

CAUTION: AGGRESSIVE NESTING CANADA GEESE

Please be advised we have had reports of aggressive behavior from a pair of nesting Canada geese just east of the cross dike. If you are walking the entire Dike Trail loop, you may encounter these birds. We encourage people to turn around if you see any aggressive goose behavior. We are uncertain how long this aggressive behavior may occur, but we are monitoring it each week. If this behavior increases conflict with visitors, we may have to close this section of the trail. If you observe this behavior, please call 978.443.4661
