption of paternity, without converting the presumption to a paternity order. At least one State currently uses this approach for presumptions established by voluntary acknowledgment. However, advocates and some States have expressed concern that basing support orders on presumptions of paternity, without ever making a final determination of paternity, makes it easier for the father to deny paternity at a later point and may cause difficulty in interstate cases. Therefore, States that choose to establish a support order solely on the basis of a presumption of paternity may want to consider a one- or two-year statute of limitations for rebutting a presumption of paternity. On the other hand, even a judgment of paternity may be overturned under certain circumstances (e.g., if it was obtained under fraud or coercion), and the experience of States suggests that few men attempt to rebut presumptions of paternity, particularly in cases where the presumption was created by a voluntary acknowledgment.

To reflect that a voluntary acknowledgment or genetic test results meeting or exceeding the State's percentage threshold must serve as sufficient basis to seek establishment of a support order, we propose to revise 45 CFR 303.4. Proposed 45 CFR 303.4(d) would require the IV–D agency, in cases where a support order has not been established, to seek a support order based on a voluntary acknowledgment or genetic test results meeting or exceeding the State's threshold probability in accordance with 45 CFR 302.70(a)(5)(vii). Therefore, the IV–D agency would gather information and establish support administratively or by consent or file a petition for support order establishment upon receipt of a voluntary acknowledgment of paternity or genetic test results meeting or exceeding the State's threshold.

Proposed 45 CFR 303.4(d) would eliminate the existing program standard timeframe for support order establishment, in light of the proposed revisions to the timeframe for expedited process. The proposed expedited process timeframe would begin with location of the noncustodial parent, just as the existing program standard timeframe at 45 CFR 303.4(d) does. Therefore, the expedited process timeframe would include the period currently covered by the program standard timeframe. As a result, the program standard timeframe is unnecessary. (See more detailed explanation in section on expedited process later in this preamble).

Default Orders—Sections 302.70(a)(5)(viii) and 303.5(f)

We propose to implement the requirements of new section 466(a)(5)(H) of the Act by adding 45 CFR 302.70(a)(5)(viii). Under this provision, each State must have laws and procedures requiring a default order to be entered in a contested paternity case upon a showing that process has been served on the defendant in accordance with State law, that the defendant has failed to appear at a hearing or trial (if the notice required such an appearance) or respond within

a reasonable period of time specified by the State (if the notice required a response), and any additional showing required by State law. The use of default orders creates an incentive for alleged fathers to cooperate with the adjudication of contested paternity cases, resulting in fewer delays. In those cases where the man fails to appear or respond, default orders allow the paternity case to move forward. A State would be required to provide for judicial default orders if its court system handles contested paternity cases, and administrative default orders if an administrative entity processes its contested cases.

Most States already have provisions for entry of judgments by default as part of their civil procedure code or statute. At least eleven States also have default provisions that apply specifically to paternity cases. However, the circumstances under which a default order can be entered vary. Depending upon the State, a default order may be entered when the alleged father: (1) Fails to appear at a scheduled hearing, conference, or trial, (2) fails to respond to a notice that requires a response, such as a notice alleging the man's paternity, and/or (3) fails to appear for or refuses to submit to genetic testing. The extent to which default orders are actually used also varies from State to State. In many States with default provisions, the provision is permissive, allowing but not requiring the tribunal to enter a default order.

Under this proposed rule, State law, regulation, or binding procedure would have to require tribunals to enter default orders establishing paternity in cases where the alleged father failed to appear at a hearing or to respond to notice or service within the reasonable period of time specified by the State for answering or pleading. State law would have to require, not simply allow, tribunals to enter default orders under these conditions. States could choose to go beyond this minimum requirement, for example, by compelling tribunals to enter default orders in cases where a father fails to cooperate with blood or tissue drawing necessary for genetic testing.

Before entering a default order, however there would have to be a proper showing of service of process and any additional showing necessary under State law. We recommend that States require some evidence of paternity, perhaps a prima facie case based on the mother's testimony, before entering a default order. In interstate cases, an affidavit or a petition, signed by the mother, should be enough. States may want to specify in law, as at least one State currently does, that a default order may not be entered if there is more than one alleged father unless the default applies to only one of them and all others have been excluded by the results of genetic testing. We also recommend that States have procedures for challenging and overturning default orders, and notify the man of this process if a default order is entered. For example, under one State's law, a default order does not take effect until ten days after entry of the default, allowing time for the man to show good cause for his failure to take appropriate action (respond to notice or appear at hearing).

To reflect the new default order requirement, we propose to add 45 CFR 303.5(f). It would require that the IV–D agency must seek entry of a default order by the court or administrative authority in a paternity case by showing that process has been served on the defendant, that the defendant has failed to appear at a hearing or respond within a reasonable period of time specified by the State, and any additional showing required by State law, in accordance with proposed 45 CFR 302.70(a)(5)(viii).

Full Faith and Credit of Paternity Determinations—Sections 302.70(a)(11)

We are proposing to implement the requirements of new section 466(a)(11) of the Act by adding 45 CFR 320.70(a)(11). This provision would require each State to have laws and procedures under which the State must give full faith and credit to a determination of paternity made by any other State, whether establishment through voluntary acknowledgment or through administrative or judicial processes.

Under the principle of full faith and credit, an out-of-State paternity judgment is given the same force and effect in other States as it is given in the State of origin. When a State gives full faith and credit to another State's paternity judgment, it honors the terms of that judgment. This provision should improve interstate processing since a responding State, upon receiving a paternity determination made by another State, must recognize that determination and move forward with the next step (e.g., support order establishment or enforcement) without questioning or revisiting the paternity issue.

A responding State would have to recognize a determination of paternity made by another State if that determination constitutes a legal paternity establishment in the other State, regardless of the method (e.g., administrative process, judicial process, voluntary acknowledgment, or conclusive presumption based upon genetic test results) used for determining paternity. For example, in some States, a voluntary acknowledgment or genetic test results meeting or exceeding a specified threshold may have the same force and effect as a judgment for paternity. In such cases, the responding State would have to give full faith and credit to such acknowledgment or test results. In an interstate case, if paternity had been determined by an acknowledgment or test results having conclusive effect, the initiating State should notify the responding State that paternity had already been established in accordance with its or another State's law.

Expedited Processes for Paternity Establishment—Sections 302.70(a)(2) and 303.101

The Child Support Enforcement Amendment of 1984 required States to have expedited processes within their judicial or administrative systems for obtaining and enforcing child support orders. At the option of the State, expedited processes could also include action for establishment of paternity. Expedited process case processing timeframes, established by regulation, have been effective in promoting States to adopt expedited administrative and quasi-judicial processes for establishing and enforcing support orders. According to the IV–D State plans, 19 States have also opted to extend expedited processes to paternity establishment. However, in many jurisdictions the paternity establishment process, particularly in contested cases, is still protracted. Many jurisdictions process paternity primarily through the courts where both cumbersome procedures and dilatory tactics by the father can create delays.

To address this problem, the Omnibus Budget Reconciliation Act of 1993 amended section 466(a)(2) of the Act to mandate use of expedited processes for establishing paternity. We propose to implement this new provision by revising 45 CFR 302.70(a)(2) to require each State to have laws and procedures for expedited processes to establish paternities, in addition to the previously-mandated expedited processes for establishing and enforcing child support obligations.

As specified in section 466(a)(2) of the Act, expedited processes are defined in regulations of the Secretary. The provision of the Act regarding expedited processes for support order establishment and enforcement has been implemented by 45 CFR 303.101. We propose to amend these regulations to

require expedited processes for paternity establishment. We also propose to delete existing 45 CFR 303.101(b)(3), which gave States the option of including paternity establishment in their expedited processes, since expedited processes for handling paternity cases are now mandatory.

As with the existing expedited processes for support order establishment and enforcement, under expedited paternity establishment processes both interstate cases must be included as required by 45 CFR 303.101(b(1).

Paternity and support establishment timeframe. The regulatory definition of expedited process is based on timeframes—States must process IV–D cases within specified timeframes in order to be determined to be operating an expedited process. Because the Omnibus Budget Reconciliation Act of 1993 mandates that expedited processes by expanded to include paternity establishment, and because the regulatory definition of expedited process is based on timeframes, we have decided to reexamine existing expedited process and program standard timeframes.

Although paternity establishment is currently not included in expedited process under existent rules, there are two timeframes governing paternity under standards for program operations (see chart below). First, the current 45 CFR 303.5(a)(1) is an "Up-front" timeframe governing IV–D agency activity. It allows the IV–D agency 90 calendar days, from the date of location the absent father, to file for paternity establishment or serve process (or document unsuccessful efforts), whichever occurs later in accordance with State procedures. Second, existing 45 CFR 303.5(a)(2) is a "back-end" timeframe governing court or administrative agency activity. It allows an expedited process (quasi-judicial or administrative agency) one year, from successful service of process or the child turning six months of age, to establish paternity or exclude the alleged father.

There are also two sets of timeframes for support order establishment. First, there is an "up-front" timeframe at existing 45 CFR 303.4(d) for IV–D agency activity. It allow the IV–D agency 90 calendar days, from establishing paternity or locating the obligor, to establish a support order (by consent) or complete service of process (or document unsuccessful efforts) to establish an order. Second, there are expedited process timeframes for support order establishment at existing 45 CFR 303.101(b) governing activity within the States quasi-judicial or administrative agency. Expedited process timeframes were designed to ensure that cases are adjudicated expeditiously in the State's court or administrative system. Under current regulation, a State's process or combination of processes is expedited when it completes support order establishment from service of process to disposition in 90 percent of all cases in 3 months, 98 percent in 6 months, and 100 percent in 12 months. These timeframes also apply to enforcement actions.

EXISTING TIMEFRAMES FOR PATERNITY AND ORDER ESTABLISHMENT

Action needed	Reg cite	Starting point	Time period	Ending point
Paternity Establish	303.5(a)(1)	Located	90 calendar days	File for paternity or SOP, whichever later.
	303.5(a)(2)	SOP or child's sixth month	1 year	Paternity established or man excluded.
Support Order Establish	303.4(d)	Paternity establishment or locate.	90 calendar days	Support order established or SOP.
	303.101(b)	Service of process	90% in 3 months 98% in 6 months 100% in 1 year	Support order established/recorded or action dismissed.

SOP=Service of process; if agency is unable to serve process it may document unsuccessful efforts.

We considered adding paternity establishment to the existing expedited process timeframe structure, perhaps by requiring that paternity establishment be completed from service of process to disposition in 90 percent of cases in 3 months, 98 percent in 6 months, and 100 percent in 12 months. However, this approach would create a number of problems. First, having a separate timeframe with paternity establishment as an "endpoint" suggests that States may have separate proceedings for paternity establishment and support order establishment and potentially well over two years to complete both processes. To avoid this potential delay, we prefer, as mentioned, that States establish paternity and support orders in the same proceeding, if both actions are needed.

Second, the existing expedited process timeframes begin with service of process—a starting point that may be inappropriate in paternity cases. Under current practice, States serve process at various points in the paternity establishment proceeding. If the expedited paternity process timeframe started with service of process, States which serve process as a first step in case processing would count voluntary acknowledgments received as a response to service of process as "successes" under their expedited processes. On the other hand, States which only serve process after attempting and failing to obtain a voluntary acknowledgment would not be able to count voluntary acknowledgments received prior to service as "successes" under expedited process. Since a significant number of paternities are established via voluntary acknowledgment (and more will be as a result of this new statute), this difference would have an impact on States' compliance rates with the expedited paternity establishment requirement. It would be unfair to States that attempt to obtain voluntary acknowledgments prior to service and may encourage States to adjudicate cases without first attempting to obtain voluntary acknowledgments.

Third, the existing expedited process timeframe includes an absolute standard—100 percent of cases must be disposed of within the time period. This absolute standard is unrealistic in paternity cases given the complex nature of *some* contested cases. If a IV–D agency failed to process even one complex case within the timeframe, it would not meet the standard.

Given the foregoing difficulties with adding expedited paternity establishment to the existing timeframe structure, we propose to replace the existing timeframes for paternity and support order establishment at 45 CFR 303.4(d), 303.5(a)(1), 303.5(a)(2), and 303.101(b) with one new timeframe (see

chart below). A State would have to meet this proposed timeframe in order to have an expedited process for paternity establishment and support order establishment. The timeframe, at proposed 45 CFR 303.101(b)(2)(i), would apply to IV–D cases needing support order establishment, regardless of whether paternity has been established. It would require that actions to establish support obligations be completed from the date of locating the alleged father or noncustodial parent to the time of disposition within the following timeframes: (A) 75 percent in 9 months; (B) 85 percent in 12 months; and (C) 90 percent in 15 months. Disposition would be defined at 45 CFR 303.101(b)(2)(iv) as the date on which a support obligation is officially established and/or recorded or action is dismissed. In interstate cases, this timeframe would begin on the date of locating the alleged father or noncustodial parent in the responding State.

PROPOSED TIMEFRAME FOR PATERNITY AND/OR ORDER ESTABLISHMENT

Action needed	Starting point	Time period	Ending point
Paternity and/or Order Establish	Locate	75% in 9 months 85% in 12 months 90% in 15 months	Support order established/recorded or action dismissed.

This proposed timeframe is based on the following goals and rationale. The proposed approach has several advantages over incorporating expedited paternity establishment into the existing timeframe structure. First, it avoids dual timeframes for paternity and support order establishment, thereby strongly encouraging States to establish paternity and support in the same proceeding in cases where both actions are needed. The endpoint of the timeframe is either the date a support order is established/recorded or the date action is dismissed. Therefore, in cases where paternity and support order establishment are needed, the IV–D agency must accomplish both actions within the timeframe (unless action is dismissed). In addition, having one timeframe that encompasses both paternity and support order establishment provides an incentive for States to aggressively pursue early paternity establishment through hospital-based and similar programs. If paternity is established or acknowledged in a case at-birth, the State will have a head-start on meeting the proposed expedited process timeframe if the case later becomes a IV–D case, since one timeframe applies regardless of whether or not paternity has been established.

Second, the proposed timeframe begins with location, not service of process. Therefore, the timeframe would have a uniform starting point no matter which procedures a State uses or at what point it serves process. The proposal would not penalize States for attempting to obtain a voluntary acknowledgment prior to service of process in a paternity case.

Third, by replacing four timeframes with one, the proposed rule makes time standards for paternity and support establishment simpler and easier to understand. All activity to establish paternity and support would be covered in one timeframe once location occurs. The timeframe governing paternity and support establishment would be in one section of the regulation (45 CFR 303.101) rather than spread-out over three sections (45 CFR 303.4, 303.5, and 303.101).

Fourth, the timeframe give States greater flexibility while still assuring expeditious results. By eliminating the program standard timeframe for establishing support orders at 45 CFR 303.4(d) and for paternity at 303.5(a), IV–D agencies will no longer have to achieve interim steps (such as service of process) within a specified timeframe, as long as they accomplish the end result (establish/record support order) within the overall timeframe. Therefore, the proposed timeframe is more results-oriented than the existing standards.

The tiered-nature of the proposed timeframe (75%, 85%, and 90%) is similar to the existing expedited process timeframe. These tiers recognize that some cases take longer than others; they require that a significant number of cases be processed within the shortest tier of the timeframe, but allow longer for some cases. The first tier is 75 percent—the traditional audit standard that has been used for evaluating criteria other than the expedited process timeframes. The highest standard in the proposed timeframe is 90 percent of cases, not 100 percent as in the existing expedited process requirement. By not imposing an absolute standard (100% of cases), the proposed rule recognizes that there are complex cases, particularly some contested paternity cases, that cannot be accomplished within this time period.

The 90% standard is also justified because we propose to delete existing provisions which allow IV–D agencies to exclude complex cases from expedited process and which exempt unsuccessful service of process cases from timeframes. We propose to delete existing 45 CFR 303.101(b)(4) which allows the State, if the case involves complex issues requiring judicial resolution, to establish a temporary support order under expedited processes and then refer the unresolved issues to the full judicial system for resolution. Since the proposed expedited process timeframe includes a 90 percent standard rather than a 100 percent standard, States should be able to handle all cases by expedited processes without establishing temporary orders.

As mentioned, we also propose to delete the program standard timeframes for paternity and support order establishment at 45 CFR 303.4(d) and 303.5(a). These timeframes exempt cases where the IV–D agency documents unsuccessful attempts to serve process in accordance with the State's guidelines defining diligent efforts under 45 CFR 303.3(c). The proposed timeframe would not exempt such cases. In cases where the IV–D agency is initially unsuccessful in serving process, the IV–D agency would have to continue attempting service until successful and complete case processing within the proposed timeframe unless the IV–D agency determines and documents that further locate activity is needed before process can be served.

The length of the proposed timeframe is based on careful consideration of several factors. We took into account all of the steps in the paternity and support establishment processes. For paternity establishment, we considered that in some cases time is needed for contacting the alleged father to offer the opportunity for him to voluntarily acknowledge; serving process; scheduling and conducting genetic testing; completing discovery; and scheduling and conducting trials or hearings. We also considered the amount of time that it takes for a IV–D agency to obtain test results from genetic testing laboratories in paternity

cases. According to laboratories that we contacted, it takes about 3 weeks to receive the written report of results from the lab in a typical case. We encourage States to seek a quicker turnaround time when negotiating contracts with laboratories.

For support order establishment, we considered that time may be needed for contacting the noncustodial parent; attempting stipulation to an order; serving process; collecting income data and other information needed to determine the award amount; calculating the guidelines amount; and scheduling and conducting trials or hearings. Many of these steps required for support order establishment can be accomplished in conjunction with paternity establishment in cases requiring both paternity and support order establishment. For example, a IV–D agency should be able to serve process necessary for paternity and support order establishment at the same time.

We contacted national organizations and State IV–D agencies to obtain whatever information exists regarding the amount of time it typically takes, overall, to establish paternity and support orders. We also looked at data gathered in OCSE audits.

However, few, if any, States currently have an array of laws which includes all of the required features of the revised Federal statute. Although each reform, by itself, should expedite paternity establishment, the combined effect of adopting the entire array of requirements holds tremendous potential for expediting the process.

In particular, the mandated voluntary acknowledgment procedures should allow States to establish paternity quickly in many cases. Studies show that about a third of alleged fathers will voluntarily acknowledge paternity simply as a result of being given the opportunity. Even more fathers will acknowledge if genetic testing is completed and the test results show a high probability of paternity. A study of one locality in the early 1980s, at a time when genetic testing was less powerful than it is using today's technology, found that about 90% of alleged fathers voluntarily acknowledged paternity after receiving genetic test results that showed a probability of paternity.

For those cases that remain contested, the proposed regulations regarding default orders, admissibility of genetic tests, and presumptions of paternity based on genetic test results should all help to expedite the paternity determination process in contested cases. According to conversations with representatives from genetic testing laboratories, genetic testing excludes approximately 25 to 30 percent of tested men; the IV–D agency will be able to count each exclusion as a completed action under expedited process if the paternity action is dismissed.

States may certainly go beyond the basic requirements of this proposed rule and utilize a variety of other reforms to expedite the process for both paternity establishment and support order establishment. These reforms include use of administrative procedures, court hearing officers, more efficient case scheduling, pretrial conferences, and improved coordination between the IV–D agency and the courts. In paternity cases, States may also want to seriously reexamine the necessity of allowing a jury trial. At least one State, for instance, has a law which provides that the alleged father does not have the right to demand a jury trial if genetic test results show a probability of paternity of 99 percent or higher.

Just as the use of voluntary acknowledgment procedures in paternity cases should facilitate expeditious establishment of paternity, the use of stipulations and consent judgments should help expedite support order establishment, helping IV–D agencies to meet the proposed timeframe. Some States have laws which permit the alleged father to a sign a stipulation both acknowledging paternity and consenting to entry of a child support judgment. In cases where such consent judgments are obtained, the amount of support must be determined in accordance with the State's guidelines for setting child support awards as specified under 45 CFR 302.56.

Encouraging the use of long-arm jurisdiction. In developing the proposed timeframe, we considered its impact on the use of long-arm jurisdiction. Federal policy has encouraged the use of long-arm jurisdiction over nonresidents in child support matters. Long-arm allows one State to maintain control over the case without having to rely on other States to take action. In paternity cases, Federal regulations at 45 CFR 303.7(b)(1) require a State to use its long-arm statute, if it has such a statute, where appropriate. The Federal Office of Child Support Enforcement has also encouraged States to use long-arm in support establishment cases. The Uniform Interstate Family Support Act (UIFSA), a model State statute designed to replace the Uniform Reciprocal Enforcement of Support Act (URESA) that has already been adopted by several States, contains a broad long-arm provision.

Cases brought under long-arm jurisdiction may require some additional work to establish jurisdiction over a nonresident. Therefore, IV–D agencies may have more difficulty meeting the proposed expedited process timeframe in long-arm cases. Because we do not want the proposed timeframe to force a IV–D agency to refer a case involving a nonresident alleged father/obligor to the State of his residence rather than asserting local jurisdiction over him whenever possible, we propose that a State be given "credit" for disposing of a case using long-arm jurisdiction. Under proposed § 303.101(b)(2)(iii), for purposes of the expedited process timeframe for paternity and support order establishment, in cases where the IV–D agency uses long-arm jurisdiction and disposition occurs within 15 months of locating the alleged father or noncustodial parent, the case may be counted as a success within either the 9, 12, or 15 month tier of the timeframe, regardless of when disposition occurs.

Disposition. As previously mentioned, disposition is the endpoint of the proposed expedition process timeframe for paternity and support establishment. We propose to define "disposition" in regulation at 45 CFR 303.102(b)(2)(iv) as the date on which a support obligation is officially established and/or recorded or action is dismissed. This definition codifies policy previously stated at OCSE–AT–88–19. There may be paternity establishment cases where, under State law or procedures, it is inappropriate to establish a support order (e.g., if the noncustodial parent is a minor, disabled, or incarcerated). Such a case would still be counted as a disposition if a duty to support is established within the timeframe.

Children younger than six months of age. The existing one-year paternity establishment timeframe at 45 CFR 303.5(a)(2) includes an exception for cases needing paternity establishment where the child is less than six months old. Under this exception, the timeframe does not begin in a case until the child reaches six months of age. The exception reflects the practice of waiting to draw blood samples for certain genetic tests until after the infant is at least six months old.

The proposed timeframe at 45 CFR 303.101(b)(2)(i) does not include this exception; the timeframe would begin with the date of locating the alleged father regardless of the age of the child. At the time that the six-month-old-child exception was included in regulation, we indicated, in the preamble to the Standards for Program Operations final rule, that in the future we would reexamine the exception in light of testing which does not require the child

to be six months old (54 FR 32301). We have now reexamined the exception and propose to delete it.

According to genetic testing laboratories that we contacted, genetic tests are valid when performed on a child under six months of age, as long as certain tests are not used. The American Association of Blood Banks (AABB) states that children under six months of age should not be tested for two serum protein genetic markers (Gm and Km). Testing for these markers could reveal maternal typings, rather than those of the child, in cases involving infants. However, many other tests, including red blood cell antigens, leukocyte antigens (HLA) and DNA can be accurately performed on infants.

Although difficulty may be encountered in drawing a sufficient quantity of blood from a small infant in some cases, new technology helps to address this problem. This technology includes: DNA testing which can be performed using a single spot of blood, DNA buccal swabs where samples are taken on a swab from the baby's mouth, and umbilical cord sampling where blood samples are taken from the newborn's umbilical cord.

In light of the availability of such technologies, we propose that the proposed timeframe begin with locating the alleged father, regardless of whether the child is younger than six months of age. We believe this will encourage States to initiate the paternity establishment process as soon as possible in each case. We invite comments on this change.

We are also interested in receiving comments on any other aspect of the proposed timeframe for paternity and support order establishment.

Enforcement timeframes. The current expedited process timeframes at existing 45 CFR 303.101(b)(2) apply to enforcement actions. Therefore, currently, from the date of service of process, disposition must occur within 3 months for 90 percent of cases, 6 months for 98 percent of cases, and 12 months for 100 percent of cases. As mentioned, we propose to delete this timeframe.

There are also enforcement timeframes at existing 45 CFR 303.6(c)(2) which apply to enforcement actions other than wage withholding and State/Federal income tax refund offset. These timeframes require enforcement action within no more than 30 calendar days (if service of process is not needed) of identifying a delinquency or other support-related noncompliance, or location of the absent parent, whichever is later.

Existing enforcement timeframes at 45 CFR 303.100 apply to wage withholding cases. These regulations, for example, include timeframes for sending advance notice to the obligor in initiated withholding cases, timeframes for procedures to contest withholding, and timeframes for interstate wage withholding.

For IV–D cases requiring enforcement action, we propose to replace the existing expedited process timeframe with existing timeframes at 45 CFR 303.6(c)(2) and 303.100. Proposed 45 CFR 303.101(b)(2)(ii) would require that, in order for a State to have an expedited process for enforcement, actions to enforce the support obligation must be completed within the timeframes specified in 45 CFR 303.6(C)(2) and 303.100 in IV–D cases where a support obligation has been established.

While the preamble to the Program Standards regulation indicated that the 30/60 calendar day timeframes at 45 CFR 303.6(c)(2) would apply to "consent procedures and administrative procedures such as debt collection, telephone contact, demand letters, or publication of names", we propose that this timeframe now apply to *all* enforcement techniques other than wage withholding and State/Federal income tax refund offset. This would include, but not be limited to imposing liens on real or personal property; requiring the obligor to post security, bond, or other guarantee to secure payment of overdue support; reporting delinquency information to a consumer credit agency; withholding unemployment compensation; and State remedies. The timeframes at 45 CFR 303.100 would apply to wage withholding cases.

Judges as Presiding Officers. We propose to delete the existing requirement at 45 CFR 303.101(a) which prohibits using a judge as a presiding officer in carrying out expedited processes by deleting the phrase "and under which the presiding officer in not a judge of the court." With this change, expedited processes would be defined in 45 CFR 303.101(a) as administrative or expedited judicial processes or both which increase effectiveness and meet processing timeframes. We are proposing that this definition apply to expedited processes for paternity establishment as well as support order establishment and enforcement.

With the addition of paternity establishment to expedited processes, it is necessary to remove the prohibition against the use of judges as presiding officers. Currently, most States use judges in the majority of paternity cases. Even States that effectively use an administrative process within the executive branch of government to process uncontested cases frequently transfer contested cases to the judicial system. If the Federal government were to suddenly and completely ban the use of judges as presiding officers in paternity establishment cases, the disruption caused by this abrupt change should offset the benefits of including paternity establishment in expedited process. Our proposed approach gives States more flexibility while still achieving the desired outcome—expeditious processing of cases. By allowing States to use judges, States will have the option to carry out the duties of a presiding officer by either a judge or a judge surrogate, according to their needs. A judge surrogate may be a hearing officer, referee, court master or other decision make outside of the traditional court system, by an extension of the court.

Allowing the use of judges as presiding officers is consistent with the statute. As specified in the Act, States already have the option of using processes in effect under the State judicial system or under State administrative processes for expedited processes as long as actions are performed in an effective and timely manner. The Act does not prohibit using a judge as the presiding officer for expedited processes.

The legislative history suggests that Congress did no intend to prevent the use of judges, but rather to expedite case processing. In enacting the 1984 Amendments, Congressional conferees specified that the expedited process provision "does not mandate a particular procedure nor authorize the Federal agency to impose its views on the details of State court organization. What is required is that States adopt structures and procedures which will ensure that child support and paternity actions are processed in an expeditious manner." As a result, we propose that the State be able to use judges to process cases as long as it meets the expedited timeframes and other Federal requirements.

Since judges can carry out more functions than judge surrogates, use of judges of the court may actually expedite the process in some jurisdictions, particularly in paternity establishment cases. As indicated in the final regulation implementing the Child Support Enforcement Amendments of 1984 (50 FR 19608), "We believe that Congress allowed States to exclude paternity establishment from their expedited processes to ensure that jurisdictions that wanted to have judges hear paternity cases were able to do so

* * *. States may * * * delegate more authority to (the presiding officer) based on their particular needs * * *. A State must delegate enough authority to presiding officers to allow them to perform in a truly expedited manner."

This proposed revision is in no way a suggestion that States abandon established quasi-judicial or administrative processes, nor is it meant to discourage other States from implementing such procedures. Many States have found administrative process to be crucial in expediting case processing. States currently using their judicial systems for paternity and child support cases may need to reconsider their present decision-making process in order to meet the proposed expedited process timeframes. Our intent in allowing judges to serve as presiding officers is to maximize the State's capability of operating a child support program that is effective and efficient and meets the needs of children.

By deleting the requirement that a presiding officer may not be a judge, the number of requests for exemptions for expedited processes will be reduced. In the case of expedited processes, a separate exemption is required for each political subdivision. Currently, over 640 jurisdictions in 24 States have individually applied for and justified an exemption to implementing an expedited process because their court system processes cases within the required timeframes. Each of these exemptions must be renewed every three years. Since exemptions are routinely granted to jurisdictions using judges that meet the expedited process timeframes, we propose to allow jurisdictions that meet the timeframes to use judges without having to go through the exemption process. Our proposal will save time and money for both local and State agencies and the Federal government, without sacrificing expediency in case processing.

This proposed revision does not alter the availability of Federal funding for administrative costs associated with decisionmakers in administrative and expedited judicial processes. Nor does it change the unavailability of Federal funding for costs of compensation (salary and fringe benefits) of judges as specified in 45 CFR 304.21(b)(2).

Other changes. We propose amending the safeguards required under 45 CFR 303.101(c) to cover paternity establishment as well as support order establishment and enforcement. We would revise 45 CFR 303.101(c)(1) to require that paternities as well as support orders established via expedited process, by means other than judicial process, must have the same effect under State law as paternities and orders established by full judicial process within the State. We also propose to amend 45 CFR 303.101(c)(3) to require that the parties be provided a copy of the paternity determination as well as the support order. Under this requirement, copies should be provided to both parents (regardless of whether the custodial parent is an AFDC or public assistance recipient) and any other State which has an assignment of support rights in the case. We propose that the remaining safeguards remain unchanged except that they would now also apply to expedited paternity processes: the due process rights of the parties involved must be protected as required by 45 CFR 303.101(c)(2); there must be written procedures for ensuring the qualification of presiding officers as required by 45 CFR 303.101(c)(4); recommendations of presiding officers may be ratified by a judge as allowed by 45 CFR 303.101(c)(5); and action taken may be reviewed under the State's generally applicable judicial procedures as provided by 45 CFR 303.101(c)(6).

We propose amending the functions of presiding officers in 45 CFR 303.101(d) to cover paternity establishment as well as support order establishment and enforcement. Proposed 45 CFR 303.101(d)(2) would require presiding officers to evaluate evidence and make recommendations to establish paternity as well as to establish and enforce orders. Proposed 45 CFR 303.101(d)(3) would require presiding officers to accept voluntary acknowledgments of paternity, in addition to voluntary acknowledgments of support liability and stipulated agreements setting the amount of support to be paid. As discussed, voluntary acknowledgements and consent judgments are valuable in expediting the process and reducing conflict. In cases where a consent judgment is obtained, guidelines for setting the support award amount must still be used in accordance with 45 CFR 302.56.

Presiding officers would continue to enter default orders as required. However, we propose to revise this requirement 45 CFR 303.101(d)(4) to reflect the language of the default order provision in proposed 45 CFR 302.70(a)(5)(viii) and 303.5(f). As amended, 45 CFR 303.101(d)(4) would require that, as one of their functions, presiding officers enter default orders not only in cases where the absent parent does not respond to service within a reasonable period of time specified by the State (as required under current regulation), but also in cases where the defendant fails to appear at a hearing. This default order provision applies to paternity as well as support order establishment and enforcement cases worked via expedited process. Before a default order could be entered, this proposed rule would require a showing of service of process in accordance with State law and any additional showing required by State law.

We also propose to add a new function for presiding officers in paternity cases at 45 CFR 303.101(d)(5)—ordering genetic tests in contested paternity cases in accordance with 45 CFR 303.5(d)(1). Genetic testing is essential to expediting paternity determination and should occur as soon as possible after an alleged father declines to voluntarily acknowledge paternity. Many fathers will voluntarily acknowledge paternity upon seeing test results which indicate a high probability of paternity. Even if a man does not voluntarily acknowledge paternity, tests results can offer convincing evidence that expedites the process in a contested case.

We also propose to amend 45 CFR 303.101(e) regarding exemptions from expedited process to recognize that expedited process now includes paternity establishment. Under the revised provision, a State would be able to request an exemption from any of the expedited process requirements for a political subdivision on the basis of the effectiveness and timeliness of paternity establishment, support order issuance or enforcement with the political subdivision in accordance with the provisions of 45 CFR 302.70(d).

Executive Order 12291

The Secretary has determined, in accordance with Executive Order 12291, that this proposed rule does not constitute a "major" rule. A major rule is one that is likely to result in:

(1) An annual effect on the economy of $100 million;

(2) A major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or

(3) Significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

This rule implements specific requirements of Pub. L. 103–66. We expect the additional costs to the States will be less than $100 million. Any costs will be administrative and can be minimized through careful State planning. The hospital-based programs mandated by new section 466(a)(5)(C) o

the Act should result in administrative cost savings that exceed increased administrative costs as well as increased collections through the initiation of child support collections earlier than might otherwise have occurred.

Regulatory Flexibility Analysis

The Secretary certifies, under 5 U.S.C. 605(b), as enacted by the Regulatory Flexibility Act (Pub. L. 96–354), that this proposed regulation will not result in a significant impact on a substantial number of small entities. The primary impact is on State governments and individuals, which are not considered small entities under the act. Also, while the Federal law requires States to pass laws that may impact hospitals, these regulations do not govern hospitals per se and therefore do not have a significant impact on a substantial number of small entities.

List of Subjects in 45 CFR Parts 302, 303, and 304

Child support, Grant progams—social programs, Reporting and record keeping requirements.

(Catalog of Federal Domestic Assistance Program No. 93.023, Child Support Enforcement Program)

Dated: October 13, 1993.

Mary Jo Bane,

Assistant Secretary for Children and Families.

Approved: October 17, 1993.

Donna E. Shalala,

Secretary.

For the reasons set out in the preamble, we propose to amend title 45 chapter III of the Code of Federal Regulations as follows:

PART 301—STATE PLAN APPROVAL AND GRANT PROCEDURES

1. The authority citation for part 301 continues to read as follows:

Authority: 42 U.S.C. 651 through 658, 660, 664, 666, 667, 1301, and 1302.

2. Section 301.1 is amended by adding the following definition of the term "Birthing hospital" after the definition of the term "Assignment":

§ 301.1 General definitions.

* * * * *

Birthing hospital means a hospital that has a licensed obstetric care unit or is licensed to provide obstetric services, or a licensed birthing center associated with a hospital. A birthing center is a facility outside a hospital that provides maternity services.

* * * * *

PART 302—STATE PLAN REQUIREMENTS

3. The authority citation for part 302 continues to read as follows:

Authority: 42 U.S.C. 651 through 658, 660, 664, 666, 667, 1302, 1396a(a)(25), 1396b(d)(2), 1396b(o), 1396b(p), and 1396(k).

4. Section 302.70 is amended by revising paragraphs (a), introductory text, and (a)(2), and by adding new paragraphs (a)(5)(iii) through (a)(5)(viii) and (a)(11) to read as follows:

§ 302.70 Required State laws.

(a) *Required Laws.* The State plan shall provide that, in accordance with sections 454(20) and 466 of the Act, the State has in effect laws providing for and has implemented the following procedures to improve program effectiveness:

* * * * *

(2) Expedited processes to establish paternity and to establish and enforce child support obligations having the same force and effect as those established through full judicial process, in accordance with the requirements set forth in § 303.101 of this chapter;

* * * * *

(5) * * *

(iii) Procedures for a simple civil process for voluntarily acknowledging paternity under which the State must provide that the rights and responsibilities of acknowledging paternity are explained, and ensure that due process safeguards are afforded. Such procedures must include:

(A) A hospital-based program in accordance with § 303.5(g) for the voluntary acknowledgment of paternity during the period immediately preceding or following the birth of a child to an unmarried mother, and a requirement that all public and private birthing hospitals participate in the hospital-based program defined in § 303.5(g)(2);

(B) A process for voluntarily acknowledging paternity outside of hospitals;

(C) A requirement that a voluntary acknowledgment be signed by both parents, and that the parents' signatures be authenticated by a notary or witness(es);

(D) A voluntary acknowledgment form that includes, at a minimum, instructions for filing the acknowledgement with the designated agency in accordance with paragraph (a)(5)(iii)(E) of this section, and lines for the parents' social security numbers and addresses; and

(E) Procedures for filing voluntary acknowledgments with either the State IV–D agency or a centralized State agency that provides the State IV–D agency access to copies of, and identifying information on, the acknowledgments.

(iv) Procedures under which the voluntary acknowledgment of paternity creates a rebuttable, or at the option of the State, conclusive presumption of paternity, and under which such voluntary acknowledgment is admissible as evidence of paternity;

(v) Procedures which provide that any objection to genetic testing results must be made in writing within a specified number of days before any hearing at which such results may be introduced into evidence; and if no objection is made, a written report of the test results is admissible as evidence of paternity without the need for foundation testimony or other proof of authenticity or accuracy;

(vi) Procedures which create a rebuttable or, at the option of the State, conclusive presumption of paternity upon genetic testing results indicating a threshold probability of the alleged father being the father of the child;

(vii) Procedures under which a voluntary acknowledgment or genetic test results meeting or exceeding the State's threshold probability established in accordance with paragraph (a)(5)(vi) of this section must be recognized as a basis for seeking a support order without first requiring any further proceedings to establish paternity; and

(viii) Procedures requiring a default order to be entered in a contested paternity case upon a showing that process was served on the defendant in accordance with State law, that the defendant has failed to appear at a hearing or respond within a reasonable period of time specified by the State, and any additional showing required by State law.

* * * * *

(11) Procedures under which the State must give full faith and credit to a determination of paternity made by any other State, whether established through voluntary acknowledgment or through administrative or judicial processes.

* * * * *

PART 303—STANDARDS FOR PROGRAM OPERATIONS

5. The authority citation for part 303 continues to read as follows:

Authority: 42 U.S.C. 651 through 658, 660, 663, 664, 666, 667, 1302, 1396a(a)(25), 1396b(d)(2), 1396b(o), 1396b(p), and 1396(k).

6. Section 303.4 is amended by revising paragraph (d) to read as follows:

§ 303.4 Establishment of support obligations.

* * * * *

(d) Seek a support order based on a voluntary acknowledgment or genetic test results meeting or exceeding the State's threshold probability in accordance with § 302.70(a)(5)(vii).

* * * * *

7. Section 303.5 is amended by revising paragraph (a) and by adding paragraphs (f), (g), and (h) to read as follows:

§ 303.5 Establishment of paternity.

(a) For all cases referred to the IV–D agency or applying for services under § 302.33 of this chapter in which paternity has not been established and a voluntary acknowledgment has not been obtained, the IV–D agency must:

(1) Provide an alleged father the opportunity to voluntarily acknowledge paternity in accordance with § 302.70(a)(5)(iii); and

(2) Attempt to establish paternity by legal process established under State law if he fails to voluntarily acknowledge paternity.

* * * * *

(f) The IV–D agency must seek entry of a default order by the court or administrative authority in a paternity case by showing that process has been served on the defendant in accordance with State law, that the defendant has failed to appear at a hearing or respond within a reasonable period of time specified by the State, and any additional showing required by State law, in accordance with § 302.70(a)(5)(viii).

(g) Hospital-based program:

(1) The State must establish, in cooperation with hospitals, a hospital-based program in every public and private birthing hospital. These programs must be operational in birthing hospitals statewide no later than January 1, 1995.

(2) During the period immediately preceding or following the birth of a child to an unmarried woman in the hospital, a hospital-based program must, at a minimum:

(i) Provide to both the mother and alleged father, if he is present in the hospital: (A) Written materials about paternity establishment, (B) the forms necessary to voluntarily acknowledge paternity, (C) a written description of the rights and responsibilities of acknowledging paternity, and (D) the opportunity, prior to discharge from the hospital, to speak with staff, either by telephone or in person, who are trained to clarify information and answer questions about paternity establishment;

(ii) Provide the mother and alleged father, if he is present, the opportunity to voluntarily acknowledge paternity in the hospital;

(iii) Afford due process safeguards; and

(iv) Forward completed acknowledgements to the agency designated by the State in accordance with § 302.70(a)(5)(iii)(E).

(3) A hospital-based program need not provide services specified in paragraph (g)(2) of this section in cases where the mother or alleged father is a minor or a legal action is already pending, if the provision of such services is precluded by State law.

(4) The State must provide to all public and private birthing hospitals in the State (i) Written materials about paternity establishment, (ii) forms necessary to voluntarily acknowledge paternity, and (iii) a written description of the rights and responsibilities of acknowledging paternity.

(5) The State must provide training, guidance, and written instructions regarding voluntary acknowledgment of paternity, as necessary to operate the hospital-based program.

(6) The State must assess each birthing hospital's program on at least an annual basis.

(h) In IV–D cases needing paternity establishment, the IV–D agency must determine if a voluntary acknowledgement has been filed with the agency designated by the State in accordance with § 302.70(a)(5)(iii)(E).

8. Section 303.101 is amended by revising paragraphs (a), (b), (c) (1) and (3), (d) (2) through (4), and (e), and by adding paragraph (d)(5) to read as follows:

§ 303.101 Expedited processes.

(a) *Definition. Expedited processes* means administrative or expedited judicial processes or both which increase effectiveness and meet processing times specified in paragraph (b)(2) of this section.

(b) *Basic requirement.* (1) The State must have in effect and use, in interstate and intrastate cases, expedited processes as specified under this section to establish paternity and to establish and enforce support orders.

(2) Under expedited processes:

(i) In IV–D cases needing support order establishment, regardless of whether paternity has been established, action to establish support obligations must be completed from the date of locating the alleged father or noncustodial parent to the time of disposition within the following timeframes: (A) 75 percent in 9 months; (B) 85 percent in 12 months; and (C) 90 percent in 15 months;

(ii) In IV–D cases where a support obligation has been established, actions to enforce the support obligation must be completed within the timeframes specified in §§ 303.6(c)(2) and 303.100;

(iii) For purposes of the timeframe at § 303.101(b)(2)(i), in cases where the IV–D agency uses long-arm jurisdiction and disposition occurs within 15 months of locating the alleged father or noncustodial parent, the case may be counted as a success within either the 9, 12, or 15 month tier of the timeframe, regardless of when disposition occurs.

(iv) Disposition, as used in paragraphs (b) (2)(i) and (iii) of this section, means the date on which support obligations is officially, established and/or recorded or action is dismissed.

(c) * * *

(1) Paternities and orders established by means other than full judicial process must have the same force and effect under State law as paternities and orders established by full judicial process within the State;

* * * * *

(3) The parties must be provided a copy of the paternity determination and support order;

* * * * *

(d) * * *

(2) Evaluating evidence and making recommendations or decisions to establish paternity and to establish and enforce orders;

(3) Accepting voluntary acknowledgment of paternity or support liability and stipulated agreements setting the amount of support to be paid;

(4) Entering default orders upon a showing that process has been served on the defendant in accordance with State law, that the defendant has failed to appear at a hearing or respond within a reasonable period of time specified by the State, and any additional showing required by State law; and

(5) Ordering genetic tests in contested paternity cases in accordance with § 303.5(d)(1).

* * * * *

(e) *Exemption for political subdivisions.* A State may request an exemption from any of the requirements of this section for a political subdivisions on the basis of the effectiveness and timeliness of paternity establishment, support order issuance or enforcement within the political subdivision in accordance with the provisions of § 302.70(d) of this chapter.

PART 304—FEDERAL FINANCIAL PARTICIPATION

9. The authority citation for part 304 continues to read as follows:

Authority: 42 U.S.C. 651 through 655, 657, 1302, 1396a(a)(25), 1396b(d)(2), 1396b(o), 1396b(p), and 1396(k).

10. Section 304.20 is amended by adding paragraph (b)(2)(vi) through (viii) to read as follows:

§ 304.20 Availability and rate of Federal financial participation.

* * * * *

(b) * * *

(2) The establishment of paternity including:

* * * * *

(vi) Payments up to $20 to birthing hospitals and other entities that provide prenatal or birthing services for each voluntary acknowledgment obtained;

(vii) Developing and providing to birthing hospitals and other entities that provide prenatal or birthing services written and audiovisual materials about paternity establishment and forms necessary to voluntarily acknowledge paternity; and

(viii) Reasonable and essential short-term training regarding voluntary acknowledgment of paternity associated with a State's hospital-based program as defined by § 303.5(g)(2).

* * * * *

11. Section 304.23 is amended by revising paragraph (d) to read:

§ 304.23 Expenditures for which Federal financial participation is not available.

* * * * *

(d) Education and training programs and educational services except direct cost of short term training provided to IV–D agency staff or pursuant to §§ 304.20(b)(2)(viii) and 304.21.

* * * * *

[FR Doc. 93–28783 Filed 11–26–93; 8:45 am]
BILLING CODE 4190–11–M

FEDERAL MARITIME COMMISSION

46 CFR Parts 571 and 572

[Docket No. 93–23]

Advance Notice of Proposed Rulemaking Concerning Section 6(g) of the Shipping Act of 1984

AGENCY: Federal Maritime Commission.

ACTION: Advance notice of proposed rulemaking.

SUMMARY: The Federal Maritime Commission is considering whether it should issue regulations or guidelines that would describe the Commission's enforcement policy with respect to section 6(g) of the Shipping Act of 1984, which authorizes the Commission to seek an injunction against substantially anticompetitive agreements. This Advance Notice of Proposed Rulemaking recounts the background and legislative history of section 6(g), describes the Commission's procedures for evaluating and monitoring agreements, sets forth a possible section 6(g) guideline, and seeks comment on whether published guidelines would be useful and appropriate and, if so, what form they should take.

DATES: Comments due on or before January 28, 1994.

ADDRESSES: Send comments (original and 20 copies) to: Joseph C. Polking, Secretary, Federal Maritime Commission, 800 North Capitol Street, NW., Washington, DC 20573–0001 (202) 523–5725.

FOR FURTHER INFORMATION CONTACT:

Robert D. Bourgoin, General Counsel, Federal Maritime Commission, 800 North Capitol Street, NW., Washington, DC 20573–0001 (202) 523–5740

Austin L. Schmitt, Director, Bureau of Trade Monitoring and Analysis, Federal Maritime Commission, 800 North Capitol Street, NW., Washington, DC 20573–0001 (202) 523–5787

SUPPLEMENTARY INFORMATION: The Federal Maritime Commission ("Commission" or "FMC") is considering the advisability of promulgating some form of public statement that would describe the Commission's analytic framework for determining whether an agreement filed pursuant to the Shipping Act of 1984 ("1984 Act") should be made the subject of an injunctive action under the standards of section 6(g) of that Act, i.e., whether the agreement, by a reduction in competition, is likely to produce or has produced "an unreasonable reduction in transportation service or an unreasonable increase in transportation cost." 46 U.S.C. app. 1705(g).

To date, statements by the Commission and opportunity for public comment regarding the section 6(g) general standard and the extent of the Commission's powers under it have been limited.[1] This Advance Notice of Proposed Rulemaking is intended both to provide a vehicle for increasing public awareness regarding the FMC's regulation of agreements under the 1984 Act, and to provide a means for input from shippers, carriers, government agencies and other interested persons on whether, in what form, and with what degree of specificity, publication of section 6(g) methodological guidelines would be helpful to the ocean transportation industry and the shipping public. The Notice recounts the background and legislative history of section 6(g) and describes the Commission's procedures for evaluating and monitoring agreements. It then sets forth a possible section 6(g) guideline and solicits comments on the guideline's contents and format.

Commenters may also suggest, if they wish, possible alternative methods of providing public guidance with regard to section 6(g). Such alternatives could include instituting a rulemaking such as that undertaken in FMC Docket No. 78–46, Financial Reports of Common Carriers by Water in the Domestic Offshore Trades, in which the Commission established its methodology for determining what constitutes a reasonable rate of return in the domestic offshore trades; publishing a set of specific guidelines similar in format to the Horizontal Merger Guidelines issued jointly by the Department of Justice and the Federal Trade Commission; or issuing a general statement of policy in the Commission's regulations under 46 CFR Part 571, Interpretations and Statements of Policy.

A. The Section 6(g) Standard

1. Background

Section 15 of the former Shipping Act, 1916 ("1916 Act"), required carriers to secure Commission approval for any agreement governing rates, conditions of service, or similar matters, before such an agreement could become effective. Under standards set forth in section 15, the Commission was permitted to disapprove, cancel, or modify any agreement which it found to be unjustly discriminatory or unfair, or to operate to the detriment of the commerce of the United States, or to be contrary to the public interest, or to be in violation of the Act. 46 U.S.C. 814 (1982).

The Commission, with Supreme Court approval, took the position that agreements to set rates, pool revenues, restrict capacity, or to engage in other

[1] On February 12, 1992, the Advisory Commission on Conferences in Ocean Shipping ("ACCOS") held a public session to consider alternative antitrust standards. The FMC's staff briefed ACCOS on the Commission's section 6(g) review and monitoring procedures and their underlying rationale. However, ACCOS's final report did not comment on the FMC's interpretation of section 6(g). (See Report of the Advisory Commission on Conferences in Ocean Shipping, April 1992, p. 82.)

activities that normally would be contrary to the antitrust laws were presumed to be contrary to the public interest, and would be approved only if they were shown to be "required by a serious transportation need, necessary to secure important public benefits or in furtherance of a valid regulatory purpose of the Shipping Act." *FMC* v. *Svenska Amerika Linien*, 390 U.S. 238, 243 (1968). The burden of making this showing was placed upon the carrier proponents of an agreement, on the theory that information regarding the operation and probable future impact of an agreement "[a]lmost uniformly * * * is in the hands of those seeking approval * * * and it is incumbent upon those in possession of such information to come forward with it." Mediterranean Pools Investigation, 9 F.M.C. 264, 290 (1966). Under these procedures, the implementation of agreements was often delayed for considerable amounts of time, especially if formal protests were made. See *Marine Space Enclosures, Inc.* v. *FMC*, 420 F.2d 577 (D.C. Cir. 1969) (requiring that the Commission hold a hearing where a protest raising substantial issues had been filed). In many cases, protests were filed by other carriers, who effectively delayed or blocked the approval of their competitors' business plans.

The 1984 Act removed the Commission's broad discretion to disapprove agreements. Instead, under section 6(c), properly filed agreements generally become effective automatically after forty-five days. 46 U.S.C. app. 1705(c). To balance this liberalized approach to agreement review, the 1984 Act sets forth an extensive list of prohibited acts, barring many anticompetitive practices which previously had been challenged under the general standards of section 15. This shift in regulatory approach reflects a decision by Congress "to strike the overall balance between competition and cooperation in specific provisions of the act," rather than to vest in the Commission broad discretion to approve agreements. H.R. Rep. No. 600, 98th Cong, 2d Sess. 34 (1984) ("Conference Report"). Section 10(c) of the 1984 Act prohibits conferences and groups of carriers from engaging in, inter alia, boycotts, predatory practices, unreasonable refusals to deal, and allocation of shippers among specific carriers. 46 U.S.C. app. 1709(c). Section 10(b) bars carriers from engaging in a variety of unfair practices, such as granting secret kickbacks to shippers, retaliating against a shipper who has patronized another carrier, and refusing to negotiate with a shippers' association. *Id.* 1709(b).

Further procompetitive provisions of the 1984 Act are set forth in section 5(b), 46 U.S.C. app. 1704(b), which includes a list of terms which must be incorporated in every conference agreement. For example, conferences must allow, on equal terms and conditions, open admission (and readmission) for any carrier willing to serve a particular trade, and must permit any member to withdraw without penalty. Especially noteworthy is the requirement that all conference agreements must clearly state that any member line may take "independent action" on any rate or service item required to be filed in a tariff with the Commission; that is, any member line may opt to set an individual rate below (or above) the conference rate. The conference is required to publish the independent action rate in its conference tariff upon ten days' notice. In addition, the 1984 Act authorized carriers and conferences to enter into service contracts with shippers covering cargo volume, rates and service.[2]

In addition to its authority to enforce the specific prohibitions and mandatory provisions in the 1984 Act, the Commission also has the power, under section 6(g), to seek an injunction in federal district court against an agreement which is "likely, by a reduction in competition, to produce an unreasonable reduction in transportation service or an unreasonable increase in transportation cost." This is the only way the Commission can prevent the operation of an agreement, either before or after it first goes into effect. Unlike the former agreement review process under the 1916 Act, the Commission carries the burden in an injunctive suit of showing that an agreement fails to meet the section 6(g) standard.

Although the language of section 6(g) is relatively brief and non-specific, the accompanying legislative history makes clear that the statute is not a mandate for the Commission to apply a broad "public interest" standard to maritime agreements. Instead, the Conference Report sets forth in uncommon detail the nature of the section 6(g) standard and the appropriate analysis to be performed pursuant to it. The Report also states unequivocally that it is intended to govern the interpretation of section 6(g). Conference Report at 32. The relevant section of the Conference Report (pages 31–37) is appended to this Notice for convenient public reference.

2. The Conference Report

The analysis prescribed by Congress has two distinct requirements—a substantial reduction in competition, and an unreasonable increase in transportation cost or an unreasonable decrease in transportation service.

The Report gives specific instructions to the FMC regarding substantial reductions in competition. The Commission is directed not to place undue emphasis on the market share of the parties. While the Commission can use market share analysis, it may be neither determinative nor necessary. This directive contrasts with traditional antitrust analysis, which posits that high levels of market concentration lead to significant market power. For example, Congress noted that although a conference may have a significant market share, its market power may be mitigated by the 1984 Act's mandatory independent action and open membership provisions. Further, the Report contemplates that some agreements might include all the carriers in the trade (i.e., 100 percent market share), without transgressing the overall purposes of the 1984 Act:

> In some forms of concerted activity, participation by all or virtually all the members of a trade is necessary if the agreement is to have the desired effect on problems of overcapacity or rate instability.

Conference Report at 34. Regarding the relevant competitive market, the Commission is instructed to consider an agreement's impact on shippers not only in the terms of competition between carriers in the subject trade, but also in terms of other competitive means of transport.[3]

Congress further stated that a substantial reduction in competition is a necessary but not a sufficient condition for the FMC to seek injunctive relief. Such relief may be obtained only if an unreasonable increase in transportation cost or an unreasonable reduction in service to shippers would likely result from the substantial reduction in competition. This unreasonableness requirement contains two distinct aspects—a finding of unreasonable harm to shippers and a balancing of that harm against the agreement's benefits to the industry.

[2] Congress did not, however, extend the independent action requirement to conference member lines' ability to enter into service contracts with shippers. As part of the overall compromise underlying the 1984 Act, section 4(a)(7) expressly authorizes conferences to "regulate or prohibit" members' use of service contracts. 46 U.S.C. app. 1703(a)(7).

[3] Suggested competitive alternatives may include alternative liner routings, and service provided by bulk carriers, charter operators or air freight carriers.

Again, the Conference Report sets forth specific requirements for both aspects. The harm to shippers must be unreasonable "in a commercial context." Conference Report at 35. The likely changes in cost and service must be derived from the agreement, and be "material and meaningful," *Id.* Congress did not further define these concepts. It stated, however, that the Commission may not determine that rate increases are *per se* impermissible, since such actions "may be necessary to achieve other benefits of the Act," *id.*, such as allowing carriers "room to develop new and innovative cooperative ventures for dealing with changing technologies and customer needs," *id.* at 32–33, while still realizing a "reasonable return" on their investment. *Id.* at 34. Also, when determining unreasonableness, the FMC is barred from resorting to the public utility ratemaking analysis it applies to the domestic offshore trades.

The second aspect of the unreasonableness requirement involves determining whether the negative impact upon shippers may be offset by the benefits of an agreement. With respect to conferences, Congress stated:

> * * * the competitive harm ensuing from conferences, already diminished by the statutory limitations on conference activity, can and often will be offset by significant benefits of such activity.

Conference Report at 36.

Congress enumerated a number of benefits for Commission consideration: a conference's ability to address the problems of overcapacity and rate instability, an agreement's impact on foreign policy and international comity, U.S.-flag participation in a trade where restrictive cargo preference practices exist which would otherwise limit or prohibit their participation, and efficiency-creating aspects of agreements (e.g., cost reduction, economies of scale, and technological innovation).

Additionally, the Commission is not to "wear blinders" in its analysis under the general standard by ignoring other reasonable and commercially proven alternatives which may create less competitive harm with most or all of the essential benefits. Conference Report at 36. While the Commission may consider such alternatives and seek to enjoin an agreement if it knows of a less damaging arrangement, Congress did not wish a return to the "public interest" standard where proponents are compelled to show that no less anticompetitive alternatives are available. In general, the Commission is to discharge its responsibilities under section 6(g) "in light of the historic [sic] international acceptance of carrier conference agreements"[4] and with a view to the "long-term interests of carriers and shippers." *Id.* at 33.

B. The Commission's Agreement Review Program Under Section 6(g)

Bearing in mind the new responsibilities and limitations imposed by section 6(g) and the other provisions of the 1984 Act, the Commission has developed and refined its processes for evaluating and monitoring agreements. When an agreement is filed, it is immediately reviewed by attorneys in the Commission's Office of General Counsel and by transportation analysts and economists in the Bureau of Trade Monitoring and Analysis. These offices scrutinize agreements to insure that they contain the mandatory provisions set forth in the 1984 Act, and to determine whether they run afoul of the prohibited acts sections or the general standard of section 6(g). Some types of agreements are also subject to specific informational requirements; rate-fixing, revenue pooling, joint service and consortium agreements are required to submit an Information Form, which provides cargo carryings and market share information for the past year and identifies competitors and the nature and extent of that competition. Agreements that contain the authority to alter service are required to provide specific information on changed port calls or reduced sailings.

Because the Commission's responsibility under section 6(g) does not end with the initial filing of an agreement, the FMC maintains an extensive program of ongoing information collection and trade monitoring. Depending on each agreement's anticompetitive potential, monitoring is performed on either a periodic or a continuous basis. Most effective agreements are required to file reports, including Minutes of Meetings, Shippers' Request and Complaint Reports, Consultation Reports, and, if applicable, descriptions of space chartering activity. Also, the Commission's monitoring group routinely prepares economic reports on trade-wide and agreement-wide bases, as well as individual economic profiles on ocean carriers.

Both of these agreement oversight functions—pre-implementation review and post-implementation monitoring—are performed pursuant to the section 6(g) standard, as discussed below.

1. Substantial Reduction in Competition

In assessing whether or not an agreement substantially reduces competition, the Commission must first identify the relevant market. In the case of pre-implementation review of an agreement, the Commission generally will consider the relevant market to be defined by the scope of the agreement. However, if elements of the agreement suggest its major impact will be on a particular country, port range, or commodity group, the definition of relevant market can be adjusted accordingly. The market definition also could be adjusted in a case where a specific class of shippers appeared to be without alternative service options.

Once the appropriate market is defined, such factors as chronic overcapacity, barriers to entry or exit, pre- and post-implementation market concentration, recent rate and service trends, and foreseeable impacts of specific agreement activities will be considered in the Commission's analysis. Factors such as the type of the agreement (for example, pooling, conference, discussion) or its organizational structure (for example, inclusion of both conference members and non-conference carriers in a discussion agreement) also may be significant. Further, the statutory provision for independent action on tariff rates must be taken into account, because it fosters intra-agreement competition. The same would be true if the agreement allows for service contracts, and especially if it allows for independent action on service contracts.

In the case of post-implementation analysis of an agreement, market definition will depend on the identity of the class of any shippers allegedly harmed by the agreement. Thus, the relevant market definition may be either narrower or broader in terms of geographic scope or commodities than the scope of the agreement. Once the relevant market is defined, the Commission can then examine the evidence concerning capacity utilization, barriers to entry and exit, market concentration, independent action, etc., to determine if a substantial reduction in competition has occurred as a result of the agreement's actions.

2. Material and Meaningful Shipper Harm

As regards harm to shippers, the adjectives "material" and "meaningful" are qualitative rather than quantitative terms. Therefore, judgments about what

[4] The Report points out that "the major economic allies of the United States continue to tolerate or even support conference and other cooperative carrier activity, in many cases in a measure far stronger than our laws have tolerated." Conference Report at 33. For example, the Treaty of Rome extends a blanket exemption from its competition rules for liner conferences, without any equivalent to the 1984 Act's provision for independent action.

constitutes meaningful and material harm must be made in the context of the specific injury being alleged.[5] However, the Conference Report notes that increases in rates or decreases in frequency or variety of service cannot be viewed as per se violations of the section 6(g) standard. Conference Report at 35.[6]

In the case of pre-implementation review of agreements, there can be no evidence of actual shipper harm. Consequently, any Commission effort to enjoin an agreement prior to its implementation necessarily would involve an estimate of that agreement's likely economic impact. Such estimates ordinarily must be made without knowledge of what rate increases the parties to the agreement intend to enact. Furthermore, the 1984 Act's provision for independent action undercuts the application of simple market concentration assumptions (i.e., high concentration equals effective market power).

On the other hand, post-implementation monitoring offers the possibility of obtaining empirical evidence of anticompetitive behavior, and thus a greater likelihood of being able to demonstrate material and meaningful harm to some identifiable class of shippers. The extent of actual rate increases or service reductions can be calculated, as well as the effects of those increases or reductions on particular groups of shippers.

It should be noted that, in order for the Commission to convince a federal district court that an agreement should be enjoined because it has caused material and meaningful harm to shippers, active and voluntary shipper assistance almost certainly would be necessary. Information concerning such relevant factors as the extent of individual shippers' rate increases or service reductions, percentage increases in product costs, revenue losses, lost orders, lost market share, employment cutbacks, reduced investments, etc., is not otherwise available to the Commission. Unless shippers were able and willing to provide such information and to provide testimony in court if necessary, any injunctive suit by the Commission would likely be unsuccessful.

[5] Indeed, as previously discussed, the Conference Report specified that harm to shippers is "to be understood in a commercial context."

[6] In addition, the Commission no longer has authority to review the level of specific rates. The 1984 Act repealed section 18(b)(5) of the 1916 Act, which empowered the FMC to disapprove any rates found to be "so unreasonably high or low as to be detrimental to the commerce of the United States." 46 U.S.C. 817(b)(5) (1982).

3. Experience Under the Section 6(g) Standard Since 1984

To date, the Commission has not been presented with a situation which met Congress's standard for seeking an injunction under section 6(g). The chronic condition of excess capacity in many of the U.S. liner trades, and economic recessions in the United States, Japan and Western Europe, have placed pressure on carriers to keep rates and services at competitive levels. Moreover, the procompetitive provisions of the 1984 Act, especially the right to take independent action on tariff rates, have fostered competition among agreement parties and served to discourage unreasonable rate increases and service reductions. It has become apparent that, while the reforms of the 1984 Act greatly accelerated the effectiveness of ocean carrier agreements, they also substantially weakened the power of traditional conferences to maintain rate increases or other conference-wide pricing decisions.[7] In some cases, potentially problematic agreement provisions have been addressed through negotiation, or corrected after the Commission formally requested additional information or took other action. In particular, the Commission has not been presented with financial data or other substantial evidence from shippers or shippers' groups documenting actual "material and meaningful" harm from any agreement, which is an essential prerequisite for the final step in the section 6(g) analysis, i.e., a weighing of the agreement's economic costs against its benefits.

4. Analysis of Economic Costs and Benefits

If the Commission should encounter an agreement where there is evidence meeting Congress's requirement of material and meaningful harm to shippers, it would then be necessary to perform the final step in the section 6(g) analysis prior to seeking a court injunction. Convincing evidence of agreement-generated shipper harm, even substantial harm, is not sufficient to warrant Commission action under section 6(g). The Conference Report specifies that "the negative impact upon shippers may be offset by the benefits of the agreement." Conference Report at 35. Therefore, it would be necessary for the Commission to identify any such benefits, and to establish an appropriate process for weighing the benefits of the agreement against its costs before seeking an injunction.

The first task would be made somewhat easier by the fact that the Conference Report identifies, in general terms, some of the benefits that Congress wants the Commission to consider. These include, but need not be limited to, reducing overcapacity and improving rate stability, creating economic efficiencies (e.g., reducing costs, attaining economies of scale, promoting technological innovation), insuring that U.S. lines can compete with state-sponsored and controlled carriers, and assisting in the achievement of foreign policy goals and the maintenance of international comity.

The second step—comparison of the benefits purportedly flowing from an agreement with the demonstrable shipper harm that results from it—is analogous to the standard formerly applied to agreements under section 15 of the 1916 Act, which compared anticompetitive impact with public interest benefits. Actual reduction of overcapacity and identifiable technical and operational efficiencies that depend on cooperative action among agreement members should be relatively amenable to quantification. Evaluation of benefits of a less concrete nature (e.g.,

[7] In an effort to find a new way to stabilize rates, carriers in two major trades formed agreements with "capacity management programs." The Transpacific Stabilization Agreement ("TSA") is a cooperative working arrangement among thirteen carriers in the inbound trade from the Far East to the United States, which permits the carriers to withhold up to eighteen percent of their collective container capacity from the market, but has no binding ratemaking authority. The Trans-Atlantic Agreement ("TAA") is a conference with binding ratemaking authority among certain members and voluntary ratemaking authority applicable to others, and allows the fifteen members of the agreement to withhold up to twenty-five percent of their collective capacity in the inbound trade from North Europe to the United States.

Agreements that authorize capacity management programs raise significant regulatory concerns, because they potentially can create an artificial shortage of container space by reducing supply to a level below demand, which, in turn, may result in unreasonable rate increases. In addition, both TSA and TAA operate with substantial market shares in their respective trades.

When TSA and TAA were filed, the Commission formally requested historical and forecasted data on the parties' vessel deployment, cargo demand, and capacity utilization in the affected trades. From its analyses, the Commission concluded that neither of the Agreements' proposed capacity management programs should unduly impact on the supply of container space. However, because of the Agreements' importance, the Commission has continually monitored their impact on their respective trades using, among other resources, informational reports on the parties' rate activities, services, and capacity utilization. Thus far, the Agreements have not caused any shortage of vessel space; on the contrary, under both Agreements, there remained a significant margin between vessel space supply and cargo demand, even after the artificial reduction of supply effected by the capacity management programs. This has kept the TSA and TAA carriers under significant price and service pressures, and stimulates intra-conference competition.

international comity), or those attributed to some future period (e.g., long-term price and service stability) would be necessarily more subjective, but, again, would not represent a new task for the Commission. Under section 15, the issue of whether to approve an agreement was often resolved on the basis of anticipated benefits, e.g., Agreement No. 57–96, Pacific Westbound Conference Extension of Authority for Intermodal Services, 19 F.M.C. 291, 301–304 (1976), or international comity, e.g., Agreement No. 9932—Equal Access to Government-Controlled Cargo and Interim Cooperative Working Arrangement, 16 F.M.C. 293, 306 (1973). It should be noted, however, that to conduct an adequate analysis, the Commission would need specific information from the carriers, some of a proprietary nature. For example, information on carrier revenues, fixed and variable input costs, cost reduction and efficiency enhancement measures, anticipated rate levels and revenues, and projections on future cargo levels likely would be required.

Once all the relevant information had been obtained, the Commission could then conduct its analysis of the agreement's economic costs and benefits. In general terms, one way of conducting such an analysis would involve the following steps:

1. Identify the affected parties.
2. Identify the short-term and long-term costs of the agreement to each of the affected parties.
3. Identify the short-term and long-term benefits of the agreement to each of the affected parties.
4. Value the costs and benefits monetarily, where possible, and identify all non-quantifiable costs and benefits.
5. Discount all identified and valued costs and benefits occurring at different times at the appropriate discount rate.
6. Aggregate the present-valued costs and benefits.
7. Perform a sensitivity analysis[8] on the major costs and benefits (especially any that are unquantifiable or uncertain).
8. If the present-valued net benefits of the agreement are positive (i.e., if benefits outweigh costs), determine if there are any "reasonable and commercially proven alternative arrangements" that would achieve similar benefits at a lower net cost.

Technical issues such as the appropriate discount rates, inflation assumptions, multiplier effects, etc., could be handled, to the degree possible, in accord with the provisions in the Office of Management and Budget's benefit/cost analysis guidelines.[9]

C. Request for Comment

Interested members of the public, including carriers, shippers and governmental bodies, are invited to comment on the draft section 6(g) Guideline set forth below. As previously stated, commenters may also suggest alternative methods of providing guidance with regard to section 6(g).

Guideline

Upon filing with the Commission, an agreement and its information form will be subject to pre-implementation review to determine whether or not it should be made the subject of an injunctive action under the standards of section 6(g) of the 1984 Act. In addition, the agreement will be subject to on-going monitoring. The following guidelines outline the present pre- and post-implementation 6(g) review processes.

Pre-implementation 6(g) Review

A. The Commission will define the relevant market to be used in evaluating the agreement. Normally, at the pre-implementation review stage, that market will be determined by the geographical scope of the agreement and will be limited to the liner shipping industry. However, in some cases the market may be defined by country, port range, commodity group, or class of shipper most likely to be affected.

B. The Commission will assess the agreement's likely economic impact on the market. Consideration will be given to available vessel capacity in the market, barriers to entry or exit, pre- and post-implementation market concentration, the effect of mandatory IA provisions and other prescribed procompetitive requirements, recent rate and service trends, type of agreement involved (for example, pooling, conference, discussion), organizational structure of the agreement, and any foreseeable impacts of proposed agreement activities such as a capacity management program.

C. If the Commission determines that further information or clarification is needed to properly evaluate whether the agreement is likely to violate the section 6(g) standard, it may seek additional information from the filing party pursuant to section 6(d) of the 1984 Act.

D. In the event that the Commission determines that the agreement is likely, by a reduction in competition, to unreasonably increase transportation costs or decrease transportation service, it will inform the filing party of its objections. If those objections cannot be redressed by negotiation, the Commission may then seek an injunction in federal district court as provided in section 6(h) of the 1984 Act.

Post-implementation Agreement Monitoring

A. The Commission will define the relevant market to be used in monitoring the agreement. In the absence of specific shipper allegations of harm, the market will be defined in the same manner as for a pre-implementation review. If the Commission has received credible allegations of material and meaningful harm owing to activities undertaken by agreement members pursuant to the terms of the agreement, consideration will be given to the particulars of the allegations in defining the scope of the market.

B. The Commission will determine if the agreement has resulted in a reduction in competition that has increased transportation costs or decreased transportation service as applied to either (a) the market as a whole, or (b) specific groups of shippers alleging material and meaningful harm. In the case of a post-implementation review, consideration will be given to the actual behavior (for example, increases in transportation costs, decreases in transportation service, capacity limitations, etc.) of member lines under the agreement in addition to the elements considered in a pre-implementation review.

C. The Commission will determine whether evidence is available of material and meaningful harm to a specific class of shippers and the credibility and utility of such evidence for seeking injunctive action under section 6(g). Such evidence, which would by its nature have to be provided by shippers alleging harm, would include data on individual rate increases or service decreases, increases in product costs, revenue losses, lost orders, lost market share, employment cutbacks, reduced investments, etc., that are attributable to transportation cost increases or service decreases.

