- Linders, M. 2012a. Pers. Comm. March 6, 2012. Telephone conversation between M. Linders, Washington Department of Fish and Wildlife, and T. Thomas, U.S. Fish and Wildlife Ecologist, Lacey, Washington. Regarding: Where Taylor's checkerspot butterfly larvae tend to find shelter during wind and rainy weather. M. Linders stated that she has found Taylor's checkerspot butterfly larvae in sheltered clumps of vegetation to protect themselves from wind and weather. She said pre-diapause larvae, because of their small size, move extremely short distances while feeding, compared with post-diapause larvae that might move as far as several meters to new clumps of host plants. She also noted that adults tend to roost on slightly larger (taller structure), nearby plants like Puget balsamroot, sickle-keeled lupine, and nine-leaved lomatium.

- Steucke P. 2008. Pers Comm. September 17, 2008. Phone conversation between P. Steucke, Chief, Environmental and Natural Resources Division (ENRD) for Joint Base Lewis McChord (JBLM), D. Clouse, Manager, Wildlife Branch, ENRD, JBLM, and T. Thomas, USFWS Ecologist, regarding training area negotiations. P. Steucke indicated at that time that DOD is updating their INRMP to be submitted to USFWS. In subsequent discussions with P. Steucke, including several meetings with ENRD, Range Control, and other JBLM staff during 2010 and 2011, the date projected for submission has shifted to 2012.

- Stuecke, P. 2012. March 1, 2012. Conversation between P. Stuecke, Head of Joint Base Lewis McChord Environmental and Natural Resources Division, his staff, and T. Thomas regarding the specific management practices desired by the USFWS for confirmation of concurrence for their Endangered Species Management Plans and the Integrated Natural Resources Management Plan.

- Thomas, T.B. 2009a. February 26, 2009. Ecologist, US Fish and Wildlife Service. T. Thomas was accompanied on site by D. Clause and J. Lynch, JBLM staff, and C. Scafidi, USFWS Biologist. T. Thomas observed disturbance and destruction of prairie habitat used by Taylor's checkerspot butterflies on Range 74, 75, and 76 on JBLM by Strykers vehicles.
- Thomas, T.B. 2009b. May 16, 2009. Personal observation of Taylor's checkerspot monitoring on JBLM. T. Thomas observed Taylor's checkerspot butterflies and local vegetation communities on Range 76, outside of the monitoring transect. Approximately 50 Taylor's counted on this day by T. Thomas. Conditions for monitoring were ideal, >74% degree F., high cirrus clouds, distinct shadows, winds picked up after 2:00 PM. Overall the Taylor's counts for this season were significantly lower than in previous years, or in the subsequent years of 2011 and 2012.

- Thomas, T.B. 2011. Personal Observation. July 19, 2011. T. Thomas participated in a field review of the North Olympic Peninsula Taylor's checkerspot sites with D. Hays, Wildlife Biologist, WDFW. T. Thomas and D. Hays observed the encroachment of the Striped Peak and Highway 112 sites (now extirpated) by native Douglas-fir, native shrubs and invasive, nonnative Scot's broom.
