

New Nature Trail

.5 mile loop

Starting from the Visitor Center parking lot this .5 mile long trail takes you on a walk through the prairie to view the seasonally changing flowers and grasses, by the pond to see frogs and busy dragonflies, and into the woods to explore the woodland habitat before returning to the parking lot.

There are many learning opportunities along the trail and if interested guide books are available in the Visitor Center to help identify common animals, flowers, trees and grasses.

This nature trail was developed during the summer of 2013. Please note new trails are a work in progress. If you would like to help improve the trail by maintaining certain sections or removing invasive species call 618-883-2524 or talk with someone in the Visitor Center.