D. Should the Commission determine that the agreement has resulted in a reduction in competition leading to an increase in rates or decrease in service, and that, as a consequence, a specific group of shippers has suffered meaningful and material harm, it will undertake an economic analysis to determine if the short and/or long-term benefits of the agreement outweigh the

[8] Sensitivity analysis involves changing the parameters of a decision problem and studying how this affects the outcome. It is particularly associated with cost-benefit analysis, where the most common form is the use of alternative discount rates.

[9] Office of Management and Budget Circular No. A–94 Revised, (Transmittal Memorandum No. 64), October 29, 1992.

harm to shippers. Where possible, benefits will be expressed in monetary terms. Such analysis will give consideration to any subsidization that may exist, that is, where the rates charged shippers under the agreement do not cover the carrier-parties' variable costs.

E. Any economic analysis of costs and benefits would require specific information from the carriers which is not available from other sources. To obtain such information, the Commission may direct the carriers involved in the trade—possibly including carriers who are not members of the agreement—to provide the information pursuant to section 15 of the 1984 Act.

F. Based on all available information, and following the general method outlined in the Advanced Notice, the Commission will decide whether to bring suit in the United States District Court for the District of Columbia to enjoin the operation of the agreement.

By the Commission.

Joseph C. Polking,

Secretary.

Appendix—(Conference Report)

Section 6(g) and (h)

A. Background—Differing Approaches in House and Senate Bills

The new general standard in section 6(g) represents a compromise of approaches taken in the Senate and House Bills.

The provision would authorize the Federal Maritime Commission to seek injunctive relief against agreements that it determines do not meet the standard set forth in the subsection. This flexible standard permits the Commission to seek an injunction even when an agreement would not violate any of the prohibited acts set forth elsewhere in the bill.

The Senate bill contained no general standard. It did not authorize Commission disapproval of agreements except for violation of specified requirements (the Commission could also authorize special investigations of, but not immediately disapprove, certain pooling agreements). The Senate approach reflected a view that review of agreements under the general standard of the present Shipping Act, including the "public interest" test, places too much weight on antitrust principles and that the present standard is too vague to provide clear guidance to the regulated industry as to the extent of permissible activities. Believing that this vagueness and overemphasis on competition has not well served the public because it has denied carriers serving the U.S. foreign commerce opportunities to cooperate, rationalize services, and achieve rate stability, the Senate excluded a general standard from its bill.

The House bill, on the other hand, included a provision authorizing the Commission to intercede against substantially anticompetitive agreements, even if these agreements would not violate any specific prohibitions of the bill. The House provision grew out of the Judiciary Committee's conviction that it is impossible to draft a sufficiently comprehensive list of specific prohibited acts to cover all potentially injurious anticompetitive behavior: such behavior would, under the House approach, be weighed against beneficial effects under a flexible general standard. Problems with uncertainty and delay would be addressed through a streamlined review process that set shorter time limits for Commission action than those prescribed in the Senate bill. And the House bill placed the burden on the Commission to establish that an agreement would result in a harmful reduction in competition before it could enjoin the operation of an agreement.

Because of the strong views on the general standard, the conferees opted for a compromise provision differing in approach from either the House or Senate bills. Specifically, the Senate conferees agree to recede from the language of subsections 12(c)(8) and 13(d) of S. 47 and the House conferees agree to recede from the language of subsection 5(g) of the House amendment. The conferees intend that this report shall govern interpretation of the new section 6(g).

B. Nature of the Compromise General Standard

The new section 6(g) allows the Commission to seek an injunction if it determines that an agreement "is likely, by a reduction in competition, to produce an unreasonable reduction in transportation services or an unreasonable increase in transportation cost." The compromise accedes to the House position insofar as it would establish a flexible general standard to be applied by the regulatory agency with expertise in this industry. This standard provides a basis for Commission review of agreements other than for contravention of specific statutory proscriptions and recognizes that a substantial reduction in competition can, under certain circumstances, trigger Commission intercession to prevent agreements from becoming effective or remaining in effect. On the other hand, the standard in the Conference Bill responds to the Senate concern that the "public interest" test in the present law is vague and unworkable in its automatic application of certain antitrust principles to ocean shipping. The new standard removes any per se condemnation of concerted conduct such as might be applied under the antitrust laws. Consequently, the standard establishes a threshold for prompt approval of most generally accepted joint conduct in ocean shipping. Other significant changes from the public interest standard of the present law includes section 6(h), placing the burden of proof on the Commission in any application of the general standard.

The compromise will place in the hands of the Federal Maritime Commission, the expert agency charged by the Congress with regulating this industry, sole responsibility for enforcing the general standard. Although the Department of Justice will continue to represent the FMC in most other respects, the Commission is granted authority to represent itself in district court actions to seek an injunction. The expertise of the FMC in regulating this industry, the agency's experience in applying the standard, and the likely need for prompt action to stop threatening conduct, warrant a limited exception to the principle of centralized government litigation authority. In this case, the limited grant of litigation authority is to an independent agency, created by Congress with considerable autonomy from the Executive Branch. As new and evolving forms of cooperative conduct develop, the conferees believe that the Commission, rather than the antitrust agencies or the courts in the first instance, is in the best position to assess an agreement's benefits and detriments in light of the objectives of this Act.

The general standard leaves the carriers room to develop new and innovative cooperative ventures for dealing with rapidly changing technologies and customer needs. At the same time, it grants to the Commission the necessary authority to act to stop schemes that go beyond what is necessary to obtain such benefits and cause substantial anticompetitive effects.

The flexibility in the compromise provision eliminates the need for a longer list of possibly overreaching prohibitions. The conferees agree that selective provisions limiting joint ventures or pooling agreements might discourage arrangements that often enhance the quality, frequency, or efficiency of transportation services. These agreements, just as any others, should be permitted unless the FMC demonstrates that they are likely to cause concrete competitive harm evidenced in unreasonable and detrimental changes to transportation costs or services.

The language of this subsection must be interpreted in light of the historic international acceptance of carrier conference agreements. Conferences have been recognized in our laws at least since the Shipping Act of 1916. This legislation does place substantial limitations on that conference activity, including provisions that require open membership, a right of independent action on 10 days' notice for each member, and a substantial list of protective prohibitions, including a ban on boycotts, fighting ships, or other concerted practices designed to deny entry or drive existing competitors from the market. This legislation also prohibits the use of loyalty contracts not in conformity with the antitrust laws. But while limiting certain possible excesses of concerted activity, the compromise general standard clears the way for the conferences to perform concerted activities that serve the long-term interests of ocean carriers and shippers.

Economists and transportation experts differ as to whether conferences are the best means of attaining a modern and efficient transportation system and, if so, how conferences should be structured. After weighing these concerns, the conferees have approved a bill that, subject to the constraints already mentioned, permits the reasonable use of conferences and other concerted activity to address structural and competitive problems, such as severe rate instability and overcapacity that have long plagued this industry. Underlying this determination is

also a realization that the major economic allies of the United States continue to tolerate or even support conference and other cooperative carrier activity, in many cases in a measure far stronger than our laws have tolerated. Any major change in regulatory policy, although not precluded by these differences in approach, should be taken with a sensitivity to interests of friendly nations, and, insofar as possible, in tandem with them.

C. Analysis Under the General Standard

A critical factor enabling the Conferees to agree on a more narrowly drawn general standard is the inclusion in this bill of numerous other provisions which address the nation's interest in competition in the ocean common carrier industry. For example, prohibited acts in the Shipping Act of 1984 will continue the protections of the present law against predation and unreasonable refusals to deal. Even more importantly, the bill includes other specific and major procompetitive reforms that will affect the operation of ocean carriers and conferences—notably a strong requirement of independent action with a limited notice period and the elimination of conference authority to offer loyalty contracts (unless their use would not violate the antitrust laws). With these reforms and other provisions in the bill, the Conferees have determined that carrier agreements generally will serve this nation's interest in international liner shipping. Thus, the Conferees determined to strike the overall balance between competition and cooperation in specific provisions of the act and to allow for disapproval of agreements only under the carefully drawn circumstances set forth in subsection 6(g).

The new standard will permit conference agreements and amendments (including those providing intermodal ratemaking authority) to be reviewed promptly. Except in cases raising substantial issues under the standard, such agreements will enter into effect routinely, without the need for submitting additional information under section 6(d). Intermodal rate agreements have been used effectively throughout the world and are an important tool permitting the conferences to offer a through-rate, preferred by many shippers over segmented, port-to-port rates. Although some conferences serving U.S. trades have implemented intermodal rate agreements, the authority for such agreements is disputed. The Act recognizes that intermodal ratemaking authority is an important tool for the conferences to remain viable: no special stigma should attach to such agreements under the general standard.

The general standard also permits agreements providing for rationalization of services to be reviewed promptly and, except in cases raising substantial issues under the standard, to enter into effect routinely. Through these agreements, overcapacity (i.e., economic waste) can be reduced and efficiency enhanced, thereby better enabling carriers to respond with reasonable rates that afford them a reasonable return.

As suggested by the title of subsection (g), a likely reduction in competition should be substantial before triggering Commission intercession under the general standard. Unless the competitive threat is substantial, any reduction in service or increase in cost would not be unreasonable, as required by the general standard. The Commission should not, in any event, expend its limited resources to pursue insubstantial reductions.

The market share of parties participating in concerted action is a touchstone for traditional antitrust analysis. This form of analysis, although helpful in determining whether an agreement is likely to cause a substantial reduction in competition, is only one factor in the Commission's decision calculus. Its significance will depend on the circumstances. In the case of conference agreements, including those with intermodal ratemaking authority, the conferees believe that potential reductions in competition will be at least partially offset by a member carrier's right of independent action and ability to enter and leave the conference freely. In some forms of concerted action, participation by all or virtually all of the members of a trade is necessary if the agreement is to have the desired effect on problems of overcapacity or rate instability. Thus, although a market share analysis is available to the Commission, in many cases, depending on the circumstances, its outcome will not be determinative or necessary for application of the general standard.

In applying the general standard, the Commission also must consider whether the relevant competitive market includes more than just ocean common carriers providing direct service in a trade. The conferees intend that the Commission, in carrying its burden under the general standard, consider the impact on shippers of an agreement not only in view of competition between ocean common carriers providing direct service in a trade, but also in view of other competitive means of transport. In some cases, alternative liner routings, bulk carriers, charter operators, or air freight carriers may provide competitive alternatives to the direct service provided by ocean common carriers. In considering these alternatives, the Commission may gather relevant information from shippers, other carriers, and third parties. And although the Commission may use its information powers to request market information from the proponents of an agreement, such information must be relevant and readily available to the proponents.

Even if an agreement is likely to cause the requisite reduction in competition, the Commission can obtain injunctive relief only if the likely net result will be an unreasonable increase in costs to shippers, or an unreasonable reduction in the frequency or quality of service available to shippers. There are two distinct aspects to this requirement.

The first is whether the harm to shippers is unreasonable. The term "unreasonable" is to be understood in a commercial context. Unreasonableness refers to the cost of transportation to the shipper or the availability or quality of service to the shipper. The likely change in costs or services must arise from the agreement and be material and meaningful. The Commission may not determine that rate increases or service reductions are "per se" impermissible results of agreements. Rate increases or decreases in the frequency or variety of service may be necessary to achieve other benefits of the Act. The determination whether an agreement is likely to produce "an unreasonable increase in the price of transportation" does not authorize the FMC to engage in the type of ratemaking analysis undertaken by regulators of public utilities or as applied in the domestic offshore trades.

A second aspect of the unreasonableness requirement is that the negative impact upon shippers may be offset by the benefits of an agreement. For example, the competitive harm ensuing from conferences, already diminished by the statutory limitations on conference activity, can and often will be offset by the significant benefits of such activity. The privately-owned ocean common carriers that service U.S. foreign commerce are likely to be subjected to increasing competition from state-subsidized and controlled carriers. A conference's ability to address problems of overcapacity and rate instability is an important benefit that the Commission must weigh.

Another possible benefit to be considered by the Commission is the impact of an agreement on U.S. foreign policy and international comity. The Conferees agree that the United States should act with sensitivity to the interests of its trading partners when administering shipping regulation. One possible problem area arises from cargo reservation schemes in the laws or trading practices of some foreign nations. There are important policy considerations that have led the United States to oppose some cargo reservation schemes. The Conferees understand that these considerations may lead our Government to continue this opposition in many cases. At the same time, the Conferees recognize that some U.S.-flag carriers, through no fault of their own and despite such government opposition, may be confronted with a cargo reservation scheme that will exclude them from a trade entirely, or so limit their access to certain cargo as to make service of the trade commercially unattractive, unless they participate in a revenue or cargo sharing agreement with the carriers of such nations that preserves the right of the U.S.-flag parties to the agreement to compete for reserved cargo. Under such circumstances, the Conferees consider it a clear benefit to allow U.S.-flag carrier participation in the trade. Although the Commission might generally not approve such restrictive arrangements, the Commission, after giving due consideration to the maritime and trade policy views of the United States, may conclude that approval is necessary in order to maintain a viable U.S.-flag service, as it has in the past in similar circumstances.

Another important potential benefit to be considered is any efficiency-creating aspects of an agreement. Agreements involving significant carrier integration are, if properly limited to achieve such important benefits, to be favorably considered by the Commission and the courts. Joint ventures and other cooperative agreements can enable carriers to raise necessary capital, attain economies of scale, and rationalize their services. Pooling

arrangements can also offer significant benefits in reducing excess capacity and promoting efficiency.

In assessing the benefits of any of these agreements, however, the Commission need not wear blinders. If, in applying its expertise, the Commission establishes that reasonable and commercially proven alternative arrangements will provide most or all of the essential benefits without the same anticompetitive impact, it may weigh this fact in its decision calculus. The conferees agree, however, that this standard does not represent a return to existing law, under which proponents may have been compelled to show that no less anticompetitive alternative was available to obtain the benefits of the Act.

The Conferees intend that ocean carriers be free to structure their own affairs, except when such structuring violates specific statutory provisions or the new, more narrowly drawn, general standard. Even when an agreement raises potential issues under the general standard, the Conferees believe that the procedural framework for application of that standard will give carriers maximum flexibility. Carriers will be able to obtain a prompt ruling from the Commission under the new provisions for expedited review. If the Commission objects to an agreement under the general standard, the filing party may withdraw it, modify it, or force the Commission to make its showing in court. Even after such a court proceeding is initiated, the filing party retains the option of withdrawing or settling the matter with the Commission.

In sum, the general rules of operation and approval of agreements have been developed by the Congress with full awareness of the realities of international ocean carriage; a general standard has been retained to provide the necessary flexibility to deal with the unusual or severe cases not addressed by other prohibitions in the Act.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

Endangered and Threatened Wildlife and Plants; Notice of 90-Day Finding on Petition To Delist the Selkirk Mountains Woodland Caribou

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of petition finding.

SUMMARY: The U.S. Fish and Wildlife Service (Service) announces a 90-day finding on a petition to delist the endangered population of woodland caribou (*Rangifer tarandus caribou*) located in the Selkirk Mountains of northern Washington, northern Idaho, and southern British Columbia. The Service finds that the petition has not presented substantial scientific or commercial information indicating that the petitioned action may be warranted.

DATES: The finding announced in this document was made on November 10, 1993. Comments and materials related to this petition finding may be submitted to the Field Supervisor at the address below until further notice.

ADDRESSES: Data, information, comments, or questions concerning this petition should be submitted to the Boise Field Office, U.S. Fish and Wildlife Service, 4696 Overland Road, Room 576, Boise, Idaho 83705. The petition finding, supporting data, and comments are available for public inspection, by appointment, during normal business hours at the above address.

FOR FURTHER INFORMATION CONTACT: Dr. Charles H. Lobdell at the above address (telephone 208/334–1931).

SUPPLEMENTARY INFORMATION:

Background

The U.S. Fish and Wildlife Service received a petition on December 10, 1992, to delist the endangered population of woodland caribou (*Rangifer tarandus caribou*) located in the Selkirk Mountains of northern Washington, northern Idaho, and southern British Columbia. The petition was received from Peter B. Wilson representing the Greater Bonners Ferry Chamber of Commerce, Bonners Ferry, Idaho. The petition, dated December 9, 1992, clearly identified itself as a petition, and contained the name, signature, and address of the petitioner.

The petition and other documentation have been reviewed to determine if substantial information has been presented to indicate that the requested action may be warranted. Section 4(b) of the Endangered Species Act of 1973, as amended (Act), requires that listing determinations be made ". . . solely on the basis of the best scientific and commercial data available. . . ."

The petition to delist the woodland caribou is based on 16 "Facts," 7 "Points," and a "Conclusion," as stated by the petitioner. These statements can be synthesized into eight main assertions, which are summarized below, and followed by the Service's response.

Assertion 1. "No biological reason or need for the listing has been established by research and conclusion" ("Point 1a," "Fact 6"). The determination to list and maintain the listing of the caribou is based solely on conjecture ("Point 7") and "inadequate research" ("Conclusion").

Service Response. Determinations to list are made on the basis of the best scientific and commercial data available. The assertion that listing the woodland caribou is based solely on conjectures is based on the petitioner's interpretation of the draft revised Recovery Plan. The Recovery Plan stated a number of unknowns about caribou biology, population factors, and habitat variables. These statements are made in the context of the scientific process and not of a legal debate. Though it is true there is much to learn about the caribou, the Service had and continues to have enough information to warrant the listing of the caribou, including substantial information on habitat fragmentation, poaching, and a genetic bottleneck.

Assertion 2. "Biologically there is no distinction between the mountain and woodland caribou" ("Fact 1"). The mountain and woodland caribou ranges overlap ("Fact 4"). The woodland, not mountain caribou "have been transplanted to the Selkirk mountains for the purposes of increasing the existing herd and creating new herds from distinctly different locations in Canada—Revelstoke and Williams Lake area, Anaheim Lake area" ("Fact 5"). "The transplant of woodland caribou will ultimately taint, and thereby destroy, the 'distinct' herd of mountain caribou indigenous to the Canadian Selkirks" ("Point 1b").

Service Response. Woodland caribou (*Rangifer tarandus caribou*) occur in two distinct ecotypes: the northern ecotype caribou and the mountain ecotype caribou. The endangered population of woodland caribou in the Selkirk Mountains is of the mountain ecotype. Transplants occurred within the mountain ecotype range, from the Revelstoke population to the Selkirk population. Transplants also occurred from the northern ecotype range to the mountain ecotype range, as the Anaheim population is a northern ecotype caribou. No caribou were transplanted from the Williams Lake area. Chesser *et al.* (in prep) state that the addition of Anaheim and Revelstoke animals to the Selkirk Mountains population would allow for additional genetic information while preserving alleles and genetic variation in the Selkirk Mountains caribou population.

Assertion 3. It was not determined if the continental United States ever had a resident herd, and if so, if such herd was extinct before transplants began ("Fact 3," "Point 4"). There is inconsistent documentation on whether Montana ever had a resident population ("Point 2"). There is no evidence that the caribou in Idaho in the 1950's were

resident or wanderers ("Fact 13"). A bull found in the United States was obviously a wanderer from Canada ("Fact 15"). At the time of listing there was no herd in Idaho, so the population in Idaho was extinct ("Fact 14").

Service Response. As to questions about the historical range of caribou in the western United States, it is well-documented that it was once more extensive than it is today. Caribou once occurred as far south as the Salmon River in Idaho and as far east as the North Fork of the Flathead River in Montana (Evans 1960). Before 1910, they occupied the Selkirk, Cabinet, Purcell, and Bitterroot Mountains (Evans 1960, Layser 1974). By the 1950's, caribou were reduced to about 100 animals occupying about 1,000 square miles in the Selkirk Mountains, with remnant bands in the Cabinet and Yaak Mountains (Flinn 1956, Evans 1960). Although by 1983 most caribou use in the Selkirk Mountains occurred in British Columbia, some caribou also used, and continue to use, habitats in the United States. Regarding the argument that there was no herd in Idaho at the time of listing, hence it should be considered extinct in Idaho, the Service did not distinguish the caribou population by State, but by the United States population. Caribou movement within home ranges may cross political boundaries but that does not change the fact that the Selkirk population was in danger of extinction at the time it was listed, nor that it is still in danger of extinction.

Assertion 4. Old growth forest was "not established as a requirement" for caribou habitat ("Point 5").

Service Response. As to the assertion that old growth forest is not a requirement by caribou for forage, seasonal habitat use patterns and forage requirements of caribou have been documented by research in northern Idaho and British Columbia. Occasionally, caribou have been observed feeding on succulent, newly emerging vegetation in clearcuts during the spring. However, data show that, even during spring, caribou preferentially use old-growth and mature forest habitats as a source of forage (Wakkinen *et al.* 1992, Allen-Johnson in prep.). As to use of old-growth during other seasons of the year, caribou nearly exclusively use old-growth forest during early winter through late spring (Scott and Servheen 1984).

Assertion 5. Most of the poaching occurred in Canada, so it is erroneous to imply that the Act contributed to the reduction of poaching, since Canada is not subject to our Act ("Point 6").

Service Response. Cases of poaching in the United States have been documented before and after the caribou listing, and there is no information to indicate that poaching in the United States is no longer a threat.

Assertion 6. It is normal for population trends of caribou to increase and decrease ("Point 12").

Service Response. It is true that population numbers are often cyclic in ungulates; however, the United States woodland caribou population significantly declined by 1900, has continued to decline since then, and has not begun to recover. The Service cannot assume that a prolonged population decline is part of a natural cycle, and that the population will rebound. Furthermore, its numbers are so low, that the population is close to extinction.

Assertion 7. No "environmental impact statement was prepared for the listing" ("Point 3", "Fact 16").

Service Response. The petitioner is correct in stating that an environmental impact statement was not prepared. As stated in the **Federal Register** on October 25, 1983 (48 FR 49244), the Service determined that an Environmental Assessment need not be prepared in connection with regulations adopted pursuant to section 4 of the Act.

Assertion 8. "Listing is inappropriate because there are thousands of woodland caribou existing in Canada" ("Point 1c," "Fact 2").

Service Response. There are thousands of northern ecotype caribou in northern Canada and Alaska. However, the mountain ecotype caribou are far less numerous. The listed population of woodland caribou in the Selkirk Mountains is in danger of extinction throughout its range.

The Service maintains that the listed population of woodland caribou continues to require the protection of the Act. The Service concludes that no new information was provided in the petition that would support the removal of the woodland caribou from the List of Endangered and Threatened Wildlife.

RIN 1018–AC10

Endangered and Threatened Wildlife and Plants; Proposed Rule To List the Flat-tailed Horned Lizard as Threatened

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: The U.S. Fish and Wildlife Service (Service) proposes to list the flat-tailed horned lizard (*Phrynosoma mcallii*) as a threatened species pursuant to the Endangered Species Act of 1973, as amended (Act). The Service is taking this action because of documented and anticipated population declines associated with widespread habitat loss, fragmentation, and degradation due to human activities such as agricultural developments, urban expansion, off-highway vehicle use, energy developments, and military activities. Pesticide spraying from adjacent agricultural areas may have reduced ant populations, the primary prey of the flat-tailed horned lizard.

DATES: Comments from all interested parties must be received by January 28, 1994. Public hearing requests must be received by January 13, 1994.

ADDRESSES: Comments and materials concerning this proposal should be sent to the Field Supervisor, U.S. Fish and Wildlife Service, 2140 Eastman Avenue, Suite 100, Ventura, California 93003. Comments and materials received will be available for public inspection, by appointment, during normal business hours at the above address. The complete file for this rule is available for public inspection, by appointment, during normal business hours at the Ventura Field Office, U.S. Fish and Wildlife Service, 2140 Eastman Avenue, Suite 100, Ventura, California 93003 (805/644–1766).

FOR FURTHER INFORMATION CONTACT: Mr. Craig Faanes, Field Supervisor at the above address or at 805/644–1766.

SUPPLEMENTARY INFORMATION:

Background

The flat-tailed horned lizard was originally described as *Anota M'callii*, a monotypic genus (Hallowell 1852 in Johnson and Spicer 1985). The holotype was taken from the western Sonoran desert between Camp Yuma and Vallecito. Girard (1858 as cited by Bryant 1911) rejected the name *Anota* in favor of *Doliosaurus*, and included two other species in this genus. Cope (1866 as cited by Johnson and Spicer 1985) changed the name to *Phrynosoma macallii*. Cope (1900 as cited by Johnson and Spicer 1985) later returned the species to the genus *Anota*, along with other species of horned lizards. Bryant (1911) removed the other species from this genus, again leaving the flat-tailed horned lizard in the monotypic genus *Anota*. Norris and Lowe (1951 as cited by Johnson and Spicer 1985) placed the species in the genus *Phrynosoma*, again with other species of horned lizards. Funk (1981) clarified the spelling of the specific epithet as *mcallii*.

The flat-tailed horned lizard is a small, cryptically colored iguanid lizard that is restricted to flats and valleys of the western Sonoran desert. It has the typically flattened body shape of horned lizards, a dark mid-vertebral stripe, a somewhat flattened tail, relatively long head spines or horns, and two rows of fringed scales on each side of the body. Dorsally, the flat-tailed horned lizard is pale gray to light rusty brown; the animal's ventral surface is white and unmarked. Maximum length, excluding the tail, is about 3.2 inches (Stebbins 1985).

The range of the flat-tailed horned lizard includes the Coachella Valley in Riverside County, California; the Imperial and Borrego Valleys in Imperial and extreme eastern San Diego Counties, California; northeastern Baja California Norte east of the Sierra de Juarez, Mexico; south of the Gila River and west of the Gila and Tinajas Altas Mountains in Yuma County, Arizona; and north and west of Bahia de San Jorge in northwestern Sonora, Mexico (Johnson and Spicer 1985, Rorabaugh *et al.* 1987, Stebbins 1985, and Turner and Medica 1982). Within this range, the flat-tailed horned lizard typically occupies sandy, desert flatlands with sparse vegetation and low plant species diversity, but it is occasionally found in low hills or areas covered with small pebbles or desert pavement. Habitat with the greatest relative densities of flat-tailed horned lizards is characterized by surface soils containing some loose or windblown sand, but this species rarely occurs in dunes (Rorabaugh *et al.* 1987, Turner *et al.* 1980b).

Turner and Medica (1982) identified four areas of optimal habitat in California where flat-tailed horned lizard relative abundance indexes were relatively high. Three of those are located entirely within Imperial County, including southern East Mesa, southeastern Yuha Desert, and the Superstition Mountain area; and the fourth is located primarily within eastern San Diego County in the vicinity of Benson Dry Lake near Ocotillo Wells. In Arizona, an area southeast of Yuma also registered a relatively high abundance index (Rorabaugh *et al.* 1987).

About 29 percent of the lizard's historic range is in Mexico, but its distribution is not well known there. In Baja California Norte, flat-tailed horned lizards have been collected near the International Boundary, near Laguna Salada, and Mexicali, but its distribution is limited by extensive agriculture that extends from Mexicali to the Colorado River and by the wetland and riparian communities of the Colorado River Delta, the Rio Hardy, and Laguna Salada. South and east of San Luis, Sonora, and extending to the Gulf of California is a broad sandy plain that is similar to and contiguous with flat-tailed horned lizard habitat in Arizona. Records for the species exist from this area and at sandy flats near Puerto Penasco. Between these two areas is a region dominated by the large dune system of the Gran Desierto and volcanic or montane terrain in the Sierra Pinacate region, an area from which few locality records exist, and which probably has limited and patchy habitat for flat-tailed horned lizards (Gonzalez-Romero and Alvarez-Cardenas 1989, Johnson and Spicer 1985).

In California, remaining habitat is primarily administered by the Bureau of Land Management (43.4 percent), private landholders (42.2 percent), Department of the Navy (6.9 percent), and California Department of Parks and Recreation (5.8 percent) (Bolster and Nicol 1989). In Arizona, land supporting the species is administered by the Bureau of Reclamation, Bureau of Land Management, Department of the Air Force, State of Arizona, and private individuals.

The Service included *P. mcallii* as a category 2 candidate for listing in its original Review of Vertebrate Wildlife, published in the **Federal Register** of December 30, 1982 (47 FR 58454). Category 2 species are those for which data in the Service's possession indicate listing may be appropriate, but for which additional biological information is needed to support a proposed rule. This species was again included in category 2 in the Service's revised Vertebrate Notice of Review of September 18, 1985 (50 FR 37958). Subsequently, the status of the flat-tailed horned lizard was elevated to category 1 on January 6, 1989 (54 FR 554) as new data on this species became available (Carlson and Mayhew 1988; Olech, undated; Rorabaugh 1987). Substantial information supporting the biological appropriateness of this proposed rule now exists (Bolster and Nichol 1989, Bureau of Land Management 1991).

Summary of Factors Affecting the Species

Section 4 of the Endangered Species Act (16 U.S.C. 1533 *et seq.*) and regulations (50 CFR part 424) promulgated to implement the listing provisions of the Act set forth the procedures for adding species to the Federal list. A species may be determined to be an endangered or threatened species due to one or more of the five factors described in section 4(a)(1). These factors and their application to the flat-tailed horned lizard (*Phrynosoma mcallii*) are as follows:

A. The Present or Threatened Destruction, Modification, or Curtailment of Its Habitat or Range.

Human impacts have resulted in the loss of roughly 34 percent of the historic flat-tailed horned lizard habitat. In California's Imperial and Coachella Valleys, a large portion of the flat-tailed horned lizard's habitat has been converted to urban or agricultural use or was flooded by the filling of the Salton Sea from 1905 to 1907 (Johnson and Spicer 1985, Rado 1981). The precise extent of this lizard's historic habitat cannot be quantified, because filling of

the Salton Sea and much of the agricultural development predates most collections of flat-tailed horned lizards. However, assuming that the flat-tailed horned lizard was well distributed within the areas of the Imperial Valley that are now occupied by agriculture, urban development, and the Salton Sea, about 40 percent of the flat-tailed horned lizard's habitat in California has been converted to other uses and no longer supports this species. Approximately 23 to 27 percent of the historic habitat in Arizona has been lost due to human uses (J. Rorabaugh, U.S. Fish and Wildlife Service, pers. comm., 1988). In Mexico, no estimates of habitat loss are available, but in Sonora less than 10 percent of the habitat has been converted to agriculture, urban, or other uses. Most of the impacts in Sonora are confined to the San Luis Valley. In Baja California Norte, Mexico, considerable habitat loss has occurred primarily in the Mexicali Valley where urban and agricultural development extends from Mexicali to the Colorado River.

Ninety-five percent of the remaining optimal habitat in California is threatened by one or more impacts including agricultural and urban development, off-highway vehicle use, geothermal development, sand and gravel operations, military maneuvers, and construction of roads and utility corridors (Carlson and Mayhew 1988). Urban growth is an important component of these threats. The 1990 human population estimate for the Coachella Valley was 227,000, which includes the Palm Springs metropolitan area and the northern portion of the flat-tailed horned lizard's range. The Coachella Valley Association of Governments (Lester Cleveland, pers. comm., 1993) projects that by the year 2010 over 497,000 people will reside in the Coachella Valley, plus 165,000 to 200,000 seasonal residents. In 1989, the population of Imperial County was 116,000. The cities of El Centro, Imperial, and Calexico all grew by about one-third between 1980 and 1989 (Bureau of Reclamation 1991). In addition to urban growth, a number of proposed projects threaten flat-tailed horned lizard habitat in California, including a planned prison, waste disposal sites, utility corridors, groundwater recharge projects, canal construction, and road construction associated with all the above. Gold mining and pesticide spraying are also potential threats (Bolster and Nicol 1989).

Of the remaining habitat in Arizona, 36 percent is threatened by various human impacts (Johnson and Spicer 1985). The Marine Corps Air Station at Yuma is proposing to locate a large munitions storage facility in flat-tailed horned lizard habitat. The communities of San Luis, Yuma, and The Foothills are expanding into the habitat of this species. Agricultural development and road construction continues to expand from the South Gila, Yuma, and San Luis valleys to the south and east to adjacent upland areas occupied by flat-tailed horned lizards (Johnson and Spicer 1985, Turner *et al.* 1980a). A sewage sludge disposal site, State of Arizona prison facility, groundwater well field, and a desalinization sludge disposal site have been recently constructed in flat-tailed horned lizard habitat southeast of Yuma. A landfill and a new highway to connect San Luis and The Foothills are also proposed. In addition, the Marine Corps Air Station conducts limited ground maneuvers at the southwest end of the Barry Goldwater Range, and the U.S. Border Patrol patrols this area intensively and often travels off-road to follow tracks and intercept illegal aliens (C. Bates, Marine Corps Air Station, pers. comm., 1992).

Activities that adversely affect the lizard and its habitat in the United States also occur in Mexico, albeit to a lesser degree. Cooperative farms or ejidos, geothermal development, groundwater pumping, sand and gravel removal, and off-highway vehicle activity have contributed to habitat destruction or degradation in Mexico. Johnson and Spicer (1985) estimated 66 and 14 percent of the remaining habitat in Baja California Norte and Sonora, respectively, were threatened with destruction.

The flat-tailed horned lizard has usually been described as uncommon or rare (Klauber 1932, Turner and Medica 1982, Turner *et al.* 1980b, Rorabaugh *et al.* 1987). However, evidence suggests it was once more abundant. In the early 1960's this species was one of the most common lizards along Highway 78 in East Mesa, Imperial County, California (Carlson and Mayhew 1988, Mayhew 1965). However, this area was identified as supporting low densities of flat-tailed horned lizards during more recent surveys (Turner and Medica 1982). Norris (1949) speculated the species was fairly common in an area of the Coachella Valley where, currently, flat-tailed horned lizards occur in low densities (Barrows 1986, Turner *et al.* 1980b).

Declining relative abundance indexes have been documented at one of the four flat-tailed horned lizard optimal habitat areas in California—the Yuha Desert (Bureau of Land Management 1991; Gavin Wright, Bureau of Land Management, pers. comm., 1993). Relative abundance is stable at two other areas in California, but data are inadequate to evaluate trends at the fourth area in California and in those areas in Arizona. Recreational off-highway vehicle activity, utility corridor construction, sand and gravel extraction, geothermal development, Border Patrol activity, and highway maintenance work are implicated in the declines of the flat-tailed horned lizard (Bolster and Nicol 1989, Bureau of Land Management 1991).

The Benson Dry Lake area was described by Turner *et al.* (1980b) as the most remarkable of the four optimal habitat areas in California. This area is managed by California Department of Parks and Recreation, and although not subjected to many of the impacts that occur on Bureau of Land Management lands, it is located within the Ocotillo Wells State Vehicular Use Area, and off-highway vehicular use there may be responsible for observed declines in flat-tailed horned lizards (Bolster and Nicol 1989). California Department of Parks and Recreation is in the process of expanding the Ocotillo Wells State Vehicular Use Area onto an additional 45 square miles of flat-tailed horned lizard habitat, currently under management by the Bureau of Land Management (California Department of Parks and Recreation 1986; K. Nicol, California Department of Fish and Game, pers. comm., 1992).

Habitat loss and other impacts have caused fragmentation of this species' distribution. Agricultural and urban development in the Imperial Valley have isolated populations in East Mesa from those west of the Salton Sea, in the Yuha Desert, and in the Superstition Mountain area. Flat-tailed horned lizards in the Coachella Valley may be geographically isolated from lizards in the Imperial Valley because of the filling of the Salton Sea and conversion of habitat to croplands (Turner *et al.* 1980b). The All American and Coachella Canals are likely barriers to movement, and major highways such as Interstate 8 in Imperial County and Interstate 10 in Riverside County further fragment populations. The importance of habitat fragmentation in determining the status of this species is linked to the insular properties of isolated populations (Shafer 1990). Fragmentation creates isolated populations that, because of reduced population size, have an increased probability of extirpation (Wilcox and Murphy 1985). Once a local population is extirpated, recolonization of that area by individuals from adjacent

populations is rendered unlikely due to its isolation (Frankel and Soule 1981).

B. Overutilization for Commercial, Recreational, Scientific, or Educational Purposes

Horned lizards have been popular in the pet trade for many years, but generally do poorly in captivity (Stebbins 1985). The extent to which this factor has contributed to the decline of the flat-tailed horned lizard is unknown. The cryptic nature of this species makes it difficult to find, thereby eliminating collection as a major factor in this species' decline (Bolster and Nicol 1989).

C. Disease or Predation

Parasitism by nematodes and red mites has been observed in some flat-tailed horned lizards (Norris 1949), but this is not believed to be a threat to the species (Bolster and Nicol 1989). Bolster and Nicol (1989) suggested that predation of flat-tailed horned lizards near agricultural areas and urban areas may be elevated because of the presence of house cats in urban areas and the abundance of loggerhead shrikes and other predatory birds in croplands.

D. The Inadequacy of Existing Regulatory Mechanisms

The States of California and Arizona prohibit the collection of flat-tailed horned lizards except by permit. Arizona has further designated the flat-tailed horned lizard as a threatened species, which includes "species or subspecies whose continued presence in Arizona could be in jeopardy in the near future. Serious threats have been identified and populations are (a) lower than they were historically or (b) extremely local and small" (Arizona Game and Fish Department 1988). Nevertheless, no State regulations protect the habitat of this species. State listing in Arizona has no regulatory requirements, but is used as a planning aid to prevent further population declines.

In California, the flat-tailed horned lizard occurs in several special management areas where it receives varying levels of protection. The Bureau of Land Management has designated three Areas of Critical Environmental Concern (ACEC) for protective management of the flat-tailed horned lizard and its habitat. These include the East Mesa, Yuha Desert, and West Mesa (Superstition Mountain area) ACECs. The East Mesa and Yuha Desert ACECs also fall within the boundaries of wildlife habitat areas that require preparation of habitat management plans to address protection of special status species, such as the flat-tailed horned lizard. This species also occurs within the boundaries of the San Sebastian Marsh ACEC and two wilderness study areas (WSAs): The North Algodones Dunes and South Algodones Dunes WSAs. In eastern San Diego County, the flat-tailed horned lizard occurs within the boundaries of Anza Borrego Desert State Park where resource protection is a high priority. In Riverside County, the flat-tailed horned lizard occurs at the Coachella Valley Preserve, an area managed jointly by the Bureau of Land Management, Fish and Wildlife Service, California Department of Fish and Game, and The Nature Conservancy for the preservation of the Coachella Valley fringe-toed lizard, a federally listed threatened species.

The ACEC and wildlife habitat area designations by the Bureau of Land Management have had limited success in protecting flat-tailed horned lizard habitat. ACEC management goals include a provision to: "Provide for other uses in the designated areas compatible with the protection and enhancement of the significant natural and cultural resources" (Bureau of Land Management 1980). Although management prescriptions for the ACECs include measures such as restricting off-highway vehicle use, a variety of human uses are allowed and the relative abundance of the flat-tailed horned lizard has declined in the Yuha Desert ACEC (Bureau of Land Management 1991; Gavin Wright, pers. comm., 1993).

The two WSAs in the Algodones Dunes are managed by the Bureau of Land Management under "interim management policy guidelines" that require these areas be managed "so as not to impair the suitability of such areas for preservation as wilderness" (Section 603(c), Federal Land Policy Management Act of 1976—43 U.S.C. 1782(c)). Limited habitat for the flat-tailed horned lizard exists in these two wilderness study areas, with the species probably afforded some protection by these designations. The flat-tailed horned lizard is not well represented or abundant in either Anza Borrego Desert State Park or the Coachella Valley Preserve (Turner *et al.* 1980b). Habitat in these areas is relatively well protected from human-caused impacts. Although human activities are regulated, habitat degradation and population declines continue.

In Arizona, the flat-tailed horned lizard occurs within the boundaries of the Gran Desierto Dunes ACEC. The Yuma Desert habitat management plan addresses protection of most flat-tailed horned lizard habitat on the Barry Goldwater Range. Implementation of management prescriptions in these areas is complicated due to joint management by the Bureau of Land Management and the Department of the Air Force.

In Sonora, Mexico, the species occurs within the Pinacate Protective Zone, an area administered by the Mexican government, and with use restrictions similar to a National Park in the United States. However, the boundaries of this area are not well established, enforcement of regulations is minimal, and the distribution and abundance of the flat-tailed horned lizard is not well known in this area. The Pinacate Protective Zone is primarily a volcanic zone that contains limited habitat for flat-tailed horned lizards (C. Wilson, Organ Pipe National Monument, Arizona, pers. comm., 1992; Johnson and Spicer 1985).

E. Other Natural or Manmade Factors Affecting Its Continued Existence

The California Department of Food and Agriculture has sprayed pesticides in flat-tailed horned lizard habitat in East Mesa and the Yuha Desert to control the beet leafhopper (*Circulifer tenellus*), an agricultural pest. The extent of pesticide treatment varies annually depending upon the predicted severity of the infestation, but treatment of any one area generally occurs every 3 to 5 years (California Department of Food and Agriculture 1991). Pesticide treatments in East Mesa and the Yuha Desert have occurred over a period of more than 30 years and have consisted of aerial spraying of DDT mixed with diesel oil, and in later years, aerial application of malathion (Bolster and Nicol 1989). These pesticide treatments may contribute to the observed decline of the flat-tailed horned lizard, particularly in East Mesa (Bolster and Nicol 1989, Edwards 1979, Olech 1984, Carlson and Mayhew 1988, Rado 1981). Populations of the blunt-nosed leopard lizard (*Gambelia silus*), a federally listed threatened species of the San Joaquin Valley in California have declined due to pesticide applications (Snow 1972). Of particular concern is the effect aerial pesticide application may have on harvester ants, which are the primary prey item of the flat-tailed horned lizard from May through July (Carlson and Mayhew 1988, Muth and Fisher 1991, Turner and Medica 1982). Pesticide drift from croplands may also adversely affect flat-tailed horned lizards in adjacent desert lands (Bolster and Nicol 1989). Recently proposed changes in the beet leafhopper control program may reduce impacts to the flat-tailed horned lizard and its prey base (California

Department of Food and Agriculture 1991).

Precipitation has been correlated with insect abundance and lizard densities (Mayhew 1965, Pianka 1986, Wisdom 1991, Turner *et al.* 1982). Within the range of the flat-tailed horned lizard, rainfall, particularly summer rainfall, is highly unpredictable both temporally and spatially (Turner and Brown 1982). Localized areas may experience long-term drought, which, in turn, may result in decreased local lizard populations. Because of the fragmented distribution of the flat-tailed horned lizard, this unpredictability in precipitation increases the chance of localized extirpations.

The Service has carefully assessed the best scientific and commercial information available regarding the past, present, and future threats to this species. Based on this evaluation, the preferred action is to list the flat-tailed horned lizard as threatened. The Act states that the term "threatened species" means any species likely to become an endangered species within the foreseeable future. The Act defines an "endangered species" as one that is in danger of extinction throughout all or a significant portion of its range. Much of the habitat of this species has been lost, fragmented, or degraded by human use, and relative densities of this lizard have declined in at least one of five optimal habitat areas. In addition, current regulatory mechanisms and special management actions by the Bureau of Land Management and others have been inadequate in stemming habitat loss or reversing these declines. However, flat-tailed horned lizard relative abundance is apparently stable in two optimal habitat areas in California, and although relative abundance trend data does not exist for Arizona, the habitat in Arizona is less threatened than in California, and threats are minimal in much of Sonora. The Service, therefore, believes the flat-tailed horned lizard meets the definition of a threatened species under the Endangered Species Act.

Critical Habitat

Section 4(a)(3) of the Act, as amended, requires that to the maximum extent prudent and determinable, the Secretary designate any habitat of a species that is considered to be critical habitat at the time the species is determined to be endangered or threatened. Furthermore, the Service is to designate critical habitat on the basis of the best scientific and commercial data available after taking into consideration the economic and other relevant impacts of specifying an area as critical habitat (16 U.S.C. 1533(b)(2)). The Service finds that proposing critical habitat for the flat-tailed horned lizard is not determinable at this time. Designation of critical habitat must take into account the economic impact of specifying particular areas as critical habitat. The data to evaluate economic impacts resulting from such designation are not currently available. In addition, although five areas of optimal habitat have been identified (which could be appropriate as critical habitat), the data necessary to define boundaries are, in some cases, dated particularly in the case of the Benson Dry Lake area. In Arizona, data are lacking to clearly define an eastern boundary of any proposed critical habitat there. A delay in the proposed listing of the species to gather additional information and perform analyses would not serve the needs of this species. The Service will continue to gather information on the flat-tailed horned lizard and will publish a determination on the designation of critical habitat at a later date.

Available Conservation Measures

Conservation measures for species listed as endangered or threatened under the Act include recognition, recovery actions, requirements for Federal protection, and prohibitions against certain practices. Recognition through listing encourages and results in conservation actions by Federal, State, county, and private agencies; groups; and individuals. The Endangered Species Act provides for possible land acquisition and cooperation with the States and requires that recovery actions be carried out for all listed species. Such actions are initiated prior to listing, conditions permitting. The protection required of Federal agencies and the prohibitions against taking and harm are discussed, in part, below.

Section 7(a) of the Act, as amended, requires Federal agencies to evaluate their actions with respect to any species that is proposed or listed as endangered or threatened and with respect to its critical habitat, if any is being designated. Regulations implementing this interagency cooperation provision of the Act are codified at 50 CFR part 402. Section 7(a)(4) of the Act requires Federal agencies to confer informally with the Service on any action that is likely to jeopardize the continued existence of a proposed species or result in destruction or adverse modification of proposed critical habitat. If a species is listed subsequently, section 7(a)(2) requires Federal agencies to ensure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of such a species or to destroy or adversely modify its critical habitat. If a proposed Federal action may affect a listed species, the responsible Federal agency must enter into formal consultation with the Service.

Federal agencies likely to be affected by this proposal to list the flat-tailed horned lizard include the Bureau of Land Management, which administers most of the habitat in California, Bureau of Reclamation, Border Patrol, and Departments of the Air Force and Navy.

The Department of the Navy manages several withdrawn parcels in the Imperial Valley, including lands in the Superstition Mountain area, southwest end of the Salton Sea, and East Mesa. Luke Air Force Base and the Bureau of Land Management jointly manage flat-tailed horned lizard habitat on the Barry Goldwater Range in Arizona. The Marine Corps Air Station at Yuma uses the western portion of the Barry Goldwater Range where the flat-tailed horned lizard occurs. The Bureau of Reclamation administers much of the habitat in Arizona west of the Barry Goldwater Range, as well as scattered parcels in the Imperial and Coachella Valleys. Most of these lands are managed jointly with the Bureau of Land Management. The Border Patrol does not administer any Federal lands, but carries out patrol and enforcement activities on lands along the international border in both California and Arizona.

The Act and its implementing regulations found at 50 CFR 17.21 and 17.31 set forth a series of general prohibitions and exceptions that apply to all threatened wildlife. These prohibitions, in part, make it illegal for any person subject to the jurisdiction of the United States to take (including harass, harm, pursue, hunt, shoot, wound, kill, trap, or collect; or attempt any such conduct), import or export, transport in interstate commerce in the course of a commercial activity, or sell or offer for sale in interstate or foreign commerce any listed species. It is also illegal to possess, sell, deliver, carry, transport, or ship any such wildlife that has been taken illegally. Certain exceptions apply to agents of the Service and State conservation agencies.

Permits may be issued to carry out otherwise prohibited activities involving threatened wildlife species under certain circumstances. Regulations governing permits are at 50 CFR 17.22, 17.23, and 17.32. Such permits are available for scientific purposes, to enhance the propagation or survival of the species, and/or for incidental take in connection with

otherwise lawful activities. For threatened species, there are also permits for zoological exhibition, educational purposes, or special purposes consistent with the purposes of the Act. Requests for copies of the regulations and inquiries regarding them may be addressed to the Office of Management Authority, U.S. Fish and Wildlife Service, 4401 North Fairfax Drive, Room 432, Arlington, Virginia 22203–3507, (703) 358–2104.

Public Comments Solicited

The Service intends that any final action resulting from this proposal will be as accurate and as effective as possible. Therefore, any comments or suggestions from the public, other concerned governmental agencies, the scientific community, industry, or any other interested party concerning any aspect of this proposal are hereby solicited. Comments particularly are sought concerning:

(1) Biological, commercial trade, or other relevant data concerning any threat (or lack thereof) to the flat-tailed horned lizard;

(2) The location of any additional populations of this species and the reasons why any habitat should or should not be determined to be critical habitat for the flat-tailed horned lizard as provided by section 4 of the Act;

(3) Additional information concerning the range, distribution, and population density of the flat-tailed horned lizard; and

(4) Current or planned activities in the subject area and their possible impacts on the flat-tailed horned lizard.

Any final decision on this proposal will take into consideration the comments and any additional information received by the Service, and such communications may lead to adoption of a final regulation that differs from this proposal.

The Endangered Species Act provides for a public hearing on this proposal, if requested. Requests must be filed within 45 days of the date of the proposal. Such requests must be made in writing and addressed to the Fish and Wildlife Service (see ADDRESSES section).

National Environmental Policy Act

The Fish and Wildlife Service has determined that an Environmental Assessment, as defined under the authority of the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to section 4(a) of the Endangered Species Act of 1973, as amended. A notice outlining the Service's reasons for this determination was published in the **Federal Register** on October 25, 1983 (48 FR 48244).

References Cited

A complete list of all references cited herein, as well as others, is available upon request (see **ADDRESSES** section).

Proposed Regulation Promulgation

Accordingly, the Service hereby proposes to amend part 17, subchapter B of chapter I, title 50 of the Code of Federal Regulations, as set forth below:

Part 17—[AMENDED]

1. The authority citation for part 17 continues to read as follows:

Authority: 16 U.S.C. 1361–1407; 16 U.S.C. 1531–1544; 16 U.S.C. 4201–4245; Pub. L. 99–625, 100 Stat. 3500, unless otherwise noted.

2. Section 17.11(h) is amended by adding the following in alphabetical order under "Reptiles" to the List of Endangered and Threatened Wildlife to read as follows:

§ 17.11 Endangered and threatened wildlife.

Endangered and Threatened Wildlife and Plants; Proposed Reclassification of the Plant Eryngium constancei (Loch Lomond Coyote-thistle) From Endangered to Threatened Status

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: The Fish and Wildlife Service (Service) proposes to reclassify *Eryngium constancei* (Loch Lomond coyote-thistle) from endangered to threatened status. This action is proposed due to substantial improvement in the status of this species. The only known location of this plant is now owned by the California Department of Fish and Game and, therefore, its habitat is largely protected from dredging and off-road vehicle traffic, the primary threats that

prompted emergency listing of the species in 1985. The plant is still threatened by occasional fence vandalism and vehicle trespass, logging and development within the lake watershed, and the risk of extirpation of the single population by chance events. This rule is proposed under the Endangered Species Act of 1973, as amended (Act), and is based on a thorough review of all available data. The proposed change in classification reflects an improvement in status and will not significantly alter the protection of this species under the Act. The Service seeks data and comments from the public on this proposal.

DATES: Comments from all interested parties must be received by January 28, 1994. Public hearing requests must be received by January 13, 1994.

ADDRESSES: Comments and materials concerning this proposal should be sent to the Field Supervisor, Sacramento Field Office, U.S. Fish and Wildlife Service, 2800 Cottage Way, room E–1803, Sacramento, California 95825–1846. Comments and materials received will be available for public inspection, by appointment, during normal business hours at the above address.

FOR FURTHER INFORMATION CONTACT: Jan Knight (see **ADDRESSES** section) at 916/978–4866.

SUPPLEMENTARY INFORMATION:

Background

Eryngium constancei (Loch Lomond coyote-thistle), a perennial herb of the parsley family (Apiaceae), annually produces slender, weak scapes (leafless flowering stalks) up to 30 centimeters (cm) (12 inches (in)) in height from its over-wintering rootstock (Sheikh 1983). The basal leaves, divided by septa (internal partitions), range from 10 to 20 cm (4 to 8 in) in length. Slender petioles, 8 to 12 cm (3 to 5 in) in length and usually longer than the leaf blade, bear diminutive spines. A dense "down" of minute hairs, unique to *E. constancei*, covers the leaves and especially the scapes. This character and the species' sparse flowers distinguish *E. constancei* from its closest relative, *E. aristulatum* var. *aristulatum*, and all other species of western North American *Eryngium* (Sheikh 1983).

Eryngium constancei was first collected by Robert Hoover in 1941 from the vernal lake near the community of Loch Lomond in southern Lake County, California. M. Yusuf Sheikh and Lincoln Constance recollected the plant in 1973. Later Sheikh (1983) described *E. constancei* along with two other *Eryngium* taxa. Sheikh, as part of his doctoral study completed in 1978, intensively searched for and failed to discover additional populations of the plant at other localities. Subsequent searches made in 1984 by two botanists employed by the State of California did not reveal any new populations of the plant.

In 1984, the owner of the species' habitat dredged and filled about 15 percent of the lakebed, and planned similar action for the rest of the lake. At that time, *E. constancei* habitat was also threatened by off-road vehicles and hikers, highway maintenance, and trash dumping. The Service was also concerned that an existing ditch that emptied into Cole Creek from the center of the lake might allow the escape of water needed to maintain high habitat quality.

The portion of the lakebed dredged and filled in 1984 was graded and reseeded with *Eryngium constancei* in late 1985. By 1992 *E. constancei* was firmly reestablished in this area (Ann Howald, California Department of Fish and Game, pers. comm., 1992). The 3-hectare (ha) (7-acre) vernal lake and an additional 0.4 ha (1 acre) of land surrounding the lake were purchased by the California Department of Fish and Game (CDFG) in 1988. A split-rail fence was constructed in 1989 with funds provided by the Service through section 6 of the Act. Vandals removed some rails from the fence in 1992, allowing motorcycle access to the lake. The fence was repaired later in the same year, and the rails were wired to the fenceposts to discourage further vandalism.

The Service published an emergency rule listing *E. constancei* an endangered species on August 1, 1985 (50 FR 31187). On March 26, 1986, the Service proposed *E. constancei* as an endangered species (51 FR 10412) prior to the expiration of the emergency rule on March 29, 1986. The Service determined *E. constancei* to be endangered with the publication of a final rule on December 23, 1986 (51 FR 45904).

Summary of Factors Affecting the Species

The Service proposes to reclassify *Eryngium constancei* from endangered to threatened status. Section 4 of the Endangered Species Act and regulations promulgated to implement the listing provisions of the Act (50 CFR part 424) require that certain factors be considered before a species can be listed, reclassified, or delisted. These factors and their application to *Eryngium constancei* Sheikh (Loch Lomond coyote-thistle) are as follows:

A. *The Present or Threatened Destruction, Modification, or Curtailment of Its Habitat or Range*

The predominant threat facing *Eryngium constancei* at the time it was listed as endangered was the landowner's plan to dredge and fill the lake. This threat has been removed by the purchase of the property by CDFG. The fencing around the lake has greatly reduced the incidence of off-road vehicle and pedestrian use of the lakebed. The fencing is not likely to be completely successful in excluding off-road vehicle users, however, given the proximity of the lakebed to vacation homes and recreation areas, the convenience of its location immediately adjacent to the highway, and the appeal of the open lakebed, which is unusual in the heavily forested region.

At the time of listing, highway maintenance presented an occasional threat to *Eryngium constancei* habitat. This threat has been diminished by the listing of the species. Because the California Department of Transportation uses funds from the Federal Highways Administration, any roadwork that might affect the plant likely would require consultation under section 7 of the Act.

No appreciable amount of trash has been dumped in the lakebed since the fence was built (Allan Buckman, CDFG, pers. comm., 1992), but given the proximity of the site to the highway, trash dumping could occur in the future. However, the amount of dumping likely to occur does not constitute a substantial threat to the survival and recovery of *Eryngium constancei*.

The manmade ditch running from the center of the lake to Cole Creek in the north decreases the water holding capacity of the lake. This channel could be blocked to increase the storage capacity of the lake. However, casual observations suggest that the population has remained stable, and such management actions have not been thought to be necessary (Allan Buckman, pers. comm., 1992).

Another threat to *Eryngium constancei* habitat is development on watershed lands to the west and south of the lake. Changes in drainage patterns caused by development could reduce the flow of water or increase the amount of sediment carried into the lake, either of which would have detrimental effects on the plant habitat. One project has been approved for construction within the watershed south of the lake. This project includes a mini-storage unit immediately to the south and southwest of the lake, and commercial storage units further south. The project has been

approved on condition that runoff from the site be directed away from the lake (Mark Phillips, Lake County Planning Department, pers. comm., 1992), as recommended by CDFG. Construction of the storage unit in accordance with permit conditions will eliminate the threat from runoff from this project. Operation of the facility is likely, however, to increase the threats to *Eryngium constancei* from pedestrian traffic and trash dumping.

A parcel immediately to the west of the lake was logged within the past 5 years. A shelterwood cut, in which tractors were used to remove the largest trees in the stand, was conducted on 135 ha (335 acres). The removal of trees and the disturbance caused by logging can increase erosion. Increased erosion likely would result in increased sediment deposition in the lake. The Service has no information regarding the changes in erosion and deposition due to the logging activity, or what effect further removal of tree cover might have on the vernal lake. At the request of CDFG, logging roads constructed on this parcel were designed to direct the flow of water away from the lake to avoid the deposition of sediment from the road surfaces (Allan Buckman, pers. comm., 1992).

CDFG would like to acquire the property west of the lake, but funding has not been available and is not likely to be forthcoming in the near future. Logging and development in the watershed will, therefore, continue to pose a threat to the vernal lake. This threat is reduced but not eliminated by CDFG's review of proposed activity in the area.

B. Overutilization for Commercial, Recreational, Scientific, or Educational Purposes

The Loch Lomond lakebed is visited by botanists and students but there is no evidence of overutilization of *Eryngium constancei*. The site is difficult for CDFG personnel to patrol regularly because of its distance from Department headquarters in Yountville, a town in a more urbanized area of the county 80 kilometers (km) (50 miles) away. For these reasons, vandalism and inappropriate use of the area are likely to occur occasionally. However, the present level of disturbance does not constitute a substantial threat to the survival and recovery of the species.

C. Disease or Predation

No Diseases or predators are known to affect *Eryngium constancei*. Livestock grazing is prevented by the fence.

D. The Inadequacy of Existing Regulatory Mechanisms

Under the Native Plant Protection Act (Chapter 10 sec. 1900 *et seq.* of the Fish and Game Code) and California Endangered Species Act (Chapter 1.5 sec. 2050 *et seq.*), the California Fish and Game Commission has listed *Eryngium constancei* as endangered. Both statutes prohibit the "take" of State-listed plants (Chapter 10 sec. 1908 and Chapter 1.5 sec. 2080). The one known location of *E. constancei* was purchased and is managed by CDFG to protect the plant and its habitat. If the proposed reclassification to threatened status becomes final, little change in the protection afforded this species under these regulatory mechanisms is anticipated. Existing regulatory mechanisms determined necessary to protect this species will remain in effect.

E. Other Natural or Manmade Factors Affecting Its Continued Existence

A landowner on the east side of State Route 175 periodically empties his swimming pool into a roadside ditch that delivers water into the western roadside ditch via a culvert under the road. The berm between the western ditch and the lake is 5 meters (15 feet) wide in some places, but only 1 meter (3 feet) wide in others (Ann Howald, pers. comm., 1992). It may be possible for water to breach or soak through the berm into the lake. Influx of water in late summer could cause regrowth of plants or germination of seeds that might not survive until the fall rains. In 1992, the water was released in late September, and did not enter the lake, but remained in the roadside ditch (Allan Buckman, pers. comm., 1992). Given current conditions, the emptying of this pool does not appear to be a threat to the plant. Regular monitoring of the ditch and berm system by CDFG would reveal any decline in its status, and would prevent an increase in threat from this source.

The greatest danger to the species at this time is its occurrence as a single population. The limited distribution of this plant means that a single local catastrophe (such as fire, flood, severe drought, or a pest or disease outbreak), or a combination of several such events, could destroy all the individuals of the species. Catastrophic events have destroyed populations of other rare plants. For example, a localized flood eliminated an entire population of *Oenothera organensis*, a rare plant endemic to riparian canyons in southern New Mexico (Katie Skaggs, The Nature Conservancy, pers. comm., 1992).

A local catastrophe is more likely to reduce the size of the *Eryngium constancei* population and the vigor of the individual plants than to completely eliminate the population. A decrease in population size increases the risk of extirpation due to genetic problems associated with small populations (Barrett and Kohn 1991, Menges 1991). Less vigorous plants are more susceptible to succeeding threats. A prolonged drought, for instance, may lower the resistance of plants to attacking pests.

The threats to plant populations of chance events such as fire, flood, drought, pest or disease outbreaks, or a combination of these factors, are serious and ever present. These events are usually restricted to a local area, smaller than the entire range of a plant species, and affect only one or a few populations of any given species. For most species, the loss of a single population presents no threat to the species as a whole. For *Eryngium constancei*, however, the loss of a single population would mean the extinction of the species.

In reviewing the progress toward recovery since listing, the Service concludes that *Eryngium constancei* is no longer in imminent danger of extinction. The purchase of the lake by CDFG has removed the greatest immediate threat to the plant, the proposed dredging and filling of the vernal lake. The fencing of the lake has greatly reduced the threat of habitat and plant destruction through off-road vehicle use of the lakebed. The plant appears to have recovered from the 1984 dredging action and from the extended off-road vehicle use of the lakebed. However, due to the continued though presently minor threats from off-road vehicles and hikers, highway maintenance, and watershed development, and the more serious threat presented by the occurrence of the species in a single population, the Service finds that the species continues to need the protection afforded by the Act and could become endangered. Based on a careful assessment of the best scientific and commercial information available regarding past, present, and future threats faced by this species, the preferred action is therefore to reclassify *Eryngium constancei* from endangered to threatened status. For reasons discussed under the Critical Habitat section, critical habitat is not being proposed for this species.

Critical Habitat

Section 4(a)(3) of the Act requires that to the maximum extent prudent and determinable, the Secretary designate critical habitat at the time a species is

determined to be endangered or threatened. At the time of listing of Eryngium constancei, the Service found that determination of critical habitat was not prudent for this species. The reasons given for that decision still apply. Discussion of the status of the plant publicizes its rarity and can make the plant attractive to collectors of rare plants, researchers, and vandals. Publication of precise maps and descriptions of critical habitat in the **Federal Register** would make this herb even more vulnerable and could contribute to the decline of the species. Furthermore, critical habitat designation is not prudent due to lack of benefit to the species. The only known population of *E. constancei* is confined to Loch Lomond. Because *E. constancei* has always been restricted to the single population at Loch Lomond, actions that would appreciably diminish the value of Loch Lomond for the survival and recovery of the species would also jeopardize the continued existence of this highly restricted plant. No areas outside of Loch Lomond are known to have supported this plant in the past; therefore, no additional sites exist that could be considered integral to the species' recovery. For these reasons, the Service finds that designation of critical habitat is not prudent because it would provide no additional benefit to the species beyond those it would receive by virtue of its designation as a threatened species.

Available Conservation Measures

Conservation measures provided to species listed as endangered or threatened under the Act include recognition, recovery actions, requirements for Federal protection, and prohibitions against certain activities. Recognition through listing encourages and results in conservation actions by Federal, State, and private agencies, groups, and individuals. The Act provides for possible land acquisition and cooperation with the States and requires that recovery actions be carried out for all listed species. Some recovery actions, such as purchase and fencing of the habitat, have been completed already for this species. Further recovery actions, such as ecological studies of the species, may be carried out by Federal or State agencies or interested groups or individuals. The protection required of Federal agencies and the prohibition against collecting are discussed, in part, below.

Section 7(a) of the Act, as amended, requires Federal agencies to evaluate their actions with respect to any species that is proposed or listed as endangered or threatened and with respect to its critical habitat if any is being designated. Regulations implementing this interagency cooperation provision of the Act are codified at 50 CFR part 402. Section 7(a)(2) of the Act requires Federal agencies to ensure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of a listed species or to destroy or adversely modify its critical habitat. If a Federal action may affect a listed species or its critical habitat, the responsible Federal agency must enter into formal consultation with the Service. The only Federal activity potentially impacting *Eryngium constancei* is the funding by the Federal Highway Administration of maintenance or construction activities for State Route 175. Because the habitat is now owned and managed by CDFG, no applications to the U.S. Army Corps of Engineers for dredge and/or fill permits are anticipated.

The Act and its implementing regulations found at 50 CFR 17.71 and 17.72 set forth a series of general prohibitions and exceptions that apply to all threatened plants. All trade prohibitions of section 9(a)(2) of the Act, implemented by 50 CFR 17.71, apply. These prohibitions, in part, make it illegal for any person subject to the jurisdiction of the United States to import or export any threatened plant, transport it in interstate or foreign commerce in the course of a commercial activity, sell or offer it for sale in interstate or foreign commerce, or remove it from areas under Federal jurisdiction and reduce it to possession. Seeds of cultivated specimens of threatened plant species are exempt from these provisions, provided that a statement that the seeds are of "cultivated origin" accompanies the seeds or their container during the course of any activity otherwise subject to these provisions. Certain exceptions can apply to agents of the Service and State conservation agencies. The Act and 50 CFR 17.72 also provide for the issuance of permits to carry out otherwise prohibited activities involving threatened plant species under certain circumstances. International and interstate trade in *Eryngium constancei* is not known to exist. The Service anticipates few trade permits would ever be sought or issued because the species is not common in cultivation or in the wild. Requests for copies of the regulations on plants and inquiries regarding them may be addressed to the Office of Management Authority, U.S. Fish and Wildlife Service, 4401 North Fairfax Drive, room 432, Arlington, Virginia 22203–3507 (703/358–2104).

The proposed action would change the status of *Eryngium constancei* from endangered to threatened in recognition of the relative security of this species, which is no longer in imminent danger of extinction throughout its range. This proposed change in classification does not substantially alter the protection for this species under the Act. Federal agencies still would be required to consult with the Secretary of the Interior to insure that any action authorized, funded, or carried out by such agency is not likely to jeopardize the continued existence of *Eryngium constancei*. Federal prohibitions under section 9 of the Act still would apply.

Public Comments Solicited

The Service intends that any final action resulting from this proposal will be as accurate and as effective as possible. Therefore, comments or suggestions from the public, other concerned governmental agencies, the scientific community, industry, or any other interested party concerning this proposed rule are hereby solicited. Comments particularly are sought concerning:

(1) Biological or other relevant data concerning any threat (or lack thereof) to *Eryngium constancei*;

(2) The location of any additional populations of this species; and the reasons why any habitat should or should not be designated as critical habitat as provided by section 4 of the Act; and

(3) Current or planned activities in the subject area and their possible impacts on this species.

The final decision on this proposal will take into consideration the comments and any additional information received by the Service, and such communications may lead to adoption of a final regulation that differs from this proposal.

The Act provides for a public hearing on this proposal, if requested. Requests must be filed within 45 days of the date of the proposal. Such requests must be made in writing and addressed to the Field Supervisor of the Sacramento Office (see **ADDRESSES** section).

National Environmental Policy Act

The Service has determined that an Environmental Assessment, as defined under the authority of the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to section 4(a) of the Act. A notice outlining the Service's reasons for this determination

was published in the **Federal Register** on October 25, 1983 (48 FR 49244).

Proposed Regulation Promulgation

Accordingly, the Service hereby proposes to amend part 17 subchapter B of chapter I, title 50 of the Code of Federal Regulations, as set forth below:

PART 17—[AMENDED]

1. The authority citation for part 17 continues to read as follows:

Authority: 16 U.S.C. 1361–1407; 16 U.S.C. 1531–1544; 16 U.S.C. 4201–4245; Pub. L. 99–625, 100 Stat. 3500, unless otherwise noted.

§ 17.12(h) [Amended]

2. Section 17.12(h) for plants is amended by revising the entry under "Apiaceae—Parsley family" for *Eryngium constancei* to read "T" under "Status."

Dated: November 3, 1993.

Notices

Federal Register
Vol. 58, No. 227
Monday, November 29, 1993

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Office of the Secretary

Privacy Act of 1974: Computer Matching Program for the Disqualified Recipient Subsystem—U.S. Department of Agriculture and State Welfare Agencies Administering the Food Stamp Program

AGENCY: Office of the Secretary, USDA.

ACTION: Second Notice of Computer Matching Programs for the Disqualified Recipient Subsystem—U.S. Department of Agriculture and State welfare agencies administering the Food Stamp Program.

SUMMARY: On June 16, 1993, the Food and Nutrition Service (FNS), U.S. Department of Agriculture (USDA) provided notice (58 FR 33246) of its intent to conduct a computer matching program with all fifty States as well as the District of Columbia, Guam, and the Virgin Islands. However, not all of the States were fully prepared to participate in the computer matching program at its inception and only those (28 States) that had completed technical preparations and executed computer matching agreements were included under that notice. This notice announces the participation of twelve additional States in the computer matching program. These include the States of Delaware, Guam, Hawaii, Illinois, Indiana, Michigan, North Carolina, New Jersey, Virginia, Vermont, Wisconsin, and Wyoming. As the remainder of the States complete technical preparations and execute computer matching agreements, FNS will once again publish additional notices to announce their inclusion in this matching program.

The matching program will enable State agencies to determine appropriate periods of disqualification from participation in the Food Stamp Program for intentional program violations. To assign appropriate periods of disqualification, State agencies will match data on individuals recently determined to have committed intentional program violations with an FNS-maintained, centralized data bank list of individuals previously disqualified. Then, based on the number of times an individual has been disqualified, an appropriate period of disqualification will be assigned for the latest violation.

The matching program will also enable State agencies to prevent the certification or detect the participation of individuals who are in a disqualified status. At their option, State agencies may match the FNS-supplied data against their records of applicants and/or recently-certified individuals to insure that those currently in a disqualified status do not participate. Matches will be conducted in accordance with written agreements between USDA and each of the State agencies.

This notice is required by Pub. L. 100–503, the Computer Matching and Privacy Protection Act of 1988. The information provided is in accordance with paragraph 6.c. of the Final Guidance Interpreting Pub. L. 100–503 issued by the Office of Management and Budget, 54 FR 25818 (June 19, 1989). A copy of this notice has been provided to the Committee on Government Operations, U.S. House of Representatives, the Committee on Governmental Affairs, U.S. Senate, and the Office of Management and Budget.

DATES: In accordance with section 2 of Pub. L. 100–503, the Computer Matching and Privacy Protection Act of 1988, 5 U.S.C. 552a(o)(2)(B) the matching programs will begin no sooner than 30 days after the signed agreements are transmitted to the Committee on Government Operations, U.S. House of Representatives, the Committee on Governmental Affairs, U.S. Senate, and the Office of Management and Budget. This matching program will continue for 18 months, the maximum time period allowed under section 2 of Pub. L. 100–503, 5 U.S.C. 552a(o)(2)(C). At the end of that period, with the approval of the USDA Data Integrity Board, this matching program may be extended for an additional year without further notice.

ADDRESSES: Comments and inquiries should be addressed to: Cecilia Fitzgerald, Supervisor, State Management Section, State Administration Branch, Program Accountability Division, Food and Nutrition Service, U.S. Department of Agriculture, Room 907, 3101 Park Center Drive, Alexandria, VA 22302, telephone (703) 305–2386.

SUPPLEMENTARY INFORMATION: Pub. L. 97–35, the Omnibus Budget Reconciliation Act of 1981, requires that individuals who intentionally violate Food Stamp Program regulations more than once be assigned increasingly longer periods of disqualification for each subsequent offense. To assign appropriate disqualification periods, State agencies must have access to information on individuals who have previously been disqualified in other jurisdictions as well as their own. Although Congress, in Pub. L. 97–35, did not specify a system for assuring State agencies access to information on disqualified individuals, it did require State agencies to report disqualification actions to FNS. Thus, to enable States to act on this information as Congress intended, FNS will make this information available to State agencies through the Disqualified Recipient Subsystem.

