

Eagle Technical Assistance

Blasting and Other Loud, Intermittent Noise Including Fireworks

Your activity is blasting or conducting other activities with loud, intermittent noises near nesting bald eagles during the breeding season. To avoid disturbing nesting eagles and their young, it is recommended that you:

1. Avoid blasting and other activities that produce extremely loud noises within 1/2 mile of active nests (or within 1 mile in open areas), unless greater tolerance to the activity (or similar activity) has been demonstrated by the eagles in the nesting area.
2. This recommendation also applies to the use of fireworks classified by the Federal Department of Transportation as Class B explosives, which includes the larger fireworks that are intended for licensed public display.

Determination

If you can meet these guidelines and do not wish to apply for a permit at this time, keep these guidelines as your final determination

If you cannot meet these guidelines visit the [eagle permit application page](#).
