

Lower Hatchie National Wildlife Refuge Public Use Regulations 2011-2012

Lower Hatchie National Wildlife Refuge plays an important role in our National Wildlife Refuge System. This area was established to provide essential habitat for migratory birds in the Lower Mississippi Valley. The U.S. Fish and Wildlife Service administers the refuge system and is responsible for conserving, protecting, and enhancing the nation's fish and wildlife populations and their habitats for the continuing benefit of people.

The provisions listed below supplement the general regulations which govern recreational and educational uses on wildlife refuge areas as set forth in *Title 50, Code of Federal Regulations*. When permitted, hunting, fishing, and other recreational uses will be in accordance with applicable state laws unless otherwise listed.

General Provisions and Access Regulations

By law, National Wildlife Refuges are closed to all recreational activities unless expressly permitted. The refuge is a day use area *only*, with the exception of legal hunting activities. No person shall access the refuge earlier than two hours before legal sunrise. Hunting, fishing, and certain other recreational uses are permitted on most areas of the refuge. *Contact the Refuge Manager for current regulations and authorized activities before entering these areas.*

Disabled Access

Most refuge areas are universally-accessible to the disabled. Persons with disabilities are encouraged to participate in refuge hunts and other activities. Contact the refuge manager for guidelines to obtain special use access.

Roads may be closed at any time due to adverse weather conditions or management needs. Vehicles must remain on established roads as indicated on the maps on this leaflet. Vehicles may be parked alongside open roads in a manner that will not interfere with the normal flow of traffic. *Please avoid driving on refuge roads during wet conditions as damage to the roads will result.*

Closed Areas

Designated areas will be closed to hunting, fishing, and all other public access during fall and winter months to provide resource protection (see map for specific locations and dates of closures). Other areas may be closed for

special management or safety reasons. *All refuge access is prohibited after dark unless specifically authorized by the refuge manager.*
