

# Eagle Technical Assistance

## Helicopter and Fixed-wing Aircraft Activity

**Your activity is flying helicopters or fixed-wing aircraft near nesting bald eagles during the breeding season (Oct 1- May 15). To avoid disturbing nesting eagles and their young, it is recommended that you:**

1. Avoid operating aircraft within 1000 feet (305 meters) of the nest, except where eagles have demonstrated tolerance for such activity.

## Determination

If you can meet these guidelines and do not wish to apply for a permit at this time, keep these guidelines as your final determination

If you cannot meet these guidelines visit the [eagle permit application page](#).
