

Super Moon Viewing Events

The full moon is upon us! However, it's not just any ordinary full moon. It's the **SUPER MOON!**

The moon will be the closest it has been to Earth in almost 70 years! The next super moon won't be until 2034.

Come join us for a special super moon viewing event! The lack of light pollution on the refuge will make it a perfect place to see this spectacular astronomical event!

When: Sunday, Nov. 13 @ 4:45 PM

Monday, Nov. 14 @ 4:45 PM

Where: Occoquan Bay NWR parking lot
