Service Reopens Public Comment Period for Proposal to List the Western Yellow-Billed Cuckoo as a Threatened Species Comments Accepted through April 25, 2014

Sacramento - The U.S. Fish and Wildlife Service (Service) is reopening the public comment period for 15 days for the proposal to list the western distinct population segment of the yellow-billed cuckoo as a Threatened Species under the Endangered Species Act (ESA).

On October 3, 2013, the Service proposed to list the western yellow-billed cuckoo in the western United States, Canada, and Mexico. In the U.S., the western yellow-billed cuckoo is known to occur in Arizona, California, Colorado, Idaho, Nevada, New Mexico, Texas, Utah, Wyoming, Montana, Oregon, and Washington.

The Service will accept comments through April 25, 2014 on the proposed rule. Comments may be submitted online at the Federal eRulemaking Portal at <http://www.regulations.gov>, docket number FWS-R8-ES-2013-0104. Comments can also be sent by U.S. mail to:

Public Comments Processing
Attn: FWS-R8-ES-2013-0104
Division of Policy and Directives Management
U.S. Fish and Wildlife Service
4401 N. Fairfax Drive, MS 2042-PDM
Arlington, VA 22203

The Service seeks information regarding any threats to the species and regulations that may address those threats. More information about the proposal and a detailed outline of the information that the Service is specifically seeking can be found on the Sacramento Fish and Wildlife Office's website at: http://www.fws.gov/sacramento/outreach/Public-Advisories/WesternYellow-BilledCuckoo/outreach_PA_Western-Yellow-Billed-Cuckoo.htm.

Comments previously submitted during the initial public comment period need not be resubmitted.

The western yellow-billed cuckoo (*Coccyzus americanus*) is a neotropical migrant bird that winters in South America and breeds in western North America. The yellow-billed cuckoo is insectivorous and lives in riparian woodlands.

While the yellow-billed cuckoo is common east of the Continental Divide, biologists estimate that more than 90 percent of the bird's riparian habitat in the West has been lost or degraded. Threats to the western distinct population segment include loss of riparian habitat and habitat fragmentation as a result of conversion to agriculture, dams and river flow management, bank protection, overgrazing, and competition from exotic plants.

The mission of the U.S. Fish and Wildlife Service is working with others to conserve, protect, and enhance fish, wildlife, plants, and their habitats for the continuing benefit of the American people. We are both a leader and trusted partner in fish and wildlife conservation, known for our scientific excellence, stewardship of lands and natural resources, dedicated professionals, and commitment to public service.