FNS will act as the central collection point for data on disqualified individuals, which States will then access through the Disqualified Recipient Subsystem. The data will include the name, social security number, date of birth, and sex of disqualified individuals. If data in the Disqualified Recipient Subsystem indicates that an individual has been disqualified previously, the information obtained from the Disqualified Recipient Subsystem will be verified before a new period of disqualification is assigned. If the information in the Disqualified Recipient Subsystem originated in another State, that State will be asked to verify the subject data. This procedure will also be followed before any action is taken to deny an individual's application or terminate an individual's participation based on a match with the Disqualified Recipient Subsystem.

Food Stamp Program regulations provide for notification and due-process rights for individuals adversely affected by computer match programs.

Name of participating agencies: Food and Nutrition Service, USDA, and the

States of Delaware, Guam, Hawaii, Illinois, Indiana, Michigan, North Carolina, New Jersey, Virginia, Vermont, Wisconsin, and Wyoming.

Purpose: To facilitate the Congressional mandate to increase the length of disqualification from the Food Stamp Program for repeated instances of fraudulently obtaining Food Stamp Program benefits and to verify eligibility of applicants for Food Stamp Program benefits.

Authority: 7 U.S.C. 2015, the Food Stamp Act of 1977, as amended.

Files to be used in this matching program are: (1) The FNS—maintained file of State-provided disqualification information is entitled "Information on Persons Disqualified from the Food Stamp Program" and designated as USDA/FNS–5. This Privacy Act System of Records consists of standardized records containing identifying information (first name, middle initial, last name; social security number; date of birth; and sex) on individuals disqualified from the Food Stamp Program and information identifying the location, date(s) and length(s) of any disqualification determined and imposed.

(2) State agency food stamp recipient information files for each State, the District of Columbia, Guam, and the Virgin Islands.

Inclusive dates: In accordance with Section 2 of Public Law No. 100–503, 5 U.S.C. 552a(o)(2)(B) the Computer Matching and Privacy Protection Act of 1988, the matching programs will begin no sooner than 30 days after the signed agreements are transmitted to the Committee on Government Operations, U.S. House of Representatives, the Committee on Government Affairs, U.S. Senate, and the Office of Management and Budget. They will continue for 18 months, the maximum time period allowed under section 2 of Pub L. 100–503, 5 U.S.C. 552a(o)(2)(C). At the end of that period, with the approval of the USDA Data Integrity Board, this matching program may be extended for an additional year without further notice.

Public comments or inquires: Comments and inquiries should be addressed to: Cecilia Fitzgerald, Supervisor, State Management Section, State Administration Branch, Program Accountability Division, Food and Nutrition Service, U.S. Department of Agriculture, Room 907, 3101 Park Center Drive, Alexandria, VA 22302, telephone (703) 305–2386.

Signed at Washington, DC, on November 17, 1993.

Mike Espy,

Secretary of Agriculture.

BILLING CODE 3410–30–M

DEPARTMENT OF COMMERCE

Economics and Statistics Administration

Advisory Committee of the Task Force for Designing the Year 2000 Census and Census-Related Activities for 2000–2009; Meeting

AGENCY: Economics and Statistics Administration, Department of Commerce.

ACTION: Notice of public meeting.

SUMMARY: Pursuant to the Federal Advisory Committee Act (Public Law 92–463, as amended by Public Law 94–409) we are giving notice of a meeting of the Advisory Committee of the Task Force for designing the Year 2000 Census and Census-Related Activities for 2000–2009. The meeting will convene on Monday, December 13, 1993, at the Bureau of the Census' Conference Center, Federal Building 3, Suitland, Maryland.

The Advisory Committee is composed of a Chair, twenty-five member organizations, and nine ex officio members, all appointed by the Secretary of Commerce. The Advisory Committee will consider the goals of the census and user needs for information provided by the census, and provide a perspective from the standpoint of the outside user community on how proposed designs for the year 2000 census realize those goals and satisfy those needs. The Advisory Committee shall consider all aspects of the conduct of the census of population and housing for the year 2000, and shall make recommendations for improving that census.

DATES: The meeting will begin at 9 a.m. and adjourn at 5 p.m. on Monday, December 13, 1993.

ADDRESSES: The meeting will take place at the Bureau of the Census' Conference Center, Federal Building 3, Suitland, Maryland.

FOR FURTHER INFORMATION CONTACT: Persons wishing additional information regarding this meeting, or who wish to submit written statements or questions, may contact Thomas P. DeCair, Department of Commerce, Bureau of the Census, room 2066, Federal Building 3, Washington, DC 20233. Telephone: (301) 763–7298.

SUPPLEMENTARY INFORMATION: The agenda for the meeting includes discussion of integrated coverage measurement, the role of state and local governments, and other items that the Chair and Advisory Committee members deem appropriate for this meeting.

The meeting is open to the public. A brief period will be set aside for public comment and questions. However, persons with extensive questions or statements for the record must submit them in writing to the Commerce Department official named above at least three working days prior to the meeting.

The meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Susan Knight on (301) 763–7298.

Dated: November 19, 1993.

Paul London,

Acting Under Secretary for Economic Affairs, Economics and Statistics Administration.

[FR Doc. 93–29165 Filed 11–26–93; 8:45 am]

BILLING CODE 3510–EA–M

Foreign-Trade Zones Board

[Docket 57–93]

Foreign-Trade Zone 75—Phoenix, Arizona; Application for Subzone, Intel Corporation Plant, (Integrated Circuits/ Computer Products), Chandler, Arizona

An application has been submitted to the Foreign-Trade Zones Board (the Board) by the City of Phoenix, Arizona, grantee of FTZ 75, requesting special-purpose subzone status for the integrated circuit and data processing products manufacturing facility of Intel Corporation located in Chandler, Arizona (Phoenix Customs port of entry area). The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a–81u), and the regulations of the Board (15 CFR part 400). It was formally filed on November 22, 1993.

The Intel plant (930 acres, 1.5 mil. sq. ft.) consists of four sites located in Chandler (Maricopa County), Arizona, some 15 miles south of downtown Phoenix: Site 1 (184 acres)—main manufacturing and distribution, 5000 W. Chandler Blvd.; Site 2 (723 acres)—proposed expanded manufacturing, 97th St. and Chandler Heights Rd.; Site 3 (12 acres)—research, development and testing, 145 S. 79th St.; and, Site 4 (10 acres)—manufacturing laboratories, 6500 W. Chandler Blvd.

The facilities (4,300 employees) are used to produce a range of integrated

circuits and related products (HTS 8542.11.00—duty free), including microprocessors, OEM processor modules, embedded control chips, flash memory and microcomputer enhancement products. Foreign-sourced materials, which account for approximately 20 percent of finished product value, include resins, adhesives, plastics, photographic chemicals, ceramic products and industrial gold. About 50 percent of the finished products are exported.

Subzone status is important for Intel's expansion plans in Chandler, Arizona. The plans call for the addition of over 7 million square feet of manufacturing space (mainly at Site 2), which, in addition to the expanded production of integrated circuits, would be used in the production of a variety of microcomputer and telecommunication products, including personal computers, modems, computer board assemblies and other computer enhancement, networking and multimedia products. Foreign-sourced components and materials would include processors, disk drives, displays, printers, keyboards, printed circuit boards, transformers, capacitors, resistors, diodes, integrated circuits, electrical switches, wire, adhesives, photographic chemicals, poly vinyl chloride, resins, plastics, industrial gold, glass and ceramic products, batteries, fasteners, recording media, video apparatus, microphones, speakers, lamps, optical elements, electrodes and packaging.

Zone procedures would exempt Intel from Customs duty payments on foreign materials used in production for export. On domestic sales, the company would be able to choose the duty rates that apply to the finished products (duty-free to 4.9%). The duty rates on foreign-sourced items range from duty-free to 20 percent. The application indicates that the savings from zone procedures will help improve the plant's international competitiveness.

In accordance with the Board's regulations, a member of the FTZ Staff has been designated examiner to investigate the application and report to the Board.

Public comment is invited from interested parties. Submissions (original and 3 copies) shall be addressed to the Board's Executive Secretary at the address below. The closing period for their receipt January 28, 1994. Rebuttal comments in response to material submitted during the foregoing period may be submitted during the subsequent 15-day period February 14, 1994.

A copy of the application and accompanying exhibits will be available for public inspection at each of the following locations:

U.S. Department of Commerce District Office, Tower One, Suite 970, 2901 N. Central Ave., Phoenix, AZ 85012.

Office of the Executive Secretary, Foreign-Trade Zones Board, U.S. Department of Commerce, Room 3716, 14th and Pennsylvania Avenue, NW., Washington, DC 20230.

Dated: November 22, 1993.

John J. Da Ponte, Jr.,

Executive Secretary.

[FR Doc. 93–29326 Filed 11–26–93; 8:45 am]

BILLING CODE 3510–DS–M

[Order No. 664]

Grant of Authority for Subzone Status; Consolidated Biscuit Company (Food Products) McComb, OH

Pursuant to its authority under the Foreign-Trade Zone Act of June 18, 1934, as amended (19 U.S.C. 81a-81u), the Foreign-Trade Zones Board (the Board) adopts the following Order:

Whereas, by an Act of Congress approved June 18, 1934, an Act "To provide for the establishment * * * of foreign-trade zones in ports of entry of the United States, to expedite and encourage foreign commerce, and for other purposes," as amended (19 U.S.C. 81a-81u) (the Act), the Foreign-Trade Zone (the Board) is authorized to grant to qualified corporations the privilege of establishing foreign-trade zones in or adjacent to U.S. Customs ports of entry;

Whereas, the Board's regulations (15 CFR part 400) provide for the establishment of special-purpose subzones when existing zone facilities cannot serve the specific use involved:

Whereas, an application from the Community Development Foundation (of Findlay, Ohio), grantee of Foreign-Trade Zone 151, for authority to establish a special-purpose subzone at the food products manufacturing plant of the Consolidated Biscuit Company in McComb, Ohio, was filed by the Board of November 6, 1991, and notice inviting public comment was given in the **Federal Register** (FTZ Docket 80-91, 56 FR 65041,12-13-91); and,

Whereas, the Board has found that the requirements of the FTZ Act and Board's regulations would be satisfied, and that approval of the application would be in the public interest if approval of full zone benefits were limited to export activity;

Now, therefore, the Board hereby authorizes the establishment of a subzone (Subzone 151C) at the Consolidated Biscuit Company plant in McComb, Ohio, at the location described in the application, subject to the FTZ Act and the Board's regulations, including § 400.28, and subject to a restriction requiring that privileged foreign status (19 CFR 146.41) shall be elected on all foreign merchandise admitted to the subzone.

Signed at Washington, DC, this 17th day of November, 1993.

Barbara R. Stafford,

Acting Assistant Secretary of Commerce for Import Administration, Chairman, Committee of Alternates, Foreign-Trade Zones Board.

BILLING CODE 3510–DS–P

International Trade Administration

[A–351–821]

Preliminary Determination of Sales at Less Than Fair Value: Certain Carbon and Alloy Steel Wire Rod From Brazil

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

EFFECTIVE DATE: November 29, 1993.

FOR FURTHER INFORMATION CONTACT: Ellen Grebasch or Erik Warga, Office of Antidumping Investigations, Import Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone (202) 482–3773 or 482–0922.

PRELIMINARY DETERMINATION: We preliminarily determine that imports of certain carbon and alloy steel wire rod (SWR) from Brazil are being, or are likely to be, sold in the United States at less than fair value, as provided in section 733 of the Tariff Act of 1930, as

amended (the Act). The estimated margins are shown in the "Suspension of Liquidation" section of this notice.

Case History

Since the initiation of this investigation on May 13, 1993 (58 FR 29195, May 19, 1993), the following events have occurred:

On June 7, 1993, the U.S. International Trade Commission (ITC) issued an affirmative preliminary injury determination in this case.

On July 2, 1993, petitioners in this investigation, Connecticut Steel Corporation, Co-Steel Raritan, and Keystone Steel & Wire Company, requested that the Department of Commerce (the Department) postpone the preliminary determination in accordance with section 733(c)(1) of the Act. We granted this request and postponed the date of the preliminary determination until not later than November 19, 1993 (58 FR 40112, July 27, 1993).

In July, the Department presented antidumping duty questionnaires to Siderurgica Mendes Junior (SMJ), Cia Siderurgica de Guanabara (COSIGUA) (the two mandatory respondents) and Siderurgica Belgo-Mineira (Belgo-Mineira), a voluntary respondent. SMJ and COSIGUA accounted for at least 60 percent of the exports of the subject merchandise to the United States during the period of investigation (POI).

During July and August, COSIGUA and SMJ submitted partial responses to the Department's questionnaire.

On August 16, 1993, Belgo-Mineira notified the Department that it would not be participating as a voluntary respondent in this investigation. On September 7, 1993, SMJ notified the Department that it too would not be participating in this investigation.

On the basis of an allegation filed by petitioners, the Department, on September 15, 1993, initiated an investigation of whether COSIGUA sold SWR in the home market at prices below the cost of production (COP) during the POI and subsequently requested additional information regarding COSIGUA's COP. On September 27, 1993, COSIGUA notified the Department that it would not be participating in this investigation.

On October 18, 1993, petitioners amended the petition to exclude from the scope of this investigation steel wire rod 5.5 mm in diameter, with tensile strength greater than or equal to 1040 Mega-Pascals (MPa), and the following chemical content, by weight: Carbon greater than or equal to 0.79 percent, aluminum less than or equal to 0.005 percent, phosphorous plus sulphur less than or equal to 0.040 percent, and nitrogen less than or equal to 0.006 percent. On November 8, 1993, petitioners clarified their amended scope of investigation to exclude steel wire rod 5.5 mm or less in diameter. We have revised the scope of this investigation to reflect petitioners' amendment (see the "Scope of Investigation" section of this notice, below).

During November, the Rubber Manufacturers Association, Bridgestone/Firestone, Inc., Cooper Tire and Rubber Company, General Tire, Inc., Michelin Tire Corporation, Amercord Inc., National-Standard, Stelco, Inc., and petitioners submitted comments regarding the scope of this investigation. Time constraints precluded full consideration of these comments for the preliminary determination; however, we will consider these comments in the final determination.

Scope of Investigation

After incorporating petitioners' October 18, 1993, scope amendment, the products covered by this investigation are now as follows: Hot-rolled carbon steel and alloy steel wire rod, in coils, of approximately round cross section, between 0.20 and 0.75 inches in solid cross-sectional diameter. Excluded from the scope of this investigation are steel wire rod 5.5 mm or less in diameter, with tensile strength greater than or equal to 1040 MPa, and the following chemical content, by weight: Carbon greater than or equal to 0.79 percent, aluminum less than or equal to 0.005 percent, phosphorous plus sulfur less than or equal to 0.040 percent, and nitrogen less than or equal to 0.006 percent. Also excluded are free-matching steel containing 0.03 percent or more of lead, 0.05 percent or more of bismuth, 0.08 percent or more of sulfur, more than 0.4 percent of phosphorus, more than 0.05 percent of selenium, and/or more than 0.01 percent of tellurium. Excluded as well are stainless steel rods, tool steel rods, free-cutting steel rods, resulfurized steel rods, ball bearing steel rods, high-nickel steel rods, and concrete reinforcing bars and rods.

The products under investigation are currently classifiable under subheadings 7213.31.3000, 7213.31.6000, 7213.39.0030, 7213.39.0090, 7213.41.3000, 7213.41.6000, 7213.49.0030, 7213.49.0090, 7213.50.0020, 7213.50.0040, 7213.50.0080, 7227.90.6000, and7227.90.6050 of the Harmonized Tariff Schedule of the United States (HTSUS). Although the HTSUS subheadings are provided for convenience and customs purposes, our written description of the scope of this investigation is dispositive.

Period of Investigation

The period of investigation is October 1, 1992, through March 31, 1993.

Such or Similar Comparisons

We have determined that the merchandise covered by this investigation constitutes a single category of "such or similar" merchandise.

Best Information Available

Because both mandatory respondents failed to respond to our questionnaire, we based our determination on best information available (BIA) pursuant to section 776(c) of the Act which states that the Department may use BIA when a party refuses to provide requested information.

In determining what rate to use as BIA, the Department follows a two-tiered methodology, whereby the Department normally assigns lower margins to those respondents who cooperated in an investigation and margins based on more adverse assumptions for those respondents who did not cooperate in an investigation. According to the Department's two-tiered BIA methodology outlined in the Final Determination of Sales at Less Than Fair Value: Certain Hot-Rolled Carbon Steel Flat Products, Certain Cold-Rolled Carbon Steel Flat Products, and Certain Cut-to-Length Carbon Steel Plate From Belgium, 58 FR 37083, (July 9, 1993), when a company refuses to provide the information requested in the form required, or otherwise significantly impedes the Department's investigation, it is appropriate for the Department to assign to that company the higher of (1) the highest margin alleged in the petition, or (2) the highest calculated rate of any respondent in the investigation. Because there were no cooperative respondents in this investigation, we are assigning to all exporters, as BIA, a margin of 28.36 percent, the only margin calculated in the petition (adjusted for calculation errors).

Suspension of Liquidation

In accordance with section 733(d)(1) of the Act, we are directing the Customs Service to suspend liquidation of all entries of SWR from Brazil that are entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**. The Customs Service shall require a cash deposit or posting of a

bond equal to the estimated preliminary dumping margins, as shown below. The suspension of liquidation will remain in effect until further notice.

Manufacturer/producer/exporter	Margin percentage
All companies	28.36

ITC Notification

In accordance with section 733(f) of the Act, we have notified the ITC of our determination. If our final determination is affirmative, the ITC will determine whether these imports are materially injuring, or threaten material injury to, the U.S. industry before the later of 120 days after the date of this preliminary determination or 45 days after our final determination.

Public Comment

In accordance with 19 CFR 353.38, case briefs or other written comments in at least ten copies must be submitted to the Assistant Secretary for Import Administration no later than January 5, 1994, and rebuttal briefs, no later than January 10, 1994. In accordance with 19 CFR 353.38(b), we will hold a public hearing, if requested, to afford interested parties an opportunity to comment on arguments raised in case or rebuttal briefs. Tentatively, the hearing will be held on January 12, 1994, at 10 a.m. at the U.S. Department of Commerce, room 3708, 14th Street and Constitution Avenue, NW., Washington, DC 20230. Parties should confirm by telephone the time, date, and place of hearing 48 hours before the scheduled time.

Interested parties who wish to request a hearing, or to participate if one is requested, must submit a written request to the Assistant Secretary for Import Administration, U.S. Department of Commerce, room B–099, within ten days of the publication of this notice. Requests should contain: (1) The party's name, address, and telephone number; (2) the number of participants; and (3) a list of the issues to be discussed. In accordance with 19 CFR 353.38(b), oral presentations will be limited to issues raised in the briefs. If this investigation proceeds normally, we will make our final determination by February 2, 1994.

This determination is published pursuant to section 733(f) of the Act and 19 CFR 353.15(a)(4).

Dated: November 19, 1993.

Barbara R. Stafford,

Acting Assistant Secretary for Import Administration.

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

EFFECTIVE DATE: November 29, 1993.

FOR FURTHER INFORMATION CONTACT: Ellen Grebasch or Erik Warga, Office of Antidumping Investigations, Import Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone (202) 482–3773 or 482–0922.

PRELIMINARY DETERMINATION: We preliminarily determine that imports of certain carbon and alloy steel wire rod (SWR) from Japan are being, or are likely to be, sold in the United States at less than fair value, as provided in section 733 of the Tariff Act of 1930, as amended (the Act). The estimated margins are shown in the "Suspension of Liquidation" section of this notice.

Case History

Since the initiation of this investigation on May 13, 1993, (58 FR 29195, May 19, 1993), the following events have occurred:

On June 7, 1993, the U.S. International Trade Commission (ITC) issued an affirmative preliminary injury determination in this case.

On July 2, 1993, petitioners in this investigation, Connecticut Steel Corporation, Co-Steel Raritan, and Keystone Steel & Wire Company, requested that the Department of Commerce (the Department) postpone the preliminary determination in accordance with section 733(c)(1) of the Act. We granted this request and postponed the date of the preliminary determination until not later than November 19, 1993 (58 FR 40112, July 27, 1993).

On July 14, 1993, the Department presented antidumping duty questionnaires to Nippon Steel Corporation (NSC) and Kobe Steel, Ltd. (Kobe). These firms accounted for at least 60 percent of the exports of the subject merchandise to the United States during the period of investigation (POI). On July 27, 1993, both NCS and Kobe notified the Department that they would not participate in this investigation. No questionnaire responses were filed.

On October 6, 1993, petitioners amended the petition to provide additional pricing information.

On October 18, 1993, petitioners amended the petition to exclude from the scope of this investigation steel wire rod 5.5 mm in diameter, with tensile strength greater than or equal to 1040 Mega-Pascals (MPa), and the following chemical content, by weight: Carbon greater than or equal to 0.79 percent, aluminum less than or equal to 0.005, phosphorous plus sulphur less than or equal to 0.040 percent, and nitrogen less than or equal to 0.006 percent. On November 8, 1993, petitioners clarified their amended scope of investigation to exclude steel wire rod 5.5 mm or less in diameter. We have revised the scope of this investigation to reflect petitioners' amendment (see the "Scope of Investigation" section of this notice, below).

During November, the Rubber Manufacturers Association, Bridgestone/Firestone, Inc., Cooper Tire and Rubber Company, General Tire, Inc., Michelin Tire Corporation, Amercord Inc., National-Standard, Stelco, Inc., the Goodyear Tire and Rubber Company, and petitioners submitted comments regarding the scope of this investigation. Time constraints precluded full consideration of these comments for the preliminary determination; however, we will consider these comments in the final determination.

Scope of Investigation

After incorporating petitioners' October 18, 1993, scope amendment, the products covered by this investigation are now as follows: Hot-rolled carbon steel and alloy steel wire rod, in coils, of approximately round cross section, between 0.20 and 0.75 inches in solid cross-sectional diameter. Excluded from the scope of this investigation are steel wire rod 5.5 mm or less in diameter, with tensile strength greater than or equal to 1040 MPa, and the following chemical content, by weight: Carbon greater than or equal to 0.79 percent, aluminum less than or equal to 0.005 percent, phosphorous plus sulphur less than or equal to 0.040 percent, and nitrogen less than or equal to 0.006 percent. Also excluded are free-machining steel containing 0.03 percent or more of lead, 0.05 percent or more of bismuth, 0.08 percent or more of sulfur, more than 0.4 percent of phosphorus, more than 0.05 percent of selenium, and/or more than 0.01 percent of tellurium. Excluded as well are stainless steel rods, tool steel rods, free-cutting steel rods, resulfurized steel rods, ball bearing steel rods, high-nickle steel rods, and concrete reinforcing bars and rods.

The products under investigation are currently classifiable under subheadings 7213.31.3000, 7213.31.6000, 7213.39.0030, 7213.39.0090,

7213.41.3000, 7213.41.6000, 7213.49.0030, 7213.49.0090, 7213.50.0020, 7213.50.0040, 7213.50.0080, 7227.90.6000, and 7227.90.6050 of the Harmonized Tariff Schedule of the United States (HTSUS). Although the HTSUS subheadings are provided for convenience and customs purposes, our written description of the scope of this investigation is dispositive.

Period of Investigation

The period of investigation is October 1, 1992, through March 31, 1993.

Such or Similar Comparisons

We have determined that the merchandise covered by this investigation constitutes a single category of "such or similar" merchandise.

Best Information Available

Because both mandatory respondents failed to respond to our questionnaire, we based our determination on best information available (BIA) pursuant to section 776(c) of the Act.

In determining what rate to use as BIA, the Department follows a two-tiered methodology, whereby the Department normally assigns lower margins to those respondents who cooperated in an investigation and margins based on more adverse assumptions for those respondents who did not cooperate in an investigation. According to the Department's two-tiered BIA methodology outlined in the Final Determination of Sales at Less Than Fair Value: Certain Hot-Rolled Carbon Steel Flat Products, Certain Cold-Rolled Carbon Steel Flat Products, and Certain Cut-to-Length Carbon Steel Plate From Belgium, 58 FR 37083, (July 9, 1993), when a company refuses to provide the information requested in the form required, or otherwise significantly impedes the Department's investigation, it is appropriate for the Department to assign to that company the higher of (1) the margin alleged in the petition, or (2) the highest calculated rate of any respondent in the investigation. Because there were no cooperative respondents in this investigation, we are assigning to all exporters, as BIA, a margin of 47.71 percent, the highest margin calculated in the petition on merchandise that is within the scope of this investigation (as amended).

Suspension of Liquidation

In accordance with section 733(d)(1) of the Act, we are directing the Customs Service to suspend liquidation of all entries of SWR from Japan that are entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**. The Customs Service shall require a cash deposit or posting of a bond equal to the estimated preliminary dumping margins, as shown below. The suspension of liquidation will remain in effect until further notice.

Manufacturer/producer/exporter	Margin percentage
All companies	47.71

ITC Notification

In accordance with section 733(f) of the Act, we have notified the ITC of our determination. If our final determination is affirmative, the ITC will determine whether these imports are materially injuring, or threaten material injury to, the U.S. industry before the later of 120 days after the date of this preliminary determination or 45 days after our final determination.

Public Comment

In accordance with 19 CFR 353.38, case briefs or other written comments in at least ten copies must be submitted to the Assistant Secretary for Import Administration no later than January 5, 1994, and rebuttal briefs, no later than January 10, 1994. In accordance with 19 CFR 353.38(b), we will hold a public hearing, if requested, to afford interested parties an opportunity to comment on arguments raised in case or rebuttal briefs. Tentatively, the hearing will be held on January 12, 1994, at 1 p.m. at the U.S. Department of Commerce, room 3708, 14th Street and Constitution Avenue NW., Washington, DC 20230. Parties should confirm by telephone the time, date, and place of the hearing 48 hours before the scheduled time.

Interested parties who wish to request a hearing, or to participate if one is requested, must submit a written request to the Assistant Secretary for Import Administration, U.S. Department of Commerce, room B–099, within ten days of the publication of this notice. Requests should contain: (1) The party's name, address, and telephone number; (2) the number of participants; and (3) a list of the issues to be discussed. In accordance with 19 CFR 353.38(b), oral presentations will be limited to issues raised in the briefs. If this investigation proceeds normally, we will make our final determination by February 2, 1994.

This determination is published pursuant to section 733(f) of the Act and 19 CFR 353.15(a)(4).

Dated: November 19, 1993.

Barbara R. Stafford,

Acting Assistant Secretary for Import Administration.

Preliminary Determination of Sales at Less Than Fair Value and Postponement of Final Determination: Certain Carbon and Alloy Steel Wire Rod From Canada

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

EFFECTIVE DATE: (November 29, 1993.

FOR FURTHER INFORMATION CONTACT: David J. Goldberger or Michelle A. Frederick, Office of Antidumping Investigations, Import Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone (202) 482–4136 or 482–0186, respectively.

PRELIMINARY DETERMINATION: We preliminarily determine that certain carbon and alloy steel wire rod (SWR) from Canada is being, or is likely to be, sold in the United States at less than fair value, as provided in section 733 of the Tariff Act of 1930, as amended (the Act). The estimated margins are shown in the "Suspension of Liquidation" section of this notice.

Case History

Since the initiation of this investigation on May 13, 1993, (58 FR 29195, May 19, 1993), the following events have occurred:

On June 7, 1993, the U.S. International Trade Commission (ITC) issued an affirmative preliminary injury determination in this case.

On July 2, 1993, petitioners in this investigation, Connecticut Steel Corporation, Co-Steel Raritan, and Keystone Steel & Wire Company, requested that the Department of Commerce (the Department) postpone the preliminary determination in accordance with section 733(c)(1) of the Act. We granted this request and postponed the date of the preliminary determination until not later than November 19, 1993 (58 FR 40112, July 27, 1993).

In July 1993, the Department of Commerce (the Department) presented an antidumping duty questionnaire to Ivaco Inc. (Ivaco) and Stelco Inc. (Stelco). These firms accounted for at least 60 percent of the exports of the subject merchandise to the United States during the period of investigation

(POI). The Department also presented a cost of production/constructed value (section D) questionnaire to both Ivaco and Stelco as the Department had reasonable grounds to believe or suspect that both companies had sold SWR in Canada at prices which were below their respective costs of production.

In addition, the Department presented to Ivaco and Stelco, section E of the antidumping questionnaire, regarding information on further manufacturing performed in the United States.

On July 22 and August 4, 1993, Ivaco and Stelco, respectively, requested that the Department not require reporting of certain sales. On July 30, 1993, we allowed Ivaco not to report certain sales through an unrelated party and certain further manufactured sales by a related party of non-subject merchandise and of secondary merchandise. On August 18, 1993, we allowed Stelco not to report certain secondary sales made in the U.S. market, tolled sales in the home market, and U.S. further manufactured sales through a related party (See Memorandum for Barbara R. Stafford from Richard Moreland (July 30, 1993) and Memorandum for Susan H. Kuhbach from Gary Taverman (August 18, 1993)).

Ivaco and Stelco submitted questionnaire responses in July and September 1993. Supplemental questionnaires were issued in September 1993; responses were received in October 1993.

On October 18, 1993, petitioners amended the petition to exclude from the scope of this investigation steel wire rod 5.5 mm. in diameter, with tensile strength greater than or equal to 1040 Mega-Pascals (MPa), and the following chemical content, by weight: Carbon greater than or equal to 0.79 percent, aluminum less than or equal to 0.005 percent, phosphorous plus sulphur less than or equal to 0.040 percent, and nitrogen less than or equal to 0.006 percent. On November 8, 1993, petitioners clarified their amended scope of investigation to exclude steel wire rod 5.5 mm or less in diameter. We have revised the scope of this investigation to reflect petitioners' amendment (see the "Scope of Investigation" section of this notice, below).

On October 27, 1993, the Department requested that Ivaco submit a revised sales listing in order to correct its reporting of freight and credit expenses; it did so on November 3, 1993.

During November, the Rubber Manufacturers Association (RMA), Bridgestone/Firestone, Inc., Cooper Tire and Rubber Company, General Tire, Inc., Michelin Tire Corporation, Amercord Inc., National-Standard, Stelco, and petitioners submitted comments regarding the scope of this investigation. Time constraints precluded full consideration of these requests for the preliminary determination; however, we will consider this issue for the final determination.

Postponement of Final Determination

Pursuant to section 735(a)(2)(A) of the Act, on November 1, 1993, Ivaco requested that, in the event of an affirmative preliminary determination in this investigation, the Department postpone the final determination to 135 days after the date of publication of the affirmative preliminary determination. Pursuant to 19 CFR 353.20(b), if exporters who account for a significant proportion of exports of the merchandise under investigation request an extension in the event of an affirmative preliminary determination, we are required, absent compelling reasons to the contrary, to grant the request.

Given that the requirement of 19 CFR 353.20(b) has been met, we are postponing the final determination for this investigation until the 135th day after the publication of this notice in the **Federal Register**.

Scope of the Investigation

After incorporating petitioners' October 18, 1993, scope amendment, the product covered by this investigation is now as follows: Hot-rolled carbon steel and alloy steel wire rod, in coils, of approximately round cross section, between 0.20 and 0.75 inches in solid cross-sectional diameter. Excluded from the scope of this investigation are steel wire rod 5.5 mm or less in diameter, with tensile strength greater than or equal to 1040 MPa, and the following chemical content, by weight: Carbon greater than or equal to 0.79 percent, aluminum less than or equal to 0.005 percent, phosphorous plus sulfur less than or equal to 0.040 percent, and nitrogen less than or equal to 0.006 percent. Also excluded are free-machining steel containing 0.03 percent or more of lead, 0.05 percent or more of bismuth, 0.08 percent or more of sulfur, more than 0.4 percent of phosphorus, more than 0.05 percent of selenium, and/or more than 0.01 percent of tellurium. Excluded as well are stainless steel rods, tool steel rods, free-cutting steel rods, resulfurized steel rods, ball bearing steel rods, high-nickel steel rods, and concrete reinforcing bars and rods.

The product under investigation is currently classifiable under subheadings 7213.31.3000, 7213.31.6000, 7213.39.0030, 7213.39.0090, 7213.41.3000, 7213.41.6000, 7213.49.0030, 7213.49.0090, 7213.50.0020, 7213.50.0040, 7213.50.0080, 7227.90.6000, and 7227.90.6050 of the Harmonized Tariff Schedule of the United States (HTSUS). Although the HTSUS subheadings are provided for convenience and customs purposes, our written description of the scope of this investigation is dispositive.

Period of Investigation

The period of investigation (POI) is October 1, 1992, through March 31, 1993.

Such or Similar Comparisons

We have determined that the product covered by this investigation constitutes a single category of such or similar merchandise.

Where there were no sales of identical merchandise in the home market to compare to U.S. sales, we made similar merchandise comparisons on the basis of the criteria defined in Appendix V to the antidumping duty questionnaire, and the Appendix V amendment of August 12, 1993, both of which are on file in Room B–099 of the main building of the Department of Commerce.

Ivaco claimed that the Department should make its product comparisons first by considering level of trade and then the physical characteristics of the products. We rejected this argument because the Department consistently treats physical characteristics of the merchandise as the most important criteria in making model matches. Where we were not able to make an equally similar match at the same level of trade, we made comparisons at an alternative level of trade. (See Import Administration Policy Bulletin: Matching at Levels of Trade, (Number 92/1, July 29, 1992.))

Fair Value Comparisons

To determine whether sales of Ivaco and Stelco from Canada to the United States were made at less than fair value, we compared the United States price (USP) to the foreign market value (FMV), as specified in the "United States Price" and "Foreign Market Value" sections of this notice.

United States Price

For Ivaco and Stelco, we based USP on purchase price (PP), in accordance with section 772(b) of the Act, when the subject merchandise was sold to unrelated purchasers in the United States prior to importation. In addition, for Ivaco and Stelco, where certain sales to the first unrelated purchaser took

place after importation into the United states, we based USP on ESP, in accordance with section 772(c) of the Act. For Ivaco's consignment sales, where the terms of sale were not fixed until after importation, we also based USP on ESP in accordance with section 772(c) of the Act.

On March 19, 1993, the United States Court of Appeals for the Federal Circuit, in affirming the decision of the Court of International Trade in Zenith Electronics Corporation v. United States, Slip Op. 92–1043, –1044, –1045, –1046, ruled that section 772(d)(1)(C) of the Act provides for an addition to USP to account for taxes which the exporting country would have assessed on the merchandise had it been sold in the home market, and that section 773(a)(4)(B) of the Act does not allow circumstance-of-sale adjustments to FMV for differences in taxes. Accordingly, we have changed our practice and will no longer make a circumstance-of-sale adjustment. We will no longer calculate a hypothetical tax on the U.S. product, but will, for the time being, add to USP the absolute amount of tax assessed on the comparison merchandise sold in the country of exportation. By adding the amount of home market tax to USP, absolute dumping margins are not inflated or deflated by differences between taxes included in FMV and those added to USP.

We made additional, company-specific adjustments as follows:

A. Ivaco

For Ivaco, we calculated purchase price based on packed, delivered or freight prepaid prices to unrelated customers in the United States. We made deductions, where appropriate, for discounts, rebates, post-sale price adjustments, freight, U.S. brokerage and handling, and U.S. duty and customs fees, in accordance with section 772(d)(2) of the Act.

We calculated ESP based on packed, ex-U.S. warehouse prices to unrelated customers in the United States. We made the same deductions described above. We also made deductions, where appropriate, for direct selling expenses including credit and warranty expenses, and indirect selling expenses, including inventory carrying expenses.

For both PP and ESP, in accordance with section 772(d)(1)(B) of the Act, we increased U.S. price by the amount of import duties imposed by Canada on inputs for the subject merchandise which have not been collected by reason of the exportation of the subject merchandise to the United States.

Ivaco claimed a level of trade adjustment, based on the differences between the average price at each level of trade, when merchandise sold at different levels of trade are compared. We did not allow this adjustment because Ivaco provided insufficient support for the claimed adjustment.

Ivaco reported corrections to its warranty expense claim in a November 3, 1993, submission. These corrections were received too late for inclusion in the preliminary determination, but we may take them into consideration for the final determination.

In addition, we made further deductions, where appropriate, for all value added to the ESP sales of SWR in the United States, pursuant to section 772(e)(3) of the Act. The value added consists of the costs associated with the production of the further manufactured products, other than the costs associated with the imported SWR, and a proportional amount of any profit related to the further manufacture. Profit was calculated by deducting from the sales price of the finished product the total cost of production of the imported product, as well as all applicable movement charges, discounts, rebates, and commissions. The total profit was then allocated proportionately to all components of cost. Only the profit or loss attributable to the value added was deducted.

In determining the costs incurred to produce the SWR, we included (1) the costs of manufacture; (2) movement and packing expenses; and (3) general expenses, including selling, general, and administrative expenses, and interest expenses.

On November 8, 1993, Ivaco reported corrections to labor costs associated with its further manufacturing expenses. These corrections were received too late for inclusion in this preliminary determination, but we may take them into consideration for the final determination.

Ivaco reported certain further manufacturing sales as PP transactions. We intend to examine the appropriate treatment of these transactions for the final determination, including whether they should be analyzed as imported, or as sold, and the adjustments to be made. We have, for this preliminary determination, excluded these transactions from our analysis because of their limited number. We also excluded from our preliminary determination analysis a small quantity of further manufactured sales, for which we lacked sufficiently specific data to appropriately match to the value added expenses. The two types of sales excluded from our analysis account for less than two percent of the total U.S. sales of SWR during the POI.

B. Stelco

For Stelco, we calculated purchase price based on packed, freight pre-paid or delivered prices to unrelated customers in the United States. We made deductions, where appropriate, for post-sale price adjustments, U.S. brokerage and handling, U.S. duty and customs fees, and freight expenses in accordance with section 772(d)(2) of the Act.

We calculated ESP based on packed, freight pre-paid or delivered prices to unrelated customers in the United States. We made deductions, where appropriate, for U.S. brokerage and handling, U.S. duty and customs fees, freight expenses and direct selling expenses including: credit, technical services, and warranty expenses. In addition, we deducted indirect selling expenses and inventory carrying expenses.

Indirect selling expenses for both markets were recalculated because Stelco did not consolidate its reporting of indirect selling expenses incurred by Stelco Inc. and its related processors, Stelwire and McMaster. Stelco also did not allocate its indirect selling expenses between the U.S. and Canadian markets. Therefore, we recalculated the indirect selling expenses for each market based on information provided in the questionnaire responses.

We did not allow Stelco's post-sale warehousing expense claim for the preliminary determination because Stelco did not sufficiently provide support for its claim that these expenses were required as a condition of sale.

In addition, we made further deductions, where appropriate, for all value added to the SWR in the United States, pursuant to section 772(e)(3) of the Act, as described above (see discussion of Ivaco's USP).

Foreign Market Value

In order to determine whether there was a sufficient volume of sales in the home market to serve as a viable basis for calculating foreign market value ("FMV"), for each respondent we compared the volume of home market sales of the subject merchandise to the volume of third country sales of subject merchandise, in accordance with section 773(a)(1)(B) of the Act. We found that the home market was viable for sales of SWR by both Ivaco and Stelco.

Cost of Production

Based on petitioners' allegations, and in accordance with section 773(b) of the

Act, the Department initiated investigations to determine whether Ivaco and Stelco had home market sales that were made at less than their respective costs of production (COP).

A. Calculation of COP

We calculated COP based on the sum of the individual respondent's reported cost of materials, fabrication, labor, factory overhead, selling expenses, general & administrative (G&A) expenses, and home market packing. For each company, we derived selling expenses from its respective home market sales listing. We added home market packing expenses derived from the sales listing.

Except for one adjustment to the further manufacturing costs, Ivaco's submitted data was used for the preliminary determination. The Department recalculated the G&A expense rate of the further manufacturer, Sivaco New York, using its financial statements. The Sivaco New York's G&A was divided by Sivaco New York's cost of sales, and the rate was applied to the entire cost of manufacturing in order to fully allocate G&A.

Stelco's submitted cost of production and constructed value data was not adjusted for this determination.

B. Test of Home Market Sale Prices

After calculating COP, we tested whether home market sales of SWR were at prices below COP.

We compared model-specific COP to reported prices that were net of movement charges, discounts, and rebates. If over 90 percent of a respondent's sales of a given product were at prices above the COP, we did not disregard any below-cost sales because we determined that the respondent's below-cost sales were not made in substantial quantities. If between 10 and 90 percent of a respondent's sales of a given product were at prices above the COP, we discarded only the below-cost sales if made over an extended period of time. Where we found that more than 90 percent of respondent's sales of a given product were at prices below the COP over an extended period of time, we disregarded all sales for that model and calculated FMV based on constructed value (CV). In order to determine that below-cost sales were made over an extended period of time, we performed the following analysis on a product-specific basis: (1) If a respondent sold a product in only one month of the POI and there were sales in that month below the COP, or (2) if a respondent sold a product during two months or more of the POI and there were sales below the COP during two or more of those months, then below-cost sales were considered to have been made over an extended period of time.

C. Results of COP Test

For both Ivaco and Stelco, we found that for certain models more than 90 percent of home market sales were at below-COP prices over an extended period of time. No information has been provided regarding whether the below cost sales were at prices that would permit recovery of all costs within a reasonable period of time in the normal course of trade. For U.S. sales left without a match as a result of disregarding these below COP sales, we based FMV on CV.

D. Calculation of CV

In accordance with section 773(e)(1)(B) (i) and (ii) of the Act, we included in CV the greater of (1) respondent's reported SG&A, adjusted as detailed above; or (2) the statutory minimum of ten percent of cost of manufacture (COM). For profit, we used the statutory minimum of eight percent of the sum of COM and general expenses (because actual profit on home market sales was less than eight percent). Selling expenses (direct and, where appropriate, indirect) were derived from the individual respondent's home market sales database.

In instances where we compared Ivaco's U.S. prices to CV, we made circumstance of sale adjustments, where appropriate, for credit and warranty expenses. In instances where we compared Stelco's U.S. prices to CV, we made circumstance of sale adjustments, where appropriate, for credit, technical services, and warranty expenses.

Price-to-Price Comparisons

For those products for which there were an adequate number of sales at prices above the COP, we based FMV on home market prices. For Ivaco, we calculated FMV based on ex-factory prices, inclusive of packing, to unrelated customers. For Stelco, we calculated FMV based on ex-factory prices, inclusive of packing, to unrelated customers and/or to related customers whose sales were determined to be at arm's length.

For Ivaco, in accordance with 19 CFR 353.58, we compared U.S. sales to home market sales made at the same level of trade, where possible. Where we were not able to match at the same level of trade, we made comparisons at an alternative level of trade. Stelco did not report sales at differing levels of trade in the home market.

For all comparisons to purchase price sales, pursuant to section 773(a)(4)(B) and 19 CFR 353.56(a)(2), we made circumstance-of-sale adjustments, where appropriate, for differences in credit expenses. We also made adjustments, where appropriate, for physical differences in the merchandise, in accordance with 19 CFR 353.57.

We deducted home market packing costs and added U.S. packing costs.

A. Ivaco—Purchase Price Comparisons

For home market to purchase price comparisons, we made deductions, where appropriate, for discounts, rebates, post-sale price adjustments, and foreign inland freight, in accordance with section 773(a)(4) of the Act. We determined, for the preliminary determination, that early payment rebates should be treated as discounts because they were granted prior to payment.

Pursuant to section 773(a)(4)(B) and 19 CFR 353.56(a)(2), we made circumstance of sale adjustments, where appropriate, for warranty expenses.

Because no commissions were paid on home market sales, we deducted the lesser of either (1) the amount of the commission paid on the U.S. sale; or (2) the sum of the weighted average of indirect selling expenses paid on the home market sales, in accordance with 19 CFR 353.56(b)(1). Home market indirect selling expenses included inventory carrying expenses. Finally, the amount of the commission paid on the U.S. sale was added to FMV.

B. Ivaco—ESP Comparisons

For home market to ESP comparisons, we made deductions, where appropriate, for discounts, rebates, inland freight, and warranty expenses. We also deducted from FMV the weighted-average home market indirect selling expenses, including inventory carrying costs. The deduction for home market indirect selling expenses was capped by the sum of U.S. commissions paid (if any) and U.S. indirect selling expenses, in accordance with 19 CFR 353.56(b) (1) and (2).

For home market to ESP comparisons that involved further manufacturing in the United States, the cap to the deduction for home market indirect selling expenses was the portion of U.S. indirect selling expenses and the portion of commissions (if any) attributable to the foreign-produced input product.

C. Stelco—Purchase Price Comparisons

For home market to purchase price comparisons, we made deductions, where appropriate, for foreign inland freight and insurance in accordance with section 773(a)(4) of the Act.

Pursuant to section 773(a)(4)(B) and 19 CFR 353.56(a)(2), we made circumstance-of-sale adjustments, where appropriate, for technical and warranty expenses, and commissions.

Because no commissions were paid on home market sales, we deducted the lesser of either (1) the amount of the commission paid on the U.S. sale; or (2) the sum of the weighted average of indirect selling expenses paid on the home market sales, in accordance with 19 CFR 353.56(b)(1). Home market indirect selling expenses included inventory carrying expenses. Finally, the amount of the commission paid on the U.S. sale was added to FMV.

In addition, Stelco reported the Canadian Goods and Services Tax (GST) amount on home market sales based on the full invoice price, which, in some cases, included an additional amount charged to the customer for freight. Therefore, the Department recalculated the GST amount based on a sales price net of this freight revenue.

We recalculated indirect selling expenses for both markets, as discussed above under "United States Price".

D. Stelco—ESP Comparisons

For home market to ESP comparisons, we made deductions, where appropriate, for foreign inland freight and insurance, warranty, and the direct portion of technical service expenses. We also deducted from FMV the weighted-average home market indirect selling expenses, including, where appropriate, inventory carrying costs. The deduction for home market indirect selling expenses was capped by the sum of U.S. commissions paid (if any) and U.S. indirect selling expenses, in accordance with 19 CFR 353.56(b)(1) and (2).

We recalculated the reported indirect selling expenses and GST as described above.

For home market to ESP comparisons that involved further manufacturing in the United States, the cap to the deduction for home market indirect selling expenses was the portion of U.S. indirect selling expenses and the portion of commissions (if any) attributable to the foreign-produced input product.

Currency Conversion

We made currency conversions based on the official exchange rates in effect on the dates of the U.S. sales as certified by the Federal Reserve Bank.

Verification

As provided in section 776(b) of the Act, we will verify all information that we determine is acceptable for use in making our final determination.

Suspension of Liquidation

In accordance with section 733(d)(1) of the Act, we are directing the Customs Service to suspend liquidation of all entries of SWR from Canada that are entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**. The Customs Service shall require a cash deposit or posting of a bond equal to the estimated preliminary dumping margins, as shown below. This suspension of liquidation will remain in effect until further notice. The less than fair value margins are as follows:

Producer/manufacturer exporter	Weighted-average margin percentage
Ivaco Inc	9.62
Stelco Inc	13.09
All others	10.93

ITC Notification

In accordance with section 733(f) of the Act, we have notified the ITC of our determination. If our final determination is affirmative, the ITC will determine whether these imports are materially injuring, or threaten material injury to, the U.S. industry before the later of 120 days after the date of this preliminary determination or 45 days after our final determination.

Public Comment

Interested parties who wish to request a hearing must submit a written request to the Assistant Secretary for Import Administration, U.S. Department of Commerce, Room B–099, within ten days of the publication of this notice. Requests should contain: (1) The party's name, address, and telephone number; (2) the number of participants; and (3) a list of the issues to be discussed.

In accordance with 19 CFR 353.38, case briefs or other written comments in at least ten copies must be submitted to the Assistant Secretary no later than February 23, 1994, and rebuttal briefs no later than March 2, 1994. A hearing, if requested, will be held on March 4, 1994, at 9:30 a.m. at the U.S. Department of Commerce in room 3708. Parties should confirm by telephone the time, date, and place of the hearing 48 hours prior to the scheduled time. In accordance with 19 CFR 353.38(b), oral presentations will be limited to issues raised in the briefs.

If this investigation proceeds normally, we will make our final determination not later than 135 days after the publication of this notice.

This determination is published pursuant to section 733(f) of the Act and 19 CFR 353.15(a)(4).

Dated: November 19, 1993.

Barbara R. Stafford,

Acting Assistant Secretary for Import Administration.

Pure Magnesium From Canada: Amendment of Final Determination of Sales at Less Than Fair Value and Order in Accordance With Decision on Remand

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

SUMMARY: On October 6, 1993, the U.S.-Canada Binational Panel ("Panel") affirmed the Department of Commerce's ("the Department") remand determination in this case. On November 10, 1993, the Binational Secretariat, United States Section, published a notice of completion of panel review and noted that no request for an extraordinary challenge committee had been filed. (Notice of Completion of Panel Review, 58 FR 59706). As a result, the Department is amending the final determination of sales at less than fair value with respect to pure and alloy magnesium from Canada. For all entries made on or after the date of publication of this notice, Commerce will direct the U.S. Customs Service ("Customs") to require a cash deposit for each entry in an amount equal to the estimated antidumping duty margin as described in the "Suspension of Liquidation" section of this notice.

EFFECTIVE DATE: November 29, 1993.

FOR FURTHER INFORMATION CONTACT: Roy A. Malmrose, Office of Countervailing Investigations, U.S. Department of Commerce, room 3099, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone (202) 482–5414.

SUPPLEMENTARY INFORMATION:

Background

On July 13, 1992, the Department published notice of its Final Affirmative Determination; Rescission of Investigation and Partial Dismissal of Petition: Pure Magnesium from Canada,

57 FR 30930. That determination noted that the weighted-average margin for pure magnesium was 31.33 percent. Commerce subsequently published an antidumping duty order and instructed Customs to collect a cash deposit equal to 31.33 percent ad valorem on all entries of subject merchandise entered, or withdrawn from warehouse, on or after that date.

The Department's determination subsequently was appealed to a U.S.-Canada Binational Panel, pursuant to Article 1904 of the United States-Canada Free Trade Agreement and title IV of the United States-Canada Free Trade Implementation Act of 1988, 19 U.S.C. 1516a(g)(1989). On May 7, 1993, the Panel remanded the determination so that the Department could address certain issues regarding the calculation of the constructed value contained in the petition. On May 27, 1993, the Department issued its remand determination with a recalculated estimated margin of 21 percent ad valorem. The Panel affirmed the Department's remand determination on October 6, 1993. No request for an extraordinary challenge has been filed and a Notice of Completion of Panel Review has been published by the Binational Secretariat.

Suspension of Liquidation

Since the panel proceeding are now final, we are directing Customs to require a cash deposit in an amount equal to 21 percent ad valorem for all entries of pure magnesium from Canada entered, or withdrawn from warehouse for consumption, on or after the date of publication of this notice. The suspension of liquidation shall remain in effect until further notice.

Dated: November 18, 1993.

Barbara R. Stafford,

Acting Assistant Secretary for Import Administration.

Postponement of Final Antidumping Duty Determination: Nitronmethane From the People's Republic of China

AGENCY: Import Administration, International Trade Administration, U.S. Department of Commerce.

ACTION: Notice.

EFFECTIVE DATE: November 29, 1993.

FOR FURTHER INFORMATION CONTACT: Erik Warga, Office of Antidumping Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 482–0922.

POSTPONEMENT OF FINAL DETERMINATION: Shanghai Native Produce Import and Export Company, Sinochem Jiangsu Suzhou Export and Import Corporation, and Sinochem Liaoning, responding exporters in this proceeding, account for a significant proportion of exports of merchandise covered by this investigation. On November 8, 1993, these exporters requested that the Department of Commerce postpone its final determination until not later than 135 days after the date of publication of the preliminary determination. Our November 1, 1993, in this proceeding was affirmative.

In accordance with section 735(a)(2) of the Tariff Act of 1930, as amended (the Act), when, subsequent to an affirmative preliminary determination, we receive such a request from exporters who account for a significant proportion of the merchandise under investigation, we are required, absent compelling reasons for denial, to grant the request. Accordingly, we are postponing our final determination as to whether sales of nitromethane from the PRC have been made at less than fair value until not later than March 23, 1994.

Public Comment

In accordance with 19 CFR 353.38, case briefs or other written comments in at least ten copies must now be submitted to the Assistant Secretary for Import Administration no later than February 18, 1994, and rebuttal briefs, no later than February 25, 1994. In accordance with 19 CFR 353.38(b), we will hold a public hearing, if requested, to afford interested parties an opportunity to comment on arguments raised in case or rebuttal briefs. Tentatively, the hearing will now be held on March 1, 1994, at 10 a.m. at the U.S. Department of Commerce, room 3708, 14th Street and Constitution Avenue, NW., Washington, DC 20230. Parties should confirm by telephone the time, date, and place of the hearing 48 hours before the scheduled time.

Interested parties who wish to request a hearing, or to participate if one is requested, must submit a written request to the Assistant Secretary for Import Administration, U.S. Department of Commerce, room B–099, within ten days of the publication of this notice. Requests should contain: (1) The party's name, address, and telephone number; (2) the number of participants; and (3) a list of the issues to be discussed. In accordance with 19 CFR 353.38(b), oral presentations will be limited to issues raised in the briefs.

This notice is published pursuant to section 735(d) of the Act and 19 CFR 353.20(b)(2).

Dated: November 17, 1993.

Barbara R. Stafford,

Acting Assistant Secretary for Import Administration.

BILLING CODE 3510–DS–M

National Technical Information Service

NTIS Advisory Board; Meeting

AGENCY: National Technical Information Service, Technology Administration, Commerce.

ACTION: Notice of partially closed meeting.

SUMMARY: Pursuant to the Federal Advisory Committee Act, 5 U.S.C. app. 2, notice is hereby given that the National Technical Information Service Advisory Board (the "Board") will meet on Thursday, December 9, 1993, from 9 a.m. to 3:30 p.m. and on Friday, December 10, 1993, from 9 a.m. to 3 p.m. One 2-hour session on December 9 will be closed to the public.

The Board was established under the authority of 15 U.S.C. 370b(c), and was chartered on September 15, 1989. The Board is composed of five members appointed by The Secretary of Commerce who are eminent in such fields as information resources management, information technology, and library and information services. The purpose of the meeting is to review and make recommendations regarding general policies and operations of NTIS, including policies in connection with fees and charges for its services. The agenda will include presentations on NTIS modernization, a review of fiscal data, an update on the facility leasing process, and a review of the progress with FedWorld. The closed session discussion is schedule to begin at 1 p.m. and end at 3 p.m. on December 9, 1993. The session will be closed because premature disclosure of the information to be discussed would be likely to significantly frustrate implementation of NTIS' business plan.

DATES: The meeting will convene on December 9, 1993 at 9 a.m. and adjourn at 3:30 p.m., and will convene again on December 10, 1993 at 9 a.m. and adjourn at 3 p.m.

ADDRESSES: The meeting will be held on December 9, in room 1617M4, and on December 10, in room 1412, U.S. Department of Commerce, Herbert C. Hoover Building, 14th Street and

Constitution Avenue NW., Washington, DC 20230.

PUBLIC PARTICIPATION: Except for the closed session from 1 to 3 p.m. on December 9, 1993, the meeting will be open to public participation. Approximately thirty minutes each day will be set aside for oral comments or questions as indicated in the agenda. Seats will be available afar the public and for the media. Seats will be available on a first-come, first-served basis. Any member of the public may submit written comments concerning the Board's affairs at any time before and after the meeting. Copies of the minutes of the meeting will be available within thirty days from the address given below.

FOR FURTHER INFORMATION CONTACT: Barbara Hull, NTIS Advisory Board Secretary, National Technical Information Service, 5285 Port Royal Road, Springfield, Virginia 22161. Telephone: 703–487–4612; Fax 703–487–4093.

Dated: October 28, 1993.

Donald R. Johnson,

Director.

BILLING CODE 3510–04–M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Amendment to the Export Licensing System for Certain Cotton, Wool, Man-Made Fiber, Silk Blend and Other Vegetable Fiber Textiles and Textile Products Produced or Manufactured in the People's Republic of China

November 23, 1993.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs providing for the use of export licenses/commercial invoices printed on purple paper.

EFFECTIVE DATE: January 1, 1994.

FOR FURTHER INFORMATION CONTACT: Janet Heinzen, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 482–4212.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

The Governments of the United States and the People's Republic of China have agreed to further amend the existing export licensing system to provide for the use of export licenses/commercial invoices, issued by the Government of the People's Republic of China, for shipments of goods produced or manufactured in China and exported from China on and after January 1, 1994, which are printed on a purple guilloche patterned background paper and include a manufacturer's identification (M.I.D.) section. The purple form replaces the brown licenses/invoices currently in use. The visa stamp is not been changed at this time. The Chinese Embassy in Washington will continue to issue the white pre-printed replacement visa now in use.

Textile products which are produced or manufactured in China and exported from China during the period January 1, 1994 through January 31, 1994 may be accompanied by visas printed on either brown or purple background paper.

See 49 FR 7269, published on February 28, 1984; and 52 FR 28741, published on August 3, 1987.

Rita D. Hayes,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

November 23, 1993.

Commissioner of Customs,

Department of the Treasury, Washington, DC 20229.

Dear Commissioner: This directive amends, but does not cancel, the directive issued to you on February 23, 1984, as amended, by the Chairman, Committee for the Implementation of Textile Agreements. That directive establishes an export licensing system for certain cotton, wool, man-made fiber, silk blend and other vegetable fiber textiles and textile products, produced or manufactured in the People's Republic of China.

Effective on January 1, 1994, you are directed to amend further the directive dated February 23, 1984 to provide for the use of export licenses/commercial invoices issued by the Government of the People's Republic of China which are printed on purple guilloche patterned background paper and include a manufacturer's identification (M.I.D.) section. The purple form will replace the brown form currently being used. The Chinese Embassy in Washington will continue to use the white pre-printed replacement visa now in use.

To facilitate implementation of this amendment to the export licensing system, I request that you permit entry of textile products, produced or manufactured in China and exported from China during the period January 1, 1994 through January 31, 1994, for which the Government of the People's Republic of China has issued either a brown or purple export license/commercial invoice.

Goods exported from China on and after February 1, 1994 must be accompanied by an export visa issued by the Government of the People's Republic of China on the purple invoice form only.

Shipments entered or withdrawn from warehouse according to this directive which are not accompanied by an appropriate export visa shall be denied entry and a new visa must be obtained.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Rita D. Hayes,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510–DR–F

The Correlation: Textile and Apparel Categories With the Harmonized Tariff Schedule of the United States for 1994

November 23, 1993

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Notice.

FOR FURTHER INFORMATION CONTACT: Lori E. Goldberg, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 482–3400.

SUPPLEMENTARY INFORMATION:

The Committee for the Implementation of Textile Agreements (CITA) announces that the 1994 Correlation, based on the Harmonized Tariff Schedule of the United States, will be available on November 22, 1993.

Copies of the Correlation may be purchased from the U.S. Department of Commerce, Office of Textiles and Apparel, 14th and Constitution Avenue, NW., room H3100, Washington, DC 20230, ATTN: Correlation, at a cost of $30 per copy. Checks or money orders should be made payable to the U.S. Department of Commerce.

Rita D. Hayes,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510–DR–F

COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

Procurement List Additions

AGENCY: Committee for Purchase from People who are Blind or Severely Disabled.

ACTION: Additions to procurement list.

SUMMARY: This action adds to the Procurement List services to be furnished by nonprofit agencies employing persons who are blind or have other severe disabilities.

EFFECTIVE DATE: December 29, 1993.

ADDRESSES: Committee for Purchase from People who are Blind or Severely Disabled, Crystal Square 3, suite 403, 1735 Jefferson Davis Highway, Arlington, Virginia 22202–3461.

FOR FURTHER INFORMATION CONTACT: Beverly Milkman (703) 603–7740.

SUPPLEMENTARY INFORMATION: On July 16, October 1, 8 and 15, 1993, the Committee for Purchase from People who are Blind or Severely Disabled published notices (58 FR 38364, 51319, 52478 and 53503) of proposed additions to the Procurement List.

After consideration of the material presented to it concerning the capability of qualified nonprofit agencies to provide the services, fair market price, and the impact of the addition on the current or most recent contractor, the Committee has determined that the services listed below are suitable for procurement by the Federal Government under 41 U.S.C. 46–48c and 41 CFR 51–2.6.

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the services to the Government.

2. The action will not have a severe economic impact on current contractors for the services.

3. The action will result in authorizing small entities to furnish the services to the Government.

4. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 46–48c) in connection with the services proposed for addition to the Procurement List.

Accordingly, the following services are hereby added to the Procurement List:

Electronic Image Conversion, Federal Bureau of Investigation, 9th & Pennsylvania Avenue, NW., Washington, DC

Janitorial/Custodial, Everett McKinley Dirksen Federal Building, 219 South Dearborn Street, Chicago, Illinois

Janitorial/Custodial, U.S. Naval Home, Gulfport, Mississippi

Janitorial/Custodial, Automated Flight Service Station, Seattle, Washington.

This action does not affect contracts awarded prior to the effective date of this addition or options exercised under those contracts.

Beverly L. Milkman,

Executive Director.

BILLING CODE 6820–33–P

Procurement List Proposed Additions

AGENCY: Committee for Purchase from People who are Blind or Severely Disabled.

ACTION: Proposed additions to procurement list.

SUMMARY: The Committee has received proposals to add to the Procurement List commodities and services to be furnished by nonprofit agencies employing persons who are blind or have other severe disabilities.

COMMENTS MUST BE RECEIVED ON OR BEFORE: December 29, 1993.

ADDRESSES: Committee for Purchase from People who are Blind or Severely Disabled, Crystal Square 3, suite 403, 1735 Jefferson Davis Highway, Arlington, Virginia 22202–3461.

FOR FURTHER INFORMATION CONTACT: Beverly Milkman (703) 603–7740.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 47(a)(2) and 41 CFR 51–2.3. Its purpose is to provide interested persons an opportunity to submit comments on the possible impact of the proposed actions.

If the Committee approves the proposed additions, all entities of the Federal Government (except as otherwise indicated) will be required to procure the commodities and services listed below from nonprofit agencies employing persons who are blind or have other severe disabilities.

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the commodities and services to the Government.

2. The action does not appear to have a severe economic impact on the current contractors for the commodities and services.

3. The action will result in authorizing small entities to furnish the commodities and services to the Government.

4. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 46–48c) in connection with the commodities and services proposed for addition to the Procurement List.

Comments on this certification are invited. Commenters should identify the statement(s) underlying the certification on which they are providing additional information.

It is proposed to add the following commodities and services to the Procurement List for production by the nonprofit agencies listed:

Commodities

Box, Seedling Growing
3990–00–NSH–0070
(Requirements for the U.S. Department of Agriculture)
Nonprofit Agency: Sunrise Enterprises, Inc., Roseburg, Oregon.

Pallet, Greenhouse
3990–00–NSH–0071
(Requirements for the U.S. Department of Agriculture)
Nonprofit Agency: Sunrise Enterprises, Inc., Roseburg, Oregon.

Lath, Wood
5510–00–NSH–0041
(Requirements for the U.S. Department of Agriculture)
Nonprofit Agency: Sunrise Enterprises, Inc., Roseburg, Oregon.

Sponge, Surgical
6510–00–559–3219
6510–00–116–1285
6510–00–119–9314
6510–00–998–3838
Nonprofit Agency: Industries for the Blind and Visually Impaired, Delhi, Louisiana.

Holder, Clinical Chart
6530–01–115–7835
Nonprofit Agency: Constructive Workshops, Inc., New Britain, Connecticut.

Fastener, Paper
7510–00–161–4284
7510–00–223–6813
7510–00–223–6814
7510–00–223–6815
7510–00–291–0140
7510–00–634–2463
Nonprofit Agency: Delaware County Chapter, NYSARC, Walton, New York.

Services

Janitorial/Custodial, Federal Building and U.S. Courthouse, 517 E. Wisconsin, Milwaukee, Wisconsin
Nonprofit Agency: Milwaukee Center for Independence, Inc., Milwaukee, Wisconsin.

Mailroom Operation, National Archives, 8601 Adelphi Road, College Park,

Maryland and all Washington, DC Metropolitan Area Locations.
Nonprofit Agency: Fairfax Opportunities Unlimited, Inc., Springfield, Virginia.
Painting Service
Family Quarters
Fort Sam Houston, Texas
Nonprofit Agency: Goodwill Industries of San Antonio, San Antonio, Texas.

Beverly L. Milkman,

Executive Director.

BILLING CODE 6820–33–P

Procurement List; Proposed Additions

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Proposed additions to procurement list

SUMMARY: The Committee has received proposals to add to the Procurement List commodities to be furnished by nonprofit agencies employing persons who are blind or have other severe disabilities.

COMMENTS MUST BE RECEIVED ON OR BEFORE: December 29, 1993.

ADDRESSES: Committee for Purchase From People Who Are Blind or Severely Disabled, Crystal Square 3, suite 403, 1735 Jefferson Davis Highway, Arlington, Virginia 22202–3461.

FOR FURTHER INFORMATION CONTACT: Beverly Milkman (703) 603–7740.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 47(a)(2) and 41 CFR 51–2.3. Its purpose is to provide interested persons an opportunity to submit comments on the possible impact of the proposed actions.

If the Committee approves the proposed additions, all entities of the Federal Government (except as otherwise indicated) will be required to procure the commodities listed below from nonprofit agencies employing persons who are blind or have other severe disabilities.

I certify that the following actions will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the commodities to the Government.

2. The action will result in authorizing small entities to furnish the commodities to the Government.

3. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 46–48c) in connection with the commodities proposed for addition to the Procurement List.

Comments on this certification are invited. Commenters should identify the statement(s) underlying the certification on which they are providing additional information.

The following commodities have been proposed for addition to the Procurement List for production by the nonprofit agency listed:

Trousers, Desert Combat

8415–01–327–5324 thru –5344
Nonprofit Agency:
Goodwill Industries of Atlanta, Atlanta, Georgia
Goodwill Industries of South Florida Miami, Florida.

BILLING CODE 4000–01–P

DEPARTMENT OF ENERGY

Floodplain Statement of Findings for Proposed Public Water Supply Near the Fernald Environmental Management Project, Fernald, OH

AGENCY: Department of Energy (DOE).

ACTION: Floodplain Statement of Findings.

SUMMARY: This is a Floodplain Statement of Findings for the proposed public water supply project near the Fernald Environmental Management Project (FEMP), prepared in accordance with 10 CFR Part 1022. DOE proposes to provide funding for the installation of a public water supply to be utilized by FEMP area residents whose groundwater supply may have been affected by, or has the potential to be affected by, the South Groundwater Contamination Plume (South Plume). This project would be implemented in cooperation with the Hamilton County Department of Public Works as a part of a larger project so supply water to the citizens of Crosby Township, Ohio. The proposed action involves the installation of approximately 13 miles of pipeline within the existing State and county road easements, in Hamilton and Butler Counties, Ohio. Approximately 8.2 acres of the Great Miami River floodplain will be temporarily disturbed during project construction. DOE prepared a floodplain and wetlands assessment describing the effects, alternatives, and measures designed to avoid or minimize potential harm to or within the affected floodplain. DOE will endeavor to allow 15 days of public review after publication of the Statement of Findings before implementing the proposed action. Maps and further information on this proposed action are available from DOE at the address below.

FOR FURTHER INFORMATION CONTACT: For further information on this proposed action, contact:

Mr. Wally Quaider, Assistant Manager, Technical Support, Fernald Field Office, U.S. Department of Energy, P.O. Box 398704, Cincinnati, Ohio 45239–8704, (513) 648–3017 Fax number: (513) 648–3077

For further information on general DOE floodplain/wetlands

environmental review requirements, contact:

Ms. Carol M. Borgstrom, Director, Office of NEPA Oversight, EH–25, U.S. Department of Energy, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586–4600 or (800) 472–2756

SUPPLEMENTARY INFORMATION: This is a Floodplain Statement of Findings for the proposed public water supply project near FEMP prepared in accordance with 10 CFR Part 1022. A Notice of Floodplain and Wetlands Involvement was published in the **Federal Register** on May 20, 1993, (58 FR 29401) and a Floodplain and Wetlands Assessment was prepared.

The primary objective of the proposed public water supply project near FEMP is to provide a permanent, reliable, and safe drinking water supply to local residents. DOE has agreed to participate in the provision of drinking water to the public as part of the Amended Consent Agreement entered into between DOE and the Environmental Protection Agency, dated September 1991. DOE would provide funding for the engineering and installation of transmission and distribution water mains from an existing public water supply source, a water reservoir, and service taps and connections for affected or potentially affected property owners.

The proposed action involves installing approximately 13 miles of pipeline within the existing State and county road easements in Hamilton and Butler Counties, Ohio. The pipeline will be installed along East Miami River Road from the Cincinnati Water Works (CWW) Bolton Plant to and across the Great Miami River bridge at the Cincinnati Brookville Road (SR 126), along SR 126 to its intersection with SR 128, and along SR 128 running south to the intersection with New Haven Road. The remainder of the pipeline will be installed within existing easements along Willey, New Haven, and Paddys Run Roads, ending with a 1-million gallon reservoir.

Construction of the public water supply transmission and distribution piping will take place adjacent to roads in existing rights-of-way. Installation of the varying size water mains will require excavations approximately 6 feet deep and 3 feet wide along the maintained portion of the road shoulder. The soil that is removed will be piled by the side of the excavation until needed for backfill.

Standard best management practices to control erosion during construction activities will be employed. Once installed, the pipeline will be surrounded by a compacted bed of gravel, covered with backfill soil, as seeded. Excess soil will be hauled away and disposed in accordance with Hamilton County requirements. No more than 8.2 acres of floodplain will be temporarily distributed during project construction.

An alternate pipeline route reviewed included routing through archaeological sites in the Great Miami River floodplain. Three alternate reservoir sites were considered in addition to the proposed reservoir site. Two of the alternate reservoir sites would have required the acquisition of private land east of the proposed tank site. The third site would have been on Hamilton County Park property (Miami Whitewater Forest Park) west of the proposed tank site. This third site could have impacted a State endangered species, the cave salamander (*Eurycea lucifuga*) and could have resulted in fragmentation of existing forest resources. The proposed reservoir site is located in the northeast portion of the Miami Whitewater Forest Park, at least 2,500 feet from the known location of the cave salamander. The water main to the reservoir will run south from New Haven Road about 50 yards into the Park.

The proposed route was selected because it is restricted to within 3 feet of the roadway pavement, except for the portion of Hamilton County park land. Based upon the review of the proposed action and alternatives, DOE determined that no practicable alternative is available for locating the proposed action within the floodplain/wetlands. The proposed action is not expected to result in permanent impacts to the floodplains or wetlands. The portions of the pipeline to be installed within the 100-year floodplain of the Great Miami River will occur along existing roadways and easements in areas that have been previously disturbed. Measures taken to minimize potential harm to or within the floodplains and wetlands include design and construction constraints, such as excavating within 3 feet of the pavement on the maintained road shoulder, employing erosion and sediment controls adjacent to the trench during construction, removing excess soil after the trench has been backfilled, regrading the surface to original elevations, and reseeding the disturbed surfaces. The extent of the potential flood hazard is minimal. The installation of the pipeline will be performed in such a manner as to avoid or minimize impacts to the 100-floodplain. The proposed action is not expected to result in permanent evaluation changes to the floodplain. The level of activity in the floodplain for this action is expected to be minimal. Therefore, impacts to the floodplain are not expected.

