**EXPLORE**
*the life-like habitat dioramas and engaging and fun discovery drawers.*
Get an up-close view of the plants and animals that call Rhode Island’s National Wildlife Refuges their home.

**LEARN**
*from a variety of lesson plans designed to engage young scientists to explore and protect Rhode Island’s coastal habitats.*

**VISIT**
*this multi-faceted education facility, located in Charlestown, Rhode Island, and join the many visitors who have experienced the diversity of wildlife and its habitats.*

**Exhibits**
Step into our world and discover the many species that are all around you. Find out what the U.S. Fish & Wildlife Service is doing to protect wildlife and their habitat.

**Wildlife Recovery**
Get to know the piping plover and find out where its name comes from. Discover what efforts are being made to ensure the survival of this threatened shorebird.

**Discovery Station**
Learn how kettle ponds were formed and what lives there. See the curious nine-spine sticklebacks looking back at you. The pond’s tiny secrets are revealed though microscopes.

**Habitat Diversity**
Study six diverse habitats found on refuge lands: upland forests, salt ponds, coastal shrublands, barrier beaches, saltmarshes, and rocky shores.

**Migratory Bird Map**
Many national wildlife refuges were established along ancestral flyways. Learn how Teddy Roosevelt founded the first refuge in 1903.

**Habitat Management**
Find out how refuge staff and partners manage lands for wildlife habitat. See how you can help as a volunteer.

**Large Classroom**
A large, open classroom can accommodate your needs for educational field trips, meetings, retreats, and “conservation parties.”

**Nature Trails**
Look for plants and wildlife in an upland forest on a glacial moraine. Visit the vernal pool and listen to the chorus of the wood frogs in spring.

**Nature Store**
The gift shop features a variety of nature books, maps, gifts, and educational materials. Your purchases help support refuges in Rhode Island.
