Memorandum

To: Group Leader, National Wetlands Inventory, St. Petersburg, FL
Attn: George Eliason

From: Assistant Regional Wetland Coordinator, Region 3

Subject: Transmittal of Poplar Bluff NE for Correction

I have finished my Regional PIQC review on Poplar Bluff NE under Task Order No. 86-19 (Lake of Ozarks Bottomlands). Attached are my Regional QC notes.

Cindy Bohn has done a fine job on this map. Her PI work is neat and well done.

After discussing the tie problems between Poplar Bluff NE and SE, we have decided that the ties should be done as much as possible to maintain continuity between maps. I have already made several corrections, however, the remaining corrections to be done are written in red on the frosted mylar 15' maps of Poplar Bluff SE. Note that the 15' map sector is not in the photopack and needs to be checked with the bottom photos of strips 3 and 4. After you have corrected these external ties and review my notes, this map should be submitted directly to National PIQC for their review.

Please call me if you have any questions.

R. Nicholas Rowse

U.S.F.W.S. REGIONAL OFFICE
ST. PETERSBURG, FL

Regional QC Notes - Poplar Bluff NE (Task Order 86-19)

- Strip 1 - Photos 151-48, 46, 44, 42, 40
- minor corrections
- Strip 2 - Photo 161-221
- Puxico topo missing, not sent with photopack
- few missing labels
- changed two R2UBH to PUBG adjacent to Mingo Ditch, cutoff oxbows
- Photo 161-217
- unlabeled polygons
- added more PFO1A
- Photo 161-213
- added some special modifiers
- leader lines from field check asterisks should enter the polygon of wetland field checked
- Photo 161-211
- unlabeled polygons
- Strip 3 - Photo 159-157
- added h modifiers to those A wetlands impounded by Lake Wappapello
- Photo 151-57
- tie correction with 151-59
- Photo 151-61
- added PSSIC in Black River floodplain that was left out and labeled farmed. This area probably was farmed but now is scrub-shrub and flooded.
- internal QC corrections not completed
- Strip 4 - Photo 161-174
- pulled out more R4SBA along R4SBF
- added h modifiers to wetlands impounded by Lake Wappapello
- a few missing PUBGh
- corrected tie with 161-176
- rest of strip
- minor corrections
- Strip 5 - minor corrections
- Photo 161-66
- several missed PUB
- Photo 161-70
- changed R20WHx to UB
- other minor corrections

Strip 6 - Photo 161-101

- on question about delineating possible PFO1As along steep stream banks, I would not pull these out unless it is clearly PFO1A. It is possible there are some linear PFO1As
- several unlabeled polygons

- rest of strip
- minor corrections

Strip 7 - Photo 177-158

- area in question is a PSS1B

- rest of strip
- minor corrections

- Photo 151-137
- deleted PUBGh not on February 8, 1984 photography. We have to map wetlands based upon the date of photography

Strip 8 - Photo 179-40

- changed some R4SBF to A, white signature along dark blue streams
- missing labels

- Photo 179-44
- changed R4SBF to A

- Photo 179-46
- missed a number of small PUBFh
