Therefore, it will be presumed by the Tribal Court when adjudicating a citation or complaint for “Unauthorized Camping or Unauthorized Recreational Use” that the amount fixed by the Tribal council represents the damages owed to the Tribe as restitution if the offending party is found liable. This presumption may be rebuffed by evidence which demonstrates to a substantial certainty that the amount calculated for the “unauthorized Camping or Unauthorized Recreational Use” under examination is so excessive as to be punitive unless knowingly or willfully done.

1.27.2 All persons whether the same be members or non-members, will be deemed to have consented to the Liquidated Damages provisions of this Code by their entry onto the reservation.

This Section does not limit any power of seizure pursuant to a warrant; (vii) Retain custody of and provide for the safekeeping of anything seized as provide in this Section until final determination of any matter arising from the violation or an alleged violation with respect to which they are evidence. Suspected violators or damage contributors will sign the “Notice to Appear”, and if not held for federal authorities will be escorted off the Reservation and released, pending a hearing at the time and place stated in the Notice. All persons party to actions brought under this Code, will be subject to the civil contempt power of the Tribal Court, and may be sanctioned by any means provided for in the Pyramid Lake Tribal Law and Order Code for civil contempt, including but not limited to, detention to compel compliance with a lawful court order.

1.29.2 Trespassing. Violation of this Code by non-Tribal members of the Tribe automatically revokes any priorly granted permission to enter the Reservation and renders the violator a trespasser, subject to removal from the Reservation.

The third time any non-member will be found to have violated any provision of this Code or regulations made pursuant thereto in any five-year period, and upon a finding that there has been a violation subsequent to the three violations during such five-year period, the Chief Tribal Game Warden may recommend to the Tribal Council that such non-member be excluded from entering the Reservation for a period not to exceed three years from the date of the last violation and any camping permit issued to such non-member, if he has one, will be forfeited and no camping permit will be issued to such person during such period of exclusion. For purposes of this Section, forfeiture of a property bond will constitute a violation.

1.30 FEDERAL PROSECUTION.

1.30.1 18 USC 1165. Nothing in this Code will be deemed to preclude the Federal Prosecution under 18 USC 1165 of any non-member who trespasses on the Reservation. Any authorized officer may initiate such an action by filing a complaint in Federal Court.

1.30.2 18 USC 1163. This Code has been enacted to protect the resources of the Tribe and its members, and the taking or using of Tribal property and services contrary to the terms of this Code constitutes theft of Tribal assets. or in any manner known as snagging, or with any wire fence, trap, giant powder, or any other manner other than the act of fishing with legal tackle for personal use and not for barter or sale.

15.1.2 Only one combination of rod, line and not more than two hooks (which may be single, double or treble) will be used under a single fishing permit. A second combination of rod, line and not more than two hooks will require purchase of a Second Rod Permit (including Tribal spouses and Tribal employees). No more than two rod combinations are permissible under any circumstances.

15.1.3 All hooks actively being used for fishing will be barbless.

15.1.4 All equipment will be closely attended by permitted angler while fishing.

15.1.5 Possession and/or use of downriggers are prohibited from July 1 through September 30.

15.2 CHUMMING. Chumming is prohibited within the exterior boundaries of the Reservation.

15.3 SNAGGING. Snagging is prohibited within the exterior boundaries of the Reservation. Possession of fish that have hook marks in any area of the body other than the head or mouth will be prima facie evidence of snagging.

15.4 BAIT FISHING. The use of bait for fishing in the waters of the Reservation is prohibited.

15.5 STRINGER RESTRICTIONS. It will be unlawful to have more than one trout on a stringer while fishing. There will be a limit of one stringer per person. For purposes of this section, stringer is defined to be any piece of string, line, or rope, whether metal, plastic, fabric or otherwise, or similar material utilized by fishermen to string and keep fish in their possession in the water while fishing.

15.5.1 It will be illegal to release any fish that has been retained on a stringer, in a cooler or live well, or other holding device. A fish will be considered part of the daily bag limit when it is not immediately returned to the waters from which it was caught.

