Subject: Proposed 2005 Operating Plan for Navajo Reservoir, Navajo Unit, Colorado River Storage Project, Colorado and New Mexico

Dear President Shirley:

Public Law 87-483, Section 11, directs Reclamation to apportion shortages to entitled users of Navajo Reservoir storage water, on a pro-rata basis, in the event shortages are anticipated. While current snowpack levels indicate that a shortage is not likely this year, notwithstanding the direction provided in Section 11, a group of ten water users have developed an agreement among themselves as to how they will allocate the water supply in a drought situation ("Recommendations for San Juan River Operations and Administration for 2005, November 15, 2004").

Because Reclamation has no ability to control or influence agreements among water users, and because this agreement among the users will not cause Reclamation to undertake any change in its operations from how we would operate under Section 11, the recommendations fall within our operating plan for the remainder of 2005. We also anticipate that operations under Section 11 will not cause releases to fall below the minimum allowable release rate from Navajo Dam.

We have received endorsement letters from the following Navajo Unit contractors, all endorsing this same plan:

- Hammond Conservancy District
- Jicarilla Apache Nation
- Navajo Nation
- Public Service Company of New Mexico (PNM)

In addition, we have received similar letters of endorsement from the following entities:

- Arizona Public Service Company (APS)
- BHP-Billiton
- City of Farmington
- Bloomfield Irrigation District

Farmers Mutual Ditch  
Jewett Valley Ditch

As stated above, based on the most recent forecast, and using the methodology included in the Recommendations, no shortages are anticipated. The forecasted inflow will be updated biweekly, and if changes to the available supply are realized, the shortage calculation will be revised accordingly.

The plan recommends that Reclamation approve temporary water service subcontracts between the Jicarilla Apache Nation and the following entities: BHP-Billiton, APS, and PNM. These contracts are currently moving through our approval process.

Reclamation's acknowledgement of these recommendations does not constitute endorsement of any disclaimers included in any parties' endorsement letter.

We offer our congratulations and sincere appreciation to everyone who was involved in the development of this plan. If you have any questions, please contact Pat Page or Ed Warner at 970-385-6560 or 970-248-0654, respectively.

Sincerely,

**Connie L. Rupp**

Acting  
for Rick L. Gold  
Regional Director
