

Below are notes from the **February 9 conference call** with Kipp Frohlich and David Shindle. Larry Williams was unable to join the call.

The call, moderated by Elizabeth, discussed the draft Hot Spots Report and provided **additional direction** to the Transportation SubTeam. Darrell, Katasha, and Nancy participated in the call.

1. The list of road segments will be updated to identify those having Slow Speed Zones.
2. The Crossings Guidelines will be referenced in the Notes and will be attached to the final report.
3. A Project Status sheet will be developed for each Red and Orange road segment.
4. Each sheet will be included in the final Hot Spots report.
5. Each sheet will expand on what is in the Comments section.
6. Each sheet will include solutions and an order of magnitude cost estimate; detailed status of PD&E; and reflect FDOT, county or other commitment to build the needed solutions.
7. Each sheet will reference relevant bullet points in Crossings Guidelines.
8. SubTeam will generally categorize existing crossings (2-lane, 4-lane, dimensions, culverts, bridge ledges, etc.).
9. FDOT will develop rough cost estimates per general crossing type.
10. This information will accompany the Hot Spots report and will be used for the solutions and costs (see #6).