SOME GUIDELINES FOR CATCH AND RELEASE ANGLING:

The most important steps an angler can take to ensure a successful release are to hook and land the fish as quickly as possible, leave the fish in the water while removing the hook, and release the fish quickly. There are several other ways to improve survival rates:

- *Whatever you do, do it quickly. Keeping an exhausted fish out of water is like holding a bag over a runner who has just completed a marathon. They both need oxygen to recuperate.*
- *Wet your hands or gloves before handling the fish. Do not injure the eyes or gills. Placing the fish on a wet towel will help the fish retain its protective slime. To keep the fish still, place it on its back or cover its eyes with a wet towel. Control the fish at all times! If you drop the fish, its chances of injury and death increase.*
- *Decide beforehand which fish are to be kept; immediately release all others. Do not engage in a prolonged debate over whether or not to release the fish after the fish has been landed. Never place a fish in your live well intending to release it later if you catch a larger one. Once you make a decision to keep a fish, stick with it. The fishes you release from your live well have a decreased chance of survival.*
- *Avoid the use of gaffs, and never remove large fish from the water. Take a photograph of the fish in the water and release it.*
- *Refrain from holding fish in a vertical position when inspecting or photographing them. Internal organs are displaced and stress is increased in this unnatural position. Large fish should never be held by the bottom jaw only, with any tool designed to grip the lower jaw of caught fish to facilitate handling. Hold the fish horizontally by the lower jaw with one hand, and support the belly with the other hand. If unsupported, many large fish will rupture the isthmus - a cartilaginous bundle of ligaments that connects the head and body--and the fish will die a slow death from starvation. This connection is necessary for the tremendous gulping action during feeding.*
- *If the hook is difficult to remove by hand, use long-nosed pliers or a hook-removal tool. Do not tear additional tissue by removing the hook. Back the hook through the original wound. If this fails, cut the leader and pull the hook forward through the injury.*
- *Use circle hooks. They cause less injury and increase catch rates.*

- *If your fish is in good shape, immediately return it to the water headfirst. If it does not swim or is lethargic or erratic, some "resuscitation" may be needed until the fish can swim on its own. Revive exhausted fish by first placing one hand under the tail and holding the bottom lip with the other. If it is severely lethargic, depress the bottom lip to cause the jaw to gape and gently move the fish forward. Moving the fish in an erratic back and forth motion will just induce more stress. Have you ever seen a fish swim backward and forward? At the first sign of the fish attempting to swim away-let it go. Prolonged attempts at resuscitation will be stressful to the fish.*

15.6 USE OF LADDERS, ETC. Any ladders, milk crates, boxes or other objects used in the water as a fishing aid must be occupied or closely attended (i.e. remain in the area) by fishermen at all times. Any person who leaves such objects unoccupied in the water for more than one hour will be deemed guilty of littering.

15.6.1 Fishing aids described above must have a permanent tag affixed that has the name, address, and phone number of the owner of the fishing aid. If the permitted angler using the fishing aid is not the owner, the owner will be the responsible party for any infractions by the permitted angler.

15.6.2 Fishing aids described above may not be placed or used in the water before legal fishing hours, and must be removed by the end of legal fishing hours as defined in Section 18.

15.7 It will be illegal to transport live fish on any roadway within the exterior boundaries of the Reservation, with the exception of Federal, State, and Tribal entities who have written permission by the Tribal Chairperson. This includes transporting live fish in a live well (or other container) that has been removed from the water.

About Pyramid Lake, NV and its People

Pyramid Lake is located 35 miles northeast of Reno, NV and is the property of and managed by the Pyramid Lake Paiute Tribe.

Pyramid Lake is known as being North America's most beautiful desert lake and home to many year round recreational activities.

Pyramid Lake was designated as the first National Scenic Byway entirely on an Indian Reservation and has been recently named Nevada's first Preserve America Tribal Community. The lake has no outlet and is a residual body remaining from the prehistoric Great Lake Lahontan water body that covered most of northwestern Nevada thousands of years ago. The lake is fed primarily by the Truckee River and was named one of the best fisheries in the world by Fly Fishing and Tying Journal in 2010. The lake is world renowned for its Lahontan Cutthroat Trout and Cui-ui fish; Pyramid Lake is the only place on earth where the Cui-ui can be found. The lake is also home to the Anaho Island National Wildlife Refuge, which supports one of the largest breeding colonies of American white pelicans in North America. The Pyramid Lake Indian Reservation is comprised of 476,728 acres in Northern Nevada. The roughly 2,500 Tribal members are direct descendants of the Northern Paiute people who have occupied the vast areas of the Great Basin for thousands of years. The Paiute people call themselves Numu, or "The People". Pyramid Lake Paiutes are called Kooyoee Tukkadu or "Cui-ui Eaters". Deeply grounded in their environment, the Paiutes believe that power (pooha) resides in any natural object including animals, plants, stones, water and geographical features.
