

SEABIRD COLORING PAGES

From the U.S. Fish & Wildlife Service's
"Learn About Seabirds" curriculum

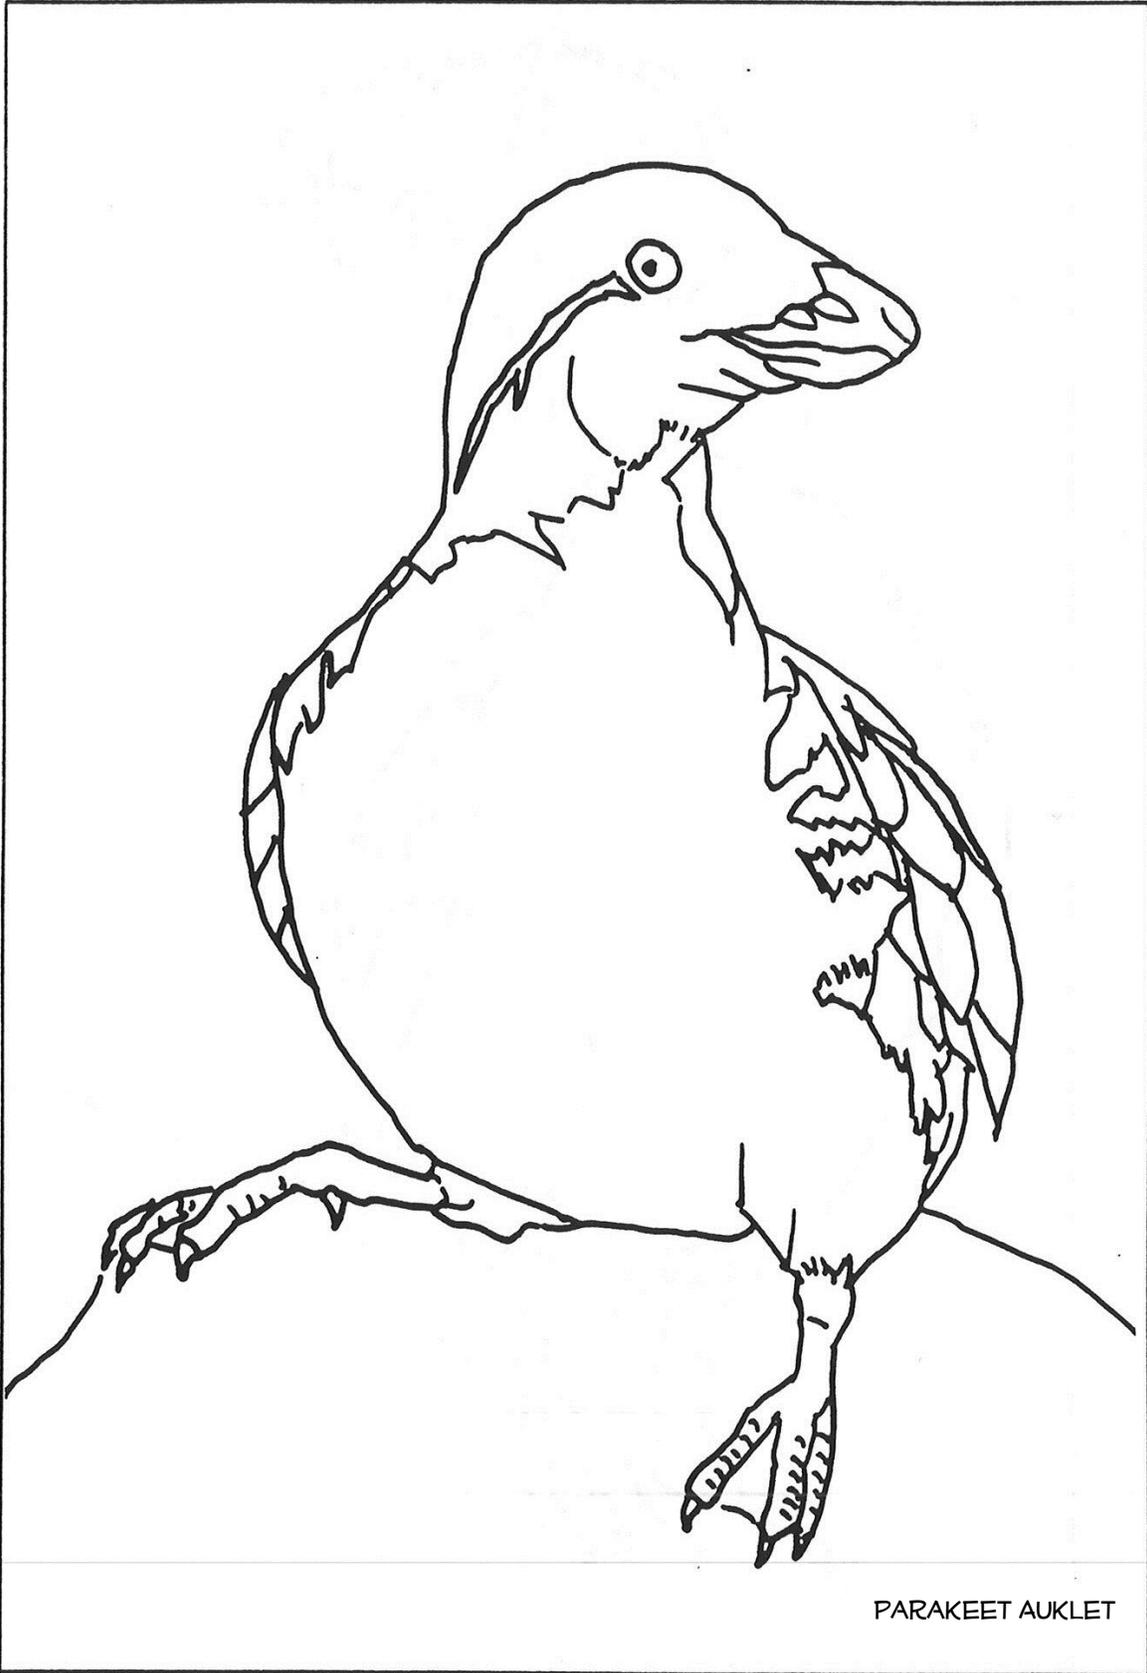

TEACHERS: these coloring pages will help your students become more familiar with several seabirds that live in our state. This includes the shapes and colors of their bodies. This activity will reinforce young students' knowledge of colors, and help all students create better seabird artwork.

Coloring keys are at the end of the document.