DOE will endeavor to allow 15 days of public review after publication of the Statement of Findings prior to implementing the proposed action.

Issued in Washington, DC, this 22 day of November, 1993.

Richard J. Guimond,

Assistant Surgeon General, USPHS, Principal Deputy Assistant Secretary for Environmental Restoration and Waste Management.

[FR Doc. 93–29166 Filed 11–26–93; 8:45 am]

BILLING CODE 6450–01–M

Chicago Operations Office; Denver Support Office

AGENCY: U.S. Department of Energy.

ACTION: Solicitation for Cooperative Agreement.

SUMMARY: Pursuant to the Department of Energy (DOE) Financial Assistance Rules 10 CFR 600.9, the Office of Energy Efficiency and Renewable Energy is issuing a solicitation numbered DE–SC48–94R810501 for developing market assessments and commercial evaluation reports for prospective Energy-Related Inventions Program (ERIP) grantees. The purpose of the proposed Cooperative Agreement is for the Participant, working in close cooperation with the Inventions and Innovation Division, to provide market assessments of technical, energy-related inventions that have been recommended for ERIP grant funding by the National Institute of Standards and Technology (NIST). The proposed work is designed to explore the market segments and market potential for technologies and inventions which have been recommended by NIST for grant funding support under ERIP. It is the DOE's expectation that this work will increase the effectiveness of the Energy-Related Inventions Program, and provide a better understanding of benefits and barriers of commercializing energy efficiency and renewable energy technologies and practices.

SUPPLEMENTARY INFORMATION: The Participant shall develop market intelligence information to provide high quality reports which will indicate the commercial potential and application areas for each invention recommended via NIST. These reports will integrate the technical features of each innovation with a situational analysis to determine the product, competitive market and commercial environment. The report will also identify the key opportunities, barriers and concerns which will affect

the introduction and success of the innovation when entered into the marketplace. Approximately 120 market analysis and commercial evaluations are expected to be performed over a 3-year period. Additionally, it is anticipated that about 30 of the 120 assessments will require a more in-depth analysis due to availability of data, the nature of the invention, or on request from DOE.

DOE's Office of Energy Efficiency and Renewable Energy, Inventions and Innovation Division, invites interested parties to submit applications in response to this solicitation. The funding level for this requirement is expected to be $775,000 over a 3-year period. The DOE reserves the right to make multiple awards. This solicitation will be issued on or about November 30, 1993. Applications will be due approximately forty-five (45) days after the solicitation is issued.

FOR FURTHER INFORMATION CONTACT: U.S. Department of Energy, Denver Support Office, 2801 Youngfield Street, suite 380, Golden, CO 80401. Dennis D. Maez, Contract Specialist (303) 231–5750, Extension 140.

Issued in Chicago, Illinois on November 17, 1993.

Alan E. Smith,

Director, Information Management and Support Division.

BILLING CODE 6450–01–M

Federal Energy Regulatory Commission

[Docket No. QF93–148–000, et al.]

Dixie Valley, L.P., et al.

November 22, 1993.

Take notice that the following filings have been made with the Commission:

1. Dixie Valley, L.P.

[Docket No. QF93–148–000]

On November 16, 1993, Dixie Valley, L.P. tendered for filing a supplement to its filing in this docket. The supplement pertains to a change in the ownership of the facility, information relating to the ownership and proposed leasing arrangements of the interconnecting transmission lines, and technical aspects of the qualifying facility. No determination has been made that the submittal constitutes a complete filing.

Comment date: December 13, 1993 in accordance with Standard Paragraph E at the end of this notice.

2. Illinois Power Co.

[Docket No. EC94–3–000]

Take notice that on November 15, 1993, Illinois Power Company (Illinois Power) submitted an application pursuant to Section 203 of the Federal Power Act for authority to effect a "disposition of facilities" that would be deemed to occur as a result of a proposed corporate restructuring, all as more fully set forth in the application, which is on file with the Commission and open the public inspection.

The Application states that the proposed restructuring would be accomplished through the creation of a holding company, IP Holding Company, of which Illinois Power would become a subsidiary. It is stated that the proposed restructuring is intended to permit the establishment of non-utility businesses that can take advantage of new business opportunities on a timely basis and will not affect Illinois Power's jurisdictional facilities, rates or services.

Comment date: December 8, 1993 in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraphs

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 18 CFR 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 93–29109 Filed 11–26–93; 8:45 am]

BILLING CODE 6717–01–P

[Project No. 2519–003 Maine]

Central Maine Power Co.; Notice of Availability of Draft Environmental Assessment

November 22, 1993.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission's) regulations, 18 CFR part 380 (Order No. 486, 52 FR 47897), the Office of Hydropower Licensing has reviewed the application for major new license for the North Gorham Project, located on the Presumpscot River, in Cumberland County, Maine and has prepared an Environmental Assessment (EA) for the project.

On September 13, 1993, staff issued and distributed to all parties a draft EA, and requested that comments on the draft EA be filed within 30 days. All comments that were filed have been considered in the EA.

In the EA, the Commission's staff has analyzed the environmental effects of the existing project and has concluded that approval of the project, with appropriate mitigation and enhancement measures, would not constitute a major Federal action significantly affecting the quality of the human environment.

Copies of the EA are available for review in the Public Reference Branch, room 3104 of the Commission's offices at 941 North Capitol Street NE., Washington, DC 20426.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. CP94–82–000, et al.]

National Fuel Gas Supply Corporation, et al.; Natural Gas Certificate Filings

November 19, 1993

Take notice that the following filings have been made with the Commission:

1. National Fuel Gas Supply Corp.

[Docket No. CP94–94–82–000]

Take notice that on November 17, 1992, National Fuel Gas Supply Corporation (National Fuel), 10 Lafayette Square, Buffalo, New York 14203, filed in Docket No. CP94–82–000 an application for a certificate of public convenience and necessity to refunctionalize seven segments of pipeline and fourteen regulating and measuring stations from production to transmission pursuant to Section 7(c) of the Natural Gas Act and a petition for a Commission order declaring that three previously certificated facilities should be refunctionalized from production to transmission, all as more fully set forth in the application and petition which is currently on file and open to public inspection.

National Fuel states that the facilities to be refunctionalized are pipeline facilities with a net book value of $1,231,729 and associated regulating and meter stations with a net book valu

of $50,246. National Fuel lists the pipeline facilities as follows:

Pipeline	Location	Net book value	FERC authorization
A–15	Pennsylvania	$300,404	CP83–4
D–68	Pennsylvania	216,308	CP80–463
K–1	New York	27,494	None.
K–2	New York	11,031	None.
K–3	New York	37,619	CP83–4
K–1	Pennsylvania	37,514	None.
K–2	Pennsylvania	331,283	None.
K–4	Pennsylvania	263,671	None.
K–182	Pennsylvania	206	None.
Z-67	New York	6,199	None.

National Fuel states that, although the pipelines identified above are currently functionalized as production, none meets the *Farmland* criteria used by the Commission to evaluate whether a pipeline should be considered a nonjurisdictional gathering facility. National Fuel indicates that it has included in its pleading a detailed schedule identifying each of the facilities, and its length, diameter, operations, pressure, number of receipt points, whether or not it comprises an extension beyond the central point in the field, and accounting detail.

National states that the authorization would ensure that its books and records reflect the actual use of the above-described facilities. National Fuel requests an effective date of April 1, 1994, for the requested refunctionalization.

Comment date: December 10, 1993, in accordance with the first paragraph of Standard Paragraph F at the end of this notice.

2. Transcontinental Gas Pipe Line Corp.

[Docket No. CP94–80–000]

Take notice that on November 15, 1993, Transcontinental Gas Pipe Line Corporation (TGPL), P.O. Box 1396, Houston, Texas 77251, filed in Docket No. CP94–80–000 a request pursuant to Sections 157.205 and 157.212 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205, 157.212) for authorization to add an additional point of delivery for a certain existing transportation and sales customer; and to install and operate certain appurtenant facilities under TGPL's blanket certificate issued in Docket No. CP82–426–000 pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

TGPL proposes to construct and operate a new point of delivery to the Greer Commission of Public Works (Greer), referred to as the Tryon Lateral Delivery Point, which will include inlet piping, a meter station, pressure regulators and appurtenant facilities in Spartanburg County, South Carolina. It is stated that Greer will construct, or cause to be constructed, appurtenant facilities to enable it to receive gas from TGPL at the new delivery point.

TGPL states that the Tryon Lateral Delivery Point will be used by Greer to receive up to 30,000 Mcf per day of gas from TGPL, on an interruptible basis, in order to enable Greer to provide additional gas supply delivery flexibility to its existing and proposed distribution system. TGPL also states that the authorized total transportation and sales service entitlement for Greer will not be altered from the current level and the addition of the Tryon Lateral Delivery Point will have no effect on TGPL's peak day or annual deliveries to Greer. It is maintained that Greer will continue to have total firm mainline sales and transportation capacity of 7,091 Mcf per day.

TGPL estimates the cost of construction to be $579,000, which will be reimbursed by Greer.

Comment date: January 3, 1994, in accordance with Standard Paragraph G at the end of this notice.

3. Arkla Energy Resources Co.

[Docket No. CP94–93–000]

Take notice that on November 18, 1993, Arkla Energy Resources Company (AER), Post Office Box 21734, Shreveport, Louisiana 71151, filed in Docket No. CP94–93–000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the replacement of certain existing metering facilities to provide transportation service to Arkansas Louisiana Gas Company (ALG) for redelivery to the Empire School located in Stephens County, Oklahoma, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

AER specifically proposes to replace an existing 1-inch U-Shaped meter setting with a 2-inch U-Shape meter setting at an existing delivery tap on AER's transmission Line 10–1. AER states that the modified meter would permit additional deliveries to ALG's existing rural extension No. 1015 to provide service to the Empire School. AER states that the volume of gas that would be delivered through the replacement facilities is approximately 8,000 Mcf annually and 144 Mcf on a peak day. AER estimates a facility cost of $9,961, which it indicates would be reimbursed by ALG.

Comment date: December 10, 1993, in accordance with Standard Paragraph F at the end of this notice.

4. Northern Natural Gas Co.

[Docket No. CP94–84–000]

Take notice that on November 16, 1993, Northern Natural Gas Company (Northern), 1111 South 103rd Street, Omaha, Nebraska 68124–1000, filed in Docket No. CP94–84–000 a request pursuant to §§ 157.205 and 157.212 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205, 157.212) for authorization to upgrade an existing delivery point to accommodate increased natural gas deliveries to Midwest Gas, a Division of Midwest Power Systems, Inc. (Midwest Gas) for delivery to the Arthur #1 TBS, located in Ida County, under the blanket certificate issued in Docket No. CP82–401–000 pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

Northern states that it requests authority to upgrade an existing delivery point in Iowa to accommodate increased natural gas deliveries to Midwest Gas under Northern's currently effective service agreements. Northern states that Midwest Gas has requested increased service at the Arthur #1 town border station (TBS) to handle

additional load requirements for the community of Arthur, Iowa.

Northern further states that the increase in proposed volumes to be delivered to the Arthur #1 TBS of 648 Mcf on a peak day and 16,857 Mcf on an annual basis. Northern estimates a cost of upgrading the delivery point of $4,000. Midwest Gas will reimburse Northern for the cost of upgrading this delivery point.

Comment date: January 3, 1994, in accordance with Standard Paragraph G at the end of this notice.

Standard Paragraphs

F. Any person desiring to be heard or to make any protest with reference to said application should on or before the comment date, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that permission and approval for the proposed abandonment are required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for applicant to appear or be represented at the hearing.

G. Any person or the Commission's staff may, within 45 days after issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to Section 7 of the Natural Gas Act.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–P

[Docket Nos. ST93–5514–000 through ST93–6609–000]

Transwestern Pipeline Co.; Self-Implementing Transactions

November 22, 1993.

Take notice that the following transactions have been reported to the Commission as being implemented pursuant to Part 284 of the Commission's regulations, sections 311 and 312 of the Natural Gas Policy Act of 1978 (NGPA), Section 7 of the NGA and section 5 of the Outer Continental Shelf Lands Act.[1]

The "Recipient" column in the following table indicates the entity receiving or purchasing the natural gas in each transaction.

The "Part 284 Subpart" column in the following table indicates the type of transaction.

A "B" indicates transportation by an interstate pipeline on behalf of an intrastate pipeline or a local distribution company pursuant to § 284.102 of the Commission's regulations and section 311(a)(1) of the NGPA.

A "C" indicates transportation by an intrastate pipeline on behalf of an interstate pipeline or a local distribution company served by an interstate pipeline pursuant to § 284.122 of the Commission's regulations and section 311(a)(2) of the NGPA.

A "D" indicates a sale by an intrastate pipeline to an interstate pipeline or a local distribution company served by an interstate pipeline pursuant to § 284.142 of the Commission's Regulations and section 311(b) of the NGPA. Any interested person may file a complaint concerning such sales pursuant to § 284.147(d) of the Commission's Regulations.

An "E" indicates an assignment by an intrastate pipeline to any interstate pipeline or local distribution company pursuant to § 284.163 of the Commission's regulations and section 312 of the NGPA.

A "G" indicates transportation by an interstate pipeline on behalf of another interstate pipeline pursuant to § 284.222 and a blanket certificate issued under § 284.221 of the Commission's regulations.

A "G–I" indicates transportation by an intrastate pipeline company pursuant to a blanket certificate issued under § 284.227 of the Commission's regulations.

A "G–S" indicates transportation by interstate pipelines on behalf of shippers other than interstate pipelines pursuant to § 284.223 and a blanket certificate issued under § 284.221 of the Commission's regulations.

A "G–LT" or "G–LS" indicates transportation, sales or assignments by a local distribution company on behalf of or to an interstate pipeline or local distribution company pursuant to a blanket certificate issued under § 284.224 of the Commission's regulations.

A "G–HT" or "G–HS" indicates transportation, sales or assignments by a Hinshaw Pipeline pursuant to a blanket certificate issued under § 284.224 of the Commission's regulations.

A "K" indicates transportation of natural gas on the Outer Continental Shelf by an interstate pipeline on behalf of another interstate pipeline pursuant to § 284.303 of the Commission's regulations.

A "K–S" indicates transportation of natural gas on the Outer Continental Shelf by an interstate pipeline on behalf of shippers other than interstate pipelines pursuant to § 284.303 of the Commission's regulations.

Lois D. Cashell,

Secretary.

[1] Notice of a transaction does not constitute a determination that the terms and conditions of the proposed service will be approved or that the noticed filing is in compliance with the Commission's regulations.

BILLING CODE 6717-01-P

[Docket No. CP94-76-000, et al.]

Williams Natural Gas Co., et al.; Natural Gas Certificate Filings

November 22, 1993.

Take notice that the following filings have been made with the Commission:

1. Williams Natural Gas Company

[Docket No. CP94-76-000]

Take notice that on November 12, 1993, Williams Natural Gas Company (WNG), P.O. Box 3288, Tulsa, Oklahoma 74101, filed in Docket No. CP94-76-000 a request pursuant to §§ 157.205 and 157.212 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205, 157.212) for authorization to utilize facilities originally installed for the delivery of NGPA section 311 transportation gas to Atchison Casting Corporation (Atchison), for purposes other than NGPA section 311 transportation, under WNG's blanket certificate issued in Docket No. CP82-479-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

WNG proposes to utilize facilities originally installed for the delivery of NGPA section 311 transportation gas to Atchison in Atchison County, Kansas, for purposes other than NGPA section 311 transportation. The cost to construct the facilities was $2,280 which was reimbursed by Atchison. WNG states that this change is not prohibited by an existing tariff and it has sufficient capacity to accomplish the deliveries without detriment to its other customers.

Comment date: January 6, 1994, in accordance with Standard Paragraph G at the end of this notice.

2. Great Lakes Gas Transmission Limited Partnership

[Docket No. CP94-87-000]

Take notice that on November 18, 1993, Great Lakes Gas Transmission Limited Partnership (Great Lakes), One Woodward Avenue, suite 1600, Detroit, Michigan 48226, filed in Docket No. CP94-87-000, a request pursuant to §§ 157.205 and 157.211 of the Commission's Regulations and Great Lakes' blanket certificate issued in Docket No. CP90-2053-000 pursuant to section 7 of the Natural Gas Act for authorization to construct and operate a delivery point near Watersmeet, Michigan, to provide natural gas

transportation service to Michigan Gas Company (MiGas) so it can commence natural gas service to the town of Watersmeet, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

Great Lakes states that it will provide up to 400 Mcf per day of firm backhaul transportation service to MiGas through the new meter station, in Great Lakes' Central Zone, and that equivalent volumes of gas will be received by it at Farwell, Michigan, in Great Lakes' Eastern Zone. Great Lakes states that the new delivery point will consist of a meter station and tap. Great Lakes estimates that the cost to construct the facilities will be about $450,000. Great Lakes states that it will provide the service under part 284 of the Commission's regulation pursuant to Rate Schedule FT of its FERC Gas Tariff, Original Volume No. 3. Great Lakes states that while it currently provides firm transportation services to MiGas under part 284 of the Commission's regulation, neither MiGas nor any other LDC provides natural gas service to the town of Watersmeet. Great Lakes states that the proposed transportation service will not impact its existing peak day and annual deliveries, and can be provided without detriment to service to any other shipper on its system.

Comment date: January 6, 1994, in accordance with Standard Paragraph G at the end of this notice.

3. Great Lakes Gas Transmission Limited Partnership

[Docket No. CP94–88–000]

Take notice that on November 18, 1993, Great Lakes Gas Transmission Limited Partnership (Great Lakes), One Woodward Avenue, Suite 1600, Detroit, Michigan 48226, filed in Docket No. CP94–88–000, a request pursuant to §§ 157.205 and 157.211 of the Commission's Regulations and Great Lakes' blanket certificate issued in Docket No. CP90–2053–000 pursuant to section 7 of the Natural Gas Act for authorization to construct and operate a delivery point near Escanaba, Michigan, to provide natural gas transportation service to Escanaba Paper Company (Escanaba), all as more fully set forth in the request that is on file with the Commission and open to public inspection.

Great Lakes states that Escanaba's natural gas transportation requirements are currently being served by Michigan Consolidated Gas Company. Great Lakes states that Escanaba has requested that Great Lakes construct a new delivery point to provide up to 8,000 Mcf per day of firm backhaul transportation service to Escanaba directly. Great Lakes states that the natural gas will be delivered in Great Lakes' Central Zone and that equivalent volumes of gas will be received by Great Lakes at various points in Great Lakes' Eastern Zone. Great Lakes states that the new delivery point will consist of a meter station and taps. Great Lakes estimates that the cost to construct the facilities will be about $1.1 million. Great Lakes states that it will provide the service under part 284 of the Commission's regulation pursuant to Rate Schedule FT of its FERC Gas Tariff, Original Volume No. 3. Great Lakes states that the proposed transportation service will not impact its existing peak day and annual deliveries, and can be provided without detriment to service to any other shipper on its system.

Comment date: January 6, 1994, in accordance with Standard Paragraph G at the end of this notice.

4. National Fuel Gas Supply Corporation

[Docket No. CP94–86–000]

Take notice that on November 17, 1993, National Fuel Gas Supply Corporation (National), 10 Lafayette Square, Buffalo, New York 14203, filed in Docket No. CP94–86–000 a request pursuant to §§ 157.205 and 157.212 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205, 157.212) for authorization to construct and operate a new delivery point to Myers Gas Company under National's blanket certificate issued in Docket No. CP83–4–000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

National proposes to construct and operate a new delivery point to Myers Gas Company in Venango County, Pennsylvania, for residential heating purposes. National states that the annual volumes transported would be 2,000 Dth and no adverse impact would occur to its other customers.

Comment date: January 6, 1994, in accordance with Standard Paragraph G at the end of this notice.

Standard Paragraphs

G. Any person or the Commission's staff may, within 45 days after issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–P

[Project No. 2019–011]

Pacific Gas & Electric Co.; Notice of Effective Date of Withdrawal of Application for Amendment of License

November 22, 1993.

On February 27, 1991, Pacific Gas and Electric Company (PG&E) filed an application for amendment of license for the Utica Water Power Project No. 2019, located on the North Fork Stanislaus River, in Alpine, Calaveras, and Tuolumne Counties, California, to remove three upstream reservoirs from the project boundaries. On September 27, 1993, PG&E filed a motion to withdraw the amendment application.

No motion in opposition to the notice of withdrawal was filed, and the Commission took no action to disallow the withdrawal. Accordingly, pursuant to Rule 216 of the Commission's Rules of Practice and Procedure,[1] the withdrawal became effective on October 12, 1993.

Lois D. Cashell,

Secretary.

[FR Doc. 93–29082 Filed 11–26–93; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. RP94–51–000]

Shell Western E&P Inc. v. Southern California Gas Co.; Notice of Complaint

November 22, 1993.

Take notice that on November 12, 1993, Shell Western E&P Inc. (SWEPI) filed a complaint against Southern California Gas Company (SoCalGas).

SWEPI argues that SoCalGas has implemented an illegal and discriminatory incremental access fee, which it is charging to interstate transportation shippers who deliver gas to SoCalGas at the Wheeler Ridge interconnection, where the facilities of SoCalGas interconnect with those of Kern River Gas Transmission Company (Kern River), Mojave Pipeline Company,

[1] 18 CFR 385.216 (1993).

and at Kern River Station were the facilities of SoCalGas interconnect with the pipeline expansion project of Pacific Gas Transmission Company (PGT) and Pacific Gas & Electric Company.

SWEPI asserts that it fully supports the arguments made by Southern California Utility Power Pool and Imperial Irrigation District in Docket No. RP93–194–000, and Union Pacific Fuels, Inc., in Docket No. RP93–197–000 but SWEPI is filing a separate complaint because the facts underlying SWEPI's relationship with SoCalGas differ slightly from those underlying the other complainants.

Any person desiring to be heard or to protest said complaint should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.214, 385.211. All such motions or protests should be filed on or before December 13, 1993. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection. Answers to this complaint shall be due on or before December 13, 1993.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. GT94–2–000]

Texas Eastern Transmission Corp.; Notice of Proposed Changes in FERC Gas Tariff

November 22, 1993.

Take notice that on October 8, 1993, Texas Eastern Transmission Corporation (Texas Eastern) tendered for filing as part of its FERC Gas Tariff, Sixth Revised Volume No. 1, the tariff sheets listed on Appendix A of the filing.

Texas Eastern states that on September 30, 1993, it filed certain tariff sheets with the Commission which reflected the modification, clarifications and explanations required by the Commission's "Third Order on compliance Filing and Second Order on Rehearing" issued September 17, 1993. These tariff sheets reflected an effective date of June 1, 1993, as required by the September 17, order.

Texas Eastern states that as a result of the modifications to tariff sheets required by the September 17 order, Texas Eastern herewith submits substitute tariff sheets to incorporate the identical modifications into certain affected tariff sheets previously filed with the Commission between May 14, 1993, and September 30, 1993, in Docket Nos. RP93–125, TM93–6–17, GT93–61, TM94–1–17, RP93–181 and CP92–459–002. Appendix A to this filing specifically delineates the tariff sheets filed herewith by the appropriate docket number.

Texas Eastern states that copies of the filing were served on Texas Eastern's jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with 18 CFR 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before November 30, 1993. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the public reference room.

ENVIRONMENTAL PROTECTION AGENCY

[OPP–00370; FRL–4744–7]

State FIFRA Issues Research and Evaluation Group (SFIREG); Open Meeting

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The State FIFRA Issues Research and Evaluation Group (SFIREG) will hold a 2–day meeting, beginning on December 9, 1993, and ending on December 10, 1993. This notice announces the location and times for the meeting and sets forth tentative agenda topics. The meeting is open to the public.

DATES: The SFIREG will meet on Thursday, December 9, 1993, from 8:30 a.m. to 5 p.m. and on Friday, December 10, 1993, beginning at 8:30 a.m. and adjourning at approximately noon.

ADDRESSES: The meeting will be held at: DoubleTree Hotel National Airport-Crystal City, 300 Army-Navy Drive, Arlington, VA 22202, (703) 892–4100.

FOR FURTHER INFORMATION CONTACT: By mail: Shirley M. Howard, Office of Pesticide Programs (7506C), Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Rm. 1109, Crystal Mall No. 2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703) 305–7371.

SUPPLEMENTARY INFORMATION: The tentative agenda of SFIREG includes the following:

1. Regional SFIREG reports.
2. Reports from the SFIREG Working Committees.

3. Discussion of old and new issue papers.
4. NAS follow-up.
5. Update on Office of Pesticide Program policies and regulations: certification and training, endangered species, groundwater protection, and worker protection.
6. Update from the Office of Compliance Monitoring.
7. Other topics as appropriate.

Dated: November 22, 1993.

Douglas D. Campt,

Director, Office of Pesticide Programs.

National Smelting & Refining Site; Proposed Settlement

AGENCY Environmental Protection Agency.

ACTION: Notice of proposed settlement.

SUMMARY: Under section 122(h) of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), the Environmental Protection Agency (EPA) has agreed to settle claims for response costs at the National Smelting & Refining Site, Atlanta, Georgia, with H&S Metals Corp. and Hartsoe Battery, Inc. EPA will consider public comments on the proposed settlement for thirty days. EPA may withdraw from or modify the proposed settlement should such comments disclose facts or considerations which indicate the proposed settlement is inappropriate, improper, or inadequate. Copies of the proposed settlement are available from: Ms. Carolyn McCall, Waste Programs Branch, Waste Management Division, U.S. EPA, Region IV, 345 Courtland Street, NE., Atlanta, Georgia 30365, (404) 347-5059.

Written comment may be submitted to the person above within 30 days of the date of publication.

Dated: November 10, 1993.

Richard D. Green,

Acting Director, Waste Management Division.

For the hearing impaired *only*, Telecommunications Device for the Deaf (TDD), Dorothea Thompson (202-452-3544), Board of Governors of the Federal Reserve System, Washington, DC 20551.

OMB Desk Officer: Gary Waxman (202-395-3740), Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 3208, Washington, DC 20503.

Proposal to approve under OMB delegated authority the extension, without revision, of the following report(s):

1. *Report title:* Consumer Satisfaction Questionnaire
Agency form number: FR 1379
OMB Docket number: 7100-0135
Frequency: On occasion
Reporters: Consumers who have filed complaints against state member banks
Annual reporting hours: 9
Estimated average hours per response: 0.25 (15 minutes)
Number of respondents: 34
Small businesses are affected.

General description of report

This information collection is voluntary to obtain or retain a benefit (15 U.S.C. 57(a)(f)(1)) and is not given confidential treatment.

The Federal Reserve Board sends this questionnaire to consumers whose complaints against state member banks were received by the Board and referred to Federal Reserve Banks for resolution, and to a sample of consumers whose complaints were received directly by the Federal Reserve Banks. Complainants are requested to answer the questions voluntarily about the effectiveness of the Reserve Bank's efforts in handling the consumer complaint.

2. *Report title:* OTC Margin Stock Report
Agency form number: FR 2048
OMB Docket number: 7100-0004
Frequency: Quarterly
Reporters: Certain corporations with over-the-counter stock
Annual reporting hours: 75
Estimated average hours per response: 0.25 (15 minutes)
Number of respondents: 75
Small businesses are not affected.

General description of report

This information collection is voluntary to obtain or retain a benefit (15 U.S.C. 78g, w) and is not given confidential treatment.

This report is used to gather stock information on certain corporations that have stock trading over-the-counter and that are being considered for inclusion on the Federal Reserve Board's List of Marginable OTC Stocks.

3. *Report title:* Report of Brokers Carrying Margin Accounts
Agency form number: FR 2240
OMB Docket number: 7100-0001
Frequency: Annually
Reporters: Brokers and dealers
Annual reporting hours: 267
Estimated average hours per response: 2.7
Number of respondents: 99
Small businesses are affected.

General description of report

This information collection is mandatory (15 U.S.C. 78q(g)) and is given confidential treatment (5 U.S.C. 552(b)(4)).

This report is used to ensure compliance of brokers and dealers with the Federal Reserve Margin Regulations and Security Credit as authorized by section 17 of the Securities and Exchange Act of 1934. This report collects certain balance sheet information from securities brokers and dealers carrying margin accounts and is used by the Federal Reserve to regulate securities credit extended by brokers.

Proposal to approve under OMB delegated authority the extension, with revisions, of the following report:

1. *Report title:* Monthly Survey of Debits to Demand and Savings Deposits Accounts
Agency form number: FR 2573
OMB Docket number: 7100-0081
Frequency: Monthly
Reporters: Commercial banks
Annual reporting hours: 3,000
Estimated average hours per response: 1.0
Number of respondents: 250
Small businesses are affected.

General description of report

This information collection is voluntary (12 U.S.C. 248(a)(2)) to obtain or retain a benefit and is given confidential treatment (5 U.S.C. 552(b)(4)).

This report collects debits (total withdrawals during the month) to three categories of deposits accounts (demand deposits of individuals, partnerships, and corporations and state and political subdivisions; ATS and NOW accounts; and savings deposit accounts including money market deposit accounts) from a sample of commercial banks. The debits data from this report are used in conjunction with deposit balances from other reports for the calculation of universe estimates of bank debits and deposit turnover rates for the major types of deposit accounts that money stock holders can use directly or indirectly for transactions purposes. The turnover rates have been used by the Federal Reserve primarily in analysis of the behavior of the monetary aggregates and in money demand studies. The data are published in the monthly G.6 release, *Debits and Deposit Turnover at Commercial Banks.*

The authorized reporting panel will be reduced from 300 to 250 banks. The ATS and NOW accounts deposit category will be expanded to include telephone and preauthorized transfer accounts. In addition, the title of the report will be changed to "Survey of Debits to Selected Deposit Accounts" to reflect its content more accurately. A trillion-dollar column will be added to the reporting form, and the instructions will reflect changes corresponding to current definitions in Regulation D.

Board of Governors of the Federal Reserve System, November 22, 1993.

William W. Wiles,

Secretary of the Board.

BILLING CODE 6210-01-F

The Bank of New York Company, Inc., et al.; Notice of Application to Engage de novo in Permissible Nonbanking Activities

The company listed in this notice has filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than December 10, 1993.

A. Federal Reserve Bank of New York (William L. Rutledge, Vice President) 33 Liberty Street, New York, New York 10045:

1. The Bank of New York Company, Inc., New York, New York; to make investment in The New York Equity Fund 1993 Limited Partnership, New York, New York, and thereby engage in making equity and debt investments in corporations or projects designed primarily to promote community welfare, such as economic rehabilitation and development of low-income areas by providing housing, services or jobs for residents, pursuant to § 225.25(b)(6) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, November 19, 1993.

BILLING CODE 6210-01-F

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

Clinical Laboratory Improvement Advisory Committee and Subcommittee on Cytology: Meetings

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), the Centers for Disease Control and Prevention (CDC) announces the following Federal advisory committee meetings.

Name: Clinical Laboratory Improvement Advisory Committee (CLIAC).

Times and Dates: 1 p.m.–5 p.m., December 14, 1993; 8:30 a.m.–4:30 p.m., December 15, 1993.

Place: CDC, Auditorium B, Building 2, 1600 Clifton Road, NE, Atlanta, Georgia 30333.

Status: Open to the public limited only by the space available.

Purpose: This committee is charged with providing scientific and technical advice and guidance to the Secretary of Health and Human Services and the Assistant Secretary for Health regarding the need for, and the nature of, revisions to the standards under which clinical laboratories are regulated; the impact of proposed revisions to the standards; and the modification of the standards to accommodate technological advances.

Matters to be Discussed: The agenda will include a summary of the August meeting, a summary of the meeting of the Subcommittee on Cytology, presentation of the revised research strategy, review of implementation data, and presentation of preliminary results from the analysis to currently available data. Agenda items are subject to change as priorities dictate.

Name: Subcommittee on Cytology.

Time and Date: 8 a.m.–11:30 a.m., December 14, 1993.

Place: CDC, Auditorium B, Building 2, 1600 Clifton Road, NE, Atlanta, Georgia 30333.

Status: Open to the public, limited only by the space available.

Purpose: This subcommittee will advise CLIAC on issues related to national standards for quality assurance in cytology.

Matters to be Discussed: The subcommittee will review the deliberation of the Symposium on Cytology Proficiency Testing and discuss the implications on the future directions for cytology proficiency testing. Agenda items are subject to change a priorities dictate.

Contact Person for Additional Information: John C. Ridderhof, Dr.P.H., Division of Laboratory Systems, Public Health Practice Program Office, CDC, 4770 Buford Highway, NE, Mailstop F–11, Atlanta, Georgia 30341–3724, telephone 404/488–7670.

Dated: November 22, 1993.

Elvin Hilyer,

Associate Director for Policy Coordination, Centers for Disease Control and Prevention (CDC).

BILLING CODE 4160–18–M

Food and Drug Administration

[Docket No. 93N–0190]

Padam C. Bansal; Denial of Hearing and Debarment Order

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is issuing an order under section 306(a)(2) of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 335a(a)(2)) permanently debarring Dr. Padam C. Bansal, 9 Powelson Lane, Bridgewater, NJ 08807, from providing services in any capacity to a person that has an approved or pending drug product application. FDA bases this order on a finding that Dr. Bansal was convicted of a felony under Federal law for conduct relating to the development or approval, including the process for development or approval, of a drug product; and relating to the regulation of a drug product under the act. Dr. Bansal has failed to file with the agency information and analyses sufficient to create a basis for a hearing concerning this action.

EFFECTIVE DATE: November 29, 1993.

ADDRESSES: Application for termination of debarment to the Dockets Management Branch (HFA–305), Food and Drug Administration, rm. 1–23, 12420 Parklawn Dr., Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Tamar S. Nordenberg, Center for Drug Evaluation and Research (HFD–366), Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855, 301–594–2041.

SUPPLEMENTARY INFORMATION:

I. Background

Dr. Padam C. Bansal, a former Director of Research and Development of Par Pharmaceutical, Inc. (Par), pled guilty and was sentenced on March 19, 1993, for one count of obstruction of justice, a Federal felony offense under 18 U.S.C. 1503. The basis for this conviction was the finding that Dr. Bansal knowingly gave false and misleading testimony to a grand jury concerning his knowledge of, and participation in, the submission to FDA of a false pilot batch record in support of approval of an abbreviated new drug application (ANDA) for a Par drug product.

In a certified letter received by Dr. Bansal on June 23, 1993, FDA offered Dr. Bansal an opportunity for a hearing on the agency's proposal to issue an order, under section 306(a) of the act, debarring him from providing services in any capacity to a person that has an approved or pending drug product application. FDA based the proposal to debar on its finding that Dr. Bansal was convicted of a felony under Federal law for conduct relating to: (1) The development or approval, including the process for development or approval, of a Par drug product; and (2) the regulation of a Par drug product.

The certified letter informed Dr. Bansal that his request for a hearing could not rest upon mere allegations or denials but must present specific facts showing that there is a genuine and substantial issue of fact requiring a hearing. The letter also notified Dr. Bansal that if it conclusively appeared from the face of the information and factual analyses in his request for a hearing that there was no genuine and substantial issue of fact that precluded the order of debarment, FDA would enter summary judgment against him and deny his request for a hearing.

In a letter dated July 15, 1993, Dr. Bansal requested a hearing, and in a letter dated August 11, 1993, Dr. Bansal submitted arguments and information in support of his hearing request. Dr. Bansal argues that his conviction for obstruction of justice under 18 U.S.C. 1503 may subject him to permissive debarment under section 306(b) of the act, but that this conduct is not covered by the section 306(a) mandatory debarment provisions. The Deputy Commissioner for Operations has considered Dr. Bansal's argument and concludes that it is unpersuasive and fails to raise a genuine and substantial issue of fact requiring a hearing.

II. Dr. Bansal's Argument in Support of a Hearing

Dr. Bansal asserts that he did not participate in the submission to FDA of a false pilot batch record and that he is thus not subject to mandatory debarment based on his conviction for obstruction of justice. While the offenses of false statement and obstruction of an investigation into a criminal offense are listed under a permissive debarment provision, section 306(b)(2)(B)(ii) of the act, this provision applies only when the felony for which the individual is convicted is not described in section 306(a)(2) of the act. As detailed below, Dr. Bansal's conduct is of the kind described in section 306(a)(2) of the act and thus subjects him to mandatory—not permissive—debarment.

Dr. Bansal pled guilty to obstruction of justice for intentionally giving false and misleading testimony to the Special Grand Jury for the United States District Court for the District of Maryland regarding his knowledge of, and participation in, the submission of a false pilot batch record for a Par product in support of an ANDA. Dr. Bansal had been privy to the fact that Par had falsified the pilot batch record and related paperwork to make it appear that the formulation that passed a bioequivalence study had included sodium bicarbonate, when in fact, Par had added this ingredient to the product when, subsequent to passing the bioequivalence study, the product failed accelerated stability testing.

In his plea agreement, Dr. Bansal stipulated to the following facts:

> * * * During his testimony before [the] grand jury in Baltimore, Maryland on May 22, 1990, Dr. Bansal claimed that he could not remember details about Par products that he had mentioned in his earlier interview [with FDA investigators], or claimed that he had heard about wrongdoing at Par second-hand and after the fact. Specifically, Dr. Bansal claimed that he did not remember any conversations with certain persons at Par about the creation of the false pilot batch record for triamterene/hydrochlorothiazide at the time the false batch record was submitted.

In fact, certain persons at Par had informed Dr. Bansal that the triamterene/hydrochlorothiazide pilot batch record was false at the time it was made, and had enlisted his assistance in transmitting false paperwork for submission to the FDA related to that product. During his grand jury testimony, Dr. Bansal intentionally held back that information and other information that he remembered about other Par products.

An individual is subject to mandatory debarment, under section 306(a)(2)(A) of the act, if the individual is convicted of a Federal felony for conduct relating to the development or approval, including the process for development or approval, of any drug product. The statutory language "relating to * * *," by definition, encompasses all things that are logically connected with the development or approval of a drug (see Webster's Collegiate Dictionary, Merriam-Webster Inc., Springfield, MA, 1990, "relate").

Dr. Bansal's act of falsely testifying before the grand jury about his knowledge of misrepresentations in Par

records is unquestionably connected with the development or approval of a Par drug product. The falsified documents in question were for submission to FDA in support of approval of an ANDA for a Par drug product. FDA determined whether Par's generic drug products were approvable for marketing based, to a great extent, on the results of bioequivalence and stability tests as reflected in these ANDA's.

In addition, an individual is subject to mandatory debarment under section 306(a)(2)(B) of the act if the individual is convicted of a Federal felony for conduct relating to the regulation of any drug product under the act. Dr. Bansal's Federal felony conviction for withholding information from the grand jury was related to the regulation of a Par drug product because the falsified documents in question concerned the formulation, bioequivalence, and stability of a drug product—information that is vital to FDA's regulatory decisions about drug products.

Dr. Bansal urges FDA to weigh, in its decision whether to debar him, a letter from an Assistant U.S. Attorney for the District of Maryland advising FDA of Dr. Bansal's cooperation in obtaining convictions of three other defendants. Because Dr. Bansal's offense is of the kind described in section 306(a)(2) of the act (mandatory debarment provisions), FDA has no discretion regarding whether to debar him. The letter is relevant only to the issue of termination of debarment under the special termination provision, section 306(d)(4) of the act. FDA will consider Dr. Bansal's assistance in the investigation or prosecution of others upon his application for termination of debarment.

III. Findings and Order

Therefore, the Deputy Commissioner for Operations, under section 306(a) of the act, and under authority delegated to her (21 CFR 5.20), finds that Dr. Padam C. Bansal has been convicted of a felony under Federal law for conduct relating to: (1) The development and approval, including the process for development and approval, of a drug product (21 U.S.C. 335a(a)(2)(A)); and (2) the regulation of a drug product (21 U.S.C. 335a(a)(2)(B)).

As a result of the foregoing findings, Dr. Padam C. Bansal is permanently debarred from providing services in any capacity to a person with an approved or pending drug product application under section 505, 507, 512, or 802 of the act (21 U.S.C. 355, 357, 360b, or 382), or under section 351 of the Public Health Service Act (42 U.S.C. 262), effective November 29, 1993, (21 U.S.C. 335a(c)(1)(B) and (c)(2)(A)(ii) and 21 U.S.C. 321(ee)). Any person with an approved or pending drug product application who knowingly uses the services of Dr. Bansal in any capacity, during his period of debarment, will be subject to civil money penalties. If Dr. Bansal, during his period of debarment, provides services in any capacity to a person with an approved or pending drug product application, he will be subject to civil money penalties. In addition, FDA will not accept or review any abbreviated human drug application submitted by or with the assistance of Dr. Bansal during his period of debarment.

Any application by Dr. Bansal for termination of debarment under section 306(d)(4) of the act should be identified with Docket No. 93N–0190 and sent to the Dockets Management Branch (address above). All such submissions are to be filed in four copies. The public availability of information in these submissions is governed by 21 CFR 10.20(j). Publicly available submissions may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 14, 1993.

Jane. E. Henney,

Deputy Commissioner for Operations.

BILLING CODE 4160–01–F

[Docket No. 93N–0264]

Mary Donnelly; Debarment Order

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is issuing an order under section 306(a)(2) of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 335a(a)(2)) permanently debarring Ms. Mary Donnelly, 613 Green, Bay City, MI 48708, from providing services in any capacity to a person that has an approved or pending drug product application. FDA bases this order on a finding that Ms. Donnelly was convicted of a felony under Federal law for conduct relating to the regulation of a drug product under the act. Ms. Donnelly has failed to request a hearing and, therefore, has waived her opportunity for a hearing concerning this action.

EFFECTIVE DATE: November 29, 1993.

ADDRESSES: Application for termination of debarment to the Dockets Management Branch (HFA–305), Food and Drug Administration, 12420 Parklawn Dr., rm. 1–23, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Tamar S. Nordenberg, Center for Drug Evaluation and Research (HFD–366), Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855, 301–594–2041.

SUPPLEMENTARY INFORMATION:

I. Background

On April 16, 1992, the United States District Court for the Eastern District of Michigan, Northern Division, entered judgment against Ms. Mary Donnelly for the Federal felony offense of knowingly selling and offering to sell drug samples as defined in, and in violation of, 21 U.S.C. 353(c)(1), 331(t), and 333(b)(1).

As a result of this conviction, FDA served Ms. Donnelly by certified mail on August 13, 1993, a notice proposing to permanently debar her from providing services in any capacity to a person that has an approved or pending drug product application and offered her an opportunity for a hearing on the proposal. The proposal was based on a finding, under section 306(a)(2)(B) of the act, that she was convicted of a felony under Federal law for conduct relating to the regulation of a drug product. Ms. Donnelly did not request a hearing. Her failure to request a hearing constitutes a waiver of her opportunity for a hearing and a waiver of any contentions concerning her debarment.

II. Findings and Order

Therefore, the Deputy Commissioner for Operations, under section 306(a) of the act, and under authority delegated to her (21 CFR 5.20), finds that Ms. Mary Donnelly has been convicted of a felony under Federal law for conduct relating to the regulation of a drug product (21 U.S.C. 335a(a)(2)(B)). As a result of the foregoing findings, Ms. Mary Donnelly is permanently debarred from providing services in any capacity to a person with an approved or pending drug product application under section 505, 507, 512, or 802 of the act (21 U.S.C. 355, 357, 360b, or 382), or under section 351 of the Public Health Service Act (42 U.S.C. 262), effective November 29, 1993, (21 U.S.C. 335a(c)(1)(B) and (c)(2)(A)(ii) and 21 U.S.C. 321(ee)).

Any person with an approved or pending drug product application who knowingly uses the services of Ms. Donnelly, in any capacity, during her period of debarment, will be subject to civil money penalties. If Ms. Donnelly, during her period of debarment, provides services in any capacity to a person with an approved or pending drug product application, she will be

subject to civil money penalties. In addition, FDA will not accept or review any abbreviated new drug applications submitted by, or with the assistance of, Ms. Donnelly during her period of debarment. Any application by Ms. Donnelly for termination of debarment under section 306(d)(4) of the act should be identified with Docket No. 93N-0264 and sent to the Dockets Management Branch (address above). All such submissions are to be filed in four copies. The public availability of information in these submissions is governed by 21 CFR 10.20(j). Publicly available submissions may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 14, 1993.

Jane E. Henney,

Deputy Commissioner for Operations.

BILLING CODE 4160-01-F

[Docket No. 93N-0253]

Mark B. Perkal; Debarment Order

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is issuing an order under section 306(a)(2) of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 335a(a)(2)) permanently debarring Mark B. Perkal, 3800 Labyrinth Rd., Baltimore, MD 21215, from providing services in any capacity to a person that has an approved or pending drug product application. FDA bases this order on a finding that Dr. Perkal was convicted of a felony under Federal law for conduct relating to the development and approval, including the process for development and approval, of a drug product; and relating to the regulation of a drug product under the act. Dr. Perkal has failed to request a hearing and, therefore, has waived his opportunity for a hearing concerning this action.

EFFECTIVE DATE: November 29, 1993.

ADDRESSES: Application for termination of debarment to the Dockets Management Branch (HFA-305), Food and Drug Administration, 12420 Parklawn Dr., rm. 1-23, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Diane M. Sullivan, Center for Drug Evaluation and Research (HFD-366), Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855, 301-594-2041.

SUPPLEMENTARY INFORMATION:

I. Background

On July 22, 1992, the United States District Court for the District of Maryland entered judgment against Mark B. Perkal for one count of obstruction of an agency proceeding, a Federal felony offense under 18 U.S.C. 1505.

As a result of this conviction, FDA served Dr. Perkal by certified mail on August 9, 1993, a notice proposing to permanently debar him from providing services in any capacity to a person that has an approved or pending drug product application and offered him an opportunity for a hearing on the proposal. The proposal was based on a finding, under section 306(a)(2)(A) and (a)(2)(B) of the act, that he was convicted of a felony under Federal law for conduct: (1) Relating to the development and approval, including the process for development and approval, of a drug product; and (2) relating to the regulation of a drug product under the act. Dr. Perkal did not request a hearing. His failure to request a hearing constitutes a waiver of his opportunity for a hearing and a waiver of any contentions concerning his debarment.

II. Findings and Order

Therefore, the Deputy Commissioner for Operations, under section 306(a) of the act, and under authority delegated to her (21 CFR 5.20), finds that Dr. Perkal has been convicted of a felony under Federal law for conduct: (1) Relating to the development and approval, including the process for development and approval, of a drug product (21 U.S.C. 335a(a)(2)(A)); and (2) relating to the regulation of a drug product (21 U.S.C. 335a(a)(2)(B)).

As a result of the foregoing findings, Dr. Perkal is permanently debarred from providing services in any capacity to a person with an approved or pending drug product application under section 505, 507, 512, or 802 of the act (21 U.S.C. 355, 357, 360b, or 382), or under section 351 of the Public Health Service Act (42 U.S.C. 262), effective November 29, 1993, (21 U.S.C. 335a(c)(1)(B) and (c)(2)(A)(ii) and 21 U.S.C. 321(ee)).

Any person with an approved or pending drug product application who knowingly uses the services of Dr. Perkal in any capacity, during his period of debarment, will be subject to civil money penalties. If Dr. Perkal, during his period of debarment, provides services in any capacity to a person with an approved or pending drug product application, he will be subject to civil money penalties. In addition, FDA will not accept or review any abbreviated new drug application or abbreviated antibiotic drug application submitted by or with the assistance of Dr. Perkal during his period of debarment.

Any application by Dr. Perkal for termination of debarment under section 306(d)(4) of the act should be identified with Docket No. 93N-0253 and sent to the Dockets Management Branch (address above). All such submissions are to be filed in four copies. The public availability of information in these submissions is governed by 21 CFR 10.20(j). Publicly available submissions may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 14, 1993.

Jane E. Henney,

Deputy Commissioner for Operations.

BILLING CODE 4160-01-F

[Docket No. 93N-0444]

Clay-Park Labs, Inc.; Withdrawal of Approval of Two Abbreviated New Drug Applications

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is withdrawing approval of two abbreviated new drug applications (ANDA's) held by Clay-Park Labs, Inc., 1700 Bathgate Ave., Bathgate Industrial Park, Bronx, NY 10457 (Clay-Park). FDA is withdrawing approval of these applications because of questions raised about the reliability of the data and information submitted to FDA in support of the applications. Clay-Park has waived its opportunity for hearing.

EFFECTIVE DATE: November 29, 1993.

FOR FURTHER INFORMATION CONTACT: David T. Read, Center for Drug Evaluation and Research (HFD-366), Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855, 301-594-2041.

SUPPLEMENTARY INFORMATION: Recently, FDA became aware of discrepancies concerning the data used to support approval of the following ANDA's held by Clay-Park:

1. ANDA 72-526, Betamethasone Diproprionate Ointment, 0.05 percent; and

2. ANDA 72-536, Betamethasone Diproprionate Cream, 0.05 percent.

The discrepancies in the data submitted to obtain approval of the

applications listed above raise questions about the reliability of the data. In a letter dated October 2, 1992, Clay-Park requested withdrawal of these ANDA's.

Therefore, under section 505(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(e)) and under authority delegated to the Director, Center for Drug Evaluation and Research (21 CFR 5.82), approval of the applications listed above, and all their amendments and supplements, is hereby withdrawn, effective November 29, 1993. Distribution in interstate commerce of the drug products covered by these applications is unlawful.

Dated: November 4, 1993.

Roger L. Williams,

Acting Director, Center for Drug Evaluation and Research.

BILLING CODE 4160–01–F

[Docket No. 93D–0440]

Public Workshop on Issues Involved With Premarket Testing and Labeling for Hemodialyzers for Reuse; Availability of Draft Guidance; Request for Comments

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is sponsoring a public workshop on FDA requirements to be applied to the hemodialysis manufacturing community. This workshop will assist the industry in complying with regulations on adequate dialyzer labeling. FDA is also making available the "Draft Guidance Document for Premarket Approval Applications for Hemodialyzers for Reuse." Oral and written comments are sought for incorporation into the final document.

DATES: The public workshop will be held on December 10, 1993, 8:30 a.m. to 5 p.m. Anyone wishing to make a formal presentation for inclusion in the workshop should submit a request accompanied with an outline of the comments by December 1, 1993.

ADDRESSES: The public workshop will be held in the Regency Room, Holiday Inn Crowne Plaza, 1750 Rockville Pike, Rockville, MD. There is no registration fee but space is limited. Interested persons should preregister with Carolyn Crenshaw or Gwendolyn Brighthaupt at Sociometrics, Inc., suite 550, 8300 Colesville Rd., Silver Spring, MD 20910, 800–729–0890, FAX 301–608–3542. Single copies of the "Draft Guidance Document for Premarket Approval Applications for Hemodialyzers for Reuse" are available through the Division of Small Manufacturers Assistance (HFC–220), 1901 Chapman Ave., Rockville, MD 20857, and may be requested by phone at 800–638–2041, FAX 301–443–8818, or through the Center for Devices and Radiological Health electronic docket 301–594–4802. Send two self-addressed adhesive labels to assist that office in processing your requests. Submit written comments and requests to make a formal presentation on the guideline to the Division of Reproductive, Abdominal, Ear, Nose, and Throat and Radiological Devices (HFZ–470), Food and Drug Administration, 1390 Piccard Dr., Rockville, MD 20850, FAX 301–594–2353. Comments and requests should be identified with the docket number found in brackets in the heading of this document. A copy of the guideline is available for public examination in the Dockets Management Branch (HFA–305), Food and Drug Administration, rm. 1–23, 12420 Parklawn Dr., Rockville, MD, between 9 a.m. and 4 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Suzanne D. Parisian or Barbara I. McCool, Center for Devices and Radiological Health (HFZ–470), Food and Drug Administration, 1390 Piccard Dr., Rockville, MD 20850, 301–594–1220.

SUPPLEMENTARY INFORMATION: The draft guidance document is created to address the labeling of hemodialyzers. It has been motivated by the current accapted clinical practice of reprocessing and reusing hemodialyzers for a single patient. Clinical studies indicate that over 75 percent of hemodialysis facilities in the United States today practice some form of hemodialysis reprocessing and reuse. Hemodialyzer labeling must now be more reflective of current medical practice and must provide the health care professional with guidance in the hemodialyzer labeling to allow for safe and effective hemodialyzer reprocessing and reuse. This workshop is designed to assist the hemodialysis manufacturing community.

The entire document packet made available by the Center for Devices and Radiological Health consists of three components: (1) The "Draft Guidance Document for the Preparation of Premarket Approval Applications for Hemodialyzers for Reuse"; (2) "Appendix I—Rationale for the Draft Guidance Document for the Preparation of Premarket Approval Applications for Hemodializers for Reuse"; and (3) an informational note about the public workshop. It is recommend that copies of all three items be obtained; however, only the guidance document itself will be discussed at the December 10, 1993, public workshop. Written comments will be accepted on both components of the guidance document (address above).

Dated: November 19, 1993.

Michael R. Taylor,

Deputy Commissioner for Policy.

BILLING CODE 4160–01–F

National Institutes of Health

Prospective Grant of Exclusive License: Method for Detecting Aqueous Flare and CMV Retinitis in HIV Patients

AGENCY: National Institutes of Health, Public Health Service, HHS.

ACTION: Notice.

SUMMARY: This is notice in accordance with 35 U.S.C. 209(c)(1) and 37 CFR 404.7(a)(1)(i) that the National Institutes of Health (NIH), Department of Health and Human Services, is contemplating the grant of an exclusive license which includes worldwide rights to practice the invention embodied in U.S. Patent Application Number: 07/686,827, entitled, "Method for Detecting Aqueous Flare and CMV Retinitis In HIV Patients". The prospective licensee is: Kowa Company, Ltd., of Chuo-Ku, Tokyo 103, Japan. The patent rights in these inventions have been assigned to the United States of America.

The prospective exclusive license will be royalty-bearing and will comply with the terms and conditions of 35 U.S.C. 209 and 37 CFR 404.7. The prospective exclusive license may be granted unless, within 60 days from the date of this published Notice, NIH receives written evidence and argument that establishes that the grant of the license would not be consistent with the requirements of 35 U.S.C. 209 and 37 CFR 404.7.

The field of use for the subject technology is a proposed new use for Kowa's Laser Flare/Cell Meter instruments. Its major use is as a method for diagnosing retinitis caused by cytomegalovirus (CMV) in HIV-infected patients by detecting an increased flare measurement in the anterior chamber of the eye.

ADDRESSES: Requests for a copy of these patent applications, inquiries, comments and other materials relating to the contemplated license should be directed to: Mr. J.E. Fahner-Vihtelic, Office of Technology Transfer, National Institutes of Health, Box OTT, Bethesda, MD 20892. Telephone: (301) 496–7735; Facsimile: (301) 402–0220. Properly

filed competing applications for a license filed in response to this notice will be treated as objections to the contemplated license. Only written comments and/or application for a license which are received by the NIH Office of Technology Transfer within sixty (60) days of this notice will be considered.

Dated: November 16, 1993.

Donald P. Christoferson,

Acting Director, Office of Technology Transfer.

BILLING CODE 4140–01–M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Fair Housing and Equal Opportunity

[Docket No. N–93–3542; FR–3348–N–05]

State and Local Fair Housing Laws: Notice of Final Determination Concerning Certification of Substantially Equivalent Agency—State of North Carolina

AGENCY: Office of the Assistant Secretary for Fair Housing and Equal Opportunity, HUD.

ACTION: Notice.

SUMMARY: This notice is a follow-up to the notice published in the Federal Register on December 18, 1992 (57 FR 60220), which announced that the Assistant Secretary for Fair Housing and Equal Opportunity had determined that the fair housing law of the State of North Carolina is substantially equivalent, on its face, to the Fair Housing Act, and solicited public comment on this determination. Today's notice announces that the agency administering the fair housing law for the State of North Carolina has been certified under 24 CFR part 115 of HUD's regulations, which set forth the procedures and requirements for certification of substantially equivalent agencies.

EFFECTIVE DATE: November 9, 1993.

FOR FURTHER INFORMATION CONTACT: Marcella O. Brown, Director, Funded Programs Division, Office of Fair Housing and Equal Opportunity, Department of Housing and Urban Development, 451 Seventh Street, SW., room 5234, Washington, DC 20410, telephone (202) 708–0455 (voice/TDD). (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION:

Background

Under the Fair Housing Act (42 U.S.C. 3600–3619), the Department is authorized to investigate complaints alleging discrimination in housing. Section 810(f) of the Fair Housing Act requires the Department to refer complaints to State and local agencies that have "substantially equivalent" fair housing laws, as determined and certified by the Department. The certification standards are codified in 24 CFR part 115.

On December 18, 1992 (57 FR 60220), the Department published a notice announcing that the fair housing law of the State of North Carolina had been determined by the Assistant Secretary for Fair Housing and Equal Opportunity to be, on its face, substantially equivalent to the Fair Housing Act. The notice advised that the fair housing law of the State of North Carolina provided, on its face, substantive rights and remedies for alleged discriminatory housing practices that are substantially equivalent to those provided in the Fair Housing Act.

The December 18, 1992 notice also announced that following a review of performance standards and other materials, the Assistant Secretary for Fair Housing and Equal Opportunity expected to determine that the law in operation provides rights and remedies that are substantially equivalent to those available under the Fair Housing Act, and that the Department intended to execute a written agreement with the agency charged with enforcement of the fair housing law of the State of North Carolina in accordance with 24 CFR 115.6(c).

The December 18, 1992 notice invited the public to comment, within 30 days from the date of publication of the notice, on the Assistant Secretary's determination that the fair housing law of the State of North Carolina is, on its face, substantially equivalent to the Fair Housing Act.

The December 18, 1992 notice also invited the public to comment on the proposed determination that the fair housing law of the State of North Carolina, in operation, provides rights and remedies substantially equivalent to those available under the Fair Housing Act. The comment period expired on January 19, 1993.

This Notice

One comment was received on the December 18, 1992 notice from the California Alliance for the Mentally Ill (CAMI). The CAMI commented that the definition of "unlawful discriminatory housing practices" in the fair housing law of the State of North Carolina did not include zoning laws and other land use laws. The CAMI was concerned that unless these types of laws were included in the definition of "unlawful discriminatory housing practices," zoning ordinances and other land use laws could be used to restrict the development or the use of existing housing as congregate housing or group housing—the type of housing frequently required by individuals with disabilities. The comment was referred to the North Carolina Human Relations Commission (Commission), the agency of the State of North Carolina which enforces the State's fair housing law, with a request for a response.

In a letter to the Department dated February 17, 1993, the Commission stated that it believes that the North Carolina State Fair Housing Act (SFHA) prohibits zoning or land use laws or actions that discriminate against group homes for people with disabilities. The Commission also advised that it has accepted and will continue to accept complaints from organizations seeking group housing for individuals with disabilities who claim that zoning regulations or actions prevent or interfere with their efforts in a discriminatory manner. Additionally, the Commission advised that as for State level enforcement action in zoning validity cases, the Commission is authorized to bring legal enforcement actions under the SFHA in State courts or administrative hearings. The Department found this response to be satisfactory. (Both the comment of the

CAMI and the response from the Commission are available for inspection during regular business hours in the Office of Regulations, room 10276, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410–0500.)

The Assistant Secretary for Fair Housing and Equal Opportunity has completed the review of performance standards and other materials, as provided in 24 CFR part 115, and has determined that the fair housing law of the State of North Carolina, in operation, provides rights and remedies that are substantially equivalent to those available under the Fair Housing Act.

On November, 9, 1993, the Department entered into a memorandum of understanding with the agency charged with enforcement of the fair housing law of the State of North Carolina. The purpose of this notice is to announce that this agency has received certification as a substantially equivalent agency under 24 CFR part 115.

Dated: July 15, 1993.

Leonora L. Guarraia,

General Deputy Assistant Secretary for Fair Housing and Equal Opportunity.

[FR Doc. 93–29063 Filed 11–26–93; 8:45 am]

BILLING CODE 4210–28–P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[MT–930–4320–01]

Notice of Availability of Environmental Assessment, Decision Record, and Finding of No Significant Impact for Predator Management in Montana and Notice of Intent To Amend the Dillon Management Framework Plan (MFP); Butte District Office; Montana

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice, Notice of Intent to amend Dillon MFP.

SUMMARY: An Environmental Assessment (EA), a Decision Record (DR) and Finding of No Significant Impact (FONSI) have been completed for predator management in the Butte District. The EA was available for a 30-day public comment period. Comments and responses have been incorporated in a revised EA.

FOR FURTHER INFORMATION CONTACT: Sandy Brooks, Project Lead, Montana State Office, P.O. Box 36800, Billings, Montana 59107; or contact by phone at (406) 255–2929.

SUPPLEMENTARY INFORMATION: The Environmental Assessment for Predator Management in Montana addresses four alternatives which affect predator management to varying degrees:

Alternative 1—Integrated Pest Management (Animal and Plant Health Inspection Service-Animal Damage Control (APHIS-ADC), Department of Livestock (DOL), and BLM Proposed Action): This alternative emphasizes an Integrated Pest Management (IPM) approach to reduce animal damage. IPM incorporates a variety of practical, lethal, and nonlethal methods for prevention and control to minimize animal damage to livestock or human health. The use of M–44s would be permitted after authorization is obtained. Preventive control would be allowed in areas where historical livestock losses have been documented.

Alternative 2—No M–44s: This alternative would be similar to Alternative 1, except the use of M–44s would not be authorized. All other approved methods for control would be permitted. Preventive control would be allowed in areas where historical livestock losses have been documented.

Alternative 3—No Action (Emergency Control Only): Preventive control measures would not be authorized, and corrective control would be applied only where APHIS-ADC or DOL have confirmed recent loss of livestock to predation. Emergency predator management would be requested by an operator when losses are occurring. The BLM would review and approve or disapprove these requests on a case-by-case basis. The requests would be handled using the emergency control procedures.

Alternative 4—No APHIS-ADC or DOL Predator Management on BLM Lands: Under this alternative, no APHIS-ADC or DOL predator management would be authorized on BLM land in Montana.

The Predator Management EA for Montana was available for public comment from September 15 to October 15, 1993. Twenty-seven letters were received and considered. Numerous changes to the EA were made as a result of some of the comments. The revised EA, FONSI, and DR are available upon request.

Based upon careful consideration of the analysis of alternatives documented within the Predator Management EA, including consideration of applicable laws, regulations, and public and agency comments, the decision is to implement Alternative 1—Integrated Pest Management (APHIS-ADC, DOL and BLM Proposed Action). Management actions will be directed towards localized populations and/or individual offending predators. Requests for control will come directly to APHIS-ADC from permittees. In response to public concern regarding the use of lethal methods, the following mitigating measure has been adopted as part of the decision: Livestock operators will be provided information on nonlethal methods. When services are requested by permittees, APHIS-ADC will provide a fact sheet to the operator on nonlethal methods. In addition, information on nonlethal methods will also be mailed out in the annual grazing applications. This will ensure that permittees who request control are aware of the variety of nonlethal methods available to them, such as animal husbandry practices, guard dogs, scare devices, etc.

Implementation of Alternative 1 will require strict adherence to reasonable and prudent measures developed by the U.S. Fish and Wildlife Service (USFWS) for the protection of threatened and endangered (T&E) species. The USFWS has concurred with the BLM finding that the proposed predator management strategy is not likely to adversely affect T&E species. Predator management will be prohibited in the Bear Trap Wilderness Area to reduce conflicts with recreation. All areas where human health or safety are a particular concern, as identified on Map No. 1 in the EA, will be closed to predator management. These areas include appropriate buffer zones. Bird hunting areas also have timing restrictions placed on some predator management activities.

It has been concluded that the proposed action will not result in significant environmental impacts, and that no species will be substantially or permanently reduced in numbers as a result of the decision. In addition, the predator population is not substantially impacted. Statewide, 7,847 coyotes were taken by APHIS-ADC and DOL on lands of all ownership, or 1.5 to 13.7 percent of the population statewide. In the Butte District, approximately 31 coyotes were taken on BLM lands, and no red fox were taken on BLM lands in the district. Based on the analysis in the EA, implementation of Alternative 1 will result in the smallest amount of livestock loss. This decision ensures that predator management will be carried out in a systematic manner which responds to resource protection, human health, and livestock protection needs while protecting public safety, domestic animals, and nontarget wildlife. This decision is compatible with resource objectives identified in the following land use plans: Garnet Resource Management Plan (RMP) (May

1986—ROD approved 1/86) and Headwaters RMP (November 1983—ROD approved 7/84). This decision amends the Dillon MFP—September 1979, to allow IPM to be implemented in areas previously limited to aerial gunning. In the Dillon MFP, it was decided that selective aerial predator control be the only means by which predatory animals, other than wolves be removed from the BLM land between the town of Lima and Bloody Dick Creek. The rationale was that the most positive indication of gray wolf occupancy recorded at that time had been documented in the Lemhi Pass area. It further states that the BLM would be negligent of the intent of the Endangered Species Act if it allowed steel traps or poisoning for predators to take place in the area of concern. Since then, however, the USFWS has provided APHIS-ADC with their biological opinion which states that the use of snares, steel traps, and aerial shooting is not likely to jeopardize the continued existence of the gray wolf. Use of M–44s is prohibited in occupied gray wolf range. The occupied gray wolf range has been better defined since the Dillon MFP decision. The reasonable and prudent measures provided by the USFWS will be followed. Therefore, the Dillon MFP will be amended by the final decision made on this EA. This **Federal Register** Notice, also announces the Notice of Intent to amend the Dillon MFP to allow for these changes. To protect the amendment of the Dillon MFP, please follow the protest procedures. To appeal the decision of the Predator Management EA, follow the appeal procedures. To obtain a copy of the protest or appeal procedures, please contact: Sandy Brooks, Project Lead, Montana State Office, (406) 255–2929.

Dated: November 22, 1993.

Robert H. Lawton,

State Director.

BILLING CODE 4310–DN–M

[MT–930–4320–01]

Notice of Availability of Environmental Assessment, Decision Record and Finding of No Significant Impact for Predator Management in Montana; Lewistown District Office; Montana

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: An Environmental Assessment (EA), a Decision Record (DR) and Finding of No Significant Impact (FONSI) have been completed for predator management in the Lewistown District. The EA was available for a 30-day public comment period. Comments and responses have been incorporated in a revised EA.

FOR FURTHER INFORMATION CONTACT: Sandy Brooks, Project Lead, Montana State Office, P.O. Box 36800, Billings, Montana 59107, or contact by phone at (406) 255–2929.

SUPPLEMENTARY INFORMATION: The Environmental Assessment for Predator Management in Montana addresses four alternatives which affect predator management to varying degrees:

Alternative 1—Integrated Pest Management (Animal and Plant Health Inspection Service—Animal Damage Control (APHIS–ADC), Department of Livestock (DOL), and BLM Proposed Action): This alternative emphasizes an Integrated Pest Management (IPM) approach to reduce animal damage. IPM incorporates a variety of practical, lethal and nonlethal methods for prevention and control to minimize animal damage to livestock or human health. The use of M–44s would be permitted after authorization is obtained. Preventative control would be allowed in areas where historical livestock losses have been documented.

Alternative 2—No. M–44s: This alternative would be similar to Alternative 1, except the use of M–44s would not be authorized. All other approved methods for control would be permitted. Preventive control would be allowed in areas where historical livestock losses had been documented.

Alternative 3—No action (Emergency Control Only): Preventive control measures would not be authorized, and corrective control would be applied only where APHIS–ADC or DOL have confirmed recent loss of livestock to predation. Emergency predator management would be requested by an operator when losses are occurring. The BLM would review and approve or disapprove these requests on a case-by-case basis. The requests would be handled using the emergency control procedures.

Alternative 4—No APHIS–ADC or DOL Predator Management on BLM Lands: Under this alternative, no APHIS–ADC or DOL predator management would be authorized on BLM land in Montana.

The Predator Management EA for Montana was available for public comment from September 15 to October 15, 1993. Twenty-seven letters were received and considered. Numerous changes to the EA were made as a result of some of the comments. The revised EA, DR, and FONSI are available upon request.

Based upon careful consideration of the analysis of alternatives documented within the Predator Management EA, including consideration of applicable laws, regulations, and public and agency comments, the decision is to implement Alternative 1—Integrated Pest Management (APHIS–ADC, DOL, and BLM Proposed Action). Management actions will be directed towards localized populations and/or individual offending predators. Requests for control will come directly to APHIS–ADC from permittees. In response to public concern regarding the use of lethal methods, the following mitigating measure has been adopted as part of the decision: Livestock operators will be provided information on nonlethal methods. When services are requested by permittees, APHIS–ADC will provide a fact sheet to the operator on nonlethal methods. In addition, information on nonlethal methods will also be mailed out in the annual grazing applications. This will ensure that permittees are aware of the variety of nonlethal methods available to them, such as animal husbandry practices, guard dogs, scare devices, etc.

Implementation of Alternative 1 will require strict adherence to reasonable and prudent measures developed by the U.S. Fish and Wildlife Service (USFWS) for the protection of threatened and endangered (T&E) species. The USFWS has concurred with the BLM finding that the proposed predator management strategy is not likely to adversely affect T&E species. Restrictions will be placed on predator management activities within four Outstanding Natural Areas (ONAs) located west of Chouteau because of the presence of T&E species. The four ONAs are: Ear Mountain, Deep Creek, Blindhorse Creek, and Chute Mountain. In these areas, APHIS–ADC is not authorized to use toxicants (M–44s) and has special timing restrictions on checking the traps. The other special areas in the Lewistown District closed to predator management, except under Emergency Control are: Azure Cave, 140 acres in size; and Square Butte ONA, 1,947 acres in size. These areas are closed to predator management because of the high recreational values. All areas identified on the maps provided in the EA, where human health or safety are a particular concern, will be closed to predator management. These areas include appropriate buffer zones. Bird hunting areas also have timing restrictions placed on some predator management activities.

It has been concluded that the proposed action will not result in

significant environmental impacts, and that no species will be substantially or permanently reduced in numbers as a result of the decision. In addition, the predator population is not substantially impacted. Statewide, 7,847 coyotes were taken by APHIDS–ADC and DOL on lands of all ownership, or 1.5 to 13.7 percent of the population statewide. In the Lewistown District, approximately 160 coyotes were taken on BLM lands. Based on the analysis in the EA, the implementation of Alternative 1 will result in the smallest amount of livestock loss. This decision ensures that predator management will be carried out in a systematic manner which responds to resource protection, human health, and livestock protection needs while protecting public safety, domestic animals, and nontarget wildlife. This decision is compatible with resource objectives identified in the following land use plans: Judith/Valley/Phillips Resource Management Plan (RMP) (October 1992—ROD target date is early 1994); Belt Management Framework Plant (MFP) 1977; Fergus MFP, 1978; Petroleum MFP, 1977; Little Rockies MFP, 1977; Phillips MFP, 1977; UL Bend-Zortman MFP, 1977; Valley and Willow Creek MFP, 1977; West Hi-Line RMP (July 1988, ROD approved 9/88) and Headwaters RMP (November 1983, ROD approved 7/84). To appeal this decision of the Predator Management EA, the appeal procedures need to be followed. To obtain a copy of the appeal procedures, please contact: Sandy Brooks, Project Lead, Montana State Office, (406) 255–2929.

