NEW MEXICO

1:100 000 — Scale Map of

National Wetlands Inventory

- Wetland classifications
- Highways, roads and other manmade structures
- Water features
- Geographic names

FISH & WILDLIFE SERVICE

1984

Produced by the United States Fish and Wildlife Service

Wetland classifications from 1:58,000 scale color infrared aerial photographs taken 1982, 1983 and other source data.

Projection and 10,000 meter, zone 12
Universal Transverse Mercator
25,000-foot grid ticks based on New Mexico coordinate system, central and east zones 1927 North American datum
To place on the predicted North American Datum 1983 move the projection line 4 meters south and 54 meters east

SPECIAL NOTE

This map information was prepared primarily by stereoscopic analysis of high altitude aerial photographs. Wetlands were identified on the photographs based on vegetation, visible hydrology, and geography in accordance with **Classification of Wetlands and Deep Water Habitats of the United States**, (An Operational Draft) Cowardin, et al., 1977. The aerial photographs typically reflect conditions during the specific year and season when they were flown. Wetlands that appear dry during the season in which the aerial photographs. Thus, a detailed on the ground and historical analysis of a single site may result in a revision of the wetland boundaries established through photographic interpretation. In addition, some small wetlands and those obscured by dense forest cover may not be included on this document.

The delineation of specific regulatory agencies with jurisdiction over wetlands may define and describe wetlands in a different manner than that used in this inventory. There is no attempt, in either the design or products of this inventory, to define the limits of proprietary jurisdiction of any Federal, State or local government or to establish the geographical scope of the regulatory programs of government agencies. Persons intending to engage in activities involving modifications within or adjacent to wetland areas should seek the advice of appropriate Federal, State or local agencies concerning specific agency regulatory programs and proprietary jurisdictions that may affect such activities.

CONVERSION TABLE

Meters	Feet
1	3.2808
2	6.5617
3	9.8425
4	13.1233
5	16.4042
6	19.6850
7	22.9659
8	26.2467
9	29.5276
10	32.8084

To convert meters to feet multiply by 3.2808
To convert feet to meters multiply by 0.3048

NOTES TO THE USER

- Wetlands which have been field examined are indicated on the map by an asterisk (*).
- Additions or corrections to the wetlands information displayed on this map are solicited. Please forward such information to the address indicated.
- Subsystems, Classes, Subclasses, and Water Regimes in Italics were developed specifically for NATIONAL WETLANDS INVENTORY mapping.
- Some areas designated as R4SB, R4SBW, OR R4SBJ (INTERMITTENT STREAMS) may not meet the definition of wetland.
- This map uses the class Unconsolidated Shore (US). On earlier NWI maps that class was designated Beach/Bar (BB), or Flat (FL). Subclasses remain the same in both versions.

Other information including a narrative report concerning the wetland resources depicted on this document may be available. For information, contact:

MODIFIERS

In order to more adequately describe wetland and deepwater habitats one or more of the water regime, water chemistry, soil, or special modifiers may be applied at the class or lower level in the hierarchy. The tilded modifier may also be applied to the ecological system.

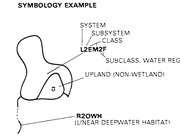
WATER REGIME		WATER CHEMISTRY		SOIL	SPECIAL MODIFIERS
Non-Tidal	Tidal	Coastal Salinity	Inland Salinity	pH Modifiers for all Fresh Water	
A. Temporarily Flooded	N. Permanently Flooded	Hyperhaline	Hyperhaline	1. Organic	1. Beaver
B. Saturated	Intermittently Flooded	Euhaline	Euhaline	2. Mineral	2. Partially Drained/ Ditched
C. Seasonally Flooded	P. Intermittently Flooded	Mixohaline (Brackish)	Mixohaline (Brackish)		3. Farmed
D. Seasonally Flooded/ Well Drained	R. Intermittently Flooded/ Temporary	Polyhaline	Mesohaline		
E. Seasonally Flooded/ Saturated	U. Intermittently Flooded/ Semipermanent	Mesohaline	Oligohaline		
F. Semipermanently Flooded	W. Intermittently Flooded/ Permanent	Oligohaline	Fresh		
G. Intermittently Exposed	Y. Permanently Flooded	Fresh			
	Z. Artificially Flooded				

*These water regimes are only used in tidally influenced freshwater systems.

SOIL	SPECIAL MODIFIERS
1. Organic	1. Beaver
2. Mineral	2. Partially Drained/ Ditched
	3. Farmed

1. Organic	4. Diked/ Impounded
2. Mineral	5. Artificial
3. Excavated	6. Revetted

SYMBOLOGY EXAMPLE



U = Primarily represents **upland** areas, but may include unclassified wetlands such as man-modified areas, non photo-identifiable areas and/or unintentional omissions.
