Hunting and Fishing Regulations 2020–2021

Welcome

Clarks River National Wildlife Refuge is one of over 567 National Wildlife Refuges administered by the U.S. Fish and Wildlife Service. The primary objective of a National Wildlife Refuge is to provide habitat for the conservation and protection of all species of wildlife. The harvest of surplus animals is one tool used to manage wildlife populations. Carefully managed hunts maintain wildlife populations at a level compatible with the environment, provide recreational opportunities, and permit the use of a valuable renewable resource.
