

Summer Nature Adventure

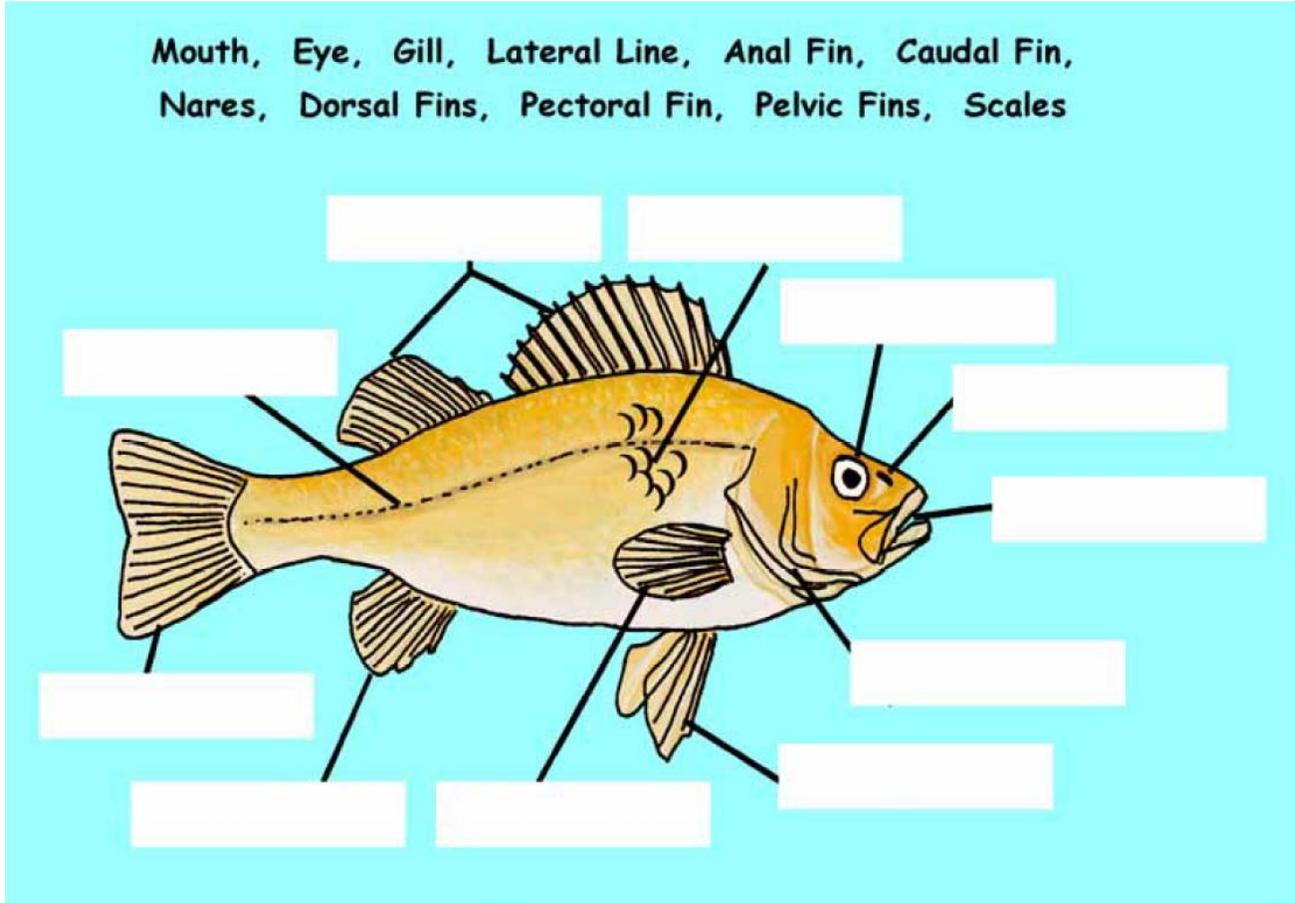

Clarks River National Wildlife Refuge Date:

Fantastic Fishes

(Taken from the BIT activity booklet)

Fishing is a fun summer activity that everybody can enjoy. Label each part of the fish below so when you catch your next fish, you can observe and name all its parts. Answers are on the back.

