

Readers' Guide

Native species discussed in this document are referred to by their Hawaiian names. Common English names and scientific nomenclature can also be found in the glossary in Appendix A. The U.S. Fish and Wildlife Service endeavors to be accurate in its use of the Hawaiian language and correctly spell Hawaiian words, including the diacritical marks that affect the meaning and aid in pronunciation. This guide is provided to simplify pronunciation for the reader.

When Captain Cook arrived in the Hawaiian Islands in 1778, the Hawaiians had a totally oral tradition. In 1820, missionaries standardized a written version of the Hawaiian language that features eight consonants and five vowels.

Consonants

H - as in English
 K - as in English
 L - as in English
 M - as in English
 N - as in English
 P - as in English
 W - after i and e pronounced v
 - after u and o pronounced like w
 - at the start of a word or after a,
 pronounced like w or v
 (‘) - ‘okina - a glottal stop

Vowels

A - pronounced like the a in far
 E - pronounced like the e in bet
 I - pronounced like the ee in beet
 O - pronounced like the o in sole
 U - pronounced like the oo in boot

Special Symbols

Two symbols appear frequently in Hawaiian words, the ‘okina and the kahakō. These two symbols change how words are pronounced. The ‘okina itself looks like an upside-down apostrophe and is a glottal stop – or a brief break in the word. An example of this in English is in the middle of the expression “uh-oh.” The ‘okina is an official consonant – just as any of the other consonants.

The kahakō is a stress mark (macron) that can appear over vowels only and serve to make the vowel sound slightly longer. The vowels ā, ē, ī, ō, and ū sound just like their non-stress Hawaiian vowels with the exception that the sound is held slightly longer. Missing the ‘okina or kahakō can greatly change not only the how a word sounds, but also its basic meaning. A popular example of how an ‘okina and a kahakō can change the meaning of a word is “pau”:

- pau = finished, ended, all done
- pa‘u = soot, smudge, ink powder
- pa‘ū = moist, damp
- pā‘ū = skirt

Unit Names

Punamanō	(<i>POO-nah mah-NOHH</i>)	meaning: shark spring
Ki‘i	(<i>KEE-ee</i>)	meaning: image

Waterbirds

Ae‘o (EYE oh)

Hawaiian Stilt *Himantopus mexicanus knudseni*

SPECIES STATUS:

Federally listed as Endangered

State listed as Endangered

State recognized as Indigenous

Laura Beauregard

‘Alae ke‘oke‘o (ah-lye KAY oh KAY oh)

Hawaiian Coot *Fulica alai*

SPECIES STATUS:

Federally listed as Endangered

State listed as Endangered

State recognized as Endemic

Laura Beauregard

‘Alae ‘Ula (ah-lye OO-lah)

Hawaiian Moorhen *Gallinula chloropus sandvicensis*

SPECIES STATUS:

Federally listed as Endangered

State listed as Endangered

State recognized as Indigenous

Migrant Shorebirds

‘Akekeke (ah-kay-KAY-kay)

Ruddy Turnstone *Arenaria interpres*

SPECIES STATUS:

State recognized as Indigenous

U.S. Shorebird Conservation Plan - High Concern

Michael Walther

Hunakai (hoo-nah-KYE)

Sanderling *Calidris alba*

SPECIES STATUS:

State recognized as Indigenous

Hunakai means “sea foam.” Their habit of running along the receding waves on the shore in search of small sand crabs apparently reminded early Hawaiians of the sea foam or *hunakai* left behind by the waves. It shares the name with a coastal plant.

Michael Walther

Kioea (kee-oh-AY-ah)

Bristle-thighed Curlew *Numenius tahitiensis*

SPECIES STATUS:

State recognized as Indigenous

IUCN Red List Ranking - Vulnerable

Laura Beauregard

Kōlea (KOHH-lay-ah)

Pacific Golden Plover *Pluvialis fulva*

SPECIES STATUS:

State recognized as Indigenous

U.S. Shorebird Conservation Plan - High Concern

Michael Walther

‘Ūlīlī (OOO-lee-lee)

Wandering Tattler *Heteroscelus incanus*

SPECIES STATUS:

State recognized as Indigenous

U.S. Shorebird Conservation Plan - Moderate Concern
