

Group Report Out – Fall

Name of group and location

Report on the **number of the group birds observed and identify the habitat(s)** they were located

Report on the **salinity and, temperature of water**

Has it **rained in the past month**? If so, how many days? Do you think this influenced the salinity?

Identify one observation that was the **same** as you predicted

Identify one observation that was new and **different** from what you predicted

Identify **one other unique** observation

After today's field study, what are you wondering about now and why?

Group Report Out – Winter

Name of group and location

Report on the **number of the group birds observed and identify the habitat(s)** they were located

Report on the **salinity and, temperature of water**

Has it **rained in the past month**? If so, how many days? Do you think this influenced the salinity?

Identify one observation that was the **same** as last fall

Identify one observation that was new and **different** from last fall

Identify **one other unique** observation

After today's field study, what are you wondering about now and why?

Group Report Out – Spring

Name of group and location

Report on the **number of the group birds observed and identify the habitat(s)** they were located

Report on the **salinity and, temperature of water**

Identify one observation that was the **same** as last winter

Identify one observation that was new and **different** from last winter

Identify **one other unique** observation

Describe **2 changes that you have observed over the 3 seasons you have visited the refuge.**