Dated: November 22, 1993.

Robert H. Lawton,

State Director.

BILLING CODE 4310–DN–M

[MT–930–4320–01]

Notice of Availability of Environmental Assessment, Decision Record and Finding of No Significant Impact for Predator Management in Montana; Miles City District Office; Montana

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: An Environmental Assessment (EA), a Decision Record (DR) and Finding of No Significant Impact (FONSI) have been completed for predator management in the Miles City District. The EA was available for a 30-day public comment period. Comments and responses have been incorporated in a revised EA.

FOR FURTHER INFORMATION CONTACT: Sandy Brooks, Project Lead, Montana State Office, P.O. Box 36800, Billings, Montana 59107, or contact by phone at (406) 255–2929.

SUPPLEMENTARY INFORMATION: The Environmental Assessment for Predator Managements in Montana addresses four alternatives which affect predator management to varying degrees:

Alternative 1—Integrated Pest Management (Animal and Plant Health Inspection Service Animal Damage Control (APHIS–ADC), Department of Livestock (DOL), and BLM Proposed Action): This alternative emphasizes an Integrated Pest Management (IPM) approach to reduce animal damage. IPM incorporates a variety of practical, lethal and nonlethal methods for prevention and control to minimize animal damage to livestock or human health. The use of M–44s would be permitted after authorization is obtained. Preventive control would be allowed in areas where historical livestock losses have been documented.

Alternative 2—No M–44s: This alternative would be similar to Alternative 1, except the use of M–44s would not be authorized. All other approved methods for control would be permitted. Preventive control would be allowed in areas where historical livestock losses have been documented.

Alternative 3—No Action (Emergency Control Only): Preventive control measures would not be authorized, and corrective control would be applied only where APHIS-ADC or DOL have confirmed recent loss of livestock to predation. Emergency predator management would be requested by an operator when losses are occurring. The BLM would review and approve or disapprove these requests on a case-by-case basis. The requests would be handled using the emergency control procedures.

Alternative 4—No APHIS–ADC or DOL Predator Management on BLM Lands: Under this alternative, no APHIS-ADC or DOL predator management would be authorized on BLM land in Montana.

The Predator Management EA for Montana was available for public comment from September 15 to October 15, 1993. Twenty-seven letters were received and considered. Numerous changes to the EA were made as a result of some of the comments. A copy of the revised EA, DR, and FONSI are available upon request.

Based upon careful consideration of the analysis of alternatives within the Predator Management EA, including consideration of applicable laws, regulations, and public and agency comments, the decision is to implement Alternative 1—Integrated Pest Management (APHIS-ADC, DOL and BLM Proposed Action). Management actions will be directed towards localized populations and/or individual offending predators. Requests for control will come directly to APHIS–ADC from permittees, or to the DOL in those counties with a DOL approved MOU. Those counties with an approved MOU with the DOL are: Carter, Powder River, McCone, Dawson, and Richland Counties. In response to public concern regarding the use of lethal methods, the following mitigating measure has been adopted as part of the decision: Livestock operators will be provided information on nonlethal methods. When services are requested by permittees, either APHIS–ADC or DOL will provide a fact sheet to the operator on nonlethal methods. In addition, information on nonlethal methods will also be mailed out in the annual grazing applications. This will ensure that permittees who request control are aware of the variety of nonlethal methods available to them, such as animal husbandry practices, guard dogs, scare devices, etc.

Implementation of Alternative 1 will require strict adherence to reasonable and prudent measures developed by the U.S. Fish and Wildlife Service (USFWS) for the protection of Threatened and Endangered (T&E) species. The USFWS has concurred with the BLM finding that the proposed predator management strategy is not likely to adversely affect T&E species. Predator management will be prohibited in the Powder River Special Recreation Management Area (SRMA), located within the Powder River Depot because of the high recreational values in the area. All areas as identified on the maps provided in the EA, where human health or safety are a particular concern, will be closed to predator management. These areas also have appropriate buffer zones. Bird hunting areas also have timing restrictions placed on some predator management activities.

It has been concluded that the proposed action will not result in significant environmental impacts, and that no species will be substantially or permanently reduced in numbers as a result of the decision. In addition, the predator population is not substantially impacted. Statewide, 7,847 coyotes were taken by APHIDS–ADC and DOL on lands of all ownership, or 1.5 to 13.7 percent of the population statewide. In the Miles City District, approximately 404 coyotes were taken on BLM lands. Based on the analysis, implementation

of Alternative 1 will result in the least amount of livestock loss. This decision ensures that predator management will be carried out in a systematic manner which responds to resource protection, human health, and livestock protection needs while protecting public safety, domestic animals, and nontarget wildlife. This decision is compatible with resource objectives identified in the following land use plans: Big Dry Resource Management Plan (RMP) (Draft 1993), Billings RMP (November 1983) and the Powder River RMP (December 1984). To appeal the decision of the Predator Management EA, the appeal procedures need to be followed. To obtain a copy of the appeal procedures, please contact Sandy Brooks, Project Lead, Montana State Office, (406) 255–2929.

BILLING CODE 4310–DN–M

INTERNATIONAL TRADE COMMISSION

[Investigations Nos. 731–TA–675 and 676 (Preliminary)]

Saccharin From China and Korea; Preliminary Antidumping Investigations

AGENCY: International Trade Commission.

ACTION: Institution and scheduling of preliminary antidumping investigations.

SUMMARY: The Commission hereby gives notice of the institution of preliminary antidumping investigations Nos. 731–TA–675 and 676 (Preliminary) under section 733(a) of the Tariff Act of 1930 (19 U.S.C. 1673b(a)) to determine whether there is a reasonable indication that an industry in the United States is materially injured, or is threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports from China and Korea of saccharin, provided for in subheading 2925.11.00 of the Harmonized Tariff Schedule of the United States, that are alleged to be sold in the United States at less than fair value. The Commission must complete preliminary antidumping investigations in 45 days, or in this case by January 3, 1994.

For further information concerning the conduct of these investigations and rules of general application, consult the Commission's Rules of Practice and Procedure, part 201, subparts A through E (19 CFR part 201), and part 207, subparts A and B (19 CFR part 207).

EFFECTIVE DATE: November 18, 1993.

FOR FURTHER INFORMATION CONTACT: Brian Walters (202–205–3198), Office of Investigations, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000.

SUPPLEMENTARY INFORMATION:

Background

These investigations are being instituted in response to a petition filed on November 18, 1993, by PMC Specialties Group, Rocky River, OH.

Participation in the Investigations and Public Service List

Persons (other than petitioners) wishing to participate in the investigations as parties must file an entry of appearance with the Secretary to the Commission, as provided in sections 201.11 and 207.10 of the Commission's rules, not later than seven (7) days after publication of this notice in the **Federal Register**. The Secretary will prepare a public service list containing the names and addresses of all persons, or their representatives, who are parties to these investigations upon the expiration of the period for filing entries of appearance.

Limited Disclosure of Business Proprietary Information (BPI) Under an Administrative Protective Order (APO) and BPI Service List

Pursuant to § 207.7(a) of the Commission's rules, the Secretary will make BPI gathered in these preliminary investigations available to authorized applicants under the APO issued in the investigations, provided that the application is made not later than seven (7) days after the publication of this notice in the **Federal Register**. A separate service list will be maintained by the Secretary for those parties authorized to receive BPI under the APO.

Conference

The Commission's Director of Operations has scheduled a conference in connection with these investigations for 9:30 a.m. on December 9, 1993, at the U.S. International Trade Commission Building, 500 E Street SW., Washington, DC. Parties wishing to participate in the conference should contact Brian Walters (202–205–3198) not later than December 7, 1993, to arrange for their appearance. Parties in support of the imposition of antidumping duties in these investigations and parties in opposition to the imposition of such duties will each be collectively allocated one hour within which to make an oral presentation at the conference. A nonparty who has testimony that may aid the Commission's deliberations may request permission to present a short statement at the conference.

Written Submissions

As provided in §§ 201.8 and 207.15 of the Commission's rules, any person may submit to the Commission on or before December 14, 1993, a written brief containing information and arguments pertinent to the subject matter of the investigations. Parties may file written testimony in connection with their presentation at the conference no later than three (3) days before the conference. If briefs or written testimony contain BPI, they must conform with the requirements of §§ 201.6, 207.3, and 207.7 of the Commission's rules.

In accordance with §§ 201.16(c) and 207.3 of the rules, each document filed by a party to the investigations must be served on all other parties to the investigations (as identified by either the public or BPI service list), and a certificate of service must be timely filed. The Secretary will not accept a document for filing without a certificate of service.

Authority: These investigations are being conducted under authority of the Tariff Act of 1930, title VII. This notice is published pursuant to § 207.12 of the Commission's rules.

Issued: November 23, 1993.

By order of the Commission.

Donna R. Koehnke,

Secretary.

BILLING CODE 7035–01–M

DEPARTMENT OF LABOR

Office of the Secretary

Commission on the Future of Worker-Management Relations; Notice of Meeting

AGENCY: Office of the Secretary, Labor.

ACTION: Notice of public meeting.

SUMMARY: The Commission on the Future of Worker-Management Relations was established in accordance with the Federal Advisory Committee Act (FACA) Public Law 92–463. Pursuant to section 10 (a) of FACA, this is to announce that the Commission will meet at the time and place shown below:

TIME AND PLACE: The meeting will be held on Wednesday, December 15, 1993 from 10 a.m. to 4:30 p.m. in the Department of Labor Auditorium, 200 Constitution Avenue NW., Washington, DC.

AGENDA: The agenda for the meeting is as follows:

The day will be devoted to presentations on the questions posed in the mission statement of the Commission which are:

1. What (if any) new methods or institutions should be encouraged, or required, to enhance workplace productivity through labor-management cooperation and employee participation?
2. What (if any) changes should be made in the present legal framework and practices of collective bargaining to enhance cooperative behavior, improve productivity, and reduce conflict and delay?
3. What (if anything) should be done to increase the extent to which workplace problems are directly resolved by the parties themselves, rather than through recourse to state and federal courts and government regulatory bodies?

Presentations will be made on these questions in the morning by representatives of organizations of business, including small business. Also in the morning, a representative of the Women's Bureau will report on recent studies on women in the workplace.

In the afternoon, presentations will be made on the same questions by representatives of labor organizations that are in industries with small business.

The sessions will include questions and exchanges of views with the Commission Members with additional discussion by the Commission members at the conclusion of the presentations.

PUBLIC PARTICIPATION: The Commission will be in session from 10 a.m. to 12 noon when it will recess for lunch and will return at 2 p.m. Seating will be available to the public on a first-come, first-served basis. Handicapped individuals wishing to attend should contact the Commission to obtain appropriate accommodations. Individuals or organizations wishing to submit written statements should send 15 copies to Mrs. June M. Robinson, Designated Federal Official, Commission on the Future of Worker-Management Relations, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, DC 20210, telephone (202) 219–9148.

Signed at Washington, DC this 22nd day of November, 1993.

Robert B. Reich,

Secretary of Labor.

BILLING CODE 4510–23–M

Employment and Training Administration

[TA–W–28,598 and TA–W–28,607]

Occidental Chemical Corp., Swift Creek, and Suwannee River, FL; Affirmative Determination Regarding Application for Reconsideration

After being granted a filing extension the company, on October 4, 1993 requested administrative reconsideration of the Department of labor's Notice of Negative Determination Regarding Eligibility to Apply for Worker Adjustment Assistance for workers at the subject firm. The Department's Negative Determination was issued on July 2, 1993 and published in the **Federal Register** on July 27, 1993 (58 FR 40161).

The company states that imports of monammonium phosphate (MAP) in 1992 and 1993 resulted in decreased sales and production of diammonium phosphate (DAP) by the subject firm. The company, on November 8, 1993, submitted for survey a list of DAP customers thought to have purchased imported MAP.

Conclusion

After careful review of the application, I conclude that the claim is of sufficient weight to justify reconsideration of the Department of Labor's prior decision. The application is, therefore, granted.

Signed at Washington, DC, this day of November 18, 1993.

Stephen A. Wandner,

Deputy Director, Office of Legislation & Actuarial Services, Unemployment Insurance Service.

[FR Doc. 93–29118 Filed 11–26–93; 8:45 am]

BILLING CODE 4510–30–M

Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents summaries of determinations regarding eligibility to apply for adjustment assistance issued during the period of November, 1993.

In order for an affirmative determination to be made and a certification of eligibility to apply for adjustment assistance to be issued, each of the group eligibility requirements of section 222 of the Act must be met.

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated,

(2) That sales or production, or both, of the firm or subdivision have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Negative Determinations

In each of the following cases the investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

TA–W–28,989; Quiet Valley Forest Products, Inc., Myrtle Point, OR

TA–W–29,014; Kogap Manufacturing Co., Medford, OR

TA–W–28,944; Imperial Smelting Co., Chicago, IL

TA–W–28,994; El Paso Refinery, L.P., El Paso, TX

TA–W–29,044; Kardex Systems, Inc., Reno, OH

TA–W–29,015; Component Technology, Inc., Erie, PA

TA–W–29,053; Plaza Plastics, South Plainfield, NJ

TA–W–28,919; Andritz Sprout-Bauer Durametal Group, Muncy, PA

In the following cases, the investigation revealed that the criteria for eligibility has not been met for the reasons specified.

TA–W–28,999; Phillips Petroleum Co., Lafayette, LA

Increased imports did not contribute importantly to worker separations at the firm.

TA–W–29,065, TA–W–29,066; Penetrators, Inc., Midland, TX and Houston, TX

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA–W–29,122; Gitano, Edison, NJ

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA–W–29,036; General Felt Industries, Trenton, NJ

Separations at General Felt Industries, Trenton, NJ were attributable to a corporate decision to consolidate operations shifting production from the subject firm to another domestic facility located in Cape Girardeau, MO.

TA–W–29,075; Chess King, Worcester, MA

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA–W–29,113; Sequoyah Fuels Corp., Gore, OK

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA–W–29,010; Reynolds Aluminum Recycling, Salt Lake City, UT

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA–W–29,048; The Dee Howard Co., San Antonio, TX

Increased imports did not contribute importantly to worker separations at the firm.

TA–W–29,141; Lehigh Structural Steel Co., Allentown, PA

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA–W–28,975; Patent Scaffolding Co., Uniontown, PA

U.S. imports of scaffolding declined in 1992 compared to 1991.

TA–W–28,859; Mead Corp., Fine Paper Div., Chillicothe, OH

The investigation revealed that criterion (2) has not been met. Sales or production did not decline during the relevant period for certification.

TA–W–29,080; Andmore Sportswear Corp., Port Jervis, NY

Declines in employment were attributed to a company separation into two separate companies. The separated company transferred to a new location without transferring the subject firm employees.

TA–W–29,058, TA–W–29,059, TA–W–29,060; Briggs & Stratton Corp., Wauwatosa, WI, West Allis, WI, Menomonee Falls, WI

The investigation revealed that criterion (2) has not been met. Sales or production did not decline during the relevant period for certification.

TA–W–28,817; Powell Electrical Manufacturing Co., Houston, TX

U.S. imports of power circuit breakers and transformers rated over 500 kva decreased absolutely in 1992 compared with 1991.

TA–W–28,993; Lennox Industries, Inc., Columbus, OH

U.S. imports of air-conditioning, refrigeration and heating equipment decreased relative to domestic production in 1992 compared in 1991, and in 1993 compared with 1992.

Affirmative Determinations

TA–W–29,051; CT Scanner, Inc., Concord, MA

A certification was issued covering all workers separated on or after September 9, 1992.

TA–W–28,964; After 6, Inc., Philadelphia, PA

A certification was issued covering all workers separated on or after September 9, 1992.

TA–W–29,132; Gerber Childrenswear, Inc., 401, West Main St. Ephrata, PA

A certification was issued covering all workers separated on or after October 6, 1992.

TA–W–29,140; Maner Sportswear, Sugarnotch, PA

A certification was issued covering all workers separated on or after October 7, 1992.

TA–W–29,125; Carole Hochman Designs, Williamsport, PA

A certification was issued covering all workers separated on or after September 30, 1992.

TA–W–29,042; Reynolds Metals Co., Massena, NY

A certification was issued covering all workers separated on or after September 10, 1992.

TA–W–29,040; Sundown Manufacturing Co., Larksville, PA

A certification was issued covering all workers separated on or after September 3, 1992.

TA–W–29,056A; Neles-Jamesbury, Inc., Lakeside Plant, Worcester, MA

A certification was issued covering all workers separated on or after August 24, 1992.

TA–W–29,050; Cedar Contract Cutters, Inc., Lake Stevens, WA

A certification was issued covering all workers separated on or after September 10, 1992.

TA–W–29,121; Sun Sportswear, Johnson City, TN

A certification was issued covering all workers separated on or after September 29, 1992.

I hereby certify that the aforementioned determinations were issued during the month of November, 1993. Copies of these determinations are available for inspection in room C–4318, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, DC 20210 during normal business hours or will be mailed to persons to write to the above address.

Dated: November 18, 1993.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

[FR Doc. 93–29120 Filed 11–26–93; 8:45 am]

BILLING CODE 4510–30–M

Investigations Regarding Certifications of Eligibility To Apply for Worker Adjustment Assistance

Petitions have been filed with the Secretary of Labor under section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Employment and Training Administration, has instituted investigations pursuant to section 221(a) of the Act.

The purpose of each of the investigations is to determine whether the workers are eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or

threatened to begin and the subdivision of the firm involved.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address show below, not later than December 9, 1993.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than December 9, 1993.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Employment and Training Administration, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, D.C. 20210.

Signed at Washington, D.C. this 15th day of November, 1993.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

BILLING CODE 7515–01–M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50–250, 50–251, 50–335 and 50–389]

Florida Power & Light Co.; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an exemption from certain requirements of its regulations to Facility Operating License Nos. DPR–31, DPR–41, DPR–67 and NPF–16 issued to Florida Power and Light Company, (the licensee), for operation of the Turkey Point Nuclear Generating Units 3 and 4, located in Dade County, Florida and St. Lucie Plant Units 1 and 2, located in St. Lucie County, Florida.

Environmental Assessment

Identification of Proposed Action

The proposed action is in accordance with the licensee's application dated October 13, and November 2, 1993 for exemption from certain requirements of 10 CFR 73.55, "Requirements for physical protection of licensed activities in nuclear power plant reactors against radiological sabotage." The exemption would allow implementation of a hand geometry biometric system of site access control such that photograph identification badges can be taken offsite.

The Need for the Proposed Action

Pursuant to 10 CFR 73.55, paragraph (a), the licensee shall establish and maintain an onsite physical protection system and security organization.

10 CFR 73.55(d), "Access Requirements," paragraph (1), specifies that "licensee shall control all points of personnel and vehicle access into a protected area." 10 CFR 73.55(d)(5) specifies that "A numbered picture badge identification system shall be used for all individuals who are

authorized access to protected areas without escort." 10 CFR 73.55(d)(5) also states that an individual not employed by the licensee (i.e., contractors) may be authorized access to protected areas without escort provided the individual "receives a picture badge upon entrance into the protected area which must be returned upon exit from the protected area * * *"

Currently, unescorted access into protected areas of the St. Lucie units is controlled through the use of a photograph on a badge and a separate keycard. At the Turkey Point units, unescorted access into protected areas is controlled through the use of a photograph on a combination badge and keycard. (Hereafter, these are referred to as badge). The security officers at each entrance station use the photograph on the badge to visually identify the individual requesting access. The badges for both licensee employees and contractor personnel who have been granted unescorted access are issued upon entrance at each entrance/exit location and are returned upon exit. The badges are stored and are retrievable at each entrance/exit location. In accordance with 10 CFR 73.55(d)(5), contractor individuals are not allowed to take badges offsite. In accordance with the plants' physical security plans, neither licensee employees nor contractors are allowed to take badges offsite.

The licensee proposes to implement an alternative unescorted access control system which would eliminate the need to issue and retrieve badges at each entrance/exit location and would allow all individuals with unescorted access to keep their badges with them when departing the site.

An exemption from 10 CFR 73.55(d)(5) is required to permit contractors to take their badges offsite instead of returning them when exiting the site.

Environmental Impacts of the Proposed Action

The Commission has completed its evaluation of the licensee's application. Under the proposed system, each individual who is authorized for unescorted entry into protected areas would have the physical characteristics of their hand (hand geometry) registered with their badge number in the access control system. When an individual enters the badge into the card reader and places the hand on the measuring surface, the system would record the individual's hand image. The unique characteristics of the extracted hand image would be compared with the previously stored template to verify authorization for entry. Individuals, including licensee employees and contractors, would be allowed to keep their badge with them when they depart the site.

Based on a Sandia report entitled "A Performance Evaluation of Biometric Identification Devices" (SAND91—0276 UC—906 Unlimited Release, Printed June 1991), and on its experience with the current photo-identification system, the licensee demonstrated that the proposed hand geometry system would provide enhanced site access control. Since both the badge and hand geometry would be necessary for access into the protected area, the proposed system would provide for a positive verification process. Potential loss of a badge by an individual, as a result of taking the badge offsite, would not enable an unauthorized entry into protected areas. The licensee will implement a process for testing the proposed system to ensure continued overall level of performance equivalent to that specified in the regulation. The Physical Security Plans for both sites will be revised to include implementation and testing of the hand geometry access control system and to allow licensee employees and contractors to take their badges offsite.

The access will continue to be under the observation of security personnel. A numbered picture badge identification system will continue to be used for all individuals who are authorized access to protected areas without escorts. Badges will continue to be displayed by all individuals while inside the protected area.

Accordingly, the Commission concludes that this proposed action would result in no significant radiological environmental impact. With regard to potential non-radiological impacts, the proposed change does not affect non-radiological plant effluents and has no other environmental impact. Therefore, the Commission concludes that there are no significant non-radiological environmental impacts associated with the proposed action.

Alternative to the Proposed Action

As an alternative to the proposed action, the staff considered denial of the proposed action. Denial of the application would result in no change in current environmental impacts. The environmental impacts of the proposed action and the alternative action are similar.

Alternative Use of Resources

This action did not involve the use of any resources not previously considered in the Final Environmental Statements related to operation of Turkey Point plants, dated July 1972, and St. Lucie plants Unit 1, dated June 1972 and Unit 2, dated May 1974.

Agencies and Persons Consulted

The NRC staff consulted with the State of Florida regarding the environmental impact of the proposed action.

Finding of No Significant Impact

The Commission has determined not to prepare an environmental impact statement for the proposed exemption. Based upon the foregoing environmental assessment, the Commission concludes that the proposed action will not have significant effect on the quality of the human environment.

For further details with respect to this action, see the request for exemption dated October 13, and November 2, 1993 which are available for public inspection at the commission's Public Document Room, 2120 L Street, NW., Washington, DC and at the local public document rooms located at Florida International University, University Park, Miami, Florida 33199 and at Indian River Community College, Ft. Pierce, Florida.

Dated at Rockville, Maryland, this 17th day of November 1993.

For the Nuclear Regulatory Commission.

Herbert N. Berkow,

Director, Project Directorate II–2, Division of Reactor Projects—I/II, Office of Nuclear Reactor Regulation.

[FR Doc. 93–29122 Filed 11–26–93; 8:45 am]

BILLING CODE 7590–01–M

[Docket No. 50–354]

Public Service Electric and Gas Company, Atlantic City Electric Company; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. NPF–57, issued to Public Service Electric and Gas Company, et al. (PSE&G or the licensee) for Hope Creek Generating Station, located in Salem County, New Jersey.

Enviromental Assessment

Identification of the Proposed Action

By letter dated July 7, 1993 (NLR–N93095), PSE&G requested a license amendment to reflect changes to Appendix B of the Facility Operating License NFP–57. The request concerned removal of Pages 4–1a and 4–1b from

Section 4.2.1, "Aquatic Monitoring," in the Environmental Protection Plan (EPP).

Under the Endangered Species Act of 1973, a Section 7 consultation was reopened to evaluate the occurrence of impinged sea turtles at the Salem Nuclear Generating Station main circulating water intake structure. On January 2, 1991, the National Marine Fisheries Service (NMFS) issued a biological opinion which included an incidental take statement (ITS) that specified measures that PSE&G should take to facilitate observance and rescue of impinged sea turtles at the intake structures of both Salem and Hope Creek. PSE&G incorporated these measures into the EPP as requested by the NRC staff. Because of a large number of sea turtles impinged at the Salem intake structure during the summer of 1991, a revised biological opinion was issued by NMFS on August 4, 1992. During the summer of 1992, the fatal take limit of one Kemp's ridley was exceeded at the Salem intake structure. NMFS reinitiated the Section 7 consultation and on May 14, 1993, the biological opinion was again revised and issued. Because there has been no documented takes of sea turtles at the Hope Creek intake structure, the revised ITS in the May 14, 1993 biological opinion, granted relief to Hope Creek from the monitoring requirement contained in the previous biological opinions.

The Need for the Proposed Action

The proposed changes to Section 4.2.1, "Aquatic Monitoring," of the Environmental Protection Plan is required in order to provide the licensee relief of the previously imposed monitoring requirements, as they are not necessary.

Environmental Impacts of the Proposed Action

The Commission has completed its evaluation of the proposed revision to the Environmental Protection Plan and concludes that the changes are consistent with the recommendations made by NMFS in the May 14, 1993, revised biological opinion. The Commission concludes that this proposed action would result in no significant radiological environmental impact because the change only affects monitoring for sea turtles.

The proposed amendment will not increase the probability or consequences of any reactor accidents because the change does not affect the operation or performance of any equipment assumed in the accident analyses. With regard to potential non-radiological impacts, the proposed change to the Environmental Protection Plan involves deletion of surveillance requirements of systems located within the restricted area, as defined in 10 CFR part 20. It does not affect non-radiological plant effluents and has no other environmental impact. Therefore, the Commission concludes that there are no significant non-radiological environmental impacts associated with the proposed amendment.

Alternative to the Proposed Action

Since the Commission concluded that there are no significant environmental effects that would result from the proposed action, any alternatives with equal or greater environmental impacts need not be evaluated. The principal alternative would be to deny the requested amendment. This would not reduce environmental impacts of plant operation and would result in reduced operational flexibility.

Alternative Use of Resources

This action does not involve the use of any resources not previously considered in the Final Environmental Statements for the Hope Creek Generating Station (NUREG–1074), dated December 1984.

Agencies and Persons Consulted

The NRC staff reviewed the licensee's request and consulted the State of New Jersey regarding the environmental impact of the proposed action.

Finding of No Significant Impact

The Commission has determined not to prepare an environmental impact statement for the proposed license amendment.

Based upon the foregoing environmental assessment, the Commission concludes that the proposed action will not have a significant effect on the quality of the human environment.

For further details with respect to this action, see the application for amendment dated July 7, 1993. This letter is available for public inspection at the Commission's Public Document Room, the Gelman Building, Lower Level, 2120 L Street, NW., Washington, DC 20555 and at the local public document room located at the Pennsville Public Library, 190 S. Broadway, Pennsville, New Jersey 08070.

Dated at Rockville, Maryland, this 19th day of November 1993.

For the Nuclear Regulatory Commission.

Larry E. Nicholson,

Acting Director, Project Directorate I–2, Division of Reactor Project—I/II, Office of Nuclear Reactor Regulation.

[FR Doc. 93–29123 Filed 11–26–93; 8:45 am]

BILLING CODE 7590–01–M

Proposed Generic Communication; NRC Generic Letter 89–10, Safety-Related Motor-Operated Valve Testing and Surveillance; Public Meeting

AGENCY: Nuclear Regulatory Commission

ACTION: Notice of meeting.

SUMMARY: The United States Nuclear Regulatory Commission (NRC) has scheduled a public meeting to discuss Generic Letter (GL) 89–10, "Safety-Related Motor-Operated Valve Testing and Surveillance." This meeting will focus on potential pressure locking and thermal binding of gate valves installed in safety-related systems of both boiling water and pressurized water reactors. The NRC will present an evaluation of related industry experience and planned regulatory activities. In addition, utility representatives may provide a discussion of ongoing industry activities related to pressure locking and thermal binding. Following this, NRC staff will discuss its positions on these issues. The NRC discussion will include responses to questions received from interested parties, licensees and applicants.

DATE AND LOCATION: The meeting will be held on February 4, 1994, from 8 a.m. to 5 p.m. at the New Orleans Marriott, 555 Canal Street, New Orleans, Louisiana 70140, Telephone (504) 581–1000.

DIRECT QUESTIONS TO: Allen G. Hansen, United States Nuclear Regulatory Commission, Office of Nuclear Reactor Regulation, Washington, DC 20555, Telephone (301) 504–1390.

SUPPLEMENTARY INFORMATION: This meeting will focus on pressure locking and thermal binding of motor operated valves. NRC staff investigations of gate valve pressure locking and thermal binding events indicate that identifying those valves susceptible to the phenomena is a complex process involving knowledge of components, systems, and plant operations. Component aspects include understanding operation of the valve, knowledge of valve design that can affect thrust requirements to lift the discs off the seats, and knowledge of the process used to determine operator thrust requirements. System considerations involve knowledge of

system conditions during all modes of plant operation, pump and valve alignments and operations, and knowledge of pump and valve start signals during all modes of operation including transients, accidents, and recovery actions hours after an accident. Operations aspects relate to knowledge of plant operation from startup to shutdown throughout a full fuel cycle to include systems or trains used and when, system temperature and pressure conditions in various modes, interface conditions (especially temperature and pressure) between systems or trains (or modes of a system), and valve proximity to fluid temperature change (heatup or cooldown) or valve exposure to pressure difference.

An observation from NRC staff discussions with licensees was that those most successful in identifying valves susceptible to pressure locking and thermal binding utilized an interdisciplinary team composed of valve experts, systems engineers, and plant operations staff. We believe licensees could achieve optimum workshop benefit through team participation. This would enhance appreciation of plant operation effects on valve susceptibility to pressure locking and thermal binding.

In order to assist the NRC in preparing for this meeting, interested parties should mail questions to the above address by January 4, 1994. Questions on NRC positions raised during the meeting will be discussed to the extent practical. In addition, the meeting content will be made available to the public following the meeting.

Dated at Rockville, Maryland this 22nd day of November 1993.

For the Nuclear Regulatory Commission.

Allen G. Hansen,

Project Manager, Project Directorate III–3, Division of Reactor Projects III/IV/V, Office of Nuclear Reactor Regulation.

[FR Doc. 93–29124 File 11–26–93; 8:45 am]

BILLING CODE 7590–01–M

Uranium Recovery Field Office

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of closure of the document reading room.

SUMMARY: The Nuclear Regulatory Commission is informing the public that the Document Reading Room located at the Uranium Recovery Field Office will be closed effective June 1, 1994, and that document availability will be limited during the period from February 1, 1994 through May 31, 1994. This action is necessary to facilitate the timely transfer of documents from the field office to headquarters.

ADDRESSES: Questions regarding this notice may be mailed to the Licensing Assistant at the Uranium Recovery Field Office, with a copy to the Director, Uranium Recovery Field Office, U.S. Nuclear Regulatory Commission, P.O. Box 25325, Denver, Colorado, 80225.

DATES: The Reading Room will be closed as of June 1, 1994.

FOR FURTHER INFORMATION CONTACT: Ramon E. Hall, Director, Uranium Recovery Field Office, Region IV, U.S. Nuclear Regulatory Commission, P.O. Box 25325, Denver, Colorado, 80225. Telephone: (303) 231–5800.

SUPPLEMENTARY INFORMATION: The Nuclear Regulatory Commission has established a closure schedule for the Uranium Recovery Field Office. To facilitate the planned closure on August 1, 1994, it will be necessary to begin shipping formal docket files and reference material to the headquarters of the Nuclear Regulatory Commission in February 1994. As a result, the availability of materials will be limited to those documents still available in the office, and not in the process of being readied for shipment. During and following the transfer of the documentation from the Uranium Recovery Field Office, all documentation will continue to be available at the Public Document Room of the Nuclear Regulatory Commission, located at 2120 L Street NW., Washington, DC 20037 (202) 634–3273. Individuals should contact the Licensing Assistant at the Uranium Recovery Field Office on (303) 231–5800 before visiting the reading room to ascertain the availability of desired documents during the transition period. As of June 1, 1994, all documentation will have been transferred, and the document reading room will be closed to the public.

Dated at Denver, Colorado, on the 17th day of November 1993.

For the Nuclear Regulatory Commission.

Ramon E. Hall,

Director, Uranium Recovery Field Office, Nuclear Regulatory Commission.

[FR Doc. 93–29126 Filed 11–26–93; 8:45 am]

BILLING CODE 7590–01–M

Issuance of Director's Decision Under 10 CFR 2.206

Notice is hereby given that the Director, Office of Enforcement, has issued a decision concerning a Petition filed by letter dated August 16, 1992 submitted by Ernest C. Hadley as counsel for Arnold Gundersen (Petitioner). The Petition and subsequent correspondence from the Petitioner requested: (1) Prompt and decisive enforcement action against Petitioner's former employer, Nuclear Energy Services (NES) for procedural and license violations, alleged harassment of Petitioner and alleged misstatements made to NRC inspectors; (2) an immediate review of all pending investigations and the reasons for delay in taking enforcement action against NES; (3) action to protect the Petitioner from alleged continuing harassment by NES; (4) action to protect the Petitioner from a lawsuit filed by NES; (5) additional action against NES, including revocation of its license; (6) a response by NRC to NES's dispute over facts outlined in a 1992 NRC inspection report; (7) a ruling by NRC that a settlement agreement between Petitioner and NES is illegal and thus null and void; (8) discipline of an NRC employee for alleged intimidation of Petitioner's wife; and (9) an investigation into an alleged "cozy relationship" between NRC and NES.

The Petition is granted with respect to the request that the NRC respond to NES' dispute over facts outlined in a 1992 NRC inspection report, but is denied with respect to the other requests. The reasons for the denial are explained in the "Director's Decision under 10 CFR 2.206" (DD–93–16) which is available for public inspection in the Commission's Public Document Room at 2120 L Street, NW., Washington, DC 20555.

A copy of this Decision will be filed with the Secretary for the Commission's review in accordance with 10 CFR 2.206. As provided by this regulation, the Decision will constitute the final action of the Commission 25 days after the date of issuance of the Decision unless the Commission on its own motion institutes a review of the Decisions within that time.

Dated at Rockville, Maryland this 19th of November 1993.

For the Nuclear Regulatory Commission.

James Lieberman,

Director, Officer of Enforcement.

[FR Doc. 93–29125 Filed 11–26–93; 8:45 am]

BILLING CODE 7590–01–M

[Docket Nos. 50-269, 50-270, and 50-287]

Duke Power Co.; Consideration of Issuance of Amendments to Facility Operating Licenses, Proposed No Significant Hazards Consideration Determination, and Opportunity for a Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License Nos. DPR-38, DPR-47, and DPR-55 issued to Duke Power Company (the licensee) for operation of the Oconee Nuclear Station, Units 1, 2, and 3 located in Oconee County, South Carolina.

The proposed amendments would provide an interim acceptance criteria for control rod drop time on Oconee Unit 1. Specifically, control rod Group 1, Rod 8, and Group 2, Rod 5, would be considered operable with an insertion time of less than or equal to 3.00 seconds provided that: (1) The average insertion time for the remaining rods in Group 1 and the average insertion time for the remaining rods in Group 2 is less than or equal to 1.5 seconds, and (2) the core average negative reactivity insertion rate is within the assumptions of the safety analysis. The acceptance criteria would apply until the end of the current fuel cycle for Oconee Unit 1. This acceptance criteria for rod drop time would apply for the two rods, rather than the existing Technical Specification 4.7.1 limit of 2.00 seconds from the fully withdrawn position to ¾ insertion.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

(1) Involve a significant increase in the probability or consequences of an accident previously evaluated:

Each accident analysis addressed within the Oconee Final Safety Analysis Report (FSAR) has been examined with respect to the changes proposed within this amendment request. There is no significant increase in the probability of any Design Basis Accident (DBA) as a result of this change, nor is there a significant increase in the consequences of a DBA as a result of this change, since the revised test acceptance criteria assure the ability of the control rods to mitigate design basis accidents. Specifically, the revised test acceptance criteria assure that the negative reactivity insertion rate is within the assumptions of the safety analysis.

(2) Create the possibility of a new or different kind of accident from any accident previously evaluated:

Accident analysis associated with the drop time of control rods are based on a minimum negative reactivity insertion rate required to prevent and/or mitigate adverse accident conditions. Operation of ONS [Oconee Nuclear Station] in accordance with the revised control rod drop time test acceptance criteria will not create any failure modes not bounded by previously evaluated accidents. Consequently, this change will not create the possibility of a new or different kind of accident from any accident previously evaluated.

(3) Involve a significant reduction in a margin of safety:

The revised control rod drop time test acceptance criteria for Unit 1 Cycle 15 assure that the negative reactivity insertion rate assumed in the accident analysis is met. Thus existing margins of safety are preserved. Therefore, there will be no significant reduction in any margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received. Should the Commission take this action, it will publish in the **Federal Register** a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

Written comments may be submitted by mail to the Rules Review and Directives Branch, Division of Freedom of Information and Publications Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and should cite the publication date and page number of this **Federal Register** notice. Written comments may also be delivered to room P-223, Phillips Building, 7920 Norfolk Avenue, Bethesda, Maryland, from 7:30 a.m. to 4:15 p.m. Federal workdays. Copies of written comments received my be examined at the NRC Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555.

The filing of requests for hearing and petitions for leave to intervene is discussed below.

By December 29, 1993, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for a hearing and a petition for leave to intervene. Requests for a hearing and a petition for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR part 2. Interested persons should consult a current copy of 10 CFR 2.714 which is available at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555 and at the local public document room located at Oconee County Library, 501 West South Broad Street, Walhalla, South Carolina 29691. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition; and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons

why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to 15 days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than 15 days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter. Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted. In addition, the petitioner shall provide a brief explanation of the bases of the contention and a concise statement of the alleged facts or expert opinion which support the contention and on which the petitioner intends to rely in proving the contention at the hearing. The petitioner must also provide references to those specific sources and documents of which the petitioner is aware and on which the petitioner intends to rely to establish those facts or expert opinion. Petitioner must provide sufficient information to show that a genuine dispute exists with the applicant on a material issue of law or fact. Contentions shall be limited to matters within the scope of the amendment under consideration. The contention must be one which, if proven, would entitle the petitioner to relief. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it immediately effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment request involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Services Branch, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555, by the above date. Where petitions are filed during the last 10 days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1–(800) 248–5100 (in Missouri 1–(800) 342–6700). The Western Union operator should be given Datagram Identification Number N1023 and the following message addressed to David B. Matthews: Petitioner's name and telephone number, date petition was mailed, plant name, and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to J. Michael McGarry, III, Winston and Strawn, 1200 17th Street NW., Washington, DC 20036, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)–(v) and 2.714(d).

For further details with respect to this action, see the application for amendments dated November 11, 1993, which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555 and at the local public document room located at the Oconee County Library, 501 West South Broad Street, Walhalla, South Carolina 29691.

Dated at Rockville, Maryland, this 22nd day of November 1993.

For the Nuclear Regulatory Commission.

L.A. Wiens,

Project Manager, Project Directorate II–3, Division of the Reactor Projects—I/II, Office of Nuclear Reactor Regulation.

[FR Doc. 93–29127 Filed 11–26–93; 8:45 am]

BILLING CODE 7590–01–M

[Docket No. 40–8989]

Envirocare of Utah, Inc.; Issuance of Facility License

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission or NRC), has issued Byproduct Material License N. SMC–1559 to Envirocare of Utah, Inc. which authorizes the receipt, storage, and disposal of 11e.(2) byproduct material (as defined in section 11e.(2) of the Atomic Energy Act of 1954, as amended) at a site near Clive, Utah.

The application for the license complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations. The Commission has made appropriate findings as required by the Act and the Commission's Regulations in 10 CFR chapter I which are set forth in the license. Prior public notice of the overall action involving the proposed issuance of license was published in the **Federal Register** on January 25, 1991 (56 FR 2659).

The Commission has determined that the issuance of this license will not result in any environmental impacts other than those evaluated in the Final Environmental Statement since the activity authorized by this license is encompassed by the overall evaluation described in the Final Environmental Statement.

For further details with respect to this action, see (1) byproduct Material License SCM–1559; (2) the Commission's Final Safety Evaluation Report, dated June 18, 1993, and Supplement 1; (3) the License Application, and amendments thereto; (4) the Environmental Report, and amendments thereto; and (5) the Final Environmental Statement dated August 1993.

These items are available for inspection at the Commission's Public Document Room located in the Gelman Building, Lower Level, 2120 L Street, NW., Washington, DC.

Dated at Rockville, Maryland this 19th day of November 1993.

For the Nuclear Regulatory Commission.

Daniel M. Gillen,

Acting Chief, Uranium Recovery Branch, Division of Low-Level Waste Management and Decommissioning, Office of Nuclear Material Safety and Safeguards.

[FR Doc. 93–29128 Filed 11–26–93; 8:45 am]

BILLING CODE 7590–01–M

Portland General Electric Co. et al. Trojan Nuclear Plant; Exemption

[Docket No. 50-344]

I

The Portland General Electric Company, et al., (PGE or the licensee), is the holder of Facility Operating (Possession Only) License No. NP–1, which authorizes possession and maintenance of the Trojan Nuclear Plant (Trojan or the plant). The license provides, among other things, that the plant is subject to all rules, regulations, and orders of the Commission now or hereafter in effect.

The plant is a permanently shut down light water reactor, currently in the process of being decommissioned, and is located in Columbia County, Oregon, on the Columbia River.

II

The Trojan Nuclear Plant permanently ceased power operations in November 1992, fuel was removed from the reactor and placed into the spent fuel pool, and detailed plans to decommission the facility were developed. The license was modified to a possession only status on May 5, 1993. This license prohibits operation of the reactor. On March 24, 1993, the NRC staff issued a confirmatory order that prohibits movement of nuclear fuel into the reactor building without prior written NRC approval. As the Trojan Nuclear Plant is permanently shut down and defueled, the NRC is granting an exemption from the requirements of 10 CFR 50.120 which are applicable to plants licensed to operate. This rule states the following:

* * * Each nuclear power plant licensee, by November 22, 1993, shall establish, implement, and maintain a training program derived from systems approach to training as defined in 10 CFR 55.4.

This exemption will relieve the licensee from all training program requirements of 10 CFR 50.120. However, it does not relieve the licensee from previous requirements or commitments to train and qualify facility personnel to maintain the plant in a non-operating defueled condition.

The NRC may grant exemptions from the requirements of the regulations which, pursuant to 10 CFR 50.12(a), are (1) authorized by law, will not present an undue risk to the public health and safety, and are consistent with the common defense and security; and (2) where special circumstances are present when *inter alia*, application of the regulation in the particular circumstances would not serve the underlying purpose of the rule or is not necessary to achieve the underlying purpose of the rule, or that compliance would result in undue hardship or costs significantly in excess of those contemplated when the regulation was adopted or those incurred by others similarly situated.

The purpose of 10 CFR 50.120 is to ensure that civilian nuclear power plant operating personnel are trained and qualified to safely operate and maintain the facility.

IV

The licensee in its letters dated August 10, October 14, and October 21, 1993, addressed the special circumstances related to why an exemption should be granted to the requirement that the Trojan training programs comply with 10 CFR 50.120. The reactor has been defueled and the fuel removed to the spent fuel pool. The reactor cannot be returned to operation because the licensee is prohibited from operating the facility under the current possession only license. The licensee has stated that the training requirements necessary to assure adequate protection of the public health and safety in a permanently shutdown and defueled facility are significantly less than the training requirements necessary to assure the public health and safety at an operating facility as required by 10 CFR 50.120.

In a letter dated October 21, 1993, the licensee stated that, in lieu of meeting 10 CFR 50.120, Trojan Technical Specification 6.3.1, shall be met, which requires that each member of the facility staff shall meet or exceed the minimum qualifications of ANSI N18.1–1971 for comparable positions to those listed in 10 CFR 50.120, except for the Radiation Protection Manager who shall meet or exceed the qualifications of Regulatory Guide 1.8, Rev. 2, April 1987. The licensee training programs for the personnel categories comparable to those required by 10 CFR 50.120 shall be as follows:

Non-Licensed Operators

In lieu of non-licensed operators, certified fuel handlers shall be trained in accordance with the April 27, 1993 NRC-approved certified fuel handler (CFH) training program. This program provides both initial and continuing training appropriate to the handling, storage, and cooling of

Radiation Protection and Chemistry Technician

Radiation protection and chemistry technicians shall have combined duties for individuals who were qualified in both chemistry and radiation protection. The radiation protection (RP) technician training consists of administrative, fundamentals, personnel monitoring, instruments, exposure control, respiratory protection, plant systems, radioactive materials, and on the job training. The Chem/RP technician program contains the RP training program plus additional topics in the area of chemistry, spectroscopy, chromatography, and sewage treatment. The training program for both groups is being implemented by a chemistry and radiation protection department individual.

Engineering Support

The licensee stated that engineering support personnel currently receive training on an as-needed basis, in 10 CFR 50.59, accident analysis, systems, technical specifications, and procedure technical reviewer.

The licensee maintains that with all of the Trojan spent fuel stored in the spent fuel pool, the principal tasks and activities performed on the site are those necessary to monitor and maintain the spent fuel pool and associated support equipment, and that the tasks and activities associated with maintaining the fuel are relatively simple compared to the tasks and activities required to maintain an operating nuclear power plant. For all categories of training described above, the license indicates that its training commitments provide the protection necessary to ensure public health and safety given the current shutdown and defueled status of the facility. Therefore, the licensee maintains that requiring Trojan to comply with the literal training requirements specified in 10 CFR 50.120 is not necessary to achieve the underlying purpose of the rule.

Further, the licensee has also stated that compliance with the requirements of 10 CFR 50.120 would present an undue financial and administrative hardship. Because the plant is permanently shut down, the licensee is dedicating its resources to safely decommissioning the plant once the NRC approves the decommissioning plan. The licensee no longer has instructors to maintain a systems approach to training (SAT) program, as defined in 10 CFR 55.4. The licensee

states that to require it to comply fully with the requirements of the SAT process would result in extreme hardship. Further, the licensee contends that the regulation was established for power operation conditions because such conditions could result in the potential for an accident with significant offsite consequences. Since there now is no credible event at Trojan that could result in exceeding the dose limits of 10 CFR Part 100, requiring Trojan to comply with the training requirements specified in 10 CFR 50.120 would not materially contribute to increasing public health and safety.

V

The NRC staff reviewed and agrees with the licensee analysis described above. In addition, the NRC has previously analyzed the limiting design basis accident for Trojan in this permanently shut down condition; a fuel handling accident in the spent fuel pool. The results of this analysis indicated that if a fuel handling accident were to occur at Trojan, the resulting offsite dose to the maximally exposed individual would be significantly less than the U.S. Environmental Protection Agency Protective Action Guidelines. The staff has also determined that the tasks that remain to be performed by the Trojan plant staff are fewer in number and significantly less complicated than the tasks performed by the staff of an operating nuclear plant. Thus, the NRC staff concludes the licensee justification for exemption is reasonable based on (1) the significantly reduced risk to the public health and safety due to Trojan being permanently shut down, and (2) the reduced number and complexity of tasks to be performed by the Trojan site staff.

VI

Based on the analyses presented in Sections IV and V above, the staff concludes that sufficient bases exist for approval of this exemption. The staff finds that the special circumstance present satisfies the requirement of 10 CFR 50.12(a)(2)(ii) in that requiring compliance with 10 CFR 50.120 is not necessary to achieve the underlying purpose of the rule where training will be provided commensurate with permanently shut down and defueled condition of the facility.

VII

Based on the above evaluation, the Commission has determined that, pursuant to 10 CFR 50.12(a)(1), this exemption is authorized by law, will not present an undue risk to the public health and safety, and is consistent with the common defense and security.

Accordingly, the Commission, hereby grants an exemption to 10 CFR 50.120. This exemption does not relieve the licensee of any other training requirements or commitments which they have made to the NRC, including those set out above.

Pursuant to 10 CFR 51.32, the Commission has determined that the granting of this exemption will not have a significant effect on the quality of the human environment (58 FR 61106, dated November 19, 1993).

This exemption is effective on November 22, 1993, the implementation date of the rule.

Dated at Rockville, Maryland this 19th day of November 1993.

For the Nuclear Regulatory Commission.

Brian K. Grimes,

Director, Division of Operating Reactor Support Office of Nuclear Reactor Regulation.

[FR Doc. 93–29129 Filed 11–26–93; 8:45 am]

BILLING CODE 7590–01–M

Southern California Edison Co., San Onofre Nuclear Generating Station, Unit 1; Exemption

[Docket No. 50–206]

I

The Southern California Edison Company (the licensee), is the holder of Facility Operating (Possession Only) License No. DPR–13 which authorizes possession and maintenance of the San Onofre Nuclear Generating Station, Unit 1 (SONGS 1 or the plant). The license provides, among other things, that the plant is subject to all rules, regulations, and orders of the Commission now or hereafter in effect.

The plant is a permanently shutdown light water reactor, currently in the process of being decommissioned, and is located at the site of the licensee in San Clemente, California.

II

The San Onofre Nuclear Generating Station, Unit 1 permanently ceased power operations in November 1992. Future operation of SONGS 1 is prohibited by License Amendment No. 150, dated October 23, 1992, which amended the Facility Operating License No. DPR–13 to remove the operating authority of the licensee and allows the licensee to possess but not operate SONGS 1. This license amendment became effective as of the date the licensee provided certification that operation of the reactor has been permanently terminated and all special nuclear material, such as reactor fuel, has been permanently removed from the reactor and stored in the spent fuel pool. The licensee completed removal of the fuel from the reactor to the spent fuel pool on March 6, 1993, and provided the required certification on March 9, 1993. As SONGS 1 is permanently shut down and defueled, the NRC on its own initiative, is granting an exemption from the requirements of 10 CFR 50.120 which are applicable to plants licensed to operate. This rule states the following:

> * * * Each nuclear power plant licensee, by November 22, 1993, shall establish, implement, and maintain a training program derived from a systems approach to training as defined in 10 CFR 55.4.

This exemption will relieve the licensee from the training program requirements of 10 CFR 50.120, except for certified non-licensed operators. However, it does not relieve the licensee from previous requirements or commitments to train and qualify facility personnel to maintain the plant in a non-operating defueled condition.

III

The NRC may grant exemptions from the requirements of the regulations which, pursuant to 10 CFR 50.12(a), are (1) authorized by law, will not present an undue risk to the public health and safety, and are consistent with the common defense and security; and (2) present special circumstances.

Section 50.12(a)(2)(ii) of 10 CFR Part 50 provides that special circumstances exist when application of the regulations in the particular circumstances would not serve the underlying purpose of the rule or is not necessary to achieve the underlying purpose of the rule.

The purpose of 10 CFR 50.120 is to ensure that civilian nuclear power plant operating personnel are trained and qualified to safely operate and maintain the facility commensurate with the safety status of the facility.

IV

The licensee in its letter dated August 2, 1993, addressed the special circumstances related to why an exemption should be granted to the requirement that the SONGS 1 training programs comply with 10 CFR 50.120. The reactor has been defueled and the fuel removed from the containment to the spent fuel pool. The reactor cannot be returned to operation because of License Amendment No. 150, which prohibits operation of SONGS 1.

The licensee has stated that it believes that 10 CFR 50.120 was intended to apply primarily to operational plants. In publishing the regulation (58 FR 21904),

the NRC stated that "If permanent changes in the condition of the plant (i.e., decommissioning or Possession Only License) make some or all existing training programs unnecessary, the licensee would obtain relief from these requirements by applying for an exemption eliminating or modifying the affected programs." Further, the licensee stated that since the regulation was intended primarily for operational plants, and since a systems approach to training (SAT) program, as defined in 10 CFR 55.4, is not needed for SONGS 1 plant personnel, application of 10 CFR 50.120 to SONGS 1 would not serve the underlying purpose of the regulation. The current SONGS 1 training programs for the personnel categories required by 10 CFR 50.120 is as follows:

Non-Licensed Operators

Training for certified fuel handlers (certified non-licensed operators), will continue to be in accordance with the May 27, 1993, NRC-approved certified fuel handler training program. The licensee can make changes to this approved training under the provisions of 10 CFR 50.59 based on continued program conformance to 10 CFR 50.120.

Training for non-certified operators consists of training and qualification to monitor and manipulate plant equipment.

Shift Supervisor

The SONGS 1 shift supervisors are certified fuel handlers who are accountable for safe and efficient plant operation in the permanently defueled mode, as SONGS 1 will no longer operate. Shift supervisors, as certified fuel handlers, receive training in accordance with the May 27, 1993, NRC-approved certified fuel handler training program, discussed above.

Shift Technical Advisor (STA)

There are no longer any STA positions at SONGS 1 based on License Amendment No. 154, dated May 27, 1993.

Instrumentation and Control, Electrical, and Mechanical Maintenance

The licensee stated that at SONGS 1 Instrument and Control Technicians, and Electrical and Mechanical Maintenance personnel perform the types of functions which are typical of these positions at an operational plant, such as calibration, and preventative and corrective maintenance of plant equipment. However, the number of systems and components involved is far less than at an operational plant and the maintenance personnel need not be familiar with as many different types of equipment. The plant equipment which remains functional is not technically sophisticated and the skills required for maintenance are less complex. Further, the licensee states that these individuals will be subject to the training requirements of 10 CFR 50.120 for the remaining two operating units onsite, although not for SONGS 1.

Radiation Protection Technician

The licensee states that radiological protection personnel functions at SONGS 1 are much less likely to involve activities capable of producing substantial personnel exposures than at an operational plant, since many of these activities have been eliminated. There will be no movement of irradiated fuel into or out of containment. Containment entries while the plant is at power and the attendant neutron exposures have been eliminated. There are no plans for work in high radiation, contamination, or airborne areas, or in harsh environments such as steam generator primary side entries. The radiation levels of radioactive waste will be lower. Thus, the potential for personnel overexposure is much less at SONGS 1 than at an operational plant. Further, the licensee states that these individuals will be subject to the training requirements of 10 CFR 50.120 for the remaining two operating units onsite, but not for SONGS 1.

Chemistry Technician

The licensee states that the quantity of samples and types of analyses required of chemistry technicians at SONGS 1 are much less than at an operational plant. The only chemistry concerns are the quality of the spent fuel pool water and analyses of potential release pathways. Analyses of primary coolant, steam generator, and condensate water are not needed, and water quality is not as critical for the spent fuel as it was for these other systems and components. Further, the licensee states that these individuals will be subject to the training requirements of 10 CFR 50.120 for the remaining two operating units onsite, but not for SONGS 1.

Engineering Support

The licensee states that a much lower level of engineering support is needed at SONGS 1 than at an operational plant, and the support required is generally less technically sophisticated. There are far fewer systems which must be kept functional, and those which are functional are not technically complex. In particular, there are far fewer safety-related systems, and engineering support personnel knowledge of codes and standards, such as ASME Code, need not be as extensive. There are no significant modifications or major component overhauls planned which would impose a large complex work load on engineering support personnel. Further, the licensee states that these individuals will be subject to the training requirements of 10 CFR 50.120 for two operating units onsite, but not for SONGS 1.

Thus, for all categories of training described above, the licensee indicates that the existing training requirements and commitments provide the protection necessary to ensure public health and safety given the current shutdown and defueled status of the facility. Although SONGS 1 personnel are subject to the SAT-based training program for the onsite operating Units 2 and 3, when applied to Unit 1, such training does not fully comply with 10 CFR 50.120 since it was not formally developed considering all possible job tasks remaining at Unit 1. With all of the SONGS 1 spent fuel stored in the spent fuel pool, the principal tasks and activities performed on the site are those necessary to monitor and maintain the spent fuel pool and associated support equipment. The tasks and activities associated with maintaining the fuel are relatively simple compared to the tasks and activities required to maintain an operating nuclear power plant. Therefore, requiring SONGS 1 to comply with the literal training requirements specified in 10 CFR 50.120 is not necessary to achieve the underlying purpose of the rule.

The licensee states that to require it to comply fully with the requirements of the 10 CFR 50.120 would not serve the underlying purpose of the regulation. The licensee contends that the regulation was established for power operation conditions because such conditions could result in the potential for an accident with significant offsite consequences. Since there now is no credible event at SONGS 1 that could result in exceeding the dose limits of 10 CFR Part 100, traditional non-SAT training is adequate for the personnel listed in 10 CFR 50.120 at SONGS 1.

V

The NRC staff reviewed and agrees with the licensee analysis described above. In addition, the NRC has previously reviewed the limiting design basis accident for SONGS 1 in this permanently shutdown condition. This design basis accident is the fuel handling accident. The results of this analysis, presented in Chapter 15.17 of the Updated Final Safety Analysis Report, indicated that if a fuel handling accident were to occur at SONGS 1,

while the facility was still licensed to operate, the consequences would be less than the criteria provided in 10 CFR part 100. The licensee in its letter dated November 5, 1993, requesting approval to remove SONGS 1 from the site offsite emergency plan, provided the results of a fuel handling accident based on current plant conditions. The results of this new analysis are a two-hour dose to the thyroid of 0.5 mrem and a two-hour whole body dose of 1.3 mrem, at the exclusive area boundary. Thus, the consequences of the limiting design basis accident for the SONGS 1 facility are significantly less than 10 CFR part 100, and significantly less than the EPA protective action guidelines of 1 to 5 rem. The staff has also determined that the tasks that remain to be performed by the SONGS 1 plant staff are fewer in number and significantly less complicated than the tasks performed by the staff of an operating nuclear plant. Thus, the NRC staff concludes that an exemption is reasonable based on (1) the significantly reduced risk to the public health and safety due to SONGS 1 being permanently shut down, and (2) the reduced number and complexity of tasks to be performed by the SONGS 1 site staff.

VI

Based on the analyses presented in Section IV and V above, the staff concludes that sufficient bases exist for approval of this exemption. In addition, the staff finds that the special circumstances present satisfies the requirement of 10 CFR 50.12(a)(2)(ii) in that requiring compliance with 10 CFR 50.120 is not necessary to achieve the underlying purpose of the rule where training will be provided commensurate with permanently shutdown and defueled condition of the facility.

VII

Based on the above evaluation, the Commission has determined that, pursuant to 10 CFR 50.12(a)(1), this exemption is authorized by law, will not present an undue risk to the public health and safety, and is consistent with the common defense and security.

Accordingly, the Commission, on its own motion, hereby grants an exemption to 10 CFR 50.120 for training programs mandated by 10 CFR 50.120, except for certified non-licensed operator training. This exemption does not relieve the licensee of any training requirements or commitments which they have made to the NRC, including those set out above.

Pursuant to 10 CFR 51.32, the Commission has determined that the granting of this exemption will not have a significant effect on the quality of the human environment (58 FR 61106, dated November 19, 1993).

This exemption is effective on November 22, 1993, the implementation date of the rule.

Dated at Rockville, Maryland, this 19th day of November 1993.

For the Nuclear Regulatory Commission.

Brian K. Grimes,

Director, Division of Operating Reactor Support, Office of the Nuclear Reactor Regulation.

[FR Doc. 93–29130 Filed 11–26–93; 8:45 am]

BILLING CODE 7590–01–M

[Docket No. 50–29]

Yankee Atomic Electric Co. (Yankee Nuclear Power Station); Exemption

I

The Yankee Atomic Electric Company (YAEC or the licensee), is the holder of Possession Only License No. DPR–3 which authorizes possession and maintenance of the Yankee Nuclear Power Station (YNPS or plant). The license provides, among other things, that the plant is subject to all rules, regulations, and Orders of the Commission now or hereafter in effect.

The facility is a permanently shutdown pressurized water reactor, currently in the process of being prepared for decommissioning, and is located at the licensee site in Franklin County, Massachusetts.

II

The licensee, by letter dated February 27, 1992, informed the NRC that YAEC had permanently ceased power operations, removed the fuel from the reactor to the fuel pool and begun to develop detailed plans to decommission the facility. The NRC, in a license amendment dated August 5, 1992, modified License No. DPR–3 to a Possession Only License (POL). The license is conditioned so that YAEC is not authorized to operate the reactor and fuel may not be placed in the reactor vessel, thus formalizing the licensee commitment to permanently cease power operations.

By letter dated July 28, 1993, the licensee justified a partial exemption from the requirements of 10 CFR 50.120 related only to the training program establishment, implementation, and maintenance requirements for the category of personnel identified as the Shift Technical Advisor (STA). The purpose of the rule is stated as follows:

* * * Each nuclear power plant licensee, by November 22, 1993, shall establish, implement, and maintain a training program derived from a systems approach to training as defined in 10 CFR 55.4.

III

The YAEC justification for the exemption is that the NRC eliminated the STA position in License Amendment No. 141, dated July 22, 1992. The staff eliminated this position when the plant was placed in a permanently defueled status and the STA became unnecessary. This exemption would relieve the licensee from the STA training program requirements of 10 CFR 50.120 which would otherwise have to be implemented by November 22, 1993. However, it does not relieve the licensee from training other categories of personnel defined in the rule, existing requirements of the POL or other existing commitments to train and qualify facility personnel.

The Commission will not consider granting an exemption unless special circumstances are present. The Commission is granting this exemption on its own motion as permitted by 10 CFR 50.12(a). The special circumstances that we find appropriate are those in 10 CFR 50.12(a)(2)(ii)—"Application of the regulation in the particular circumstances would not serve the underlying purpose of the rule . . ." The purpose of 10 CFR 50.120 is to ensure that civilian nuclear power plant operating personnel are trained and qualified to safely operate and maintain the facility commensurate with the safety status of the facility. Since the conditions at this permanently shutdown and defueled reactor do not require the presence of a shift technical advisor, STA training is not required to serve the underlying purpose of the rule.

IV

The staff concludes, based on Section III above, that sufficient bases exist for our approval of the exemption request. In addition, the staff finds that there is an appropriate special circumstance that satisfies the requirements of 10 CFR 50.12.

V

Based on the above evaluation, the Commission has determined that pursuant to 10 CFR 50.12(a)(1), this exemption is authorized by law, will not present an undue risk to the public health and safety and is consistent with the common defense and security.

Accordingly, the Commission hereby grants an exemption to the portions of 10 CFR 50.120 that apply to the establishment, implementation, and maintenance of training programs for

the category of personnel identified as the Shift Technical Advisor. The exemption will become effective on the implementation date of the rule, November 22, 1993. This exemption does not relieve the licensee of any other training requirements for other categories of personnel defined in the rule, existing requirements of the POL or other existing commitments to train and qualify facility personnel.

Pursuant to 10 CFR 51.32, the Commission has determined that the granting of this exemption will not have any effect on the quality of the human environment (58 FR 61108, dated November 19, 1993).

This exemption is effective as noted above.

Dated at Rockville, Maryland, this 19th day of November 1993.

For the Nuclear Regulatory Commission.

Brian K. Grimes,

Director, Division of Operating Reactor Support, Office of Nuclear Reactor Regulation.

[FR Doc. 93–29131 Filed 11–26–93; 8:45 am]

BILLING CODE 7590–01–M

[Docket No. 50–029]

Yankee Atomic Electric Co. (Yankee Nuclear Power Station); Exemption

I

The Yankee Atomic Electric Company (YAEC or the licensee), is the holder of Possession Only License No. DPR–3 which authorizes possession and maintenance of the Yankee Nuclear Power Station (YNPS or plant). The license provides, among other things, that the plant is subject to all rules, regulations, and Orders of the Commission now or hereafter in effect.

The facility is a permanently shutdown pressurized water reactor, currently in the process of being prepared for decommissioning, and is located at the licensee site in Franklin County, Massachusetts.

II

The licensee, by letter dated February 27, 1992, informed the NRC that YAEC had permanently ceased power operations, removed the fuel from the reactor to the fuel pool and begun to develop detailed plans to decommission the facility. The reactor was actually shut down in early October 1991; thus, the fuel has undergone over two years of decay. The NRC in a license amendment dated August 5, 1992, modified License No. DPR–3 to a Possession Only License (POL). The license is conditioned so that YAEC is not authorized to operate the reactor and fuel may not be placed in the reactor vessel, thus formalizing the YAEC commitment to permanently cease power operations.

By letter dated September 24, 1993, the licensee requested an exemption from 10 CFR 50.54(y) which states that, as a minimum, a licensed senior operator may approve any emergency action that departs from either a license condition or technical specification when permitted by 10 CFR 50.54(x). The licensee requests that the certified fuel handlers (CFH), a position analogous to that of the 10 CFR part 55 senior licensed operators, be granted the authority provided in 10 CFR 50.54(y). The September 24, 1993, request is the action being considered herein.

III

The YAEC bases for the exemption request are that the reactor has been defueled, the fuel placed in the spent fuel storage pool and that the reactor cannot be returned to operation. The NRC staff in a letter dated June 16, 1992, approved the CFH programs at Yankee and stated, "We find that these programs provide the required level of training and certification that is consistent with the permanently shutdown and defueled condition of the plant." In a license amendment dated July 22, 1992, the NRC eliminated the licensed operator programs at the plant and replaced them with the CFH programs.

The Commission will not consider granting an exemption unless special circumstances are present. In the licensee letter of September 24, 1993, these special circumstances were addressed as follows:

10 CFR 50.12(a)(2)(ii)—"Application of the regulation in the particular circumstances would not serve the underlying purpose of the rule."

Licensee response: "Although it is highly unlikely that emergency actions as described by 10 CFR 50.54(x) will ever be needed given the permanently defueled condition of YNPS, it is important that the appropriate licensee personnel have the authority to take emergency actions if needed. Because the certified fuel handler position for a permanently defueled facility is analogous to a licensed senior operator for an operating facility, the underlying purpose of 10 CFR 50.54(y) would not be served unless certified fuel handlers are authorized to fulfill the requirements of 10 CFR 50.54(x)."

IV

The staff, based on our letter of June 16, 1992, the license amendment of July 22, 1992, and review of the licensee letter of September 24, 1993, concludes that sufficient bases exist for our approval of the exemption request. In addition, the staff finds that there are special circumstances presented that satisfy the requirements of 10 CFR 50.12(a)(2)(ii).

V

Based on sections III and IV, above, the Commission has determined that pursuant to 10 CFR 50.12(a)(1), this exemption is authorized by law, will not present an undue risk to the public health and safety and is consistent with the common defense and security.

Pursuant to 10 CFR 51.32, the Commission has determined that the granting of this exemption will not have any effect on the quality of the human environment (58 FR 61107, dated November 19, 1993).

Accordingly, the Commission hereby grants the requested exemption to 10 CFR 50.54(y). The exemption is effective immediately.

Dated at Rockville, Maryland this 19th day of November 1993.

For the Nuclear Regulatory Commission.

Brian K. Grimes,

Director, Division of Operating Reactor Support, Office of Nuclear Reactor Regulation.

[FR Doc. 93–29132 Filed 11–26–93; 8:45 am]

BILLING CODE 7590–01–M

NUCLEAR WASTE TECHNICAL REVIEW BOARD

Board to Review DOE Task Force Studies, Top-Level System Studies, the Multipurpose Container Concept, and Performance Assessment—January 11–12, 1994

Pursuant to it's authority under section 5051 of the Nuclear Waste Policy Amendments Act of 1987 (Pub. L. 100–203), the Nuclear Waste Technical Review Board will hold its winter meeting January 11–12, 1994, in Arlington, Virginia. The meeting, which is open to the public, will be held at the Doubletree Hotel National Airport, 300 Army Navy Drive, Arlington, Virginia 22202; telephone (703) 892–4100, fax (703) 521–0286.

The major topics of the two-day meeting will include a review of two recent Department of Energy (DOE) task force studies, an update on top-level system studies, a review of the status of the multipurpose container concept, and updates on performance assessment (PA) efforts being conducted within the Office of Civilian Radioactive Waste Management. On January 11, sessions will focus on the results of two task force studies initiated by former Secretary of Energy James Watkins: one

on an alternative program strategy and one on public trust and confidence. The Board also will be hearing about DOE progress in conducting top-level system studies that encompass transportation, storage, and disposal of spent nuclear fuel and defense high-level waste, and about the current status of the multipurpose container concept. On January 12, the meeting will focus on the results of the latest iteration of the Yucca Mountain Total System Performance Assessment and other PA efforts. Round-table discussions will agument the presentations.

The Board has invited representatives from the DOE and its contractors, the Electric Power Research Institute, Edison Electric Institute, the Nuclear Regulatory Commission, the National Academy of Sciences, Sweden's KASAM (National Council for Radioactive Waste), the State of Nevada, the National Association of Regulatory Utility Commissioners, and other interested organizations to participate in the meeting.

The Nuclear Waste Technical Review Board was created by Congress in the Nuclear Waste Policy Amendments Act of 1987 to evaluate the technical and scientific validity of activities undertaken by the DOE in its program to manage the disposal of the nation's spent nuclear fuel and defense high-level waste. In that same legislation, Congress directed the DOE to characterize a site at Yucca Mountain, Nevada, for its suitability as a potential location for a permanent repository for disposal of that waste.

Transcripts of the meeting will be available on a library-loan basis from Victoria Reich, Board librarian, beginning February 23, 1994. For further information, contact Frank Randall, External Affairs, 1100 Wilson Boulevard, suite 910, Arlington, Virginia 22209; (703) 235–4473; (FAX) 703–235–4495.

Dated: November 23, 1993.

William D. Barnard,

Executive Director, Nuclear Waste Technical Review Board.

OFFICE OF MANAGEMENT AND BUDGET

Accounting Standards for Inventory and Related Property

AGENCY: Office of Management and Budget.

ACTION: Notice of document availability.

SUMMARY: This Notice indicates the availability of another Statement of Federal Financial Accounting Standards, "Accounting for Inventory and Related Property," adopted by the Office of Management and Budget (OMB). The accounting standards were recommended by the Federal Accounting Standards Advisory Board (FASAB) and adopted in their entirety by OMB.

ADDRESSES: Copies of the Statement of Federal Financial Accounting Standards No. 3, "Accounting for Inventory and Related Property," may be obtained for $3.50 each from the Superintendent of Documents, Government Printing Office, Washington, DC 20402–9325 (telephone: 202–783–3238), Stock No. 041–001–00415–7.

FOR FURTHER INFORMATION CONTACT: Ronald Longo (telephone: 202–395–3993), Office of Federal Financial Management, Office of Management and Budget, 725–17th Street, NW.—room 10235, Washington, DC 20503.

SUPPLEMENTARY INFORMATION: This Notice indicates the availability of the Statement of Federal Financial Accounting Standards (SFFAS) entitled "Accounting for Inventory and Related Property," adopted by the Office of Management and Budget (OMB). The accounting standards were recommended by the Federal Accounting Standards Advisory Board (FASAB) in July 1993, and adopted in their entirety by OMB.

Publication of SFFAS No. 2, "Accounting for Direct Loans and Loan Guarantees," is pending completion of a technical guide that will append the statement. OMB will publish a notice in the **Federal Register** when SFFAS No. 2 is available, which is expected by December 15, 1993.

Under a Memorandum of Understanding among the General Accounting Office, the Department of the Treasury, and OMB on Federal Government Accounting Standards, the Comptroller General, the Secretary of the Treasury, and the Director of OMB decide upon principles and standards after considering the recommendations of FASAB. After agreement to specific principles and standards they are to be published in the **Federal Register** and distributed through the Federal Government.

