

*The winter subsistence caribou hunt on Tetlin Refuge begins on October 1. Limit will be one caribou (either sex). However, the Refuge remains closed to motorized access (including snow machines) until adequate snow cover exists. The Refuge Manager will advise all communities when the Refuge is open to snow machine use.*

*The Refuge Manager has also requested an additional caribou (bull only) be approved by the Office of Subsistence Management. However, that request will not be considered until November. If approved, additional notices will be posted.*

*Please call 907-883-5312 if you have questions.*
