

South Dakota Listed Species by County List (updated 17 December 2014)

The bald eagle was removed from the List of Endangered and Threatened Wildlife effective August 8, 2007. The protections provided to the bald eagle under the Bald and Golden Eagle Protection Act and the Migratory Bird Treaty Act have continued to remain in place after the species was delisted. National Bald Eagle Management Guidelines (<http://www.fws.gov/pacific/eagle/NationalBaldEagleManagementGuidelines.pdf>) have been developed. This rule change does not affect the bald eagle's status as a threatened or endangered species under State laws or suspend any other legal protections provided by State law.

E = Endangered
 T = Threatened
 C = Candidate
 XN = Experimental/Non-essential Population

PE = Proposed Endangered
 PT = Proposed Threatened
 CH = Critical Habitat
 PCH = Proposed Critical Habitat

County	Group	Species	Certainty of Occurrence	Status

	Bird	Sprague's Pipit	Possible Migration	C

Notes

¹ The counties indicated for the Western Prairie Fringed Orchid are counties with potential habitat. Currently, there are no known populations of this species in South Dakota. Status surveys have been completed for the orchid in South Dakota. However, because of the ecology of this species, there is a possibility that plants may be overlooked.

² The American Burying Beetle is presently known for only Gregory, Todd and Tripp counties. One specimen was recently trapped in southern Bennett County. Historic specimens have been recorded from Haakon and Brookings Counties. A comprehensive status survey has never been completed for the American burying beetle in South Dakota. Until status surveys have been completed, the beetle could and may occur in any county with suitable habitat. Suitable habitat is considered to be any site with significant humus or topsoil suitable for burying carrion.

³ Although Topeka Shiners have not been formally documented within Clark, Douglas, Grant, Jerauld, Kingsbury, Lake, Spink, or Yankton Counties, the species may still occur in these areas because they contain portions of known occupied Topeka Shiner streams and/or potentially occupied streams that exist within one or more of the three known inhabited watersheds in South Dakota: the James, Vermillion, and Big Sioux.

⁴ Black-footed ferrets have been reintroduced in the Badlands National Park, Buffalo Gap National Grasslands, Cheyenne River Sioux Reservation, Lower Brule Sioux Reservation, Rosebud Sioux Reservation and Wind Cave National Park .

⁵ A fresh dead shell of a Higgins Eye Mussel was found in the Missouri River below Gavins Point Dam on October 27, 2004.

⁶ Shells of these species have been found, but no populations have been located.

⁷ A pallid sturgeon was caught in Lincoln County from the Big Sioux River in May 2009.

⁸ Poweshiek skipperling and Dakota skipper were added to the List of Endangered and Threatened Species on October 24, 2014. Poweshiek skipperling for endangered status and Dakota skipper for threatened status. Critical habitat for both species has been proposed.

⁹ In Perkins County, piping plovers have been found at Shade Hill Reservoir.

¹⁰ Northern Long-eared Bat was proposed for listing as an endangered species on October 2, 2013. The current range is the entire state. The range for this species will be adjusted as better scientific information becomes available. A final decision on listing will be made in April 2015.

¹¹ The Rufa Red Knot was proposed for listing as an endangered species on September 30, 2013. This species can be found in South Dakota during migration. The current range is the entire state. The range for this species will be adjusted as better scientific information becomes available. A final decision on listing will be made in Fall 2014.

More specific information on these species can be found at our website at <http://www.fws.gov> or by calling our office for more information.

Any corrections or additions to this list should be submitted to Scott Larson, U.S. Fish and Wildlife Service, South Dakota Field Office, Ecological Services, 420 South Garfield Avenue, Pierre, SD; Telephone (605)224-8693.