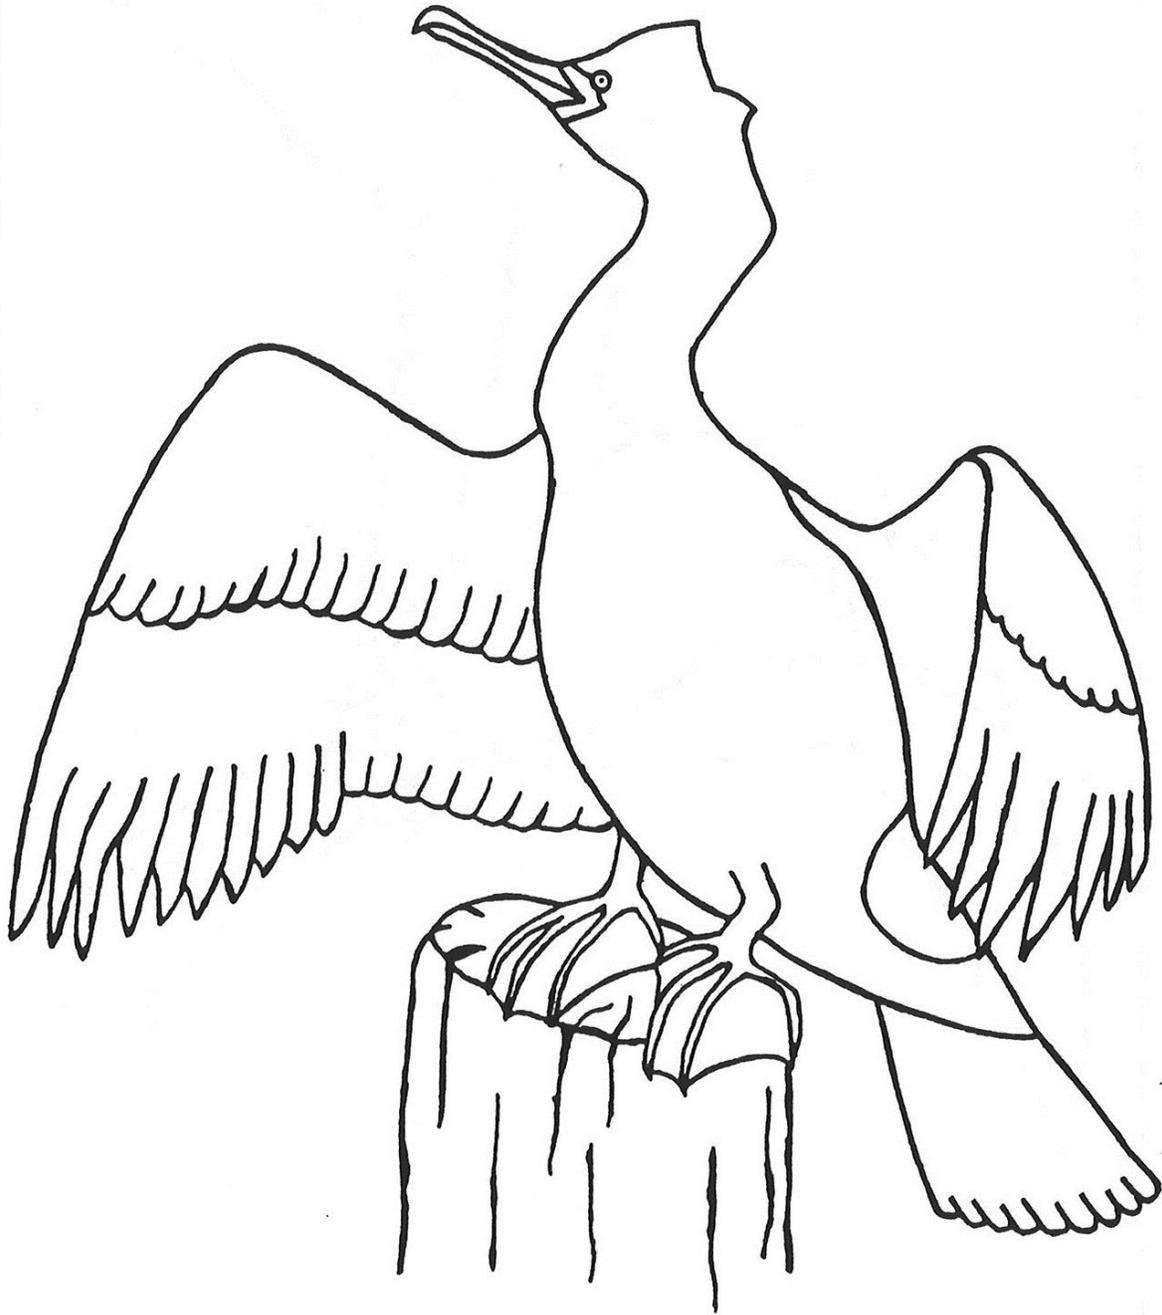

Please note: poster contest rules state that all student artwork must be original, and copying, tracing and templates are not permitted. We appreciate your instructing students accordingly.