Mouth, Eye, Gill, Lateral Line, Anal Fin, Caudal Fin,
Nares, Dorsal Fins, Pectoral Fin, Pelvic Fins, Scales

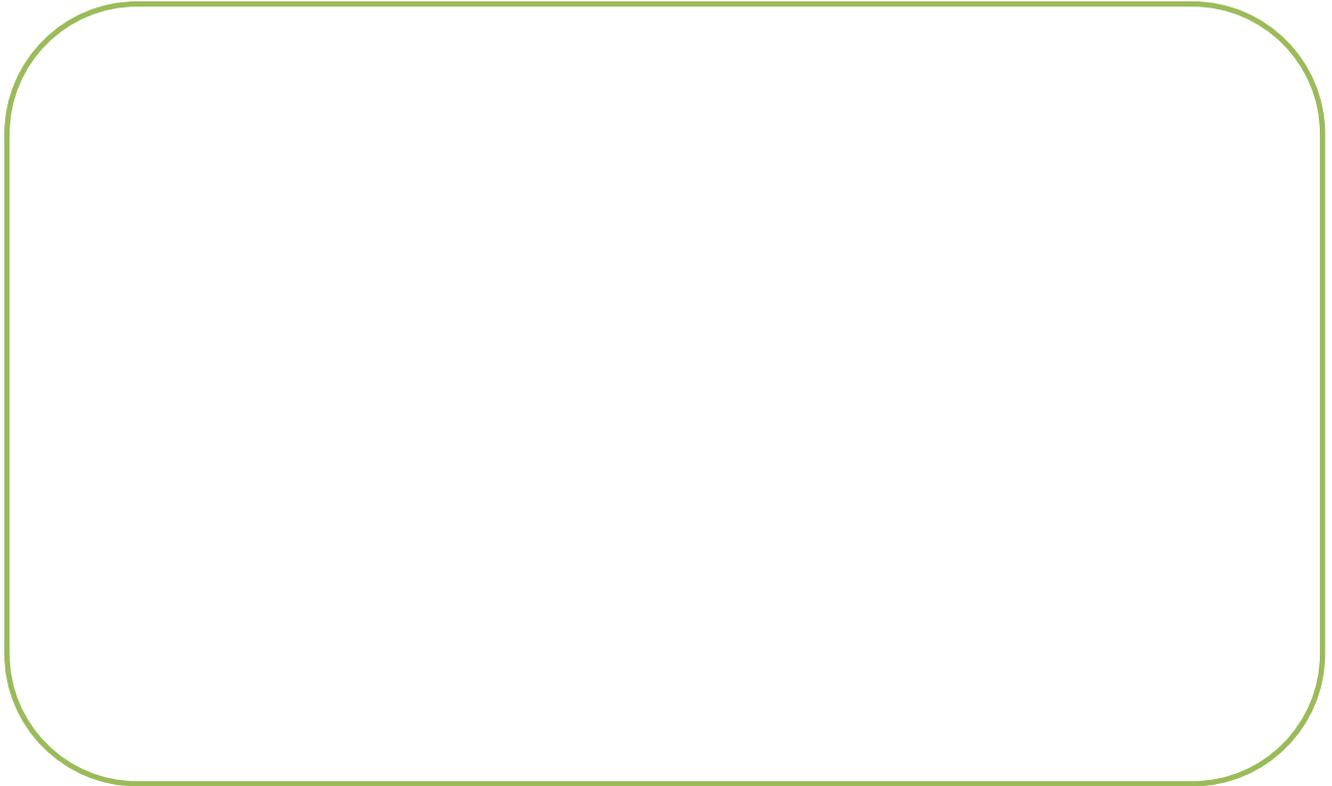

Cloud Story Telling

The clouds can take on many funny shapes. They can look like animals, people, or silly things we make-up with our imagination. Look up at the clouds and list four different shapes you see. Then, create a story including all of those shapes.

- 1
- 2
- 3
- 4

Look around! What do you see in nature? Find 4 different things you think are interesting and draw them below and tell what they are or what you think wildlife could use them for.

There are many different colors in nature, not just green and brown.

See how many objects you can find that match the colors below.

Red

Orange

Yellow

Blue

Purple

Black

Pink

Teal

Hummingbirds are a fun bird to observe in the summer. They get their name from the sound they make when they fly, but the bird isn't actually humming. Its wings are beating so fast you can hear them. On average a hummingbird beats its wings over 3,000 times a minute.

How many times can you beat your wings in a minute?
