BATS OF MNWR
Bats

Family: Vespertilionidae

Species: *Myotis lucifugus*
Little Brown Myotis

**Diet:** Moths, wasps, beetles, gnats, mosquitoes, midges, mayflies, and other insects

**Habitat:** Buildings, trees, under rocks, wood piles, caves, and other natural crevices

Species: *Myotis yumanensis*
Yuma Myotis

**Diet:** Moths, mayflies, and other small insects

**Habitat:** Cliffs, old buildings, mines, caves, bridges, and abandoned cliff swallow nests
**Bats**

**Family: Vespertilionidae**

**Species:** *Myotis evotis*
- **Long-eared Myotis**

**Diet:** Small moths, beetles, flies, and other insects

**Habitat:** Carnivorous forests in mountain areas, caves, buildings, and under tree bark

**Species:** *Myotis volans*
- **Long-legged Myotis**

**Diet:** Mainly small moths

**Habitat:** Open woods, mountain terrain, buildings, cliff crevices, hollow trees, and caves
Bats
Family: Vespertilionidae

Species: Myotis californicus
California Myotis

Diet: Small moths and beetles
Habitat: Wooded canyons, forests, hillsides, cliff crevices, houses, and caves

Species: Myotis ciliolabrum
Small-footed Myotis

Diet: Moths, flies, true bugs, and ants
Habitat: Caves, rock shelters, cliffs, mines, and abandoned buildings
Bats
Family: Vespertilionidae

Species: *Myotis thysanodes*
Fringed Myotis

**Diet:** Moths, daddy longlegs, and beetles

**Habitat:** Caves, mine tunnels, rock crevices, and old buildings

Species: *Lasionycteris noctivagans*
Silver-haired Bat

**Diet:** Flies, midges, leafhoppers, moths, mosquitoes, beetles, caddisflies, crickets, and spiders

**Habitat:** Small trees, under tree bark, buildings, rock crevices, in wood piles, cliff faces, and caves
Bats
Family: Vespertilionidae

Species: *Parastrellus hesperus*
Western Pipistrelle

**Diet:** Moths, flies, beetles, mosquitoes, and wasps

**Habitat:** Deserts, dry brushland, caves, rock crevices, canyons, and cliffs

Species: *Eptesicus fuscus*
Big Brown Bat

**Diet:** Moths, beetles, mosquitoes, and wasps

**Habitat:** Hollow trees, under tree bark, rock crevices, man-made structures, caves, and underground mines
Bats
Family: Vespertilionidae

**Hoary Bat**
Species: *Lasiurus cinerus*
Diet: Moths, flies, beetles, grasshoppers, mosquitoes, and wasps
Habitat: Coniferous forests, trees, and caves

**Spotted Bat**
Species: *Euderma maculata*
Diet: Moths, beetles, and caddisflies
Habitat: Coniferous forests, desert scrub, canyon crevices, and cliff faces
Bats
Family: Vespertilionidae

**Diet:** Moths, flies, lacewings, dung beetles, sawflies, and other small insects

**Habitat:** Rocky areas, caves, abandoned mine tunnels, and old buildings

Species: *Corynorhinus townsendii*
Townsend’s Big-eared Bat

Species: *Antrozous pallidus*
Pallid Bat

**Diet:** Crickets, scorpions, centipedes, ground beetles, grasshoppers, cicadas, praying mantis, long-horned beetles, lizards, and rodents

**Habitat:** Rock crevices, buildings, caves, and shutters