John B. Arthur,

Assistant Director for Administration.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–33226; File No.SR-Amex–93–38]

Self-Regulatory Organizations; Notice of Filing of Proposed Rule Change by the American Stock Exchange, Inc. Relating to a Proposal to List for Trading Interest Rate Warrants

November 19, 1993.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78(b)(1), notice is hereby given that on January 21, 1993, the American Stock Exchange, Inc. ("Amex" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Item I, II, and III below, which Items have been prepared by the Amex. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Amex has submitted a proposal to list for trading, under Section 106 of the Amex Company Guide, warrants based on interest rates. The text of the proposed rule change is available at the Office of the Secretary, the Amex, and at the Commission.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Amex included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Amex has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

(A) Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

(1) Purpose

Under Section 106 of the Amex Company Guide, the Exchange may list non-traditional warrants (*i.e.*, warrants other than those issued by an entity involving its own stock). Pursuant to Section 106, the Amex currently lists and trades warrants based upon foreign currencies, a foreign currency basket, and various stock indexes.

The Exchange now proposes to list and trade interest rate warrants. The Exchange anticipates that the initial warrant issue will be based upon a swap rate ("Swap Rate")[1] prevailing in one of the "G–7 nations."[2]

Regulatory framework applicable to interest rate warrants. Interest rate warrants will conform to the listing guidelines under Section 106 of the Amex Company Guide, which provide that:

(1) The issuer shall have assets in excess of U.S. $100,000,000 and otherwise substantially exceed the size and earnings requirements of Section 101(a) of the Amex Company Guide;

(2) The term of the warrants shall be for a period ranging from one to five years from date of issuance; and

(3) The minimum public distribution of such issues shall be 1,000,000 warrants with 400 public holders and an aggregate market value of US$4,000,000.

Interest rate warrants will be direct obligations of their issuer subject to cash settlement in U.S. dollars, and exercisable either throughout their life (*i.e.*, American style) or exercisable only at expiration (*i.e.*, European style). Upon exercise, or at the warrant expiration date (if not exercisable prior to such date), the holder of a warrant will be entitled to a cash settlement value computed in accordance with a formula specified in the issuer's prospectus. If "out of the money" at the time of expiration, the warrants will expire worthless.

The Amex will apply the same regulatory framework to interest rate warrants as applicable to currency warrants. The Amex will require that member firms only may sell interest rate warrants to investors whose accounts have been approved for options trading pursuant to Amex Rule 921. The Exchange also will distribute a circular to its membership prior to the commencement of trading calling attention to the risks associated with the purchase and trading of interest rate warrants.

Description of proposed swap rate warrant. The Exchange anticipates that the first issue of interest rate warrants listed on the Exchange would entitle the holder to receive from the issuer upon exercise an amount in U.S. dollars computed on the applicable valuation date by reference to a formula ("Formula") specifying a notional amount, times a multiplier, times the specified current Swap Rate less the specified Swap Rate at the time of exercise.

According to the Exchange, the proposed warrant would permit investors forecasting a decline in the applicable interest rate to take a bullish position with a small initial investment, a leveraged payout at maturity, and an investment risk limited to the purchase price.[3]

It is anticipated that the proposed warrants would have a one year term and a European style exercise. The spot rate at the valuation date would be determined by reference to the Swap Rate as reflected in market quotes contained on an accepted page on Reuters or Telerate.[4]

The Exchange will consult with the SEC staff prior to listing interest rate warrants where: (1) The warrants are based upon interest rates prevailing in non-G–7 nations, (2) the formula for determining the payment to holders on exercise differs from the Formula stated above, or (3) the method for determining the spot interest rate at expiration is derived from a source other than a recognized independent vendor of financial information.

(2) Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act, in general, and furthers the objectives of Section 6(b)(5) in particular, in that it is designed to prevent fraudulent and manipulative acts and practices and to promote just and equitable principles of trade, and is not designed to permit unfair discrimination between customers, issuers, brokers, and dealers.

(B) Self-Regulatory Organization's Statement on Burden on Competition

The Amex does not believe that the proposed rule change will impose any inappropriate burden on competition.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC. Copies of such filing will also be available for inspection and copying at the principal office of the Amex. All submissions should refer to File No. SR–Amex–93–38 and should be submitted by December 20, 1993.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[5]

Margaret H. McFarland,

Deputy Secretary.

[FR Doc. 93–29112 Filed 11–26–93; 8:45 am]

BILLING CODE 8010–01–M

[1] A swap rate, for purposes of this filing, represents the fixed interest rate that a swap dealer is willing to receive from a counterparty versus paying a floating rate based on LIBOR (London Interbank Offered Rate) for a given term in a specified currency.

[2] The "G–7 nations" are: Canada; France; Germany; Italy; Japan; the United Kingdom; and the United States.

[3] Since all payments are in U.S. dollars, there would be no currency risk except to the extent that fluctuations in the value of the relevant currency affect the specified Swap rate.

[4] Swap Rates are widely quoted by dealers and brokers and are available through Telerate and Reuters. The Amex anticipates that the first warrant issue will determine the spot rate at valuation by utilizing a Swap Rate calculated by International Financial Review ("IFR"), a publisher of financial information. IFR calculates a daily Swap Rate by polling swap dealers to determine the rate that the dealers are willing to pay or receive from counterparties with respect to a fixed versus floating interest rate swap. IFR assembles this information and, excluding the received high and low quotes, publishes the average of the remaining quotes on Telerate.

[Rel. No. IC–19888; 812–8644]

Boston Capital Tax Credit Fund IV, et al.; Application for Exemption

November 19, 1993.

AGENCY: Securities and Exchange Commission ("SEC" or "Commission").

ACTION: Notice of application for exemption under the Investment Company Act of 1940 (the "Act").

APPLICANT: Boston Capital Tax Credit Fund IV L.P., a Delaware limited partnership (the "Partnership"), and its general partner, Boston Capital Associates IV L.P., a Delaware limited partnership (the "General Partner").

RELEVANT ACT SECTION: Exemption requested under section 6(c) of the Act from all provisions of the Act.

SUMMARY OF APPLICATION: Applicants seek an order that would exempt the Partnership from all provisions of the Act. The order would permit the Partnership to invest in limited partnerships that engage in the ownership and operation of housing for low and moderate income persons.

FILING DATE: The application was filed on October 20, 1993.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the SEC orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving applicants with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on December 14, 1993, and should be accompanied by proof of service on applicants, in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons may request notification of a hearing by writing to the SEC's Secretary.

ADDRESSES: Secretary, SEC, 450 5th Street, NW., Washington, DC 20549. Applicants: 313 Congress Street, Boston, Massachusetts 02210–1232.

FOR FURTHER INFORMATION CONTACT: Deepak T. Pai, Law Clerk, at (202) 272–3809, or Robert A. Robertson, Branch Chief, at (202) 272–3030 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee at the SEC's Public Reference Branch.

Applicants' Representations

1. The Partnership was organized on October 5, 1993, under the Delaware Revised Uniform Limited Partnership Act. The Partnership is intended to serve as a vehicle for equity investment in apartment complexes to be qualified for the low income housing tax credit under the Internal Revenue Code of 1986, as amended (the "Code").

2. The Partnership will operate as a "two-tier" entity, *i.e.*, the Partnership will invest as a limited partner in operating partnerships, which will acquire, operate and maintain the apartment complexes in accordance with the purposes and criteria set forth in Investment Company Act Release No. 8456 (August 9, 1974) ("Release No. 8456").

3. The Partnership's investment objectives are to realize (a) certain tax benefits including low-income housing tax credits, (b) potential capital appreciation through increases in value and, to the extent applicable, amortization of the mortgage indebtedness of the apartment complexes, (c) cash distributions for liquidation, sale or refinancing of the apartment complexes (except with respect to certain non-profit operating partnerships) and (d), to the extent available, limited cash flow from operations.

4. On October 19, 1993, the Partnership filed a registration statement under the Securities Act of 1933 (the "Securities Act"), for the sale of approximately 30,000,000 units of beneficial interest ("Units") at $10.00 per Unit with a minimum investment of $5,000 per investor.

5. Subscriptions for Units will be made conditional upon representations as to suitability of the investment for each subscriber. The form of subscription agreement for Units provides that each subscriber will represent, among other things, that he meets the general investor suitability standards established by the Partnership and set forth in the prospectus. Units will be sold in certain states only to persons who meet different standards which will be set forth in the prospectus. In no event shall the Partnership employ any such suitability standards which are less restrictive than those set forth in the application. The partnership agreement also imposes certain restrictions on the transfer and assignment of the Units, including that each proposed assignee must produce evidence of his suitability. The Partnership does not anticipate formation of a public market for the Units, and thus believes purchase of Units should be considered illiquid investments.

6. The Partnership will be controlled by the General Partner, Boston Capital Associates IV L.P. The limited partners, consistent with their limited liability status, will not be entitled to participate in the control of the Partnership's business. However, the majority in interest of the limited partners will have the right (subject to certain limitations) to amend the partnership agreement, dissolve the Partnership, and remove the General Partner and elect a replacement therefor. In addition, under the partnership agreement, each investor is entitled to review all books and records of the Partnership at any and all reasonable times.

7. The partnership agreement provides that certain significant actions cannot be taken by the General Partner without the express consent of a majority in interest of the limited partners. Such actions include: (a) sale at any one time of all or substantially all of the assets of the Partnership; (b) dissolution of the Partnership; (c) sale of a substantial portion of the apartment complexes by the operating partnerships; and (d) the admission of a successor or additional general partner.

8. The Partnership will normally attempt to acquire between 90% and 99% interest in the operating profits, losses and tax credits of each operating partnership, with the balance remaining with the operating general partner. The Partnership will normally attempt to acquire a substantial (50% to 99%) interest in the cash distributions of each operating partnership, with the balance remaining with the operating general partner. Regardless of the percentage interest the Partnership has in an operating partnership, the operating partnership agreement will include the right to: Approve or disapprove the sale or refinancing of the apartment complex; replace the operating general partner; approve or disapprove the dissolution of the operating partnership; approve or disapprove amendments to the operating partnership agreement; and direct the operating general partners to convene meetings and submit matters to a vote. The Partnership is expected to have access to the books and records of the operating partnership and to receive annual and quarterly reports. In addition, the Partnership will require that all operating partnerships provide to the limited partners substantially all of the rights required by section VII of the guidelines adopted by the North American Securities Administrators Association, Inc. ("NASAA").

9. Boston Capital Services, Inc. will receive commissions up to 7% of the aggregate gross proceeds on the sale of Units. Boston Capital Services also will receive an expense allowance of up to .5% of the gross proceeds to defray

accountable due diligence activities, up to a 2% dealer-manager fee, up to 1% for sales expenses, and an asset acquisition fee of up to 8.5%.

10. All compensation to be paid to the General Partner and its affiliates is specified in the partnership agreement and the prospectus. The fees and other forms of compensation that will be paid to the General Partner and its affiliates will not have been negotiated through arms-length negotiations. Terms of all such compensation, however, are believed by applicants to be fair and not less favorable to the Partnership than would be the case if such terms had been negotiated with independent third parties. Applicants state that the Partnership believes that such compensation meets all applicable guidelines necessary to permit the Units to be offered and sold in the various states which prescribe such guidelines. These guidelines include, without limitation, the statement of policy adopted by NASAA applicable to real estate programs in the form of limited partnerships.

11. All proceeds of the public offering of Units will initially be placed in an escrow account with the Wainwright Bank & Trust Company ("Escrow Agent"). The offering of Units will terminate approximately 24 months from the date upon which the Partnership's registration statement is declared effective. If subscriptions for at least 250,000 Units have not been received by one year from the date upon which the Partnership's registration statement is declared effective, no Units will be sold and funds paid by subscribers will be returned promptly, together with a *pro rata* share of any interest earned thereon. Upon receipt of the prescribed minimum number of subscriptions, funds in escrow will be released to the Partnership and held in trust pending investment in operating partnership interests. Any net proceeds not utilized to acquire operating partnership interests will be invested and held in highly liquid, nonspeculative securities, which provide adequately for the preservation of capital. The Partnership intends to apply capital raised in its public offering to the acquisition of operating partnership interests as soon as possible.

Applicants' Arguments

1. Section 6(c) authorizes the SEC to grant an exemption from the Act to the extent "necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of [the Act]." Applicants seek an order under section 6(c) exempting the Partnership from all provisions of the Act.

2. Applicants assert that the requested relief is consistent with the protection of investors and the purposes and policies underlying the Act. Applicants assert, among other things, that investment in low and moderate income housing in accordance with the national policy expressed in title IX of the Housing and Urban Development Act of 1968 is not economically suitable for private investors without the tax and organizational advantages of the limited partnership form.

3. Release No. 8456 lists two conditions, designed for the protection of investors, which must be satisfied in order to qualify for the type of exemptive relief which the Partnership seeks: (a) "Interests in the issuer should be sold only to persons for whom investments in limited profit, essentially tax-shelter, investments would not be unsuitable"; and (b) "requirements for fair dealing by the General Partners of the issuer should be included in the basic organizational documents of the company." The Partnership will comply with these conditions and will otherwise operate in a manner designed to insure investor protection. Interests in the Partnership will be sold only to, and transfers will be permitted only to, investors who meet specified suitability standards which the Partnership believes are consistent with the requirements in Release No. 8456, with the guidelines of those states which prescribe suitability standards, and with the securities laws of all states where the Units will be sold. Such investors will receive extensive reports concerning the Partnership's business and operations. In addition, all compensation to be paid to the General Partner and its affiliates is specified in the partnership agreement and the prospectus.

4. Applicants believe that the Partnership is not susceptible to the abuses the Act was designed to remedy. The suitability standards, the requirements for fair dealing provided by the Partnership's governing instruments, and the pertinent governmental regulations imposed on each operating partnership by various federal, state and local agencies, provide protection to investors in Units comparable to that provided by the Act.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010–01–M

[Release No. 35–25929]

Filings Under the Public Utility Holding Company Act of 1935 ("Act")

November 19, 1993.

Notice is hereby given that the following filing(s) has/have been made with the Commission pursuant to provisions of the Act and rules promulgated thereunder. All interested persons are referred to the application(s) and/or declaration(s) for complete statements of the proposed transaction(s) summarized below. The application(s) and/or declaration(s) and any amendments thereto is/are available for public inspection through the Commission's Office of Public Reference.

Interested persons wishing to comment or request a hearing on the application(s) and/or declaration(s) should submit their views in writing by December 13, 1993, to the Secretary, Securities and Exchange Commission, Washington, DC 20549, and serve a copy on the relevant applicant(s) and/or declarant(s) at the address(es) specified below. Proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. Any request for hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in the matter. After said date, the application(s) and/or declaration(s), as filed or as amended, may be granted and/or permitted to become effective.

New England Energy Incorporated (70–7055)

New England Energy Incorporated ("NEEI"), 25 Research Drive, Westborough, Massachusetts 01582, an electric public-utility subsidiary company of New England Electric System ("NEES"), a registered holding company, have filed a post-effective amendment under sections 9(a) and 10 of the Act to their application-declaration filed under sections 9(a) and 10 of the Act.

By order dated October 30, 1974 (HCAR No. 18635), among other things, NEEI was authorized to enter into a partnership ("Partnership") with Samedan Oil Corporation ("Samedan"),

a subsidiary of Noble Affiliates, Inc., both unaffiliated companies. The Partnership was formed to explore for and develop oil and gas prospects in order to provide a fuel supply for NEES system companies.

An order dated July 19, 1978 (HCAR No. 20632) authorized NEEI's methods of accounting for the costs (including capital costs) of its oil and gas exploration and development program. The methods of accounting were devised for the purpose of amortizing the costs and determining the prices at which NEEI sold fuel to New England Power Company ("NEPCO"), an affiliated electric public-utility company, pursuant to section 13(b) of the Act ("Pricing Policy"). These costs include a return prescribed by the Commission on the equity investment in NEEI maintained by NEES from time-to-time. Under the Pricing Policy, the proceeds from the sale to nonaffiliates of production from all of NEEI's properties were applied first to recovery of amortization and production costs. Any excess was passed on to NEPCO through a reduction in the price charged by NEEI for fuel sold to NEPCO under a fuel purchase contract ("Purchase Contract"). Any deficiency in such proceeds below NEEI's costs was recoverable by NEEI from NEPCO by an addition to the price for fuel sold to NEPCO under the Purchase Contract.

An order dated October 22, 1985 (HCAR No. 23873) amended the Pricing Policy ("Modified Pricing Policy"). Among other things, the Modified Pricing Policy was made applicable only to oil and gas prospects recorded on NEEI's books prior to January 1, 1984 ("Pre-1984 Prospects"). All costs of the Pre-1984 Prospects, including exploration and development costs and capital costs, but excluding any return after 1982 on equity invested in the program, were capitalized into a full cost pool ("Full Cost Pool"). Amortization of the Full Cost Pool, in combination with low oil and gas prices, resulted in losses which were passed through to NEPCO and under the Purchase Contract in accordance with the Modified Pricing Policy. NEPCO was allowed to recover from its customers all amounts which it paid to NEEI in connection with the Pre-1984 Prospects.

By an amendment to the Partnership agreement dated February 5, 1985, NEEI elected not to participate in new oil and gas prospects initiated by Samedan after December 31, 1986, but NEEI remained obligated to pay its share of expenses for exploration, development and production of prospects acquired on or before December 31, 1986.

By order dated October 3, 1991 (HCAR No. 25390) ("1991 Order"), NEEI was authorized to contribute, through December 31, 1993, up to $30 million to the Partnership. The 1991 Order reserved jurisdiction over NEEI's proposal to contribute an additional $15 million to the Partnership through December 31, 1993.

Of this amount, NEEI states that it has used approximately $9 million. NEEI states that it plans to invest up to a total of $15 million in the Partnership, primarily to develop Old Prospects, during 1994.

NEEI now proposes to invest, through December 31, 1994, up to $15 million in the Partnership. NEEI does not request authorization for additional amounts of investment funds. Rather, NEEI proposes to use up to $15 million of its remaining, outstanding investment authorization, as extended by further Commission authorization requested herein.

CSW Credit, Inc., et al. (70–7113/70–7218)

CSW Credit, Inc. ("CSW Credit"), a non-utility subsidiary of Central and South West Corporation ("CSW"), a registered holding company, and CSW, both of 1616 Woodall Rodgers Freeway, Dallas, Texas 75202, have filed a post-effective amendment under sections 6(a), 7, 9(a), 10 and 12(b) of the Act and Rules 42, 44, 50 and 50(a)(5) thereunder to its application-declaration filed with this Commission under sections 6(a), 7, 9(a), 10 and 12(b) of the Act and Rules 45 and 50(a)(5) thereunder.

By order dated July 19, 1985 (HCAR No. 23767) (File No. 70–7113) ("1985 Order"), CSW was authorized, among other things, to organize CSW Credit to purchase the accounts receivable of the operating companies of CSW at a discount and to finance these purchases with the issuance and sale of debt. CSW Credit was authorized to borrow up to $320 million, and CSW was authorized to make equity investments in CSW Credit of up to an aggregate of $80 million through December 31, 1986.

By order dated July 31, 1986 (HCAR No. 24157) (File No. 70–7218) ("1986 Order"), CSW Credit was authorized to expand its business to the factoring of accounts receivable of nonaffiliated electric utility companies. In order to finance such transactions, CSW Credit was authorized to borrow up to an additional $160 million and CSW to make additional equity investments in CSW Credit of up to an aggregate of $40 million, through December 31, 1988. The 1986 Order also provided that CSW Credit limit its acquisition of utility receivables from nonassociate utilities so that the average amount of such receivables for the preceding twelve-month period outstanding as of the end of any calendar month would be less than the average amount of receivables acquired from CSW associate companies outstanding as of the end of each calendar month during the preceding twelve-month period ("50% Restriction"). Further, the 1986 Order extended the authority of the 1985 Order until December 31, 1988.

By order dated February 8, 1988 (HCAR No. 24575) (File Nos. 70–7113 and 70–7218) ("1988 Order"), CSW Credit was authorized, among other things, to factor the accounts receivable of nonaffiliated utility companies, subject to the 50% Restriction, and CSW Credit also was authorized to borrow, through December 31, 1989, up to $320 million and $304 million to finance the factoring of affiliate and nonaffiliate receivables, respectively. CSW was authorized to make equity investments in CSW Credit of up to an aggregate of $80 million and $76 million in connection with the factoring of affiliate and nonaffiliate receivables, respectively.

The authority from the 1988 Order was extended through December 31, 1990 by order dated December 27, 1989 (HCAR No. 25009) ("1989 Order"). In addition, the 1989 Order authorized a reduction in CSW Credit's equity ratio requirement from approximately 20% to no less than 15%.

By order dated August 30, 1990 (HCAR No. 25138), CSW Credit was authorized to lower its equity ratio to no less than 5%.

By orders dated December 21, 1990, December 24, 1991 ("1991 Order"), and December 9, 1992 (HCAR Nos. 25223, 25443, and 25698, respectively), CSW Credit's existing authority was extended through December 31, 1991, December 31, 1992, and December 31, 1993, respectively. In addition, the 1991 Order granted CSW Credit the authorization to borrow up to an additional $200 million to finance the factoring of associate receivables.

Pursuant to the orders ("Orders") summarized above, the following authority has been granted: (1) CSW Credit has been authorized to borrow $824 million, of which $520 million could be used to purchase receivables of affiliated companies and $304 million could be used to purchase receivables of nonaffiliated companies; and (2) CSW has been authorized to make equity investments in CSW Credit of up to an aggregate of $156 million, of which $80 million could be used to purchase receivables of affiliated companies and

$76 million could be used to purchase receivables of nonaffiliated companies.

It is stated that the specific terms and conditions applicable to CSW Credit's borrowings are subject to negotiation with the particular lender or lenders. However, CSW Credit states that, without prior approval of the Commission, such terms and conditions will be no less favorable than the following, or, with respect to commercial paper, the equivalent thereof: (1) The principal amount of such borrowings from time to time outstanding shall bear interest at a rate up to the prime commercial rate plus 2% of the lending bank; (2) CSW Credit will be required either (a) to keep an amount equal to 5% of the commitment amount in the form of a depository relationship with the lending bank or (b) to pay to the lending bank a commitment fee of ½% per annum of the amount of the commitment of such lending bank; (3) CSW Credit will be allowed to prepay at any time all or any part of the outstanding principal amount of such borrowings without penalty; (4) no such borrowings will have a term in excess of 10 years; and (5) the other terms and conditions of the borrowings will be substantially equivalent to those authorized with respect to the CSW money pool, as authorized by HCAR Nos. 25777 and 25897 (March 31 and September 28, 1993, respectively).

For the twelve months ended September 30, 1993, CSW Credit had outstanding receivables purchases from affiliated companies of $364 million and from nonaffiliated companies of $24 million. (The outstanding receivable purchases from non-affiliated companies does not include the $267 million average receivable purchases for the twelve months ended September 30, 1993 from Houston Lighting and Power Company authorized by order dated December 29, 1992 (HCAR No. 25720).) Also, as of September 30, 1993, the amount of remaining authority that CSW Credit had available to purchase receivables from affiliated companies was $156 million and nonaffiliated companies was $280 million.

CSW Credit and CSW now propose to extend, through December 31, 1994, the authorization under the previously granted Orders.

National Fuel Gas Company, et al. (70–7376)

National Fuel Gas Company ("NFG"), 30 Rockefeller Plaza, New York, New York 10112, a registered public utility holding company, and Utility Constructors, Inc. ("UCI"), East Erie Extension, Linesville, Pennsylvania 16424, a wholly-owned non-utility subsidiary of NFG, have filed a post-effective amendment under sections 9(a) and 10 of the Act and section 2(b) of the Gas Related Activities Act of 1992 ("GRAA") to their application-declaration under sections 9(a) and 10 of the Act.

By order dated May 1, 1987 (HCAR No. 24381) ("May 1987 Order"), NFG was authorized to acquire 100% of the capital stock of UCI. UCI's operations involve the construction of new and replacement pipelines, well drilling and maintenance services, and site construction and auxiliary services. As authorized by the May 1987 Order, these services are provided to other NFG system subsidiaries and to non-associate companies.

Under the terms of the May 1987 Order, the Commission required that, during each three-year period following NFG's acquisition of UCI, the total revenues received by UCI from non-associate companies should be less than the total revenues received by UCI during the same period from associate companies ("50% Restriction"). From the date of NFG's acquisition of UCI through the end of its 1991 fiscal year (September 30, 1991), billings by UCI for construction and related services undertaken on behalf of NFG system companies represented about 54% of UCI's total revenues. However, during the 1992 fiscal year, billings to associate companies totalled approximately $4,364,000, and billing to non-associated companies totaled approximately $24,692,000, or approximately 85% of total revenues.

NFG proposes to continue the operations of UCI absent the Commission's 50% Restriction, as imposed by the May 1987 Order, by authority of section 2(b) of the GRAA. However, in the interests of investors, consumers and the proper functioning of the NFG system, UCI's activities will be limited to a geographic area comprised of the following states: Illinois, Indiana, Maryland, Michigan, New Jersey, New York, Ohio, Pennsylvania, Virginia and West Virginia.

General Public Utilities Corp., et al. (70–7727)

General Public Utilities Corporation ("GPU"), a registered holding company, 100 Interpace Parkway, Parsippany, New Jersey 07054, General Portfolios Corporation ("GPC"), Mellon Bank Center, Tenth and Market Streets, Wilmington, Delaware 19001, and Energy Initiatives, Inc. ("EII") (collectively, "Applicants"), One Upper Pond Road, Parsippany, New Jersey 07054, have filed a post-effective amendment under sections 6(a), 7, 9(a), 10, 12(b), and 33 of the Act and Rule 45 thereunder to their application-declaration under sections 6, 7, 9(a), 10, 12(b), and 12(c) of the Act and Rules 42, 45, 46, and 50(a)(5) thereunder.

By orders dated December 18, 1992 (HCAR No. 25715) ("1992 Order") and June 16, 1990 (HCAR No. 25108), the Commission authorized EII to, among other things, engage in preliminary project development and administrative activities ("Project Activities") in connection with its investments in qualifying generation and small power production facilities, as defined in the Public Utility Regulatory Policies Act of 1978, located anywhere in the United States, and exempt wholesale generators, as defined in section 32 of the Act, as amended by the Energy Policy Act of 1992, located in the United States and in foreign countries (collectively, "Projects"). The 1992 Order also authorized GPU, from time to time through December 31, 1994, to make capital contributions to GPC, which GPC would in turn make available to EII, in an aggregate amount of up to $60 million, for use by EII in connection with Project Activities. EII now proposes to engage in Project Activities for "foreign utility companies," as defined in section 33 of the Act.

The 1992 Order also authorized GPU and GPC from time to time through December 31, 1994, to enter in (i) letter of credit reimbursement agreements ("Reimbursement Agreements") in connection with irrevocable bank letters of credit ("LOC") furnished by EII as security for EII's agreements with project lenders to investment in particular projects and (ii) guarantees or similar obligations ("Guarantees") securing EII's agreements with lenders to make investments in particular projects.

The Applicants now propose to, from time to time through December 31, 1994, enter into Reimbursement Agreements in connection with Project Activities and acquisition of interests in Projects. In addition, GPU and GPC propose to enter into Guarantees, through December 31, 1994, for the same purposes. Drawings on the LOCs would bear interest at not more than 5% above the prime rate as in effect from time to time and any letter of credit fees would not exceed 1% annually of the face amount of the LOC. The total principal amount of Reimbursement Agreement and Guarantee obligations outstanding at any one time, together with the aggregate amount of cash capital contributions, will not exceed

$60 million. In addition, the total principal amount of Reimbursement Agreement obligations incurred by EII for which authorization is sought, together with the aggregate principal amount of borrowings incurred by EII as described below, would not exceed $10 million outstanding at any one time.

EII also proposes to issue, sell and renew from time to time through December 31, 1994 its promissory notes evidencing short-term borrowings from commercials banks and other financial institutions, in an aggregate principal amount at any one time outstanding (together with the aggregate amount of obligations outstanding under Reimbursement Agreements entered into by EII) not exceeding $10 million. Such notes would mature not later than nine months after issuance, bear interest at a rate (after giving notice to any fees and compensating balance requirements) not in excess of 125% of the lending bank's or other recognized prime rate, and would be prepayable only to the extent provided therein. In addition, such borrowings would be unsecured (except as described below) and would not be made as part of any public offering. Borrowings may be made pursuant to loan participation arrangement or lines of credit established by EII with commercial banks. (Such arrangements or lines of credit may include a letter of credit facility which would permit EII to obtain LOCs for the purposes and having the terms described above, in the aggregate face amount, together with the aggregate principal amount borrowed, not to exceed $10 million.)

To enable EII to effect short-term borrowings on more favorable rates and terms, GPU proposes from time to time through December 31, 1994 to enter into Guarantees with the lenders to secure EII's obligation to repay such borrowings (including pursuant to any letter of credit facility as described above). The total principal amount so guaranteed by GPU would not exceed $10 million, and would be in addition to the $60 million authorized under the 1992 Order.

Finally, in view of its expanding business operations, EII believes that it would be appropriate to consolidate its operation and maintenance services provided to affiliates and nonaffiliates within a wholly owned subsidiary of EII to be formed ("Services Sub"). Accordingly, EII proposes to acquire for $1,000 all of the capital stock of Services Sub, a Delaware corporation to be formed, and to contribute up to $1 million to Services Sub from time to time through December 31, 1994 to provide temporary working capital.

Consolidated Natural Gas Company, et al. (70–7761)

Consolidated Natural Gas Company ("CNG"), a registered holding company, its wholly-owned, nonutility subsidiary, CNG Energy Corp ("CNG Energy"), and CNG Technologies, Inc. ("CNGT"), a wholly owned non-utility subsidiary company of CNG Energy, each located at the CNG Tower, 625 Liberty Avenue, Pittsburgh, Pennsylvania 15222–3199, have filed a post-effective amendment to their application-declaration under sections 6(a), 7, 9(a), 10 and 12(b) of the Act and Rules 43, 45 and 50 thereunder.

By order dated December 21, 1990 (HCAR No. 25224) ("1990 Order"), CNG Energy was authorized to establish CNG Technologies ("CNGT"), a wholly-owned limited purpose subsidiary, to pursue and support the development of new gas related technologies. Pursuant to section 2(a) of the Gas Related Activities Act of 1990, Public Law 101–572 (1990), the Commission also authorized CNG Energy in the 1990 Order to acquire partnership interest in EnerTex Partners, L.P. ("EnerTek" or "Partnership"), for $2 million. EnerTek is a gas industry fund that invests in smaller companies developing innovative products, processes and techniques that enhance the supply, transportation and utilization of natural gas, and to assign its interest in EnerTek to CNGT.

To fund its investment in EnerTek, the Commission authorized CNGT through December 31, 1993 to issue and sell its common stock to and/or obtain a long-term loan from EnerTek, in any combination thereof, in an aggregate outstanding amount not to exceed $2 million. To support this funding, the Commission further authorized EnerTek through December 31, 1993 to issue and sell its common stock to and/or obtain a long-term loan from CNG, in any combination thereof, in an aggregate outstanding amount not to exceed $2 million. As of September 30, 1993, CNGT has invested $1 million in EnerTek.

To enable it to fulfill its obligation to invest a total of $2 million in the Partnership, CNG Energy and CNGT now seek an extension of the 1990 Order authorizations through December 31, 1995. Accordingly, CNGT requests authorization, from time-to-time through December 31, 1995, to issue and sell its common stock to CNG Energy, and/or obtain long-term loans from CNG Energy, in any combination thereof, in an aggregate outstanding amount not to exceed $2 million. CNG Energy, in turn, proposes, from time-to-time through December 31, 1995, to issue and sell its common stock, $1,000 par value per share, to CNG and/or obtain long-term loans from CNG, in any combination thereof, in an aggregate outstanding amount not to exceed $2 million.

Long-term loans to CNGT by CNG Energy and/or to CNG Energy by CNG shall be evidenced by long-term non-negotiable notes of CNG Energy or CNGT (documented by book entry only) maturing over a period of time not in excess of 30 years. The interest borne by such loans shall not exceed CNG's cost of funds for comparable borrowings by CNG. In the event CNG has not had recent comparable borrowings, the rates will not exceed the Solomon Brothers Inc. indicative rate for comparable debt issuances published in Solomon Brothers Inc. Bond Market Roundup or similar publication on the date nearest to the time of takedown.

CNG will obtain the funds required for CNG Energy through internal cash generation, issuance of long-term debt securities, borrowings under credit agreements or through other authorizations approved by the Commission subsequent to the effective date of this application-declaration.

Georgia Power Company (70–8085)

Georgia Power Company ("Georgia Power"), 333 Piedmont Avenue, NE., Atlanta, Georgia 30308, an electric public-utility subsidiary of The Southern Company, a registered holding company, has filed an application requesting that an order be issued that finds that it is exempt from section 9(a) of the Act pursuant to section 9(c)(3).

Georgia Power proposes to invest up to $5 million to acquire all of the limited partnership units of ATV/GP Parallel Fund, Limited Partnership, a Delaware limited partnership ("Partnership") to be formed for the purpose of making venture capital investments in high-technology companies located in Georgia Power's service territory. The Partnership will operate in tandem with the Alliance Technology Ventures, Limited Partnership ("Ventures"), also a Delaware limited partnership, and at least one other parallel partnership.

Initially, the sole general partner ("General Partner") of the Partnership and of Ventures will be Michael A. Henos, a professional fund manager who has managed other venture capital funds similar to the Partnership. The General Partner will enter into a management agreement (the "Management Agreement") with Alliance Technology Management Corp., which is wholly-owned by Mr. Henos.

The organization of Ventures and the parallel partnership funds is being sponsored by the Georgia Research Alliance ("GRA"), a public-private effort supported by Georgia's research universities and business community. The GRA was created to promote science and technology-driven economic development in Georgia, particularly in the areas of advanced telecommunications, environmental technologies and genetics.

The objective of Ventures is to supply early stage venture capital to start-up companies organized to commercialize these and other new technologies, generally described as information and life sciences technologies. Through such investments, Ventures will help to stimulate business activity and economic development, primarily in Georgia, including the creation and retention of jobs, while seeking to realize attractive returns on invested funds.

Although the investments selected by Ventures will be Georgia-focused as well as focused on technologies which have been supported by the GRA, Ventures may, in appropriate cases, consider investment opportunities outside of Georgia in order to obtain superior returns and the benefits of geographical diversity. However, the general partner ("General Partner") may invest the capital of the Partnership only in companies which have (or propose to have) their principal executive offices or substantial operations within the state of Georgia. Further, under no circumstances will the Partnership acquire the securities of any "public utility company," "electric wholesale generator," or "foreign utility company," as defined under the Act, or of any "qualifying facility," as defined under the Public Utility Regulatory Policies Act.

The selection of the General Partner and fund manager ("Fund Manager") and negotiation of the terms of the separate partnership agreements and management agreement have been carried out under the guidance of the GRA executive committee. William Dahl, President and chief executive officer of Georgia Power, has served as a member of the GRA executive committee.

It is the objective of the General Partner and the GRA executive committee to establish a combined fund of $30 to $60 million. Aggregate commitments for at least $25 million of the partnership units to be offered by Ventures and any parallel partnership are required before the initial closing will occur. During the six months following the initial closing, if aggregate subscriptions of all limited partners are less than $60 million the General Partner may solicit subscriptions from additional limited partners. The offering of limited partnership interests by Ventures and the Partnership is intended to qualify as a private placement of securities that is exempt from registration under the federal securities laws.

The obligations of Ventures and each parallel partnership, including the Partnership, to fund investments in each qualifying venture selected by the General Partner will be in proportion to the aggregate of the "uninvested subscriptions" in each respective partnership. Thus, assuming aggregate commitments of all limited partners equal to $30 million, the Partnership would be obligated to advance ⅙ of the funds needed for any particular investment. However, should Ventures at any time elect to invest in a non-Georgia venture, the Partnership's proportionate "uninvested subscription" would automatically increase. Thus, if the General Partner were subsequently to select a qualifying Georgia-based investment, the partnership's percentage commitment would be proportionately greater. In this way, the investments by Ventures and each parallel partnership would be maintained approximately in the same proportion as their respective initial subscriptions.

In certain respects, actions that may be taken by the General Partner will require the consent of Georgia Power, as limited partner. Specifically, no term or provision of the partnership agreement may be waived, modified or amended, unless Georgia Power shall have given its written consent. Similarly, the Management Agreement may not be amended without the consent of Georgia Power.

It is intended that the Partnership and any other parallel partnership will be managed and operated in tandem with Ventures. Thus, certain actions of the General Partner that could have an effect upon the Partnership may require prior approval of the limited partners of Ventures (rather than Georgia Power) or of an advisory committee of Ventures ("ATV's Advisory Committee"). These actions include the right to:

(1) Resolve certain issues relating to potential conflicts of interest;

(2) Approve or disapprove of proposed valuations of assets, particularly with reference to valuations of securities which are deemed to be "freely tradeable";

(3) Approve or disapprove of any investments that would deviate from specified investment limitations; and,

(4) Approve any proposal by the General Partner to incur debt or make guarantees in an amount exceeding 10% of the aggregate subscriptions of all partners of the Partnership, or to reinvest proceeds attributable to the disposition of a Partnership investment.

The term of the Partnership shall be for ten years (until December 31, 2003). However, the term would be extended automatically for up to two additional two year periods if the limited partners of Ventures consent to the extension of the term of Ventures. Likewise, a voluntary or forced withdrawal of the General Partner under Ventures' partnership agreement would result automatically in a withdrawal of the General Partner under the Partnership Agreement.

The General Partner will make a capital commitment to the Partnership equal to 1% of the aggregate commitments of the partners. The balance of the contributed capital will be provided by Georgia Power, as the sole limited partner. At the initial closing, scheduled for December 15, 1993, the partners of Ventures and each parallel partnership (including the Partnership) will be obligated to contribute 10% of their commitments. Thereafter, during each succeeding twelve month period, the General Partner may call an amount not to exceed 22½% of the aggregate commitments of the partners.

All Partnership gains and losses (including gains and losses deemed to have been realized when securities are distributed in kind) will generally be allocated 80% to and among all partners in proportion to their respective capital contributions and 20 percent to the General Partner. Cash distributions to Georgia Power and the General Partner shall be made each year in an amount equal to their tax liability with respect to their interest in the Partnership. Cash distributions in excess of that amount shall then be made in the discretion of the General Partner in proportion to the partners' capital contributions until such time as Georgia Power shall have received aggregate distributions equal to its subscription. Except as may be approved by ATV's Advisory Committee, all distributions must be made in cash or in freely tradeable securities.

Georgia Power will not acquire directly or indirectly any interest in Ventures. Profits, losses and distributions to Georgia Power will be based solely upon the performance of the Partnership, without regard to the investment performance of Ventures.

Under the terms of the Management Agreement, the Management Company

will be reimbursed for all expenses incurred in connection with the organization of Ventures, the Partnership, and any other parallel partnership (which will include marketing costs, costs of outside counsel, and costs associated with the initial closing) in an amount not to exceed $400,000.

In addition, the Partnership will be obligated to pay an annual management fee equal to 2½% of the total commitment of the partners to the Partnership ("Base Amount").

The Base Amount will be reduced commencing on the seventh anniversary of the initial closing by an amount equal to the cost basis of securities distributed in kind to the partners, securities deemed to be worthless, and securities with respect to which the Partnership has realized a capital gain.

The management fee will cover the Partnership's share of all normal operating expenses of the Management Company, including costs of investigating and negotiating individual investments; fees and expenses of outside consultants relating to Partnership investments and portfolio management; fees and expenses of officers and employees of the Management Company; and other general and administrative costs. So long as the Management Agreement shall remain in effect, the General Partner will not be entitled to receive any salary from Ventures or the Partnership.

Georgia Power states that, as a limited partner of the Partnership, it will not acquire any "voting securities," as that term is defined in section 2(a)(17) of the Act. Thus, Georgia Power states, the Partnership will not be an "affiliate" or "subsidiary company" of Georgia Power within the meaning of the Act. Specifically, Georgia Power states, it will not be entitled to take part in the control, management of investment decisions of the Partnership or, through the Partnership, the control or management of any company in which the Partnership may invest. Georgia Power further states that, as a limited partner, it will only be entitled to receive notices and other information from the General Partner, to inspect the Partnership's books and records, and to vote on a limited number of actions that could fundamentally change the structure and purposes of the Partnership and its relationship with the General Partner and Ventures. Georgia Power also states that, as a limited partner of the Partnership, it will have no independent right to remove the General Partner, for cause or otherwise.

Monongahela Power Company, et al. (70–8259)

Monongahela Power Company ("Monongahela"), 1310 Fairmont Avenue, Fairmont, West Virginia 26554, The Potomac Edison Company ("Potomac Edison"), 10435 Downsville Pike, Hagerstown, Maryland 21740–1766, and West Penn Power Company ("West Penn"), 800 Cabin Hill Drive, Greensburg, Pennsylvania 15601 (each a "Declarant" or "Borrower", collectively, "Declarants" or "Borrowers"), each an electric public-utility subsidiary company of Allegheny Power System, Inc., a registered holding company, have filed a declaration under sections 6(a) and 7 of the Act and Rules 50 and 50(a)(5) thereunder.

Declarants propose to enter into a Competitive Advance and Revolving Credit Facility Agreement ("Agreement") with Chemical Bank and The Bank of New York as co-agents ("Co-Agents"), Chemical Bank as administrative agent ("Administrative Agent"), and certain lenders named in the agreement (each a "Lender", collectively, "Lenders") for borrowings under the Agreement through December 31, 1997.

Declarants also propose to grant and maintain a security interest in the outstanding stock of their subsidiary, Allegheny Generating Company ("Generating"), which is wholly-owned by Declarants in the following percentages: Monongahela—27%; Potomac Edison—28%; and, West Penn—45%. The Generating stock will secure Declarants' obligations under the Agreement. For each Declarant, the security interest granted by it in Generating's stock will expire on the later of December 31, 1997 or the day on which the last of its outstanding debt under the Agreement is repaid, which could be as late as December 31, 2000.

The Agreement provides that each of Declarants may borrow from the Lenders on a standby revolving credit basis, from time-to-time prior to the "maturity Date," [1] a principal amount up to $300 million, but not in excess of $300 million in the aggregate at any time outstanding for all three Declarants.

Each Declarant's borrowing limit will be a percentage of the total aggregate principal amount ($300 million) available for borrowing under the Agreement. Such percentage will be equivalent to each Declarant's pro rata share of the stock of Generating. Consequently, the borrowing limitations are as follows: Monongahela—$81 million (27% of $300 million); Potomac Edison—$84 million (28% of $300 million); and, West Penn—$135 million (45% of $300 million).

The borrowings to be made by Declarants may be either: (i) Standby loans ("Standby Loans"); or, (ii) competitive loans ("Competitive Loans"). Regardless of the type of loan category, each time a Declarant makes a borrowing under the Agreement, there will be a note issued.

Each Standby Loan is made as part of a borrowing consisting of loans to a single Declarant made by the Lenders ratably in accordance with their commitments ("Commitments"). A standby Loan will consist of an aggregate principal amount which is an integral multiple of $1 million and not less than $10 million (or an aggregate principal amount equal to the remaining balance of the available Commitments). The aggregate amount of a Lender's Standby Loans cannot exceed its Commitment.

Each Standby Loan is either, at a Declarant's request: (i) A Eurodollar Standby Loan; or, (ii) an alternate base rate loan ("ABR Loan"). A Eurodollar Standby Loan is any Standby Loan of one, two, three or six-month duration bearing interest at a one, two, three or six-month rate, respectively. The interest rate for a Eurodollar Standby Loan of a given maturity will be equal to the London Interbank Offered Rate ("LIBOR")[2] for the same maturity plus the "Applicable Margin".[3]

Category 1 AA/Aa2 or above	0.375
Category 2 AA/Aa3 or A+/A1 or A/A2	0.4375
Category 3 A-/A3 or BBB+/Baaa1 or BBB/Baa2	0.5625
Category 4 BBB-/Baa3 or below	0.875

An ABR Loan is any Standby Loan of one day to three years duration bearing interest at the "Alternate Base Rate," as

[1] "Maturity Date" is defined in the Agreement as the third anniversary of the date of the Agreement. The Agreement provides that the Maturity Date may be extended in one-year increments.

[2] "LIBOR" is defined in the Agreement as an interest rate per annum equal to the rate at which dollar deposits approximately equal in principal amount to the Administrative Agent's portion of such borrowing by Eurodollar Standby Loan, and for a maturity comparable to such interest period are offered to the principal London office of the Administrative Agent in immediately available funds in the London interbank market two business days prior to the commencement of such interest period.

[3] "Applicable Margin" is defined in the Agreement as "on any date, * * the applicable percentage set forth below based upon the [credit] ratings applicable on such date to the relevant Borrower's first mortgage bonds * * *"—

defined by the Agreement. The Alternate Base Rate is defined in the Agreement as, for any day, a rate per annum equal to the greatest of: (a) The prime rate publicly announced by the Administrative Agent in effect at its principal office in New York City on such day; (b) the "Base CD Rate" in effect on such day plus 1%; and, (c) the "Federal Funds Effective Rate"[4] in effect on such day plus ½ of 1%.

"Base CD Rate" is defined in the Agreement as the sum of (a) the product of (i) the "Three-Month Secondary CD Rate"[5] and (ii) Statutory Reserves and (b) the "Assessment Rate."[6]

A Declarant may not request any borrowing which, if made, would result in an aggregate of more than three separate Standby Loans of any Lender being outstanding at any one time.

Competitive Loans are not shared ratably by the Lenders and a Lender may exceed its Commitment to make a Competitive Loan. Each Competitive Loan may be from one day to three years' duration and is either a "Eurodollar Competitive Loan"[7] or a "Fixed Rate Loan,"[8] as a Declarant may request.

Each Declarant, in order to request competitive bids ("Bids"), must send a duly completed competitive bid request ("Request") to the Administrative Agent. The Request shall specify: (i) Borrowing under either a Eurodollar Competitive Loan or Fixed Rate Loan; (ii) the date of the borrowing and the aggregate principal amount thereof (an integral multiple of $1 million and not less than $10 million); and (iii) the interest period with respect thereto.

The Administrative Agent will invite the Lender to bid to make Competitive Loans pursuant to the Request. Each Lender may make one or more Bids in response to a Request. Each Bid must be an integral multiple of $1 million and not less than $5 million, an may equal the entire principal amount of the competitive borrowing requested. A Bid is irrevocable once submitted. The Bid shall specify: (i) The principal amount; (ii) the competitive bid rate; and (iii) the interest period and the last day thereof. The Administrative Agent shall promptly notify the applicable Declarant by telecopier of all the Bids made, the competitive bid rate, the principal amount of the Bid and the identity of the Lender that made each Bid. In a Declarant's sole discretion, it may accept or reject any Bid.

Declarants will utilize the procedure summarized above as their alternative competitive bidding procedure (*see* HCAR No. 22623) to be carried out in accordance with the requirements of Rule 50 under the Act.

Declarants also propose that, pursuant to a security agreement ("Security Agreement"), each Declarant will grant to the Lenders a security interest in the stock of Generating owned by it. The security interest in the Generating stock owned by each Declarant will secure the payment or performance, as the case may be, of that Declarant's obligations under the Agreement.

The Security Agreement provides that Chemical Bank will act as collateral agent ("Collateral Agent") for: (i) The Lenders, (ii) the Administrative Agent, (iii) The Collateral Agent, and (iv) successors and assigns of each of the foregoing (collectively, "Secured Parties"). The Generating stock certificates are to be delivered to the Collateral Agent, accompanied by stock powers, duly executed in blank.

In the absence of an event of default, as defined in the Security Agreement, each Declarant will be permitted to exercise all voting rights; provided, however, that no action will be permitted (regardless of whether an event of default has occurred and is continuing) if such action would adversely affect the rights inuring to the Secured Parties. Each Declarant will be entitled to receive and retain any cash dividends on the Generating stock pledged by it only to the extent that such cash dividends are permitted by, and are otherwise paid in accordance with, the terms and conditions of the loan documents and applicable laws. Upon the occurrence and during the continuance of an event of default, all rights of a Declarant to dividend payments shall cease, and all such rights will become vested in the Collateral Agent.

Borrowers also propose to pay to each Lender a commitment fee at a rate per annum equal to the "Applicable Commitment Fee Percentage," as defined in the Agreement, of such Borrower from time-to-time in effect on the average daily unused amount of such Borrower's borrowing percentage of the commitment of such Lender during the preceding quarter. The "Applicable Commitment Fee Percentage" is defined in the Agreement as "the applicable percentage set forth below based upon the ratings applicable on such date to the first mortgage bonds of such [Borrower]:"

Credit rating	Percentage
Category 1 — AA/Aa2 or above	0.15
Category 2 — AA−/Aa3 or A+/A1 or A/A2	.175
Category 3 — A−/Ae or BBB+/Baa1 or BBB/Baa2	.25
Category 4 — BBB−/Baa3 or below	.375

(For this purpose only, it is stated that Competitive Loans outstanding shall not be deemed to have used such commitment)

In addition to the commitment fee, Declarants propose to pay a $100,000 fee for the services of the Co-Agents, which they shall share equally. The Administrative Agent shall be paid an annual fee of $18,000 as well as a $2,000 fee for each Request received by it, as discussed above.

Declarants state that the proceeds from borrows under the Standby Loans and the Competitive Loans will be used:

(1) To construct flue-gas desulfurization equipment (also known as a "scrubber") at Generating (in compliance with the Clean Air Act Amendments of 1990);

(2) For the acquisition of property;

[4] "Federal Funds Effective Rate" is defined in the Agreement as, for any day, the weighted average of the rates on overnight Federal funds transactions with members of the Federal Reserve System arranged by Federal funds brokers, as published on the next succeeding business day by the Federal Reserve Bank of New York, or if such rate is not so published for any day which is a business day, the average of the quotations for the day of such transactions received by the Administrative Agent from three Federal funds brokers of recognized standing selected by it.

[5] "Three-Month Secondary CD Rate" is defined in the Agreement as, for any day, the secondary market rate for three-month certificates of deposit reporting as being in effect on such day (or, if such day shall not be a business day, the next preceding business day) by the Federal Reserve Board through the public information telephone line of the Federal Reserve Bank of New York, or, if such rate shall not be so reported on such day or such next preceding business day, the average of the secondary market quotations for three-month certificates of deposit of major money center banks in New York City received at approximately 10 a.m., New York City time, on such day (or, if such day shall not be a business day, on the next preceding business day) by the Administrative Agent from three New York City negotiable certificate of deposit dealers of recognized standing selected by it.

[6] "Assessment Rate" is defined in the Agreement as, for any date, the annual rate (rounded upwards, if necessary, to the next 1/100 of 1%) most recently estimated by the Administrative Agent as the then current net annual assessment rate that will be employed in determining amounts payable by the Administrative Agent to the Federal Deposit Insurance Corporation ("FDIC") for insurance by the FDIC of time deposits made in dollars at the Administrative Agent's domestic offices.

[7] A "Eurodollar Competitive Loan" is defined in the Agreement as any Competitive Loan bearing interest at a rate per annum equal to the LIBOR rate for the same maturity plus a margin specified by the Lender making such loan in its competitive bid.

[8] A "Fixed Rate Loan" is defined in the Agreement as any Competitive Loan bearing interest at a fixed percentage rate per annum specified by the Lender making such loan in its competitive bid.

(3) For the construction, completion, extension and improvement of their facilities;

(4) For the improvement or maintenance of their electric service; and

(5) For other general corporate purposes including but not limited to tax payments, bond payments, common stock dividends, coal payments and construction payments

Entergy Corporation (70–8299)

Entergy Corporation, 225 Baronne Street, New Orleans, Louisiana 70112 ("Entergy"), a registered holding company, has filed an application-declaration with the Commission pursuant to sections 6(a), 7, 9(a), 10 and 12(c) of the Public Utility Holding Company Act of 1935, as amended ("Act") and Rules 42 and 50 thereunder.

Entergy requests authority through March 31, 1997 to issue from time to time up to 2 million shares of its common stock ("Stock"), par value of $5 per share in connection with a proposed nonstatutory Stock Investment Plan ("Plan"). Under the Plan, eligible employees ("Eligible Employees") of Entergy and of other participating companies (collectively, "Participating Employers") would be granted options ("Options") to purchase shares of Stock. In addition to Entergy, Participating Employers would include any corporation (a) 50% or more of the common stock of which is owned, directly or indirectly, by Entergy and (b) which is, from time to time, designated as a Participating Employer in the Plan. Designation as a Participating Employer would be made by a committee, more particularly described below ("Committee"), that is charged with administering the Plan. Eligible Employees generally would include all regular, full-time employees of a Participating Employer, including those employees who at the time of the grant of the applicable Option, are on paid leave of absence. For the purposes of the Plan, Eligible Employees would include eligible employees of any successor in interest to Entergy, including the surviving corporation following the proposed merger of Entergy and Gulf States Utilities Company.

The purpose of the Plan is to provide Eligible Employees of Entergy and other Participating Employers with an opportunity to acquire a proprietary interest in Entergy through the purchase of Stock. Entergy would make three consecutive annual offerings ("Offerings") of Stock, each corresponding to a twelve month period ("Plan Year") commencing on April 1 ("Commencement Date") and ending March 31 of the following year ("Termination Date"). The first Plan Year with respect to the Plan would be the twelve month period beginning April 1, 1994 and ending March 31, 1995. An Eligible Employee would become a participant with respect to any Offering ("Participant") by enrolling in the Offering prior to the applicable Commencement Date and authorizing payroll deductions during the course of the corresponding Plan Year. A Participant could authorize deductions up to a maximum level of 10% of the Participant's base pay to pay for the Stock which is covered by the Participant's option. Generally, each Participant would be granted an Option on each Commencement Date to purchase the most amount of Stock ("Option Shares") allowed by the amount credited to his account on the Termination Date with respect to that Offering at the Option exercise price. The Option exercise price ("Exercise Price") with respect to any Offering would be the lower of:

a. 85% of the closing price of the Common Stock on the Commencement Date for that Offering or the nearest prior business day on which trading occurs on the New York Stock Exchange; or

b. 85% of the closing price of the Common Stock on the Termination Date for that Offering or the nearest prior business day on which trading occurs on the New York Stock Exchange.

Unless a Participant elected to withdraw from the Plan with respect to any Offering, the Participant's Option would be deemed to be automatically exercised on the applicable Termination Date for the purchase of the number of Option Shares covered by the Option. Such purchase would be reflected by an appropriate entry on Entergy's books and records evidencing that the Option Shares purchased by a Participant with respect to the Offering had been acquired by the Participant as of that date. Any excess amount credited to the Participant's account would be paid to the Participant in cash. If a Participant withdrew from an Offering prior to the exercise of the applicable Option, he would receive a refund of funds paid, less administrative expenses.

The Plan would be administered by a committee whose members would be appointed by the Chairman of the Board of Directors of Entergy. The Committee would consist of no fewer than three members selected from directors, officers or employees of Entergy and of other Participating Employers ("Committee"). Subject to the express provisions of the Plan, the Committee would have the exclusive authority to interpret and construe any and all of its provisions and to make all other determinations deemed necessary or advisable for its administration. The Committee may, in its discretion, permit Participants to make contributions by one or more lump sum payments, in addition to payroll deductions. Such permission would be subject to, *inter alia*, the condition that the total of all amounts credited to a Participant's account in any Plan Year could in no event exceed 10% of the Participant's base pay.

Stock issued under the Plan would be issued out of Entergy's authorized but unissued shares, or from shares held by Entergy as treasury stock. It is currently intended that the Option Shares would be issued from treasury shares, rather than from newly issued shares, and that such treasury shares would be acquired from Common Stock purchased by Entergy on the open market. Therefore, Entergy requests authority under the Act to purchase from time to time during the period through March 31, 1997, up to a maximum of 2 million shares of Stock, to be held as treasury shares, pending resale to Participants, for the purpose of satisfying the anticipated requirements of the Plan. The timing of such purchases would depend upon the anticipated needs of the Plan and then existing market conditions. Funds for the purchase of shares of Stock from the open market to satisfy the requirements of the Plan would be obtained from internally generated funds. Proceeds from the sale of shares of Stock under the Plan will become part of the general corporate funds of Entergy and will be used (i) to purchase Stock of Entergy sold or to be sold by Entergy under the Plan, or (ii) for other general corporate purposes.

Entergy additionally requests an exemption from the competitive bidding requirements of Rule 50 under the Act pursuant to subsection (a)(5) thereof with respect to the issuance of the Options and the issuance and sale of Stock pursuant to the Plan.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

DEPARTMENT OF STATE

[Public Notice 1906]

Advisory Committee on International Law; Meeting

A meeting of the Advisory Committee on International Law will take place on December 13, 1993, from 1:30 through 5 p.m., as necessary, in room 1207 of the United States Department of State, Washington, DC. The meeting will be chaired by the Legal Adviser of the Department of State, Conrad K. Harper, and will be open to the public up to the capacity of the meeting room. The meeting will focus on the establishment of an international criminal court and on jurisdictional immunities of states, and review other current developments in international law.

Entry to the building is controlled and will be facilitated by advance arrangements. Members of the public desiring access to the session should, prior to December 10, 1993, notify the Office of the Assistant Legal Adviser for United Nations Affairs (telephone (202) 647–6771) of their name, affiliation, address and telephone number in order to arrange admittance.

Dated: November 22, 1993.

Bruce C. Rashkow,

Assistant Legal Adviser for United Nations Affairs; Executive Director, Advisory Committee on International Law.

DEPARTMENT OF TRANSPORTATION

Aviation Proceedings; Agreements Filed During the Week Ended November 19, 1993

The following Agreements were filed with the Department of Transportation under the provisions of 49 U.S.C 412 and 414. Answers may be filed within 21 days of date of filing.

Docket Number: 49270
Date filed: November 17, 1993
Parties: Members of the International Air Transport Association
Subject: TC3 Telex Mail Vote 655, Japan-Hong Kong fares; r-1—043i, r-4—063ii, r-7—085t, r-2—053i, r-5—070t, r-8—090jj, r-3—063i, r-6—076ee
Proposed Effective Date: December 15, 1993

Docket Number: 49271
Date filed: November 17, 1993
Parties: Members of the International Air Transport Association
Subject: PSC/Reso/072 dated November 4, 1993 Expedited Resolutions (15th IATA PSC—14th Joint ATA/IATA PSC)
Proposed Effective Date: Expedited December 1, 1993

Docket Number: 49272
Date filed: November 17, 1993
Parties: Members of the International Air Transport Association
Subject: Approval Of Amendment To IATA Articles Of Association. This Amendment reflects a re-allocation of the duties of the officers of the Association in light of the fact that the Managing Director's position is and will remain vacant for the foreseeable future.

Docket Number: 49274
Date filed: November 17, 1993
Parties: Members of the International Air Transport Association
Subject: TC2 Reso/P 1513 dated November 16, 1993, Europe-Africa Expedited Resos, r-1 to r-3, TC2 Reso/P 1514 dated November 16, 1993, Europe-Africa Expedited Resos r-4 to r-15
Proposed Effective Date: Expedited December 31, 1993/Jan. 1, 1994

Docket Number: 49276
Date filed: November 19, 1993
Parties: Members of the International Air Transport Association
Subject: COMP Telex Mail Vote 656 Amend charge for PTA Services/Refund of Unused Tickets—Lebanon (Excluding USA/US Territories) r-1— 210, r-2— 211
Proposed Effective Date: December 1, 1993

Applications for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits Filed Under Subpart Q During the Week Ended November 19, 1993

The following Applications for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits were filed under subpart Q of the Department of Transportation's Procedural Regulations (See 14 CFR 302.1701 *et. seq.*). The due date for Answers, Conforming Applications, or Motions to Modify Scope are set forth below for each application. Following the Answer period DOT may process the application by expedited procedures. Such procedures may consist of the adoption of a show-cause order, a tentative order, or in appropriate cases a final order without further proceedings.

Docket Number: 49269
Date filed: November 16, 1993
Due Date for Answers, Conforming Applications, or Motion to Modify Scope: December 14, 1993
Description: Application of Sunbird Airways, Inc., pursuant to section 401(d)(1) of the Act and subpart Q of the Regulations applies for a certificate of public convenience and necessity authorizing Sunbird to provide scheduled interstate and overseas air transportation of persons, property and mail. Upon certification, Sunbird intends to provide service between Orlando, Florida, on the one hand, and Atlanta, Georgia, Detroit, Michigan, Washington, DC (Dulles), and Newark, New Jersey on the other hand.

Research and Special Programs Administration

[Preemption Determination No. PD–5(R) (Docket No. PDA–2(R))]

Massachusetts Requirement for an Audible Back-up Alarm on Bulk Tank Carriers Used To Deliver Flammable Material

AGENCY: Research and Special Programs Administration (RSPA), Department of Transportation.

ACTION: Notice of administrative determination of preemption by RSPA's Associate Administrator for Hazardous Materials Safety.

APPLICANT: National Tank Truck Carriers, Inc. (NTTC).

STATE LAW AFFECTED: Massachusetts General Laws (M.G.L.) c. 90 § 7, paragraph 2.

APPLICABLE FEDERAL REQUIREMENTS: Hazardous Materials Transportation Act (HMTA), 49 App. U.S.C. 1801 *et seq.*, and the Hazardous Materials Regulations (HMR), 49 CFR parts 171–180.

MODE AFFECTED: Highway.

SUMMARY: The HMTA does not preempt Massachusetts' requirement for a back-up alarm on bulk tank carriers transporting gasoline or other flammable materials. That requirement does not concern a "covered subject." Since vehicles used in interstate commerce that meet Federal regulations are excluded from the requirement to have a back-up alarm, there is no situation where this requirement would create an

obstacle to the accomplishment and execution of the HMTA and the HMR.

This decision will become RSPA's final decision 20 days after service if no petition for reconsideration is filed within that time. If a petition for reconsideration of this decision is filed within 20 days of service, the action by RSPA's Associate Administrator for Hazardous Materials Safety on a petition for reconsideration will be RSPA's final decision.

FOR FURTHER INFORMATION CONTACT: Frazer C. Hilder, Office of the Chief Counsel, Research and Special Programs Administration, U.S. Department of Transportation, 400 Seventh Street SW., Washington, DC 20590–0001, telephone (202) 366–4400.

SUPPLEMENTARY INFORMATION:

I. Application for a Preemption Determination

On January 2, 1992, RSPA received a request from NTTC, dated November 25, 1991, for a determination that the HMTA preempts the second paragraph of M.G.L. c. 90 § 7:

> Every commercial motor vehicle, or trailer weighing, with its load, more than twelve thousand pounds, and used to deliver gasoline or other flammable material, shall be equipped with an audible warning system when the vehicle's transmission is in reverse. For the purpose of this paragraph, the term commercial motor vehicle or trailer shall mean a bulk tank carrier delivering gasoline or other flammable material.

This requirement, which became effective January 1, 1991, is contained in a section of M.G.L. covering "Brakes, braking systems, mufflers, horns, lights, audible warning systems, and other equipment; compliance with safety standards; stickers and emblems." The fourth paragraph of the same section provides:

> Notwithstanding the preceding provisions of this section, any commercial motor vehicle, semi-trailer or trailer, used in interstate commerce, which shall conform as to its equipment with the regulations established from time to time by the bureau of motor carrier safety of the United States department of transportation, shall be deemed to conform to the requirements of this section.

The Federal Motor Carrier Safety Regulations (FMCSR), 49 CFR, subchapter B, specify in part 393 the "Parts and Accessories Necessary for Safe Operation," governing lights and other electrical equipment, brakes, windows, fuel systems, emergency equipment, frame and body construction, other miscellaneous equipment, and protection against shifting or falling cargo. The FMCSR do not require an audible reverse-gear warning device (or back-up alarm) for over-the-road vehicles. The only known Federal standard in this area is an Occupational Safety and Health Administration regulation that requires any motor vehicle equipment operated within non-public off-highway jobsites and having an obstructed rear view to have a "reverse signal alarm audible above the surrounding noise level or * * * [to back up] only when an observer signals that it is safe to do so." 29 CFR 1926.601(b)(4).

As discussed in more detail in Part III, below, NTTC contends that, because Massachusetts' requirement for a back-up alarm is particularly related to vehicle equipment used for the transportation of hazardous materials, that requirement falls within an area of regulation reserved exclusively to the Federal Government.

On March 23, 1992, RSPA published a Public Notice and Invitation to Comment (Notice) on NTTC's application for a preemption determination. 57 FR 10098. The Chemical Waste Transportation Institute (CWTI), an institute of the National Solid Wastes Management Association, filed the only comment. There were no rebuttal comments. NTTC sent a copy of its application to the Massachusetts Registry of Motor Vehicles, and CWTI certified that it had sent a copy of its comments to the same office (as required by the Notice), but no comments were received from Massachusetts.

II. Preemption Under the HMTA

The HMTA was enacted in 1975 to give the Department of Transportation greater authority "to protect the Nation adequately against the risks to life and property which are inherent in the transportation of hazardous materials in commerce." 49 App. U.S.C. 1801. It "replace[d] a patchwork of state and federal laws and regulations * * * with a scheme of uniform, national regulations." *Southern Pac. Transp. Co.* v. *Public Serv. Comm'n*, 909 F.2d 352, 353 (9th Cir. 1990); *see also Jersey Cent. Power & Light Co.* v. *Lucey*, 772 F.2d 1103, 1112 (3d Cir. 1985), *cert. denied*, 475 U.S. 1013 (1986). The HMR have been promulgated in accordance with the HMTA's direction that the Secretary of Transportation "issue regulations for the safe transportation of hazardous materials in intrastate, interstate, and foreign commerce." 49 App. U.S.C. 1804(a)(1).

"[U]niformity was the linchpin in the design of the [HMTA]," including the 1990 amendments to that statute. *Colorado Pub. Util. Comm'n* v. *Harmon*, 951 F.2d 1571, 1575 (10th Cir. 1991). Congress believed that uniform regulations promote safety in the transportation of hazardous materials, specifically finding in 1990 that:

> (3) Many States and localities have enacted laws and regulations which vary from Federal laws and regulations pertaining to the transportation of hazardous materials, thereby creating the potential for unreasonable hazards in other jurisdictions and confounding shippers and carriers which attempt to comply with multiple and conflicting registration, permitting, routing, notification, and other regulatory requirements,
>
> (4) Because of the potential risks to life, property, and the environment posed by unintentional releases of hazardous materials, consistency in laws and regulations governing the transportation of hazardous materials is necessary and desirable,
>
> (5) In order to achieve greater uniformity and to promote the public health, welfare, and safety at all levels, Federal standards for regulating the transportation of hazardous materials in intrastate, interstate, and foreign commerce are necessary and desirable.

49 App. U.S.C. 1801 note.

Unless otherwise authorized by Federal law or unless a waiver of preemption is granted by DOT, the HMTA explicitly preempts "any requirement of a State or political subdivision thereof or Indian tribe" if:

> (1) Compliance with both the State or political subdivision or Indian tribe requirement and any requirement of [the HMTA] or of any regulation issued under [the HMTA] is not possible,
>
> (2) The State or political subdivision or Indian tribe requirement as applied or enforced creates an obstacle to the accomplishment and execution of [the HMTA] or the regulations issued under [the HMTA], or
>
> (3) It is preempted under section 105(a)(4) [49 App. U.S.C. 1804(a)(4), describing five "covered subject" areas] or section 105(b) [49 App. U.S.C. 1804(b), dealing with highway routing requirements].

49 App. U.S.C. 1811(a).

The first two of these paragraphs set forth the "dual compliance" and "obstacle" criteria which RSPA had applied in issuing inconsistency rulings prior to the passage of the 1990 amendments to the HMTA. While advisory in nature, these inconsistency rulings were "an alternative to litigation for a determination of the relationship of Federal and State or local requirements" and also a possible "basis for an application * * * [for] a waiver of preemption pursuant to section 112(b) of the HMTA." Inconsistency Ruling (IR) No. 2, Rhode Island Rules and Regulations Governing the Transportation of Liquified Natural Gas and Liquefied Propane Gas, 44 FR 75566, 75567 (Dec. 20, 1979). The dual

compliance and obstacle criteria are based on U.S. Supreme Court decisions on preemption. *Hines* v. *Davidowitz*, 312 U.S. 52 (1941); *Florida Lime & Avocado Growers, Inc.* v. *Paul*, 373 U.S. 132 (1963); *Ray* v. *Atlantic Richfield, Co.*, 435 U.S. 151 (1978).

The third paragraph, 49 App. U.S.C. 1811(a)(3), refers to 49 App. U.S.C. 1804(a)(4), which provides that a non-Federal requirement in any of five "covered subject" areas is preempted unless it is "substantively the same as" a requirement in the HMTA or the HMR (or the non-Federal requirement is "otherwise authorized by Federal law"). These covered subjects are:

(i) The designation, description, and classification of hazardous materials;
(ii) The packing, repacking, handling, labeling, marking, and placarding of hazardous materials;
(iii) The preparation, execution, and use of shipping documents pertaining to hazardous materials and requirements respecting the number, content, and placement of such documents;
(iv) The written notification, recording, and reporting of the unintentional release in transportation of hazardous materials; and (v) the design, manufacturing, fabrication, marking, maintenance, reconditioning, repairing, or testing of a package or container which is represented, marked, certified, or sold as qualified for use in the transportation of hazardous materials.

In a final rule published in the **Federal Register** on May 13, 1992 (57 FR 20424, 20428), RSPA defined "substantively the same" to mean "that the non-Federal requirement conforms in every significant respect to the Federal requirement. Editorial and other similar *de minimis* changes are permitted." 49 CFR 107.202(d).

The HMTA authorizes any directly affected person to apply to the Secretary of Transportation for a determination whether a State, political subdivision, or Indian tribe requirement is preempted by the HMTA. 49 App. U.S.C. 1811(c)(1). This administrative determination replaced RSPA's process for issuing inconsistency rulings. The Secretary of Transportation has delegated to RSPA the authority to make determinations of preemption, except for those concerning highway routing which were delegated to the Federal Highway Administration. 49 CFR 1.53(b). Under RSPA's regulations, preemption determinations are issued by RSPA's Associate Administrator for Hazardous Materials Safety. 49 CFR 107.209(a).

Preemption determinations do not address issues of preemption arising under the Commerce Clause of the Constitution or under statutes other than the HMTA unless it is necessary to do so in order to determine whether a requirement is "otherwise authorized by Federal law." A State, local or Indian tribe requirement is not "otherwise authorized by Federal law" merely because it is not preempted by another Federal statute. *Colorado Pub. Util. Comm'n* v. *Harmon*, above, 951 F.2d at 1581 n.10.

In making determinations regarding preemption under the HMTA, RSPA is guided by the principles and policy set forth in Executive Order No. 12612, entitled "Federalism." 52 FR 41685 (Oct. 30, 1987). Section 4(a) of that Executive Order authorizes preemption of State laws only when a statute contains an express preemption provision, there is other firm and palpable evidence of Congressional intent to preempt, or the exercise of State authority directly conflicts with the exercise of Federal authority. The HMTA contains express preemption provisions, which RSPA has implemented through its regulations.

