\* If a manatee is sighted in an orange or red canal, please call 1.888.404.3922.

Due to scale, some map features appear to conflict (red structures in green canals). These structures are often connected to secondary canals that are not part of this GIS coverage. These structures do not hinder manatee movement through the primary canal. Please consult the accompanying structures database for clarification.

This map is a tool meant to be used in the preapplication and planning process regarding manatees and does not replace State and Federal permitting procedures. All activities must still adhere to all permitting requirements and conditions. This map is a product of data gathered from many sources and is not to be used for any purpose other than informational. This map is subject to constant revisions and updates without notice. Contact the Service's Vero Beach Office (772.562.3909) to receive updates.
