# Introduction

## About the list

This checklist intended to be a frequently updated document reflecting the current state of knowledge of the biota of the Kenai National Wildlife Refuge.

The present list includes a total of 1,902 species: 205 vertebrates, 649 invertebrates, 482 vascular plants, 181 bryophytes, 356 fungi, and 29 unicellular organisms. Of these, 1,821 are considered to be native, 77 species are considered to be non-native, and four species are represented by both native and non-native populations. In addition, 18 non-native species are believed to have been extirpated from the Refuge.

The list was produced from an in-house database using ITIS (<http://www.itis.gov>) for its taxonomic backbone. Accordingly, names and hierarchies follow ITIS except where taxa are not represented in ITIS.

Since the last version of this list ([Kenai National Wildlife Refuge biology staff, 2015](#)) where 1,865 species were listed, there has been a net change of 55 species added. Eighteen of these

species were moved from the checklist to the list of extirpated species. The format of the list was changed from XHTML to PDF generated by XeLaTeX to enable handling of citations via BibTeX. Many link-outs to specimen and observation records were added in this version.

This list is dynamic and far from perfect, with many changes and corrections yet to be made. Please send comments and corrections to Matt Bowser at [matt\\_bowser@fws.gov](mailto:matt_bowser@fws.gov).

## Acknowledgments

Many acknowledgments are due to many people who have reviewed this list, provided identifications, etc. In this draft a start is made on this. John Hudson (USFWS, Juneau, Alaska) provided lists of Odonata observed on the Refuge. Richard Payne (University of York, Heslington, UK) provided a list of protists from Jigsaw Lake from [Payne et al. \(2006\)](#). James Bergdahl (Conservation Biology Center, Spokane, WA) reviewed and made helpful comments on the Refuge's list of Carabidae.

# Checklist of species occurring on the Kenai National Wildlife Refuge

Non-native species are indicated by a dagger (†) and species having both native and non-native populations are indicated by a double dagger (‡).
