

# Sacramento NWR New Wildlife Observation & Photography Area

From February 15 - June, a new area will be available for visitors in the southern half of the Refuge.

Your journey will begin in parking lot D which is located off of Road 68 about 2.5 miles from 99W and I-5.

With 6 miles of trails, several pit blinds for photography, and various pools of water, the area will provide endless opportunities to catch glimpses of wildlife inhabiting the area.

Gather more information including a brochure at the kiosk. All visitors must sign the register.

As water levels recede, an abundance of shorebirds and wildflowers will scatter the landscape.