III. Comments Supporting Preemption

In its application, NTTC "acknowledges that neither the Hazardous Materials Regulations (HMR) nor the Federal Motor Carrier Safety Regulations (FMCSR) specify requirements for back up alarms." It relies directly on RSPA's consideration of New York City equipment regulations covering such items as bumpers, drive axles, fuel tanks, brakes and electrical systems on cargo tanks used to pick up or deliver flammable and combustible liquids in the city, in IR–22, City of New York Regulations Governing Transportation of Hazardous Materials, 52 FR 46574 (Dec. 8, 1987), corrections, 52 FR 49107 (Dec. 29, 1987), *aff'd*, IR–22(A), Decision on Appeal, 54 FR 26698 (Jun. 23, 1989).

According to NTTC, these "non-containment" equipment regulations were found to be "triggered" by the transportation of hazardous materials because they did not apply to all trucks, but rather "only to those carrying specified hazardous materials." As NTTC reads IR–22, these requirements fell "within these exclusively Federal regulatory areas, and, therefore, [were] inconsistent with the HMTA and HMR and thus preempted."

NTTC distinguishes as incomparable and irrelevant RSPA's finding in IR–22 that a requirement to keep rags or cotton waste in a metal container was consistent with the HMTA and the HMR, as well as the ruling in IR–2, above, that a requirement for certain vehicles to carry two-way radios was also consistent with the HMTA and the HMR. NTTC argues that, in contrast with the back-up alarm required by Massachusetts, the two-way (or citizens band) radio is not permanently installed in, and does not require any mechanical alteration to, the vehicle. NTTC also notes that Massachusetts could petition RSPA for a regulatory amendment, but has not exercised that option.

CWTI states that, since the "Massachusetts requirement is limited to vehicles used to deliver * * * flammable materials, it is clear that the genesis of the requirement is not vehicle safety generally, but its focus is safety in the transportation of hazardous materials." Therefore, according to CWTI, Massachusetts' adoption of the back-up alarm requirement must have originated from a concern about "hazard warning" or from "the belief that a back-up alarm would make a packaging, such as a cargo tank, more safe." CWTI argues that, in both areas of hazard communication and packaging, RSPA's regulations must prevail over non-Federal requirements.

CWTI alleges that "the addition of back-up alarms has no bearing on the quality of packagings otherwise conforming to DOT requirements." Citing the 1990 amendments to the HMTA, CWTI claims RSPA's position as the preeminent authority on packaging requirements was strengthened by language providing that any non-Federal requirement pertaining to the design, manufacture, or fabrication of packages is preempted unless "substantively the same" as the Federal standard. And since no Federal standard exists with regard to back-up alarms for any vehicle carrying hazardous materials, Massachusetts cannot satisfy the "substantively the same as" requirement. Furthermore, citing IR–17, Illinois Fee on Transportation of Spent Nuclear Fuel, 51 FR 20926 (Jun. 9, 1986), *aff'd*, IR–17(A), Decision on Appeal, 52 FR 36200 (Sep. 25, 1987), corrections, 52 FR 37399 (Nov. 6, 1987), CWTI states that RSPA found the "absence of a federal regulation is not determinative of the challenged state requirement's consistency." CWTI also notes that RSPA, in a series of inconsistency rulings, clearly determined that equipment requirements that differ from Federal standards are inconsistent, and that RSPA's regulatory authority in this area fully occupies the field.

CWTI also maintains that the intent of the Massachusetts requirement is "to accomplish the same purpose" as requirements for "labeling, marking, and placarding of hazardous materials," i.e., to communicate the hazardous nature of the cargo being transported. For that reason, CWTI argues, the

requirement is preempted under the "substantively the same as" standard. Quoting from IR–2, above, 44 FR at 75568, CWTI asserts that RSPA has held that "hazard warning systems are another area where [RSPA] perceives the Federal role to be exclusive * * * Additional, different requirements imposed by States or localities detract from the DOT systems and may confuse those to whom the DOT systems are meant to impart information."

In conclusion, CWTI states that Massachusetts is "not free to unilaterally impose its own view that back-up alarms, even if only on motor vehicles, are the best means to achieve" an improvement in hazardous materials communication and packaging. CWTI asserts that other jurisdictions would have to be allowed the same privilege to interpret hazardous materials safety, which would create an "obstacle to the accomplishment and execution of the HMTA or HMR 'to preclude a multiplicity of State and local regulations and the potential for varying as well as conflicting regulations in the area of hazardous materials transportation.'" Quoting from Senate Rep. No. 93–1192, 93rd Cong., 2d Sess. 37 (1974). CWTI states that Massachusetts should request a waiver of preemption or petition for a rulemaking if it so desires.

Neither NTTC nor CWTI contends that its members cannot comply with both the Massachusetts requirement for a back-up alarm and the HMR.

IV. Discussion

A. The Covered Subject Test

Based on its reading of IR–22, NTTC argues that requirements for certain equipment to transport hazardous materials are within an "exclusively Federal regulatory area." CWTI asserts that the intent of the back-up alarm requirement is either to improve the safety of the packaging of hazardous materials, or to communicate the hazardous nature of the cargo being transported, and is preempted because the "covered subject" areas in 49 App. U.S.C. 1804(a)(4)(B) include both packaging and hazard communications.

The 1990 amendments to the HMTA do not support these arguments. Congress delineated specific items as to which non-Federal requirements must be "substantively the same as" Federal standards. One is the "package or container which is represented, marked, certified or sold as qualified for use in the transportation of hazardous materials." 49 App. 1804(a)(4)(B)(v). However, this does not include the equipment or vehicle used to hold or transport that "package or container." There is no evidence that the back-up alarm required in Massachusetts is a part of the package or container in which flammable materials are transported. In actuality, Congress failed to adopt the position taken in IR–22 that any requirement governing any equipment used in connection with the transportation of hazardous materials falls within an area "of exclusive Federal jurisdiction . . ." 52 FR at 46580.

Similarly, with respect to measures for communication of the presence and nature of hazardous materials, Congress took a more narrow position than IR–22, which had also found all "hazard warning systems" to be within an area "of exclusive Federal jurisdiction . . ." *Id.* Rather, Congress included as covered subjects the specific items that make up the hazard communication system in the HMR: The "labeling, marking, and placarding of hazardous materials," and the "preparation, execution, and use of shipping documents pertaining to hazardous materials," 49 App. U.S.C. 1804(a)(4)(B) (ii), (iii). It is these specific matters which must be "substantively the same as" Federal regulations, not just any requirement on hazard communication.

Since the installation of a back-up alarm is unrelated to labeling, marking, and placarding of hazardous materials, or the preparation, execution, and use of shipping documents, this requirement does not fall within any of the covered subject areas of 49 App. U.S.C. 1804(a)(4)(B).

B. The Obstacle Test

NTTC and CWTI did not directly address whether the Massachusetts' back-up alarm requirement "as applied or enforced creates an obstacle to the accomplishment and execution of [the HMTA] or the [HMR]." 49 App. U.S.C. 1911(a)(2). Indeed, neither of them provided any information as to how Massachusetts has applied this requirement, and the State did not submit any comments.

In the absence of this information, it is impossible to find that the HMTA preempts the Massachusetts' back-up alarm requirement, especially since the fourth paragraph of M.G.L. c. 90 § 7 exempts from this requirement "any commercial motor vehicle, semi-trailer or trailer, used in interstate commerce," which complies with the equipment requirements in Part 393 of the FMCSR (which are incorporated in the HMR by 49 CFR 177.804). Assuming that this requirement applies only to bulk tank carriers that operate solely within the State of Massachusetts, there would not be any situation where a vehicle would be delayed at the Massachusetts border, or forced to detour around the State, because it lacked a back-up alarm. There is no indication that the Massachusetts' back-up alarm requirement has any adverse impact on hazardous materials transportation covered by the HMR (including those intrastate motor carriers that are already subject to the HMR, 49 CFR 171.1(a)(3), or that will become subject to the HMR if the proposed rule in Docket No. HM–200 becomes final. See Notice of Proposed Rulemaking, 58 FR 36920 (July 9, 1993), corrections, 58 FR 38111 (July 15, 1993)). Compare IR–4, State of Washington . . . Requirements for Red or Red Bordered Shipping Papers for Hazardous Materials, 47 FR 1231, 1233–34 (Jan. 11, 1982), appeal withdrawn, 47 FR 34074 (Aug. 5, 1982).

V. Ruling

For the reasons set forth above, the HMTA does not preempt the requirement in the second paragraph of M.G.L. c. 90 § 7, for an audible reverse-gear warning system on bulk tank carriers used to deliver gasoline or other flammable materials. That requirement does not concern a "covered subject." The exclusion of vehicles used in interstate commerce that meet Federal regulations, from the requirement to have a back-up alarm, does not present any situation where this requirement would create an obstacle to the accomplishment and execution of the HMTA and the HMR.

VI. Petition for Reconsideration/ Judicial Review

In accordance with 49 CFR 107.211(a), "[a]ny person aggrieved" by this decision may file a petition for reconsideration within 20 days of service of this decision. Any party to this proceeding may seek a review of RSPA's decision "by the appropriate district court of the United States . . . within 60 days after such decision becomes final." 49 App. U.S.C. 1811(e).

This decision will become RSPA's final decision 20 days after service if no petition for reconsideration is filed within that time. The filing of a petition for reconsideration is not a prerequisite to seeking judicial review of this decision under 49 App. U.S.C. 1811(e).

If a petition for reconsideration of this decision is filed within 20 days of service, the action by RSPA's Associate Administrator for Hazardous Materials Safety on the petition for reconsideration will be RSPA's final decision. 49 CFR 107.211(d).

Issued in Washington, DC, on November 22, 1993.

Alan I. Roberts,

Associate Administrator for Hazardous Materials Safety.

Sunshine Act Meetings

Federal Register
Vol. 58, No. 227
Monday, November 29, 1993

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

FEDERAL DEPOSIT INSURANCE CORPORATION.

Notice of Agency Meeting

Recommendations concerning administrative enforcement proceedings.

Matters relating to the Corporation's self appointment as receiver.

Matters relating to certain insured financial institutions.

In calling the meeting, the Board determined, on motion of Mr. John F. Downey, acting in the place and stead of Director Jonathan L. Fiechter (Acting Director, Office of Thrift Supervision), seconded by Director Eugene A. Ludwig (Comptroller of the Currency), concurred in by Acting Chairman Andrew C. Howe, Jr., that Corporation business required its consideration of the matters on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did not require consideration of the matters in a meeting open to public observation; and that the matters could be considered in a closed meeting by authority of subsections (c)(4), (c)(6), (c)(8), (c)(9)(A)(ii), and (c)(9) (B) of the "Government in the Sunshine Act" (5 U.S.C. 552b (c)(4), (c)(6), (c)(8), (c) (9) (A) (ii), and (c) (9) (B)).

The meeting was held in the Board Room of the FDIC Building located at 550—17th Street, N.W., Washington, D.C.

Dated: November 23, 1993.

Federal Deposit Insurance Corporation.

Robert E. Feldman,

Deputy Executive Secretary.

BILLING CODE 6714-01-M

FEDERAL DEPOSIT INSURANCE CORPORATION

Notice of Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that the Federal Deposit Insurance Corporation's Board of Directors will meet in open session at 10:00 a.m. on Tuesday, November 30, 1993, to consider the following matters:

Summary Agenda

No substantive discussion of the following items is anticipated. These matters will be resolved with a single vote unless a member of the Board of Directors requests that an item be moved to the discussion agenda.

Disposition of minutes of previous meetings.

Reports of actions approved by the standing committees of the Corporation and by officers of the Corporation pursuant to authority delegated by the Board of Directors.

Discussion Agenda

Memorandum and resolution re: Proposed amendments to Part 330 of the Corporation's rules and regulations, entitled "Deposit Insurance Coverage," which would (1) require that certain written disclosures be made by insured depository institutions to employee benefit plan depositors in certain situations in order to reduce the uncertainty about whether such accounts are eligible for "pass-through" deposit insurance coverage and to provide a timely disclosure to such depositors when such coverage no longer is available; and (2) make two technical amendments to Part 330 involving the insurance rules for joint accounts and the accounts for which an insured depository institution is acting as a fiduciary.

Memorandum and resolution re: Final amendments to Part 362 of the Corporation's rules and regulations, entitled "Activities and Investments of Insured State Banks," which require insured state banks to obtain the prior consent of the Corporation before directly, or indirectly through a subsidiary, engaging "as principal" in any activity that is not permissible for a national bank.

Memorandum and resolution re: Final amendments to the Corporation's rules and regulations, which eliminate Part 332, entitled "Powers Inconsistent with Purposes of Federal Deposit Insurance Law."

Memorandum and resolution re: Final amendments to Part 333 of the Corporation's rules and regulations, entitled "Extension of Corporate Powers," which eliminate section 333.3, which makes certain prohibitions applicable to state chartered savings associations applicable to state banks that are members of the Savings Association Insurance Fund.

Memorandum and resolution re: Final amendments to Part 303 of the Corporation's rules and regulations, entitled "Applications, Requests, Submittals, Delegations of Authority, and Notices Required to be Filed by Statute or Regulation," which (1) conform the definitions of "significant risk" and 'equity security" to the definitions of those terms found in Part 362 of the Corporation's rules and regulations, entitled "Activities and Investments of Insured State Banks," (2) allow insured state savings associations to conduct activities and make investments without the Corporation's prior approval provided that the activities and/or investments were found to be permissible for federal savings associations under an order or a written interpretation issued by the Office of Thrift Supervision, and (3) place insured state savings associations on a par with the treatment accorded insured state banks under the Corporation's rules and regulations.

The meeting will be held in the Board Room on the sixth floor of the FDIC Building located at 550–17th Street, N.W., Washington, D.C.

The FDIC will provide attendees with auxiliary aids (e.g., sign language interpretation) required for this meeting. Those attendees needing such assistance should call (202) 942–3132 (Voice); (202) 942–3111 (TTY), to make necessary arrangements.

Requests for further information concerning the meeting may be directed to Mr. Robert E. Feldman, Deputy Executive Secretary of the Corporation, at (202) 898–6757.

Dated: November 23, 1993.

Federal Deposit Insurance Corporation.

Robert E. Feldman,

Deputy Executive Secretary.

BILLING CODE 7050–01–Mz

LEGAL SERVICES CORPORATION

Board of Directors Meeting

TIME AND DATE: The Legal Services Corporation Board of Directors hold a two-day meeting commencing on December 5, 1993, and concluding on December 6, 1993. The meeting will commence at 10:30 a.m. on Sunday, December 5, 1993, and at 9:00 a.m. on Monday, December 6, 1993

PLACE:

December 5, 1993
The Legal Services Corporation, 750 First Street, N.E., The Board Room, Washington, D.C. 20002, (202) 336–8800
December 6, 1993 (10:30 a.m.–1:30 p.m.)
The Washington Court Hotel, 525 New Jersey Avenue, N.W., The Ashlawn Room, Washington, D.C. 20001, (202) 628–2100
December 6, 1993 (2:00 p.m.–Conclusion)
The Legal Services Corporation, The Board Room

BOARD OF DIRECTORS MEETING:

STATUS OF MEETING: *Open,* except that a portion of the meeting may be closed on the morning of Monday, December 6, 1993, pursuant to a vote of a majority of the Board of Directors to hold an executive session. At the closed session, in accordance with the aforementioned vote, the Board will consider and vote on approval of the draft minutes of the executive session held on November 8, 1993. The Board will hear and consider the report of the General Counsel on litigation to which the Corporation is, or may become, a party. Further, the Board will consult with the Inspector General on internal personnel, operational and investigative matters. The Board will also consult with the President on internal personnel and operational matters. Finally, the Board will deliberate regarding internal personnel and operational matters. The closing will be authorized by the relevant sections of the Government in the Sunshine Act [5 U.S.C. Sections 552b(c)(2)(5), (6), (7), and (10)], and the corresponding regulation of the Legal Services Corporation [45 C.F.R. Section 1622.5(a), (d), (e), (f), and (h)].[1] The closing will be certified by the Corporation's General Counsel as authorized by the above-cited provisions of law. A copy of the General Counsel's certification will be posted for public inspection at the Corporation's headquarters, located at 750 First Street, N.E., Washington, D.C., 20002, in its eleventh floor reception area, and will otherwise be available upon request.

Board of Directors Meeting, December 5, 1993, Agenda

MATTERS TO BE CONSIDERED:

OPEN SESSION:

1. Approval of Agenda.
2. Approval of Minutes of November 8, 1993 Meeting.
3. Chairman's and Members' Reports.
   a. Consideration of Board Committee Assignments.
4. Consideration of Panel Presentation By Representatives From the Legal Services Community On the Role and Mission of the Corporation and Key Issues Affecting the Delivery of Legal Services.
5. Consideration of Operations and Regulations Committee Report.
6. Consideration of Provision for the Delivery of Legal Services Committee Report.
7. Consideration of Audit and Appropriations Committee Report.

---

[1] As to the Board's consideration and approval of the draft minutes of the executive session(s) held on the above-noted date(s) the closing is authorized as noted in the **Federal Register** notice(s) corresponding to that/those Board meeting(s).

a. Consideration of Management's Draft Response to the Inspector General's Semiannual Report for the Period Ending September 30, 1993.
b. Consideration of Proposed Fiscal Year 1994 Consolidated Operating Budget.

8. Consideration of Revised Fiscal Year 1995 Budget Mark for the Corporation.
a. Consideration of Presentation on Revision of the Corporation's Fiscal Year 1995 Budget Mark by Brooksley Borne on behalf of the Standing Committee on Legal Aid and Indigent Defendants ("SCLAID") of the American Bar Association.
b. Consideration of Presentation on Revision of the Corporation's Fiscal Year 1995 Budget Mark by Richard Taylor on Behalf of the Project Advisory Group ("PAG").

9. President's Report.
10. Inspector General's Report.
11. Consideration of Motion to Adjourn Meeting and Reconvene in Executive Session on Monday, December 6, 1993, at 9:00 a.m.

Board of Directors Meeting (Reconvened); Monday, December 6, 1993

MATTERS TO BE CONSIDERED:

CLOSED SESSION: [2]

12. Approval of Minutes of Executive Session Held on November 8, 1993.
13. Consideration of Internal Personnel and Operational Matters.
14. Consultation by Board with the Inspector General on Internal Personnel, Operational and Investigative Matters.
15. Consultation by Board with the President on Internal Personnel and Operational Matters.
16. Consideration of the General Counsel's Report on Pending Litigation to which the Corporation is, or May Become, a Party.

OPEN SESSION: (Resumed)

17. Consideration of Other Business.
18. Scheduling of 1994 Board and Committee Meetings.

CONTACT PERSON FOR INFORMATION:

Part II

Federal Emergency Management Agency

Hotel and Motel Fire Safety Act National Master List, 1993; Notice

FEDERAL EMERGENCY MANAGEMENT AGENCY

Hotel and Motel Fire Safety Act National Master List, 1993

AGENCY: United States Fire Administration, FEMA.

ACTION: Notice.

SUMMARY: The Federal Emergency Management Agency (FEMA or Agency) gives notice of the national master list of places of public accommodations which meet the fire prevention and control guidelines under the Hotel and Motel Fire Safety Act. This updated list incorporates all changes made to the national master list since it was first published in 1992, and is current to November 16, 1993.

EFFECTIVE DATE: December 29, 1993.

ADDRESSES: Comments on the master list are invited and may be addressed to the Rules Docket Clerk, Federal Emergency Management Agency, 500 C Street, SW., room 840, Washington, DC 20472, (fax) (202) 646–4536. To be added to the National Master List, or to make a change to the list, see **SUPPLEMENTARY INFORMATION** below.

FOR FURTHER INFORMATION CONTACT: Larry Maruskin, Office of Fire Prevention and Arson Control, United States Fire Administration, Federal Emergency Management Agency, National Emergency Training Center, 16825 South Seton Avenue, Emmitsburg, MD 21727, (301) 447–1141.

SUPPLEMENTARY INFORMATION: Acting under the Hotel and Motel Fire Safety Act of 1990, 15 U.S.C. 2201 note, the United States Fire Administration has worked with each State to compile a national master list of all of the places of public accommodation affecting commerce located in each State that meet the requirements of the guidelines under the Act. FEMA published the national master list in the **Federal Register** on Tuesday, November 24, 1992, 57 FR 55314, and published changes approximately monthly since then.

This is the first annual publication of the complete, updated national master list, current as of November 16, 1993. FEMA will continue to publish changes to the national master list on an approximately monthly basis.

Parties wishing to be added to the national master list, or to make any other change, should contact the State office or official responsible for compiling listings of properties which comply with the Hotel and Motel Fire Safety Act. A list of State contacts was published in 58 FR 17020 on March 31, 1993. If the published list is unavailable to you, the State Fire Marshal's office can direct you to the appropriate office. Periodically FEMA will update and redistribute the national master list to incorporate additions and corrections/changes to the list, and deletions from the list, that are received from the State offices.

Copies of the national master list and its updates may be obtained by writing to the Government Printing Office, Superintendent of Documents, Washington, DC 20402–9325. When requesting copies please refer to stock number 069–001–00049–1, and ask for the November 1993 national master list dated November 29, 1993, and any subsequent updates.

The November 1993 national master list follows below.

Dated: November 18, 1993.

John P. Carey,

General Counsel.

Department of the Interior

Bureau of Indian Affairs

Indian Gaming; Notice

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

Indian Gaming

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice of Approved Tribal-State Compact.

SUMMARY: Pursuant to 25 U.S.C. 2710, of the Indian Gaming Regulatory Act of 1988 (Pub. L. 100–497), the Secretary of the Interior shall publish, in the Federal Register, notice of approved Tribal-State Compacts for the purpose of engaging in Class III (casino) gaming on Indian reservations. The Assistant Secretary—Indian Affairs, Department of the Interior, through her delegated authority, has approved the Second Amendment to the March 24, 1993 Agreement Between the Crow Tribe and the State of Montana Concerning Class III Gaming, executed on August 31, 1993.

DATES: This action is effective on November 29, 1993.

FOR FURTHER INFORMATION CONTACT: Hilda Manuel, Director, Indian Gaming Management Staff, Bureau of Indian Affairs, Washington, DC 20240, (202) 219–4066.

Dated: November 5, 1993.

Marshall M. Cutsforth,

Acting Assistant Secretary—Indian Affairs.

Part IV

Office of Management and Budget

Uniform Administrative Requirements for Grants and Agreements With Institutions of Higher Education, Hospitals and Other Non-Profit Organizations; Notice

OFFICE OF MANAGEMENT AND BUDGET

Uniform Administrative Requirements for Grants and Agreements With Institutions of Higher Education, Hospitals and Other Non-Profit Organizations

AGENCY: Office of Management and Budget.

ACTION: Final Revision to OMB Circular A–110, "Uniform Administrative Requirements for Grants and Agreements With Institutions of Higher Education, Hospitals and Other Non-Profit Organizations."

SUMMARY: Office of Management and Budget (OMB) Circular A–110 provides standards for obtaining consistency and uniformity among Federal agencies in the administration of grants and agreements with institutions of higher education, hospitals, and other non-profit organizations.

OMB issued Circular A–110 in 1976 and, except for a minor revision in February 1987, the Circular contains its original provisions. To update the Circular, OMB established an interagency task force to review the Circular. The task force solicited suggestions for changes to the Circular from university groups, non-profit organizations and other interested parties and compared, for consistency, the provisions of similar provisions applied to State and local governments. The revised Circular reflects the results of these efforts.

DATES: Provisions that affect Federal agencies are effective December 29, 1993. Provisions that affect grantees will be adopted by agencies in codified regulations by May 30, 1994. Earlier implementation is encouraged.

ADDRESSES: Office of Management and Budget, Office of Federal Financial Management, Financial Standards and Reporting Branch, room 10235, New Executive Office Building, Washington, DC 20503. For a copy of this Circular, contact Office of Administration, Publication Office, room 2200, New Executive Office Building, Washington, DC 20503, or telephone (202) 395–7332.

FOR FURTHER INFORMATION CONTACT: Palmer Marcantonio, Financial Standards and Reporting Branch, Office of Federal Financial Management, Office of Management and Budget (telephone: 202–395–3993).

SUPPLEMENTARY INFORMATION:

A. Background

OMB published a notice in the **Federal Register** (57 FR 39018) on August 27, 1992, requesting comments on proposed revisions to OMB Circular A–110. Interested parties were invited to submit comments. OMB received over 200 comments from Federal agencies, non-profit organizations, professional organizations and others. All comments were considered in developing this final revision.

The following section presents a summary of the major comments, grouped by subject, and a response to each comment. Other changes have been made to increase clarity and readability.

B. Comments and Responses

General

Comment: Provide Federal agencies the necessary discretion to grant waivers on a case-by-case basis.

Response: Amended Circular to provide Federal agencies the authority to grant exceptions on a case-by-case basis.

Comment: Clarify the provisions concerning the allowability of fees or profits.

Response: No change. Generally fees and profits are not paid to recipients unless authorized by legislation. Fees and profits are discussed in the various cost principles.

Pre-Award Requirements

Comment: Delete or revise section on "Advance Public Notice and Priority Setting."

Response: Amended the section to give Federal agencies more flexibility.

Comment: Amend the section on "Special Award Conditions" to: (1) include quantifiable, objective measures which may trigger special award conditions; (2) provide for an appeals process; and, (3) conform to the grants management common rule covering State and local governments to the extent practicable.

Response: OMB expanded this section to require Federal agencies to provide more information to recipients including an explanation of how recipients may request reconsideration of additional requirements. However, OMB does not believe it is practical to provide quantifiable measures. Most of the additional requirements are based on qualitative considerations rather than quantitative ones. Also, OMB amended this section to conform to the grants management common rule to the extent practicable.

Post-Award Requirements

Comment: The definition of "in-kind contribution" is not the same as the one used in the grants management common rule for State and local governments.

Response: Redefined third party in-kind contributions to mean the value of non-cash contributions from third parties. All grantee contributions whether in the form of property or cash are referred to as "contributions" and are subject to the respective cost principles. This change is consistent with the provisions of the Common Rule.

Comment: Allow grantees to use unrecovered indirect cost as cost sharing or matching.

Response: Added a provision to the Circular which provides that unrecovered indirect cost may be included as part of cost sharing or matching with the Federal agency's prior approval.

Comment: In identifying contributed services to federally-funded programs, university recipients should be entitled to assign fringe benefits on the same basis as they would if services were compensated, as long as such costs meet all other stated criteria.

Response: No change. The Circular provides that paid fringe benefits for volunteer services that are reasonable, allowable and allocable may be included in the valuation of the services. This is a liberalization of the current Circular. It recognizes that some donated services originate from third parties that pay fringe benefits.

Comment: The requirement to develop unit cost information is not applicable to scientific research and related activities.

Response: No change. The Circular covers many programs, other than research where unit cost data are useful. The Circular does not require the development of unit cost data for those programs where it is not practical to do so.

Comment: The criteria for informing the Federal agency of unneeded property should be changed to conform to the criteria in the grants management common rule for State and local governments.

Response: Changed the criteria used for reporting unneeded property. The Circular now provides for recipients to use the fair market value of unneeded property rather than its acquisition cost to determine whether the property must be reported to the Federal agency. This change is consistent with the provisions of the Common Rule.

Comment: Interest earned on Federal advances of grant funds should be returned to a single entity (e.g., the Department of the Treasury) rather than each individual Federal awarding agency.

Response: Amended Circular to provide that all interest earned on

Federal advances shall be remitted to the Department of Health and Human Services (DHHS). DHHS is the largest granting agency and administers a sophisticated payment management system.

Comment: The definition of program income should provide for deduction of costs incidental to program income.

Response: No change. Because of the different amounts and types of program income, OMB believes the accounting for costs incurred in connection with program income should be considered on a program-by-program basis.

Comment: All program income regardless of whether the deductive, matching, or additive alternative is authorized, should be used by recipients before they request additional cash payments.

Response: Amended the Circular to clarify that all program income should be used by recipients before they request additional cash payments.

Comment: The requirement for recipients to ". . . follow a procedure to avoid purchasing unnecessary or duplicative items" is resulting in costly delays in purchasing research equipment. Federal auditors have interpreted this requirement to mean recipients must establish a costly equipment screening process.

Response: Amended the Circular to provide that recipients must determine, through an appropriate process, that existing equipment is not available to meet the new requirement. The original requirement was not intended to establish a costly equipment screening process.

Comment: Authority to incur pre-award costs, to initiate one time extensions of assistance agreements, and to carry forward unobligated balances should not require prior approval unless specifically required by the Federal agency.

Response: Amended the Circular to provide that recipients of research awards, because of the nature of the programs, are not required to obtain prior approval to: (1) incur pre-award costs, (2) extend an assistance program, or (3) carry forward unobligated balances unless specifically required by the Federal agency.

After-the-Award Requirements

Comment: The Circular allows Federal agencies to recover funds on the basis of a later audit or review. A number of commenters said the only way funds should be recovered after the closeout of an award is on the basis of an audit.

Response: No change. Grantees which certify that rate agreements contain no unallowable cost are required to reimburse the Federal Government for any cost that is later found to be unallowable through legal means other than audit.

John B. Arthur,

Assistant Director for Administration.

Circular No. A-110 Revised

To the Heads of Executive Departments and Establishments

Subject: Uniform Administrative Requirements for Grants and Agreements With Institutions of Higher Education, Hospitals, and Other Non-Profit Organizations

1. *Purpose.* This Circular sets forth standards for obtaining consistency and uniformity among Federal agencies in the administration of grants to and agreements with institutions of higher education, hospitals, and other non-profit organizations.

2. *Authority.* Circular A-110 is issued under the authority of 31 U.S.C. 503 (the Chief Financial Officers Act), 31 U.S.C. 1111, 41 U.S.C. 405 (the Office of Federal Procurement Policy Act), Reorganization Plan No. 2 of 1970, and E.O. 11541 ("Prescribing the Duties of the Office of Management and Budget and the Domestic Policy Council in the Executive Office of the President").

3. *Policy.* Except as provided herein, the standards set forth in this Circular are applicable to all Federal agencies. If any statute specifically prescribes policies or specific requirements that differ from the standards provided herein, the provisions of the statute shall govern.

The provisions of the sections of this Circular shall be applied by Federal agencies to recipients. Recipients shall apply the provisions of this Circular to subrecipients performing substantive work under grants and agreements that are passed through or awarded by the primary recipient, if such subrecipients are organizations described in paragraph 1.

This Circular does not apply to grants, contracts, or other agreements between the Federal Government and units of State or local governments covered by OMB Circular A-102, "Grants and Cooperative Agreements with State and Local Governments," and the Federal agencies' grants management common rule which standardized and codified the administrative requirements Federal agencies impose on State and local grantees. In addition, subawards and contracts to State or local governments are not covered by this Circular. However, this Circular applies to subawards made by State and local governments to organizations covered by this Circular. Federal agencies may apply the provisions of this Circular to commercial organizations, foreign governments, organizations under the jurisdiction of foreign governments, and international organizations.

4. *Definitions.* Definitions of key terms used in this Circular are contained in Section _____.2 in the Attachment.

5. *Required Action.* The specific requirements and responsibilities of Federal agencies and institutions of higher education, hospitals, and other non-profit organizations are set forth in this Circular. Federal agencies responsible for awarding and administering grants to and other agreements with organizations described in paragraph 1 shall adopt the language in the Circular unless different provisions are required by Federal statute or are approved by OMB.

6. *OMB Responsibilities.* OMB will review agency regulations and implementation of this Circular, and will provide interpretations of policy requirements and assistance to insure effective and efficient implementation. Any exceptions will be subject to approval by OMB, as indicated in Section _____.4 in the Attachment. Exceptions will only be made in particular cases where adequate justification is presented.

7. *Information Contact.* Further information concerning this Circular may be obtained by contacting the Office of Federal Financial Management, Office of Management and Budget, Washington, DC 20503, Telephone (202) 395-3993.

8. *Termination Review Date.* This Circular will have a policy review three years from date of issuance.

9. *Effective Date.* The standards set forth in this Circular which affect Federal agencies will be effective 30 days after publication of the final revision in the **Federal Register**. Those standards which Federal agencies impose on grantees will be adopted by agencies in codified regulations within six months after publication in the **Federal Register**. Earlier implementation is encouraged.

Leon E. Panetta,

Director.

Appendix A—Contract Provisions

Subpart A—General

_____.1 Purpose. This Circular establishes uniform administrative requirements for Federal grants and agreements awarded to institutions of higher education, hospitals, and other non-profit organizations. Federal awarding agencies shall not impose additional or inconsistent requirements, except as provided in Sections _____.4, and _____.14 or unless specifically required by Federal statute or executive order. Non-profit organizations that implement Federal programs for the States are also subject to State requirements.

_____.2 Definitions.

(a) *Accrued expenditures* means the charges incurred by the recipient during a given period requiring the provision of funds for: (1) Goods and other tangible property received; (2) services performed by employees, contractors, subrecipients, and other payees; and, (3) other amounts becoming owed under programs for which no current services or performance is required.

(b) *Accrued income* means the sum of: (1) Earnings during a given period from (i) services performed by the recipient, and (ii) goods and other tangible property delivered to purchasers, and (2) amounts becoming owed to the recipient for which no current services or performance is required by the recipient.

(c) *Acquisition cost of equipment* means the net invoice price of the equipment, including the cost of modifications, attachments, accessories, or auxiliary apparatus necessary to make the property usable for the purpose for which it was acquired. Other charges, such as the cost of installation, transportation, taxes, duty or protective in-transit insurance, shall be included or excluded from the unit acquisition cost in accordance with the recipient's regular accounting practices.

(d) *Advance* means a payment made by Treasury check or other appropriate payment mechanism to a recipient upon its request either before outlays are made by the recipient or through the use of predetermined payment schedules.

(e) *Award* means financial assistance that provides support or stimulation to accomplish a public purpose. Awards include grants and other agreements in the form of money or property in lieu of money, by the Federal Government to an eligible recipient. The term does not include: technical assistance, which provides services instead of money; other assistance in the form of loans, loan guarantees, interest subsidies, or insurance; direct payments of any kind to individuals; and, contracts which are required to be entered into and administered under procurement laws and regulations.

(f) *Cash contributions* means the recipient's cash outlay, including the outlay of money contributed to the recipient by third parties.

(g) *Closeout* means the process by which a Federal awarding agency determines that all applicable administrative actions and all required work of the award have been completed by the recipient and Federal awarding agency.

(h) *Contract* means a procurement contract under an award or subaward, and a procurement subcontract under a recipient's or subrecipient's contract.

(i) *Cost sharing or matching* means that portion of project or program costs not borne by the Federal Government.

(j) *Date of completion* means the date on which all work under an award is completed or the date on the award document, or any supplement or amendment thereto, on which Federal sponsorship ends.

(k) *Disallowed costs* means those charges to an award that the Federal awarding agency determines to be unallowable, in accordance with the applicable Federal cost principles or other terms and conditions contained in the award.

(l) *Equipment* means tangible nonexpendable personal property including exempt property charged directly to the award having a useful life of more than one year and an acquisition cost of $5000 or more per unit. However, consistent with recipient policy, lower limits may be established.

(m) *Excess property* means property under the control of any Federal awarding agency that, as determined by the head thereof, is no longer required for its needs or the discharge of its responsibilities.

(n) *Exempt property* means tangible personal property acquired in whole or in part with Federal funds, where the Federal awarding agency has statutory authority to vest title in the recipient without further obligation to the Federal Government. An example of exempt property authority is contained in the Federal Grant and Cooperative Agreement Act (31 U.S.C. 6306), for property acquired under an award to conduct basic or applied research by a non-profit institution of higher education or non-profit organization whose principal purpose is conducting scientific research.

(o) *Federal awarding agency* means the Federal agency that provides an award to the recipient.

(p) *Federal funds authorized* means the total amount of Federal funds obligated by the Federal Government for use by the recipient. This amount may include any authorized carryover of unobligated funds from prior funding periods when permitted by agency regulations or agency implementing instructions.

(q) *Federal share* of real property, equipment, or supplies means that percentage of the property's acquisition costs and any improvement expenditures paid with Federal funds.

(r) *Funding period* means the period of time when Federal funding is available for obligation by the recipient.

(s) *Intangible property and debt instruments* means, but is not limited to, trademarks, copyrights, patents and patent applications and such property as loans, notes and other debt instruments, lease agreements, stock and other instruments of property ownership, whether considered tangible or intangible.

(t) *Obligations* means the amounts of orders placed, contracts and grants awarded, services received and similar transactions during a given period that require payment by the recipient during the same or a future period.

(u) *Outlays or expenditures* means charges made to the project or program. They may be reported on a cash or accrual basis. For reports prepared on a cash basis, outlays are the sum of cash disbursements for direct charges for goods and services, the amount of indirect expense charged, the value of third party in-kind contributions applied and the amount of cash advances and payments made to subrecipients. For reports prepared on an accrual basis, outlays are the sum of cash disbursements for direct charges for goods and services, the amount of indirect expense incurred, the value of in-kind contributions applied, and the net increase (or decrease) in the amounts owed by the recipient for goods and other property received, for services performed by employees, contractors, subrecipients and other payees and other amounts becoming owed under programs for which no current services or performance are required.

(v) *Personal property* means property of any kind except real property. It may be tangible, having physical existence, or intangible, having no physical existence, such as copyrights, patents, or securities.

(w) *Prior approval* means written approval by an authorized official evidencing prior consent.

(x) *Program income* means gross income earned by the recipient that is directly generated by a supported activity or earned as a result of the award (see exclusions in paragraphs _____.24 (e) and (h)). Program income includes, but is not limited to, income from fees for services performed, the use or rental of real or personal property acquired under federally-funded projects, the sale of commodities or items fabricated under an award, license fees and royalties on patents and copyrights, and interest on loans made with award funds. Interest earned on advances of Federal funds is not program income. Except as otherwise provided in Federal awarding agency regulations or the terms and conditions of the award, program income does not include the receipt of principal on loans, rebates, credits, discounts, etc., or interest earned on any of them.

(y) *Project costs* means all allowable costs, as set forth in the applicable Federal cost principles, incurred by a recipient and the value of the contributions made by third parties in accomplishing the objectives of the award during the project period.

(z) *Project period* means the period established in the award document during which Federal sponsorship begins and ends.

(aa) *Property* means, unless otherwise stated, real property, equipment, intangible property and debt instruments.

(bb) *Real property* means land, including land improvements, structures and appurtenances thereto, but excludes movable machinery and equipment.

(cc) *Recipient* means an organization receiving financial assistance directly from Federal awarding agencies to carry out a project or program. The term includes public and private institutions of higher education, public and private hospitals, and other quasi-public and private non-profit organizations such as, but not limited to, community action agencies, research institutes, educational associations, and health centers. The term may include commercial organizations, foreign or international organizations (such as agencies of the United Nations) which are recipients, subrecipients, or contractors or subcontractors of recipients or subrecipients at the discretion of the Federal awarding agency. The term does not include government-owned contractor-operated facilities or research centers providing continued support for mission-oriented, large-scale programs that are government-owned or controlled, or are designated as federally-funded research and development centers.

(dd) *Research and development* means all research activities, both basic and applied, and all development activities that are supported at universities, colleges, and other non-profit institutions. "Research" is defined as a systematic study directed toward fuller scientific knowledge or understanding of the subject studied. "Development" is the systematic use of knowledge and understanding gained from research directed toward the production of useful materials, devices, systems, or methods, including design and development of prototypes and processes. The term research also includes activities involving the training of individuals in research techniques where such activities utilize the same facilities as other research and development activities and where such activities are not included in the instruction function.

(ee) *Small awards* means a grant or cooperative agreement not exceeding the small purchase threshold fixed at 41 U.S.C. 403(11) (currently $25,000).

(ff) *Subaward* means an award of financial assistance in the form of money, or property in lieu of money, made under an award by a recipient to an eligible subrecipient or by a subrecipient to a lower tier subrecipient. The term includes financial assistance when provided by any legal agreement, even if the agreement is called a contract, but does not include procurement of goods and services nor does it include any form of assistance which is excluded from the definition of "award" in paragraph ____(e).

(gg) *Subrecipient* means the legal entity to which a subaward is made and which is accountable to the recipient for the use of the funds provided. The term may include foreign or international organizations (such as agencies of the United Nations) at the discretion of the Federal awarding agency.

(hh) *Supplies* means all personal property excluding equipment, intangible property, and debt instruments as defined in this section, and inventions of a contractor conceived or first actually reduced to practice in the performance of work under a funding agreement ("subject inventions"), as defined in 37 CFR part 401, "Rights to Inventions Made by Nonprofit Organizations and Small Business Firms Under Government Grants, Contracts, and Cooperative Agreements."

(ii) *Suspension* means an action by a Federal awarding agency that temporarily withdraws Federal sponsorship under an award, pending corrective action by the recipient or pending a decision to terminate the award by the Federal awarding agency. Suspension of an award is a separate action from suspension under Federal agency regulations implementing E.O.s 12549 and 12689, "Debarment and Suspension."

(jj) *Termination* means the cancellation of Federal sponsorship, in whole or in part, under an agreement at any time prior to the date of completion.

(kk) *Third party in-kind contributions* means the value of non-cash contributions provided by non-Federal third parties. Third party in-kind contributions may be in the form of real property, equipment, supplies and other expendable property, and the value of goods and services directly benefiting and specifically identifiable to the project or program.

(ll) *Unliquidated obligations*, for financial reports prepared on a cash basis, means the amount of obligations incurred by the recipient that have not been paid. For reports prepared on an accrued expenditure basis, they represent the amount of obligations incurred by the recipient for which an outlay has not been recorded.

(mm) *Unobligated balance* means the portion of the funds authorized by the Federal awarding agency that has not been obligated by the recipient and is determined by deducting the cumulative obligations from the cumulative funds authorized.

(nn) *Unrecovered indirect cost* means the difference between the amount awarded and the amount which could have been awarded under the recipient's approved negotiated indirect cost rate.

(oo) *Working capital advance* means a procedure where by funds are advanced to the recipient to cover its estimated disbursement needs for a given initial period.

_____.3 Effect on other issuances. For awards subject to this Circular, all administrative requirements of codified program regulations, program manuals, handbooks and other nonregulatory materials which are inconsistent with the requirements of this Circular shall be superseded, except to the extent they are required by statute, or authorized in accordance with the deviations provision in Section _____.4.

_____.4 Deviations. The Office of Management and Budget (OMB) may grant exceptions for classes of grants or recipients subject to the requirements of this Circular when exceptions are not prohibited by statute. However, in the interest of maximum uniformity, exceptions from the requirements of this Circular shall be permitted only in unusual circumstances. Federal awarding agencies may apply more restrictive requirements to a class of recipients when approved by OMB. Federal awarding agencies may apply less restrictive requirements when awarding small awards, except for those requirements which are statutory. Exceptions on a case-by-case basis may also be made by Federal awarding agencies.

_____.5 Subawards. Unless sections of this Circular specifically exclude subrecipients from coverage, the provisions of this Circular shall be applied to subrecipients performing work under awards if such subrecipients are institutions of higher education, hospitals or other non-profit organizations. State and local government subrecipients are subject to the provisions of regulations implementing the grants management common rule, "Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments," published at 53 FR 8034 (3/11/88).

Subpart B—Pre-Award Requirements

_____.10 Purpose. Sections _____.11 through _____.17 prescribes forms and instructions and other pre-award matters to be used in applying for Federal awards.

_____.11 Pre-award policies.

(a) Use of Grants and Cooperative Agreements, and Contracts. In each instance, the Federal awarding agency shall decide on the appropriate award instrument (i.e., grant, cooperative agreement, or contract). The Federal Grant and Cooperative Agreement Act (31 U.S.C. 6301–08) governs the use of grants, cooperative agreements and contracts. A grant or cooperative agreement shall be used only when the principal purpose of a transaction is to accomplish a public purpose of support or stimulation authorized by

Federal statute. The statutory criterion for choosing between grants and cooperative agreements is that for the latter, "substantial involvement is expected between the executive agency and the State, local government, or other recipient when carrying out the activity contemplated in the agreement." Contracts shall be used when the principal purpose is acquisition of property or services for the direct benefit or use of the Federal Government.

(b) Public Notice and Priority Setting. Federal awarding agencies shall notify the public of its intended funding priorities for discretionary grant programs, unless funding priorities are established by Federal statute.

_____.12 Forms for applying for Federal assistance.

(a) Federal awarding agencies shall comply with the applicable report clearance requirements of 5 CFR part 1320, "Controlling Paperwork Burdens on the Public," with regard to all forms used by the Federal awarding agency in place of or as a supplement to the Standard Form 424 (SF–424) series.

(b) Applicants shall use the SF–424 series or those forms and instructions prescribed by the Federal awarding agency.

(c) For Federal programs covered by E.O. 12372, "Intergovernmental Review of Federal Programs," the applicant shall complete the appropriate sections of the SF–424 (Application for Federal Assistance) indicating whether the application was subject to review by the State Single Point of Contact (SPOC). The name and address of the SPOC for a particular State can be obtained from the Federal awarding agency or the Catalog of Federal Domestic Assistance. The SPOC shall advise the applicant whether the program for which application is made has been selected by that State for review.

(d) Federal awarding agencies that do not use the SF–424 form should indicate whether the application is subject to review by the State under E.O. 12372.

_____.13 Debarment and suspension. Federal awarding agencies and recipients shall comply with the nonprocurement debarment and suspension common rule implementing E.O.s 12549 and 12689, "Debarment and Suspension." This common rule restricts subawards and contracts with certain parties that are debarred, suspended or otherwise excluded from or ineligible for participation in Federal assistance programs or activities.

_____.14 Special award conditions. If an applicant or recipient: (a) has a history of poor performance, (b) is not financially stable, (c) has a management system that does not meet the standards prescribed in this Circular, (d) has not conformed to the terms and conditions of a previous award, or (e) is not otherwise responsible, Federal awarding agencies may impose additional requirements as needed, provided that such applicant or recipient is notified in writing as to: the nature of the additional requirements, the reason why the additional requirements are being imposed, the nature of the corrective action needed, the time allowed for completing the corrective actions, and the method for requesting reconsideration of the additional requirements imposed. Any special conditions shall be promptly removed once the conditions that prompted them have been corrected.

_____.15 Metric system of measurement. The Metric Conversion Act, as amended by the Omnibus Trade and Competitiveness Act (15 U.S.C. 205) declares that the metric system is the preferred measurement system for U.S. trade and commerce. The Act requires each Federal agency to establish a date or dates in consultation with the Secretary of Commerce, when the metric system of measurement will be used in the agency's procurements, grants, and other business-related activities. Metric implementation may take longer where the use of the system is initially impractical or likely to cause significant inefficiencies in the accomplishment of federally-funded activities. Federal awarding agencies shall follow the provisions of E.O. 12770, "Metric Usage in Federal Government Programs."

_____.16 Resource Conservation and Recovery Act (RCRA) (Pub. L. 94–580 codified at 42 U.S.C. 6962). Under the Act, any State agency or agency of a political subdivision of a State which is using appropriated Federal funds must comply with Section 6002. Section 6002 requires that preference be given in procurement programs to the purchase of specific products containing recycled materials identified in guidelines developed by the Environmental Protection Agency (EPA) (40 CFR parts 247–254). Accordingly, State and local institutions of higher education, hospitals, and non-profit organizations that receive direct Federal awards or other Federal funds shall give preference in their procurement programs funded with Federal funds to the purchase of recycled products pursuant to the EPA guidelines.

_____.17 Certifications and representations. Unless prohibited by statute or codified regulation, each Federal awarding agency is authorized and encouraged to allow recipients to submit certifications and representations required by statute, executive order, or regulation on an annual basis, if the recipients have ongoing and continuing relationships with the agency. Annual certifications and representations shall be signed by responsible officials with the authority to ensure recipients' compliance with the pertinent requirements.

Subpart C—Post-Award Requirements

Financial and Program Management

_____.20 Purpose of financial and program management. Sections _____.21 through _____.28 prescribe standards for financial management systems, methods for making payments and rules for: satisfying cost sharing and matching requirements, accounting for program income, budget revision approvals, making audits, determining allowability of cost, and establishing fund availability.

_____.21 Standards for financial management systems.

(a) Federal awarding agencies shall require recipients to relate financial data to performance data and develop unit cost information whenever practical.

(b) Recipients' financial management systems shall provide for the following.

(1) Accurate, current and complete disclosure of the financial results of each federally-sponsored project or program in accordance with the reporting requirements set forth in Section _____.52. If a Federal awarding agency requires reporting on an accrual basis from a recipient that maintains its records on other than an accrual basis, the recipient shall not be required to establish an accrual accounting system. These recipients may develop such accrual data for its reports on the basis of an analysis of the documentation on hand.

(2) Records that identify adequately the source and application of funds for federally-sponsored activities. These records shall contain information pertaining to Federal awards, authorizations, obligations, unobligated balances, assets, outlays, income and interest.

(3) Effective control over and accountability for all funds, property and other assets. Recipients shall adequately safeguard all such assets and assure they are used solely for authorized purposes.

(4) Comparison of outlays with budget amounts for each award. Whenever appropriate, financial information should be related to performance and unit cost data.

(5) Written procedures to minimize the time elapsing between the transfer of funds to the recipient from the U.S. Treasury and the issuance or redemption of checks, warrants or payments by other means for program purposes by the recipient. To the extent that the provisions of the Cash Management Improvement Act (CMIA) (Pub. L. 101–453) govern, payment methods of State agencies, instrumentalities, and fiscal agents shall be consistent with CMIA Treasury-State Agreements or the CMIA default procedures codified at 31 CFR part 205, "Withdrawal of Cash from the Treasury for Advances under Federal Grant and Other Programs."

(6) Written procedures for determining the reasonableness, allocability and allowability of costs in accordance with the provisions of the applicable Federal cost principles and the terms and conditions of the award.

(7) Accounting records including cost accounting records that are supported by source documentation.

(c) Where the Federal Government guarantees or insures the repayment of money borrowed by the recipient, the Federal awarding agency, at its discretion, may require adequate bonding and insurance if the bonding and insurance requirements of the recipient are not deemed adequate to protect the interest of the Federal Government.

(d) The Federal awarding agency may require adequate fidelity bond coverage where the recipient lacks sufficient coverage to protect the Federal Government's interest.

(e) Where bonds are required in the situations described above, the bonds shall be obtained from companies holding certificates of authority as acceptable sureties, as prescribed in 31 CFR part 223, "Surety Companies Doing Business with the United States."

_____.22 Payment.

(a) Payment methods shall minimize the time elapsing between the transfer of funds

from the United States Treasury and the issuance or redemption of checks, warrants, or payment by other means by the recipients. Payment methods of State agencies or instrumentalities shall be consistent with Treasury-State CMIA agreements or default procedures codified at 31 CFR part 205.

(b) Recipients are to be paid in advance, provided they maintain or demonstrate the willingness to maintain: (1) written procedures that minimize the time elapsing between the transfer of funds and disbursement by the recipient, and (2) financial management systems that meet the standards for fund control and accountability as established in Section _____.21. Cash advances to a recipient organization shall be limited to the minimum amounts needed and be timed to be in accordance with the actual, immediate cash requirements of the recipient organization in carrying out the purpose of the approved program or project. The timing and amount of cash advances shall be as close as is administratively feasible to the actual disbursements by the recipient organization for direct program or project costs and the proportionate share of any allowable indirect costs.

(c) Whenever possible, advances shall be consolidated to cover anticipated cash needs for all awards made by the Federal awarding agency to the recipient.

(1) Advance payment mechanisms include, but are not limited to, Treasury check and electronic funds transfer.

(2) Advance payment mechanisms are subject to 31 CFR part 205.

(3) Recipients shall be authorized to submit a requests for advances and reimbursements at least monthly when electronic fund transfers are not used.

(d) Requests for Treasury check advance payment shall be submitted on SF–270, "Request for Advance or Reimbursement," or other forms as may be authorized by OMB. This form is not to be used when Treasury check advance payments are made to the recipient automatically through the use of a predetermined payment schedule or if precluded by special Federal awarding agency instructions for electronic funds transfer.

(e) Reimbursement is the preferred method when the requirements in paragraph (b) cannot be met. Federal awarding agencies may also use this method on any construction agreement, or if the major portion of the construction project is accomplished through private market financing or Federal loans, and the Federal assistance constitutes a minor portion of the project.

(1) When the reimbursement method is used, the Federal awarding agency shall make payment within 30 days after receipt of the billing, unless the billing is improper.

(2) Recipients shall be authorized to submit a request for reimbursement at least monthly when electronic funds transfers are not used.

(f) If a recipient cannot meet the criteria for advance payments and the Federal awarding agency has determined that reimbursement is not feasible because the recipient lacks sufficient working capital, the Federal awarding agency may provide cash on a working capital advance basis. Under this procedure, the Federal awarding agency shall advance cash to the recipient to cover its estimated disbursement needs for an initial period generally geared to the awardee's disbursing cycle. Thereafter, the Federal awarding agency shall reimburse the recipient for its actual cash disbursements. The working capital advance method of payment shall not be used for recipients unwilling or unable to provide timely advances to their subrecipient to meet the subrecipient's actual cash disbursements.

(g) To the extent available, recipients shall disburse funds available from repayments to and interest earned on a revolving fund, program income, rebates, refunds, contract settlements, audit recoveries and interest earned on such funds before requesting additional cash payments.

(h) Unless otherwise required by statute, Federal awarding agencies shall not withhold payments for proper charges made by recipients at any time during the project period unless (1) or (2) apply.

(1) A recipient has failed to comply with the project objectives, the terms and conditions of the award, or Federal reporting requirements.

(2) The recipient or subrecipient is delinquent in a debt to the United States as defined in OMB Circular A–129, "Managing Federal Credit Programs." Under such conditions, the Federal awarding agency may, upon reasonable notice, inform the recipient that payments shall not be made for obligations incurred after a specified date until the conditions are corrected or the indebtedness to the Federal Government is liquidated.

(i) Standards governing the use of banks and other institutions as depositories of funds advanced under awards are as follows.

(1) Except for situations described in paragraph (i)(2), Federal awarding agencies shall not require separate depository accounts for funds provided to a recipient or establish any eligibility requirements for depositories for funds provided to a recipient. However, recipients must be able to account for the receipt, obligation and expenditure of funds.

(2) Advances of Federal funds shall be deposited and maintained in insured accounts whenever possible.

(j) Consistent with the national goal of expanding the opportunities for women-owned and minority-owned business enterprises, recipients shall be encouraged to use women-owned and minority-owned banks (a bank which is owned at least 50 percent by women or minority group members).

(k) Recipients shall maintain advances of Federal funds in interest bearing accounts, unless (1), (2) or (3) apply.

(1) The recipient receives less than $120,000 in Federal awards per year.

(2) The best reasonably available interest bearing account would not be expected to earn interest in excess of $250 per year on Federal cash balances.

(3) The depository would require an average or minimum balance so high that it would not be feasible within the expected Federal and non-Federal cash resources.

(l) For those entities where CMIA and its implementing regulations do not apply, interest earned on Federal advances deposited in interest bearing accounts shall be remitted annually to Department of Health and Human Services, Payment Management System, Rockville, MD 20852. Interest amounts up to $250 per year may be retained by the recipient for administrative expense. State universities and hospitals shall comply with CMIA, as it pertains to interest. If an entity subject to CMIA uses its own funds to pay pre-award costs for discretionary awards without prior written approval from the Federal awarding agency, it waives its right to recover the interest under CMIA.

(m) Except as noted elsewhere in this Circular, only the following forms shall be authorized for the recipients in requesting advances and reimbursements. Federal agencies shall not require more than an original and two copies of these forms.

(1) SF–270, Request for Advance or Reimbursement. Each Federal awarding agency shall adopt the SF–270 as a standard form for all nonconstruction programs when electronic funds transfer or predetermined advance methods are not used. Federal awarding agencies, however, have the option of using this form for construction programs in lieu of the SF–271, "Outlay Report and Request for Reimbursement for Construction Programs."

(2) SF–271, Outlay Report and Request for Reimbursement for Construction Programs. Each Federal awarding agency shall adopt the SF–271 as the standard form to be used for requesting reimbursement for construction programs. However, a Federal awarding agency may substitute the SF–270 when the Federal awarding agency determines that it provides adequate information to meet Federal needs.

_____.23 Cost sharing or matching.

(a) All contributions, including cash and third party in-kind, shall be accepted as part of the recipient's cost sharing or matching when such contributions meet all of the following criteria.

(1) Are verifiable from the recipient's records.

(2) Are not included as contributions for any other federally-assisted project or program.

(3) Are necessary and reasonable for proper and efficient accomplishment of project or program objectives.

(4) Are allowable under the applicable cost principles.

(5) Are not paid by the Federal Government under another award, except where authorized by Federal statute to be used for cost sharing or matching.

(6) Are provided for in the approved budget when required by the Federal awarding agency.

(7) Conform to other provisions of this Circular, as applicable.

(b) Unrecovered indirect costs may be included as part of cost sharing or matching only with the prior approval of the Federal awarding agency.

(c) Values for recipient contributions of services and property shall be established in accordance with the applicable cost principles. If a Federal awarding agency authorizes recipients to donate buildings or land for construction/facilities acquisition

projects or long-term use, the value of the donated property for cost sharing or matching shall be the lesser of (1) or (2).

(1) The certified value of the remaining life of the property recorded in the recipient's accounting records at the time of donation.

(2) The current fair market value. However, when there is sufficient justification, the Federal awarding agency may approve the use of the current fair market value of the donated property, even if it exceeds the certified value at the time of donation to the project.

(d) Volunteer services furnished by professional and technical personnel, consultants, and other skilled and unskilled labor may be counted as cost sharing or matching if the service is an integral and necessary part of an approved project or program. Rates for volunteer services shall be consistent with those paid for similar work in the recipient's organization. In those instances in which the required skills are not found in the recipient organization, rates shall be consistent with those paid for similar work in the labor market in which the recipient competes for the kind of services involved. In either case, paid fringe benefits that are reasonable, allowable, and allocable may be included in the valuation.

(e) When an employer other than the recipient furnishes the services of an employee, these services shall be valued at the employee's regular rate of pay (plus an amount of fringe benefits that are reasonable, allowable, and allocable, but exclusive of overhead costs), provided these services are in the same skill for which the employee is normally paid.

(f) Donated supplies may include such items as expendable equipment, office supplies, laboratory supplies or workshop and classroom supplies. Value assessed to donated supplies included in the cost sharing or matching share shall be reasonable and shall not exceed the fair market value of the property at the time of the donation.

(g) The method used for determining cost sharing or matching for donated equipment, buildings and land for which title passes to the recipient may differ according to the purpose of the award, if (1) or (2) apply.

(1) If the purpose of the award is to assist the recipient in the acquisition of equipment, buildings or land, the total value of the donated property may be claimed as cost sharing or matching.

(2) If the purpose of the award is to support activities that require the use of equipment, buildings or land, normally only depreciation or use charges for equipment and buildings may be made. However, the full value of equipment or other capital assets and fair rental charges for land may be allowed, provided that the Federal awarding agency has approved the charges.

(h) The value of donated property shall be determined in accordance with the usual accounting policies of the recipient, with the following qualifications.

(1) The value of donated land and buildings shall not exceed its fair market value at the time of donation to the recipient as established by an independent appraiser (e.g., certified real property appraiser or General Services Administration representative) and certified by a responsible official of the recipient.

(2) The value of donated equipment shall not exceed the fair market value of equipment of the same age and condition at the time of donation.

(3) The value of donated space shall not exceed the fair rental value of comparable space as established by an independent appraisal of comparable space and facilities in a privately-owned building in the same locality.

(4) The value of loaned equipment shall not exceed its fair rental value.

(5) The following requirements pertain to the recipient's supporting records for in-kind contributions from third parties.

(i) Volunteer services shall be documented and, to the extent feasible, supported by the same methods used by the recipient for its own employees.

(ii) The basis for determining the valuation for personal service, material, equipment, buildings and land shall be documented.

_____.24 Program income.

(a) Federal awarding agencies shall apply the standards set forth in this section in requiring recipient organizations to account for program income related to projects financed in whole or in part with Federal funds.

(b) Except as provided in paragraph (h) below, program income earned during the project period shall be retained by the recipient and, in accordance with Federal awarding agency regulations or the terms and conditions of the award, shall be used in one or more of the ways listed in the following.

(1) Added to funds committed to the project by the Federal awarding agency and recipient and used to further eligible project or program objectives.

(2) Used to finance the non-Federal share of the project or program.

(3) Deducted from the total project or program allowable cost in determining the net allowable costs on which the Federal share of costs is based.

(c) When an agency authorizes the disposition of program income as described in paragraphs (b)(1) or (b)(2), program income in excess of any limits stipulated shall be used in accordance with paragraph (b)(3).

(d) In the event that the Federal awarding agency does not specify in its regulations or the terms and conditions of the award how program income is to be used, paragraph (b)(3) shall apply automatically to all projects or programs except research. For awards that support research, paragraph (b)(1) shall apply automatically unless the awarding agency indicates in the terms and conditions another alternative on the award or the recipient is subject to special award conditions, as indicated in Section _____.14.

(e) Unless Federal awarding agency regulations or the terms and conditions of the award provide otherwise, recipients shall have no obligation to the Federal Government regarding program income earned after the end of the project period.

(f) If authorized by Federal awarding agency regulations or the terms and conditions of the award, costs incident to the generation of program income may be deducted from gross income to determine program income, provided these costs have not been charged to the award.

(g) Proceeds from the sale of property shall be handled in accordance with the requirements of the Property Standards (See Sections _____.30 through _____.37).

(h) Unless Federal awarding agency regulations or the terms and condition of the award provide otherwise, recipients shall have no obligation to the Federal Government with respect to program income earned from license fees and royalties for copyrighted material, patents, patent applications, trademarks, and inventions produced under an award. However, Patent and Trademark Amendments (35 U.S.C. 18) apply to inventions made under an experimental, developmental, or research award.

_____.25 Revision of budget and program plans.

(a) The budget plan is the financial expression of the project or program as approved during the award process. It may include either the Federal and non-Federal share, or only the Federal share, depending upon Federal awarding agency requirements. It shall be related to performance for program evaluation purposes whenever appropriate.

(b) Recipients are required to report deviations from budget and program plans, and request prior approvals for budget and program plan revisions, in accordance with this section.

(c) For nonconstruction awards, recipients shall request prior approvals from Federal awarding agencies for one or more of the following program or budget related reasons.

(1) Change in the scope or the objective of the project or program (even if there is no associated budget revision requiring prior written approval).

(2) Change in a key person specified in the application or award document.

(3) The absence for more than three months, or a 25 percent reduction in time devoted to the project, by the approved project director or principal investigator.

(4) The need for additional Federal funding.

(5) The transfer of amounts budgeted for indirect costs to absorb increases in direct costs, or vice versa, if approval is required by the Federal awarding agency.

(6) The inclusion, unless waived by the Federal awarding agency, of costs that require prior approval in accordance with OMB Circular A–21, "Cost Principles for Institutions of Higher Education," OMB Circular A–122, "Cost Principles for Non-Profit Organizations," or 45 CFR part 74 Appendix E, "Principles for Determining Costs Applicable to Research and Development under Grants and Contracts with Hospitals," or 48 CFR part 31, "Contract Cost Principles and Procedures," as applicable.

(7) The transfer of funds allotted for training allowances (direct payment to trainees) to other categories of expense.

(8) Unless described in the application and funded in the approved awards, the subaward, transfer or contracting out of any work under an award. This provision does not apply to the purchase of supplies, material, equipment or general support services.

(d) No other prior approval requirements for specific items may be imposed unless a deviation has been approved by OMB.

(e) Except for requirements listed in paragraphs (c)(1) and (c)(4) of this section, Federal awarding agencies are authorized, at their option, to waive cost-related and administrative prior written approvals required by this Circular and OMB Circulars A–21 and A–122. Such waivers may include authorizing recipients to do any one or more of the following.

(1) Incur pre-award costs 90 calendar days prior to award or more than 90 calendar days with the prior approval of the Federal awarding agency. All pre-award costs are incurred at the recipient's risk (i.e., the Federal awarding agency is under no obligation to reimburse such costs if for any reason the recipient does not receive an award or if the award is less than anticipated and inadequate to cover such costs).

(2) Initiate a one-time extension of the expiration date of the award of up to 12 months unless one or more of the following conditions apply. For one-time extensions, the recipient must notify the Federal awarding agency in writing with the supporting reasons and revised expiration date at least 10 days before the expiration date specified in the award. This one-time extension may not be exercised merely for the purpose of using unobligated balances.

(i) The terms and conditions of award prohibit the extension.

(ii) The extension requires additional Federal funds.

(iii) The extension involves any change in the approved objectives or scope of the project.

(3) Carry forward unobligated balances to subsequent funding periods.

(4) For awards that support research, unless the Federal awarding agency provides otherwise in the award or in the agency's regulations, the prior approval requirements described in paragraph (e) are automatically waived (i.e., recipients need not obtain such prior approvals) unless one of the conditions included in paragraph (e)(2) applies.

(f) The Federal awarding agency may, at its option, restrict the transfer of funds among direct cost categories or programs, functions and activities for awards in which the Federal share of the project exceeds $100,000 and the cumulative amount of such transfers exceeds or is expected to exceed 10 percent of the total budget as last approved by the Federal awarding agency. No Federal awarding agency shall permit a transfer that would cause any Federal appropriation or part thereof to be used for purposes other than those consistent with the original intent of the appropriation.

(g) All other changes to nonconstruction budgets, except for the changes described in paragraph (j), do not require prior approval.

(h) For construction awards, recipients shall request prior written approval promptly from Federal awarding agencies for budget revisions whenever (1), (2) or (3) apply.

(1) The revision results from changes in the scope or the objective of the project or program.

(2) The need arises for additional Federal funds to complete the project.

(3) A revision is desired which involves specific costs for which prior written approval requirements may be imposed consistent with applicable OMB cost principles listed in Section _____.27.

(i) No other prior approval requirements for specific items may be imposed unless a deviation has been approved by OMB.

(j) When a Federal awarding agency makes an award that provides support for both construction and nonconstruction work, the Federal awarding agency may require the recipient to request prior approval from the Federal awarding agency before making any fund or budget transfers between the two types of work supported.

(k) For both construction and nonconstruction awards, Federal awarding agencies shall require recipients to notify the Federal awarding agency in writing promptly whenever the amount of Federal authorized funds is expected to exceed the needs of the recipient for the project period by more than $5000 or five percent of the Federal award, whichever is greater. This notification shall not be required if an application for additional funding is submitted for a continuation award.

(l) When requesting approval for budget revisions, recipients shall use the budget forms that were used in the application unless the Federal awarding agency indicates a letter of request suffices.

(m) Within 30 calendar days from the date of receipt of the request for budget revisions, Federal awarding agencies shall review the request and notify the recipient whether the budget revisions have been approved. If the revision is still under consideration at the end of 30 calendar days, the Federal awarding agency shall inform the recipient in writing of the date when the recipient may expect the decision.

_____.26 Non-Federal audits.

(a) Recipients and subrecipients that are institutions of higher education or other non-profit organizations shall be subject to the audit requirements contained in OMB Circular A–133, "Audits of Institutions of Higher Education and Other Non-Profit Institutions."

(b) State and local governments shall be subject to the audit requirements contained in the Single Audit Act (31 U.S.C. 7501–7) and Federal awarding agency regulations implementing OMB Circular A–128, "Audits of State and Local Governments."

(c) Hospitals not covered by the audit provisions of OMB Circular A–133 shall be subject to the audit requirements of the Federal awarding agencies.

(d) Commercial organizations shall be subject to the audit requirements of the Federal awarding agency or the prime recipient as incorporated into the award document.

_____.27 Allowable costs. For each kind of recipient, there is a set of Federal principles for determining allowable costs. Allowability of costs shall be determined in accordance with the cost principles applicable to the entity incurring the costs. Thus, allowability of costs incurred by State, local or federally-recognized Indian tribal governments is determined in accordance with the provisions of OMB Circular A–87, "Cost Principles for State and Local Governments." The allowability of costs incurred by non-profit organizations is determined in accordance with the provisions of OMB Circular A–122, "Cost Principles for Non-Profit Organizations." The allowability of costs incurred by institutions of higher education is determined in accordance with the provisions of OMB Circular A–21, "Cost Principles for Educational Institutions." The allowability of costs incurred by hospitals is determined in accordance with the provisions of Appendix E of 45 CFR part 74, "Principles for Determining Costs Applicable to Research and Development Under Grants and Contracts with Hospitals." The allowability of costs incurred by commercial organizations and those non-profit organizations listed in Attachment C to Circular A–122 is determined in accordance with the provisions of the Federal Acquisition Regulation (FAR) at 48 CFR part 31.

_____.28 Period of availability of funds. Where a funding period is specified, a recipient may charge to the grant only allowable costs resulting from obligations incurred during the funding period and any pre-award costs authorized by the Federal awarding agency.

Property Standards

_____.30 Purpose of property standards. Sections _____.31 through _____.37 set forth uniform standards governing management and disposition of property furnished by the Federal Government whose cost was charged to a project supported by a Federal award. Federal awarding agencies shall require recipients to observe these standards under awards and shall not impose additional requirements, unless specifically required by Federal statute. The recipient may use its own property management standards and procedures provided it observes the provisions of Sections _____.31 through _____.37.

_____.31 Insurance coverage. Recipients shall, at a minimum, provide the equivalent insurance coverage for real property and equipment acquired with Federal funds as provided to property owned by the recipient. Federally-owned property need not be insured unless required by the terms and conditions of the award.

_____.32 Real property. Each Federal awarding agency shall prescribe requirements for recipients concerning the use and disposition of real property acquired in whole or in part under awards. Unless otherwise provided by statute, such requirements, at a minimum, shall contain the following.

(a) Title to real property shall vest in the recipient subject to the condition that the recipient shall use the real property for the authorized purpose of the project as long as it is needed and shall not encumber the property without approval of the Federal awarding agency.

(b) The recipient shall obtain written approval by the Federal awarding agency for the use of real property in other federally-sponsored projects when the recipient

determines that the property is no longer needed for the purpose of the original project. Use in other projects shall be limited to those under federally-sponsored projects (i.e., awards) or programs that have purposes consistent with those authorized for support by the Federal awarding agency.

(c) When the real property is no longer needed as provided in paragraphs (a) and (b), the recipient shall request disposition instructions from the Federal awarding agency or its successor Federal awarding agency. The Federal awarding agency shall observe one or more of the following disposition instructions.

(1) The recipient may be permitted to retain title without further obligation to the Federal Government after it compensates the Federal Government for that percentage of the current fair market value of the property attributable to the Federal participation in the project.

(2) The recipient may be directed to sell the property under guidelines provided by the Federal awarding agency and pay the Federal Government for that percentage of the current fair market value of the property attributable to the Federal participation in the project (after deducting actual and reasonable selling and fix-up expenses, if any, from the sales proceeds). When the recipient is authorized or required to sell the property, proper sales procedures shall be established that provide for competition to the extent practicable and result in the highest possible return.

(3) The recipient may be directed to transfer title to the property to the Federal Government or to an eligible third party provided that, in such cases, the recipient shall be entitled to compensation for its attributable percentage of the current fair market value of the property.

_____.33 Federally-owned and exempt property.

(a) Federally-owned property.

