TELEPHONE: (907) 262-7021 Email: kenai@fws.gov

SUBJECT: Black Bear Baiting Permit Applications Available

The Refuge is offering opportunities for individuals to participate in black bear baiting. The application process to obtain a black bear baiting permit for 2013 will be the same as 2012. A random drawing will be used to determine the order in which bait areas will be selected.

In order to participate in the random drawing, permit applications must be received between March 1 and 4:30 p.m. on April 12, 2013. At 9:00 a.m. on Saturday, April 13, 2013, the random drawing will commence. You must be present when your name is drawn. Bait areas will be chosen and permits issued in the order drawn. After the drawing, all remaining sites will be available on a first-come, first-served basis. Any applicants not present when drawn may select from these available sites.

Black bear baiting permits are issued for exclusive one-square mile areas within that portion of the Refuge open to black bear baiting. The black bear baiting season on the Refuge is open from May 1 to June 30.

All bait stations, whether on or off the Refuge, must be registered with Alaska Department of Fish and Game. All hunters must have a valid Alaska hunting license and have

completed a State of Alaska approved bear baiting clinic in order to get a Refuge bear baiting permit. Additionally, archers wishing to take a black bear over bait on the Refuge must have completed a State of Alaska approved bow hunter education course.

Blank applications are available at Refuge Headquarters on Ski Hill Road or can be downloaded online at <http://1.usa.gov/WiAIPi> . The signed application must be returned via fax, mail, or in person during the application period. Our fax number is (907) 262-3599.

The gate to the Visitor Center Parking lot will open at 8:00 a.m. on Saturday and no camping or overnight stays are allowed. If you have any questions, please contact our office at (907) 262-7021.

The mission of the U.S. Fish and Wildlife Service is working with others to conserve, protect, and enhance fish, wildlife, plants, and their habitats for the continuing benefit of the American people. We are both a leader and trusted partner in fish and wildlife conservation, known for our scientific excellence, stewardship of lands and natural resources, dedicated professionals, and commitment to public service.
