

# RETURN OF THE CRANES

November 16, 2019  
4:00pm-5:30pm

Fall has arrived and the sandhill cranes have started their annual migration south to the Pixley National Wildlife Refuge. The staff of Kern and Pixley National Wildlife Refuges would like you to come join us for a short hike to the observation platform for an opportunity to see thousands of sandhill cranes returning to roost at the refuge. Meet in the parking lot, please bring a flashlight, sturdy comfortable shoes and layers. Special thanks to the Tulare County Audubon and the Kern Audubon.