(1) Title to federally-owned property remains vested in the Federal Government. Recipients shall submit annually an inventory listing of federally-owned property in their custody to the Federal awarding agency. Upon completion of the award or when the property is no longer needed, the recipient shall report the property to the Federal awarding agency for further Federal agency utilization.

(2) If the Federal awarding agency has no further need for the property, it shall be declared excess and reported to the General Services Administration, unless the Federal awarding agency has statutory authority to dispose of the property by alternative methods (e.g., the authority provided by the Federal Technology Transfer Act (15 U.S.C. 3710 (I)) to donate research equipment to educational and non-profit organizations in accordance with E.O. 12821, "Improving Mathematics and Science Education in Support of the National Education Goals.") Appropriate instructions shall be issued to the recipient by the Federal awarding agency.

(b) Exempt property. When statutory authority exists, the Federal awarding agency has the option to vest title to property acquired with Federal funds in the recipient without further obligation to the Federal Government and under conditions the Federal awarding agency considers appropriate. Such property is "exempt property." Should a Federal awarding agency not establish conditions, title to exempt property upon acquisition shall vest in the recipient without further obligation to the Federal Government.

_____.34 Equipment.

(a) Title to equipment acquired by a recipient with Federal funds shall vest in the recipient, subject to conditions of this section.

(b) The recipient shall not use equipment acquired with Federal funds to provide services to non-Federal outside organizations for a fee that is less than private companies charge for equivalent services, unless specifically authorized by Federal statute, for as long as the Federal Government retains an interest in the equipment.

(c) The recipient shall use the equipment in the project or program for which it was acquired as long as needed, whether or not the project or program continues to be supported by Federal funds and shall not encumber the property without approval of the Federal awarding agency. When no longer needed for the original project or program, the recipient shall use the equipment in connection with its other federally-sponsored activities, in the following order of priority: (i) Activities sponsored by the Federal awarding agency which funded the original project, then (ii) activities sponsored by other Federal awarding agencies.

(d) During the time that equipment is used on the project or program for which it was acquired, the recipient shall make it available for use on other projects or programs if such other use will not interfere with the work on the project or program for which the equipment was originally acquired. First preference for such other use shall be given to other projects or programs sponsored by the Federal awarding agency that financed the equipment; second preference shall be given to projects or programs sponsored by other Federal awarding agencies. If the equipment is owned by the Federal Government, use on other activities not sponsored by the Federal Government shall be permissible if authorized by the Federal awarding agency. User charges shall be treated as program income.

(e) When acquiring replacement equipment, the recipient may use the equipment to be replaced as trade-in or sell the equipment and use the proceeds to offset the costs of the replacement equipment subject to the approval of the Federal awarding agency.

(f) The recipient's property management standards for equipment acquired with Federal funds and federally-owned equipment shall include all of the following.

(1) Equipment records shall be maintained accurately and shall include the following information.

(i) A description of the equipment.

(ii) Manufacturer's serial number, model number, Federal stock number, national stock number, or other identification number.

(iii) Source of the equipment, including the award number.

(iv) Whether title vests in the recipient or the Federal Government.

(v) Acquisition date (or date received, if the equipment was furnished by the Federal Government) and cost.

(vi) Information from which one can calculate the percentage of Federal participation in the cost of the equipment (not applicable to equipment furnished by the Federal Government).

(vii) Location and condition of the equipment and the date the information was reported.

(viii) Unit acquisition cost.

(ix) Ultimate disposition data, including date of disposal and sales price or the method used to determine current fair market value where a recipient compensates the Federal awarding agency for its share.

(2) Equipment owned by the Federal Government shall be identified to indicate Federal ownership.

(3) A physical inventory of equipment shall be taken and the results reconciled with the equipment records at least once every two years. Any differences between quantities determined by the physical inspection and those shown in the accounting records shall be investigated to determine the causes of the difference. The recipient shall, in connection with the inventory, verify the existence, current utilization, and continued need for the equipment.

(4) A control system shall be in effect to insure adequate safeguards to prevent loss, damage, or theft of the equipment. Any loss, damage, or theft of equipment shall be investigated and fully documented; if the equipment was owned by the Federal Government, the recipient shall promptly notify the Federal awarding agency.

(5) Adequate maintenance procedures shall be implemented to keep the equipment in good condition.

(6) Where the recipient is authorized or required to sell the equipment, proper sales procedures shall be established which provide for competition to the extent practicable and result in the highest possible return.

(g) When the recipient no longer needs the equipment, the equipment may be used for other activities in accordance with the following standards. For equipment with a current per unit fair market value of $5000 or more, the recipient may retain the equipment for other uses provided that compensation is made to the original Federal awarding agency or its successor. The amount of compensation shall be computed by applying the percentage of Federal participation in the cost of the original project or program to the current fair market value of the equipment. If the recipient has no need for the equipment, the recipient shall request disposition instructions from the Federal awarding agency. The Federal awarding agency shall determine whether the equipment can be used to meet the agency's requirements. If no requirement exists within that agency, the availability of the equipment shall be reported to the General Services Administration by the Federal awarding agency to determine whether a requirement for the equipment exists in other Federal

agencies. The Federal awarding agency shall issue instructions to the recipient no later than 120 calendar days after the recipient's request and the following procedures shall govern.

(1) If so instructed or if disposition instructions are not issued within 120 calendar days after the recipient's request, the recipient shall sell the equipment and reimburse the Federal awarding agency an amount computed by applying to the sales proceeds the percentage of Federal participation in the cost of the original project or program. However, the recipient shall be permitted to deduct and retain from the Federal share $500 or ten percent of the proceeds, whichever is less, for the recipient's selling and handling expenses.

(2) If the recipient is instructed to ship the equipment elsewhere, the recipient shall be reimbursed by the Federal Government by an amount which is computed by applying the percentage of the recipient's participation in the cost of the original project or program to the current fair market value of the equipment, plus any reasonable shipping or interim storage costs incurred.

(3) If the recipient is instructed to otherwise dispose of the equipment, the recipient shall be reimbursed by the Federal awarding agency for such costs incurred in its disposition.

(4) The Federal awarding agency may reserve the right to transfer the title to the Federal Government or to a third party named by the Federal Government when such third party is otherwise eligible under existing statutes. Such transfer shall be subject to the following standards.

(i) The equipment shall be appropriately identified in the award or otherwise made known to the recipient in writing.

(ii) The Federal awarding agency shall issue disposition instructions within 120 calendar days after receipt of a final inventory. The final inventory shall list all equipment acquired with grant funds and federally-owned equipment. If the Federal awarding agency fails to issue disposition instructions within the 120 calendar day period, the recipient shall apply the standards of this section, as appropriate.

(iii) When the Federal awarding agency exercises its right to take title, the equipment shall be subject to the provisions for federally-owned equipment.

_____.35 Supplies and other expendable property.

(a) Title to supplies and other expendable property shall vest in the recipient upon acquisition. If there is a residual inventory of unused supplies exceeding $5000 in total aggregate value upon termination or completion of the project or program and the supplies are not needed for any other federally-sponsored project or program, the recipient shall retain the supplies for use on non-Federal sponsored activities or sell them, but shall, in either case, compensate the Federal Government for its share. The amount of compensation shall be computed in the same manner as for equipment.

(b) The recipient shall not use supplies acquired with Federal funds to provide services to non-Federal outside organizations for a fee that is less than private companies charge for equivalent services, unless specifically authorized by Federal statute as long as the Federal Government retains an interest in the supplies.

_____.36 Intangible property.

(a) The recipient may copyright any work that is subject to copyright and was developed, or for which ownership was purchased, under an award. The Federal awarding agency(ies) reserve a royalty-free, nonexclusive and irrevocable right to reproduce, publish, or otherwise use the work for Federal purposes, and to authorize others to do so.

(b) Recipients are subject to applicable regulations governing patents and inventions, including government-wide regulations issued by the Department of Commerce at 37 CFR part 401, "Rights to Inventions Made by Nonprofit Organizations and Small Business Firms Under Government Grants, Contracts and Cooperative Agreements."

(c) Unless waived by the Federal awarding agency, the Federal Government has the right to (1) and (2).

(1) Obtain, reproduce, publish or otherwise use the data first produced under an award.

(2) Authorize others to receive, reproduce, publish, or otherwise use such data for Federal purposes.

(d) Title to intangible property and debt instruments acquired under an award or subaward vests upon acquisition in the recipient. The recipient shall use that property for the originally-authorized purpose, and the recipient shall not encumber the property without approval of the Federal awarding agency. When no longer needed for the originally authorized purpose, disposition of the intangible property shall occur in accordance with the provisions of paragraph .34(g).

_____.37 Property trust relationship. Real property, equipment, intangible property and debt instruments that are acquired or improved with Federal funds shall be held in trust by the recipient as trustee for the beneficiaries of the project or program under which the property was acquired or improved. Agencies may require recipients to record liens or other appropriate notices of record to indicate that personal or real property has been acquired or improved with Federal funds and that use and disposition conditions apply to the property.

Procurement Standards

_____.40 Purpose of procurement standards. Sections _____.41 through _____.48 set forth standards for use by recipients in establishing procedures for the procurement of supplies and other expendable property, equipment, real property and other services with Federal funds. These standards are furnished to ensure that such materials and services are obtained in an effective manner and in compliance with the provisions of applicable Federal statutes and executive orders. No additional procurement standards or requirements shall be imposed by the Federal awarding agencies upon recipients, unless specifically required by Federal statute or executive order or approved by OMB.

_____.41 Recipient responsibilities. The standards contained in this section do not relieve the recipient of the contractual responsibilities arising under its contract(s). The recipient is the responsible authority, without recourse to the Federal awarding agency, regarding the settlement and satisfaction of all contractual and administrative issues arising out of procurements entered into in support of an award or other agreement. This includes disputes, claims, protests of award, source evaluation or other matters of a contractual nature. Matters concerning violation of statute are to be referred to such Federal, State or local authority as may have proper jurisdiction.

_____.42 Codes of conduct. The recipient shall maintain written standards of conduct governing the performance of its employees engaged in the award and administration of contracts. No employee, officer, or agent shall participate in the selection, award, or administration of a contract supported by Federal funds if a real or apparent conflict of interest would be involved. Such a conflict would arise when the employee, officer, or agent, any member of his or her immediate family, his or her partner, or an organization which employs or is about to employ any of the parties indicated herein, has a financial or other interest in the firm selected for an award. The officers, employees, and agents of the recipient shall neither solicit nor accept gratuities, favors, or anything of monetary value from contractors, or parties to subagreements. However, recipients may set standards for situations in which the financial interest is not substantial or the gift is an unsolicited item of nominal value. The standards of conduct shall provide for disciplinary actions to be applied for violations of such standards by officers, employees, or agents of the recipient.

_____.43 Competition. All procurement transactions shall be conducted in a manner to provide, to the maximum extent practical, open and free competition. The recipient shall be alert to organizational conflicts of interest as well as noncompetitive practices among contractors that may restrict or eliminate competition or otherwise restrain trade. In order to ensure objective contractor performance and eliminate unfair competitive advantage, contractors that develop or draft specifications, requirements, statements of work, invitations for bids and/or requests for proposals shall be excluded from competing for such procurements. Awards shall be made to the bidder or offeror whose bid or offer is responsive to the solicitation and is most advantageous to the recipient, price, quality and other factors considered. Solicitations shall clearly set forth all requirements that the bidder or offeror shall fulfill in order for the bid or offer to be evaluated by the recipient. Any and all bids or offers may be rejected when it is in the recipient's interest to do so.

_____.44 Procurement procedures.

(a) All recipients shall establish written procurement procedures. These procedures shall provide for, at a minimum, that (1), (2) and (3) apply.

(1) Recipients avoid purchasing unnecessary items.

(2) Where appropriate, an analysis is made of lease and purchase alternatives to determine which would be the most economical and practical procurement for the Federal Government.

(3) Solicitations for goods and services provide for all of the following.

(i) A clear and accurate description of the technical requirements for the material, product or service to be procured. In competitive procurements, such a description shall not contain features which unduly restrict competition.

(ii) Requirements which the bidder/offeror must fulfill and all other factors to be used in evaluating bids or proposals.

(iii) A description, whenever practicable, of technical requirements in terms of functions to be performed or performance required, including the range of acceptable characteristics or minimum acceptable standards.

(iv) The specific features of "brand name or equal" descriptions that bidders are required to meet when such items are included in the solicitation.

(v) The acceptance, to the extent practicable and economically feasible, of products and services dimensioned in the metric system of measurement.

(vi) Preference, to the extent practicable and economically feasible, for products and services that conserve natural resources and protect the environment and are energy efficient.

(b) Positive efforts shall be made by recipients to utilize small businesses, minority-owned firms, and women's business enterprises, whenever possible. Recipients of Federal awards shall take all of the following steps to further this goal.

(1) Ensure that small businesses, minority-owned firms, and women's business enterprises are used to the fullest extent practicable.

(2) Make information on forthcoming opportunities available and arrange time frames for purchases and contracts to encourage and facilitate participation by small businesses, minority-owned firms, and women's business enterprises.

(3) Consider in the contract process whether firms competing for larger contracts intend to subcontract with small businesses, minority-owned firms, and women's business enterprises.

(4) Encourage contracting with consortiums of small businesses, minority-owned firms and women's business enterprises when a contract is too large for one of these firms to handle individually.

(5) Use the services and assistance, as appropriate, of such organizations as the Small Business Administration and the Department of Commerce's Minority Business Development Agency in the solicitation and utilization of small businesses, minority-owned firms and women's business enterprises.

(c) The type of procuring instruments used (e.g., fixed price contracts, cost reimbursable contracts, purchase orders, and incentive contracts) shall be determined by the recipient but shall be appropriate for the particular procurement and for promoting the best interest of the program or project involved. The "cost-plus-a-percentage-of-cost" or "percentage of construction cost" methods of contracting shall not be used.

(d) Contracts shall be made only with responsible contractors who possess the potential ability to perform successfully under the terms and conditions of the proposed procurement. Consideration shall be given to such matters as contractor integrity, record of past performance, financial and technical resources or accessibility to other necessary resources. In certain circumstances, contracts with certain parties are restricted by agencies' implementation of E.O.s 12549 and 12689, "Debarment and Suspension."

(e) Recipients shall, on request, make available for the Federal awarding agency, pre-award review and procurement documents, such as request for proposals or invitations for bids, independent cost estimates, etc., when any of the following conditions apply.

(1) A recipient's procurement procedures or operation fails to comply with the procurement standards in the Federal awarding agency's implementation of this Circular.

(2) The procurement is expected to exceed the small purchase threshold fixed at 41 U.S.C. 403 (11) (currently $25,000) and is to be awarded without competition or only one bid or offer is received in response to a solicitation.

(3) The procurement, which is expected to exceed the small purchase threshold, specifies a "brand name" product.

(4) The proposed award over the small purchase threshold is to be awarded to other than the apparent low bidder under a sealed bid procurement.

(5) A proposed contract modification changes the scope of a contract or increases the contract amount by more than the amount of the small purchase threshold.

_____.45 Cost and price analysis. Some form of cost or price analysis shall be made and documented in the procurement files in connection with every procurement action. Price analysis may be accomplished in various ways, including the comparison of price quotations submitted, market prices and similar indicia, together with discounts. Cost analysis is the review and evaluation of each element of cost to determine reasonableness, allocability and allowability.

_____.46 Procurement records. Procurement records and files for purchases in excess of the small purchase threshold shall include the following at a minimum: (a) basis for contractor selection, (b) justification for lack of competition when competitive bids or offers are not obtained, and (c) basis for award cost or price.

_____.47 Contract administration. A system for contract administration shall be maintained to ensure contractor conformance with the terms, conditions and specifications of the contract and to ensure adequate and timely follow up of all purchases. Recipients shall evaluate contractor performance and document, as appropriate, whether contractors have met the terms, conditions and specifications of the contract.

_____.48 Contract provisions. The recipient shall include, in addition to provisions to define a sound and complete agreement, the following provisions in all contracts. The following provisions shall also be applied to subcontracts.

(a) Contracts in excess of the small purchase threshold shall contain contractual provisions or conditions that allow for administrative, contractual, or legal remedies in instances in which a contractor violates or breaches the contract terms, and provide for such remedial actions as may be appropriate.

(b) All contracts in excess of the small purchase threshold shall contain suitable provisions for termination by the recipient, including the manner by which termination shall be effected and the basis for settlement. In addition, such contracts shall describe conditions under which the contract may be terminated for default as well as conditions where the contract may be terminated because of circumstances beyond the control of the contractor.

(c) Except as otherwise required by statute, an award that requires the contracting (or subcontracting) for construction or facility improvements shall provide for the recipient to follow its own requirements relating to bid guarantees, performance bonds, and payment bonds unless the construction contract or subcontract exceeds $100,000. For those contracts or subcontracts exceeding $100,000, the Federal awarding agency may accept the bonding policy and requirements of the recipient, provided the Federal awarding agency has made a determination that the Federal Government's interest is adequately protected. If such a determination has not been made, the minimum requirements shall be as follows.

(1) A bid guarantee from each bidder equivalent to five percent of the bid price. The "bid guarantee" shall consist of a firm commitment such as a bid bond, certified check, or other negotiable instrument accompanying a bid as assurance that the bidder shall, upon acceptance of his bid, execute such contractual documents as may be required within the time specified.

(2) A performance bond on the part of the contractor for 100 percent of the contract price. A "performance bond" is one executed in connection with a contract to secure fulfillment of all the contractor's obligations under such contract.

(3) A payment bond on the part of the contractor for 100 percent of the contract price. A "payment bond" is one executed in connection with a contract to assure payment as required by statute of all persons supplying labor and material in the execution of the work provided for in the contract.

(4) Where bonds are required in the situations described herein, the bonds shall be obtained from companies holding certificates of authority as acceptable sureties pursuant to 31 CFR part 223, "Surety Companies Doing Business with the United States."

(d) All negotiated contracts (except those for less than the small purchase threshold) awarded by recipients shall include a provision to the effect that the recipient, the Federal awarding agency, the Comptroller General of the United States, or any of their duly authorized representatives, shall have access to any books, documents, papers and

records of the contractor which are directly pertinent to a specific program for the purpose of making audits, examinations, excerpts and transcriptions.

(e) All contracts, including small purchases, awarded by recipients and their contractors shall contain the procurement provisions of Appendix A to this Circular, as applicable.

Reports and Records

_____.50 Purpose of reports and records. Sections _____.51 through _____.53 set forth the procedures for monitoring and reporting on the recipient's financial and program performance and the necessary standard reporting forms. They also set forth record retention requirements.

_____.51 Monitoring and reporting program performance.

(a) Recipients are responsible for managing and monitoring each project, program, subaward, function or activity supported by the award. Recipients shall monitor subawards to ensure subrecipients have met the audit requirements as delineated in Section _____.26.

(b) The Federal awarding agency shall prescribe the frequency with which the performance reports shall be submitted. Except as provided in paragraph _____.51(f), performance reports shall not be required more frequently than quarterly or, less frequently than annually. Annual reports shall be due 90 calendar days after the grant year; quarterly or semi-annual reports shall be due 30 days after the reporting period. The Federal awarding agency may require annual reports before the anniversary dates of multiple year awards in lieu of these requirements. The final performance reports are due 90 calendar days after the expiration or termination of the award.

(c) If inappropriate, a final technical or performance report shall not be required after completion of the project.

(d) When required, performance reports shall generally contain, for each award, brief information on each of the following.

(1) A comparison of actual accomplishments with the goals and objectives established for the period, the findings of the investigator, or both. Whenever appropriate and the output of programs or projects can be readily quantified, such quantitative data should be related to cost data for computation of unit costs.

(2) Reasons why established goals were not met, if appropriate.

(3) Other pertinent information including, when appropriate, analysis and explanation of cost overruns or high unit costs.

(e) Recipients shall not be required to submit more than the original and two copies of performance reports.

(f) Recipients shall immediately notify the Federal awarding agency of developments that have a significant impact on the award-supported activities. Also, notification shall be given in the case of problems, delays, or adverse conditions which materially impair the ability to meet the objectives of the award. This notification shall include a statement of the action taken or contemplated, and any assistance needed to resolve the situation.

(g) Federal awarding agencies may make site visits, as needed.

(h) Federal awarding agencies shall comply with clearance requirements of 5 CFR part 1320 when requesting performance data from recipients.

_____.52 Financial reporting.

(a) The following forms or such other forms as may be approved by OMB are authorized for obtaining financial information from recipients.

(1) SF–269 or SF–269A, Financial Status Report.

(i) Each Federal awarding agency shall require recipients to use the SF–269 or SF–269A to report the status of funds for all nonconstruction projects or programs. A Federal awarding agency may, however, have the option of not requiring the SF–269 or SF–269A when the SF–270, Request for Advance or Reimbursement, or SF–272, Report of Federal Cash Transactions, is determined to provide adequate information to meet its needs, except that a final SF–269 or SF–269A shall be required at the completion of the project when the SF–270 is used only for advances.

(ii) The Federal awarding agency shall prescribe whether the report shall be on a cash or accrual basis. If the Federal awarding agency requires accrual information and the recipient's accounting records are not normally kept on the accrual basis, the recipient shall not be required to convert its accounting system, but shall develop such accrual information through best estimates based on an analysis of the documentation on hand.

(iii) The Federal awarding agency shall determine the frequency of the Financial Status Report for each project or program, considering the size and complexity of the particular project or program. However, the report shall not be required more frequently than quarterly or less frequently than annually. A final report shall be required at the completion of the agreement.

(iv) The Federal awarding agency shall require recipients to submit the SF–269 or SF–269A (an original and no more than two copies) no later than 30 days after the end of each specified reporting period for quarterly and semi-annual reports, and 90 calendar days for annual and final reports. Extensions of reporting due dates may be approved by the Federal awarding agency upon request of the recipient.

(2) SF–272, Report of Federal Cash Transactions.

(i) When funds are advanced to recipients the Federal awarding agency shall require each recipient to submit the SF–272 and, when necessary, its continuation sheet, SF–272a. The Federal awarding agency shall use this report to monitor cash advanced to recipients and to obtain disbursement information for each agreement with the recipients.

(ii) Federal awarding agencies may require forecasts of Federal cash requirements in the "Remarks" section of the report.

(iii) When practical and deemed necessary, Federal awarding agencies may require recipients to report in the "Remarks" section the amount of cash advances received in excess of three days. Recipients shall provide short narrative explanations of actions taken to reduce the excess balances.

(iv) Recipients shall be required to submit not more than the original and two copies of the SF–272 15 calendar days following the end of each quarter. The Federal awarding agencies may require a monthly report from those recipients receiving advances totaling $1 million or more per year.

(v) Federal awarding agencies may waive the requirement for submission of the SF–272 for any one of the following reasons: (1) When monthly advances do not exceed $25,000 per recipient, provided that such advances are monitored through other forms contained in this section; (2) If, in the Federal awarding agency's opinion, the recipient's accounting controls are adequate to minimize excessive Federal advances; or, (3) When the electronic payment mechanisms provide adequate data.

(b) When the Federal awarding agency needs additional information or more frequent reports, the following shall be observed.

(1) When additional information is needed to comply with legislative requirements, Federal awarding agencies shall issue instructions to require recipients to submit such information under the "Remarks" section of the reports.

(2) When a Federal awarding agency determines that a recipient's accounting system does not meet the standards in Section _____.21, additional pertinent information to further monitor awards may be obtained upon written notice to the recipient until such time as the system is brought up to standard. The Federal awarding agency, in obtaining this information, shall comply with report clearance requirements of 5 CFR part 1320.

(3) Federal awarding agencies are encouraged to shade out any line item on any report if not necessary.

(4) Federal awarding agencies may accept the identical information from the recipients in machine readable format or computer printouts or electronic outputs in lieu of prescribed formats.

(5) Federal awarding agencies may provide computer or electronic outputs to recipients when such expedites or contributes to the accuracy of reporting.

_____.53 Retention and access requirements for records.

(a) This section sets forth requirements for record retention and access to records for awards to recipients. Federal awarding agencies shall not impose any other record retention or access requirements upon recipients.

(b) Financial records, supporting documents, statistical records, and all other records pertinent to an award shall be retained for a period of three years from the date of submission of the final expenditure report or, for awards that are renewed quarterly or annually, from the date of the submission of the quarterly or annual financial report, as authorized by the Federal awarding agency. The only exceptions are the following.

(1) If any litigation, claim, or audit is started before the expiration of the 3-year

period, the records shall be retained until all litigation, claims or audit findings involving the records have been resolved and final action taken.

(2) Records for real property and equipment acquired with Federal funds shall be retained for 3 years after final disposition.

(3) When records are transferred to or maintained by the Federal awarding agency, the 3-year retention requirement is not applicable to the recipient.

(4) Indirect cost rate proposals, cost allocations plans, etc. as specified in paragraph _____.53(g).

(c) Copies of original records may be substituted for the original records if authorized by the Federal awarding agency.

(d) The Federal awarding agency shall request transfer of certain records to its custody from recipients when it determines that the records possess long term retention value. However, in order to avoid duplicate recordkeeping, a Federal awarding agency may make arrangements for recipients to retain any records that are continuously needed for joint use.

(e) The Federal awarding agency, the Inspector General, Comptroller General of the United States, or any of their duly authorized representatives, have the right of timely and unrestricted access to any books, documents, papers, or other records of recipients that are pertinent to the awards, in order to make audits, examinations, excerpts, transcripts and copies of such documents. This right also includes timely and reasonable access to a recipient's personnel for the purpose of interview and discussion related to such documents. The rights of access in this paragraph are not limited to the required retention period, but shall last as long as records are retained.

(f) Unless required by statute, no Federal awarding agency shall place restrictions on recipients that limit public access to the records of recipients that are pertinent to an award, except when the Federal awarding agency can demonstrate that such records shall be kept confidential and would have been exempted from disclosure pursuant to the Freedom of Information Act (5 U.S.C. 552) if the records had belonged to the Federal awarding agency.

(g) Indirect cost rate proposals, cost allocations plans, etc. Paragraphs (g) (1) and (g)(2) apply to the following types of documents, and their supporting records: indirect cost rate computations or proposals, cost allocation plans, and any similar accounting computations of the rate at which a particular group of costs is chargeable (such as computer usage chargeback rates or composite fringe benefit rates).

(1) If submitted for negotiation. If the recipient submits to the Federal awarding agency or the subrecipient submits to the recipient the proposal, plan, or other computation to form the basis for negotiation of the rate, then the 3-year retention period for its supporting records starts on the date of such submission.

(2) If not submitted for negotiation. If the recipient is not required to submit to the Federal awarding agency or the subrecipient is not required to submit to the recipient the proposal, plan, or other computation for negotiation purposes, then the 3-year retention period for the proposal, plan, or other computation and its supporting records starts at the end of the fiscal year (or other accounting period) covered by the proposal, plan, or other computation.

Termination and Enforcement

_____.60 Purpose of termination and enforcement. Sections _____.61 and _____.62 set forth uniform suspension, termination and enforcement procedures.

_____.61 Termination.

(a) Awards may be terminated in whole or in part only if (1), (2) or (3) apply.

(1) By the Federal awarding agency, if a recipient materially fails to comply with the terms and conditions of an award.

(2) By the Federal awarding agency with the consent of the recipient, in which case the two parties shall agree upon the termination conditions, including the effective date and, in the case of partial termination, the portion to be terminated.

(3) By the recipient upon sending to the Federal awarding agency written notification setting forth the reasons for such termination, the effective date, and, in the case of partial termination, the portion to be terminated. However, if the Federal awarding agency determines in the case of partial termination that the reduced or modified portion of the grant will not accomplish the purposes for which the grant was made, it may terminate the grant in its entirety under either paragraphs (a)(1) or (2).

(b) If costs are allowed under an award, the responsibilities of the recipient referred to in paragraph _____.71(a), including those for property management as applicable, shall be considered in the termination of the award, and provision shall be made for continuing responsibilities of the recipient after termination, as appropriate.

_____.62 Enforcement.

(a) Remedies for noncompliance. If a recipient materially fails to comply with the terms and conditions of an award, whether stated in a Federal statute, regulation, assurance, application, or notice of award, the Federal awarding agency may, in addition to imposing any of the special conditions outlined in Section _____.14, take one or more of the following actions, as appropriate in the circumstances.

(1) Temporarily withhold cash payments pending correction of the deficiency by the recipient or more severe enforcement action by the Federal awarding agency.

(2) Disallow (that is, deny both use of funds and any applicable matching credit for) all or part of the cost of the activity or action not in compliance.

(3) Wholly or partly suspend or terminate the current award.

(4) Withhold further awards for the project or program.

(5) Take other remedies that may be legally available.

(b) Hearings and appeals. In taking an enforcement action, the awarding agency shall provide the recipient an opportunity for hearing, appeal, or other administrative proceeding to which the recipient is entitled under any statute or regulation applicable to the action involved.

(c) Effects of suspension and termination. Costs of a recipient resulting from obligations incurred by the recipient during a suspension or after termination of an award are not allowable unless the awarding agency expressly authorizes them in the notice of suspension or termination or subsequently. Other recipient costs during suspension or after termination which are necessary and not reasonably avoidable are allowable if (1) and (2) apply.

(1) The costs result from obligations which were properly incurred by the recipient before the effective date of suspension or termination, are not in anticipation of it, and in the case of a termination, are noncancellable.

(2) The costs would be allowable if the award were not suspended or expired normally at the end of the funding period in which the termination takes effect.

(d) Relationship to debarment and suspension. The enforcement remedies identified in this section, including suspension and termination, do not preclude a recipient from being subject to debarment and suspension under E.O.s 12549 and 12689 and the Federal awarding agency implementing regulations (see Section _____.13).

Subpart D—After-the-Award Requirements

_____.70 Purpose. Sections _____.71 through _____.73 contain closeout procedures and other procedures for subsequent disallowances and adjustments.

_____.71 Closeout procedures.

(a) Recipients shall submit, within 90 calendar days after the date of completion of the award, all financial, performance, and other reports as required by the terms and conditions of the award. The Federal awarding agency may approve extensions when requested by the recipient.

(b) Unless the Federal awarding agency authorizes an extension, a recipient shall liquidate all obligations incurred under the award not later than 90 calendar days after the funding period or the date of completion as specified in the terms and conditions of the award or in agency implementing instructions.

(c) The Federal awarding agency shall make prompt payments to a recipient for allowable reimbursable costs under the award being closed out.

(d) The recipient shall promptly refund any balances of unobligated cash that the Federal awarding agency has advanced or paid and that is not authorized to be retained by the recipient for use in other projects. OMB Circular A–129 governs unreturned amounts that become delinquent debts.

(e) When authorized by the terms and conditions of the award, the Federal awarding agency shall make a settlement for any upward or downward adjustments to the Federal share of costs after closeout reports are received.

(f) The recipient shall account for any real and personal property acquired with Federal funds or received from the Federal Government in accordance with Sections _____.31 through _____.37.

(g) In the event a final audit has not been performed prior to the closeout of an award,

the Federal awarding agency shall retain the right to recover an appropriate amount after fully considering the recommendations on disallowed costs resulting from the final audit.

_____.72 Subsequent adjustments and continuing responsibilities.

(a) The closeout of an award does not affect any of the following.

(1) The right of the Federal awarding agency to disallow costs and recover funds on the basis of a later audit or other review.

(2) The obligation of the recipient to return any funds due as a result of later refunds, corrections, or other transactions.

(3) Audit requirements in Section _____.26.

(4) Property management requirements in Sections _____.31 through _____.37.

(5) Records retention as required in Section _____.53.

(b) After closeout of an award, a relationship created under an award may be modified or ended in whole or in part with the consent of the Federal awarding agency and the recipient, provided the responsibilities of the recipient referred to in paragraph _____.73(a), including those for property management as applicable, are considered and provisions made for continuing responsibilities of the recipient, as appropriate.

_____.73 Collection of amounts due.

(a) Any funds paid to a recipient in excess of the amount to which the recipient is finally determined to be entitled under the terms and conditions of the award constitute a debt to the Federal Government. If not paid within a reasonable period after the demand for payment, the Federal awarding agency may reduce the debt by (1), (2) or (3).

(1) Making an administrative offset against other requests for reimbursements.

(2) Withholding advance payments otherwise due to the recipient.

(3) Taking other action permitted by statute.

(b) Except as otherwise provided by law, the Federal awarding agency shall charge interest on an overdue debt in accordance with 4 CFR Chapter II, "Federal Claims Collection Standards."

Appendix A—Contract Provisions

All contracts, awarded by a recipient including small purchases, shall contain the following provisions as applicable:

1. *Equal Employment Opportunity*—All contracts shall contain a provision requiring compliance with E.O. 11246, "Equal Employment Opportunity," as amended by E.O. 11375, "Amending Executive Order 11246 Relating to Equal Employment Opportunity," and as supplemented by regulations at 41 CFR part 60, "Office of Federal Contract Compliance Programs, Equal Employment Opportunity, Department of Labor."

2. *Copeland "Anti-Kickback" Act (18 U.S.C. 874 and 40 U.S.C. 276c)*—All contracts and subgrants in excess of $2,000 for construction or repair awarded by recipients and subrecipients shall include a provision for compliance with the Copeland "Anti-Kickback" Act (18 U.S.C. 874), as supplemented by Department of Labor regulations (29 CFR part 3, "Contractors and Subcontractors on Public Building or Public Work Financed in Whole or in Part by Loans or Grants from the United States"). The Act provides that each contractor or subrecipient shall be prohibited from inducing, by any means, any person employed in the construction, completion, or repair of public work, to give up any part of the compensation to which he is otherwise entitled. The recipient shall report all suspected or reported violations to the Federal awarding agency.

3. *Davis-Bacon Act, as amended (40 U.S.C. 276a to a–7)*—When required by Federal program legislation, all construction contracts awarded by the recipients and subrecipients of more than $2,000 shall include a provision for compliance with the Davis-Bacon Act (40 U.S.C. 276a to a–7) and as supplemented by Department of Labor regulations (29 CFR part 5, "Labor Standards Provisions Applicable to Contracts Governing Federally Financed and Assisted Construction"). Under this Act, contractors shall be required to pay wages to laborers and mechanics at a rate not less than the minimum wages specified in a wage determination made by the Secretary of Labor. In addition, contractors shall be required to pay wages not less than once a week. The recipient shall place a copy of the current prevailing wage determination issued by the Department of Labor in each solicitation and the award of a contract shall be conditioned upon the acceptance of the wage determination. The recipient shall report all suspected or reported violations to the Federal awarding agency.

4. *Contract Work Hours and Safety Standards Act (40 U.S.C. 327–333)*—Where applicable, all contracts awarded by recipients in excess of $2,000 for construction contracts and in excess of $2,500 for other contracts that involve the employment of mechanics or laborers shall include a provision for compliance with Sections 102 and 107 of the Contract Work Hours and Safety Standards Act (40 U.S.C. 327–333), as supplemented by Department of Labor regulations (29 CFR part 5). Under Section 102 of the Act, each contractor shall be required to compute the wages of every mechanic and laborer on the basis of a standard work week of 40 hours. Work in excess of the standard work week is permissible provided that the worker is compensated at a rate of not less than 1½ times the basic rate of pay for all hours worked in excess of 40 hours in the work week. Section 107 of the Act is applicable to construction work and provides that no laborer or mechanic shall be required to work in surroundings or under working conditions which are unsanitary, hazardous or dangerous. These requirements do not apply to the purchases of supplies or materials or articles ordinarily available on the open market, or contracts for transportation or transmission of intelligence.

5. *Rights to Inventions Made Under a Contract or Agreement*—Contracts or agreements for the performance of experimental, developmental, or research work shall provide for the rights of the Federal Government and the recipient in any resulting invention in accordance with 37 CFR part 401, "Rights to Inventions Made by Nonprofit Organizations and Small Business Firms Under Government Grants, Contracts and Cooperative Agreements," and any implementing regulations issued by the awarding agency.

6. *Clean Air Act (42 U.S.C. 7401 et seq.) and the Federal Water Pollution Control Act (33 U.S.C. 1251 et seq.), as amended*—Contracts and subgrants of amounts in excess of $100,000 shall contain a provision that requires the recipient to agree to comply with all applicable standards, orders or regulations issued pursuant to the Clean Air Act (42 U.S.C. 7401 et seq.) and the Federal Water Pollution Control Act as amended (33 U.S.C. 1251 et seq.). Violations shall be reported to the Federal awarding agency and the Regional Office of the Environmental Protection Agency (EPA).

7. *Byrd Anti-Lobbying Amendment (31 U.S.C. 1352)*—Contractors who apply or bid for an award of $100,000 or more shall file the required certification. Each tier certifies to the tier above that it will not and has not used Federal appropriated funds to pay any person or organization for influencing or attempting to influence an officer or employee of any agency, a member of Congress, officer or employee of Congress, or an employee of a member of Congress in connection with obtaining any Federal contract, grant or any other award covered by 31 U.S.C. 1352. Each tier shall also disclose any lobbying with non-Federal funds that takes place in connection with obtaining any Federal award. Such disclosures are forwarded from tier to tier up to the recipient.

8. *Debarment and Suspension (E.O.s 12549 and 12689)*—No contract shall be made to parties listed on the General Services Administration's List of Parties Excluded from Federal Procurement or Nonprocurement Programs in accordance with E.O.s 12549 and 12689, "Debarment and Suspension." This list contains the names of parties debarred, suspended, or otherwise excluded by agencies, and contractors declared ineligible under statutory or regulatory authority other than E.O. 12549. Contractors with awards that exceed the small purchase threshold shall provide the required certification regarding its exclusion status and that of its principal employees.

Department of Education

National Assessment of Educational Progress, Applications for FY 1994; Notice

DEPARTMENT OF EDUCATION

[CFDA No.: 84.999J]

National Assessment of Educational Progress (NAEP) Program, Notice Inviting Applications for New Awards for Fiscal Year 1994

PURPOSE OF PROGRAM: To conduct test development, field testing, and planning for the 1996 National Assessment of Educational Progress (NAEP). It is projected that the 1996 NAEP will be conducted in mathematics, science and the arts in grades 4, 8, and 12 at the national level. NAEP supports National Education Goal 3 by providing measures of progress for American students' mastery of challenging subject matter.

ELIGIBLE APPLICANTS: Public, private, for-profit, and non-profit institutions, agencies, and other qualified organizations or consortia of such institutions, agencies, and organizations.

DEADLINE FOR TRANSMITTAL OF APPLICATIONS: January 13, 1994.

DEADLINE FOR INTERGOVERNMENTAL REVIEW: March 14, 1994.

APPLICATIONS AVAILABLE: December 3, 1993.

AVAILABLE FUNDS: The Department estimates that about $1,700,000 can be made available in fiscal year 1994 for the development of the 1996 NAEP.

ESTIMATED NUMBER OF AWARDS: 1.

PROJECT PERIOD: Up to 22 months.

APPLICABLE REGULATIONS: (a) The Education Department General Administrative Regulations (EDGAR) 34 CFR parts 74, 75, 77, 79, 80, 81, 82, 85, 86; and (b) the regulations in 34 CFR part 98 (Students Rights in Research, Experimental Activities, and Testing).

SUPPLEMENTARY INFORMATION: The National Assessment of Educational Progress (NAEP) is currently authorized by section 406 of the General Education Provisions Act (20 U.S.C. 1221e–1). This legislation is awaiting reauthorization by Congress, and may be modified. The current law provides for the establishment of the National Assessment Governing Board (NAGB). The law requires that NAGB, among other responsibilities, formulate the policy guidelines for the NAEP and select the subject areas to be assessed. Copies of these guidelines are available from the Department.

The Department currently has four cooperative agreements in effect for the 1994 NAEP: one to develop assessment instruments for the 1994 assessment; a second to conduct data collection for the national component of 1994 NAEP; a third to score, analyze, and report data from the national component of the 1994 NAEP; and a fourth to conduct training, monitor data collection, score, analyze, and report data from the State component of the 1994 NAEP.

This notice seeks applications to carry out the planning, test development, and field testing aspects of NAEP for 1996.

Priorities

ABSOLUTE PRIORITY: Under 34 CFR 75.105(c)(3), the Secretary gives an absolute preference to applications that meet the following priority. The Secretary funds under this competition only applications that meet this absolute priority:

Test development, field testing, and planning for the national component of the 1996 NAEP.

The test development, field testing, and planning for the 1996 National Assessment of Educational Progress must be performed in accordance with the guidelines developed by NAGB and implemented by the National Center for Education Statistics.

SELECTION CRITERIA: In evaluating applications for grants under this competition, the Secretary uses the selection criteria in EDGAR, 34 CFR 75.210.

The regulations in 34 CFR 75.210(c) provide that the Secretary may award up to 100 points for the selection criteria, including a reserved 15 points. For this competition, the Secretary distributes these 15 points as follows:

Plan of operation (34 CFR 75.210(b)(3). Fifteen points are added to this criterion for a possible total of 30 points.

FOR APPLICATIONS OR INFORMATION CONTACT: Steve Gorman, U.S. Department of Education, 555 New Jersey Avenue, N.W., Room 308b, Washington, D.C. 20208–5653. Telephone (202) 219–1937. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 between 8 a.m. and 8 p.m., Eastern time, Monday through Friday.

PROGRAM AUTHORITY: 20 U.S.C. 1221e–1.

Dated: November 23, 1993.

Sharon P. Robinson,

Assistant Secretary for Educational Research and Improvement.

Securities and Exchange Commission

17 CFR Part 228, et al.

Executive Compensation Disclosure; Securityholder Lists and Mailing Requests; Final Rule

17 CFR Part 240

Preliminary Proxy Materials Under Certain Circumstances; Elimination of Filing Requirements; Proposed Rule

SECURITIES AND EXCHANGE COMMISSION

17 CFR Parts 228, 229, and 240

[Release No. 33–7032; 34–33229]

RIN 3235–AF92

Executive Compensation Disclosure; Securityholder Lists and Mailing Requests

AGENCY: Securities and Exchange Commission.

ACTION: Final rules.

SUMMARY: The Securities and Exchange Commission ("Commission") has adopted several refinements of, and technical changes to, the executive compensation disclosure requirements applicable to proxy and information statements, registration statements and periodic reports under the Securities Exchange Act of 1934 ("Exchange Act"), and to registration statements under the Securities Act of 1933 ("Securities Act"). These amendments are intended to make compensation disclosure clearer, more comprehensive and more useful to shareholders. The release also addresses related questions that have arisen under the proxy rules.

DATES: Effective Date: These rules are effective November 29, 1993.

Transition Provisions: The new rules are effective November 29, 1993, and any registrant may use the amended rules at any time thereafter.

To facilitate a smooth transition, however, the following transitional provisions will be allowed by the Commission. Registrants are required to comply with the new rules for: (1) Any new registration statement under the Securities Act, and any new registration statement or periodic report under the Exchange Act filed on or after January 1, 1994; and (2) any new proxy or information statements filed on or after January 1, 1994, except that proxy or information statements filed with respect to the annual election of directors by registrants whose current fiscal year ends on or after December 15, 1993 are required to comply with the amended rules whenever filed.

FOR FURTHER INFORMATION CONTACT: Gregg W. Corso, Paula Dubberly, Brian L. Henry or Thomas D. Twedt at (202) 272–3097, Division of Corporation Finance, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549.

SUPPLEMENTARY INFORMATION: The Commission has adopted amendments to Item 402 of Regulation S–K[1] and corresponding amendments to Item 402 of Regulation S–B,[2] as well as to Item 10 of Schedule 14A.[3] These amendments modify the executive compensation disclosure requirements applicable to proxy and information statements,[4] registration statements and periodic reports under the Exchange Act,[5] and to registration statements under the Securities Act.[6]

I. Introduction

In October 1992, the Commission adopted extensive revisions to its rules governing disclosure of executive compensation in proxy and information statements as well as other Commission filings.[7] In August 1993, the Commission reported on the results of the review by the Division of Corporation Finance ("Division") of filings during the initial proxy season after adoption of the new rules.[8] Based on that review, the Commission proposed for comment several refinements to the executive compensation disclosure requirements,[9] and certain technical amendments to such disclosure rules and the proxy rules. The amendments are being adopted, substantially as proposed.[10]

The Division plans to review the proxy statements of those registrants requested during the 1993 proxy season to make changes in future filings, as well as proxy statements of additional registrants. To manage the review process to minimize delay in clearing preliminary proxy material, the staff may review definitive proxy statements even where the statement is filed in preliminary form. Registrants that wish to assure that any comments on their executive compensation disclosure are received prior to delivery of the proxy statement to shareholders may request staff review of their executive compensation disclosure prior to filing with the Commission. In order to ensure adequate time for staff review, drafts must be submitted to the attention of John Bernas, Securities and Exchange Commission, 450 Fifth Street NW., Mail Stop 3–7, Washington, DC 20549 at least 20 days before the date comments are necessary.[11] In order to review the draft, the staff would have to be provided all of the disclosure required by Items 402 and 404 of Regulation S–K and Item 10 of Schedule 14A. Submission of the entire draft proxy statement would not be necessary.

II. Amendments to Item 402 of Regulation S–K and Item 10 of Schedule 14A

A. Persons Covered

Item 402(a)(3) previously required compensation disclosure of the CEO and each of the four most highly paid executive officers (whose compensation exceeded $100,000) employed at fiscal year end. Finding that these requirements provided an incomplete picture of the registrant's compensation package when highly paid executives departed prior to fiscal year end, the Commission proposed to amend the rule to apply as well to any person who served as CEO during the latest fiscal year and any other executive officer who departed during such year but whose reportable salary and bonus would place them in the group of four highest paid executive officers. In determining the salary and bonus reportable, the amounts to be included are those paid, earned or accrued. The amounts are not to be annualized for the period after departure.

Comments received on the proposal ranged from those who suggested the rule cover more executives to those who not only opposed but suggested reducing the named executives to three. Several of the commenters suggested that the departed executives be included but that the total number remain at five; some suggested that only departed CEOs be added to the table. After review of the comments, the Commission has determined that the proposal strikes the right balance and is adopting the revisions as proposed.[12]

[9] Id.

[10] The changes from the proposed rules include conforming changes to the Option/SARs column headings in all the applicable tables and clarification that the changes in instruction 9 to Item 402(c) apply to the binomial pricing model. The Commission received 40 letters of comment, which may be inspected and copied at the Commission's Public Reference Room, 450 Fifth Street NW., Washington, DC 20549, File No. S7–23–93.

[11] Registrants submitting this information electronically should use the document tag "CORRESP," which will ensure that the information remains non-public. The designated staff contact should be informed of such an electronic submission.

[12] Items 402(a)(3)(i) and (iii) of Regulation S–K (17 CFR 229.402(a)(3)(i) and (iii)).

B. Restricted Stock Portfolio Information

The proposal to require all registrants to disclose year-end restricted stock holdings regardless of whether any such grants occurred during the period covered by the Summary Compensation Table was supported by most commenters. The amendment is adopted, as proposed.[13]

C. Grant-Date Present Value

Based on its experience with the disclosures made with respect to grant date valuations, the Commission proposed to require disclosure of specified assumptions and adjustments underlying a calculation using the Black-Scholes or binomial pricing model. The proposal reflected both the importance of the assumptions underlying the valuation as well as the clarity of the disclosure provided by those registrants that voluntarily disclosed assumptions during the last proxy season.

Most commenters acknowledged the importance of the information. Some expressed concern over the potential liability. The Commission notes that the option value is a projection of a financial item entitled to safe harbor protections, as are the underlying assumptions.[14] The amendment is adopted as proposed.[15]

D. Performance Graph: Weighting of Self-Constructed Indices

When registrants use a self-constructed peer group index or a market capitalization index in the performance graph, the returns of each component company must be weighted according to their respective stock market capitalization.[16] Most commenters expressed strong support for the proposal to change the timing of the weighting from the end to the beginning of the period, as providing a more accurate measurement of total return. The amendment has been adopted, as proposed.

E. Technical Amendments

The Commission has adopted substantially as proposed the following technical amendments to clarify the application of Item 402 and to correct certain inconsistencies in the rules.

- The instruction to the Summary Compensation Table requiring restricted stock portfolio information has been revised to clarify that such holdings should be valued using the stock value at year end.[17]
- The caption to column (b) to the Options Grants Table now reads: "Number of Securities Underlying Options/SARs Granted."[18] In addition, conforming changes were made to the appropriate captions in the Summary Compensation Table,[19] the Option Exercise Table[20] and the Ten-year Option/SAR Repricings Table[21].
- It also has been clarified that estimated future payouts in the Long-Term Incentive Plan Awards Table may be provided in dollars or in shares.[22]
- Disclosure regarding defined benefit or actuarial plans shall include the relationship of covered compensation to the annual compensation reported in the Summary Compensation Table.[23]
- The instructions to the performance graph have been revised to clarify that registrants must assume a fixed investment, stated in dollars (*e.g.*, $100), in the stocks and indices plotted.[24]
- Instruction 3 to Item 10 of Schedule 14A[25] now correctly references paragraphs (a) or (b) to Rule 14a-6[26] for the appropriate time to file.

III. Other Issues

As part of the October 1992 proxy rule revisions, the Commission adopted certain amendments affecting the presentation of matters on the form of proxy.[27] Rule 14a–4 was revised to require an "unbundling" of groups of related matters in the form of proxy.[28] The amended rule requires that each separate matter be clearly and impartially identified[29] and that the form of proxy provide for a separate vote on each matter presented.[30]

Companies have asked whether in the case of shareholder approval of amendments to an existing compensation plan, the "separate matter" referred to in Rule 14a–4 applies to each amendment to the plan or only the plan as amended. Registrants have been advised that it is appropriate to provide for a single vote on the plan, as amended, rather than a vote on each amendment in a given plan.

There have also been questions about the need to file in preliminary form a proxy statement related to the amendment of an existing compensation plan pursuant to Rule 14a–6(a).[31] As noted in the release adopting the amendments to the rules under section 16 of the Exchange Act,[32] proposals to amend an existing employee benefit plan do not require a registrant to file the proxy or information statement in preliminary form.[33] This interpretation is being codified in a companion release.[34]

Finally, questions have been raised as to the need for the Compensation Committee Report to address the deductibility of executive compensation under the new provisions of the Internal Revenue Code.[35] The report should in its discussion of executive compensation policies[36] address the registrant's policy with respect to qualifying compensation paid to its executive officers for deductibility under section 162(m) of the Internal Revenue Code.[37]

IV. Cost-Benefit Analysis

No specific data were provided in response to the Commission's request regarding the costs and benefits of these amendments. The Commission believes that the benefits to be gained by amending the executive compensation disclosure rules to require registrants to provide the enhanced information to shareholders as well as to clarify the disclosure requirements outweighs the costs associated with implementing these proposals.

V. Summary of Final Regulatory Flexibility Analysis

A final regulatory flexibility analysis has been prepared regarding the amendments in accordance with 5 U.S.C. 604. A copy of the analysis may be obtained from Thomas D. Twedt, Division of Corporation Finance, U.S.

VI. Effective Date

The amendments are effective upon publication in the **Federal Register**, in accordance with the Administrative Procedure Act, which allows for effectiveness in less than 30 days after publication, *inter alia*, "as provided by the agency for good cause found and published with the rule." 5 U.S.C. 553(d)(3). There is good cause for the amendments to become effective immediately in order to assure that this improved disclosure will be in place for the 1994 proxy season.

Some registrants have indicated an interest in being able to satisfy the revised executive compensation requirements as soon as possible. Immediate effectiveness will afford them that option.

For other registrants, the Commission has provided transition provisions. Registrants are required to comply with the new rules for: (1) Any new registration statement under the Securities Act, and any new registration statement or periodic report under the Exchange Act filed on or after January 1, 1994; and (2) any new proxy or information statements filed on or after January 1, 1994, except that proxy or information statements filed with respect to the annual election of directors by registrants whose current fiscal year ends on or after December 15, 1993 are required to comply with the amended rules whenever filed.

VII. Statutory Basis

The amendments contained herein are being adopted pursuant to sections 3(b), 6, 7, 8, 10, and 19(a) of the Securities Act and sections 12, 13, 14(a), 15(d) and 23(a) of the Exchange Act.

List of Subjects in 17 CFR Parts 228, 229 and 240

Reporting and recordkeeping requirements, Securities.

Text of Amendments

In accordance with the foregoing, Title 17, chapter II of the Code of Federal Regulations, is amended as follows:

PART 228—INTEGRATED DISCLOSURE SYSTEM FOR SMALL BUSINESS ISSUERS

1. The authority citation for part 228 continues to read as follows:

Authority: 15 U.S.C. 77e, 77f, 77g, 77h, 77j, 77k, 77s, 77aa(25), 77aa(26), 77ddd, 77eee, 77ggg, 77hhh, 77jjj, 77nnn, 77sss, 78l, 78m, 78n, 78o, 78w, 78ll, 80a–8, 80a–29, 80a–30, 80a–37, 80b–11, unless otherwise noted.

2. By amending § 228.402 by revising paragraph (a)(2); the table following paragraph (b)(1); paragraph (b)(2)(iv)(B); Instruction 2 to Instructions to Item 402(b)(2)(iv); the table following paragraph (c)(1); paragraph (c)(2)(ii); the table following paragraph (d)(1); paragraph (d)(2)(iv); and paragraph (e)(2)(iv) to read as follows:

§ 228.402 (Item 402) Executive compensation.

(a) * * *

(2) *Persons covered.* Disclosure shall be provided pursuant to this item for each of the following (the "named executive officers"):

(i) All individuals serving as the registrant's chief executive officer or acting in a similar capacity during the last completed fiscal year ("CEO"), regardless of compensation level;

(ii) The registrant's four most highly compensated executive officers other than the CEO who were serving as executive officers at the end of the last completed fiscal year; and

(iii) Up to two additional individuals for whom disclosure would have been provided pursuant to paragraph (a)(2)(ii) of this item but for the fact that the individual was not serving as an executive officer of the registrant at the end of the last completed fiscal year.

SECURITIES AND EXCHANGE COMMISSION

17 CFR Part 240

[Release No. 34–33232; IC–19887; File No. S7–31–93]

RIN 3235–AG01

Elimination of Filing Requirements for Preliminary Proxy Materials Under Certain Circumstances

AGENCY: Securities and Exchange Commission.

ACTION: Proposed Rules.

SUMMARY: The Securities and Exchange Commission ("Commission") is proposing amendments to the proxy and information statement filing requirements codifying a prior interpretation of Rule 14a–6 that submitting amendments to an existing compensation plan for shareholder approval does not affect the exclusions from the preliminary proxy and information statement filing requirements. By codifying and publicizing this interpretation, the Commission hopes to remove any ambiguity regarding the scope of this exclusion from the filing of preliminary materials.

DATES: Comments should be received on or before December 13, 1993.

ADDRESSES: Comments should be submitted in triplicate to Jonathan G. Katz, Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Stop 6–9, Washington, DC 20549. Comment letters should refer to File No. S7–31–93. All comments received will be available for public inspection and copying at the Commission's Public Reference Room, 450 Fifth Street, NW., Washington, DC 20549.

FOR FURTHER INFORMATION CONTACT: Gregg W. Corso, Paula Dubberly, Brian L. Henry or Thomas D. Twedt, (202) 272–3097, Division of Corporation Finance, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549.

SUPPLEMENTARY INFORMATION: The Commission is proposing an amendment to Rule 14a–6[1] and Rule 14c–5[2] of the Securities Exchange Act of 1934 ("Exchange Act").[3] In a companion release the Commission is adopting several refinements of, and technical changes to, the executive compensation disclosure rules.[4]

I. Proposed Rule Changes

In 1987, the Commission adopted amendments to the proxy rules to eliminate the requirement to file preliminary proxy or information statements in certain circumstances.[5] In their present form, Rules 14a–6 and 14c–5 provide that a preliminary statement shall not be filed if it relates to an annual, or special meeting held in lieu of the annual, meeting of security holders at which the only matters to be acted upon are (1) the election of directors, (2) the election, approval or ratification of auditors, and/or (3) a security holder proposal.[6] In adopting amendments to section 16 of the Exchange Act,[7] the Commission noted that "where a plan amendment is submitted for shareholder approval, whether or not such amendment is for the purpose of conforming a plan to [the new section 16 rules], the proposal will no longer trigger the requirement to file the proxy or information statement in preliminary form."[8]

During the comment period for the recent proposed amendments to the executive compensation rules, the Commission received numerous inquiries regarding the application of this interpretation.[9] In order to clarify and publicize this position, the Commission proposes to codify the noted interpretation.

The proposal revises Rules 14a–6(a) and 14c–5(a) specifically to include compensation plan amendments among the matters for which a preliminary filing is not necessary. The proposed amendment, like the staff's interpretation, applies to existing compensation plans. The Commission, however, is considering extending this position to votes on new plans and requests commenters' views as to whether this should be done.

II. General Request for Comment

Any interested persons wishing to submit written comments on the proposed amendments to Rule 14a–6 and Rule 14c–5 of the Exchange Act are invited to do so by submitting them in triplicate to Jonathan G. Katz, Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Stop 6–9, Washington, DC 20549. Comment letters should refer to File No. S7–31–93. Comment is requested as to the potential impact of the proposals on such matters as tax planning and regulatory burdens. The Commission also requests comment on whether the proposals, if adopted, would have an adverse effect on competition that is neither necessary nor appropriate in furthering the Exchange Act. Comments responsive to this inquiry will be considered by the Commission in complying with its responsibilities under section 23(a) of the Exchange Act.[10] All comments received will be available for public inspection and copying in the Commission's Public Reference Room, 450 Fifth Street, NW., Washington, DC 20549. Since the proposal formally eliminates a filing burden and merely codifies an existing interpretation, the proposal provides for a comment period of 21 days.

III. Cost Benefit Analysis

As an aid in the evaluation of the costs and benefits of these proposals, the Commission requests the views of and other supporting information from the public. It appears to the Commission that the benefit to be gained by amending the proxy rules to clarify that preliminary proxy and information statements are not necessary where the only matters to be voted upon at an annual meeting are the election of directors; the election, approval or ratification of auditors; a shareholder proposal; and one or more amendments to an existing compensation plan outweighs any costs associated with implementing these proposals.

IV. Initial Regulatory Flexibility Analysis

The Commission has prepared the following Initial Regulatory Flexibility Analysis in accordance with 5 U.S.C. 603.

1. The Commission is proposing amendments to Rules 14a–6 and 14c–5 under the Exchange Act to codify an interpretive position.

2. The Commissions objective is to publicize and clarify its interpretation in order to remove any ambiguity

[8] Release No. 34–28869 (February 8, 1991) (56 FR 7242) at note 244. *See, e.g., Thompson, Hine and Flory* (avail. March 29, 1991) (affirming that plan amendments do not trigger the preliminary filing requirement of Rule 14a–6).

[9] File No. S7–23–93.

[10] 15 U.S.C. 78w(a).

regarding the scope of the exemption from filing preliminary materials.

3. The proposed amendments would affect all registrants, including small businesses, that are reporting companies under the Exchange Act. The Commission does not have a basis for estimating the number of small businesses that will file proxy or information statements under the Exchange Act.

4. Since the proposal simply codifies current practice, it is expected that the proposed amendments will have no effect on recordkeeping, reporting and compliance requirements.

5. No current federal rules duplicate, overlap or conflict with the proposals.

6. A number of significant alternatives to the proposed amendments have been considered. One alternative would be to provide differing or simplified requirements for small businesses that are based on performance rather than design standards. However, the adoption of performance standards would not be consistent with the Commission's statutory mandate to require disclosure to investors of material information necessary to make informed investment decisions. The proposed amendments clarifies an interpretation that simplifies reporting requirements for all registrants, including small businesses. Other alternatives would involve the establishment of different compliance or reporting requirements or timetables to take into account the resources available to small businesses and to provide an exemption from coverage of the provisions for small businesses. Since the proposals impose no added burden on small business issuers, different treatment is not warranted.

Written comments are encouraged with respect to any aspect of the Analysis. Such comments will be considered in the preparation of the Final Regulatory Flexibility Analysis if the proposed amendments are adopted.

V. Statutory basis

The amendments contained herein are being proposed pursuant to sections 12, 13, 14(a), 15(d) and 23(a) of the Exchange Act.

List of Subjects in 17 CFR Part 240

Reporting and recordkeeping requirements, Securities.

Text of Proposed Amendment

In accordance with the foregoing, title 17, chapter II of the Code of Federal Regulations is proposed to be amended as follows:

PART 240—GENERAL RULES AND REGULATIONS, SECURITIES EXCHANGE ACT OF 1934

1. The authority citation for part 240 continues to read in part as follows:

Authority: 15 U.S.C. 77c, 77d, 77g, 77j, 77s, 77eee, 77ggg, 77nnn, 77sss, 77ttt, 78c, 78d, 78i, 78j, 78l, 78m, 78n, 78o, 78p, 78s, 78w, 78x, 78ll(d), 79q, 79t, 80a–20, 80a–23, 80a–29, 80a–37, 80b–3, 80b–4 and 80b–11, unless otherwise note.

* * * * *

2. By amending § 240.14a–6 by revising paragraph (a) preceding the notes to read as follows:

§ 240.14a–6 Filing requirements.

(a) *Preliminary proxy statement.* Five preliminary copies of the proxy statement and form of proxy shall be filed with the Commission at least 10 calendar days prior to that date definitive copies of such material are first sent or given to security holders, or such shorter period prior to the date as the Commission may authorize upon a showing of good cause thereunder. A registrant, however, shall not file with the Commission a preliminary proxy statement, form of proxy or other soliciting material to be furnished to security holders concurrently therewith if the solicitation relates to an annual (or special meeting in lieu of the annual) meeting, or for an investment company registered under the Investment Company Act of 1940 (15 U.S.C. 80a–1 *et seq.*) or a business development company, if the solicitation relates to any meeting of security holders at which the only matters to be acted upon are:

(1) The election of directors;

(2) The election, approval or ratification of accountant(s);

(3) A security holder proposal included pursuant to § 240.14a–8;

(4) The approval of amendments to a plan as defined in paragraph (a)(7)(ii) of Item 402 of Regulation S–K (§ 229.402(a)(7)(ii) of this chapter);

(5) With respect to an investment company registered under the Investment Company Act of 1940 or a business development company, a proposal to continue, without change, any advisory or other contract or agreement that previously has been the subject of a proxy solicitation for which proxy material was filed with the Commission pursuant to this section; and/or

(6) with respect to an open-end investment company registered under the Investment Company Act of 1940, a proposal to increase the number of shares authorized to be issued.

This exclusion from filing preliminary proxy material does not apply if the registrant comments upon or refers to a solicitation in opposition in connection with the meeting in its proxy material.

* * * * *

3. By amending § 240.14c–5 to revise paragraph (a) preceding the notes to read as follows:

§ 240.14c–5 Filing requirements.

(a) *Preliminary information statement.* Five preliminary copies of the information statement shall be filed with the Commission at least 10 calendar days prior to the date definitive copies of such statement are first sent or given to security holders, or such shorter period prior to that date as the Commission may authorize upon a showing of good cause therefor. In computing the 10-day period, the filing date of the preliminary copies is to be counted as the first day and the 11th day is the date on which definitive copies of the information statement may be mailed to security holders. A registrant, however, shall not file with the Commission a preliminary information statement if it relates to an annual (or special meeting in lieu of the annual) meeting, of security holders at which the only matters to be acted upon are:

(1) The election of directors;

(2) The election, approval or ratification of accountant(s);

(3) A security holder proposal identified in the registrant's information statement pursuant to Item 4 of Schedule 14C (§ 240.14c–101); and/or

(4) The approval of amendments to a plan as defined in paragraph (a)(7)(ii) of Item 402 of Regulation S–K (§ 229.402(a)(7)(ii) of this chapter). This exclusion from filing a preliminary information statement does not apply if the registrant comments upon or refers to a solicitation in opposition in connection with the meeting in its information statement.

The President

Proclamation 6629—National Adoption Week, 1993 and 1994

Federal Register
Vol. 58, No. 227
Monday, November 29, 1993

Presidential Documents

Title 3—

The President

Proclamation 6629 of November 24, 1993

National Adoption Week, 1993 and 1994

By the President of the United States of America

A Proclamation

Our Nation's families are the guardians and first teachers of our most valuable resource and our primary responsibility—our children. Unfortunately, too many children do not have the opportunity to live and flourish in a family of their own. They have been orphaned, abandoned, neglected, or abused. They have been denied the protection and nurturing that a loving family environment can best provide. Now is the time to break the grip of the great crisis of the spirit that has far too long held our Nation. Now we can begin to bring about a change. There is much for each of us to contribute.

During National Adoption Week, it is vitally important for all of us to recognize the joys adoption can bring to the lives of children who are in need. For children who have been deprived of belonging to a secure, loving, and permanent home, an adoptive family can provide the most important ingredient in a child's life—love.

This Thanksgiving week, families across America will gather to give thanks to God for the blessings we all enjoy as individuals and as a Nation. Children who have no permanent families, who are waiting to be adopted, may not have as much to be thankful for this year. At this happy time of family celebration, we must not forget the children for whom the affection of a family remains only a dream.

These children have so much to offer. They deserve our best efforts to remove the public and private barriers to their adoption into permanent, loving families. We must reach out to the many Americans who long for children to love, and we must find homes for the thousands of children who are waiting for adoptive parents to take them into their lives and into their hearts. And we must also acknowledge the unselfish sacrifice made by many birth parents to ensure a better life for their child.

Every effort should be made to inform the public and prospective parents that there are many thousands of children available for adoption. We must involve the media, private and public agencies, adoptive parents, advocacy groups, civic and church groups, and businesses. We must ask them to provide publicity and information to heighten community awareness of the crucial needs of these children and of all those who work tirelessly to place them in loving families.

NOW, THEREFORE, I, WILLIAM J. CLINTON, President of the United States of America, by virtue of the authority vested in me by the Constitution and laws of the United States, do hereby proclaim the week of November 21, 1993, and the week of November 20, 1994, as National Adoption Week. I call upon all Americans to observe these weeks with appropriate programs, activities, and ceremonies.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-fourth day of November, in the year of our Lord nineteen hundred and ninety-three, and of the Independence of the United States of America the two hundred and eighteenth.

William J. Clinton

LIST OF PUBLIC LAWS

Note: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's List of Public Laws.

Last List November 22, 1993

CFR CHECKLIST

This checklist, prepared by the Office of the Federal Register, is published weekly. It is arranged in the order of CFR titles, stock numbers, prices, and revision dates.

An asterisk (*) precedes each entry that has been issued since last week and which is now available for sale at the Government Printing Office.

A checklist of current CFR volumes comprising a complete CFR set, also appears in the latest issue of the LSA (List of CFR Sections Affected), which is revised monthly.

The annual rate for subscription to all revised volumes is $775.00 domestic, $193.75 additional for foreign mailing.

Mail orders to the Superintendent of Documents, Attn: New Orders, P.O. Box 371954, Pittsburgh, PA 15250–7954. All orders must be accompanied by remittance (check, money order, GPO Deposit Account, VISA, or Master Card). Charge orders may be telephoned to the GPO Order Desk, Monday through Friday, at **(202) 783–3238** from 8:00 a.m. to 4:00 p.m. eastern time, or FAX your charge orders to **(202) 512-2233**.

[1] Because Title 3 is an annual compilation, this volume and all previous volumes should be retained as a permanent reference source.

[2] The July 1, 1985 edition of 32 CFR Parts 1–189 contains a note only for Parts 1–39 inclusive. For the full text of the Defense Acquisition Regulations in Parts 1–39, consult the three CFR volumes issued as of July 1, 1984, containing those parts.

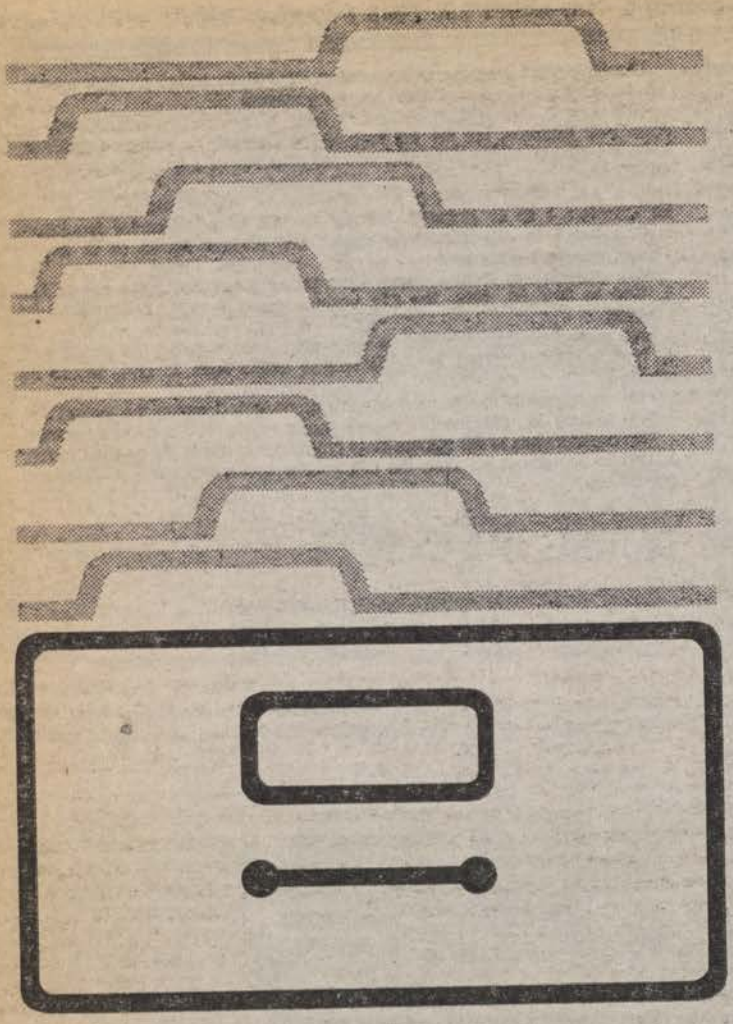

[3] The July 1, 1985 edition of 41 CFR Chapters 1–100 contains a note only for Chapters 1 to 49 inclusive. For the full text of procurement regulations in Chapters 1 to 49, consult the eleven CFR volumes issued as of July 1, 1984 containing those chapters.

[4] No amendments to this volume were promulgated during the period Apr. 1, 1990 to Mar. 31, 1993. The CFR volume issued April 1, 1990, should be retained.

[5] No amendments to this volume were promulgated during the period Apr. 1, 1991 to Mar. 31, 1993. The CFR volume issued April 1, 1991, should be retained.

[6] No amendments to this volume were promulgated during the period July 1, 1991 to June 30, 1993. The CFR volume issued July 1, 1991, should be retained.

[7] No amendments to this volume were promulgated during the period October 1, 1991 to September 30, 1992. The CFR volume issued October 1, 1991, should be retained.

Guide to Record Retention Requirements

in the Code of Federal Regulations (CFR)

GUIDE: Revised January 1, 1992

SUPPLEMENT: Revised January 1, 1993

The GUIDE and the SUPPLEMENT should be used together. This useful reference tool, compiled from agency regulations, is designed to assist anyone with Federal recordkeeping obligations.

The various abstracts in the GUIDE tell the user (1) what records must be kept, (2) who must keep them, and (3) how long they must be kept.

The GUIDE is formatted and numbered to parallel the CODE OF FEDERAL REGULATIONS (CFR) for uniformity of citation and easy reference to the source document.

Compiled by the Office of the Federal Register, National Archives and Records Administration.
